

## FFY 2017 CMS-416 Footnotes (as of 03/12/2019)

**Note:** States that have data limitations or that have made program changes during a reporting period that significantly impact data results, may include a note accompanying their Form CMS-416 submissions. The state-submitted footnotes for FFY 2017 reporting are provided below, and should be reviewed in the context of data submissions.

**Idaho:** Due to challenges related to changes in Idaho's managed care dental program network and MMIS system that occurred during FFY 2017, the State estimated their dental rates on lines 12a-12g of the FFY 2017 CMS-416, based on the three previous years of CMS-416 reporting and enrollment data from the capitated payment reports.

**Wisconsin:** Wisconsin corrected errors in the CMS-416 data extraction logic for report year 2017. These corrections resulted in a material impact to dental lines 12a through 12g, and smaller impacts to other lines. The main error was because of an incorrect categorization of some services rendered by dentists and dental hygienists.

**Vermont:** Vermont submitted a revised 2017 Form CMS-416 to amend Line 14a. Total Number of Screening Blood Lead Tests in order to maintain consistency in reporting as used in prior years.

**Maine:** Maine submitted a revised 2017 Form CMS-416 to correct its Line 2a. State Periodicity Schedule.

**Colorado:** Colorado submitted a revised 2017 Form CMS-416 to correct eligibility counts in both Lines 1a. Total individuals eligible for EPSDT and 1b. Total Individuals eligible for EPSDT for 90 Continuous Days.

**Delaware:** Delaware submitted a revised 2017 Form CMS-416 to correct its Line 2a. State Periodicity Schedule.
