The Greater Lowell BH CP will seek candidates that possess academic credentials and/or applicable experience in clinical settings, community health work, peer specialists, and /or recovery support as well as knowledge and experience of local resources, BH and SUD treatment systems. We will further identify and recruit candidates whose share racial, ethnic, linguistic and geographic characteristics of the population served.

Job descriptions are provided as Attachment 7.3.E-2.

4. Recruitment and Hiring from Cultural and Linguistic Communities Served

Greater Lowell BH CP is committed to ensuring that staff is representative of the communities we serve. We recognize that "culture" encompasses more than linguistic diversity, and includes racial or ethnic background, national origin, immigration/refugee experience, physical or mental disability, gender and gender identity, and sexual orientation.

To that end, we take care to ensure that our providers, staff, and volunteers are responsive to the linguistic, cultural, ethnic, or other unique needs of all Enrollees. We will assess our current capacity and competencies through an initial survey of provider and staff relative to Community Partner Supports and cultural diversity. We will also utilize existing community needs assessments and studies, and will work with our ACO and MCO partners to maintain ongoing demographic, cultural, and epidemiological profile of the community. This information will be used to identify both hiring priorities, and training needs to increase sensitivity to the needs of individuals from different cultural and ethnic backgrounds. We will work closely with community-based organizations (e.g. immigrant and refugee coalitions, advocacy coalitions, LGBTQ advocacy agencies) to identify and leverage opportunities for targeted recruitment activities. We will also partner with ACOs and MCOs to conduct job fairs in specific communities and in languages other than English (where possible).

Starting in Budget Year 1, we allocated funding for interpreter services to support member engagement when we are not able to match the enrollee with a care coordinator or resource person who speaks their language.

We recognize that recruitment of a diverse BH workforce – particularly though not exclusively for substance use – is a nationwide challenge, with numerous systemic barriers that will be difficult to overcome. To that end, over the life of the contract we will evaluate the utilizing

DSRIP funds for short-term workforce development strategies (for example, signing bonuses for employees from underrepresented communities), and implement a longer-term initiative to review and potentially augment our staff retention programs, including ongoing career development, educational assistance, ongoing on-going licensing and credentialing opportunities, and leadership training.

5. Proposed Training

Greater Lowell BH CP participants manage training programs for our staff that help staff understands the needs of high-utilizing individuals with SMI or SUD. As we do today, we will train our CP staff on person-centered strategies to care for individuals with SMI and SUD with a focus on integration. We will leverage existing training modules to develop comprehensive CP training. We will also provide refresher training, as well as updated training on best practices, at least annually. We will finalize training modules and training schedules prior to the contract effective date. Below are examples of potential training modules:

Listing of Proposed Training Modules	
Understanding and awareness of the needs of high-utilizing individuals with SMI or SUD	· Chronic Illnesses and SMI/SUD · Recovery and Resiliency · People with Intellectual, Cognitive, and Developmental Disabilities · Working with Adolescents · BH Services: What are BH Services, Who provides them, and How Do We Work Collaboratively?
Understanding Community Partner Supports	· Scope of services · Partnership and Collaboration with ACOs/MCOs · Comprehensive Assessment and Treatment Plan · Flexible Service: Resources, referral, follow-up · Collaboration and Communication with community agencies
Cultural Perspectives – Recognizing sensitivities to different cultures, religions, values, and backgrounds	· The Impact of Culture on health and health care (with focus on SMI/SUD) · Health Disparities · Culturally Competent Behavioral Health Care Delivery · The LGBTQ Community · CLAS (Culturally, Linguistically, Appropriate Care) Model
Treatment Intervention Approaches	· Engagement & Outreach · Wellness Coaching · Tobacco Cessation · Motivational Interviewing · Harm Reduction Approach · Trauma-Informed Approach

We will partner with ACOs and MCOs to hold periodic conferences for Enrollees, staff, advocates, BH CPs, social service and community agencies to which Subject Matter Experts (including experts from the ACOs, MCOs, and ILCs). We will facilitate staff training by making work hours available for staff to participate on a mandatory basis; tracking participation; enabling online evaluations and scoring; and, providing resource guides and training materials to

reinforce learning. We will also work with ACOs and MCOs to develop and deliver training on topics of mutual and common interest, such as care coordination strategies, community collaboration, and cultural competence.

We will leverage existing MassHealth training and resources into staff training and material, encourage MassHealth training forum attendance and ensure staff interacting with Enrollees with BH needs complete required training on BH competencies.

6. Staff Retention Strategy

As referenced above, there are systemic challenges and barriers to recruiting and retaining qualified, trained and experienced staff. We will address these challenges with a long-range, comprehensive, multi-pronged strategy, including ongoing career development, educational assistance, ongoing on-going licensing and credentialing opportunities, and leadership training.

In the short term, we hope to use DSRIP funds for certain defined workforce development initiatives, including staff retention efforts. We propose collaborating with other BH CPs, ACOs and MCOs to explore opportunities for collaborative efforts to develop and implement staff retention programs, including professional development. Potential areas of focus include:

- Strategies to encourage workforce to continue to earn degrees in higher education and professional credentials
- Provide leadership training and management skills development training to support staff who seek to advance in their careers
- Provide on-going opportunities for continuing education for licensing and credentialing

Funding for these efforts are concentrated in the latter budget years to promote experienced staff staying with our program. We recognize that being able to raise salary levels and benefits is important to promote staff retention; we include a 2% raise each contract year for staff. There are additional non-financial benefits that can also aid in retention by improving staff experience in the workplace. These include:

- Foster an enhanced sense of ownership and accountability among staff by expanding our existing mechanisms to solicit, obtain, and incorporate (to the extent appropriate) staff input into program development, administration, and management
- Cultivate a supportive organizational culture by providing more focused and personalized management, supervision, and mentoring
- Create job opportunities for people in recovery from SUD within the BH CP
- Exploring opportunities to reduce the administrative burden on staff by streamlining recordkeeping and other documentation requirements
- Staff recognition and staff events

Exploring and implementing creative work allocation and scheduling to allow staff to achieve a healthy work-life balance.

F. Implementation Plan and Timeline

We provide implementation timelines for the Preparation Budget Period and each subsequent Budget Period in Attachment 7.3.F.

G. Budget Report and Budget Narrative

We provide our Budget Report and Budget Narrative in Attachments 7.3.G-1 and 7.3.G-2 respectively.

H. Sustainability

The Greater Lowell BH CP will sustainably fund the proposed infrastructure, capacity building investments and BH CP support services during the Contract Term and follow the initial Contract Term through:

- DSRIP Dollars (initial investment and ongoing funds distribution associated with volume
- Shared savings initiatives developed over time with the ACOs/MCOs
- The ability to sell services to MCOs for non-CP eligible individuals who can benefit from CP services to manage the Total Cost of Care for more Enrollees
- Managing fixed costs associated with IT, licensing, fees and general expenditures over time
- Identifying and developing new services for ACO, MCO, and other enrolled individuals to help individuals live independently in the community, decreasing the total cost of care associated with avoidable hospital utilization.

I. Quality Management and Performance Monitoring

1. Quality Management and Improvement Program

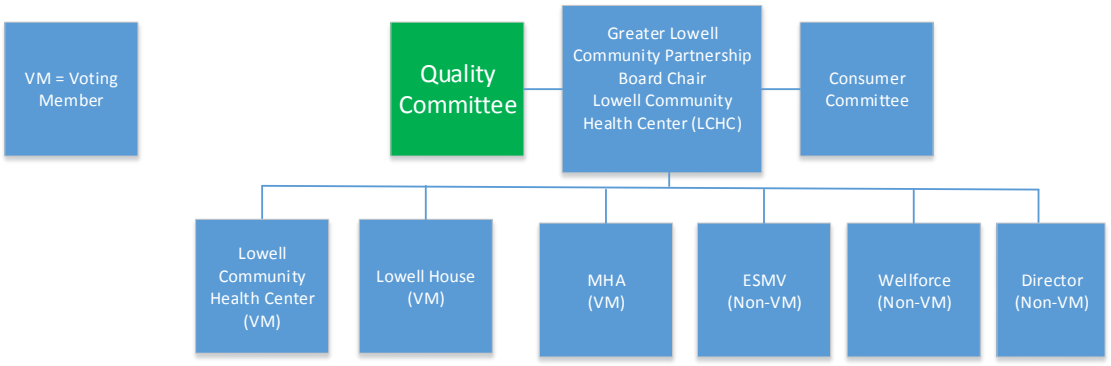
Lowell Community Health Center, Mental Health Association of Greater Lowell and Lowell House each bring to our Partnership a solid commitment and robust processes to measure, review and improve quality of care for our members and communities. Quality is not a department; it is fundamental to the missions and cultures of our organizations and embedded throughout all standardized processes for the BH Community Partnership. The Greater Lowell BH Community Partnership leverages these strengths to assure that we consistently apply evidence-based quality assurance and quality improvement strategies, and that we respond rapidly to program deficits and to identify and disseminate best practices. Our combined quality management/ quality improvement plan emphasizes performance monitoring and improvements to meet the needs of our members, including care coordination, transitions support, clinical quality, member engagement, continuity and a positive and caregiver member experience. We will continue to measure and meet the needs of our communities as well, as defined by the missions of each organization.

We will work to improve care continuously by using data to identify and address anomalies in care and outcomes; developing interventions to ensure that goals are achieved; completing objective measurement processes; and implementing improvement initiatives.

Quality Committee for Shared Accountability

Central to the shared accountability for quality within the Greater Lowell BH CP, is the multi-agency, multi-disciplinary quality committee. The committee will include Quality Managers and Clinical representatives from all three organizations, in addition to the BH CP Program Director and the Data Analyst. The Committee is charged with monitoring performance and driving improvements for the Partnership. The Quality Committee will meet quarterly and as needed to monitor performance and address new or ongoing issues.

The Quality Committee will report to the Governing Board, as shown in the organizational chart below:



Specific responsibilities of the Quality Committee include monitoring data, defining priorities and overseeing improvement projects across the Greater Lowell BH Community Partnership and participating organizations.

Process for Quality Assurance and Quality Improvement

The Quality Committee provides oversight over all quality measurement, prioritization and implementation of quality improvement efforts to assure consistency and shared accountability across the organizations in the Greater Lowell BH Community Partnership.

Review Data on Performance Metrics: The Quality Committee will review data on our performance and benchmarks for all BH Community Partners quality metrics as provided by MassHealth and our MCO/ ACO partners. Additionally, we will review data from other sources, including internal data sources, the Community Needs Survey, and the MassHealth Enrollee Satisfaction Survey, and other sources to establish priorities for improvement or initiatives to meet the needs of our members and communities. The Quality Committee, along with BH Community Partnership leadership, will also discuss any complaints, concerns raised by members or other stakeholders regarding the quality of care delivered and formulate a response plan.

> **Dashboard:** As a part of the data review process, the Greater Lowell BH Community Partnership team will create a dashboard for easy monitoring of priority metrics across organizations and by the Governing Committee and the Consumer Advisory Board. The dashboard will focus on a limited number of priority metrics and will identify current performance of the Partnership, benchmark data if available, identified targets and whether current performance is meeting targets (red, yellow, green markings).

Identify Opportunities for Improvement: Given performance data and needs, the Quality Committee will define a limited number of priorities for focused improvement efforts to improve clinical quality, member engagement, care coordination, continuity and member experience. The Committee will identify priorities through consensus, taking into consideration weighting of quality metrics in the accountability score, the priorities of partner ACOs including utilization and contributors to total cost of care, ongoing improvement efforts by Partnership

agencies, and community needs. The Committee will select at least one main priority for improvement from the quality metrics each quarter.

Strategies to Improve Performance: The Quality Committee will launch or oversee concrete performance improvement initiatives, driven by the principles of continuous quality improvement and plan-do-study-act, to respond to priority improvement initiatives. The Committee will initiate a deep-dive into data or processes to identify root causes or variation in processes, as well as any best practices among organizations in the Partnership. Data sources could include: medical record review, Enrollee and/or provider complaints, utilization review, and survey data.

Each organization within the Partnership will champion performance improvement projects within their own organization, in line with the priorities and findings of the Quality Committee and best practices. In this way, the Greater Lowell BH Community Partnership assures the shared accountability for performance across agencies and supports the sustainability of performance improvement programs. Each organization will include their front-line and leadership staff to plan and implement improvement efforts. Representatives from each organization will report back on findings of the improvement initiatives at each Quality Committee quarterly meeting.

If the improvement program targets standardized processes across the Partnership, the planning and implementation team will include shared staff and representatives from each organization to refine the common practices and reduce variation.

Quality Management/ Quality Improvement (QM/QI) Plan

In line with the Quality Management infrastructure and processes outlined above, the Greater Lowell BH Community Partnership Quality Committee will develop an Annual Quality Management Plan as required in our contract with MassHealth. The Quality Management Plan includes the dashboard of current performance, the specific goals for improvement and the summary of actions anticipated in the coming year to address challenges in member engagement, clinical quality or member experience. Specifically, the plan will include at least three quality improvement projects throughout the year focusing on some or all the priority domains:

- Member quality of life;
- Chronic disease management;
- Caregiver stress;
- Community tenure, isolation and social connectedness;
- Care coordination or care management; or
- Care transitions.

The QM/QI Plan will be a responsive, dynamic document and we will continually update it based on stakeholder input, data analysis, Quality Committee priorities and subsequent performance metrics reporting.

2. Sample Quality Initiative

Greater Lowell BH CP is committed to improving care for our Members by enhancing the quality of services we provide. To that end, we propose to implement a quality initiative related to enhancing Care Coordination and Care Management for high-cost, high-risk Enrollees served by the MassHealth program.

Description: In Year 1, engaging our attributed and assigned members in high quality care coordination services is our top priority. As with any new program, we anticipate that engaging members to complete a comprehensive assessment and develop a care plan within 90 days of assignment will be challenging. We expect barriers to engaging members already working with our agencies and members not known to us, although those challenges may be different. Initial engagement is important to assure that our members receive the care coordination, case management and additional benefits that will help them maintain health and quality of life and promote effective, efficient care.

Through our quality management program in year 1, we will implement close data monitoring and a Plan-Do-Study-Act approach, including these steps:

- Hire and train dedicated Engagement Specialist to provide initial outreach attempts to members and support with scheduling comprehensive assessments;
- Develop a dedicated dashboard to review progress toward engaging members within 90 days;
- Establish common outreach processes and procedures based on evidence-based, best practices to include phone calls at letters, in person outreach strategies;
- Connect with community based organization around the Greater Lowell region where our members may access services, including ways in which we can partner to engage members;
- Develop common templates and strategies for initial member engagement communications;
- Process for consistent monitoring of each outreach strategy to determine effectiveness at reaching members and obtaining agreement to participate in the assessment and the case management program;
- Initiate Quality Committee meetings to review data including drill-down data, discuss any patterns of success or failures in member engagement and define improvement strategies;
- Measure success at engaging members as defined by the metrics below.

Domains: Member engagement in the BH Community Partnership program is fundamental to achieving all priority areas, especially care coordination and case management.

Target Population: The target population for this initiative includes all members who are attributed or assigned to the Greater Lowell BH Community Partnership in year 1.

Measures for Success: Measures of success and targets for this effort are aligned with the member engagement quality metrics for the BH Community Partner program:

Measure	Population (Known to BH CP or Unknown)	Target
Percentage of CP Assigned Enrollees with documentation of a comprehensive assessment and approval of a care plan by primary care clinician or designee and member (or legal authorized representative, as appropriate) within 90 days of assignment to BH CP	Members known Partnership Organization(s)	75%
Percentage of CP Assigned Enrollees with documentation of a comprehensive assessment and approval of a care plan by primary care clinician or designee and member (or legal authorized representative, as appropriate) within 90 days of assignment to BH CP	Members not known to Partnership Organization(s)	60%

We will add additional, interim metrics as needed to monitor the performance of each organization and the Partnership overall in engaging members.

We will implement this initiative in Budget Period 1 and continuously evaluate the effectiveness of this initiative in meeting established goals. Data related to this initiative will be continuously monitored through our Quality Committee structure as described above.

J. Coordination with ACOs and MCOs

1. Strategies to Communicate Skills, Expertise, and Value to ACOs and MCOs

Greater Lowell BH CP is aware that an essential part of the success of the BH CP contract relies on our shared ability to coordinate key elements of our BH CP infrastructure with ACOs and MCOs in our service area. We believe that Enrollees will be best served by the ACO or MCO sharing a single, modular Comprehensive Assessment and ICP Plan that supports the sharing of complete, up-to-date integrated Enrollee information across organizations, including state agencies and community-based organizations. Such sharing of information is crucial to the

delivery of integrated care management and represents an opportunity to achieve savings on infrastructure and IT resources.

From the outset, we will a have a compliant, functioning solution that supports care integration; however, over time, our desire is to have a fully interoperable system capable of supporting shared assessments, care plans, reporting and quality management functions. We believe that creating a fully integrated IT system is the State's responsibility; however, we are already collaborating with ACO and MCO partners in our service area and will do everything possible to support such collaboration.

We have already initiated discussions with ACOs and MCOs in our service area to discuss our skills, expertise, and value to care integration efforts. Such discussions will continue over the next several months as BH CP, LTSS CP, ACO and MCO contracts are awarded by EOHHS. We are communicating and will continue to educate ACOs and MCOs regarding:

- Shared responsibility in caring for MassHealth consumers with the greatest needs and level of risk, given their SMI and/or SUD diagnosis.
- The contribution that the Greater Lowell BH CP can make to delivering quality care for individuals with SMI and SUD diagnoses. We will impact integration, patient satisfaction and Total Cost of Care (TCOC) among other measures, all of which will be vitally important to our Enrollees and to our organization, ACOS and MCOs our joint efforts to deliver care
- The breadth and depth of BH CP services available to Enrollees who are eligible for such services. For example, we will discuss the specialized nature of the BH CP component of the Comprehensive Assessment, the Individualized Care Plan (ICP) and ongoing care plan implementation and monitoring.
- The importance of primary care delivery for individuals with SMI and SUD, many of whom go without primary care services for a variety of reasons. One of our goals is to ensure that individuals with significant BH diagnoses receive primary care services, given that individuals with SMI diagnoses die, on average, 25 years earlier than their peers without an SMI diagnosis.
- Collaborative strategies to integrate primary care and BH care for BH CP eligible individuals in the assessment, care planning, and care delivery process.

2. Branding and Marketing Plans the Bidder Has Regarding Its Relationship with ACOs and MCOs

Greater Lowell BH CP will develop educational materials for Enrollees that inform them of our BH CP services, guided by MassHealth policy and procedure, which clearly prohibits MassHealth vendors from directly marketing to Enrollees. Our priority will be to serve Assigned Enrollees who have a pre-existing relationship with our organization.

For Marketing and Branding, we plan to take a highly educational approach including, but not limited to:

- Developing a consumer awareness campaign of the value of BH CP services for individuals with significant BH needs. Our goal is to enhance access through such awareness. Materials will be made available to ACOs and MCOs in the most commonly spoken languages in the service area and can be distributed to Enrollees as part of the Enrollment process.
- Use the local media outlets, including Lowell Telecommunications, radio stations and our relationship with the Lowell Sun, to assure we reach all potential Enrollees in the Greater Lowell area.
- Educating ACO and MCO partners regarding our services, our approach to Enrollee services and the nature of integration we offer, which will benefit Enrollees.

3. Collaboration with Multiple ACOs in the Service Area

The Greater Lowell BH CP will provide information and reach out to develop relationships with all ACO and MCO partners in the Service Areas for which this bid applies.

4. Conflict Resolution

The Greater Lowell BH CP will partner closely with ACOs and MCOs in the Service Area to serve the needs of BH CP eligible individuals. We will leverage and build upon the strengths that our organization and our partner organizations bring to this engagement. While we do not anticipate disagreements in areas of shared responsibility, we recognize that differences of opinion may arise, specifically related to care management decisions that affect Enrollees or the way the Contract is managed. Our mutual intention is to resolve those disagreements promptly, so there is no harm whatsoever to Enrollees and maintains compliance with the terms of the Contract.

In general, the forum for resolving disagreements and conflicts between the BH CP and the ACO or MCO will be addressed at the Board of Directors. Going forward, we will create a structured process to escalate issues of significant financial impact to the ACO or MCO, or other major strategic issues. Delivering effective outreach and engagement activities to active drug users is challenging and requires significant shifts in approach for many providers. To be effective, several key features of the population must first be understood; including stigma, trauma, disengagement, a disease of SUD and lack of available resources. Barriers and factors to consider when outreaching to this population in a traditional way include legal issues, homelessness, lack of transportation, family disengagement, lack of social supports, co-occurring mental and physical health issues.

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities: The above positions represent the Care Coordination Team staffing that we plan to have in place across our BH CP by the start of Year 1 (4.5 teams to start, eventually staffing up to 9.5 teams by end of Year 5).

Each team will consist of the following:

1) A Clinical Care Manager/Team Leader manages each locally-based team (1 per team).
2) Care Coordinators for each team will provide most of the direct care coordination services for the program (8 per team)
3 & 4) An RN and an LPN will ensure the medical needs of the people we serve are met on a day-to-day basis. The RN on each team will supervise the LPN. (1 Rn and 1 LPN per team)
5) A Psychiatrist serves as the Medical Director for each team (2.5% of an FTE per team)
6) A Program Manager who is the independent licensed clinician responsible for the day-to-day operations (20% of an FTE per team)

Each Affiliated Partner may adjust the model of their team(s), including salaries, to align with their own organization's compensation plan, but will meet all contractual obligations.

At the end of the Prep Budget Period the Care Coordination team staff FTEs in place will be as follows:
1) 4.5 Clinical Care Managers
2) 29.6 Care Coordinators
3&4) 3.7 RNs and 3.7 LPNs
5) No psychiatry
6) .74 Program Managers

**** Note: Our true Prep Budget Period start-up staffing cost is expected to be ~$25k more than the $450k DSRIP funding. In order to cap our expenses at $450k, we've reduced our program budget spending on each staff member above to 91.1757% of what we expect to spend. In other words, Riverside and it's AP's are expecting to fund approximately 8.243% of the above start-up staff costs with DSRIP funds in the Prep Period.**

102							

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost
Total Supplies (Program Budget Line 6)			**$ -**

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			**$ -**

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
Total Software Licensing (Program Budget Line 8)			**$ -**

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
Total Telecommunications (Program Budget Line 9)			**$ -**

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost
Rent			$ -
Utilities			$ -
Repair and Maintenance			$ -
			$ -
			$ -
Total Occupancy (Program Budget Line 10)			**$ -**

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:

Row 11 - Other

Other Direct Expense Description	Cost
Sr. Mgr - 0.375 FTE @ $110k for 6 mo	$ 20,625
Prog Mgr - 0.8 FTE @ $80k for 6 mo	$ 32,000
Admin - 2.0 FTE @ $42k for 2 mo each	$ 14,000
Quality Mgr - 0.2 FTE @ $95k for 4 mo	$ 6,333
Fringe (20.96%)	$ 15,292
Total Other (Program Budget Line 11)	**$ 88,250**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined: Our structure relies on Riverside BH CP management staff to support the overall program. Costs in this line include salary and fringe associated with these staff. By the end of the prep budget period, the BH CP management staff will include the following:

1) A senior licensed clinician manager that is a member of Riverside's Leadership Team supervises the Program Director of the

Riverside BH CP in their capacity as both Program Director and Program Manager of the Riverside Care Coordination Team(s).
2) A program director is dedicated to the program. They are responsible for the day to day operation of Riverside BH CP, including oversight of our Affiliated Partners.
3) 2 administrative support positions will work solely for the program; A) a contract administrator will focus on contract management and monitoring, preparing claims and invoices, reports, and related information and submissions, B) a administrative assistant will serve as the coordinator of meetings, projects, and provide general support.
4) A quality manager who will also will be a member of Riverside's Quality Management Department will provide the quality management for the BH CP.

Note: Beginning in BP1, .5FTE of a senior manager who is a member of Riverside's Leadership Team is responsible for program development will be a part of the "Other" expenses.

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 12)	**10.73%**	**$ 34,968**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined: The rate is Riverside's FY18 budgeted general and administrative overhead/indirect cost rate applied consistently across all Riverside programs.

Community Partner Infrastructure Budget Report - Technology - Prep Budget Period

Only complete this Infrastructure Budget Narrative using amounts anticipated for PBP.
Lines may be added to the Infrastructure Budget Narrative tables as necessary

Row 1 - IT Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
	Total Salary			$ -
	Fringe rate	21.0%	Total Fringe	$ -
			Total IT Staffing including Fringe (Infrastructure Budget Line 1)	**$ -**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Row 2 - Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
IT Consultant	$ 55,000
Total Development and Adaptation of EHR and Care Management System (Infrastructure Budget Line 2)	**$ 55,000**

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined: We intend to contract for IT services to support initial start-up so that each participating organization has a resource to ensure they are able to operate on the go-live date. This contracted resource will be overseen by Riverside's Chief Information Officer. At a minimum, the IT contracted service will ensure that each organization is able to provide required information to Riverside for management and billing purposes, and also provide support for care management. We have budgeted 275 hours at $200 per hour.

Please note that Riverside has available software to support our own care management activities and to support Affiliated Partners that wish to use our Netsmart product. There is a nominal cost for expanded used of the product for those AP's that choose to utilize it.

Row 3 - Technology for Service Delivery

Description of Expense	Cost
Laptops	$ 25,500
Total Technology for Service Delivery (Infrastructure Budget Line 3)	**$ 25,500**

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined: Laptops will be distributed across Riverside Affiliated Partners in this category. Each Affiliated Partner is able to choose the equipment in this category that best meets their needs in meeting the requirements described in the RFR. This equipment will be primarily laptops with the capacity for electronic signatures by enrollees. Riverside's current pricing for Dell laptops that have a touch screen, microphones, cameras, speakers, and eSig software is $1,500 each. Prior to launch, we expect to purchase 17 laptops, with more purchased in future years. The allocation of the $25,500 for equipment for our Riverside teams and to our APs for theirs is as follows: $6,924 for Riverside teams, $5,944 for North Suffolk and $5,944 for Lynn, $2,972 for Edinburg, $1,486 for Dimock and $1,486 for Uphams and $743 for Brookline.

6,924	Riverside
5,944	North Suffo
5,944	Lynn
2,972	Edinburg
1,486	Dimock
1,486	Uphams
743	Brookline
25,500

BH Community Partner - Staffing Model

Riverside Community Care

line #			
1	Estimated number of Engaged Enrollees (including CBFS if applicable) at the end of Budget Period 1	1,800	*Should align with Program Budget RIVERSIDE: Based on 4.5 Care Coordination Teams in Year 1*

	BH CP Program Staff	Budget Period 1 FTEs (Do not duplicate FTE - FTE's may be allocated across staffing positons as applicable)	Comment
2	BH CP Director and Assistant/Deputy Director	2.1	*Total management oversight of BH CP RIVERSIDE: Includes 0.375 Sr Manager, 0.8 Program Director, 0.2 Program Managers per team*
3	Medical Director	0.1	*Portion of Medical Director allocated to BH CP for the number of enrollees shown in line 1 RIVERSIDE: Includes 0.025 Phychiatrists per team*
4	RNs	4.5	*RIVERSIDE: Includes 1.0 RN per team*
5	Clinical Care Managers (RN)	0.0	*Do not include FTEs listed in line 4*
6	Clinical Care Managers (LPHA)	4.5	*LPHA includes LICSW, LMHA, LADC I RIVERSIDE: Includes 1.0 Clinician Care Manager per team who in most cases will serve as team leader*
7	Supervisors/Team Leaders	0.0	*Do not include FTEs listed in lines 4, 5 or 6*
8	Other Licensed Staff	4.5	*Do not include FTEs listed in lines 4, 5, 6 or 7 RIVERSIDE: Includes 1.0 LPN per team*
9	Care Coordinators	36.0	*FTEs providing Care Coordination (may include Health Outreach Workers, Community Health Workers, Peer Specialists, Recovery Support Navigators providing care coordination) RIVERSIDE: Includes 8.0 Care Coordinators per team*
10	Peer Specialist/ Recovery Coaches (non-Care Coordination)	0.0	*Do not include FTEs of Peer Specialists or Recovery Coaches included in line 9*
11	Intake Coordinators/Engagement Specialists	0.0	
12	Administrative Support	2.7	*RIVERSIDE: Includes Management Costs: (0.2 Quality Managers, 0.5 Program Development Sr. Managers), and 2.0 Admin support*
13			
14	Total FTE	54.4	

	Staff Ratios - Please calculate the following ratios:		
15	Ratio of RN and Clinical Care Manager (RN) to Assigned and Engaged Enrollees	1:400	*Estimated number of Assigned and Engaged Enrollees at the end of BP1 divided by total FTEs of (RN+RN Clinical Care Managers) RIVERSIDE: In addition to the 1 RN per team, each team of 400 will also have an LPN supervised by the RN and through several of our APs the Riverside BHCP teams will have access to additional RNs in the organizations, which will also supplement the designated RNs.*
16	Care Coordinator Supervision to Care Coordinators	1:8	*Total Care Coordinator FTEs divided by Total Care Coordination Supervision FTEs*

Please describe which Program staff listed in lines 2 through 8 above directly supervise Care Coordinator staff: The Clinical Care Managers directly supervise the Care Coordinator staff.

Section 7.3 Initial DSRIP Participation Plan

The Bidder's response to this Section 7.3 shall constitute Bidder's Initial DSRIP Participation Plan as described in Section 4.1 of Attachment A.

A. Executive Summary (not to exceed 2 pages). The Bidder shall describe its five year business plan for implementing the CP program. This plan shall include, but is not limited to:

1. The Bidder's goals, identified challenges related to the care delivery system and behavioral health, and proposed solutions to be effectuated through the CP program

Riverside has a decades-long commitment to serving individuals with significant behavioral health needs through our large array of services and through partnering with State Agencies, healthcare systems, cities and towns, social services and other behavioral healthcare providers. Through our experience, we are well aware of the challenges to providing optimal care, to improving the service recipient's experience, avoiding duplication of service, and to optimizing use of healthcare dollars because of insufficient coordination among providers, and especially between behavioral and medical health care systems. We look forward to participating in MassHealth's 1115 demonstration as a BH CP provider to help strengthen the linkages between care providers, support people with high BH needs to better navigate the health and behavioral healthcare systems, attain needed social supports, and ultimately improve their experience and facilitate their personal investment in and achievement of maximum possible healthcare outcomes. We firmly believe that better coordinated care has the potential to help individuals improve their overall health more quickly and fully, prevent avoidable future health problems, reduce use of costly emergency room and inpatient hospitalizations and improve the quality of people's lives. In fact, we have seen these gains demonstrated in our grant based care coordination programs. This opportunity to better serve the individuals and communities who rely on us for behavioral healthcare, expand our reach to more individuals in need, and contribute to the long-term sustainability of the MassHealth system in our state is very welcome.

To accomplish this, Riverside has brought together 6 other organizations to join us in establishing BH CP teams throughout our proposed service areas; we are calling Riverside Community Partners. Our program has a strong platform of mental health and addictions knowledge and experience, healthcare and health behavior promotion know-how, ability to serve a culturally diverse population, and familiarity with social services and supports available in local communities up through state agencies. We intend to leverage this strong base to create centralized BH CP administration and resources with local BH CP teams for service delivery, thereby supporting accessibility, preserving existing local relationships, and ensuring that Enrollees with high behavioral health needs can continue to work with us, providers they have come to trust over many years.

2. The number of Assigned and Engaged Enrollees the Bidder intends to support under the Contract. We propose to support 3,800 Assigned or Engaged Enrollees through our BH CP.

3. The Service Areas for which the Bidder is bidding

Riverside, along with our 6 Affiliated Partners is proposing to serve the following Service Areas:

- In the Greater Boston Region: Boston-Primary; Revere, Somerville, Quincy (all areas)
- In the Northern Region: Lowell, Lynn, Malden, Woburn
- In the Central Region: Framingham, Southbridge, Waltham

4. The Bidder's plans to operationalize the CP program and time frames associated with implementing such activities.

If awarded the contract for the BH CP program, we plan to continue preparatory activities immediately, even prior to the Preparation Budget Period. This will include planning meetings with key personnel already employed at Riverside who will be assuming direct oversight roles in the BH CP program, as well as with leadership of our Affiliated Partners. Nora Kenny-Houser, LICSW, currently Program Director of our Collaborative Care Management Program, will become the Director of Riverside Community Partners, and Jason Moscato, RN, LMHC, a member of Riverside's Senior Management will be her direct supervisor. Riverside's President/CEO, Scott M. Bock, Executive Vice President/COO, Marsha Medalie, and Vice President of Program Development and Strategic Planning, Laurie Hutcheson along with staff from our QM, A&F and HR Departments will also participate. Activities such as developing the formal program policy manual, training curricula, etc. will begin and continue throughout the Preparation Budget Period and into Period 1 (with revisions occurring as needed throughout the five year period and beyond).

During the Preparation Budget Period, we will formally move the Program Director into her new role on December 1, 2017 (as well as begin the dedicated time from our Senior Manager), and begin recruiting and hiring BH CP staff for all the teams. To accomplish this, we created a start-up DSRIP budget that will allow Riverside and each Affiliated Partner to begin hiring Clinical Care Managers/Team Leaders, Care Coordinators and Nurse Care Managers ahead of the program's go-live date. Training of this core staff will begin during this period, with additional training provided as more staff are hired and the program is further developed during subsequent budget periods. We will also identify, rent and set up new offices where needed, and purchase computers, phones, office furniture and other equipment and supplies for teams to be ready to begin operations June 1, 2018. Simultaneously, we will be working on refining the care management software program we intend to use so that it will better meet the specific needs of data management and reporting required for BH CP and developing marketing materials for the program. We will also complete contracting with ACOs/MCOs during this period.

In Period 1, we will continue ramping up staffing across all team as referrals flow in, with many Enrollees being people we already serve, and estimate that we may reach 50% of our capacity. We know actual referral rates may be significantly more or less than this. Therefore, we expect to be flexible in hiring (e.g. adding RNs and LPNs), and also recognize that staff will not operate with full caseloads initially. The Period 1 DSRIP will help offset expenses of operations (staffing) without full revenue. We expect to have substantive discussions with ACOs/MCOs as well as with MassHealth during this period as BH CP is implemented across the state and practices, protocols, best means of communication and relationships across systems become more defined. In Periods 2 through 5 we expect the ramp up of referrals to continue and we assume we will reach 100% of our capacity in year 5. By that time, we will have achieved full caseloads, completed the purchase and set up of all equipment and systems (other than normal replacements or enhancements). (see revised budgets). We expect that the quality of our work will have demonstrated our value to ACOs/MCOs so that they will choose to continue contracting with us beyond the 5 year demonstration period.

Section 7.3.B Supporting Populations and Community Engagement

Page intentionally left blank

Section 7.3 Initial DSRIP Participation Plan

B. Supporting Populations and Community Engagement (not to exceed 2 pages)

1. For each Service Area for which the Bidder is bidding, the Bidder shall describe its connections to the community, including current and planned collaborations and partnerships with community-based organizations, advocacy groups, BH service providers, state agencies, housing/shelter providers, and social service organizations in order to support the focus populations, as described in Section 3.3, and the delivery of CP Supports as described in Section 2.3 of Attachment A.

Throughout the Service Areas noted below, Riverside Community Partners have remarkably long, established relationships with these local communities as well as with local chapters of state-wide organizations such as NAMI and with site offices of State Agencies (DMH, MRC, etc.) through contracts and collaborations over many decades. Other local examples follow below; please note that many cited examples apply to multiple Service Areas but are listed only once due to space limitations:

Boston –Primary- Dimock, Upham's Corner HC, North Suffolk MHA, Riverside, and Brookline CMHC have built strong connections to these communities over many decades. The two health centers are themselves regarded as critical community resources for medical care as well as BH care. Dimock's internal collaborations include Detox Services, housing for adults in recovery and the Mary Eliza Mahoney House emergency shelter. Casa Myrna, Bay Cove, Topeka Street Clinic, Hope House, Entre Familia's Pregnant/Postpartum Project, St. Paul's Food Pantry, Mass. General Hospital, and BI Deaconess Hospital are examples of collaborations.

Revere – North Suffolk is deeply embedded in these communities. Examples of connections include East Boston Neighborhood Health Center, Buddhist temples in Revere and East Boston, Maverick Landing tenants Organization, and Chelsea and East Boston Police Departments (PD).

Somerville – Riverside (and predecessor organizations Somerville MHA and The Guidance Center) and North Suffolk have been central to these communities since the 1960s. Examples include Cambridge Health Alliance, Vinfen, Cambridge Safety Net, Somerville and Arlington PDs, Community Action Center of Somerville, CHNA 17, Saheli & South Asian Task Force.

Quincy – Riverside is headquartered in Dedham, has a major Outpatient/ESP hub in Norwood, and has a large CBFS presence in this area. Collaboration examples include Steward-Norwood Hospital, the Dedham Food Pantry, Norwood Housing Authority, Metro Suburban Recovery Learning Center, South Shore Mental Health Center, Abundant Table, Wellcare Physicians Group, Bay State Community Services, and the Dedham Police Department.

Lowell – The Edinburg Center provides clinical services and CBFS in this area. Examples include CHNA 15, Emerson Hospital, and the Sheehan Women's Program in Tewksbury.

Lynn – Lynn CHC and Riverside provide significant services for MassHealth recipients and both have BH Outpatient sites here. Examples include: Neighbor to Neighbor, Family Health Services of Greater Lynn, Bridgewell Project COPE, Lynn Shelter Association, Mass. Coalition for the Homeless, New American Center, Healthy Streets, Northeast Recovery Learning Community, and the Chase Community Sober Living Program.

Malden – Riverside and North Suffolk are deeply involved in these areas through Outpatient, CBFS, psychiatric day treatment and other services. Examples include: Wakefield, Melrose, Everett and Malden Housing Authorities, MGH Everett, Melrose Coalition Against Substance Use, Eliot Emergency Services, Comfort Home Care, Nizhoni Health Systems; Hallmark Health primary care services (Melrose/Reading); Melrose Wakefield Hospital, CHA Malden, Mystic Valley Elder Services, Kelly House Sober Living, and the Wakefield PD.

Woburn – Edinburg is headquartered in Bedford and both Edinburg and Riverside serve Woburn area communities. Examples of collaborations include Minuteman Elder Services, Lahey Health Center, Winchester Hospital, Mission of Deeds, Reading PD, Sober Steps to Solutions Woburn, Tri-Cap and the Reading Coalition Against Substance Abuse.
Framingham – Riverside has extensive services in the Framingham area such as Outpatient and ESP and Edinburg serves additional area towns. Examples include The Bridge House, CHNA 7 South, West Suburban Alliance of Gay, Lesbian, Bisexual, Transgender and Queer Youth, Milford Regional Hospital, Edward M. Kennedy Health Center- Milford, Golden Pond-Hopkinton, the Wayland Islamic Center, and Tri-River Family Health Center.
Southbridge – Riverside serves this area as the ESP provider and through Outpatient services and is planning to expand our Crisis Stabilization and Respite programs in the next few months. We have closely collaborated/subcontracted to Harrington Hospital for several years. Other examples include The Bridge of Central Mass., Alternatives Unlimited, Opiate Task Force of Worcester County, and UMass Memorial Medical Center.
Waltham – Riverside and Edinburg are both resources these communities rely on. Needham and Newton are both hub communities for Riverside services, including Outpatient and the Riverside Trauma Center. Examples include Needham's Coalition for Suicide Prevention, Needham Community Crisis Intervention Team, Ascentria Care Alliance-Waltham, Brandeis University, Newton Domestic Violence Task Force, and the Newton Health Department.

2. For all Service Areas for which the Bidder is bidding, the Bidder shall describe how it will grow its connections to the community in the Service Areas.
Riverside Community Partners is well positioned to continue growing connections in all the Service Areas we are proposing to serve as a BH CP: we all have significant local relationships to build on as our teams identify Enrollee's needs that may require new resources. One way that our organizations have expanded community connections over the years is through participation in local task forces, such as Suicide Prevention, Public Health initiatives, Substance Prevention Alliances, etc. We will continue these efforts. Also, we each have a broad range of services and our programs have opportunities to continually expand our reach into and connection with local services, hospitals, medical centers, municipal departments, advocacy groups, religious organization, and other services. We intend to leverage the breadth of our combined relationships and ongoing efforts across our Affiliated Partners to continue growing connections, within and across the cities and towns we serve. Sharing ideas, information, contacts, and opportunities will benefit each of our teams and most importantly the people we serve.

3. The Bidder shall describe its plans to ensure staff is informed of community resources over the course of the Contract Term.
As referenced earlier in this proposal, Riverside Community Partners intends to create a resource "library" that will be available electronically to each of our BH CP local teams. This will serve as a directory of social services, healthcare providers, advocacy and support groups, housing supports, and other resources within our Service Areas. It will have contact information for statewide organizations' local chapters and state agencies local site offices. We will utilize information already gathered by our organizations' many existing programs to get us started. Staff in all our local teams will access the "library" as needed and contribute to its ongoing additions and updates. New Care Coordinators will be trained in the use of this resource tool as part of their new employee orientation at each of the teams.

Section 7.3.C. Community Partner Supports and Activities

Page intentionally left blank

Section 7.3 Initial DSRIP Participation Plan

7.3 C. Community Partner Supports and Activities (not to exceed 15 pages excluding attachments)

As the contracting organization, Riverside will establish and maintain data and monitoring systems that ensure all aspects of BH CP services and reporting are delivered in compliance with Attachment A of this RFR. This will include:

Coordination System and Databases**:** Riverside will maintain an electronic data base within our EHR that is dedicated to the Riverside Community Partners program. Among its features, the system will track each Assigned Enrollee's membership in a particular ACO/MCO or EOHHS agency, Enrollee relationship to Riverside or the Affiliated Partner, and the dates and documentation regarding all BH CP activities conducted. The system will also house the Enrollee specific electronic record for Enrollees assigned to Riverside's BH CP teams. Our Affiliated Partners will also retain their own electronic care coordination systems (or may opt to utilize Riverside's system) with Enrollee specific records and databases for documenting and tracking all activities related to outreach, engagement, care coordination, corresponding documents, and exchanges among team members for assigned Enrollees, and will submit reports to Riverside's dedicated electronic data base.

Monitoring Affiliated Partners' Adherence to BH CP Requirements**:** Affiliated Partners will provide electronic Member Status reports monthly to the Director of Riverside Community Partners so that Riverside can report electronically to EOHHS. In addition to reviewing Affiliated Partners' report submissions, the Director and Riverside's Vice President for Quality Management will routinely review Affiliated Partners' compliance with conducting all BH CP activities in the manner described in this response, and pursuant to compliance with all requirements of the Model Contract through record sampling and review of any communications regarding the conduct or performance of our Community Partner Activities. The Director will also meet with Affiliated Partners' Team Leaders at least quarterly, to discuss/share processes, challenges, any unresolved grievances, and best practices.

1. Outreach and Active Engagement

The Bidder shall describe how it plans to satisfy the Outreach and Active Engagement requirements described in Section 2.3.A of Attachment A, using evidence-based or emerging practices, as appropriate. Specifically, the Bidder shall describe the Bidder's:

Pursuant to Section 2.3.A. of the RFR, Riverside, with our Affiliated Partners will "…develop, implement, maintain, and adhere to a protocol for Outreach and Active Engagement of Assigned Enrollees." Engagement is a process, not an event; our primary method for engaging enrollees is to build trust based on empathy, respect and finding common ground for working together.

Receiving Assignments/Referrals: The Riverside Community Partners' Director will be the point of entry for referrals of potential Enrollees from ACOs/MCOs, EOHHS and other providers. She will determine which Affiliated Partner will receive the Assigned Enrollee, considering information received including the Enrollee's address in relation to teams' location, whether the Assigned Enrollee has a pre-existing relationship with or request a particular Affiliated Partner. She will send all information received about the Assigned Enrollee to the designated BH CP team to begin outreach and engagement activities.

Overall Outreach and Engagement Process: Upon receipt of the name and related information of an Assigned Enrollee from the Director, the Clinical Care Manager/Team Leader will determine which Care Coordinator will be assigned. The Care Coordinator will begin outreach to the Assigned Enrollee and attempt to schedule a face-to-face visit and provide information about the benefits, design and purpose of CP supports, how to engage with the Care Coordinator, how to opt out of CP participation, and how to formally participate if s/he wishes. If telephone contact cannot be established after three attempts, the Care Coordinator may mail a letter to their home address outlining the program and providing a way for the Enrollee to contact him/her. Because many Assigned Enrollees may be people we already serve, we will also reach out to our existing staff in other programs (i.e. CBFS, Outpatient) to assist us in connecting with referred individual Team staff will conduct at least one Outreach activity with each Assigned Enrollee within 30 days of assignment, will make at least one attempt to have a face to face visit with the Assigned Enrollee within the first three calendar months of assignment, and will document these activities in their electronic care coordination system.

Outreach to and Engagement with Enrollees with Language Barriers or Special Needs: If we are aware of an Assigned Enrollee with whom we cannot use traditional communication mechanisms, such as a non-English speaker or an individual who is deaf or hard of hearing, we will make every effort to accommodate any needs the potential barrier presents. When possible, we will match the Assigned Enrollee with a Care Coordinator who speaks his/her language. We may also confer with the Enrollee's PCP who may know of friends, family members or others that the Enrollee is comfortable relying on for interpretation assistance to help us to make initial contact with the Assigned Enrollee. Then we will make arrangements for ongoing interpretation assistance depending on this resource availability, and the Assigned Enrollee's expressed preferences. We have also been exploring the use of a new earbud "real time" interpreter technology that we may provide to the Assigned Enrollee at a first face-to-face visit. This technology is simple to use and while it is completing the beta testing phase, may prove to be highly effective and inexpensive enough for us to use it for language interpretation needs after a first visit. We will use similar strategies for communicating with an Assigned Enrollee who is deaf or hard of hearing, working with his/her PCP, as appropriate, to understand any special accommodations that the Assigned Enrollee is comfortable using and incorporate these into our outreach, engagement and assessment, person-centered planning and care management processes (i.e. sign language or communication board). As needed, communication specialists may be accessed through the Massachusetts Commission for the Deaf and Hard of Hearing.

Riverside Community Partners Care Coordination staff will receive training on and/or have experience working with individuals with behavioral health disorders and will conduct their outreach, engagement and care coordination activities using recovery oriented principles and motivational interviewing techniques. Further, there is significant evidence from both Riverside and its Affiliated Partners' experience and from what we know of best practices from research on collaborative care models, that using peers on a care coordination team is effective in engaging and working with persons with serious mental illness, as they often serve as role models for individuals who may be ambivalent about change. It is our goal to staff the teams with at least one team member who is a recovery specialist/person with lived experience.

a. Planned strategies for outreaching to and engaging with Assigned Enrollees, including individuals who are homeless and hard to reach, within the timeframes specified in the Contract;

In the case of any Assigned Enrollee who is known to be homeless or hard to reach, staff will reach out to the PCP or referring provider, who may be familiar with where the Assigned Enrollee might be found. Initial attempts to reach him/her may be made by the Care Coordinator through visits to shelters that may be frequented by the Assigned Enrollee or to soup kitchens, food pantries, and/or day programs. If this information is not in the Assigned Enrollee's record, the Care Coordinator will reach out to family and/or behavioral health or social service providers known to be working with the individual to help locate the Enrollee. In some cases, we may have a phone number and address for an Assigned Enrollee but still be unable to reach him/her via telephone during a business week day and after hours contact attempts will be required.

Riverside's previous experience in a grant funded care coordination pilot of using the Critical Time Intervention model, developed by the CUCS Institute, taught us the benefits of focused, time limited services to engage homeless individuals to transition into new housing and/or establish or improve relationships with providers. This model engages a more transient population by identifying two or three essential areas the person is most interested in resolving and simple, achievable solutions. It provides more frequent contact at the time of enrollment, with decreasing frequency over time, reducing the risk of perceived dependency and reinforcing the use of natural supports and collateral providers. Ongoing engagement might be better received when understood as a series of time limited efforts around identified goals.

b. Planned Strategies for outreaching to and engaging with Assigned Enrollees with Substance Use Disorders;

We will apply our understanding of stages of change and utilize motivational interviewing techniques in attempts to engage individuals with SUD. For example, when first assigned an Enrollee, the information we receive may not indicate whether the person is actively using substances and pre-contemplative, actively engaged in recovery or somewhere in between. Inquiring about the person's concerns, goals, and preferences and avoiding imposing judgment or expectations ahead of the individual's readiness will be key to laying the foundation for future engagement in treatment and self-help activities as readiness occurs. If the Enrollee with a substance use disorder (SUD) is also homeless or hard to reach, the assigned Care Coordinator may seek out the Enrollee at a Methadone or Suboxone clinic or recovery groups s/he may attend in addition to those activities described above. This strategy would be used with great sensitivity so that the Assigned Enrollee does not feel that his/her his privacy has been violated; we would not want to undermine his/her attendance at substance use treatment and services.

c. Planned process to obtain and document Assigned Enrollee's agreement to participate in CP Supports through a participation form.

During the initial contact with the Assigned Enrollee the Care Coordinator will explain the value and range of CP supports and how to formalize participation by signing the confirmation form. The Care Coordinator will also explain what protected information will be solicited from the Assigned Enrollee and how it will be used and shared in the delivery of CP supports as well as how a section of the Enrollee's future plan of care, the Wellness Recovery Action Plan (WRAP) Plan can be kept confidential and that the Enrollee can determine whom may see it.

When an Assigned Enrollees agrees to participate, the Care Coordinator or Clinical Care Manager will obtain the signed participation form and requisite consents from the Enrollee. In accordance with Riverside's approved Quality Management plan, the Care Coordinator will then obtain the Assigned Enrollee's written authorization to the uses and disclosures of his or her Protected Information (PI) as necessary for providing CP Supports. Team members will also document each case in which Assigned Enrollees decline participation. Once the Assigned Enrollee has signed the form, the Care Coordinator will elicit his/her preferences and needs related to future contact including what special accommodations might be necessary for ongoing telephonic communication and face-to-face visits, and to conduct the Comprehensive Assessment. If special arrangements must be made for these contacts, the Care Coordinator will ensure other staff are prepared. Within five days of obtaining the Assigned Enrollee's signature on the participation form, the Clinical Care Manager will formally assign the Enrollee to a Care Coordinator on the team. In most cases, this will be the Care Coordinator who outreached to the Assigned Enrollee. The Clinical Care Manager will also open a Care Coordinator record for the Enrollee in the Riverside Community Partnership electronic system and will work with the Assigned Enrollee to schedule the assessment visit.

2. Comprehensive Assessment and Person-Centered Treatment Planning
The Bidder shall describe how it plans to satisfy the Comprehensive Assessment and Person-Centered Treatment Planning requirements described in Section 2.3.B of Attachment A, using evidence-based or emerging practices, as appropriate. Specifically, the Bidder shall describe:
a. The Bidder's process for conducting Comprehensive Assessments, including how the Bidder will ensure the Assigned Enrollee participates in the assessment process. The Bidder shall include a copy of proposed assessment tool(s) as an attachment;
Riverside Community Partner's process for conducting a comprehensive assessment with each Assigned Enrollee who signs a participation form is as follows: The Riverside Community Partners Program Assessment tool will be used to identify each Enrollee's immediate care needs, current services, and any care coordination or management services being provided by state agencies such as the Departments of Mental Health (DMH), Developmental Services (DDS), Massachusetts Rehabilitation Commission (MRC), Massachusetts Commission for the Blind (MCB), Massachusetts Commission for the Deaf and Hard of Hearing (MCDHH), Department of Children & Families (DCF), or Department of Youth Services (DYS). It will also assess the Enrollee's perceptions of wellbeing, self-reported strengths, and any opinions about the current caregivers and services.

The initial assessment will be conducted by the Care Coordinator (or Clinical Care Manager, at times), who will also collect the medical history information including current medical needs and prescribed medications. The Care Coordinator will conduct the in person assessment and will travel to the individual's home or meet with them in the community at an agreed upon location or at a Riverside or Affiliated Partner's site. As described above, we will make accommodations as necessary to ensure that the Assigned Enrollee can actively communicate in and understand the assessment process. This may mean that an interpreter or interpreter technology will be used during the comprehensive assessment.

No assessment will be considered complete without the participation of the Enrollee, as documented in the Enrollee electronic record. The completed Comprehensive Assessment will be given to one of the team's Nurse Care Managers for review and for follow-up with medical providers and the Enrollee for additional information, as necessary. The Nurse may find it necessary to meet with the Enrollee before considering the assessment completed, if, for example, an individual has a complicated medication regimen. We will explore using telehealth technologies, to enable us to have virtual visits with individuals, if they also have access to computers or smart phones. Following the Nurses review, the Clinical Care Manager will provide final review and approval of the entire Comprehensive Assessment.

We will complete the Comprehensive Assessment within three calendar months of the Assigned Enrollee's Assignment to Riverside Community Partners (unless an Enrollee has an existing comprehensive assessment which was conducted within three months prior to the Enrollee's assignment to the Riverside CP, in which case that comprehensive assessment shall be utilized for the Enrollee), and annually, thereafter. Our software will provide planned reminders to support this effort. Each visit related to the assessment and the assessment contents will be documented and stored in our Care Coordination system. We will communicate the results of each Comprehensive Assessment with the Assigned Enrollee's Care Team, ACO/MCO, and other providers who serve the Assigned Enrollee, including state agency or other case managers, as appropriate.

The proposed Riverside Community Partners Comprehensive Assessment Tool is provided as an Attachment following this section. It includes all components listed in Section 2.3.B.1.b.1-2. There are three additional sets of questions that we have added to the comprehensive assessment tool that are not explicitly required per the RFR, but which Riverside and its Affiliated Partners believe are important and valuable to include. First, we added questions from the CAGE screening tool, recommended by the National Institute of Alcohol Abuse and Alcoholism, which are used to identify potential problematic drinking behaviors. The responses provided by individuals to these questions help guide the assessor in asking additional questions, the responses to which yield a more comprehensive picture of an individual's use of substances and interest in changing behavior. Second, we have added the evidence-based Modified Morisky Scale, a set of questions and a score, which provides information for determining where an individual is in terms of his/her knowledge and motivation regarding psychiatric medications. As with the CAGE screen questions, responses to these questions are particularly useful for ensuring person-centered planning discussions. Last, we have added questions regarding individuals' history of trauma, falls, education and employment and concerns, preferences and goals related to each area. The inclusion of this additional information in the assessment process is critical in understanding individuals holistically and helps the ensuing person-centered planning discussions delve more deeply into what services and supports will best address the Enrollees' concerns, build on his/her identified strengths and meet his/her needs.

In addition to the Comprehensive Assessment Tool, a short questionnaire may be included in the initial assessment process to collect information to be used in our annual quality initiative and stored in a discrete section of the Assigned Enrollee's individual electronic record.

b. The Bidder's process for conducting Person-Centered Treatment Plans. Such description shall include:
1) Planned processes for developing the Person-Centered Treatment Plan, including ensuring the Assigned Enrollee participates in the process;
Following completion of the Comprehensive Assessment, the Care Coordinator will invite the Enrollee to participate in the process of developing and completing the Person-Centered Treatment Plan (referred to hereafter as the Person Centered Care Plan) which will be completed within three calendar months of the Enrollee's assignment to Riverside Community Partners.

Riverside and our Affiliated Partners embrace person-centered planning - a process directed by the participant, intended to identify the strengths, capacities, preferences, needs and desired outcomes of the participant - as the appropriate way to develop a plan of care with any individual. Our Care Coordination staff will be trained in and practice person-centered planning and Shared Decision Making with people served, and will use this approach in creating the Person Centered Plan in partnership with the Enrollee. We will utilize the guidance of the Substance Abuse and Mental Health Services Administration and Dr. Patricia Deegan's publications and other relevant guides. Development of the Person-Centered Plan entails talking with the Enrollee and others the Enrollee chooses about the findings from the Comprehensive Assessment and determining what if any conditions or circumstances the Enrollee seeks to affect with a care plan, what the specific content and areas of focus of the plan will be, and what strengths the Enrollee will build on to strive for change and recovery.

A Person-Centered Planning process is driven by the individual, but works best when it includes other people, both formal and informal caregivers who are chosen by the Enrollee to also participate and who can contribute valuable information to the process. Prior to scheduling the face-to-face planning meeting with the Enrollee, in keeping with the Person-Centered philosophy, the Care Coordinator will discuss with the Enrollee whom s/he wants to include in the discussion and on the Care Team in addition to the PCP and other specialists who may already be a part of the team. These identified individuals will be invited to participate in the meeting in person or by teleconferencing.

In developing the plan, the conversation with the Enrollee may be framed in terms of SAMHSA's Eight Dimensions of Wellness, information about which is captured in the comprehensive assessment. The areas of life included in these Eight Dimensions include: emotional, financial, social, spiritual, occupational, physical, intellectual and environmental. The Care Coordinator will review findings in each area with and provide information to the Enrollee regarding identified issues and potential options that might address them, including the advantages/disadvantages or risks/benefits of each. The conversation will also focus, in discussing each domain, on what the Enrollee regards as his/her strengths, what s/he values, and any goals for change, and how the options for addressing issues may use the Enrollee's strengths and align with his/her overall goals.

Should the Enrollee seek or need LTSS service needs, the Care Coordinator will review with the Enrollee his/her choices for specific LTSS services, programs and providers (including any providers with which the Enrollee is already engaged for LTSS supports) to determine what LTSS services and providers will best meet his/her needs.

All of the discussions about services, choices and needs will be documented by the Care Coordinator, including documentation that at least two choices of LTSS service providers were given. Similarly, the Care Team in conjunction with the ACO/MCO may identify needs that may be met through the provision of Flexible Services. These possible services and supports will be explained to the Enrollee and if desired and appropriate, and the ACO/MCO is willing to authorize, will also become a part of the Person-Centered Care Plan.

All Riverside Community Partner staff will be trained in using the Shared Decision Making process for discussing psychotropic medications and in assisting Enrollees to use the free, online Shared Decision Making electronic tools available through the Substance Abuse and Mental Health Services Administration website to help determine whether they will be part of the Enrollee's person-centered plan of care. In our experience, Care Coordinators must demonstrate considerable sensitivity in talking with Enrollees about medications. Sometimes an individual will not wish to discuss medications with a new caregiver without first establishing some level of trust for that caregiver. Therefore, it will be potentially important after the creation of the Person-Centered Care Plan is completed, that the Care Coordinator periodically check-in with the Enrollee about medication use. The Person-Centered Plan will include a section on medications, including a description regarding how and with what frequency and Enrollee would like reminders or assistance with adherence to medications. In some cases, an Enrollee may be interested in utilizing a reminder App on his/her cell phone. Such a preference will be documented in the care plan and the Care Coordinator will help the Enrollee obtain, download and operate the medication alert APP. It will also be clear by the conclusion of the Person-Centered Care planning process whether anyone else should be notified in the event that an Enrollee is not adhering to medication recommendations. This plan will be followed carefully by Care Team members so as not to harm the Enrollee's trust.

In addition to the requisite components of the Person-Centered Treatment Plan listed in section 7.3.B.2 of Attachment A of the RFR, Riverside Community Partners Care Coordinators will invite each Enrollee to discuss developing and/or incorporating an existing, WRAP plan, a recovery oriented best practice into his/her Person-Centered Plan. A WRAP is an Enrollee's personal safety plan, which describes from his/her perspective, certain activities that may assist when s/he may be feeling anxious or despairing. It includes description of: signs and symptoms that the Enrollee has noted should alert others that s/he is in distress, times/seasons/holidays or other events such as the anniversary of a death of a loved one that the Enrollee notes can trigger a difficult emotional time, self-identified coping skills and strategies, steps s/he suggests others can take to help avoid the need for hospitalization, and additional steps that caregivers and others working with the Enrollee can take to help support the Enrollee in maintaining healthy behaviors. The WRAP typically also includes the Enrollee's preferred hospital, and who the Enrollee would want notified in case of an emergency. Should the Enrollee have a WRAP plan in his/her Person-Centered Care Plan, the Care Coordinator will discuss the benefits of sharing this element of the plan with the whole team but will explain that the Enrollee may direct with whom the WRAP plan may be shared.

2) Planned processes for documenting the Person-Centered Treatment Plan;

The person-centered plan will include all required elements listed in Section 2.3.B of Attachment A of the BH CP RFP. If applicable, the Enrollee's preferences regarding reminders about taking prescribed medications and/or a section within the Crisis plan designated as the Enrollee's WRAP. We will not consider the Person-Centered Care Plan to be complete unless the Care Coordinator can document that the Enrollee participated in the planning process to the extent s/he chose, and has approved the final plan.

When the written Person-Centered Care Plan is completed, Enrollee participation is documented, and it is approved and signed by the Enrollee and the Enrollee's PCP (or PCP's designee), it will be stored electronically in the Riverside Community Partners EHR. It will then be shared/transmitted electronically with the Enrollee's PCP or PCP Designee and with all other parties who need the Plan in connection with their treatment of the Enrollee, provision of coverage or benefits to the Assigned Enrollee, or related operational activities involving the Enrollee, including members of the Enrollee's Care Team, ACO/MCO, and other providers who serve the Enrollee, including state agency or other case managers for whom permission to provide information has been given.

3) Planned process for updating the Person-Centered Treatment Plan;
Riverside and our Affiliated Partners will reassess and update each Enrollee's Person-Centered Care Plan at least every six months and more frequently, as required pursuant to the requirements of section 2.3.B.2.f of the Model Contract. During the monthly (or more frequent) encounters with Enrollees, our Care Coordinators will monitor each Enrollee's progress on goals, expressions of how s/he thinks things are going, changes in health status, recommendations by other caregivers or providers, recommendations for follow-up regarding medical conditions or changes in medical status, and how/whether it appears that the Enrollee activities comport with what s/he indicated to be his/her intentions when agreeing to the plan. Reassessments of the Person-Centered Care Plan will be scheduled earlier than six months should the Enrollee's Care Coordinator determine that this is necessary and/or the Assigned Enrollee requests it. At each reassessment, the person-centered plan will be reviewed comprehensively and all sections will be updated, new goals set and other modifications made, as necessary and appropriate. The Riverside EHR will keep track of when changes to the Plan of Care occur and will store and date all versions of each Enrollee's Person-Centered Care Plan.

4) Planned process for ensuring the Assigned Enrollee and the Assigned Enrollee's PCP or PCP Designee approves the Person-Centered Treatment Plan.
At the conclusion of the person-centered planning process, the Care Coordinator will transmit the completed draft plan to the Enrollee's PCP and request his/her review. The Enrollee will also be given a printed copy. The plan may be prepared and shared with the Enrollee (and/or guardian) in alternative formats, such as an audio tape, and/or translated into the Enrollee's primary language as necessary, so that the Enrollee can fully and easily access it. The Care Coordinator will review the completed plan of care with the Enrollee and his/her guardian as necessary, to be sure that it reflects what the Enrollee understood it would include and that the Enrollee/guardian approves of the plan. The Care Coordinator will make any needed edits to the plan based on Enrollee/guardian or PCP feedback and share the final versions with the PCP and the Enrollee.

When the written Person-Centered Care Plan has been completed, reviewed and agreed to, the Enrollee/guardian and the PCP will be asked to sign to acknowledge acceptance. Accommodations will be made for a proxy to sign on behalf of the Enrollee, as necessary, in the event that the Enrollee cannot physically do so his/herself. The person-centered plan of care will be printed and a copy will be given to the Enrollee to keep. This same process will be followed after any updates are made to the plan.

3. Care Coordination and Care management.
The Bidder shall describe how it plans to satisfy the Care Coordination and Care Management requirements described in Section 2.3.C of Attachment A, using evidence-based or emerging practices as appropriate. Such description shall include:
a. How the Bidder will identify all stakeholders (e.g., providers, state agencies, community organizations) involved in an Enrollee's care;
As noted in our response in section 7.3.C.1 above, each Enrollee will be assigned to a Riverside Community Partners team in his/her geography. The Clinical Care Manager/Team Leader of the each team will receive all information available from the referring entity and provide this to the assigned Care Coordinator. The Team Leader and/or Care Coordinator will request additional information about potential stakeholders involved in the Enrollee's care as needed from the ACO/MCO or other referring entity and from the Enrollee, including the name and contact information for the Enrollee's PCP, behavioral health clinician(s), if any, other case managers, advocates, and specialists involved in the Enrollee's care. Based on initial answers, the Care Coordinator may still need to ask for additional stakeholder information from family members, the PCP, behavioral health providers, etc., with the Enrollee's permission. As the assessment takes place, additional information may be gleaned about the Enrollee's current relationships with other caregivers including Recovery Support Navigators, Community Based Flexible Support (CBFS) providers, LTSS providers, substance use services providers, and other formal providers and informal caregivers.

b. How the Bidder will exchange information with such stakeholders;
Riverside and our Affiliated Partners will establish dedicated telephone numbers for Riverside Community Partners – a central number as well as local numbers. All Care Coordination staff will be reachable for verbal communication through these numbers. Written communication about the Enrollee between our program and members of Enrollee's Care Team or other stakeholders involved in the Enrollee's care, who have been authorized via signed consents to receive information about the Enrollee, will be conducted using the Riverside HIPAA protected electronic care coordination system that we will establish and utilize for the Riverside Community Partners operations. All data exchanges from/to Riverside Community Partners for all ACOs/MCOs and EOHHS will conform to all Mass HIway secure exchange standards and to approved data standards (CCD, HL7, etc.). Written communication with additional stakeholders will be accomplished, as necessary through encrypted email or through mailed hard copy.

c. How will the Bidder identify and organize members of the Enrollee' care team;
At the implementation of Riverside Community Partners, Riverside and our Affiliated Partners will have established core teams consisting of a Clinical Care Manager/Team Leader, Nurse Care Managers (RN and LPN), bachelor's level Care Coordinators, and a Medical Director who will consult and assist as needed regarding individual Enrollees. As noted in our description

regarding outreach and engagement activities above, it is our intention that ideally each BH CP team will include peers, i.e., individuals with mental health diagnoses and those in recovery from substance use disorders, as Care Coordinators. Each team's Clinical Care Manager/Team Leader will have final responsibility for the completion and approval of assessments and Care Plan Updates, semi-annually, as required, and whenever else that it may be necessary. The Nurses will have responsibility for all medical portions of the care plans, including medications.

The assigned Care Coordinator is responsible for organizing the Care Team for assigned Enrollees, including but not limited to required staff from within the BH CP team and additional members at the Enrollee's discretion, such as family members and other formal and informal caregivers or advocates. With the Enrollee's permission, the Care Team may also include other specialists and clinicians who are responsible for the specific services that they authorize and/or directly provide per the approved care plan. If Case Managers from state agencies are involved with the Enrollee, the Enrollee will be asked whether they may participate on the Care Team and the Care Coordinator will determine the most sensible and non-duplicative manner for their involvement with respect to ongoing care coordination activities. With guidance from the Care Coordinator, Care Teams will employ a person-centered approach, to ensure that they are formed and operate according to the needs and preferences of the Enrollee.

The Care Coordinator will finalize the Enrollee's Care Team members prior to commencement of the Person-Centered Planning process. Specific Care Team members whom the Enrollee agrees should participate in the Person-Centered Planning Process will be invited to join the Person-Centered Planning meetings when they commence. After the comprehensive assessment and Person-Centered Care Plan have been completed, all Care Team members will be invited to attend all subsequent telephonic and in person care team meetings. The first full meeting of the Care Team will include the Enrollee and will occur six months after the Enrollee has enrolled, or sooner. Names and contact information of Care Team members will be put in the Riverside EHR and updated as necessary by the Clinical Care Manage/Team Leader and/or Care Coordinator.

Once the Person-centered Treatment Plan has been completed, the Enrollee's Care Coordinator will contact the Enrollee to provide any support necessary to ensure that the Enrollee is able to access the formal and informal care delineated in the plan. In this conversation, the Care Coordinator will also review any information to be communicated from the PCP, specialist or other care providers through the Care Coordinator to the Enrollee, and/or provide well-visit, medical, prenatal, outpatient behavioral health, or preventative care reminders. The Care Coordinator will assist the Enrollee to follow-up on any new referrals to providers or services in the manner that the Enrollee prefers as laid out in the Person-Centered Care Plan. The Care Coordinator will also coordinate the Enrollee's attainment of any LTSS services identified and agreed on in the care plan. This will include assisting the Enrollee to reestablish existing relationships and/or identifying LTSS providers that serve or might serve the Enrollee and facilitating communication between the Enrollee, the ACO/MCO and these providers as needed.

The Care Coordinator will track referrals s/he made and appointments s/he scheduled for health-related services for the Enrollee, and will follow-up with the providers by telephone after scheduled visits to identify if/when the Enrollee missed a visit. In the case of missed visits, the Care Coordinator will attempt to reach the Enrollee by telephone to determine whether there are

additional supports, such as assistance with accessing transportation, which s/he may need to be able to make it to appointments. Information about access needs and supports recommended will be documented in the Enrollee's electronic record and communicated to other Care Team members as necessary. The Care Coordinator will ensure that s/he obtains information about medical visits made by the Enrollee immediately post-hospital discharge and share it with others on the Care Team as necessary.

The Care Coordinator will also monitor how the Enrollee utilizes prescribed medications that are identified in the Person-Centered Care Plan. In the event that providers have made new medication recommendations, the Care Coordinator will follow-up with Enrollees (with the assistance of one of the team Nurses, as necessary) to discuss how the medications are working, discuss any questions that the Enrollee may have about his/her new prescriptions, confirm that the Enrollee intends to use the new medications, discuss any concerns the Enrollee may have about their use and/or review their decision to stop or decline a medication. These discussions may be further facilitated by assisting the Enrollee to utilize Shared Decision Making tools regarding psychotropic drug use as noted above. The Care Coordinator will defer to the Enrollee's expressed preferences regarding how and when to discuss medications.

d. How the Bidder will ensure effective ongoing communication across all stakeholders, including exchanging essential documentation.

As noted above, all information relating to our Care Coordination supports and activities relating to the Enrollee, and all of the communications among Stakeholders about the Enrollee will be tracked and stored utilizing either Riverside's Care Coordination system or the Care Coordination system of the Affiliated Partner, depending on the Enrollee's assignment. Riverside and its Affiliated Partners' will communicate directly with the Enrollee's providers and ACO/MCO about care coordination matters electronically through HIPAA protected mechanisms described in the response to section 7.2.E.

This includes sharing key documents with Care Team members, such as the Person-Centered Care Plan and any updates to it. Any relevant verbal information communicated among stakeholders in the conduct of care coordination activities will also be documented in the specific electronic record within the Riverside or Affiliated Partner care coordination system. It will also likely be necessary at times for Care Team members to send or receive some information to/from certain clinicians or other Stakeholders via facsimile, such as blood test results. In the event that any information, such as a change in the Care Plan relating to medication, is sent to a Care Team member via facsimile, it will also be scanned and stored in the electronic record for the Enrollee. Riverside and its Affiliated Partners will document in the Enrollee's electronic record all calls about the Enrollee's care coordination and related activities, such as outreach attempts and calls to or notices sent to other providers around scheduling.

4. Care Transitions.

The Bidder shall describe how it plans to satisfy the Care Transitions requirements described in Section 2.3.D of Attachment A, using evidence-based or emerging practices as appropriate. Such description shall include all the necessary steps the Bidder will take to ensure the Engaged Enrollee's stability and satisfaction following a transition of care.

Our planned practices for managing care transitions will be guided by the requirements described in this RFR and by best practices identified by the Center for Healthcare Research and Transformation. The Center's guidance includes the following components:

Comprehensive discharge planning should be conducted with all team members and follow-up should occur one to three days post discharge – The Care Coordinator will seek to be part of any transition planning, ensuring that the discharging provider and any new community referral sites are aware of the Enrollee's Person Centered Care Plan, including any accommodations the Enrollee may need and that the Enrollee's preferences are heard. The Care Coordinator will contact the Enrollee's physician, other Care Team members and seek to have at least one other Care Team member participate in discharge planning meetings. The Clinical Care Manager or on of the Nurse Care Managers may directly assume this responsibility in situations where the transition is particularly complex, but in all cases will be available to guide and support the Care Coordinator throughout all phases of care transitions.

Complete and timely communication of discharge information should occur using a standardized format – The Care Coordinator will seek essential information such as diagnosis, test results, medication lists and rationale for medication changes, and contact information for the discharging physician. This, along with all discharge plans will be entered into the electronic Care Coordination system and shared as appropriate with the Enrollee's physician and other Care Team members, including the Nurse Care Manager.

Medication reconciliation should occur at each transition – One of the team Nurses will review the accuracy of medication lists and dosages and look for contraindications in consultation with the Enrollee's primary care physician and or the Medical Director as necessary.

The Enrollee and caretaker education should use the "teach back" method – The Care Coordinator will meet with the Enrollee within three business days of discharge and will provide support and education around any new diagnoses, medications changes, time of follow-up appointments, self- care, warning signs and what to do if problems arise. To ensure information is understood, the Care Coordinator will ask the Enrollee/caretaker to restate instructions or concepts in his/her own words. The Enrollee will also be asked about his/her experience and any feedback will be reviewed by the Enrollee's team and added to the Care Plan.

Open communication between providers based on clearly defined responsibilities – The Care Coordinator will facilitate information sharing among Care Team members, insuring that each involved person understands the role s/he will play in assisting the Enrollee post discharge and providing contact information for the discharging provider, as needed.

Follow-up visits with the designated provider after discharge should be prompt – The Care Coordinator will assist the Enrollee in securing rapid (generally within 7 days) post discharge appointments as appropriate (i.e. with the Enrollee's Outpatient BH provider) monitor that the Enrollee attends.

5. Medication Reconciliation

The Bidder shall describe how it plans to satisfy the Medication Reconciliation requirements described in in Section 2.3.E of Attachment A using evidence-based or emerging practices as appropriate.

The Nurses on each BH CP team are responsible for conducting the Medication Reconciliations for Enrollees discharged from an inpatient stay within 3 business days of the date of discharge, in accordance with Section 2.3.E of the Model Contract. Once the Care Coordinator is notified of an impending discharge s/he will alert one of the team Nurses, who will serve as liaison between the Enrollee's PCP and the hospital discharge staff regarding medication orders, as appropriate. Once the Enrollee has been discharged, the Nurse will coordinate with the appropriate Care Team member to ensure that the medication orders are filled accurately and quickly. If new medications have been prescribed, the Nurse, in conjunction with the Care Coordinator, and in deference to the Enrollee's Person-Centered Plan with respect to psychiatric medication, will talk with the Enrollee to determine whether s/he understands the medications and why/how they will be administered, encourage use of prescribed medications, and ascertain whether the Enrollee intends to comply with recommendations. If an Enrollee has had substance use issues or previously abused prescriptions, this would have been addressed in the medication portion of the Person-Centered Care Plan, and the designated strategies developed to help the Enrollee curtail such abuses will be employed by the Team. In the event that the Enrollee is discharged to a new treatment facility setting and has new prescriptions, the Nurse, Care Coordinator and Enrollee will discuss how and where the prescriptions will be filled, including identifying the pharmacy the Enrollee intends to use and assisting the Enrollee to set up transportation to the pharmacy if needed. If the Enrollee participates in a MAP program, the Care Team will share the medication order forms and information with the MAP provider. In the event that medication administration by a nurse will be required, the nurse and Care Coordinator will help make arrangements with area providers such as visiting nurses to provide this service.

These procedures are in keeping with guidelines generated by the Agency for Healthcare Research and Quality for successful Medication Reconciliation. Additional recommended steps we will seek to include are: Developing a single, easy to follow medication list for the Enrollee/caregiver; eliminate unnecessary redundancies in the process; educate the Enrollee/caregiver about the important role each plays in the process, and clarify other Team members' roles and responsibilities.

6. Health and Wellness Coaching

The Bidder shall describe how it plans to satisfy the Health and Wellness Coaching requirements described in Section 2.3.F of Attachment A using evidence-based or emerging practices as appropriate. Specifically, the Bidder shall describe proposed procedures for conducting Health and Wellness Coaching activities, including:

Riverside Community Partners will ensure that the Health and Wellness Coaching requirements described in 2.3.F of Attachment A, including educating the Enrollee on how to reduce high risk behaviors and health risk factors, assisting the Enrollee in establishing links to health promotion activities, and assisting the Enrollee in setting health and wellness goals, are satisfied as follows:

a. Health and wellness education, coaching and health promotion programs the Bidder intends to utilize or follow; and

As part of the Person-Centered Planning Process and following identification of the Enrollee's health and wellness goals and incorporation into the Care Plan, the Care Coordinator and/or Nurse will work with the Enrollee to determine what supports the Enrollee might be interested in and which s/he can receive through his/her PCP's office, ACO/MCO, or through other community based health and wellness support services. Care Coordinators will have on hand pamphlets and other materials, including a full list of Health and Wellness supports that are available at the BH CP and Affiliated Partners' sites. We also intend to develop wellness and health behavior video-conference trainings over the course of the BH CP program to offer to groups of Enrollees interested in particular topics (i.e. healthy eating habits, smoking cessation).

In developing new programming, Riverside Community Partners will conduct a comprehensive review of the wealth of wellness strategies and resources identified on the SAMHSA-HRSA Center for Integrated Health Solutions web site when developing its best practices Health and Wellness Coaching curriculum. SAMHSA identified these factors to be more effective than other approaches: program format (health promotion programs of three months or longer which include an education manual and activity- based approach; weight management which incorporates a nutritional component; physical fitness activity based (vs didactic) programs; integrated physical fitness and nutrition programs; and objectively and reliably measuring lifestyle behaviors (such as tobacco use or nutrition, physical fitness and weight outcomes). These factors will guide our program planning.

b. Methods for ensuring the Engaged Enrollee's goals for the health and wellness programs are recorded and tracked in the Engaged enrollees' Person-Centered Treatment Plan.
A discrete section of the Enrollee Care Coordination record will be dedicated to health and wellness goals so that they are a formal focus area. The Care Coordinator will document any activities that the Enrollee participates in which s/he agrees should be added to the Person-Centered Care Plan, and these activities will be tracked. We expect that Enrollees' initial interest in participating in health and wellness programs will vary, and for some people, such goals may only be agreed to over time, as the relationship with their Care Coordinator and other Care Team members deepens. Initially, some people may only be interested in receiving information about their high risk issues and/or steps they can take on their own to improve their health. When goals do include a formal wellness program (either initially or at a later time), participation will be tracked in the Enrollee's record. The Care Team in conjunction with the Enrollee and his/her PCP will work out specifics of what the Enrollee seeks to focus on and how, and what ongoing reminders or supports will be provided. Revisions and additions to the Care Plan will be documented in accordance with the Enrollee's agreed upon goals.

7. Connection to Community and Social Services
The Bidder shall describe how it plans to connect Engaged Enrollees to social services and community resources, including but not limited to ensuring ongoing connections to community resources and social services.
a. The Bidder's plans to evaluate Engaged Enrollees for social service needs, including the Bidder's proposed screening tool(s), if any;
Our Care Coordinators will evaluate the Enrollees' social service needs and desires as part of the Comprehensive Assessment and the Person-Centered Care Plan development. The Care Coordinator will gather additional information about Enrollees' community and social

service/flexible supports needs and desires through a social services needs assessment tool that we will develop with our Affiliated Partners for use in conjunction with the Comprehensive Assessment. The Comprehensive Assessment tool touches on areas of community and social service needs and will help the Care Coordinator determine which areas to delve into further with the Enrollee. The Social Services assessment tool will help identify existing and possible flexible services and supports might help address the Enrollee's needs. For example, the social services tool will contain many more questions related to the Enrollee's residence and how safe and healthy a living environment it is, whether or not the Enrollee has a means of transportation from or near his/her home to enable attendance at medical appointments, etc. and whether the Enrollee conveys the need to find alternative housing. In the event that finding other housing is critical it will elicit information from the Enrollee about housing needs and preferences. The tool will have a series of questions that are similarly more in depth under each of the areas noted in the description of Section 2.3 G of the Model Contract.

Following this assessment, the Care Coordinator, drawing on the support of others on the Enrollee's Care Team such as their case managers from state agencies, the PCP and representatives from the ACO/MCO, as appropriate will assist the Enrollee in identifying and accessing relevant community-based, social and Flexible Services and resources, including non-Medicaid services, informal supports, home and community based waiver services, and other services and programs including those listed in Section 2.3.G of the Model Contract, that will potentially help meet the identified needs and assist the Enrollee in maintaining as much independence as possible.

b. How will the Bidder ensure its Care Coordinators are familiar with a wide breadth of social services and supports, and providers of these supports.
Riverside Community Partners has been established to take full advantage of our Affiliated Partners - local organizations with deep histories of work in their communities. As a result, there are significant resources in personnel and relationships readily available for each team. We will also train Care Coordinators on both state and local area resources as part of their orientation. We will take full advantage of websites and printed materials regarding available services. Additionally, we intend to develop am electronic resource "library" to be shared among all Riverside Community Partners BH CP teams, which will be updated and added to over the course of the program, including social services and supports in the areas we serve

c. The Bidder's planned strategies for collaborating with ACOs to recommend Flexible Services on behalf of Engaged Enrollees/following-up on the outcomes of such supports.
In the event that any of the identified services or supports desired by the Enrollee are considered Flexible Supports and require authorization by the Enrollee's ACO, the Care Coordinator will facilitate the process to attain authorization. It is our intent to define a mutually agreed upon process for collaborating on Flexible Support determinations with each of the ACOs with which we will contract. We expect that part of our responsibility will be to provide the rationale for how Flexible Supports recommended by our Care Coordinator would potentially improve the health outcome for the Enrollee. Upon approval, the Care Coordinator will ensure the supports are included in the Enrollee's Person-Centered Care Plan and assist the Enrollee in accessing the services and supports as necessary. The Care Coordinator will follow-up with the Enrollee

periodically to ascertain how the Enrollee is utilizing and experiencing supports and work with the Enrollee to find different supports to better meet his/her needs, as necessary.

Section 7.3.D. Innovative Technologies

Page intentionally left blank

Section 7.3 Initial DSRIP Participation Plan

D. Innovative technologies for service delivery (not to exceed 1 page)

The Bidder shall describe innovative technological tools it currently has and how it will use these tools for the delivery of CP Supports. Specifically, the Bidder shall describe its planned uses of technological tools, such as care management or coordination software, telehealth tools, tablets, smartphones, automatic pill dispenser/electronic medication reminder systems, and other adaptive technologies.

Riverside Community Partners expects to leverage technology to the full extent possible to enhance the effectiveness and efficiency of our BH CP services. This will include use of care management and care coordination software included in the Netsmart Evolv electronic health record that Riverside Community Care and one Affiliated Partner currently uses, which will be designed to enable Riverside to collect and disseminate data across all partners. Additionally, our Affiliated Partners who are also members of Community Care Cooperative (C3) will use Identifi Care, a care coordination application embedded within C3's overall electronic record, and will electronically transmit their required data to Riverside's system.

We will also seek to employ technologies that directly enhance the quality of our communication with and person-centered experience of Enrollees. For example, we recognize that for some Enrollees who do not speak English, language might be a barrier when, despite our best efforts, we do not have an available staff who speaks their language. Riverside has committed to be an early adopter of a new technology, a Smart Earpiece Language Translator from Waverly Labs. This technology, soon to be released, is a wearable language translator that would be worn by the staff person and the Enrollee to aid in direct communication without need for another individual to serve as a translator. We have purchased two sets, and if utilizing it is helpful, we will purchase additional sets to share among programs as needed.

We will also explore using tele-behavioral health technology within the BH CP program. Riverside was awarded a grant from the Massachusetts Health Policy Commission to implement a tele-behavioral health pilot with homebound elders. We are working with an experienced tele-psychiatry company and using laptops and a Skype type program and will leverage our learning from this pilot to develop options for applying tele-behavioral health to our CP work. One of our Affiliated Partners has also been using tele-behavioral health and will assist in developing its application to BH CP. We will also use video-conferencing for some staff trainings and psycho-education and health promotion trainings for Enrollees.

We also intend to use Shared Decision Making, an interactive tool and emerging best practice developed by Patricia Deegan, Ph.D. that is available on line from SAMHSA. This pairs communication and decision making tools to assist individuals with behavioral health conditions to consider treatment options in conjunction with their own preferences, goals, cultural beliefs and values and to develop a report that can be shared with their prescriber. Riverside was an early pilot site for this tool years ago, and we understand its value in assisting people to make treatment decisions they are more likely to feel ownership of and follow the recommended medication and other treatment regimens. We will explore ways to make this online tool available to Enrollees who may or may not have their own access to computers. We intend to continue seeking and exploring additional innovative technologies as our BH CP program becomes fully operationalized and develops over the next few years.

Section 7.3.E. Personnel and Staffing

Page intentionally left blank.

Section 7.3 Initial DSRIP Participation Plan

E. Personnel and staffing (not to exceed 5 pages, excluding attachments)
The Bidder shall provide its proposed staffing plan to perform the Contractor Responsibilities set forth in Attachment A, including fully implementing the required scope of CP Supports as well as the administrative aspects of the Contract. The Bidder shall provide:
1. An organizational chart (as an attachment) that identifies personnel, senior managers, and other staff by title to be assigned to accomplish the Contractor Responsibilities described in Attachment A;

The Riverside Community Partner Organizational Chart is provided below as an **Attachment to this subsection (7.3.E.).**

2. A sample staffing model for the number of Engaged Enrollees in each Service Area as indicated by the Bidder in Attachment D, including the number of full-time equivalent (FTEs) for supervision, administration, and Care Management and Care Coordination positions;
Riverside's core staffing model is based on teams organized to serve 400 MassHealth Enrollees. Each team includes a full-time Clinical Care Manager, two full time Nurse Care Managers (an RN and an LPN), and eight Care Coordinators. Each team will also have access to a Medical Director to provide leadership, oversight and supervision as needed. This model assumes a caseload of 50 MassHealth Enrollees per Care Coordinator, with significant support provided by the Clinical Care Manager and the Nurse Care Managers. This model will be replicated multiple times by Riverside and our six Affiliated Partners to fulfill our planned coverage of a total of 3,800 eligible MassHealth members across our proposed Service Areas. (We will scale this model up as the referrals are received. We will monitor staff capacity as assignments are received and consider temporary additional staff, particularly registered nurses, and LPNs if necessary). Teams will be located throughout our Service Areas, but none will be required to only serve a single Service Area. Instead, each team, while primarily drawing from the Service Area in which it is physically located, will also be able to provide BH CP services to Enrollees in abutting areas, allowing us to create maximum flexibility to respond to currently unknown enrollment patterns. Since much of the BH CP work will be conducted either electronically, telephonically, or through mobile staff outreach, we believe our plan will provide the optimal means to ensure all geographies within our Service Areas are well covered by Riverside and our Affiliated Partners.

The Clinical Care Managers will be either independently licensed BH clinicians, currently defined as LICSWs or RNs. For some teams, this position will also function as the Team Leader, providing direct supervision to the rest of the team members. Every team will have two Nurse Care Managers, at least one of which will be an RN and the second an LPN. . Care Coordinators will largely be Bachelors level staff who are trained in accordance with the requirements specified in Section 2.4.c of this RFR. We plan to include a Recovery Specialist/Person with Lived Experience among the eight core staff, believing this will be an invaluable resource to the people we serve.

Riverside will directly operate up to three full teams and our Affiliated Partners will develop local teams to manage members in their own or a nearby geographic area. In many instances, Riverside will directly staff and operate a team and one of our Affiliated Partners will also serve the same geography. Not all teams will include the full eight Care Coordinators where Riverside or an Affiliated Partner chooses to operate with a smaller team, which may be an extension of an existing care management service. These smaller teams will still meet all requirements set forth in the RFR, including the staffing requirements for the LICSW and RN.

Supervision is built into each team's own structure, typically by the Clinical Care Manager/Team Leader. In addition, all teams will be coordinated and supported by the full-time Director of Riverside Community Partners, Nora Kenney-Houser, LICSW. She will be further supported and supervised by a member of Riverside Community Care's senior management, Jason Moscato, RN, MS, LMHC who will provide additional oversight to the BH CP program. The Director will have two full-time Administrative Assistants to provide additional support for the program and for her oversight and monitoring functions.

3. A description of the Bidder's recruitment plans, including timelines to recruit staff for any personnel positions not currently filled, and job descriptions and qualifications for each personnel position (job descriptions shall be submitted as attachments). The job descriptions shall contain information regarding education, background, qualifications, credentials, and relevant recent work experience;

Riverside already employs the person who will become the Riverside Community Partners Director. Nora Kenny-Houser, LICSW has been managing similar services for Riverside for several years (including overseeing our work on Here for You). She will begin to assume responsibilities for the BH CP program early in the preparation budget period to assist in setting up program operations, including hiring Riverside's team leadership. Specifically, she will hire the Riverside team Clinical Care Managers/Team Leaders and will assist them in hiring the additional team members.

Riverside and each of our Affiliated Partners will recruit for our respective teams utilizing our own proven strategies for recruitment. We believe local recruitment results in the most effective path for hiring and for finding employees who know and understand the local community and reflect the culture and languages spoken in the area. We expect to enhance local recruitment by pooling resources when we find candidates who could benefit one of our Affiliates because they live in a particular community or speak a particular language.

We will phase in recruiting, beginning in January and continuing throughout February and March of 2018 for all unfilled positions. We intend to hire core staff, including a roster of Care Coordinators for each team, ahead of the June 1, 2018 start date (detailed in the Budget Narrative) to allow Riverside and our Affiliated Partners to train staff in advance of referrals. Additional staff will be added and trained as the program continues to ramp up. As noted above, we will monitor staff capacity as we receive assignments and consider adding temporary staff such as registered nurses, as necessary.

Position descriptions for the core staffing, Clinical Care Manager, Care Coordinator and Nurse Care Manager are included as an attachment to this proposal, as is the description for the Riverside Community Partners Director. The qualifications for each position are included in the descriptions and are in compliance with requirements where specified in the Request for Responses and Attachment A Model Contract.

Riverside has been extraordinarily successful in recruiting well qualified employees across all our programs. Our vacancy rate runs well below 10%. We will benefit from the expertize of our Talent Acquisition Department to recruit for BH CP positions, including assisting our Affiliated Partners by sharing resumes of applicants who come to us from communities where they are trying to ramp up. We will post jobs and advertise through OpenHire, Zip Recruiter, College and University sites, utilize college career fairs, career centers, and recruitment days at key sites to identify potential hires. We will also source passive candidates via LinkedIn, CareerBuilder, SchoolSpring, Indeed, Twitter, Facebook, college resume books, and other creative avenues. Many of our employees come through internship programs and we will identify any qualified candidates who may come from this source as well. Finally, we expect that some BH CP applicants may be current employees of Riverside or our Affiliated Partners who are interested in joining this new venture**.**

Job descriptions are provided below as **Attachments to this subsection (7.3.E.3).**

4. A description of how the Bidder will recruit and hire staff from the cultural and linguistic communities they intend to serve;

Many of the communities we propose to serve have residents who speak Spanish, Portuguese, Haitian Creole, French, and other languages. Riverside and our Affiliates have deep relationships with the local communities and already serve them. We have employees who live locally and who reflect the ethnic and cultural diversity of the local areas. Our established connections with the communities we serve will help us attract staff for the BH CP program, including but not limited to Care Coordinators and people with lived experience of behavioral health challenges. As stated in the RFR, it will be critical to "…recruit, employ and manage appropriate and qualified personnel, including supervisory staff, with diverse cultural and linguistic backgrounds…"

We understand that language capacity is a core component of providing appropriate and competent care and care management. Riverside, working with our Affiliated Partners, serves a very diverse population and we are all skilled at identifying and meeting the linguistic needs of the populations served, including those who are deaf and hard of hearing and who have low health literacy. In some situations one of our Affiliated Partners will be particularly well-equipped to meet linguistic needs. We will periodically assess the match between population needs and Riverside Affiliated Partner's capacity and implement initiatives to ensure we are maximizing the benefit of our range of partners.

In addition, we will recruit through diverse student organizations such as the Latino Leadership Initiative at Boston College, the Gay Straight Alliance, Black Student Unions, ALANA – the African American, Latina, Asian, and Native American Nursing Group, and other multicultural clubs. We also partner with community organizations such as the Haitian American Society

Club, Mass Alliance for Portuguese Speakers, the Massachusetts Rehabilitation Commission, Puerto Rican Cultural Center, Casa Latina, and the Bilingual Veteran's Outreach Centers of Massachusetts, etc.

There are media sources that are targeted at specific communities such as Rainbow Times, Haitian Times, LinkedIn groups, Facebook groups, etc. We will consult Riverside's Diversity and Inclusion Manager as well as those with similar positions among our Affiliated Partners. We also may utilize referral bonuses, especially for specific, hard to fill positions.

Riverside Community Partners commits to the following principles:

- We will advance and sustain organizational governance and leadership that promotes Culturally and Linguistically Appropriate Services and health equity through policy, practice and allocated resources
- We will recruit, promote, and support a culturally and linguistically diverse governance, leadership and workforce that are responsive to the population in our service area
- We will educate and train governance, leadership and workforce in culturally and linguistically appropriate policies and practices on an ongoing basis
- We will seek to identify specific population groups through surveys and data analysis and work to meet their needs

5. Proposed training, orientation plans and modules for staff; and

In addition to each of our Affiliates providing orientation and training focused on their own organization, we will provide overarching training – taking advantage of the scale of Riverside Affiliated Partners which will include as many as 75 Care Coordinators and multiple Care Coordinators and nurses, training will include:

<u>General Orientation for Each Affiliated Partner</u>

Organizational mission statement, policy manuals relevant to job, phone numbers of key services and supports, written orientation to specific related programs, HIPAA regulations, transporting records, quality management and compliance information, human rights policies, incident reporting procedures, dress policy, human resources information and requirements, confidentiality, code of ethics, computer orientation, keys, ordering supplies, fraud and abuse training.

<u>Specific Orientation for all Employees Working for Riverside Community Partners</u>

Program mission, program overview, job description, supervisor's expectations, setting schedule, training in specific software, overview of services provided by program, program forms, standard consumer record documentation, introductions to key personnel, building tour, training and certification as necessary, safety and de-escalation techniques, health and safety, crisis management.

<u>Training (Required Core Topics to be Determined)</u>

Note: These trainings will be offered in various formats including live presentations, as well as video conferencing and webinars. Many of these trainings are available and have been field tested. Several are in development. SAMSHA and other sources are also utilized. We will

ensure orientation and training includes all mandated trainings delineated in Section 2.4.C of the Model Contract in Attachment A of the RFR.

Engaging people served by phone; engaging collateral contacts in the care of the person served; safe driving of consumers; self-determination, recovery, resiliency and wellness; phone screening for the first home visit; motivational interviewing; psychopharmacology; the experience of hearing voices; best practices in suicide assessment; working with people affected by domestic violence; ABCs of sustainable time management; burnout, compassion, fatigue and the art of self-healing; human trafficking; autism primer; substance use and co-occuring mental health disorders; mental health and substance use and probation; the nuts and bolts of SSI, SSDI, PASS, and other State benefits; an introduction to transgender individuals, serving underserved populations; lessons in resilience; age related brain disease; supporting recovery in acute care and emergency settings; hospital diversion; critical skills for activating self-management; integrating primary care and wellness into behavioral health; chronic pain management and SUDs; understanding harm reduction.

6. Description of staff retention strategy

Riverside has identified employee retention as a critical factor in the success of our organization. As a result, we offer our employees full service career consulting with the goal of keeping employees within our organization. With the advent of Riverside Community Partners, this model can be utilized to help keep them within our network. We have found that career fairs for our interns helps keep valuable new graduates in our system and, again can expand this to our broader network.

Our goal is to utilize the best practices we develop over time, offer training across the network, and build the kind of positive workplace and comradery that helps engage staff. We have learned that an engaged workforce leads to better morale, pride in one's work, higher quality care and employee longevity. One important factor in an engaged workforce is the quality of the supervision and management staff experience, and in particular, the success of managers and supervisors in communicating with each staff in a way that enables that staff to feel valued and included. Therefore, the training, supervision and support of program managers throughout the Riverside Community Partner program will be an area of focus for us. This will be accomplished through several means, including the internal resources and practices of each of our Affiliated Partners, the support and consultation of the Riverside Community Partners Director, and through shared meetings and trainings throughout the course of the program. In addition, Riverside and our Affiliated Partners will encourage staff to directly take advantage of our training programs.

Finally, to ensure we understand what is working and what is not, we will survey staff and conduct occasional exit interviews.

RIVERSIDE COMMUNITY CARE

Job Description

Title: Program Director

Reports to: Assistant Vice President for Behavioral Health Services

Program: Riverside Community Partners

Division: Behavioral Health Services

Job Titles Reporting to this Position: Riverside Clinical Care Manager/Team Leaders, Administrative Assistant, others as assigned

Position Summary: The Program Director is responsible for direct supervision of Riverside's Behavioral Health Community Partner (BH CP) teams, for oversight of the Riverside Community Partners overall program and for serving as a primary contact with ACOs/MCOs and EOHHS regarding the BH CP program. The Director collaborates with Riverside's Affiliated Partner teams to share resources, develop best practices, ensure compliance with all BH CP contract policies and procedures and receive and transmit required reports. The Director performs these duties with support from the Associated Vice President (AVP) for Behavioral Health Services, the Vice President (VP) for Quality Management/Community Partner Program Quality Manager and Compliance Monitor or designee, the Medical Director, the VP for Program Development and Strategic Planning/Community Partners Director for Healthcare Transformation , and assigned Administration & Finance Department personnel.

Essential Duties and Responsibilities:

A. BH CP Program Management and Oversight

- Accepts referrals of Assigned Enrollees from ACOs/MCOs and or EOHHS and distributes referral to appropriate BH CP teams according to geography, preexisting relationship, Enrollee preference and team capacity
- Tracks all required elements of service delivery and documentation as conducted by and reported from all BH CP teams, and prepares and submits required reports to EOHHS pursuant to Community Partner contract requirements and in support of submission of claims for payment
- Develops any new policies and procedures related to Behavioral Health Community Partner Program implementation that must be developed pursuant to the Community Partner contract and obtains EOHHS approval, as directed, for such policies and procedures before implementation. Ensures all approved policies and procedures are disseminated to all Community Partner Program staff, that training relating to implementation is provided timely, as necessary, and oversight is provided to ensure ongoing understanding of and compliance with all.

- Develops, maintains and routinely updates electronic directory of community based services and supports that are resources for the Community Partner Program in all the service areas that the Riverside Community Partner program covers.
- In conjunction with Quality Management and in collaboration with Affiliated Partners, monitors through reports, record sampling, meetings and other means all BH CP teams to ensure performance of BH CP activities are being delivered in a high quality, person centered manner in adherence with program policies and procedures, and that they meet all contract requirements including documentation of requisite signatures of Care Team and Enrollee on key documents such as the Person-centered Care Plan. Brings any issues to the attention of the relevant BH CP Team Leader and if not resolved in a timely manner, notifies the AVP and the Affiliated Partner's designated leader for assistance in correcting the issue
- Leads collaboration of all Team Leaders in the development and dissemination of best practices, resource directories, staff training curricula, Enrollee health and psycho-education materials or trainings, and other program enhancement initiatives
- Leads the development of staff training curricula and ensures all Team Leaders and ensuring team staff receives required orientation upon hire and program specific trainings at orientation and refreshers annually.
- Collaborates with the Vice President of QM and the Quality Committee as appropriate to operationalize annual Quality Initiatives across all teams
- Collaborates as needed with QM and Medical Director regarding critical incident and grievance resolution and reporting
- Responds to requests for ad hoc reports and submission of enrollee records and related documents as may be requested by EOHSS.

B. Supervision of Riverside Community Care BH CP Teams

- Screens, hires, takes necessary disciplinary action and /or terminates as necessary Riverside's BH CP Clinical Care Manager/Team Leaders and other BH CP staff as needed in collaboration with the AVP and Human Resources
- Provides regular supervision and written performance reviews to supervisees accordance with Riverside policies
- Ensures that Riverside Team Leaders fulfill their role in supervising team staff so that all assigned Enrollees receive needed and appropriate services, and that teams provide quality care in compliance with all contract requirements, Riverside policies and procedures and applicable laws and regulations.
- Provides ongoing support to the professional development of supervisees, including but not limited to training and skills development.

C. Administrative

- Ensures teams complete all clinical documentation, including Assessments, Care Plans, progress notes, updates, incident reports, forms, etc. in a complete and timely manner and in compliance with organization and relevant state protocols.

- Ensures teams complete all administrative documentation, including program statistics, reporting, payroll, etc. in a complete, accurate and timely manner in compliance with organization and relevant state or payer requirements**.**
- Compiles and transmits all required all requisite Community Partner reports in a timely and accurate manner.
- Participates in Quality Committee, Governance Committee and/or other committees as may be assigned.
- Participates in the development of Quality Initiatives, a BH CP resource directory and other initiatives as needed and ensures all teams conduct required surveys.
- Assumes additional responsibility consistent with program needs and role, as defined in consultation with the AVP.

General Responsibilities

- Ensures compliance with all mandated reporting requirements and regulations (i.e. DCF, DMH, DPPC, Elder Protective Services)
- Reads and follows procedures as detailed in Riverside and program policies and procedures
- Attends and utilizes supervision meetings. Brings issues of concern and/or importance to supervisor for consultation
- Maintains a professional work environment with attention to persons served and staff health and safety by maintaining protocols, alerting management to unsafe conditions, etc.
- Attends all required trainings and administrative meetings
- Other duties as may be assigned

Non –Essential Duties & Responsibilities

- There are no non-essential duties at this time.

Qualifications:

- Masters Degree in a Behavioral health field with Massachusetts licensure at the independent level of practice
- Experience working with people with serious mental illness and substance use disorders and with care management
- Minimum two years supervisory and program management experience
- Familiar with and embraces person-centered planning philosophy and motivational interviewing
- Ability to use a computer for word processing, EHR and email/Outlook Calendar, and the Internet for resource searches and assisting clients with online surveys and using online decision-making tools

Physical & Mental Requirements:
Must have the physical and cognitive abilities and knowledge base to:

- Respond and work with consumers, staff, managers and external parties in a professional, respectful, and sensitive manner.
- Safely perform job functions with or without the aid of mechanical devices.
- Comprehend and carry out policies and procedures using specific instructions and accepted practices.
- Assess complex situations, collaborate and integrate different viewpoints and use good judgment when dealing with others.
- Communicate verbally and in writing in language that can be readily understood by the majority of the program's clients, staff and funders.
- Effectively perform job responsibilities in a high stress environment.
- Regular access to reliable transportation is required in order to attend required trainings, meetings and/or fulfill other responsibilities of this role.

Training Requirements:

- HIV/Infection Control
- Hepatitis B Orientation & Training
- Safety/De-escalation training
- Shared Decision-making (refresher if already trained)
- Training sufficient to maintain licensure
- Community Partners Program specific initial orientation and refresher trainings annually on topics including, but not limited to the following:

    a. Cultural competency;

    b. Accessibility and accommodations;

    c. Independent living and recovery principles;

    d. MassHealth State Plan LTSS and eligibility criteria;

    e. Motivational interviewing (refresher if already trained);

    f. Trauma informed care;

    g. Conflict of interests, including but not limited to those described in **Section 2.4.F**, and the Riverside Community Partner program's mitigation strategy for conflicts of interest;

    h. Health and wellness principles;

    i. Person-Centered Treatment Planning processes, using curriculum approved by EOHHS; and

j. Other trainings as further directed by EOHHS.

RIVERSIDE COMMUNITY CARE

Job Description

Title: Clinical Care Manager/ Team Leader

Reports to: Riverside Community Partners Director

Program: Riverside Community Partners Team

Division: Behavioral Health Services

Job Titles Reporting to this Position: Care Coordinators, Nurse Care Manager, others as assigned

Position Summary: The Clinical Care Manager/Team Leader serves as the manager of a Behavioral Health Community Partners (BH CP) team, providing direct clinical care management services to enrolled clients, hiring and supervising Care Coordinators and nursing staff and overseeing the operations of all care management and care coordination activities within the team. The position ensures that team members are properly trained and are providing person-centered support to Enrollees in compliance with all contractual and Riverside requirements. The position provides both clinical and operational supervision to all team members and serves as the designated point of contact for referrals to the team.

Essential Duties and Responsibilities:

A. Direct Service Provision

- Serves as Clinical Care Manager for Enrollees referred to the team, participating in the Assessment, Care Planning and ongoing BH CP service provision as specified in program protocols and policies
- Collaborates with the Registered Nurse Care Manager in review of comprehensive assessments of all enrollees and conducts final review and approval of comprehensive assessments of all Enrollees assigned to the team
- Assumes primary responsibility for aspects of Enrollees care when master's level staff intervention is needed and ensures consultation with Medical Director as needed on complex cases
- In conjunction with other Clinical Care Managers/Team Leaders and others, develops and provides psycho-education and/or health promotion trainings for Enrollees

B. Supervision/Consultation

- In conjunction with Program Director, screens, hires, takes necessary disciplinary action and /or terminates program staff in collaboration with the Director and Human Resources.
- Provides regular supervision and written performance reviews to all team members in accordance with Riverside policies, ensuring that staff's assigned Enrollees are receiving needed and appropriate services, and that staff conduct themselves in a professional,

person-centered and respectful manner with Enrollees, families, Care Team members, collaborators, payers, regulators and others.

- Monitors and ensures quality of care in service provision, risk assessment, collaboration and documentation by all staff and that all Care Team processes are conducted in compliance with and adherence to all BH CP policies and procedures.
- Provides ongoing support to the professional development of supervisees, including but not limited to training and skills development.
- Participates in multi-disciplinary team meetings, utilization review and program planning.
- Assists Care Coordinators, as necessary, to obtain and utilize accommodations, such as translator services, as necessary, to support outreach, engagement and ongoing care coordination activities with Enrollees with disabilities or language needs that warrant special accommodations for communicaton.
- Creates and updates a directory of and ensures Care Coordinators are made aware of all social services and other services and resources available locally to Enrollees and collaborates with the Program Director in sharing resource information across teams.
- Ensures that all Care Coordinators are aware of services and supports provided by all CP Affiliated Partners.
- Participates in consultation, sharing of resources and best practices with other Riverside Community Partners teams

C. Administrative

- Accepts referrals, assigns referrals to Care Coordinators and ensures Outreach, Assessment, Care Planning and reviews are done in accordance with all program requirements.
- Completes and ensures all team members complete all clinical documentation, including Assessments, Care Plans, progress notes, updates, incident reports, forms, etc. in a complete and timely manner and in compliance with organization and relevant state protocols.
- Completes and ensures all team members complete all administrative documentation, including program statistics, reporting, payroll, etc. in a complete, accurate and timely manner in compliance with organization and relevant state or payer requirements**.**
- Submits a timely and accurate compilation and submission of all requisite Community Partner monthly Member Status and other reports to the CP Director and other ad hoc reports as necessary.
- Documents and reports to the BH CP Director and Riverside QM Vice President or designee, as necessary, any grievances and/or incidents pertaining to Enrollees or CP Care Team activities and works to resolve, as appropriate in accordance with CP policies and procedures.
- Ensures team conducts surveys of a cohort of Enrollees related to complete the CP Quality Improvement initiatives.

- Assumes additional responsibility consistent with program needs and role, as defined in consultation with the BH CP Director.

General Responsibilities

- Complies with all mandated reporting requirements and regulations (i.e. DCF, DMH, DPPC, Elder Protective Services)
- Reads and follows procedures as detailed in Riverside and program policies and procedures
- Attends and utilizes supervision meetings. Brings issues of concern and/or importance to supervisor for consultation
- Maintains a professional work environment with attention to persons served and staff health and safety by maintaining protocols, alerting management to unsafe conditions, etc.
- Attends all required trainings and administrative meetings
- Other duties as may be assigned

Non –Essential Duties & Responsibilities

- There are no non-essential duties at this time.

Qualifications:

- Behavioral health related Masters Degree with Massachusetts licensure at the independent level of practice
- Experience working with people with serious mental illness and substance use disorders
- Prior supervisory experience
- Familiar with and embraces person-centered planning philosophy and motivational interviewing
- Ability to use a computer for word processing, EHR and email/Outlook Calendar, and the Internet for resource searches and assisting clients with online surveys and using online decision-making tools
- Regular access to reliable transportation required.

Physical & Mental Requirements:
Must have the physical and cognitive abilities and knowledge base to:

- Respond and work with consumers, staff, managers and external parties in a professional, respectful, and sensitive manner.
- Safely perform job functions with or without the aid of mechanical devices.
- Comprehend and carry out policies and procedures using specific instructions and accepted practices.
- Assess complex situations, collaborate and integrate different viewpoints and use good judgment when dealing with others.

- Communicate verbally and in writing in language that can be readily understood by the majority of the program's clients, staff and funders.
- Effectively perform job responsibilities in a high stress environment.
- Regular access to reliable transportation is required in order to attend required trainings, meetings and/or fulfill other responsibilities of this role.

Training Requirements:

- HIV/Infection Control
- Hepatitis B Orientation & Training
- Safety/De-escalation training
- Training sufficient to maintain licensure
- Shared decision making, if not already trained

- Community Partners Program specific initial orientation and refresher trainings annually on topics including, but not limited to the following:

k. Cultural competency;

l. Accessibility and accommodations;

m. Independent living and recovery principles;

n. MassHealth State Plan LTSS and eligibility criteria;

o. Motivational interviewing, (refresher if already trained);

p. Trauma informed care;

q. Conflict of interests, including but not limited to those described in the EOHHS BH CP Model Contract **Section 2.4.F**, and Riverside Community Partner program's mitigation strategy for conflicts of interest;

r. Health and wellness principles;

s. Person-Centered Treatment Planning processes, using curriculum approved by EOHHS; and

t. Other trainings as further directed by EOHHS or determined necessary by the Riverside Community Partner Program Leadership.

RIVERSIDE COMMUNITY CARE

Job Description

Title: Care Coordinator

Reports to: Clinical Care Manager/Team Leader

Program: Riverside Community Partners Team

Division: Behavioral Health Services

Job Titles Reporting to this Position: N/A

Position Summary: The Care Coordinator serves as a member of a Behavioral Health Community Partners (BH CP) team, providing person-centered and recovery oriented care management and coordination to assigned Enrollees, including but not limited to outreach and engagement, assisting Enrollees to identify goals and to develop an individual care plan, completing comprehensive Assessments, facilitating Care Teams, and coordinating communication among Enrollees, their healthcare and other providers, involved state agencies and others, and supporting Enrollees to access and utilize resources to improve and maintain their health and quality of life.

Essential Duties and Responsibilities:

A. Direct Service Provision

- Conducts outreach and engagement activities to encourage CP enrollment, including ensuring mechanisms for communication among Enrollees and others involved in Enrollees' care in all aspects of assessment and care planning and coordination activities.
- Functions as primary care coordinator for assigned Enrollees, face to face, telephonic and electronic outreach and ongoing communication
- Completes comprehensive Assessments, Person-Centered Care Plans and updates as required by program protocols and policies in conjunction with Enrollees, their Care Teams and other BH CP team members
- Facilitates communication and collaboration among all Enrollees' health and behavioral health care providers, family and community resources, especially during times of transitions between levels of care or when changes to the Person-Centered Care Plan are made, supporting Enrollees to actively engage in medical, behavioral health, social services, wellness activities and other resources to promote their health and well being
- Coordinates with the Nurse Care Manager, Clinical Care Manager, and others to ensure all aspects of the BH CP services are approved, provided and reviewed as needed and in accordance with program protocols and policies
- Organizes and facilitates Care Team meetings
- Maintains regular contact with Enrollees (and their families when appropriate)

- Assists Enrollees with navigating through all systems of care, provides referrals to appropriate services and supports, coaches and assists Enrollee to attain health and wellness goals

- Other duties as appropriate to the Care Coordinator role and as may be assigned

B. General and Administrative

- Complete all clinical documentation, including Assessments, Care Plans, progress notes, updates, incident reports, forms, etc. in a complete and timely manner and in compliance with organization and relevant state protocols.

- Completes all required administrative documentation, including but not limited to reports, statistics, timesheets, etc. in a complete, accurate and timely manner in compliance with organization and relevant state or payer requirements**.**

- Assumes additional responsibility consistent with program needs and staff role, as defined in consultation with the Clinical Care Manager/Team Leader.

General Responsibilities

- Complies with all mandated reporting requirements and regulations (i.e. DCF, DMH, DPPC, Elder Protective Services)

- Reads and follows procedures as detailed in Riverside and program policies and procedures

- Attends and utilizes supervision meetings. Brings issues of concern and/or importance to supervisor for consultation

- Maintains a professional work environment with attention to persons served and staff health and safety by maintaining protocols, alerting management to unsafe conditions, etc.

- Attends all required trainings and administrative meetings

- Other duties as may be assigned

Non –Essential Duties & Responsibilities

- There are no non-essential duties at this time.

Qualifications:

- Bachelor's degree in a behavioral health or social service field and/or two years of experience working with people with mental health and/or substance use disorders; or

- Embraces person-centered planning philosophy

- Lived experience as a consumer of behavioral health services with Peer Specialist training desirable

- Ability to use a computer for word processing, EHR and email/Outlook Calendar, and the Internet for resource searches and assisting clients with online surveys and using online decision-making tools

- Regular access to reliable transportation is required in order to attend required trainings, meetings and/or fulfill other responsibilities of this role.

Physical & Mental Requirements:
Must have the physical and cognitive abilities and knowledge base to:

- Respond and work with consumers, staff, managers and external parties in a professional, respectful, and sensitive manner.
- Safely perform job functions with or without the aid of mechanical devices.
- Comprehend and carry out policies and procedures using specific instructions and accepted practices.
- Assess complex situations, collaborate and integrate different viewpoints and use good judgment when dealing with others.
- Clearly communicate verbally and in writing in language that can be readily understood by the majority of the program's clients, staff and funders.
- Effectively perform job responsibilities in a high paced environment.

Training Requirements:

- HIV/Infection Control
- Hepatitis B Orientation & Training
- Safety/De-escalation training
- Training sufficient to maintain licensure
- Shared decision making, if not already trained
- Community Partners Program specific initial orientation and refresher trainings annually on topics including, but not limited to the following:

    u. Cultural competency;

Attachment 2 to Section 7.3.G. Budget Narrative
(To be Replaced with Excel File provided 12/5/17)

The following Budget Narrative, created using the RFR Attachment C Budget Narrative, includes:

- **Community Partner Budget Narrative Part I: Program Expenses; and**
- **Community Partner Budget Narrative Part II: Infrastructure Expenses**

Page intentionally left blank.

Attachment 2 to Section 7.3.G 2. Community Partner Budget Narrative (Developed using BH CP RFR Attachment C) (To be Replaced with Excel File provided 12/5/17)

Part I: Program Expenses:
(Expense narrative should only include expenses listed in the Program Budget. Please include a narrative for expenses listed in the Infrastructure Budget in Part II.)

Salary **Total:** $22,060,065

In the box below, please provide a description that includes: (1) the title of the position, (2) a brief statement of the position's primary responsibility, (3) an approximate amount of time the staff member will spend performing tasks related to the Contract, (4) the position's salary, and (5) the length of time the position will be staffed during the relevant Budget Period.
(e.g. Program Director currently oversees the program and will spend 100% of their time hiring, supervising and training staff. This individual's annual salary is $67,575.00 and will be covered for the 12 months of the Budget Period.)

Riverside and our Affiliated Partners have committed to serve up to 3,800 people, but we are flexible should referral patterns and volume be lower or higher. To serve this number of MassHealth Enrollees will require a total of 9.5 teams. We believe that our local model, flexibility, and experience will serve Enrollees well. Please note that our budget assumes we will reach 80% of capacity in Budget Year one, recognizing it will take time to build to full caseloads. Since we can add staff as the caseloads grow, we anticipate being able to match staffing with volume. In estimating revenue from projected capacity, we used $180 PMPM for our calculations. We understand that CBFS Enrollees will be reimbursed at a higher rate, but also that not all budgeted capacity may be filled each month. Therefore, using $180 for all budgeted Enrollees represents our best overall means of estimating potential revenue.

There are two categories of salary associated with Riverside Community Partners. First there are the central BH CP program administrative positions necessary to manage the overall program. The Senior Manager assigned to this project, Jason Moscato, RN MS, LMHC is allocated to Riverside Community Partners as a .375 FTE for $39,750 annually; he is a member of Riverside's Leadership Team and Supervises the Program Director. The Program Director is Nora Kenny-Houser and is dedicated to the program full time. She is responsible for the day to day operation of Riverside Community Partners, including oversight of our Affiliated Partners. This position is budget at $80,000. Two full-time administrative support positions are also included in the budget. Each is budget at $42,000 and will work solely for this program. One position, the Contract Administrator will focus on contract management and monitoring, preparing claims, reports, and related information and submissions. The other Administrative Assistant will serve as the coordinator of meetings, projects, and provide general support. Dedicated centralized quality management staffing is also included for .2FTE at $19,000 annually. This position will be a member of Riverside's Quality Management Department.
The second category of salaries includes the core staffing for each of our planned 9.5 care management teams. Core staffing will include a full-time Clinical Care Manager/Team Leader who manages each locally-based team. This position is budgeted at $65,000. A full-time nurse for each team will ensure the medical needs of the people we serve are met on a day to day basis. This position is also budgeted at $65,000. The eight Care Coordinators for each team will provide most of the direct services for the program and will each be paid $40,000. One hour of psychiatry, the Team (Medical Director) is budgeted at $6,000 annually. Each Affiliated Partner may adjust the model of their team(s), including salaries, to align with their own organization's compensation plan, as long as they meet all contractual obligations. We will provide back-up documentation for all salary expenditures should MassHealth require it.
Please note that all salaries, benefits and most other costs are budgeted to increase 1.5% annually in the five year

budget model provided in Attachment B Community Partner Program Budget Report.

Fringe **Total:** $5,849,937

In the box below, please provide a description of all line items within the fringe category. Example line items include FICA, Medicare, Unemployment, Health Insurance, Retirement, etc. Please include the fringe benefit rate, breaking it down by line item and percentage rates.
(e.g. FICA will be paid for all salaries: $54,818.00 x .0765 = $4,194.00.
Unemployment cost is $17,300.00 x 3 x .03 = $2,855.00.
Health Insurance cost for full-time employees is…)

We have established a base fringe and payroll tax rate for the purpose of this proposal of 20.96%. This is Riverside's anticipated fringe rate for FY'18 and is budgeted to increase 1.5% annually over the five year period. The rate consists of payroll taxes of 8.54%, health, dental, disability, and life insurance of 12.42%. The detail is as follows: FICA is 7.17%; Unemployment is .38%; Worker's Compensation is .84%; MassHealth Tax is .15%. Detail on other benefits is: medical at 11.84%; dental at .29%; disability at .08%; tuition reimbursement at .07%; and life insurance at .14%. As with all budget items, our Affiliated Partners may have variations in expenditures. We will provide back-up documentation for expenditures should MassHealth require it.

Training and Professional Development **Total:** $186,286

In the box below, please provide a description of all line items within the Training and Professional Development category.
(e.g. Two Care Coordinators will be pursuing their LICSWs. Cost of exam $260 x 2 = 520.)

Approximately $3,000 has been budgeted per team for Training and Professional Development for the first nine months of operation (Budget Period 1). This assumes that $300 is available for each employee or that the money may be pooled for specific trainings to be held for all staff at the program. Training and Professional Development expenses are budgeted to increase 1.5% annually. We will provide back-up documentation for expenditures should MassHealth require it.

Travel **Total:** $821,130

In the box below, please provide a description of all line items within the Travel category. Examples of local travel justifications include the number/types of MBTA passes, MBTA tokens, number of trips/cost per trip and trip destinations. The IRS approved business mileage rate for Calendar Year 2017 is 53.5 cents per mile. For other travel, particularly if outside the Service Area, you must clearly describe the need and cost detail.
(e.g. Program Director 300 miles x .0445 = $134; Care Coordinator 200 miles x 0.445 = $89)

This line item includes mileage to visit Enrollees or to look for them, as well as travel for trainings and meetings. We have budgeted approximately $4,500 for the central administrative staff and approximately $12,750 per team for the first nine months of operation (Budget Period 1), at Riverside's current reimbursement rate of $0.45 per mile, it allows for approximately 2,833 miles per BH CP team member for that nine month period. Travel is budgeted to increase by 1.5% annually.

Equipment **Total:** $329,750

In the box below, please provide a description of all line items within the Equipment category. Please provide a description that lists the equipment, the intended purpose of each equipment item and how the estimated costs were determined. These costs should only include the costs to purchase new equipment to support the performance under the Contract.
(One computer package including printer, scanner will be purchased. Cost= $853.00. This cost is based on a quote from our organization's account with Dell. The computer will be based in the administrative office and will be used to conduct administrative work connected to this program.)

We plan to purchase 50 computers utilizing Prep Budget Period DSRIP dollars prior to acceptance of referrals. We will purchase approximately another 50 laptop computers during Budget Period 1. At $1,500 per Dell computer, this is $75,000 in that period. In addition, we will need to purchase other equipment such as desks, phones, printers, and copiers. In Budget Period 1 we have budgeted approximately $548 per employee over the nine month period. In subsequent budget periods we have estimated an annual equipment expense of $50,000 each year to cover the cost of new and replacement equipment across all the 9.5 teams and central program administration.

Supplies **Total:** $140,940

In the box below, please provide a description of all items that will be purchased within the Supplies category. Supplies are those items considered tangible, expendable. Examples include general office supplies, postage costs, meeting costs/supplies, copies, printing costs and materials. Purchased materials and supplies shall be charged at their actual prices, net of applicable credits. Care should be taken to identify those supplies directly tied to the Community Partner Program.
(e.g. Binders to use for paperwork to conduct home visits- 12.95 each x 15= $194.25)

We have budgeted $21,563 for supplies including office supplies, printing, and postage for the nine month Budget 1 period. This appears on the Printing, Copying & Postage line on Attachment B Community Partner Program Report. We are budgeting approximately $100 per employee across all teams and central program administration for costs such as business cards, paper, pens, notebooks, and other related items. The remaining funds in this category are expected to be spent on printing (marketing) materials and mailing costs. We budgeted a 1.5% increase in this line item for Budget Years 2-5. We will provide back-up documentation for expenditures should MassHealth require it.

Occupancy **Total:** $3,639,933

In the box below, please provide a description of all line items within the Occupancy category. For each line item, please provide a description of how the costs were estimated such as square footage and the proportionate amount of space occupied by the Community Partner Program.
(e.g. Monthly rent and utilities cost is necessary for the site location to provide the services and activities. The cost is pro-rated at 50% for Rent and Utilities because the other half of the facility is utilized for a Department of Mental Health Contract that covers the other 50% of the cost. Rent: $600.00 a month (pro-rated 50% of usage) $300.00 x 12 months= $3,600.00. Utilities: $300.00 a month (pro-rated 50% of usage) $150.00 x 12 months= $1,800.00. Repair/Maintenance: $50 a month x 12 months= $600.00.)

For the initial nine months in Budget Year 1, each team is allocated $56,250 and central administration is allocated $22,500. Budgeted occupancy costs for full 12 month periods is $75,000 per BH CP team, per year and $30,000 for Riverside Community Partners central administration. We have included a 1.5% increase in this expense in subsequent years. This is inclusive of rent, utilities, repairs/maintenance, depreciation for construction, etc.) We anticipate completing basic renovations for an annual expense of $26,500 which would be built into the rent. It assumes offices of approximately 1,800 square feet per team at a base cost of $21 per square foot. We will provide back-up documentation for expenditures should MassHealth require it.

Contract Services **Total:** N/A

In the box below, please provide a description of all line items within the Contract Services category. This category is for all contractual services relevant to the Contract. Your justification should include the total costs, the name of the individuals/organizations, the services or goods being provided and the rate.

N/A

Other **Total:** $1,235,304

In the box below, please provide a description of all line items within the Other Services category.

We have made the assumption that there will be a 3.5% bad debt rate. We have increased this estimate by 1.5% of the base estimate each year. We understand that we may not be able to be reimbursed for all Enrollees every month due to requirements such as Qualifying Activities and Engagement deadlines and/or changes in Enrollees' MassHealth status. We will provide backup documentation for expenditures should MassHealth require it.

Part II: Infrastructure Expenses:

(Investment narrative should only include investments listed in the Infrastructure Budget. Please provide separate descriptions of budget allocations for each Consortium Entity, Affiliated Partners and Material Subcontractors)

Technology **Total:** $448,000

In the box below, please provide a description of all line items within the Technology Investment category. Please explain how these investments will support the Contractor's performance of the Contract.
(e.g. Health Information Technology and care management software, IT project management resources, data analytics capabilities, mobile technology including tablets, laptops and smartphones for CP staff and reporting software)

Prep Budget-Technology Investments:

A total of $75,000 will be distributed across Riverside Community Partners in this category. Each Affiliated Partner is able to choose the equipment in this category that best meets their needs in meeting the requirements described in the RFR. This equipment will be primarily laptops with the capacity for electronic signatures by Enrollees. Riverside's current pricing for Dell laptops that have a touch screen, microphones, cameras, speakers, and eSig software is $1,500 each.

Year 1 Budget-Technology Investments:

We have budgeted a total of $173,000 for additional technology investment for year one, assuming that equipment purchase will continue in this period.

Years 2-5 Budget-Technology Investments:

We have budgeted $50,000 for each year in this period to allow for continued purchase of equipment, including enhancements and replacements as needed.

Workforce Development **Total:** N/A

In the box below, please provide a description of all items within the Workforce Development Investment category. Please be sure to document how these investments will assist in meeting the terms of the contract.
(e.g. recruitment support, training and coaching programs and certifications)

Prep Budget Workforce Development Investments:

N/A

Year 1 Budget Workforce Development Investments:

N/A

Years 2-5 Budget Workforce Development Investments:

N/A

Business Start-Up **Total:** $3,173,400

In the box below, please provide a description of all items within the Business Start-Up Investment category. Please be sure to document how these investments will assist in meeting the terms of the contract.

(e.g. staffing and startup costs to develop full caseloads)

Prep Budget Business Start-Up Investments:

During the Prep Budget period we have budgeted $343,000 in this category to be used to hire and train staff ahead of the go-live date. During start-up there are two categories of salary associated with Riverside Community Partners. First, there is management necessary for start-up and ongoing oversight of the program. This salary line is a total of $60,249. With fringe and payroll taxes of $12,628 (20.96%) the total is $72,877. This category includes the member of Riverside's Senior Management assigned to this program, Jason Moscato, RN, MS, LMHC who is dedicated .375FTE, costing $39,750 annually. This position is budgeted for four months at $13,250. The full-time Program Director is Nora Kenney-Houser, LICSW at $80,000 annual salary. She is budgeted for four months at a cost of $26,666. Two full-time Administrative Support staff will be hired at $42,000 each annually and are included for two months at $7,000 each for a total of $14,000. A Quality Manager will be assigned to this program at .2FTE at a salary of $95,000. In this period the QM is budgeted for four months at a cost of $6,333.

Each position plays a central role in the project and will be critical participants in the preparation prior to go-live. The Program Director is responsible for ensuring Riverside and our Affiliated Partners meet all requirements, evaluating and coordinating best practices, and helping to design the processes for data flow. The Senior Manager is responsible for oversight and assisting the Program Director in collaborating with Affiliated Partners and ACOs/MCOs and MassHealth. The Quality Manager will provide direction in carrying out QI initiatives, monitoring documentation and contract compliance. The two Administrative Support positions will focus on coordinating information flow necessary to meet reporting and billing requirements, collecting data, support analysis, and ensuring billing is timely and correct. As note, we are phasing in the personnel for these positions to ensure we are prepared for operations.

The second category of salary associated with this project includes core staffing for the BH CP teams at Riverside and each Affiliated Partner. In the Prep Budget Period we have budgeted $270,123 for this, inclusive of salary and fringe and payroll tax. Core staffing includes a full time Clinical Care Manager who leads each team as well as a full time nurse, eight Care Coordinators, and a part-time psychiatrist (Medical Director). Each Affiliated Partner may design and operate a modified model for their team as long as they meet all contractual obligations.

Riverside and each Affiliated Partner will receive funds for staffing start-up (pre-caseload) so that staff can be hired, trained and participate as appropriate in final program development. We are apportioning funds for this purpose to enable each team to use funding in a manner that works best for them. Our basic salary structure is that the Clinical Care Manager/Team Leaders will be paid $65,000 annually, that nurses will be paid $65,000 annually, and that the Care Coordinators will be paid $40,000 annually. Our Affiliated Partners may adjust these salaries consistent with their particular compensation models. Riverside and each Affiliated Partner will utilize the funds provided to begin to build our teams. There will be variations in salary, as well as weeks and hours worked by each person.

A total of $270,123 has been allocated across teams based on a formula which assumes the size of each Affiliated Partner's planned service volume (and therefore number of staff needed). That formula is as follow: For Affiliated Partners planning the largest volume (Riverside, Lynn and North Suffolk) each will receive $64,315 toward staffing; Affiliated Partners planning medium volume (Edinburg) will receive $38,589; Affiliated Partners planning smaller volume (Upham's Corner, Brookline CMHC, Dimock) each will receive $12,863. The amounts allocated to each organization will be utilized for team members' salaries, tax and fringe, allowing each organization to use their allocation flexibly as described above. We will provide back-up documentation for expenditures should MassHealth require it.

Year 1 Budget Business Start-Up Investments:

We have budgeted $784,600 for the nine months of Budget Year 1 to be used to continue bringing staff onto the BH CP teams ahead of full caseloads, and while staff time will also be in initial orientation and training about the BH CP

program. As above, the funds will be used for salaries for team members and for tax and fringe, with flexibility so that each Affiliated Partner is able to apply the funds in the best way possible according to their initial staffing needs, their particular compensation model, and their actual tax and fringe expenses applicable during that period of time. The funds will be allocated according to volume of Enrollees managed by each team, in keeping with the plan for DSRIP to be determined by a PMPM. Our estimated allocation among Affiliated Partners is delineated in the Attachment B Infrastructure Allocation Worksheet.

Year 2-5 Budget Business Start-Up Investments:

We have budgeted a total of $2,045,800 for years two-five to continue to be used to bring on additional staff while we continue to ramp up, as staff do not yet have full caseloads, as new hires need to be oriented and trained on the BH CP program, and as all staff will need to participate in continued trainings as we continue development of training curricula with the benefit of our developing experience and knowledge of the BH CP program. We assume that full volume and full caseloads will be achieved during year five. We also assume that there will be staff turnover during these budget periods, due both to the usual rhythm of employees moving on from jobs and because as a new and innovative model, some staff will discover that the work is or is not what they envisioned or want to commit to. As above, the funds will be used flexibly by the teams to cover salaries, taxes and fringe. We intend to distribute the funds among Affiliated Partners according to actual volume, in keeping with the plan for DSRIP to be determined by a PMPM. Our estimated allocation across Affiliated Partners is delineated in Attachment B Infrastructure Allocation Worksheet.

Operational Infrastructure **Total:** $32,000

In the box below, please provide a description of all items within the Operational Infrastructure Investment category. Please be sure to document how these investments will assist in meeting the terms of the contract. *(e.g. project management, system change resources and performance management capabilities, additional operational support)*

Prep Budget-Operational Infrastructure Investments:

We intend to contract for information technology services to support initial start-up so that each participating organization has a resource to ensure they are able to operate on the go-live date. This contracted resource will be overseen by Riverside's Chief Information Officer. At a minimum, the IT contracted service will ensure that each organization is able to provide required information to Riverside for management and billing purposes. We have budgeted $32,000 for this IT support for a two month period at $200 per hour. This represents 20 hours a week of technology support.

Please note that Riverside has available software to support our own care management activities and to support Affiliated Partners that wish to use our Netsmart product. There is a nominal cost for expanded used of the product for those AP's that choose to utilize it.

We will provide back-up documentation for expenditures should MassHealth require it.

Year 1 Budget-Operational Infrastructure Investments:

N/A

Years 2-5 Budget-Operational Infrastructure Investments:

N/A

Page intentionally left blank

Section 7.3. H. Sustainability
(Please disregard this section as the content has been substantially changed due to the revision of our budget and budget narrative submitted 12/5/17, as directed, in a separate Excel spreadsheet.)

Page intentionally left blank

7.3.H Sustainability (not to exceed 2 pages) **(Please disregard this section as the content has been substantially changed due to the revision of our budget and budget narrative submitted 12/5/17, as directed, in a separate Excel spreadsheet.)** **The Bidder shall provide a description of its plan to sustainably fund proposed infrastructure and capacity building investments and CP Supports over the Contract Term and after the initial Contract Term. Such description shall include a description of any tools, resources, or processes the Bidder intends to develop using DSRIP funds and continue to maximize after the initial Contract Term.**

Riverside is confident that the BH CP program will be sustainable following the initial Contract Term during which the DSRIP investment has helped to fund infrastructure and capacity building costs. These investments over the course of the initial five years of the program will help ensure the success of Riverside Community Partners including: funds necessary to hire and train staff as caseloads are established and grow; funds necessary for initial equipment; and funds necessary to support software applications.

Hiring and Training Staff:
We plan to utilize DSRIP funds to bring staff on as the project begins and to offset staffing costs over the initial years as the program gains momentum and caseloads fill up. By a sixth year (post initial Contract Term), we have assumed elimination of DSRIP funds. We will have a significant understanding of the number of Enrollees we will be working with and of our staffing needs. The team model we have developed and the DSRIP funds we will have utilized to build the teams while that funding was available will make it possible to operate the program solely on a PMPM rate. We will be well beyond start-up, experienced in the patterns of referrals and of hiring, staff retention in the program and operating a mature program that requires only typical oversight to ensure ongoing excellence of operations.

Utilizing DSRIP funding, staff across Riverside Community Partners (Riverside and our six Affiliated Partners) will be fully trained – with the ongoing exception of newly hired replacement employees, curricula will be created, and additional training will, therefore, be manageable. Policies and procedures will be complete and fully tested and only require review to ensure they are up to date with regulations, practices, and the needs of Enrollees and the program. As noted in the proposal, we will develop both a local and a central resource library for behavioral health and social services and other community supports. Keeping that up to date will require little in the way of resources.

Initial Equipment:
We are utilizing DSRIP funds to purchase equipment (i.e. laptop computers) during the start-up period and during the first year and we have established an ongoing budget that allows us to replace or increase equipment over time. We anticipate having adequate ongoing funding through the PMPM to accommodate our equipment needs in a sixth year and in subsequent years.

Software Applications:
Riverside and our Affiliated Partners have made the decision to utilize existing software to meet our needs both centrally and at the local level. The cost for extending the use of Riverside's own

software to enhance care coordination tracking and documentation is nominal, as is the cost for sharing Riverside's software should an Affiliated Partner wish to use it. Therefore, we do not anticipate this being a significant problem area post DSRIP investments.

Any modifications to the standard software will be made during the early years of the contract and will not require a significant ongoing cost. In particular, we will focus on secure communication between Riverside Community Partners and ACOs/MCOs and our Care Team members. By the end of the initial Contract Term, any such enhancements and modifications will have been developed, tested and in full use.

The Value Proposition:

We believe the value of the BH CP will be proven during the initial five year contract period. The goal of improving collaboration between healthcare and behavioral healthcare and the cost savings that will likely emerge from a more coordinated system of care will provide the foundation for discussions with the ACOs/MCOs on any additional investments needed for BH CPs. We are confident that Riverside Community Partners specifically will have proven its worth and be regarded as a program that the healthcare systems serving MassHealth recipients want to continue to make available to the people they serve. In fact, we believe that the involved ACOs/MCOs are likely to consider expanding the model to include their patients who are funded by private insurance as well. This is largely because through our ability to maintain care coordination relationships with Enrollees over a sustained period of time (the Waiver period), we will have helped individuals who may have been high utilizers of high cost healthcare services to be more engaged in their own preventive care and illness management, reducing the negative effects of chronic disease and preventable hospitalizations and ED visits.

Riverside is committed to working with EOHHS to demonstrate the value of the BH CP program and would be pleased to participate in future discussions with ACOs/MCOs and others as appropriate to ensure continued access to this service for MassHealth recipients beyond the initial Contract Term.

Section 7.3.I Quality Management and Performance Monitoring

Page intentionally left blank

Section 7.3 Initial DSRIP Participation Plan

7.3.I Quality Management and Performance Monitoring (not to exceed 3 pages)
The Bidder shall describe its plans to satisfy the quality management and quality improvement requirements described in Section 2.8 of Attachment A. Such description shall include:

1. A description of the Bidder's quality improvement program

Riverside Community Partners will leverage Riverside Community Care's Quality Management Department's expertize and create additional quality improvement measures specific to the BH CP program. This will enable us to benefit from both professional QM personnel and also put in place ongoing monitoring and support to ensure our BH CP program meets contractual requirements and provides high quality services across all our Affiliated Partners.

Riverside's Quality Management Department is led by Kathleen Janssen, BSN, RN, MS and includes three additional full-time QM staff who collectively provide quality reviews, performance improvement project oversight and more. Our quality improvement program is an ongoing, integrated system that includes many distinct components quality improvement program includes but is not limited to: incident monitoring; client satisfaction surveys; record review and audit system; outcomes management system; goals and objectives setting system accomplished in two-year cycles in support of Riverside's Strategic Plan; CARF international accreditation; and policy development and regular policy review and updates. Our outcomes management system utilizes a variety of different tools as is warranted to effectively measure the array of services Riverside offers to different populations, including adults and children with behavioral health needs, individuals with brain injury and developmental or intellectual disabilities, infants and toddlers with physical, developmental and environmental risk factors and their families. We use validated tools such as the Treatment Outcomes Package (TOP) from Outcome Referrals, Inc. and the Swartz Outcome Scale in BH outpatient and day treatment programs and the Mayo-Portland Adaptability Inventory (MPA1-4) in our programs for people with acquired brain injury, as well as internally developed measurements such as auditing the number of specified treatment goals met at the time of discharge.

Our QM Department collects and analyses the data from all the systems listed above and provides reports to all levels of management. Management is responsible for ensuring the information is shared with program directors and staff. Subsequently, programs make adjustments to their systems and protocols based on data to improve services. One example is our use of data from reports we receive from Outcome Referrals, Inc. Regularly, QM develops a report on aggregated changes in symptomology in each program based on TOP reports, highlighting improvement/significant improvement and when indicated, areas that could be addressed to improve outcomes. The information is shared with program leaders and staff to inform QI efforts. Also at set intervals, QM reviews a sample of clinical records to determine if the client specific TOPS data was used to inform changes in care as indicated by amendments to treatment plans. Another example is our Person Served Satisfaction Survey Process. QM provides management with detailed reports, and at a subsequent QM Oversight Committee meeting, management reports on how the information was shared with and used by program staff. Recently, this data led to programs delving more deeply into the cultures of the people served to better assess culture's impact on their health and well-being. In another example, a program rethought its work flow to find ways to increase face to face time with clients.

As noted, we intend to leverage our experience in QM oversight and resulting QI initiatives to inform our plans for ongoing QM and performance oversight of the BH CP contract. We will enlist Riverside QM department personnel to chair the Quality Committee we will develop for the BH CP program as well as to help with ongoing monitoring. The QM Department will meet with our BH CP Director to provide guidance and to augment her responsibilities in regularly monitoring the records of our BH CP work, such as the routine review of sample records from each Affiliated Partner and from Riverside's BH CP teams to ensure all aspects of the contract responsibilities are occurring and being documented as expected. She will meet with the BH CP team leaders to provide feedback, guidance, problem solve and to encourage the dissemination of best practices across teams. The BH CP Director, with the Medical Director and QM, at minimum will also review critical incidents at least quarterly and will ensure compliance with reporting requirements to ACOs/MCOs and to MassHealth on all required issues (i.e. critical incidents and grievances).Additionally, each of our Affiliated Partners are experienced in QM, and will be responsible for applying their internal performance monitoring system to their BH CP teams, including managing, tracking and reporting to Riverside on any Enrollee complaints (appeals to be reviewed by Riverside's QM Department), as well as participating in ongoing QM processes through the Quality Committee described below.

2. A description of at least one quality initiative the Bidder proposes to undertake in Budget Period 1, including measures for success

We propose to focus our Budget Period 1 quality initiative on measuring the impact of our Care Coordination and Care Management on reduction of visits to hospital Emergency Departments (ED) and inpatient utilization, including visits and admissions for both behavioral healthcare and medical healthcare. This will be accomplished by comparing data from six months prior to participating in the program (baseline) with the first and second six month periods of active engagement in the BH CP.

We are choosing this quality initiative because we believe that Care Coordination and Care Management have the potential to support people with serious behavioral health challenges to better engage in self- care, utilize medical, behavioral and social support systems more effectively and thereby prevent unnecessary trips to the emergency room and the need for hospitalizations for management of acute problems stemming from chronic conditions. To accomplish this, we propose to ask two questions at the time of the Assessment that request that the Enrollee report on the number of ED visits and the number of inpatient admissions they experienced in the 6 months prior to the CP assessment. This data will be collected using a Likert Scale that provides choices including 0 visits, 1-2 visits, 3-5 visits, 5 or more visits and similarly, 0 inpatient admissions, 1-2 admissions, 3-5 admissions, and 5 or more admissions. Ideally, we would not have to rely on Enrollee's self- reporting since actual claims data would be a more accurate baseline. However, since we do not know whether we will have access to prior claims data for Enrollees, we are prepared to utilize the self- reported responses as a baseline for ED visits and inpatient admissions prior to BH CP involvement.

Following six months of active engagement with Care Management, we plan to measure the number of ED visits and inpatient admissions respectively using the same Likert Scale categories. We will seek, however, to utilize utilization data reported by the ACOs/MCOs and or

MassHealth in place of self- reporting, if possible. Otherwise we will utilize data from the electronic BH CP Enrollee record. This same process will at the one year mark. We establish targets as follows: a 10% reduction in ED visits and inpatient admissions during the first 6 month of BH CP engagement and a 15% reduction in ED visits and inpatient admissions during the subsequent six months of engagement. We will define reduction as movement from a higher to lower category on the Likert Scale (i.e. from the 3-5 visits down to 1-2 visits).

We will use a sample size for both measurement periods that reflects a 90% confidence level and a 5% margin of error. Therefore, if our total population of Enrollees who have been actively engaged for the reporting period is 3,000, our sample size will be 247. If the total population is only 1,000, our sample size would be 213. We will most likely use a random sample of Enrollees across all Riverside Community Partners Affiliated Partners regardless of which ACO/MCO they are enrolled in. However, should we determine that one or more of the ACO/MCOs are willing and able to provide us with actual data on ED visits and inpatient admissions, we reserve the right to limit our sampling to those Enrollees for whom we can access that more accurate information.

3. The functions of the Bidder's quality committee, including the composition and reporting structure within the Bidder's organization

Riverside will develop a Quality Committee dedicated to the BH CP program. The Riverside Community Partners Quality Committee will be chaired by Riverside's Vice President for QM or designee, who is an experienced Quality Manager from our QM Department. Riverside's Quality Committee Chair will be responsible for ensuring that the Committee fulfills its QM oversight duties, including deciding on and operationalizing the annual quality improvement initiative, and submitting quality management reports, and the annual quality improvement plan to EOHHS. The Chair will meet with our BH CP Director ahead of committee meetings to hear about any challenges, issues or recommendations for areas of committee focus. The Chair will also be responsible for reporting back to Riverside's leadership on any QM recommendations and/or issues of concern that may arise in the Quality Committee.

Membership of the Quality Committee will include representatives from at least four Affiliated Partners. We will seek to include a person served as well. We intend to schedule Quality Committee meetings quarterly, but it may meet more frequently during the initial year as the program is further developed. However, we recognize that the schedule may be altered by consensus of the committee once operations are actually underway. Minutes will be kept and provided to the Riverside Community Partners Governance Committee.

The Committee will develop and implement the Quality Implementation plan for the BH CP program to ensure an ongoing systematic approach to improving the processes and outcomes of service delivery. Among its areas of focus will be: reviewing and making recommendations in response to the program monitoring activities undertaken and QM reports generated by Riverside's BH CP Director and/or QM Department; determining the annual QI initiative; reviewing data gathered from the QI initiative and ensuring information is used by all Affiliated Partners to inform future operational changes as appropriate; recommending best practices to be shared across teams; and contributing to and reviewing Riverside's quality improvement plan for submission to EOHHS.

Page intentionally left blank

Section 7.3.J Coordination with ACOs and MCOs

Page intentionally left blank

Section 7.3 Initial DSRIP Participation Plan

J. Coordination with ACOs and MCOs (not to exceed 2 pages)

The bidder shall submit a plan for contracting with ACOS and MCOs. Such plan shall include:

1. How the Bidder will communicate its skills, expertise, and value to potential ACOS and MCOs

Riverside and our Affiliated Partners are all core providers of behavioral health and other services in the communities we serve. We have close working relationships with the healthcare organizations that are now ACOs, as well as all MCOs, as a result of our role in these communities and our long history of serving individuals with behavioral health diagnoses. As Riverside Community Partners we will offer locally- based care throughout eleven MassHealth Service Areas. Discussions with many ACOs and MCOs began months ago as the ACO model was being developed and the pilot ACOs were established. These discussions continue today and, in some instances include preliminary agreements to work together.

Once EOHHS has designated the participating ACOs, MCOs and BH CPs, we will meet with all relevant ACOS and MCOs, introduce the ongoing point of contact, distribute printed materials which describe our role as a BH CP, and introduce them to our web presence for Riverside Community Partners. Our printed and web-based materials will include our history and experience working with the BH population as well as describe how we will deliver Community Partner services. It will demonstrate the strength of our model of including Affiliated Partners that have a history of serving very diverse and often underserved individuals.

We will seek to establish protocols between Riverside Community Partners and the MCOs and ACOs which may include but is not limited to:

- Referrals and enrollment procedures
- Methods to ensure that individuals who complete Comprehensive Assessments or Care Plans are not financially or otherwise conflicted
- Communication expectations including bidirectional notification of Enrollee activities
- How participation on the care planning teams will work
- Access to training on care planning tools
- Secure bidirectional electronic communication

A particular challenge will be to ensure that we avoid over-medicalizing care and support whenever possible. Enrollees often have non-medical or social needs that are equally important to ensure in their health, and we intend to seize this opportunity to infuse our care delivery model with community resources that can help our Enrollees access needed services in a coordinated fashion

2. Branding and marketing plans the Bidder has with respect to its relationships with ACOS and MCOs

Our plan is to brand and market both as the trusted local organizations, which are well known and respected in the communities we are serving, and to also leverage our capability as the larger entity, Riverside Community Partners. In most instances, we expect that existing relationships with ACOs and MCOs will continue or develop locally (by Service Area) and that our local presence as Riverside or through each of our six Affiliated Partners will be the key to relationship building. In brief, we believe it is likely that physicians, nurses, other employees, as

well as patients of the ACOs will typically reach out to our local presence. As the larger entity, Riverside Community Partners, we will serve as the accountable organization to MassHealth and the ACOs and MCOs, and accept referrals when it is appropriate to receive them centrally.

3. The Bidders strategy to engage and collaborate with multiple ACOs and MCOs in the Service Areas for which the Bidder is bidding

Riverside and our Affiliated Partners are well known to ACOs and MCOs and we already serve many of the individuals who will receive BH CP support. In anticipation of the RFR's release, we have been meeting with newly identified ACO and MCO bidders to discuss how the CP function can support their patients. As noted above, we have initial agreements with several ACOS and MCOs and continue to meet with them as the process of establishing BH CPs proceeds.

We will establish formal contractual relationships with each ACO and MCO that have overlapping geography with Riverside Community Partners and will utilize any guidance and heed the requirements provided by EOHHS. Once contracting is completed and Enrollee assignment occurs, we will make our best effort to reach out to assigned Enrollees within 30 days and then lead the process of developing a Comprehensive Assessment and Care Plan. Further we will work collaboratively with the ACOs and MCOs to develop policies and procedures for alignment and communication. Our plans include working with Care Management software that will allow us to track and collect relevant data and support seamless care management. We intend to discuss with each ACO or MCO the possibility of establishing bidirectional electronic communication between our care management program and their electronic records to enable information sharing in an efficient manner. We expect that during the initial year of operations, these discussions will be ongoing as the ACO and BH CP operations continue to develop and get increasingly refined.

Our goal will be to formalize these relationships through contracts or agreements that support robust relationships with ACOs and MCOs but that are seamless from the Enrollee perspective. To the extent possible, we plan to standardize our approach to care management but recognize this will take time. Further, we will work to adapt our practices to different cultures and will be aided in this effort by our locally based Affiliated Partners.

One of the significant challenges we will face is to carefully define roles between our Community Partner Services and the ACOs and MCOs. We will work to avoid duplication of effort which would be costly and frustrating to the people we serve.

4. The Bidder's strategy for conflict resolution, should any conflicts arise between the Bidder and an MCO or ACO

As noted above, we will develop formal contracts with each ACO or MCO. These contacts will be comprehensive and include conflict resolution protocols in case of disagreements regarding information flow, patient assignments, quality of care, or other issues. We will encourage conflict resolution at the point of contact and at supervisory levels prior to a review by the Program Director or member of Senior Management.

Community Partner Program Budget Report

Southeast Community Partnership, LLC

Program Revenue	Prep Budget Period	Budget Year 1	Budget Year 2	Budget Year 3	Budget Year 4	Budget Year 5	Total Revenues

Community Partner Program Budget Report - Prep Budget Period

Only complete this Program Budget Narrative using amounts anticipated for PBP.

Lines may be added to the Program Budget Narrative tables as necessary

Row 1 - Salary

Position	Annual Salary	FTEs	# Months	Total
Director of Integration	$ 90,000.00	0.5	7	$ 26,250
Program Director	$ 80,000.00	1	3	$ 20,000
Medical Director	$ 200,000.00	0.1	1	$ 1,667
RN	$ 76,000.00	2	1	$ 12,667
LPN	$ 54,000.00	1	1	$ 4,500
Clinical Care Manager (LICSW/LMHC)	$ 68,000.00	1	2	$ 11,333
Care Coordinator	$ 43,000.00	9	1	$ 32,250
Recovery Coach/Peer Specialist	$ 35,000.00	1	1	$ 2,917
Administrative Assistant	$ 32,000.00	1	1	$ 2,667
Total Salary (Program Budget Line 1)		**16.6**		**$ 114,250**

Row 2 - Fringe

Fringe Item	Total Salary	Fringe Rate	Fringe
Fringe Item	$ 114,250	20%	$ 22,850
Total Fringe (Program Budget Line 2)			**$ 22,850**

Total Personnel*	**$ 137,100**

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:

Director of Integration will oversee community partners program, including contracting, program operations, marketing, and finance.

Program Director will assume administrative responsibility for meeting staffing, programmatic, financial, regulatory and contractual requirements.

Medical Director will provide consultation to nurses and treatment team, as well as to PCP.

Registered Nurses will provide medication reconciliation, assessment and treatment planning, PCP coordination and health education.

Licensed Practical Nurses will provide care coordination with medically complex cases, medication reconciliation and coordination with medical providers.

Clinical Care Managers will approve comprehensive assessment, and provide treatment planning and treatment plan review, clinical supervision and oversight of the clinical team.

Care Coordinators will provide outreach, engagement, assessment, treatment planning, recovery navigation, care transitions, crisis planning and health and wellness coaching.

Recovery Coaches/ Peer Specialists will provide care coordination for substance use disorders, including access to support services, and care transitions.

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Total Training and Professional Development (Program Budget Line 3)			

Provide a description of each Training and Professional Development line item included in the table above:

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
Planning, Implementation, and Operations Committee				$ 1,603.00
				$ -
			Total Mileage	$ 1,603.00

Travel Expense Description	Cost
Total Mileage	$ 1,603.00
Parking and tolls	
Public transportation	
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ 1,603.00**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

The Planning, Implementation, and Operations Committee is comprised of the leadership team of the CP, from Gosnold, FCP and SSMH. The Committee includes the Director of Integration (whose compensation is not countedin the CP Leadership Team line item for Operational Staffing, as it is already included in the program budget, but whose mileage is counted here). The CP Leadership Team meets regularly for coordination between Gosnold, FCP, and SSMH, and will drive strategy, monitor progress, and ensure clear communication throughout the CP. The weekly operation meeting will be held in Plymouth, and the monthly LLC meeting will be held in Quincy. The committe will include 6 people, 2 based in Quincy, 2 based in Plymouth, and 2 based in Falmouth.

Mileage for the weekly operations meeting in Plymouth is 4 people * 60 miles round trip (both Quincy and Falmouth are approximately 30 miles from Plymouth) * 3 trips per month * 7 months * .48 per mile = $2,419.

Mileage for the monthly LLC meeting in Quincy is (2 people from Plymouth * 60 miles round trip * 1 trip per month * 7 months * .48 per mile) + (2 people from Falmouth * 120 miles round trip * 1 trip per month * 7 months * .48 per mile) = $403 + $806 = $1,209

Total estimated mileage: $2,419 + $1,209 = $3,628

Row 5 - Equipment

Description of Equipment	Unit Cost or Cost/FTE	#units or FTEs	Cost
Total Equipment (Program Budget Line 5)			

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost
Supplies			$ 1,000.00
Total Supplies (Program Budget Line 6)			

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

By June 1, 2018, a total of 18 staff will be hired. Roughly $1,000 is budgeted to cover all office essentials, i.e. copying/printing paper, legal pads, pens, etc.

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
		Total Software Licensing (Program Budget Line 8)	

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
Ring Central Subscription	11	26	$ 282.00
iPhone Plan	50	24	$ 1,205.00
MiFi Subscription for iPad	35	24	$ 844.00
		Total Telecommunications (Program Budget Line 9)	**$ 2,331.00**

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

RingCentral is a cloud-based communications and collaboration tool that allows the Clinical Care Managers, Care Coordinators and Recovery Specialists to bring a client and other care team members into conference by phone or video.

iPhone plans provide staff with full accessibility, allowing them to continue supporting clients even while mobile.

The MiFi subscriptions for the iPads will provide internet connectivity for staff at all times, facilitating their ability to have full and secure access to records and resources within clients' homes.

Together, these telecommunications tools provide enhanced mobility and flexibility, improving client experience and continuity of care.

All costs are estimated based on prices in existing contracts. Costs per service plan listed above are on a monthly basis. Number of service plans refer to number of FTE with plans multiplied by number of months these staff hold the plans.

The "# Service Plans" refers to the number of per-staff per-month payments (and the cost per service plan refers to the monthly amount). For example, the .5 FTE Director of Integration will work for seven months during the PBP (November –

May), and thus has 3.5 (7 *.5) 'service plans' attached.

Position	FTEs	# Months	Number of RingCentral Subscription Monthly Payments	Number of MiFi Subscriptions & iPhone Plan Monthly Payments
Director of Integration	0.5	7	3.5	3.5
Program Director	1	3	3	3
Medical Director	0.1	1	0.1	0.1
RN	2	1	2	2

Help Desk - Tier 1*	0.5	1	0.5	
Infrastructure Staffing Subtotal:	**1**		**3**	**2.5**
Total	**18**		**26**	**24**

* Administrative Assistant and Help Desk - Tier 1 will have RingCentral subscriptions, but not MiFi subscriptions or iPhone plans.

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost
Rent	1,500	2.08	$ 3,125
Utilities	1,500	0.21	$ 313
Repair and Maintenance	1,500	0.10	$ 156
Total Occupancy (Program Budget Line 10)			**$ 3,594**

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:

The occupancy costs will cover 5 locations, serving as hubs throughout the Southeast region, and housing the workspaces for staff when they are in the office.

Costs were calculated for one month, as the CP will begin leasing the spaces in May 2018, thus for one month of the PBP. Annual costs per square foot would be 12 times what is shown above, i.e. $25/ sq ft for rent.

The amounts for Utilities, and Repair and Maintenance (including Janitorial Services) were calculated as a proportion of rent, using comparable existing programs as a basis for calculation.

Row 11 - Other

Other Direct Expense Description	Cost
	$ -
Total Other (Program Budget Line 11)	**$ -**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 12)	**15.00%**	**$ 21,844**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

For CP budgets, we adopted 15% administrative overhead rate, which is the lesser between our actual rate and the allowed rate per CP budget guidance.

Community Partner Infrastructure Budget Report - Technology - Prep Budget Period

Only complete this Infrastructure Budget Narrative using amounts anticipated for PBP.

Lines may be added to the Infrastructure Budget Narrative tables as necessary

Row 1 - IT Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Project Mgr/ System Administrator	$ 80,000.00	0.5	5	$ 16,667
Help Desk - Tier 1	$ 55,000.00	0.5	1	$ 2,263
IT Contractor (salary reflects full-time at contract rate of $50/hr); fringe excluded for this position)	$ 100,000.00	0.1	3	$ 2,500
	Total Salary			$ 21,429
	Fringe rate	20.0%	Total Fringe	$ 3,786
			Total IT Staffing including Fringe (Infrastructure Budget Line 1)	**$ 25,215**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

IT Project Mgr/System Administrator will lead efforts on design, configuration and implementation of the Care Manager solution. They will be responsible for the development of standard operating procedures and implementing workflows. By leading the design and optimization of the system, they will maximize its value to clinical staff in their work to serve our clients.

The Help Desk position will provide Tier 1 technology support to program staff, including for their use of the Care Management Platform, enabling them to maximize the value provided to clients.

The IT Contractor will perform the laptop and iPad builds and iPhone provisioning (MDM enrollment) for program staff, ensuring that they are ready to provide services for our enrollees.

Row 2 - Development/Adaptation of EHR and/or Care Management System

	A	B	C	D	E	F	G
31	**Description of Expense**	**Cost**					
32	CMP Development & Implementation	$ 90,000.00					
33							
34							
35							
36	**Total Development and Adaptation of EHR and Care**						
37	**Management System**	$ 90,000.00					
38	**(Infrastructure Budget Line 2)**						
39							
40	***Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's***						
41	***contract and how the costs were determined:***						
42							
43	The Care Management Platform will assist in identifying client needs thereby promoting greater engagement. The solution will also						
44	enable the electronic transmission of clinical and care information between provider systems and include numerous other						
45	interoperability features. Patients can communicate with staff through a patient portal, which will facilitate the patients providing						
46	information and documentation to their care team in a timely manner and via a secure path. All of these features will enable staff						
47	to provide integrated, client-centric care in a highly effective manner.						
48							
49	Costs were estimated through ongoing discussions with Care Management System vendors. This cost estimate is 50% of the total						
50	estimated cost because it is our intent to implement one Care Management Platform (CMP) for two CP contracts.						
51							
52							
53							
54							
55							
56							
57	**Row 3 - Technology for Service Delivery**						
58	**Description of Expense**	**Cost**					
59	Laptops	$ 12,608.00					
60	Mobile toolkit (iPad, mobile printer, keyboard and Bluetooth)	$ 15,400.00					
61							
62							
63							
64	**Total Technology for Service Delivery**	**$ 28,008.00**					
65	**(Infrastructure Budget Line 3)**						

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

iPads, mobile printers , and iPad keyboard and Bluetooth setups allow our clinical staff to be 100% mobile for full service delivery on the go. Laptops will be purchased for supervisory staff (nurses and clinical care managers will have both laptops and mobile toolkits), as well as office-based staff (Admin Assistant and IT staff who will only receive laptops).

Laptop, including 4 years of hardware coverage ($1553 each) + Microsoft Office license ($76) + Laptop bag ($30 each) = $1,659 each $1,659 * 7.6 = $12,608
iPad ($500 each) + Mobile printer ($400 each) + iPad keyboard + bluetooth ($200) = $1,100 each
$1,100 * 14 = $15,400

Laptops will be purchased for the below newly hired positions in both the Program Budget and the Infrastructure Budget. For fractional FTE's, the staff person will be allocated between this program and other program(s), and so the costs of their technology will be allocated proportionally. Mobile toolkits willl purchased only for clinical staff.

139							
140	***For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting***						
141	***the terms of the CP's contract:***						
142							
143	The Director of Recruiting will drive the job posting and advertising functions, including attending job fairs, etc, and will also take						
144	part in the review, screening, and hiring of candidates. The Recruiters and HR Coordinator will perform all functions related to						
145	reviewing, screening, and hiring candidates. Together these staff will ensure that our programs are fully staffed with top						
146	employees, who will provide excellent care to our clients.						
147							
148	The Payroll Manager will complete all set-up processes required in both internal and external payroll systems. The Director of						
149	Benefits will complete all required processes pertaining to new employees' benefits, including health insurance and retirement accounts. The Standard Credentialing staff will communciate with new employees and vendors regarding new employees' credentialing; gather all relevant documentation and resolve any inconsistencies therein; and enter all information in appropriate systems. The Advanced Credentialing staff will determine privileges as appropriate for incoming employees. Together these staff will ensure that all new hires are smoothly and effectively on-boarded so that they can work to serve our clients without disruption.						
150							
151	The Director of Training will research and develop training materials and train newly hired staff. The Training Assistant will						
152	perform all logistical work required for trainings, including compilation of training materials, room set-up, and e-learning license						
153	registration. Together these staff will ensure that all staff serving our clients are fully trained and ready to provide our clients with high-quality care.						
154							
155	The positions listed do represent allocations of actual resources. Of all positions listed, only training curriculum development						
156	(part of the Director of Training's responsibility) will be a centralized function performed by SSMH. Thus, part of the funding for						
157	the Director of Training is allocated 100% to SSMH, and part of this position's funding, as well as all of the funding for all						
158	remaining positions ,is allocated based on the estimated number of engaged clients among Gosnold, SSMH and FCP (i.e. Gosnold,						

Row 6 - Recruitment Expenses

Description of Expense	Cost
Advertising	$ 5,100.00
Referral & Signing Bonuses	$ 2,882.00
SORI Checks	$ 882.00
Badges & Payroll System Set-up	$ 3,705.00
Total Recruitment Expenses (Infrastructure Budget Line 6)	**$ 12,569.00**

Provide a description of each recruitment expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Advertising entails sponsorships on sites such as Glassdoor and Indeed, use of Open Hire and various recruiting websites, postings at local universities and newspapers, and attendance at job fairs. Costs were estimated based on existing job advertising expenses. We are planning that during the PBP, we will spend $1500 on sponsoring a page at Glassdoor, $1400 for an Indeed sponsorship, $600 for OpenHire, $100 for college/university postings, $750 for advertisements in local papers and print advertisements, $250 for advertising on other websites, and $500 at job fairs. In some cases, one advertisement may be used for positions in multiple programs (for example in different CP contracts). In these cases, the costs listed reflect a proportional allocation of the total estimated cost.

Referral bonuses are bonuses given to current employees who refer successful candidates for hire. Costs were estimated based on typical percentages of new hires who are hired through referrals. Referral bonuses are $250 each; we have estimated that 1/5 of new hires will be through referrals. Costs were determined based on 17.6 FTE's of new hires during the PBP (all program positions, with the addition of Project Mgr/ System Admin and Help Desk). Signing bonuses are bonuses given to RN's who are hired, and are calculated based on the anticipated number of newly hired RN's. Signing bonuses are for RN's (2 to be hired during the PBP), and are $1000 for each RN.

SORI checks are checks as to whether a job candidate has a record of Sex Offense convictions. Costs are estimated based on the number of employees that will be hired.

Together these expenses will ensure that our program is staff with highly qualified employees who will provide our clients with excellent care.

excellent care.

The creation of organization badges and payroll system set-up fees (paid to external payroll system vendors) ensure that newly

Row 7 - Training Expenses

Description of Expense	Cost
Supplies (including food) for Orientation	$ 494.00
E-Learning Licenses & Training Supplies	$ 1,164.00
Total Training Expenses (Infrastructure Budget Line 7)	**$ 1,658.00**

Provide a description of each training expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Supplies for Orientation include printed materials and food served to new employees during Orientation. E-Learning Licenses allow new employees to access training located on our E-Learning system (an external system containing both internally and externally created training materials). Training supplies include the cost of printed training materials, as well as any other costs required for training. Together these expenditures will allow our new employees to be effectively on-boarded and trained.

Costs are determined based on existing Orientation and Training supply costs.

Row 10 - Office Furniture

Description of Expense	Cost
Furniture	$ 15,429.00
Total Office Furniture (Infrastructure Budget Line 10)	**$ 15,429.00**

Provide a description of purpose for each office furniture expense listed in the table above, including how the costs were determined:

Office furniture will be procured to set up the 5 office hubs for the inital wave of staff hiring.

Total costs are based on estimated $900 per staff person (desk, chair, file cabinet) x 17.1FTE's of initial hires (new furniture is not being purchased for the Director of Integration). Furniture will be purchased for the below newly hired positions in both the Program Budget and the Infrastructure Budget. For fractional FTE's, the staff person will be allocated between this program and other program(s), and so the costs of their furniture will be allocated proportionally.
For fractional FTE's, the staff person will be allocated between this program and other program(s), and so the costs of their

Community Partner Infrastructure Budget Report - Operational Infrastructure - Prep Budget Period

Row 12 - Operational Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Marketing Staff	$ 45,000.00	0.4	2	$ 3,000
Quality Assurance Analyst	$ 60,000.00	0.3	1	$ 1,500
CP Leadership Team	$ 100,000.00	0.3	7	$ 17,500
	Total Salary	1		$ 22,000
	Fringe rate	20.0%	Total Fringe	$ 4,200
			Total Program Staffing including Fringe (Infrastructure Budget Line 12)	**$ 26,200**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

The Marketing Staff will prepare the marketing materials and strategies that will drive our outreach to attributed clients, to increase their awareness of and engagement with our services.

The Quality Assurance Analyst will review program data and metrics regarding quality of care indicators, measurement and

outcomes. This will help to ensure that our clients are receiving excellent services, and engage in continuous improvement measures to drive ever increasing quality of care.

The CP Leadership Team (annual salary listed is an average) will meet regularly for planning purposes and for coordination between the SSMH, Gosnold, and FCP. The CP Leadership Team will drive strategy, monitor progress, and ensure clear communication throughout the CP. The Director of Integration's time is not included here, as this position is included in the program budget.

Row 13 - Other Operational Expenses

Description of Expense	Cost
Legal Fees	$ 1,351.00
Marketing & Branding Expenses	$ 7,750.00
Total Other Operational Expenses (Infrastructure Budget Line 13)	**$ 9,101.00**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Legal consultation is anticipated to address various contracting issues, whether with ACOs/MCOs and between partners, as well as any other legal consultation needs. No budgeted legal costs will be used to contract with EOHHS.

Marketing and branding expenditures will support the development of the first batch of materials that will be distributed to our attributed clients, to increase their awareness of our program. Costs were estimated as follows:
Brochures: $3,020 for brochures
Food gift card to incentivize Member participation – $5 x 750 = $3,750
Direct mail campaign: $0.49 x 1,000 x 2 = $980

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 14)	**15.00%**	**$ 36,852.00**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

For the CP budgets, we adopted 15% administrative overhead rate, which is the lesser between our actual rate and the maximum allowed rate per CP budget guidance.

BH Community Partner - Staffing Model

Southeast Community Partnership, LLC

line #			
1	Estimated number of Engaged Enrollees (including CBFS if applicable) at the end of Budget Period 1	1000	*Should align with Program Budget*

	BH CP Program Staff	FTEs (Do not duplicate FTE - FTE's may be allocated across staffing positons as applicable)	Comment
2	BH CP Director and Assistant/Deputy Director	1.5	*Total management oversight of BH CP*
3	Medical Director	0.1	*Portion of Medical Director allocated to BH CP for the number of enrollees shown in line 1*
4	RNs	3	
5	Clinical Care Managers (RN)	1	*Do not include FTEs listed in line 4*
6	Clinical Care Managers (LPHA)	2	*LPHA includes LICSW, LMHA, LADC I*
7	Supervisors/Team Leaders		*Do not include FTEs listed in lines 4, 5 or 6*
8	Other Licensed Staff		*Do not include FTEs listed in lines 4, 5, 6 or 7*
9	Care Coordinators	18	*FTEs providing Care Coordination (may include Health Outreach Workers, Community Health Workers, Peer Specialists, Recovery Support Navigators providing care coordination)*
10	Peer Specialist/ Recovery Coaches (non-Care Coordination)	2	*Do not include FTEs of Peer Specialists or Recovery Coaches included in line 9*
11	Intake Coordinators/Engagement Specialists		
12	Administrative Support	1	
13			
14	Total FTE	28.6	

	Staff Ratios - Please calculate the following ratios:		
15	Ratio of RN and Clinical Care Manager (RN) to Assigned and Engaged Enrollees	1:250	*Estimated number of Assigned and Engaged Enrollees at the end of BP1 divided by total FTEs of (RN+RN Clinical Care Managers)*
16	Ratio of Care Coordinator Supervision to Care Coordinators	1:6	*Total Care Coordinator FTEs divided by Total Care Coordination Supervision FTEs*

Please describe which Program staff listed in lines 2 through 8 above directly supervise Care Coordinator staff: care coordinators will be supervised both by the Clinical Care Managers (LPHA) and the RN's

Section 7.3 Initial DSRIP Participation Plan

7.3.A Executive Summary

1. Goals, identified challenges related to the care delivery system and behavioral health, and proposed solutions to be effectuated through the CP program

The SCP BH CP Team has a long history of providing comprehensive BH services in the Southern Region. The Team has developed a number of strategies to address the challenges of a large, diverse, and complex service delivery system. Given that the region is comprised of 12 service areas, the Team will develop five geographically based Hubs, located at current licensed BH clinic sites. The Hyannis Hub will cover the Barnstable and Orleans. The Falmouth Hub will cover Falmouth, Nantucket and Oak Bluffs. The Plymouth Hub will cover the Plymouth and Wareham. The North Dartmouth Hub will cover Fall River and New Bedford. The Stoughton Hub will cover Brockton, Taunton and Attleboro. Each Hub will have a comprehensive, care management team. The Hubs are each located at licensed mental health clinic sites with full complement of clinical support services and a network of relationships with the local service systems. The Team's structure supports our ability to fulfill all contract requirements, including:

- Seasoned executive and senior team, with experience in a variety of inpatient, outpatient, residential, and other community-based models, including CSP and CBFS;
- Human Resources and Training Departments to support onboarding, orientation, and professional development needs of the LLC;
- Robust QM, Risk Management, Health IT, Health Records, and Billing Departments, which encompass a team of professionals in each discipline who will work to establish quality data systems to capture, monitor, and report contract metrics and outcomes; to ensure service delivery documentation and billing submissions align; and to drive QI as needed.
- Fully integrated EHR with sophisticated Health Information Teams, with significant Application and Structure Query Language (SQL) competencies.

The SCP BH CP Team will work to solidify current relationships and develop new ones with ACOs, hospital systems, PCPs, Federally Qualified Health Clinics (FQHCs), BH providers, state agencies, advocacy groups, ESPs, law enforcement, courts, and other organizations that are key to BH and medical integration. The SCP BH CP Team has extensive experience with care management models including CSP, Recovery coaches, REACH program and Here-for-You, which will inform the development of the proposed care coordination model. Communication and coordination of services across the region and service areas will be enhanced with technology including a shared Care Management Platform, interoperability through the Mass HIway, applications to enhance health, wellness and integration of care with medical providers.

The SCP BH CP Management Team will ensure that the five Hubs utilize uniform policies, procedures, training, staffing, supervision, and quality management. A major challenge for the BH CP Team will be workforce development to recruit, hire, train and supervise staff in service areas that have been historically difficult to staff, such as Nantucket, Martha's Vineyard, Fall River and New Bedford. In addition, cultural and language capacity will be essential in providing services in such a diverse region. The BH CP Team will utilize its existing experience and connections to the communities it serves to develop a culturally diverse workforce.

2. Number of Assigned and Engaged Enrollees the Bidder intends to support under the Contract.

The BH CP will support a minimum of 1,000 enrollees throughout the Southern Region Service Area. Our design of five Hubs accommodate a scale-up goal to serve a total of 5,000 Engaged Enrollees by Budget Year 5. Enrollees are individuals with high risk and need with chronic medical and BH conditions, including SPMI, SUD, and co-occurring disorders. The BH CP will engage in targeted outreach strategies to address historically hard to reach clients and those facing numerous challenges relating to their social determinants of health. The BH CP will seek to address the highest need and cost individuals through a comprehensive, wraparound approach that is individualized, culturally competent, and designed to achieve better health outcomes.

3. The Service Areas for which the Bidder is bidding.

The SCP BH CP Team, which includes SSMH, Gosnold and FC, will operate in the entire Southern Region Service Area, including Attleboro, Barnstable, Brockton, Fall River, Falmouth, Nantucket, New Bedford, Oak Bluffs, Orleans, Plymouth, Taunton, Wareham.

4. Plans to operationalize the CP program and associated time frames

During the Preparation Budget Period, the SCP BH CP Team will write policies and procedures for the program, which will include developing the aforementioned committees. These committees will be essential in developing the program as well as continuing to ensure that the needs of Engaged Enrollees and the program quality are held to a high standard. The BH CP Team will utilize the planning period to develop and execute a strategic plan for workforce development and training. The current shortage of qualified staff and the competition for those staff will be addressed through development of an internal recruitment and training program. Staff will be recruited and trained prior to operational start-up utilizing DSRIP funding. Staffing will be ramped up to serve the growing numbers of Enrollees. The BH CP will provide trainings in a didactic format for all newly hired staff with annual trainings to promote continued staff development. The training modules will be videotaped and added to Relias Learning to establish a standardized training package. The SCP BH CP will maintain and expand relationships with contracting ACOs during the planning period. Negotiations have begun with Boston Medical Center's (BMC) ACO through South Shore Hospital (SSH) and Signature Health, and Steward Health's ACO and its associated hospitals, Cape Cod and Good Samaritan. These ACO linkages will prepare the CP to identify and engage Enrollees. Gosnold will provide ESP service in Nantucket through a sub-contract with BMC. The Team will establish other relationships to provide ESP services. During the budget preparation period, a Care Management Platform will be implemented. The CP will establish a plan, quality indicators, and program evaluation system.

Year 1-5

- The Management Committee will meet regularly to provide program oversight, and the CAC and LQTM will meet quarterly to review Enrollee concerns, outcomes data, and quality.
- The BH CP Team will conduct regular trainings for new staff on topics such as engagement, documentation and community resources. In addition, staff will also be asked to participate in periodic trainings conducted by EOHHS or its designee, including trainings that cover various aspects of MassHealth payment reform, including ACOs and/or CPs initiatives.
- The SCP BH CP Team views community relationships and collaborations to be an essential component of the BH CP, and significant efforts will be taken to preserve these throughout.
- The BH CP will engage Enrollees using EBPs and community resources.
- The BH CP will collect and analyze data to inform BH CP services, making QI as needed.

7.3.B Supporting Populations and Community Engagement

1. Connections to the Community

The SCP BH CP Team has strong community connections throughout the entire Southeast Region Service Region. Together, SSMH, Gosnold, and FC have deep collective experience covering Service Areas from Fall River to Taunton, Attleboro, and Brockton, and southward to Plymouth, and then down to Cape Cod and the Islands. These longtime community connections as well as our diversified service reach and deep relationships will support the SCP BH CP's overall success. The agencies have well over 300 collective formal and informal linkages within these communities. Among key relationships are alliances with numerous community-based agencies and healthcare systems. Some examples of existing community collaborations include:

- *Advocacy Organizations:* Wareham Homeless Coalition and Wareham Substance Abuse Coalition for SSMH; Cape Organization for Rights of the Disabled for Gosnold; and, Cape Cod Regional Network on Homelessness for FC.
- *Community Behavioral Health Organizations*: Northeast Behavioral Services for SSMH; Martha's Vineyard Community Services for Gosnold; and, Barnstable County Health and Human Services Advisory Council for FC.
- *Community Health Centers, including FQHCs:* Manet Community Health Center, the Greater New Bedford Community Health Center, and Brockton Community Health Center for SSMH; Outer Cape Health Center for Gosnold; and, Duffy Health Center for FC.
- *County/City Organizations:* Barnstable County Human Services for Gosnold; and, Community Network of Cape Cod-Steering Committee for FC.
- *Courts and Justice System:* Plymouth, Wareham and Brockton Courts for SSMH; Federal Probation/Parole for Gosnold; and the Community Outreach Initiative Network for FC.
- *Cultural Organizations:* Quincy Asian Resources, SSMH; and, Wampanoag Tribe, FC.
- *Domestic Violence Intervention Organizations:* South Shore Women's Shelter and DOVE, Inc. for SSMH; and, Independence House for FC.
- *Educational Institutions:* Bridgewater State University, Massasoit Community College, Cambridge College, and Quincy College for SSMH; Cape Cod Community College for Gosnold; and, Barnstable Public Schools for FC.
- *Faith-Based Organizations:* Cape Cod Council of Churches for Gosnold and FC.
- *Hospital Systems:* Brockton Hospital, Steward Health Systems, South Shore Hospital, BID-Plymouth, BID-Milton, Tobey Hospital, Southcoast Health System, McLean Hospital SouthEast, and Arbor Health System for SSMH; Nantucket Hospital, Cape Cod Hospital, Falmouth Hospital, and South Shore Hospital for Gosnold; and, Cape Cod Hospital for FC.
- *Housing and Homelessness Services:* Father Bill's Shelter and Wareham Homeless Coalition for SSMH; Housing Assistance Corporation for Gosnold; and, Housing Assistance Corporation Executive Board for FC.
- *LTSS:* Countryside Adult Day Health for SSMH; Visiting Nurses Association of Cape Cod for Gosnold; and, Vinfen for FC.
- *Medication Assisted Treatment*: Manet Community Health Center for SSMH; and, Habit OpCo for Gosnold and FC.
- *Nutrition Services:* The Falmouth Service Center and Falmouth Food Pantry for Gosnold.
- *Physical Activity:* Korben School of Horsemanship, East Coast Athletics, Fitness Elevation, and Maria Mock for Gosnold.

- *Safe and Healthy Living Environment:* Mental Health First Aid USA Instructor Program for SSMH; and, Recovery Without Walls for Gosnold.
- *Services for Individuals with Developmental Disabilities:* Road to Responsibility, Inc., Amego-Brockton and South Shore Arc for SSMH; and, Hyannis DDS for FC.
- *Specialized Services:* the Massachusetts Rehabilitation Commission (MRC) for SSMH; AIDS Support Group of Cape Cod for Gosnold; and, South Shore PFlagg for FC.
- *SUD Facilities:* Spectrum for SSMH; SSTAR for Gosnold; and, High Point for FC.
- *Vocational Services*: Attleboro Enterprises for SSMH; Job Training and Employment Corporation for Gosnold; and, Cape Abilities for FC.
- *Transition Services:* Father Bill's for SSMH; and, Duffy Health Center for Gosnold.

2. How we will grow connections to the community in the Service Areas.

The BH CP Team will apply our collective affiliations to broaden communities' understanding of BH CP services. The Team will work with community-based agencies and programs, including homeless shelters, to develop an Authorization Form for obtaining client permission to share identifying information with the BH CP Team. In building these information-sharing channels, the Team hopes to assess whether an individual in the care of a community-based organization has been identified by an ACO or MCO as an Assigned Enrollee. Agencies can then contact the BH CP to inquire as to whether an individual in their service is an Enrollee. For Assigned Enrollees, the BH CP Team will then work with the Community Provider to engage the person. Under a variety of state and federal privacy laws, it is likely that the Team will be unable to inquire about Assigned Enrollees; however, if such Enrollees are engaged in a community-based organization, the organization can then obtain the necessary Authorization in order to inform the Team and facilitate engagement. For unassigned cases, the Team can provide education on how the Provider can reach out to EOHHS or the MCO to request Assignment.

3. Plan to ensure staff is informed of resources over the contract term.

Sustaining community relationships requires excellent communication and customer service on a day-to-day basis. The SCP BH CP Team will offer robust orientation to staff as described in Section 7.3 C. In addition to staff orientation related to community connections and communication, the Team will leverage existing technological systems, such as Constant Contact and other organizational marketing resources, to develop and distribute an Electronic Quarterly Newsletter to the Provider community on services and outcomes related to the BH CP. We expect that as the Provider community becomes increasingly aware of the Team, our combined efforts to outreach and engage difficult-to-engage populations will produce optimum outcomes. In addition, SCP BH CP staff will receive a resource binder that serves as a living document. The binder will be reviewed at trainings and staff meetings and updated on a regular basis.

7.3.C Community Partner Supports and Activities

1. Outreach and Active Engagement

a. Planned strategies for outreaching to and engaging with Assigned Enrollees, including individuals who are homeless and hard to reach, within the timeframes specified in the Contract - The SCP BH CP Team will conduct a range of outreach initiatives to engage Assigned Enrollees. SSMH, Gosnold, and FC have deep collective experience and resources across Southeastern Massachusetts for engaging vulnerable and hard-to-reach populations, including individuals affected by serious mental illness, substance use disorders, and complex co-occurring presentations. Such individuals often experience associated socio-economic challenges, which include poverty, impermanent housing and homelessness. SSMH, Gosnold, and FC engage with this population through a variety of existing programs and evidence-based practices, which encompass strategies like assertive engagement, integrated models, crisis services, and creative collaborations with other community organizations. Notable among these creative programs is Gosnold's Community Outreach and Intervention Program, which links Recovery Coaches with 30 Police Departments across Southeastern Massachusetts and Cape Cod in response to non-fatal overdose events. The Community Outreach and Intervention Program leverages the post-overdose event as a pathway to inpatient and continuing treatment.

Leveraging Expertise from Existing Programs and Evidence-Based Practices - SSMH, Gosnold, and FC will continue their work with existing collaborators and forge new partnerships to facilitate access for Assigned Enrollees. The capacity of SSMH, Gosnold, and FC to meet with BH CP clients in accessible, familiar, comfortable and inviting settings is key to effective engagement in the BH CP model. Our approach is rooted in evidence-based practices implemented in our existing program models. For example, Programs of Assertive Community Treatment (SSMH), REACH (SSMH, Gosnold and FC), Children's Behavioral Health Initiative (SSMH, Gosnold, and FC), Community Support Program (SSMH, Gosnold and FC), Here-for-You (SSMH) all use coordinated strategies to engage vulnerable and disconnected populations.

In response to each BH CP Assigned Enrollee, SSMH, Gosnold, and FC have designed the following Outreach and Engagement Protocol:

1. Within five business days of referral, make internal case assignment;
2. Within 10 days and not later than 30 days of referral, engage in progressively intensive Outreach activity to contact the Assigned Enrollee. The SCP BH CP Team will use telephone, visit locations family to the Assigned Enrollee, face-to-face contact, and other electronic means of communication;
3. Every day, conduct a Morning Multi-Disciplinary Team Meeting, similar to the model used in PACT services, to review status of Referrals, Outreach, and Engagement of Assigned Enrollees. The team will also evaluate the success of strategies used to convert Assigned Enrollees to Engaged Enrollees, and to formulate specific outreach and engagement strategies for hard-to-engage enrollees. Using WEBEX and other technological capacities, the SCP BH CP Team will periodically conduct Morning Meeting across multiple Hubs in order to share best practices, strengths, and challenges across the three organizations.

4. Draw from Evidence Based and Emerging Practices currently used by SSMH, Gosnold, and FC in programs such as CBFS, PACT, REACH, and CSP. The agencies will use the following EBPs and EPs during Engagement and Outreach activities:
    a. SBIRT (Screening, Brief Intervention and Referral to Treatment);
    b. Motivational Interviewing; and
    c. Trauma-Informed Assessment and Intervention.
5. Conduct intensive outreach to frequent engagement sites, including EDs, Emergency Services Providers, DMH Site Offices, Homeless Shelters, Residential and/or Respite Programs, Primary Care Practices, Sober Living Residences, etc.
6. Work with community-based agencies and programs, including homeless shelters and other resource agencies, to develop an Authorization Form to gain and document consent for information sharing with the SCP BH CP Team. Community organizations will use this form with their clientele in order to share identifying information from Assigned Enrollees with the Team to promote communication, collaboration, and engagement.
7. Apply the BH CP Team's existing multi-cultural and linguistic competencies to engage diverse populations, including African American, Asian (Mandarin, Cantonese), Cape Verdean, Haitian Creole, Southeast Asian, Spanish, and Portuguese. Affiliated Partner, FC has specialized competency in this area, serving as part of the MBHP Cultural Broker Program. FC has deep community resources, including with organizations such as the Boston Refugee and Immigrant Assistance Center (RIAC), Southeastern Coalition, Bosnian Center, and Ascentria Care Alliance.

Leveraging Community Partnerships- SSMH, Gosnold, and FC will staff BH CP Hub locations with a diverse staff who understand the importance of engaging clients and addressing needs in ways *clients* deem accessible, helpful, and desired. This means providing services to clients in locations outside the traditional office-based mental health treatment center. Instrumental to our engagement efforts is each client's natural supports and other community providers who support client participation in the BH CP program. Working with the client and natural supports, SSMH, Gosnold, and FC will create shared understanding and clear expectations about the scope of BH CP services and provide reference information verbally, as well as in writing, in multiple languages to align with diverse capacities and learning styles. We detail the breadth and depth of these Community Partnerships earlier in Section 7.3 (B).

Leverage Experience with Integrated Models and Crisis Services - SSMH and Gosnold presently offer integrated behavioral health services in physician practices and other settings. As part of the Steward ACO, SSMH offers embedded clinical services in Hawthorne Medical Associates Primary Care Practices in North Dartmouth. SSMH also works with CHART 2 clinicians at Beth Israel Deaconess-Milton, which improves provider-to-provider communication and service access. Finally, SSMH embeds clinicians in Manet Community Health Center, Taunton which further enables close care coordination and integrated treatment between primary and behavioral health services. These relationships with ACOs and primary care practices build linkages to a diverse range of healthcare providers in Southeastern Massachusetts communities.

Similarly, Gosnold embeds clinicians at Harbor Community Health Center, in Hyannis and Plymouth locations, and with Briarpatch in Sandwich and Nantucket. The organization has a history of integrated programs at Falmouth OBGYN, Pleasant Lake Medical, and Brewster.

Gosnold is presently building capacity in its Centerville clinic for co-located medical services offered by Community Health Center of Cape Cod, scheduled to begin in summer 2017.

Leverage Experience as Emergency Service Provider (ESP) - SSMH serves as the ESP in Quincy, working with Emergency Departments in Quincy, Milton, and South Shore Hospitals. Effective May 2017, Gosnold serves as the ESP Provider on Nantucket through a contractual relationship with BMC. Additionally, Gosnold has embedded Recovery Navigator Services at South Shore Hospital, Falmouth Hospital, and Cape Cod Healthcare. Emergency Services Programs assist individuals and families to stabilize emergency mental health conditions and refer to appropriate inpatient or continuing care services. Similarly, Recovery Navigators work within Emergency Departments to coordinate referral to an appropriate level of care for individuals with substance use disorders or co-occurring mental health and substance use disorders. These types of programs specialize in managing care transitions – a competency directly related to operating BH CP services.

Through ESP and Recovery Navigator roles, SSMH and Gosnold have cultivated deep relationships with a variety of behavioral health, addiction recovery, primary care practice, LTSS, and other social support agencies across the Commonwealth. This comprehensive constellation of relationships will serve clients enrolled in the proposed BH CP program. Additionally, existing Crisis Teams and Recovery Navigation services will help to identify when Assigned Enrollees or Engaged Enrollees present in Emergency Departments where SSMH or Gosnold have a presence.

Leverage Staff Training and Technology - SSMH, Gosnold, and FC have comprehensive staff training and professional development capacity within their respective organizations. In an effort to build and sustain strong relationships with community providers, and to ensure share efficient and accurate exchange with community providers, the SCP BH CP Team will provide training on community resources during Orientation.

The SCP BH CP Team also plans to use technological solutions to engage Assigned and Engaged Enrollees. Gosnold's Incident Tracker can be expanded to SSMH and FC. Incident Tracker is a web-based platform that provides automatic reporting pathways, notifying staff when one of their clients has experienced a high risk event, or admission to the hospital. For example, once a staff person enters information about an event like a client hospitalization, the Incident Tracker will notify the Care Manager, Care Coordinator, and RN identified in the client's Treatment Plan. This system will ensure swift intervention in discharge and continuing care planning across the SCP BH CP system.

SCP will implement an electronic Care Management Platform with the capacity to generate reminder emails and texts to clients. With client consent, these reminders will be used to engage Assigned and Engaged Enrollees in communication with the BH CP, initiate contact, remind them of upcoming appointments, and perhaps eventually support them in self-management of their conditions. As part of its CBFS service, SSMH must contact assigned clients within 72 hours of referral. The organization achieves this timeframe by phone outreach, provider outreach, and if needed, outreach to the client's last known address. SSMH will apply these strategies to enhance SPC BH CP operations.

b. Planned strategies for outreaching to and engaging with Assigned Enrollees with Substance Use Disorders - Gosnold brings to the SCP BH CP partnership particular expertise in engaging Assigned Enrollees with Substance Abuse Disorders. Presently, Gosnold Recovery Navigators integrate in communities across Southeastern Massachusetts using four primary strategies. First, Gosnold leads Family Support Groups and these are instrumental to leveraging family strengths to get individuals with SUDs into treatment. Second, Gosnold's Prevention Department regularly engages with schools and communities through a Speakers Program, which includes Recovery Coaches and others with Lived Experience, including Chris Herren, who serves in a Gosnold leadership role. Third, Gosnold embeds Recovery Navigators in South Shore Hospital, Falmouth Hospital, Cape Cod Hospital, and Brockton Hospital (pending). Navigators work with client, family, and community providers to institute a Continuing Care Plan designed to promote lasting recovery. Fourth, Gosnold's Community Outreach and Intervention program links the organization's Recovery Coaches with 30 Police Departments across Southeastern Massachusetts and Cape Cod. After non-fatal overdose events, Coaches and Police reach out to these individuals to facilitate admission into detoxification services, which initiates the recovery process. Nearly 80% of adults who are engaged through the Outreach and Intervention Program enter into treatment. In addition, Gosnold will have a lead role in the SCP BH CP Team related to engaging with community groups such as NAMI, Prevention and Substance Abuse Coalitions, and Housing and Shelter Coalitions, such as the Massachusetts Housing and Shelter Alliance (MAHASA) among others.

c. Planned process to obtain and document Assigned Enrollee's agreement to participate in CP Supports through a participation form. - The Southeast Community Partners, LLC will implement a shared standardized Participation Agreement Form (PAF) to document each client's agreement to participate in the BH CP. Each client will also authorize a Release of Information to providers they permit the BH CP to contact. The SCP will pursue Memoranda of Understanding to facilitate communication and coordination of care with providers who frequently serve Assigned and Engaged Enrollees.

The SCP BH CP Team will ensure that BH CP clients understand that all services are voluntary and how they may opt out of the BH CP or request a new Community Partner. The BH CP Team will educate Enrollees about the key goals and benefits of the BH CP, including:

i. Promotes access to care;
ii. Assists in navigating a complex system of care;
iii. Offers education and support related to managing complex and chronic conditions;
iv. Prioritizes an integrated treatment approach to improve communication and health outcomes; and
v. Helps clients prioritize care and planning needs.

2. Comprehensive Assessment and Person-Centered Treatment Planning

a. Process for conducting Comprehensive Assessments, including how the Bidder will ensure the Assigned Enrollee participates in the assessment process. - Beginning at engagement, a BH CP Care Coordinator will begin the assessment process. The length of the assessment process will determined by the level of engagement between the staff and Enrollee and will not exceed three months. At the first meeting, the Care Coordinator will complete the Enrollee Assessment

Tool and Basic Needs Identification Form. The Care Coordinator will assess whether the client is currently receiving services from any state agencies, such as DMH, DDS, or MRC. The assessment will gauge the Enrollee's ability to communicate symptoms, concerns or care goals, preferred language, employment status, legal status, education, informal supports and any current treatment plans. The form will identify medication, housing, clothing, food, medical conditions, substance abuse, critical risk behaviors, and entitlements. Based on the obtained information, the Care Coordinator will develop a short-term plan to address any identified critical needs. In cases where there is an existing Comprehensive Assessment conducted within three calendar months of the Assigned Enrollee's Assignment, the BH CP will use the existing assessment in lieu of conducting a new assessment. *Please see Attachment 7.3.C.2 for the proposed Enrollee Assessment Tool and Basic Needs Identification Form.*

Enrollee involvement begins at the time of central intake, when each is requested to complete a self-assessment form providing key information about conditions, current providers, treatments, and medications. The form also yields information on the client's ability to communicate concerns, symptoms, and treatment goals. Care Coordinators review the form in the presence of the client and integrate the self-assessment into the care plan, respecting client voice and choice. The assessment continues as the Care Coordinator meets with the client and gathers any additional information needed to provide a comprehensive list of current services and service providers, medical history (clients and families), and medical needs. The assessment will also include the client's medications, prescribers, and pharmacies and the purpose of each to address specific diagnoses or symptoms. The Care Coordinator will seek client consent to obtain relevant information from other providers, and, if not clinically contraindicated, from client family members and other natural supports. The assessment process is a critical part of getting to know the client and building a respectful relationship. For this reason, Care Coordinators will use effective engagement methods such as Motivational Interviewing which helps to meet the client where he or she is at, and identify next steps that the client is ready to undertake. In addition, trauma informed approaches are important for the many clients who have experienced trauma which may be difficult to revisit as the assessment addresses behavioral health history. Cultural competency is critical in building relationships and in accurately understanding information communicated. Wherever possible, the SCP BH CP Team will assign a culturally and linguistically competent Care Coordinator. If needed, the BH CP will supplement staff resources first by an interpreter, and second, by electronic interpreting solutions.

Once the assessment is complete, the Care Coordinator will submit it to the RN and Care Manager for review and approval, communicating results with the care team, ACO, MCO and other providers as necessary.

b. Person-Centered Treatment Plans

1) Planned processes for developing the Person-Centered Treatment Plan, including ensuring the Assigned Enrollee participates in the process - The SCP BH CP Team will address care planning as a collaborative process directed by clients in partnership with providers, other natural supports, other area stakeholders and service providers aimed at meeting behavioral health and medical treatment needs, as well as additional needs dictated by social determinants of health. The information obtained in the comprehensive assessment is the basis for development of a Person-Centered Treatment Plan (PCTP) within 3 months of client assignment.

In order to promote recovery and maximize opportunities for compliance and success, each PCTP will be individualized to reflect the client's need, preferences, priorities, and cultural, religious and other belief systems. Engaged Enrollees will be encouraged to develop his/her PCTP goals and asked to agree with identified goals prior to PCTP implementation. Each Engaged Enrollee's PCTP will include:

- The results of the Comprehensive Assessment and any assessments conducted for social services;
- The types, frequency, and duration of services, and how services and care will be integrated and coordinated among the Assigned Enrollee's health care providers, including but not limited to Recovery Support Navigators and other community and social service providers;
- The Assigned Enrollee's long and short-term goals designed to reduce risk and help manage the complexity of the Assigned Enrollee's health conditions;
- Planned date for reassessment;
- Identification of barriers to meeting goals and consideration of the Assigned Enrollee's ability to adhere to treatment plans;
- A crisis plan; and
- A contact list that includes the Assigned Enrollee's current and preferred method of contact and phone numbers and email addresses of the Assigned Enrollee's PCP, Care Coordinator, care giver (if any) and emergency contact(s).

2) The PCTP will be a comprehensive document that is entered into the care management platform shared by SCP and FC, providing a complete and accurate reference on planned care available to the client's care team on a timely basis. The Person-Centered Treatment Plan will be unique to each Assigned Enrollee, and will reflect his or her preferences, needs, and cultural considerations, as indicated by the Enrollee's signature or other indication of agreement. It will be documented in writing. However, to ensure that the Assigned Enrollee clearly understands the Person-Centered Treatment Plan, it will also be prepared in alternative methods or formats (e.g., audio taping), when needed, or translated into the primary language of the Assigned Enrollee or his/her legally authorized representative, if any, and explained with the assistance of an interpreter. With client consent, the PTCP will be shared with the Assigned Enrollee's PCP or PCP Designee, whose approval will be requested.

3) *Planned processes for updating the Person-Centered Treatment Plan.* - All three organizations are skilled in providing recovery oriented person-centered treatment planning. The BH CP Team will initiate a review process following a change in the Engaged Enrollee's status that is due to progressive disease, functional decline, or resolution of a problem that represents a consistent pattern of change that is not self-limiting; impacts more than one area of the Engaged Enrollee's health status; and requires a review by the BH CP Team. Long- and short-term goals as well as crisis prevention plan will be reviewed on a quarterly basis. The PCTP will be reviewed at least every six months to assess goal progress, health status, monitoring compliance with PCTP, and documenting any updated recommendations or modifications to the PCTP. Such reassessment, monitoring and updating shall include, but not be limited to:

- Determining the Engaged Enrollee's progress toward goals;
- Reassessing the Engaged Enrollee's health status;
- Reassessing the Engaged Enrollee's goals;

- Monitoring the Engaged Enrollee's compliance with the Person-Centered Treatment Plan;
- Documenting recommendations for follow up; and
- Updating the Person-Centered Treatment Plan, as necessary, to reflect the reassessments.

The BH CP Team will seek approval from the Engaged Enrollee on any updates to the PCTP and the Engaged Enrollee's PCP or PCP Designee. The BH CO team will again provide the Engaged Enrollee with a copy of the updated PCTP once approved by the PCP or PCP Designee.

4) Planned process for ensuring the Assigned Enrollee and the Assigned Enrollee's PCP or PCP Designee approve the Person-Centered Treatment Plan. - Upon completion of the PCTP, clients will be asked to sign the plan. Each client will receive a paper copy of the PCTP to use as a working document on the path to recovery. Once signed, the Care Coordinator will solicit the client's permission to share the PCTP with other members of the client's care team. If permission is granted, the Care Coordinator will share the PCTP with the client's PCP, ACO or MCO, and other providers as necessary.

3. Care Coordination and Care Management

a. Identification of stakeholders (e.g., providers, state agencies, and community organizations) involved in an Enrollee's care –SSMH and FC will create a specialized Care Team for each Assigned Enrollee that will be comprised of the Enrollee, their PCP or designee, Clinical Care Manager, Care Coordinator, and their BH clinician. If the Enrollee is using LTSS, a representative of that provider will become part of the Care Team. Care Coordinators will also work with each Enrollee to identify pertinent parties that may make important contributions to the work of the Care Team. Additional team members may include any individual important to the Enrollee, such as family members, friends, formal or informal caregivers, sponsors, advocates, specialists and other case managers or state agency designees. Care Coordinators will also review the Assessment, EHR record for other providers, and - with client consent - seek information from other providers, ACOs/MCOs, and any other individual who may recommend appropriate members of the Care Team. The Care Team will continually consider whether additional members are needed or would contribute to the Team. Engagement of an Enrollee's key provider and natural supports encourages buy-in and is positively correlated with achieving the goals identified in the Care Plan.

b. Information Exchange - The Care Coordinator will provide for the transfer of all appropriate information required for coordinating an Enrollee's needs. Driven by Care Plan goals, the Coordinator will facilitate each Enrollee's sustained health, wellness, and recovery. The Care Coordinator will be responsible for managing communications and ensuring that all members of the Care Team are synchronized in order to promote streamlined service delivery coordination and improved outcomes. Within the SCP BH CP Team, communication will be facilitated through the capacities of the selected Care Management Platform. For parties outside of the BH CP Team, with the appropriate Release of Information in place, the Team will use phone, fax, E-fax, mail, secure email communications, and the MassHIway in accordance with the requirements of the BH CP program to ensure ongoing communication between all team members, the enrollee's providers, and other stakeholders. The Coordinator may also share and disseminate information in person during discharge and Care Team meetings.

c. Management of the Enrollee' Care Team - Care Coordinators will ensure effective team operations by clearly defining the role of each Care Team member and the Care Planning and Implementation process. The Coordinators will ensure that each documented member of the care team is invited to all meetings and understands the goals, purpose and agenda of the meeting. In the beginning, the Coordinators will discuss the purpose of the team and work with each member of the team to identify and assign roles based on their relationship to the client, their training and/or licensure, and the role, function or type of work they have done with the client in the past. The role and purpose of each individual on the team will be very different depending on the needs of the client and the goals that have been identified. No one role or individual is more important than another. This process will ensure that the team functions based upon established and clearly defined processes that are goal oriented, person centered and driven by the client and his/her needs. Each member and role will be documented and available to the entire team.

d. Communications - Effective communication implies that the communication and documentation shared will be informative to the recipient and aid in the advancement of treatment goals. Communication amongst stakeholders is extremely important in promoting a client's goals; but, requires the client signing releases of information. The treatment care planning documents will sit in a shared Care Management Platform accessed by the Care Coordinators from all affiliated partners. The Care Team will hold regularly scheduled meetings and will send notice, invites and agendas to all members of the Care Team in advance of the meetings. All BH CP Team meetings will have the ability for a conference call line to encourage participation by all stakeholders. All Care Plans will be sent to PCPs and other appropriate stakeholders with permission from the client, including the ACO or MCO. All appropriate documents necessary to successful Care Planning and intervention with the client will be shared with all relevant parties in a HIPAA compliant fashion via secure email, fax, e-fax, mail, or hand delivered. All Care Plans, treatment goals and safety plans (where appropriate), referrals, and identified resources beneficial to the client will be available to each client via a client/patient portal on the Care Management Platform used by the BH CP Team for this initiative.

4. Care Transitions

Early information about client crises and admissions to higher levels of care is critical in making it possible for Care Teams to optimally coordinate transitions after transfer or discharge. SCP's operation of and affiliation with areas crisis teams will permit early identification of clients being admitted to higher levels of care. The SCP BH CP's Care Management Platform and/or Gosnold's Incident Tracker will provide automatic notifications directly to members of an Enrollee's SCP Care Team when there is a crisis or admission to a higher level of care. It is also our hope that our ongoing communication with the ACO/MCO will aide in the process of early identification of admission to a higher level of care.

When a client has been admitted to a higher/intensive level of care, the SCP BH CP Team will immediately begin to work with social work, case management or nursing staff (after a release has been signed) at the facility to prepare for the client's discharge either back to the community or to another level of care. The BH CP will initiate this contact within one business day of learning of the admission. It is important that the treating facility be aware of the CP Team and

their engagement with the Enrollee and the BH CP Team's role, which can be achieved by educating and informing higher levels of care once The BH CP Team is in place.

The Care Coordinator will assist in the discharge planning process and attend the discharge meeting, when appropriate, along with any other members of the Care Team including outpatient providers, the Enrollee's PCP or representative, CBFS, or state agency representatives who can contribute to the discharge planning process. The Care Coordinator will meet with the client face-to-face within three business days in order to support, plan and assess client service and support needs. The Care Coordinator will update the treatment plan if needed to better address the concerns and add any area of need that may have developed or changed during the course of treatment. The Coordinator will coordinate any additional clinical or supportive services that are needed including arrangement for transportation and provide updates to the care team and the ACO/MCO and share appropriate documentation and records with new providers where appropriate. The Coordinator will also assist the client in any follow up services including transportation, housing, support, education, and relationship building. Many of these connections to service providers may require a warm hand off and it may also be important to work closely with the client to assist him or her to understand the need for attending and following through with all appointments.

5. Medication Reconciliation

Within three days of discharge from an inpatient behavioral health or medical unit, a SCP BH CP RN will reconcile the Enrollee's medications. The RN will communicate with the client's PCP via phone, secure email, fax, or MassHIway to obtain verification that medication orders by the discharging facility were appropriate for the individual. The SCP BH CP Team will also ensure that medication orders are filled accurately. This process may be done in person by the SCP RN, verified by a VNA or MAP provider who communicates directly with the client and RN, or verified via video conferencing between the RN and the Care Coordinator. The RN will speak directly with the client to assess his/her ability to effectively communicate and demonstrate how to take their medications. If clients have questions about their medications, the RN will remind clients that their local pharmacist is an excellent resource.

Care Coordinators conducting home visits can also support medication compliance by using mobile video conferencing to link the client with the RN. This capacity provides added supervision and support around areas of medication education and compliance. Via videoconferencing the RN will talk to the client to identify any issues of non-compliance or discrepancies in prescribing, especially when the client is served by multiple providers. The RN will ask specific questions and review all the medications in the client's possession. Both the RN and the Coordinators will work to educate clients about the importance and health benefits of medication compliance and the potential risks of not adhering to their medication regimen. When clinically indicated (medication non-compliance, confusion around medication administration, multiple complex medication regimens, or functional limitations), the RN and the CC will work with MAT programs, VNA, and Home Health Agencies to identify supports and trained staff for clients that need assistance with medication administration. The SCP BH CP will get releases to be able to share and communicate all necessary and relevant information including the updated medication order forms amongst the client's PCP, MAT, Home Health Agencies and other prescribers. With all interventions described above, the RN is responsible to provide resources

and supports, consistent with each client's linguistic needs and learning style preferences. All communications and activities by the RN will be documented in the client's chart.

6. Health and Wellness Coaching

a. Health and wellness education, coaching and health promotion programs – SSMH, Gosnold, and FC have longtime experience in supporting individuals with significant behavioral and physical health challenges to set and achieve health and wellness goals. Programs such as PACT (SSMH), CSP (SSMH/Gosnold/FC), DBT (SSMH), Partial Hospitalization (Gosnold), Day Treatment (SSMH), and Recovery Coaching (Gosnold) have strong case management, care coordination, and psycho-educational service components. Further, outpatient models - both Center-based and Outreach - in place at SSMH, Gosnold, and FC - also build strong collaborative linkages to Primary Care Practices and other healthcare providers.

Because of enduring connections to the Southeastern Massachusetts' communities they serve, SSMH, Gosnold, and FC have formal and informal linkages to community resources such as YMCAs, YWCAs, privately-owned gyms, equine therapy, holistic counseling centers with augmentative treatment approaches (such as yoga and mind-body approaches), and nutritional planning. The SCP BH CP Team will regularly encourage Engaged Enrollee's use of Recovery Learning Communities (RLCs), which extend across the Southeastern Massachusetts region in Fall River, New Bedford, Taunton, Brockton, Plymouth, and Hyannis. RLCs provide a comfortable and accessible space for adults to learn more about community-based services and available supports to them. Family Support Groups offered by agencies such as Gosnold, are also helpful resources for individuals who have health needs but require education and assistance navigating the healthcare system.

The SCP BH CP will use a standardized Assessment process and instrumentation (attached to this proposal). The Assessment process is collaborative, wherein the Clinical Care Manager, Care Coordinator, or Registered Nurse works with the client to identify health and wellness needs and goals, and to assess resources of interest to the client. Each Hub will employ at least one Care Coordinator with lived experience as a consumer of mental health or substance abuse services. Peer advocates will be instrumental to helping Engaged Enrollees access desired community resources through direct assistance, referral, and support. Peer staff members are also excellent Navigators to community support groups, including Alcoholics Anonymous, Narcotics Anonymous, and Overeaters Anonymous. The assigned Care Coordinator works with the client to integrate goals, objectives, and interventions into the Person-centered Treatment Plan.

A final key element of the health and wellness component to SCP BH CP services is direct psychoeducation provided by the Registered Nurse or designee. We know the BH CP target population often faces comorbid health challenges, including Cardiovascular Disease, Diabetes, Chronic Obstructive Pulmonary Disease, and Obesity. Staff will be able to use direct face-to-face sessions to provide education, to share technological APPs such as MyFitnessPal, OneDrop, mySugr, Glucose Buddy, and other free solutions. The BH CP Team will also have access to Tele-Health technology to enable greater access to BH CP nursing resources.

b. Methods for ensuring the Engaged Enrollee's goals for the health and wellness programs are recorded and tracked in the Engaged Enrollee's Person-Centered Treatment Plan.- Each

client's PCTP will include his/her own health and wellness goals. As such, these goals will be reviewed on a biannual basis, during the overall plan review process. SCP will purchase a Care Management Platform that will capture Qualifying Activities that occur as part of the BH CP's services and track activities related to goals and objectives, including those for health and wellness. System design will be important, with discrete radio buttons that will help categorize Qualifying Activity into services delivered in accordance with the PCTP.

7. Connection to Community and Social Services

a. Plans to evaluate Engaged Enrollees for social service needs, including proposed screening tool(s) - Beginning at the first meeting following the Central Intake, the Care Coordinator will use the Assessment (attached to this proposal) to compile a list of the client's current community and social services supports, as well as any others used in the past. For many individuals, their critical needs assessment may focus on social supports that are fundamental to their stability. These will be immediately addressed in the short-term plan. As the assessment process progresses, the Care Coordinator will speak with clients about what role these supports have had in their lives and how they feel about the level of engagement and support they offer, and make recommendations related to additional resources, perhaps unknown to the client but of relevance or interest. Identified social service needs, goals, objectives, and interventions will populate the client's PCTP. SCP's Care Management Platform that will capture social service needs detailed on the PCTP, as well as Qualifying Activities engaged to address these needs.

b. Care Coordination - As mentioned in other parts of this proposal, including Staffing, Implementation Timeline, and Quality Management, Care Coordinators will receive orientation and training on social services and supports available to SCP BH CP clients. As the scale and capacity of the BH CP grows, the SCP BH CP will increase the number and diversity of community resources it uses. We will maintain and update a Comprehensive Resource Guide and invite community members as guests to our monthly Leadership and Quality Management Team meetings. These meetings will include a Lunch-and-Learn portion to enable information-sharing with key community partners. Community organizations can learn more about the SCP BH CP and meet its staff personally, and the Team can learn more about particular community resources. Relationship-building with community providers, supports, and resources will be an important part of successfully meeting our clients' needs. Oftentimes, direct connections are instrumental to client engagement with assistive services.

c. Collaboration with ACOs to recommend Flexible Services on behalf of Engaged Enrollees, and following-up on the outcomes of such supports – The SCP BH CP anticipates that our Engaged Enrollees will have needs for Flexible Services. The BH CP target population often has inadequate resources for air conditioners (for individuals with Asthma); mattresses and bedding; and healthcare/hygiene products, such as lice treatments and others. The BH CP Team will use a three step process for collaborating with ACOs to recommend Flexible Services. First, the Team will assess needs for Flexible Services as part of standardized Assessment processes. Second, the Team will develop a Reporting & Communication form to request and justify Flexible Services. It will be reviewed internally before the request is submitted to the ACO. Finally, the SCP BH CP Team will review approvals and non-approvals to better understand ACO criteria for authorization. The SCP BH CP Team will also report these data in our Annual Report or as part of Monthly Communications, as preferred by the ACO.

7.3.C.2 ASSESSMENT TOOL

No changes to the attachments included in the original Participation Plan.

7.3.D Innovative Technologies for Service Delivery

SSMH, Gosnold and FC utilize leading edge technologies to help clinicians deliver services remotely to clients. Technology enhanced for mobility and flexibility has been deployed and improves the client experience and continuity of care. For example, SSMH uses a cloud based communications and collaboration tool (RingCentral) which allows anywhere anytime conference between care worker, client, and care team by phone or video. The clinician can share a computer screen with participants, or pass control to the client to complete a self-assessment, a survey, or required medical forms. Business SMS capability, which is used across various devices such as desk phone, cell phone, and computer, eliminates unsecure text messaging between clients and providers. HD video can also be used for tele-psychiatry sessions when needed. This system and capability will be leveraged across the three agencies.

Providers are equipped with a complete set of mobile computing tools for services outside of the clinics. Virtual desktop technology (Citrix) allows staff to connect securely to the EHR anywhere and anytime. Secure remote connections provide access to the EMR, email, and files. Staff have portable Wi-Fi devices for mobile connectivity into the Care Management Platform. A learning management system is also in use and facilitates targeted on demand or scheduled clinical training with compliance reporting, licensing and management reporting.

An appointment reminder solution (ReminderCall) is currently in use at SSMH. The system links directly into the EHR system, captures client appointment data and transfers it to a 3rd party provider. The appointment reminders are sent via text or phone call allowing for confirmations, cancellations or changes. This assistive technology reduces missed appointments and keeps the clients actively engaged. The same ReminderCall technology can be leveraged to remind clients to take their medications.

SSMH, Gosnold and FC will acquire with DSRIP funding, a Care Management Platform (CMP). In addition, as lead agency SSMH is exploring other low cost innovative technologies to augment care coordination and client adherence to treatment goals. The CMP will also enable the electronic transmission of clinical and care information between provider systems and include numerous other interoperability features. The CMP will provide centralized administrative control, and will accommodate broadcast communication capabilities to the care teams for emergency situations, to specific clients, or across all clients when necessary.

A patient portal will also be available within the CMP tool. SSMH, Gosnold and FC will have care workers accessing a single system for all patient centered services, and will facilitate information collection from patients for their care teams in a timely manner and via a secure path. Utilizing a HIPAA compliant platform, the CMP solution will offer administrative controls to formalize documentation processes and workflows and signoff.

Other Adaptive Technologies: The proliferation of wearable technologies offers clients numerous benefits for better health management. For example, clients presenting symptoms of high blood pressure maybe incentivized to wear heart monitors, or those with diabetes could use blood sugar monitors. Achieving better health goes beyond behavioral health treatment. Growth in the use of these new technologies will help improve clinical outcomes for patients with co-morbidities.

7.3.E Personnel and Staffing

1. Organizational Chart

As described above, the SCP BH CP Team proposes to create five Hubs with a shared staffing model to cover each one within the Southern Region Service Area. Each Hub will be managed by one or more of the partners, who will be responsible for hiring the respective staff.

- Hub 1 will be located in Barnstable, covering Barnstable and Orleans, and staffed by FC.
- Hub 2 will be located in Falmouth, covering Falmouth, Oak Bluffs, and Nantucket, staffed by Gosnold.
- Hub 3 will be located in Plymouth, covering Plymouth and Wareham, staffed by SSMH.
- Hub 4 will be located in North Dartmouth, covering Fall River and New Bedford, staffed by Gosnold.
- Hub 5 will be located in Stoughton, covering Attleboro, Taunton, and Brockton, staffed by Gosnold.

Each Hub will be located at a licensed mental health clinic with its full complement of clinical and administrative staffing and resources to support the BH CP Team. A Medical Director will be assigned to each Hub to provide supervision and consultation. Attachment 7.3 E includes an organizational chart of SCP BH CP personnel, senior managers and other staff assigned to carry out the Contractor Responsibilities as articulated in Attachment A, Model Contract.

2. Staffing Model

Below is the SCP BH CP proposed staffing model based on an assumption of 1,000 Engaged Enrollees for the Southern Region Service Areas as articulated in Attachment D.

				FTE's								
CP Staffing Organization	Hub	Service Area	Number of Clients	Director of Integration	Program Director	Medical Director	RN	LPN	Clinical Care Mgr	Care Coordinator	Recovery Coach	Admin Assistant
FCP	1	Barnstable Nantucket Orleans	200	0.1	0.2	0.02	0.6	0.2	0.4	4	0	
Gosnold	2	Falmouth Oak Bluffs	200	0.1	0.2	0.02	0.6	0.2	0.4	3.5	0.5	
SSMH	3	Plymouth Wareham	200	0.1	0.2	0.02	0.6	0.2	0.4	4	0	
Gosnold	4	New Bedford Fall River	200	0.1	0.2	0.02	0.6	0.2	0.4	3.25	0.75	
Gosnold	5	Brockton Taunton Attleboro	200	0.1	0.2	0.02	0.6	0.2	0.4	3.25	0.75	
	Total	All Svc Areas	1000	0.5	1	0.1	3	1	2	18	2	1

3. Recruitment Plans, and Job Descriptions and Qualifications

The SCP BH CP agencies have successfully recruited qualified staff at all levels of licensure, education, expertise and experience. These agencies' reputation, experience and commitment to student and staff training have been invaluable in the training and retention of staff, especially those who provide mobile services such as care management. The SCP BH CP is committed to

regular review of staff compensation levels relative to current industry trends. The agencies use formal, externally compensation surveys to conduct annual assessments of compensation levels.

Starting in November 2017, each organization will post job vacancies for Care Coordinators, Clinical Care Managers and RNs on several different platforms. The organizations will post on their respective websites, and as well as other recruitment sites, such as Indeed, Monster, Social Services, Idealist, and the National Council for Community Behavioral Healthcare. The SCP BH CP Team will also use social media outlets (i.e., Facebook, Twitter, etc.) and other relevant sources such as the MA Association of Community Health Workers (training program) to attract and recruit personnel.

All the agencies have relationships with and a strong recruitment presence at area colleges and universities, including: Boston College, Boston University, Bridgewater State University, Cape Cod Community College, Eastern Nazarene, Lesley College, Simmons, Smith College, Stonehill College, Tufts University, Wheelock College, Cambridge College, Regis College, Rhode Island College, UMass Boston, and UMass Dartmouth. The CPs will host and attend job fairs and other networking events, and advertise employment opportunities on College and University websites. The agencies also offer internship, externship and practicum opportunities with many of the same colleges and training programs. The organizations also plan to recruit current and former students who have experience with FC, SSMH, and Gosnold. Direct mailings to providers, including nurses, social workers, mental health counselors, rehabilitation counselors, and SUD specialists and advertise in professional publications. In addition to these formal recruitment efforts, the SCP BH CP will use an informal network of contacts to identify potential candidates.

Both agencies will conduct Criminal Offender Records Information checks on all BH CP employees, as well as cross-reference the Inspector General's List of Excluded Individuals and Entities upon hiring and monthly thereafter, notifying EOHHS of any discovered exclusions.

Recruitment timeline:

- November 2017: Start advertising
- December 2017: Review applications, conduct screenings, and schedule interviews
- January – May, 2018: Interview and hire qualified candidates
- January – May, 2018: Conduct orientation and training
- June 1, 2018: New staff will be ready to support members

Please see Attachment 7.3 E-3 for detailed job descriptions.

4. Recruitment from cultural and linguistic communities we intend to serve

The SCP BH CP agencies already will continue to post on culturally and ethnically diverse websites and professional organizations, including: Asian American Civic Association, QARI-Quincy Asian Resource Institute, Workplace Diversity.com, El Mundo-Hispanic newspaper in Boston, Elmundoboston.com, Spanish Cultural Association in Boston, National Association of Asian American Professionals, Sampan.org (newspaper and website published by the Asian American Civic Association), National Association of Puerto Rican Hispanic Social Workers, O Jornal-Portuguese/English newspaper in Fall River and New Bedford, Hispanic American Chamber, MAPS-Alliance of Portuguese speakers, Portuguese American Association of

Falmouth, and Portuguese American Journal. The Team will also conduct community outreach with MRC. Lastly, the SCP BH CP Team will highlight its interest in culturally and linguistically diverse candidates in the job postings at colleges and universities. SSMH currently have staff fluent in Mandarin, Cantonese and Malay. The Team will also offer "sign on" bonuses for specific hard-to-recruit positions.

4. Proposed Training, Orientation Plans and Modules for Staff

The SCP BH CP will develop a joint staff training module for newly hired BH CP program staff. All new will attend the SCP BH CP training and be reimbursed for their time through DSRIP funds. The BH CP will provide Care Coordinators, Clinical Care Managers and RNs training through both Live and Online training methods. All BH CP staff will have full access to and are required to complete courses through the Relias Learning online learning management system. Relias Learning is the leader in online training and personnel training record keeping in mental and behavioral health offering over 700 courses online in addition to SCP's customized courses.

Orientation training will include:

1. Two-part Privacy and HIPAA training (live and online)
    a. HIPAA
    b. Review SCP BH CP policies, depending upon the hiring agency
2. Workplace Safety
    a. Live training orientation with safety booklet
    b. Review SCP BH CP off-site safety procedures
3. Compliance and Quality of Care/SSMH Policies (live and online)
    a. Conflicts of interest
    b. Documentation

First 90 days training will utilize the following resources: a supervisor orientation, live training in conjunction with Relias Learning, SAMHSA integrated materials (print, online and webinars), and documentation of compliance for training completion within Relias. Training will cover:

1. Integration model, values in care delivery, collaboration, program: overview, elements, and goals, care planning, and training requirements
2. Population served including training on: BH, SMI, and SUDs
3. Care Coordinator role. Including; Support/Strengthen linkages, coordinating services, crisis intervention, Navigating BH systems, Outreach & Engagement, NASW Case Mgmt. Standards, other contract requirements
4. RNs will get training in medication reconciliation and working in care planning teams.
5. Program Workflow & Expectations:
    a. Communication/Supervision requirements, Training requirements including attending EOHHS or designate provided training, Rounds/Monthly Team Mtgs.
    b. Documentation
    c. Technology
6. Training Completion on following topics:
    a. Cultural Competency
    b. Accessibility/Accommodations
    c. Individual Living/Recovery Principles
    d. Access to care/systems/BH LTSS
    e. Motivational Interviewing

f. Trauma-Informed Care
g. Health and wellness, including health risk factors of: smoking, inadequate nutrition and exercise, and addressing homelessness
h. Medication Reconciliation
i. Assessment and Treatment Planning, and Person-Centered approach
j. Co-morbid medical issues and impact on population served
k. Social determinants such as stable housing, food, social networks

Ongoing training will be conducted by the Program Managers through:

- Individual supervision
- Monthly team meetings and trainings
- Access to monthly clinical trainings (delivered by SSMH both Live and online), and
- Access to all current training resources like in-house, specialty consultations, safety training, CPR/First Aid, and all Relias Learning courses.

Specific examples include best practices in Integrated Care and Evidenced-Based Practice.

6. Staff Retention Strategy.

The SCP BH CP Team will value highly staff commitment. SSMH sponsors an in-house referral bonus program, as well as sign-on and retention bonuses for specific positions. SSMH is one of a few hundred organizations in the country with an American Psychology Association accredited training program, which allows psychologists the opportunity to serve as clinical supervisors for psychology interns. SSMH also offers a social work internship, providing supervision opportunities for many senior level social work staff. This supervisory role allows participating clinicians to remain in their current fields with a broadened scope of work. SSMH provides for vertical advancement based on skill sets and certifications, and horizontal based opportunities for special projects. Furthermore, SSMH strives to promote from within the organization by posting all positions for a minimum of seven days and interviewing qualified internal staff before filling positions externally. In recognition of our employees' dedication and commitment, SSMH established corporate engagement programs, including the annual service awards and the "celebration of staff." SSMH has also developed a multi-pronged approach to staff communication, which includes weekly Senior Management meetings, monthly Management Meetings, electronic CEO updates, as well as establishing a Diversity Committee and a Safety Committee available to all staff.

7.3.E.1 ORGANIZATIONAL CHART

Please see updated staffing model in BH Attachment A.

7.3.E.3 JOB DESCRIPTIONS

The title of the Vice President of Integrated Care has changed to Director of Integrated Care; the responsibilities are the same. Other job descriptions in the attachments to the original Participation Plan remain unchanged.

7.3.F Implementation Plan and Timeline

Please refer to BH Attachment A.

7.3.G Budget Report and Budget Narrative

Please refer to BH Attachment A.

7.3.H Sustainability

During the initial contract term, the SCP LLC and its Affiliated Partner, FC, will work to demonstrate our ongoing value and cost savings benefit. The LLC BH CP Team will also work to ensure that gaps in care do not occur, especially after high intensive levels of care, such as hospitalizations or emergency department visits. Market economics and quality care will assure the sustainability the LLC BH CP program model. After the contract term, SCP LLC, through its contracted agencies, intends to continue providing care management and coordination services. The LLC will maintain its existing relationships will affiliates and consider adding new affiliates depending upon service demand. In particular, the LLC would add affiliates if there is a greater number of Enrollees by geographic location, specific diagnosis, or existing affiliate capacity.

Care management and care coordination have demonstrated success in improving client satisfaction and engagement in integrative care while reducing total medical expenses for clients with co-morbid physical and behavioral health illnesses. The actuarial company Milliman found that the existence of a comorbid psychiatric illness among individuals with chronic illness resulted in an average cost of **$505 more per month** for healthcare. They summarized: *"If a 10% reduction can be made in the excess healthcare costs of patients with comorbid psychiatric disorders via an effective integrated medical-behavioral healthcare program, $5.4 million of healthcare savings could be achieved for each group of 100,000 insured members...the cost of doing nothing may exceed $300 billion per year in the United States."*[1]

Recognizing these potential cost savings of this magnitude will incentivize ACOs to continue contracting with BH CPs at the end of the five-year contract. Greene et. al. (2008) reviewed the impact of behaviorally based care-management programs addressing both chronic illnesses and comorbid psychiatric disorders on a Medicaid population. They found the program expense in addressing patients with comorbid psychiatric illnesses resulted in healthcare savings in excess of 12 times the program cost.

During the initial contract term, the LLC BH CP Team will maintain and expand existing community and healthcare system collaborations and partnerships. At the end of this term, these relationships will be well-established, thereby forging a pathway for long-term engagements aimed at sustaining care coordination service, even in the absence of the BH CP structure. Following the initial contract period, the LLC BH CP and its Affiliated Partner will continue collaborating around care management and coordination activities, given the shared activities and operational structures that will be increasingly well-established throughout the contract term. The LLC BH CP Team will also continue using the established Enrollee Assessment Tool and Basic Needs Identification Form for engaging future clients around care coordination.

Working through the SCP LLC, SSMH and Gosnold with FC as their partner will also identify strategies for securing and supplementing existing internal resources in order to transition BH CP staff to permanent agency positions and also to seamlessly continue providing care management and coordination services to the target high needs population. Each agency will seek outside philanthropic and major donor funding to continue many of the BH CP care management and coordination activities. Currently, SSMH has two major funds, the Linburn Fund and the

[1] *Melek, 2008*

Shulman Fund, currently worth over $150k. Both agencies also have individual giving programs, public and private grant funding, as well as federal, state, and local operating grants. SSMH's existing and developing ACO relationships will allow for additional cost savings opportunities. Lastly, partnerships with community resources and advocacy organizations, such as NAMI, may create opportunities for legislative appropriations through ongoing advocacy, with groups such as the Association for Behavioral Health.

Following the contract period, shared IT capacity will remain intact, after significantly maturing during the contract period. The LLC BH CP Team will continue to use the Care Management Platform, purchased with initial DSRIP capacity building funding, after the contract period. DSRIP funding will also help to establish a sustainable IT infrastructure to support ongoing BH CP supports and activities. Additionally, SSMH will have a strong working relationship with IT Care Management Platform partner(s) by the end of the contract period. Ongoing use of the Care Management Platform will continue to allow for better outcomes and foster measurement of efficiencies, including identify potential cost savings opportunities.

Lastly, as described above, the initial DSRIP funding will also be invested in developing and implementing robust, comprehensive training programs designed to train and orient new care managers and coordinators to a broad array of topics, including areas such as the rationale and structure of MassHealth reform, philosophy of care management, and the role of care management in attaining strengthened access, outcomes and cost. Training will also include administrative requirements such as data input, reporting, use of IT solutions, care management development and tracking. The LLC BH CP Team will continue to use these training modules after the contract period as a means for instilling in new staff an understanding of the value and role that care management and coordination serves in meeting the care needs of high service needs clients.

7.3.I Quality Management and Performance Monitoring

1. Quality Improvement Program

SSMH and Gosnold have formal processes in place to respond to complaints about quality of care, compliance issues, potential privacy breaches, electronic security concerns, and billing issues. Complaints may be made by filing an incident report or anonymously reporting to a Hotline. Both agencies have processes in place for independent internal audits of any clinical program or process as well as business process, which may involve analysis of data from several sources to create an accurate and actionable view of the issue being investigated. When indicated, these processes produce recommendations and/or Corrective Action Plans. Both agencies also have systemic mechanisms for Security Risk Assessment and Consumer/Patient Satisfaction. These commonalities strengthen the SCP LLC and its operations. Each organization has its own teams and committees to further support this Contract:

- The Quality Assurance Committee (SSMH) focuses on client-specific issues related to incidents, complaints, and human rights. The Committee reviews incident and investigative reports, developing corrective action plans when needed.
- Administrative QM Team/Programmatic QM Teams (Gosnold) oversee QM activities.
- The Risk Management Team (SSMH) focuses on clinical risk, providing staff consultations and recommending treatment plan modifications to reduce risk and improve quality of care.
- The Safety Committee (SSMH and Gosnold), conducts regular Safety Assessments of all sites, reviews findings, and uses data to drive improvements.
- The Human Rights Committee (SSMH) includes consumers, family members, and the public.

The SPC BH CP's QM function will incorporate programmatic, QM, compliance, information technology, and managerial strengths of SSMH, Gosnold, and FC into a planned, systemic Quality Management Plan designed to address the key accountabilities associated with the BH CP Contract. The LQMT is the central structure for BH CP QM activities. Together, using a consensus-building process, the SCP BH CP will develop a standardized recurring agenda to guide monthly LQMT meetings. Minutes and associated reports will flow from the LQMT up to the Management Committee, reporting to SCP's Board of Directors.

The following positions comprise the LQMT:

- Director of Quality Management and Compliance Officer (Elizabeth Folcarelli, Gosnold)
- Medical Director, (Richard Reiner, SSMH)
- Director of Care Coordination (Alberta Anderson, Gosnold)
- Director of Information Technology (Shawn Fernandes, SSMH)
- SCP BH CP Hub Clinical Leadership (SSMH, Gosnold, FC)
- Quality Management Staff (SSMH, Gosnold, FC)
- IT Staff (SSMH, Gosnold, FC)
- Contract Management Staff (SSMH, Gosnold, FC)

The Quality Management Plan will rely on the Care Management Platform purchased by SCP to produce performance data. Performance data will reflect BH CP processes pertaining to Engaged Enrollee, Management/Governance, and Contract Accountabilities.

Engaged Enrollee Accountabilities

i. Monthly, the number of clients with an Outreach Activity within 30 days of Assignment
ii. Monthly, the number of clients who need materials in language other than English
iii. Monthly, the number of clients for whom face-to-face contact attempted
iv. Monthly, the number of clients for whom face-to-face completed/total Assigned clients
v. Monthly, the number of signed participation forms/total population
vi. Monthly, the number of Comprehensive Assessments* completed and not completed within 90 days of Assignment
vii. Monthly, the number of PCTPs* completed and not completed within three months of Assignment
viii. Monthly, among completed PCTPs, the number communicated to Parties who need the PCTP
ix. Monthly, the number of PCTPs updated in accordance with 180-day requirement
x. Monthly, the number of Engaged Enrollees with a Health/Wellness activity in their PCTP who had a Health/Wellness activity

**Assessments and PCTP must have all required signatures to satisfy criteria. The selected Care Management Platform will capture signature requirements in order to identify issues associated with engaging the Enrollee's PCP and other supports, as appropriate.*

Governance/Management Accountabilities

i. Develop and execute a plan to cultivate and sustain relationships with ACOs, MCOs, and State Agencies (e.g., DCF, DMH, DDS, DPH, MRC, and others)
ii. Monthly, review service, operational, and financial performance vis-à-vis Service Dashboard (see Client Accountabilities above), LQMT Minutes, and Financial Reports.

Contract Accountabilities

i. Report "receipt" of Assigned Enrollees within one business day
ii. Identify/involve members of the Engaged Enrollee's Care Team to include the following:
    a. Engaged Enrollee's PCP/Designate
    b. Clinical Care Manager
    c. Care Coordinator
    d. Behavioral Health Clinician, and as appropriate
        i. Family
        ii. Specialists and LTSS Services
        iii. Informal Caregivers
        iv. Advocates; and,
        v. State Agencies
iii. Monthly, identify the following that occurred for Engaged Enrollees who experienced a Transition Event:
    a. Involved in Discharge Planning in cases of hospitalization
    b. Updated Treatment Plan
    c. Coordinated Clinical and Support Services, as indicated
    d. Communicated information to existing/new Provider, as indicated
    e. Updated the ACO/MCO

f. Facilitated a "Warm Handoff" including any direct assistance as needed (e.g., transportation), as indicated.

iv. Monthly, identify the number new PCTPs with the following:
   a. Identified Community, Social, and/or Flexible Services Needs
   b. Identified State Agency Involvement
   c. Identified LTSS Involvement
   d. Identified CBFS Involvement

v. Monthly, among population of Engaged Enrollees with an identified community, social, and/or flexible services need, the number of who had a community, social, and/or flexible services activity.

The SCP BH CP Quality Management Plan also includes mechanisms for policy development to ensure SSMH, Gosnold, and FC follow standardized processes across the five designated Hubs in Falmouth, Hyannis, North Dartmouth, Plymouth, and Stoughton. While each organization assumes Hub leadership at designated sites, together these organizations shall develop and follow standardized protocols, data collection and reporting systems, and performance improvement initiatives. Protocols will prepare the SCP for the following:

- Contract Readiness Review
- BH CP Staffing
- Critical Incident Reporting
- Orientation and Training
- Contract Compliance
- Continuity of Operations; and,
- Protections for Assigned and Engaged Enrollees to include but not limited to the following:
  - Grievance Procedures
  - Culturally and Linguistically Competent Service Provision
  - Client Rights; and,
  - Privacy and Confidentiality

In addition to promoting compliance with Enrollee, Governance, and Contract Accountabilities, the LQMT will be responsible for facilitating completion of the Member Status Report, Quality Measures Report, Other Reports, and at least one specific Quality Improvement Initiative as specified in Attachment A: Model Contract. Since Care Coordination and Management functions are inextricably tied to the success of the BH CP program and contract, it is likely that SSMH, Gosnold, and FC will focus on Care Coordination and Management, as described in Section 2.8(B)(5) of Attachment A: Model Contract, as the SCP BH CP's first Quality Improvement Initiative. Particular *Engaged Enrollee Accountabilities* and *Contract Accountabilities* conveyed earlier in this section will provide good data sources for this Quality Improvement Initiative. SSMH, Gosnold, and FC plan to use the Budget Preparation Period to develop the aforementioned QM protocols and systems. Procuring a Care Management Platform to sufficiently capture and report the metrics described in the SCP BH CP's Quality Management Plan will be a critical first step. The incremental steps are described in Attachment 7.3 F, Implementation Plan and Timeline.

7.3.J Coordination with ACOs and MCOs

1. Communication with potential ACOs and MCOs

The SCP BH CP will build upon existing agency relationships to establish partnerships with ACOs and MCOs. SSMH has existing affiliations with numerous ACOs. SSMH and Gosnold have significant experience with MCOs APM and performance-based contracts. Collectively, the agencies have extensive experience serving the target population throught Southeast region. The BH CP believes ACOs and MCOs seek accountable, collaborative, and responsive partnerships with providers who have proven professionalism and attention to high quality services. SSMH reflects these qualities in its longstanding contractual relationships with all Medicaid MCOs for the provision of a full continuum of BH services in the Quincy services areas. In addition, SSMH's Care Management programs - CSP, Here-for-You, and REACH - serve as great models for the BH CP initiative. Similarly, Gosnold has performance-based contracts with BCBSMA and UBH/Optum's Achievements in Clinical Excellence Program. Gosnold ranks at the highest (Platinum) performance level in the UBH/Optum rating continuum. FC also holds numerous MCO contracts as part of its outpatient services. Through these partnerships, the SCP BH CP Team offers a full continuum of inpatient, emergency services, partial, community-support, PACT, CBFS and other mental health and addiction recovery services. Together, the agencies touch nearly all parts of the Commonwealth's public BH system.

Relative to service innovation, SSMH and Gosnold engage regularly with MCOs on varied pilot projects. In 2005 to 2007, MBHP funded a pilot project with UMass Medical to facilitate integrated care between Manet Community Health Center and SSMH. In addition, Beacon Options engaged with SSMH on a pilot program waiving outpatient authorizations, granting SSMH the capacity to manage outpatient utilization. Beacon Options has a similar relationship with Gosnold. Additionally, Beacon Options is working with Gosnold on a new innovation examining particular clinical (outpatient) outcomes using Polaris instrumentation.

Proven performance with ACOs and managing operations across multiple integrated settings are also important SCP competencies. SSMH has engaged with multiple hospital systems and associated PCPs to provide integrated services and embedded mental health clinicians. In addition, SSMH has strong working relationships with several potential ACOs in the Quincy service areas, and is currently engaged with Steward Health Care Systems primary care practices in Quincy, Dorchester, New Bedford, Fall River, Wareham, and Brockton. In conjunction with Steward's Hawthorn Medical in North Dartmouth, SSMH offers capacity for co-located services in the primary care practice, including screening, diagnostic evaluation, short-term treatment and referral, medication management, and psychopharmacological consultation to the primary care providers. Both SSMH and Gosnold manage service coordination through a contract with Quartet Inc., a software company that provides a communication platform between primary care practices and BH providers. Using Quartet, SSMH provides preferred access, real time communication and coordination between PCPs and SSMH's Quincy and Wareham clinics. Physicians initiate service requests through Quartet, which connect directly with SSMH clinicians, who then respond directly to physician requests at intake and provide treatment and care coordination updates on a regular basis. All clients are administered outcome instruments on admission and at six months that include the Patient Health Questionnaire-9 (PHQ9) for depression screening and the Alcohol Use Disorders Identification Test (AUDIT) for SUD.

Gosnold also has experience working collaboratively in hospital systems by embedding Care Navigators in EDs to assess and respond to continuing care needs of individuals with SUD or co-occurring mental health and SUD. Now in EDs at South Shore, Falmouth, and Cape Cod Hospitals, Gosnold has provided more than 200 consultations and has been able to facilitate continued, community-based structured treatment for 62% of patients. Gosnold has integrated services in multiple Primary Care Practices in Plymouth, Hyannis, and Nantucket. The agency is presently pursuing a new strategic initiative with Cape Cod Health Center to co-locate medical services at Gosnold's Centerville Clinic.

2. Branding and Marketing Plans

The SCP BH CP will engage a hybrid branding and marketing strategy that builds upon the individual characteristics and well-established brand identities of each agency. The SCP's strength draws from its capacity to collaborate and share resources across the Southeast Region, while dedicating knowledgeable and expert resources on a localized Service Area basis. ACOs and MCOs will be able to retain a "local feel" with the SCP, even though the SCP offers region-wide services. Marketing for BH CP services will be integrated into each agency's existing marketing strategies and materials, leveraging existing arrangements, referral sources and communication channels. The SCP itself will not conduct specific branding or marketing.

3. Collaboration with Multiple ACOs and MCOs

SSMH will be joining Steward Health Care System's ACO Referral Circle, building upon the existing partnership. As a BH CP, the collaboration with Steward would facilitate referrals, access, service coordination, and service delivery. SSMH is in final negotiations with Signature Health System to embed staff. SSMH currently has clinicians embedded in SSH's ED, which is included in the BMC ACO, to facilitate assessment, coordination and engagement of presenting patients. SSMH also provides co-located clinical and care management services at Manet clinics. This experience with Manet in attributing Medicaid clients for care management is transferrable to the BH CP. SSMH also intends to contract with Tufts Health Public Plan, which is the ACO for BID health system.

The SCP BH CP Team plans to build upon existing relationships, strengthen existing programs well underway with ACOs and MCOs, and maintain excellent communication and performance. Engagement and collaboration with ACOs and MCOs will be coordinated via the Management Team with input from the Community Advisory Committee. Service coordination is in place with many ACOs through existing clinical and care management relationships with PCPs, hospitals, EDs, and administrators. The SCP BH CP Team will further develop these referral relationships, care coordination and clinical pathways through the evolving community and health system partnerships.

4. Conflict Resolution with MCO or ACO.

Conflict resolution with the ACOs and MCOs will be addressed internally through Management Committee, with input from Consumer Advisory Committee, as appropriate. SCP's Board of Directors will address any such conflicts deemed highly serious. The CEO or his designate will remediate significant issues with ACOs and MCOs.

Community Partner Program Budget Report

South Shore Mental Health Center, Inc.

Program Revenue	Prep Budget Period	Budget Year 1	Budget Year 2	Budget Year 3	Budget Year 4	Budget Year 5	Total Revenues

Ramp-up costs in Prep Budget Period, Budget Year 1, 2 and 3 can be covered by Infrastructure Funding

Community Partner Program Budget Report - Prep Budget Period

Only complete this Program Budget Narrative using amounts anticipated for PBP.

Lines may be added to the Program Budget Narrative tables as necessary

Row 1 - Salary

Position	Annual Salary	FTEs	# Months	Total
Director of Integration	$ 90,000.00	0.5	7	$ 26,250
Program Director	$ 80,000.00	1	3	$ 20,000
Medical Director	$ 200,000.00	0.1	1	$ 1,667
RN (hired March)	$ 76,000.00	1	3	$ 19,000
RN (hired May)	$ 76,000.00	1	1	$ 6,333
LPN	$ 54,000.00	1	1	$ 4,500
Clinical Care Manager (LICSW/LMHC)	$ 68,000.00	1	2	$ 11,333
Care Coordinator	$ 43,000.00	9	1	$ 32,250
Recovery Coach/Peer Specialist	$ 35,000.00	1	1	$ 2,917
Administrative Assistant	$ 32,000.00	1	1	$ 2,667
				$ -
Total Salary (Program Budget Line 1)		**16.6**		**$ 126,917**

Row 2 - Fringe

Fringe Item	Total Salary	Fringe Rate	Fringe
Fringe Item	$ 126,917	20%	$ 25,383
Total Fringe (Program Budget Line 2)			**$ 25,383**

Total Personnel*	**$ 152,300**

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:

Director of Integration will oversee community partners program, including contracting, program operations, marketing, and finance.

Program Director will assume administrative responsibility for meeting staffing, programmatic, financial, regulatory and contractual requirements.

Medical Director will provide consultation to nurses and treatment team, as well as to PCP.

Registered Nurses will provide medication reconciliation, assessment and treatment planning, PCP coordination and health education.

Licensed Practical Nurses will provide care coordination with medically complex cases, medication reconciliation and coordination with medical providers.

Clinical Care Managers will approve comprehensive assessment, and provide treatment planning and treatment plan review, clinical supervision and oversight of the clinical team.

Care Coordinators will provide outreach, engagement, assessment, treatment planning, recovery navigation, care transitions, crisis planning and health and wellness coaching.

Recovery Coaches/ Peer Specialists will provide care coordination for substance use disorders, including access to support services, and care transitions.

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Total Training and Professional Development (Program Budget Line 3)			

Provide a description of each Training and Professional Development line item included in the table above:

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
Planning, Implementation, and Operations Committee				$ 1,728.00
				$ -
				$ -
				$ -
			Total Mileage	$ 1,728.00

Travel Expense Description	Cost
Total Mileage	$ 1,728.00
Parking and tolls	
Public transportation	
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ 1,728.00**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

The Planning, Implementation, and Operations Committee is comprised of the leadership team of the CP, from both Spectrum and SSMH. The Committee includes the Director of Integration (whose compensation is not countedin the CP

Leadership Team line item for Operational Staffing, as it is already included in the program budget, but whose mileage is counted here). The CP Leadership Team meets regularly for coordination between SSMH and Spectrum, and will drive strategy, monitor progress, and ensure clear communication throughout the CP. The committee's meeting location will alternate between Worcester and Quincy, so that each time an average of 3 people (half of the committee) will be commuting there.

Mileage for the Planning, Implementation, and Operation Committee is based on an average of 3 people commuting 100 miles round trip between Quincy and Worcester, twice per month for seven months, at a mileage reimbursement rate of $.48 per mile.

3 people * 100 miles per trip * 2 trips per month * 7 months * $.48 per mile = $2,016.

Row 5 - Equipment

Description of Equipment	Unit Cost or Cost/FTE	#units or FTEs	Cost
Total Equipment (Program Budget Line 5)			

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost
Supplies			$ 1,000.00
Total Supplies (Program Budget Line 6)			

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

By June 1, 2018, a total of 18 staff will be hired. Roughly $1,000 is budgeted to cover all office essentials, i.e. copying/printing paper, legal pads, pens, etc.

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
Total Software Licensing (Program Budget Line 8)			

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
Ring Central Subscription	11	28	$ 304
iPhone Plan	50	26	$ 1,305
MiFi Device	35	26	$ 914
Total Telecommunications (Program Budget Line 9)			**$ 2,523**

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

RingCentral is a cloud-based communications and collaboration tool that allows the Clinical Care Managers, Care Coordinators and Recovery Specialists to bring a client and other care team members into conference by phone or video. This is also the primary telecommunications tool for SSMH.

iPhone plans provide staff with full accessibility, allowing them to continue supporting clients even while mobile.

The MiFi subscriptions for the iPads provide internet connectivity for staff at all times, facilitating their ability to have full and secure access to records and resources within clients' homes.

Together, these telecommunications tools provide enhanced mobility and flexibility, improving client experience and continuity of care.

All costs are estimated based on prices in existing contracts. Costs per service plan listed above are on a monthly basis. Number of service plans refer to number of FTE with plans multiplied by number of months these staff hold the plans.

The "# Service Plans" refers to the number of per-staff per-month payments (and the cost per service plan refers to the monthly amount). For example, the .5 FTE Director of Integration will work for seven months during the PBP (November – May), and thus has 3.5 (7 *.5) 'service plans' attached.

	A	B	C	D	E	F
229	**Position**	**FTEs**	**# Months**	**Number of RingCentral Subscription Monthly Payments**	**Number of MiFi Subscriptions & iPhone Plan Monthly Payments**

245	**Total**	**18**		**28**	**26**	

246 * Administrative Assistant and Help Desk - Tier 1 will have RingCentral subscriptions, but not MiFi subscriptions or iPhone plans.

247

248 **Row 10 - Occupancy**

249	Occupancy Expense	Total SqFt	Cost/SqFT	Cost
250	Rent	600	2.08	$ 1,250
251	Utilities	600	0.21	$ 125
252	Repair and Maintenance	600	0.10	$ 63
253				$ -
254				$ -
255	**Total Occupancy (Program Budget Line 10)**			**$ 1,438**

256

257 ***Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:***

260 The occupancy costs will cover 2 locations, serving as hubs and housing the workspaces for staff when they are in the office.

263 Costs were calculated for one month, as the CP will begin leasing the spaces in May 2018, thus for one month of the PBP. Annual costs per square foot would be 12 times what is shown above, i.e. $25/ sq ft for rent.

266 The amounts for Utilities, and Repair and Maintenance (including Janitorial Services) were calculated as a proportion of rent, using comparable existing programs as a basis for calculation.

Row 11 - Other

Other Direct Expense Description	Cost
	$ -
Total Other (Program Budget Line 11)	**$ -**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 12)	**15.00%**	**$ 23,848.00**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

For the CP budgets, we adopted 15% administrative overhead rate, which is the lesser between our actual rate and the maximum allowed rate per CP budget guidance.

Community Partner Infrastructure Budget Report - Technology - Prep Budget Period

Only complete this Infrastructure Budget Narrative using amounts anticipated for PBP.

Lines may be added to the Infrastructure Budget Narrative tables as necessary

Row 1 - IT Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Project Mgr/ System Administrator	$ 80,000.00	0.5	5	$ 16,667
Help Desk - Tier 1	$ 55,000.00	0.5	1	$ 2,263
IT Contractor (salary reflects full-time at contract rate of $50/hr); fringe excluded for this position)	$ 100,000.00	0.1	3	$ 2,500
	Total Salary			$ 21,429
	Fringe rate	20.0%	Total Fringe	$ 3,786
			Total IT Staffing including Fringe (Infrastructure Budget Line 1)	**$ 25,215**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

IT Project Mgr/System Administrator will lead efforts on design, configuration and implementation of the Care Manager solution. They will be responsible for the development of standard operating procedures and implementing workflows. By leading the design and optimization of the system, they will maximize its value to clinical staff in their work to serve our clients.

The Help Desk position will provide Tier 1 technology support to program staff, including for their use of the Care Management Platform, enabling them to maximize the value provided to clients.

The IT Contractor will perform the laptop and iPad builds and iPhone provisioning (MDM enrollment) for program staff, ensuring that they are ready to provide services for our enrollees.

Row 2 - Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
CMP Development & Implementation	$ 90,000.00
Total Development and Adaptation of EHR and Care Management System (Infrastructure Budget Line 2)	$ 90,000.00

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

The Care Management Platform will assist in identifying client needs thereby promoting greater engagement. The solution will also enable the electronic transmission of clinical and care information between provider systems and include numerous other interoperability features. Patients can communicate with staff through a patient portal, which will facilitate the patients providing information and documentation to their care team in a timely manner and via a secure path. All of these features will enable staff to provide integrated, client-centric care in a highly effective manner.

Costs were estimated through ongoing discussions with Care Management System vendors. This cost estimate is 50% of the total

Row 3 - Technology for Service Delivery

Description of Expense	Cost
Laptops	$ 12,608
Mobile toolkit (iPad, mobile printer, keyboard and Bluetooth)	$ 15,400

	A	B	C	D	E	F	G
63	**Total Technology for Service Delivery**	**$ 28,008.00**					
64	**(Infrastructure Budget Line 3)**						
65							
66	***Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's***						
67	***contract and how the costs were determined:***						
68							
69	iPads, mobile printers , and iPad keyboard and Bluetooth setups allow our clinical staff to be 100% mobile for full service						
70	delivery on the go. Laptops will be purchased for supervisory staff (nurses and clinical care managers will have both laptops and						
71	mobile toolkits), as well as office-based staff (Admin Assistant and IT staff who will only receive laptops).						
72							
73	Laptop, including 4 years of hardware coverage ($1553 each) + Microsoft Office license ($76) + Laptop bag ($30 each) = $1,659						
74	each $1,659 * 7.6 = $12,608						
	iPad ($500 each) + Mobile printer ($400 each) + iPad keyboard + bluetooth ($200) = $1,100 each						
	$1,100 * 14 = $15,400						
75	Laptops will be purchased for the below newly hired positions in both the Program Budget and the Infrastructure Budget. For						
76	fractional FTE's, the staff person will be allocated between this program and other program(s), and so the costs of their						
77	technology will be allocated proportionally. Mobile toolkits willl purchased only for clinical staff.						
78

138	**Total Workforce Development Staffing including Fringe**				**$ 37,497**		
139	**(Infrastructure Budget Line 5)**						
140							
141	***For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting***						
142	***the terms of the CP's contract:***						
143							
144	The Director of Recruitment will drive the job posting and advertising functions, including attending job fairs, etc, and will also						
145	take part in the review, screening, and hiring of candidates. The Recruiters and HR Coordinator will perform all functions related						
	to reviewing, screening, and hiring candidates. Together these staff will ensure that our programs are fully staffed with top						
	employees, who will provide excellent care to our clients.						
146	The Payroll Manager will complete all set-up processes required in both internal and external payroll systems. The Director of						
	Benefits will complete all required processes pertaining to new employees' benefits, including health insurance and retirement						
	accounts. The Standard Credentialing staff will communciate with new employees and vendors regarding new employees'						
147	credentialing; gather all relevant documentation and resolve any inconsistencies therein; and enter all information in appropriate						
	systems. The Advanced Credentialing staff will determine privileges as appropriate for incoming employees. Together these staff						
	will ensure that all new hires are smoothly and effectively on-boarded so that they can work to serve our clients without						
148	disruption.						

The Director of Training will research and develop training materials and train newly hired staff. The Training Assistant will perform all logistical work required for trainings, including compilation of training materials, room set-up, and e-learning license registration. Together these staff will ensure that all staff serving our clients are fully trained and ready to provide our clients with high-quality care.

The positions listed do represent allocations of actual resources. Of all positions listed, only training curriculum development (part of the Director of Training's responsibility) will be a centralized function performed by SSMH. Thus, part of the funding for the Director of Training is allocated 100% to SSMH, and part of this position's funding, as well as all of the funding for all remaining positions ,is allocated based on the estimated number of engaged clients among Gosnold, SSMH and FCP (i.e. SSMH and Spectrum will do their own recruitment, hiring, training of staff, etc.)

Row 6 - Recruitment Expenses

Description of Expense	Cost
Advertising	$ 5,100.00
Referral & Signing Bonuses	$ 2,882.00
SORI Checks	$ 882.00
Badges & Payroll System Set-up	$ 3,705.00
Total Recruitment Expenses (Infrastructure Budget Line 6)	**$ 12,569.00**

Provide a description of each recruitment expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Advertising entails sponsorships on sites such as Glassdoor and Indeed, use of Open Hire and various recruiting websites, postings at local universities and newspapers, and attendance at job fairs. Costs were estimated based on existing job advertising expenses. We are planning that during the PBP, we will spend $1500 on sponsoring a page at Glassdoor, $1400 for an Indeed sponsorship, $600 for OpenHire, $100 for college/university postings, $750 for advertisements in local papers and print advertisements, $250 for advertising on other websites, and $500 at job fairs. In some cases, one advertisement may be used for positions in multiple programs (for example in different CP contracts). In these cases, the costs listed reflect a proportional allocation of the total estimated cost.

Referral bonuses are bonuses given to current employees who refer successful candidates for hire. Costs were estimated based on typical percentages of new hires who are hired through referrals. Referral bonuses are $250 each; we have estimated that 1/5 of

new hires will be through referrals. Costs were determined based on 17.6 FTE's of new hires during the PBP (all program positions, with the addition of Project Mgr/ System Admin and Help Desk). Signing bonuses are bonuses given to RN's who are hired, and are calculated based on the anticipated number of newly hired RN's. Signing bonuses are for RN's (2 to be hired during the PBP), and are $1000 for each RN.

SORI checks are checks as to whether a job candidate has a record of Sex Offense convictions. Costs are estimated based on the number of employees that will be hired.

Together these expenses will ensure that our program is staffed with highly qualified employees who will provide our clients with excellent care.

The creation of organization badges and payroll system set-up fees (paid to external payroll system vendors) ensure that newly

Row 7 - Training Expenses

Description of Expense	Cost
Supplies (including food) for Orientation	$ 494.00
E-Learning Licenses & Training Supplies	$ 1,164.00
Total Training Expenses (Infrastructure Budget Line 7)	**$ 1,658.00**

Provide a description of each training expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Supplies for Orientation include printed materials and food served to new employees during Orientation. E-Learning Licenses allow new employees to access training located on our E-Learning system (an external system containing both internally and externally created training materials). Training supplies include the cost of printed training materials, as well as any other costs required for training. Together these expenditures will allow our new employees to be effectively on-boarded and trained.

Costs are determined based on existing Orientation and Training supply costs.

Row 8 - Retention Expenses

Description of Expense	Cost
Total Retention Expenses (Infrastructure Budget Line 8)	

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

268							

Provide a description of purpose for each office furniture expense listed in the table above, including how the costs were determined:

Office furniture will be procured to set up office hubs for the inital wave of staff hiring.

Total costs are based on estimated $900 per staff person (desk, chair, file cabinet) x 17.1FTE's of initial hires (new furniture is not being purchased for the Director of Integration). Furniture will be purchased for the below newly hired positions in both the Program Budget and the Infrastructure Budget. For fractional FTE's, the staff person will be allocated between this program and other program(s), and so the costs of their furniture will be allocated proportionally.

Position	FTEs	
Director of Integration		New furniture will not be purchased for the Director of Integration
Program Director	1	
Medical Director	0.1

This will help to ensure that our clients are receiving excellent services, and engage in continuous improvement measures to drive ever increasing quality of care.						
319							
320	The CP Leadership Team (annual salary listed is an average) will meet regularly for planning purposes and for coordination between SSMH and Spectrum. The CP Leadership Team will drive strategy, monitor progress, and ensure clear communication throughout the CP. The Director of Integration's time is not included here, as this position is included in the program budget.

335		
336	**Total Other Operational Expenses**	**$ 6,040.00**
337	**(Infrastructure Budget Line 13)**	

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Legal consultation is anticipated to address various contracting issues, whether with ACOs/MCOs and between partners, as well as any other legal consultation needs. No budgeted legal costs will be used to contract with EOHHS.

Marketing and branding expenditures will support the development of the first batch of materials that will be distributed to our attributed clients, to increase their awareness of our program. Costs were estimated as follows:
Brochures: $3,020 for brochures
Food gift card to incentivize Member participation – $5 x 140= $700
Direct mail campaign: $0.49 x 1,000 x 2 = $980

16	Ratio of Care Coordinator Supervision to Care Coordinators	2:19	*Total Care Coordinator FTEs divided by Total Care Coordination Supervision FTEs*

Please describe which Program staff listed in lines 2 through 8 above directly supervise Care Coordinator staff: The care coordinators will be supervised by the Clinical Care Managers (LPHA).

Section 7.3 Initial DSRIP Participation Plan

7.3.A Executive Summary

1. Goals, identified challenges related to the care delivery system and behavioral health, and proposed solutions to be effectuated through the CP program

SSMH and Spectrum have extensive history working within the existing BH system and have developed a number of strategies to mitigate the challenges inherent in the current culture and service delivery system. The current system creates care silos without the integration needed to maximize the potential of all clients facing the challenges of behavioral health and co-morbid medical issues. The SSMH-Spectrum BH CP will work to solidify already existing relationships with hospital systems, primary care practices and local FQHC to exchange information through a designated care management platform, use of the Mass Highway and other approaches. Care Coordinators will provide the vital link among the entire care delivery team, ensuring consistent communication among medical providers, thereby enhancing outcomes for Enrollees. Both SSMH and Spectrum have a history of co-location and integration. The BH CP Team will also seek to embed care managers in high volume practices to promote access and client engagement.

The SSMH-Spectrum BH CP will capitalize on its existing outreach programs to engage Assigned Enrollees in the process and objectives of care planning and coordination. Policies and procedures developed during the planning phases will provide a structured approach to engagement that involves the entire BH CP Team. Use of a shared care management platform will assist in identifying client needs thereby promoting greater engagement. In engaging clients, the BH CP will focus on the social determinants of health and on addressing the concrete needs that effect positive outcomes and challenge engagement, and on the ability to access appropriate health solutions will be a major focus. The Mass Highway will serve as a vehicle to transmit and receive essential information from the medical side of the service delivery system promoting increased communication and integration that has been lacking in the current system.

2. Number of Assigned and Engaged Enrollees intended to support under the Contract.

The BH CP will support a minimum of 1,000 clients, with the capacity to increase as necessary, within the Quincy Service Area of the Greater Boston Region who are high risk and high need with chronic medical and BH conditions, including SPMI, SUD, and those with co-occurring disorder. The BH CP will engage in targeted outreach strategies to address historically hard to reach clients and those facing numerous challenges relating to their social determinants of health. The BH CP model allows the opportunity to address the highest need and highest cost individuals through a comprehensive, wraparound approach to care that is individualized and organized in a way that decreases the impact of all arenas including access, poverty, homelessness and behavioral health factors while achieving better health outcomes.

3. Service Areas.

SSMH and Spectrum will operate in the Quincy Service Area within the Boston Region.

4. Plans to operationalize the CP program and time frames associated with implementing such activities.

During the five-month Preparation Budget Period, the BH CP will establish a Governing Body, the Consumer Advisory Board, and the QM Committee, as well as a Management Team. The Governing Body and the Management Team will use the Preparation Period to develop policies

and procedures, on which the CAB and QM Team will provide input. These committees will be essential in developing the program as well as continuing to ensure that the needs of Engaged Enrollees and the quality of the program are held to a high standard. The BH CP will establish a procedure to address all Enrollee grievances, as outlined in Section 2.4 H of the Model Contract. The BH CP will utilize the planning period to develop and execute a strategic plan with regard to workforce development and training. SSMH and Spectrum will address the current shortage of qualified staff through development of an internal training and recruitment program. Prior to operational start, staff will be recruited, hired and trained. BH CP leadership staff will be hired first, in order for them to help develop the program, engage in the hiring and training process and be fully integrated into the BH CP Team. During this period, the Management Team will engage in regular meetings with program managers in order to better understand existing services, such as CBFS, ESP and SA services. The Management Team will also begin community outreach to educate the community on the BH CP program. DSRIP funding will support start up and training of all program staff ensuring a smooth transition and appropriate development of expertise. In addition to recruitment and training, the BH CP will use the Preparation Period to ramp-up and build the IT infrastructure, including setting up mobile devices, implementing both the care management software and the data analytics systems. SSMH will provide comprehensive training as detailed in Section 7.3 E. The BH CP will provide trainings in a didactic format for all initial staff with annual trainings promoting continued staff development. The training modules will be videotaped and added to the Relias Learning System to establish a standardized package.

The BH CP will maintain and expand relationships with all contracting ACOs during the planning period. Conversations have already begun with several ACOs, including Boston Medical Center, Signature Health Systems, and Steward Health Systems, as well as their associated health systems, including South Shore Hospital (SSH), BID- Plymouth, and Brockton Hospital. Further, SSMH and Spectrum will maintain existing and foster new collaborative relationships with community-based organizations and state agencies in the service area. During the budget Preparation Period, a care management platform will be implemented, and the BH CP will establish a continuity of operational plans as well as develop a program evaluation based on data and quality indicators aimed at assessing strengths and weakness of the program, level of series delivered, and overall partner collaboration. During the DSRIP period all required documentation will be finalized and approved, including the assessment tool and treatment plans.

Year 1-5

- The Governing Body will meet regularly, and the CAB and QM Committees will meet quarterly. The CAB and QMC will make recommendations as needed for improvement.
- The BH CP Team will conduct regular trainings for new staff on topics such as engagement, documentation and community resources. In addition, staff will also be asked to participate in periodic trainings conducted by EOHHS or its designee, including trainings that cover various aspects of MassHealth payment reform, including ACOs and/or CPs initiatives.
- SSMH and Spectrum view community relationships and collaborations to be an essential component of the BH CP, and significant efforts will be taken to preserve these throughout.
- The BH CP will engage Enrollees using EBPs and community resources, while maintaining all paperwork as required by EOHHS.
- The BH CP will collect and analyze data to inform care management and coordination. Data will be shared with BH CP staff, which will undertake quality improvement as needed.

7.3.B Supporting Populations and Community Engagement

1. Community Connections

Over the years, SSMH and Spectrum have developed longstanding relationships with community and public agencies in the Quincy area, including strong partnerships with schools, social service providers, hospitals, health centers, and emergency responders, as well as the Quincy Mental Health and Drug Courts. Some of SSMH and Spectrum's community connections include:

Hospital- and health-center based connections:

- SSMH has a close relationship with SSH through our ESP team, and we are in the process of working with SSH to expand this relationship into other service areas.
- SSMH clinicians are working in Steward Medical Center's doctors' offices and in the ED.
- SSMH clinicians are embedded in BID-Milton ED and hospital as part of the Chart 2 grant. Spectrum also works closely with the staff at BID-Milton Hospital to manage appropriate referrals into beds, thereby reducing ED boarding times.
- SSMH has a close relationship with Arbour-Quincy, offering many services in the building where Arbour-Quincy operates a partial hospitalization program and an inpatient unit.
- Spectrum is working with Manet Community Health Center to utilize Manet's prevention counseling services within its walls and to provide methadone treatment when appropriate.
- SSMH and Spectrum are currently working with Fallon Ambulance and are exploring alternative destination transport.
- Spectrum's Project Turnabout currently uses Weymouth Primary Care, Allied Health Clinic, Stetson Dental, Weymouth Oral Surgeon, Family Dental, Family Vision and Eye Health.
- Spectrum also has active referral relationships from SSMC who utilize the various levels of care within the Spectrum System for patients who require addictions treatment services.
- Spectrum has had a long standing history of providing detox and addictions services for clients referred from all SSMH programs, most frequently the ESP team.

Housing connections:

- SSMH and Spectrum both maintain a collaborative relationship with Father Bill's Homeless Shelter, who provides shelter services for the Quincy area. SSMH and Father Bill's attend regular meetings together in which shared clients and resources are discussed, including discussions pertaining to hard to engage or locate clients. The collaborative relationship has enabled SSMH the opportunity and resources to meet with these clients within the shelter setting and engage with them through the outreach attempts. Spectrum refers clients to sober housing within the community and to the Father Bill's when appropriate.
- Through PACT and CBFS, SSMH has strong relationships with local housing authorities, such as the Metropolitan Boston Housing Partnership and the Quincy Housing Authority.

Law Enforcement connections:

- An SSMH clinician is embedded with Quincy Police as part of a jail diversion program.
- SSMH and the Milton and Randolph Police Departments as well as Fallon Ambulance are engaged in work groups aimed at better serving their shared populations.
- SSMH also engages in monthly forums with police around MH facilitated by NAMI.
- Through the ESP program, SSMH has developed positive working relationships with the Quincy District Court clinicians, Drug court staff and the Mental Health court staff.
- Spectrum has a longstanding relationship working with the Massachusetts drug courts, accepting referrals, providing service, and mandating feedback in appropriate cases.

Services to maintain a safe and healthy living environment:

- In 2016, SSMH's certified Mental Health First Aid USA Instructors trained nearly 200 parents, teachers, police department personnel and other community groups.

Physical activity and nutrition programs:

- As described above, Here-for-You provides clients with guidance and support on health and wellness topics related to diabetes, asthma, blood pressure, and body mass index.
- SSMH's CBFS includes a Healthy Mind/Healthy Body program in both its residential and community programs that look at all aspects of a client's life to address issues in many areas.
- SSMH's Discovery Day Treatment program provides participants with opportunities to participate in Expressive Art Therapy, a restorative therapy that immerses clients in creative activities. In 2016, SSMH's client artwork was displayed at the Massachusetts State House.
- SSMH and Spectrum use art therapy to encourage clients to build social connections, practice mindfulness, and express themselves more openly and honestly.
- The Discovery Day Treatment team also organized the 4th Annual Holiday Craft and Bake Sale fundraiser event, providing clients with an opportunity to sell their artwork and baked goods in a community forum and also to raise money for art supplies and a nutrition group.

Transition services from institutional settings:

- The CBFS and PACTs team both work with acute hospital settings, long-term hospitals and jails/prisons to successfully integrate people back into the community.
- SSMH works with Father Bill's to do a planned intake and put in place additional supports.

Collaborative relationships with state agencies:

- As described above, SSMH and Spectrum have longstanding partnerships with state agencies, including DMH, DPH, DCF, DYS, and BSAS.
- In 2010, the MA Rehabilitation Commission awarded the Distinguished Employer Award to SSMH in recognition of our "outstanding commitment of time, organization and business expertise resulting in successful employment opportunities for individuals with disabilities."

2. How we will grow connections to the community in the Service Areas.

SSMH and Spectrum are committed to fostering existing community partnerships as well as establishing new ones in an effort to improve our capacity to fulfill the BH CP contract. Both agencies seek to enhance client outcomes by increasing access to care coordination, while delivering cost-effective and non-duplicative services. The agencies will leverage the integrated system of care to create a coordinated alert system that identifies when an Enrollee is accessing the system at any point providing, an opportunity for immediate access for engagement. In addition to directly working with the client and family, SSMH and Spectrum focus on helping the family to build a network of support systems within the community. Along with social and mental health services, this network may include extended family, schools, health care providers, courts, other service providers, community groups, self-help groups, and religious groups.

3. Plans to ensure staff is informed of resources over the Contract Term.

All CP staff will be trained in all areas of BH and the available resources, ensuring a smooth and efficient referral process between partners for BH CP services and community resources. BH CP staff will receive a resource binder that serves a living document. The binder will be reviewed at trainings and staff meetings. Staff will be required to attend community meetings and trainings to remain informed on available services and supports. These meetings will also provide an opportunity for staff to share lessons learned as well as updates on newly available resources.

7.3.C Community Partner Supports and Activities

1. Outreach and Active Engagement

a. ***Planned strategies for outreaching to and engaging with Assigned Enrollees, including individuals who are homeless and hard to reach, within the timeframes in the Contract –***

Together, SSMH and Spectrum provide a full range of services and modalities that will allow the BH CP to offer a continuum of service options to their Engaged Enrollees and will provide increased opportunities for engaging Assigned Enrollees. SSMH's programs at the QMHC site include Community Support Program, Emergency Service Program, Here-for-You, Community Crisis Stabilization, Community Outpatient Services, Intensive Community Support (DMH Respite), PACT, CBFS, and Peer to Peer Program. Spectrum has inpatient and residential services in Weymouth and will be opening a clinic, which will include MAT also in Weymouth. These programs rely on strong community connections. Through the BH CP, SSMH and Spectrum will foster existing community collaboration to engage Assigned Enrollees and establish shared collaborations aimed at holistically serving SMI and SUD clients, who are often siloed. The BH CP structure will also provide a unique opportunity to engage dually diagnosed Assigned Enrollees and provide them with streamlined comprehensive care.

SSMH and Spectrum will conduct a range of outreach initiatives to engage Assigned Enrollees, including activities aimed at particularly vulnerable and hard to reach populations, such as homeless individuals with SMI and/or SUD. SSMH and Spectrum will work with our existing partners and forge new partnerships to in order to facilitate outreach activities in places where the Enrollee may feel comfortable and/or receive supports or services. These activities could take place in settings such as Father Bill's homeless shelters, community mental health centers, and medical facilities. SSMH will use our relationships with community providers in an effort to facilitate engagement of Assigned Enrollees. Our community partners can provide a "soft-hand off" in order to best facilitate engagement. SSMH staff are largely community-based and "meet the client where they are at," with the goal being to meet the client where they are comfortable outside of the traditional office-based mental health treatment center. In an effort to engage Assigned Enrollees, SSMH and Spectrum will also engage the Enrollee's natural supports and other community providers in a discussion about the BH CP service, including how it will support the Enrollee's recovery process as well as the BH CP's role in conjunction with the larger care team. The BH CP will work to create a shared understanding and clear expectations around the scope of BH CP services and provide this information verbally as well as in writing to Engaged Enrollees in multiple languages to support all learning styles.

SSMH will use our relationships with community providers in an effort to facilitate engagement of Assigned Enrollees. SSMH also hires and trains clinical staff with expertise in community centered engagement and support, which will further support engagement efforts. As described above, SSMH has an ongoing partnership with Father Bill's Shelter, which we will build upon to design an alert system that will allow for access to the client if they cannot be reached by other means. Such a system will enable the BH CP Team to have open lines of communication with shelter staff in order to engage homeless clients that historically can be hard to reach. SSMH will also build on our existing relationship with Manet Community Health Center, where we have embedded clinicians, to engage Assigned Enrollees. Our relationship with Manet includes embedded clinicians, allowing the clinicians to have a place to engage with clients during their

medical appointments and an opportunity to offer support from the BH CP. Medical staff could provide a "soft hand off" in order to facilitate trust and engagement.

SSMH currently has several programs (Here-for-You, PACT, CBFS, and CSP) that have hard to engage clients, and we have developed numerous successful strategies to engage them. SSMH will use our existing Crisis Team to identify and alert Care Managers whenever these client access crisis services, are referred to crisis services, or present at any of the three local EDs. This notification will be triggered by our ability to share information through electronic medical records. Care Managers will have access to electronic solutions for tracking clients. SSMH will work with Chart 2 clinicians at BID-Milton to ensure increased communication and access. Chart 2 clinicians at BID-Milton are embedded in the ED and work with a comprehensive team at the BID-Milton hospital. They work with clients that are regularly seen by the SSMH ESP team, but they also consult with the hospital staff on other behavioral health patients in order to provide support and resources, thereby providing an opportunity to engage clients that may not be involved with the ESP. In addition, SSMH has a clinician embedded in the Quincy Police department in order to facilitate clinical services "on scene" and divert from legal involvement. This clinician also facilitates a quarterly meeting with Quincy Police Department, DMH and SSMH along with other community providers. SSMH's onsite clinician will support efforts to engage Assigned Enrollees. Similarly, Spectrum's relationship with the Quincy Court, including the mental health clinician that is imbedded in the Court and the Court forensic clinicians, will be asked to promote engagement of the BH CP.

The SSMH-Spectrum BH CP Team will also use an electronic reminder system to outreach and engage Assigned Enrollees when possible, sending emails and texting to encourage them to use CP support services. CBFS currently has a 72 hour engagement mandate from referral day. We achieve this timeframe by phone outreach, provider outreach and if needed outreach to their last known address. SSMH will apply a similar approach with BH CP Assigned Enrollees. Overall, the BH CP Team will work to increase communication and access to the entire service delivery system as a means for facilitating outreach and engagement of Assigned Enrollees.

SSMH and Spectrum will also use a range of evidence-based and promising practices to engage Assigned Enrollees, particularly those who are typically hard to reach. The BH CP Team will use Motivational Interviewing (MI), which aims to facilitate and engage intrinsic motivation within the client in order to change behavior. MI is a goal-oriented, client-centered counseling style for eliciting behavior change by helping clients to explore and resolve ambivalence. The Team will also use a solution-focused interviewing-reality based problem-solving approach to deal with issues as they arise by providing a solution-focused framework. In addition, Spectrum provides certifications in mindfulness training and trauma-informed care training, which sensitizes staff to the needs of high risk populations and enhances their ability to engage clients.

b. Planned strategies for outreaching to and engaging with Assigned Enrollees with SUDs. - For Assigned Enrollees with SUDs, Spectrum will provide access within all levels of care including detox, residential and MAT for Care Coordinators to meet with clients. Similarly to the BH CP outreach and engagement strategies described above, Spectrum will create an alert system to inform Care Coordinators when clients are accessing services. Initial efforts will focus on calls and community visits and work with the area hospitals, homeless shelters, and Fallon

Ambulance, to access clients who are currently being served with their system. In addition, Spectrum's BH CP staff will conduct outreach to clients accessing community-based services and those working with the FQHC as a means to meet clients when they come into the clinic for scheduled appointments. Clients that are referred to BH CP services will likely be in different stages of change. BH CP staff members will be trained on assessing these stages and on how to work with clients in each stage in order to better engage and "meet each client where they are.

c. Planned process to obtain and document Assigned Enrollee's agreement to participate in CP Supports through a participation form. - SSMH and Spectrum will implement a shared standardized agreement form providing documentation on each client's agreement to participate and readiness for participation in BH CP care management and coordination services. The BH CP Team will work to ensure that clients understand all services are voluntary, and that they can opt out or request a new community partner at their choosing.

2. Comprehensive Assessment and Person-Centered Treatment Planning

a. Process for conducting Comprehensive Assessments, including ensuring the Assigned Enrollee participates in the assessment process. - Beginning at engagement, a BH CP staff member will begin the assessment process. At the first meeting, the Care Coordinator will complete the Enrollee Assessment Tools and Basic Needs Identification Form. The Care Coordinator will assess whether the client is currently receiving services from any state agencies, such as DMH, DDS, or MRC. The assessment will gauge the client's ability to communicate symptoms, concerns or care goals, preferred language, employment status, legal status, education, informal supports and any current treatment plans. The form will identify medication, housing, clothing, food, medical conditions, substance abuse, critical risk behaviors, and entitlements. Based on the obtained information, the Care Coordinator will put in place a short-term plan to address any critical needs that are assessed.

Each client will be offered a self-assessment form to fill out during the central intake process in order to better participate in the recovery/assessment process. Care Coordinators will review the form in the presence of the client and integrate the self-assessment into the care plan respecting client voice and choice. The assessment tool will include current services and service providers, medical history (clients and families), and medical needs. It will also include medications, prescribers, and pharmacies as well as knowledge of what medication helps address what diagnosis or symptom. The form will also seek to yield information on the client's ability to communicate concerns, symptoms, and goals. The assessment will occur within three months of enrollment, and then annually thereafter. The Care Coordinator will submit the assessment to the RN and Care Manager for review and approval, communicating results with the care team, ACO, MCO and other providers as necessary. Care Coordinators will use engagement techniques such as MI and trauma-informed care techniques, to engage with each Engaged Enrollees natural supports as well as contact current providers to begin to forge a relationship. *Please see Attachment 7.3 C- 2- for the proposed Enrollee Assessment Tools and Basic Needs Identification Form.*

b. Person-Centered Treatment Plans.

1) Planned processes for developing the Person-Centered Treatment Plan, including ensuring the Assigned Enrollee participates in the process - SSMH and Spectrum view care planning as a

collaborative process directed by clients in partnership with providers, other natural supports, other area stakeholders and service providers aimed at meeting the needs dictated by the social determinants of health. The information obtained in the comprehensive assessment permits the development of a Person-Centered Treatment Plan (PCTP) that the client agrees with and that reflects the client's needs in order to promote recovery and maximize opportunities for compliance and success.

Each care plan will be individualized with regard to client need, client preference, client cultural, religious and other belief systems. Assigned Enrollees will be given the opportunity to develop his/her PCTP goals and asked to agree to identified goals prior to implementation of the PCTP. The plan will be produced in a linguistically appropriate format. In cases where an interpreter is required, staff and electronic interpreting solutions will be made available. The PCTP will be developed within three months of client assignment. In cases where there is an existing Comprehensive Assessment conducted within three calendar months of the Assigned Enrollee's Assignment, SSMH and Spectrum will use the existing assessment in lieu of conducting a new assessment. The PCTP shall include all of the following components:

- The results of the Comprehensive Assessment and any assessments conducted for social services including, as appropriate;
- The types, frequency, and duration of services, and how services and care will be integrated and coordinated among the Assigned Enrollee's health care providers, including but not limited to Recovery Support Navigators and other community and social service providers;
- The Assigned Enrollee's long and short-term goals that seek to reduce risk and help manage the complexity of the Assigned Enrollee's health conditions;
- Specific reassessment dates;
- Identification of barriers to meeting goals and consideration of the Assigned Enrollee's ability to adhere to treatment plans;
- A crisis plan; and
- A contact list that includes the Assigned Enrollee's current and preferred method of contact and phone numbers and email addresses of the Assigned Enrollee's PCP, Care Coordinator, care giver (if any) and emergency contact(s).

2) The PCTP will be a comprehensive document created in conjunction with the client and their care team and entered into the care management platform shared by SSMH and Spectrum, allowing for timely and accurate use of data to the stakeholder and utilization of the data to inform practice. The Person-Centered Treatment Plan will be the following:

- Unique to each Assigned Enrollee:
- In writing;
- Reflect the preferences, needs, and cultural considerations of the Assigned Enrollee;
- Be shared with the Assigned Enrollee's PCP or PCP Designee;
- Be prepared in alternative methods or formats (e.g., audio taping) to ensure that the Assigned Enrollee understands the Person-Centered Treatment Plan;
- Be translated into the primary language of the Assigned Enrollee or his/her legally authorized representative, if any, and explained with the assistance of an interpreter to ensure that the Assigned Enrollee understands the Person-Centered Treatment Plan; and
- Be approved by the Assigned Enrollee's PCP or PCP Designee and the Assigned Enrollee.

3) Planned processes for updating the Person-Centered Treatment Plan. - This PCTP will be reviewed at least every six months to assess goal progress, health status, monitoring compliance with PCTP, and documenting any updated recommendations or modifications to the PCTP. Long- and short-term goals as well as crisis prevention plan will be reviewed on a quarterly basis. SSMH and Spectrum are skilled in providing recovery oriented person-centered treatment planning. The BH CP Team will initiate a review process following a change in the Engaged Enrollee's status that is due to progressive disease, functional decline, or resolution of a problem that represents a consistent pattern of changes that: is not self-limiting; impacts more than one area of the Engaged Enrollee's health status; and requires a review by the BH CP Team. Such reassessment, monitoring and updating shall include, but not be limited to:

- Determining the Engaged Enrollee's progress toward goals;
- Reassessing the Engaged Enrollee's health status;
- Reassessing the Engaged Enrollee's goals;
- Monitoring the Engaged Enrollee's compliance with the Person-Centered Treatment Plan;
- Documenting recommendations for follow up; and
- Updating the Person-Centered Treatment Plan, as necessary, to reflect the reassessments.

The BH CP Team will seek approval from the Engaged Enrollee on any updates to the PCTP and the Engaged Enrollee's PCP or PCP Designee. The BH CP team will again provide the Engaged Enrollee with a copy of the updated PCTP once approved by the PCP or PCP Designee.

4) Planned process for ensuring the Assigned Enrollee and the Assigned Enrollee's PCP or PCP Designee approve the Person-Centered Treatment Plan - Upon completion of the PCTP, clients will be asked to sign the plan. Each client will receive a paper copy of the PCTP to use as a working document on the path to recovery. Once signed, the Care Coordinator will solicit the client's permission to share the PCTP with other members of the client's care team. If permission is granted, the Care Coordinator will share the PCTP with the client's PCP, ACO or MCO, and other providers as necessary.

3. Care Coordination and Care Management

a. Identification of stakeholders (e.g., providers, state agencies, community organizations) involved in an Enrollee's care - During the first meeting and continuing through the assessment process, the BH CP staff will use motivational interviewing to engage the Enrollee and to identify the existing members of his/her care team. The BH CP staff will speak with Engaged Enrollees about different aspects of their life (BH treatment, medical treatment, community supports, social supports, and friends/family) in order to gain a better understanding of the Enrollees' support system and to potentially broaden understanding of the Enrollee's needs among care team members. At times, Enrollees may not think of a support system as part of their care team. Through conversations, the BH CP Team may work to expand an Enrollee's care team members. At a minimum, the team will include the PCP, Care Manager, Care Coordinator, and BH clinician. The team may also include natural support system members, such as family members, informal caregivers, sponsors or friends. It may include specialist clinicians, advocates and other state agencies, case managers or LTSS providers consistent with Enrollee needs.

b. Information Exchange - The Care Coordinator provides the connection and transfers all appropriate information to ensure coordination and attention to the client's needs, thereby

facilitating their recovery process. The Care Coordinator will be the "hub" of communication, ensuring that all members of the care team are on the same page in order to promote streamlined service delivery coordination and improved outcomes. The team will use phone and encrypted email communications, in accordance with team member preferences.

c. Management of the Enrollee' Care Team - The BH CP Care Coordinator will ensure that each documented member of the care team has an assigned role based on their relationship, training and licensure. This process will ensure that the team functions based upon established and clearly defined roles. Each member and role will be documented, and the information will be shared with the entire care team. In order to promote continuity of care and no duplication of services, these roles will be reviewed on a regular basis, and the BH CP staff will periodically check-in with all members of the care team to ensure roles are being followed.

d. Communications - The treatment care planning documents will sit in a shared care management platform accessed by the care managers from both the lead agency and the affiliated partner and meeting all criteria for security of health information. The plans will be sent to PCP and other appropriate stakeholders with the knowledge and permission of the client.

4. Care Transitions

The BH CP Team will work with the Engaged Enrollee during all care transitions, which include any changes in treatment settings. SSMH and Spectrum will ensure that the client and care team understand the role of the BH CP in all level of care transitions and that the team appreciates and understands the importance of team communication throughout the transition process. Before a transition, the care team will collaborate with the enrollee, their PCP, ACO, MCO, CBFS, or any other engaged providers, ensuring their presence at discharge meetings, to develop a transition plan that fits the client's needs. During a change of treatment setting or discharge, the BH CP Care Coordinator will contact the treatment facility to commence the discharge coordination process within one business day of knowing that they were placed. SSMH's access to the areas crisis teams will permit early identification of care transitions. The Care Coordinator will meet with the Enrollee face-to-face within three business days following transition, in order to support, plan and assess service and support needs. The Coordinator will utilize MI to explore what may have happened prior to the inpatient hospitalization and help develop a plan to elicit behavior change that will result in proactive solutions to avoid further hospitalizations, if possible. The Care Coordinator will also seek to ensure a smooth transition for clients who move to a different level of care or type of program by assisting with transportation, appointment reminders, education connections, introducing the client to the new program face-to-face, and sharing client records with the new provider. Additionally, the Care Coordinator will update the treatment plan if needed to better address the concerns and add any area if need that may have developed or changed during the transition, and provide status updates to the care team including the client's ACO or MCO.

5. Medication Reconciliation

At discharge from an inpatient stay, a BH CP RN will provide reconciliation of all medications. The RN will communicate with the PCP, Visiting Nurse Association (if applicable), and discharging facility to ensure that all medication orders are documented and filled accurately. The BH CP RN will provide education on the medications, reason for the medication, dosage,

times, routes, and potential side effects. The RN will ensure that the client understands the information and provide written documentation if needed in the language needed to support the clients learning style and linguistic preferences. The RN will also provide additional support to the client or other BH CP staff, as appropriate, in the event of medication non-compliance or any inconsistencies especially with multiple prescribers. Lastly, the RN will check the Prescription Monitoring Program database to ensure that no potential conflicts exist.

Spectrum and SMMH's BH CP staff will be trained in the basics of medication and medication administration in order to best support this process. SSMH has been a partner with the Medication Administration Program (MAP) through the CBFS program, and as such, our staff fully understands the MAP requirements. The CP RN will work closely with the MAP provider if in a MAP program and will ensure that medication order forms from the client's primary prescriber are shared with the MAP provider and updated appropriately.

6. Health and Wellness Coaching

a. Health and wellness education, coaching and health promotion programs - SSMH and Spectrum have incorporated innovative mind/body approaches in many of their programs. SSMH's activities closely align to the Substance Abuse and Mental Health Services Administration's (SAMHSA's) 8 Dimensions of Wellness (Emotional, Environmental, Financial, Intellectual, Occupational, Physical, Social and Spiritual) model incorporating this philosophy into programing and treatment planning. SSMH's health and wellness services include groups that offer yoga, walking, smoking cessation, mindfulness, and nutrition. SSMH also has a group membership to the YMCA in order to provide a place for clients to engage in physical activity, which is demonstrated to reduce anxiety and provide overall mental health benefits. In addition, SSMH focuses on the social aspects with groups and outings focused on social activities such as a bowling and pool groups as well as a Football Sunday outing. Our Peer-to-Peer program provides a living room model where Engaged Enrollees could come during non-business hours to gain peer support, develop friendships and engage in social activities. Many of our programs also feature an expressive art therapy component that has been proven to be beneficial for many clients where traditional therapy and activities are not the right approach. SSMH and Spectrum also offer a DBT program, an evidence-based practice, to which CP clients could be referred. Spectrum offers a trauma certificate program aimed at integrating trauma-informed care throughout our programs.

SSMH and Spectrum will offer these health and wellness supports to BH CP Engaged Enrollees. BH CP staff will provide health education on a variety of medical conditions, including prevention and management. BH CP staff will also provide coaching on strategies for implementing the health and wellness issues identified on each Engaged Enrollee's PCTP. In addition, BH CP staff will work to foster Enrollee participation in community activities, such as the aforementioned support groups as well as SSMH's expressive art therapy program. Spectrum has incorporated mindfulness in both inpatient and outpatient settings to promote self-care at all levels. Spectrum's inpatient facility in Westborough houses a gym for clients in the residential setting. The BH CP will also utilize existing community resources that serve to work with clients on wellness activities. These will include smoking cessation programs, Overeaters Anonymous, nutritionists and health support groups. The BH CP staff will work with PCPs and other members of the care team to better assess and refer clients based on health and wellness needs.

b. Methods for ensuring the Engaged Enrollee's goals for the health and wellness programs are recorded and tracked in the Engaged Enrollee's Person-Centered Treatment Plan. - Each client's PCTP will include his/her own health and wellness goals. As such, these goals will be reviewed at least every six months, during the overall plan review process. BH CP staff would provide coaching, education and support around the range of health and wellness activities available to the Engaged Enrollee and identified in the individual PCTP. Care Coordinators will lead this effort, in conjunction with the Engaged Enrollee's PCP and the CP RN.

7. Connection to Community and Social Services

a. Plans to evaluate Engaged Enrollees for social service needs, including proposed screening tool(s) - Beginning at the first meeting, the Care Coordinator will use MI to compile a list of the client's current community and social services supports, as well as any others used in the past, using the attached Assessment Tool and Basic Needs Identification Form in 7.3 C-2. Through this goal-oriented style, the Care Coordinator will discuss with the Enrollee the role these supports have had in the Enrollee's life and determine how the Enrollee feels about the supports and their effectiveness. The goal would be to both gather information and to ensure an Enrollee-centered approach to help the Enrollee explore and potentially resolve ambivalence around past supports and how to best move forward. The basic needs assessment will indicate the social supports that the client needs within the first 30 days. This process will address any basic needs, such as housing, medication, medical issues, support groups, and substance abuse services. During the assessment process and in the treatment plan, the Care Coordinator will then document the supports that the Enrollee agrees to engage in or any supports that the Enrollee may wish to consider in the future.

During each quarterly assessment, the Care Coordinator will review the services and assess what changes need to be made, referencing the comprehensive service guide of all available community services and supports. The Care Coordinator will focus on supporting clients to build a natural support network, which may include family, friends and community support groups, such as Alcoholics Anonymous.

b. ***Care Coordination*** – SSMH and Spectrum will continue to foster and enhance community connections throughout the Quincy Service Area, while seeking to grow our connections in order to better serve our clients and ensure that resources are available when and where they are needed. Both agencies will continue to engage and promote community collaboration though established and expanded work groups as described above. The agencies will also seek to build upon existing collaborations with local hospitals, such as increasing the use of ED diversion or alternative destination transport whenever possible. SSMH and Spectrum also have established relationships with all three local hospitals (SSH, BID-Milton and Carney satellite at Quincy ED), which will allows for stronger alliance when our Engaged or Assigned enrollees need or engage in these services. Lastly, for homeless and hard to reach clients, housing is often a missing link. Through SSMH's work with local housing authorities and Father Bill's, SSMH has the unique capacity to put in place additional supports, such as address unmet housing needs.

c. Collaboration with ACOs to recommend Flexible Services on behalf of Engaged Enrollees, and following-up on the outcomes of such supports. - As described elsewhere, SSMH and

Spectrum have and will continue to grow relationships with the ACOs. The BH CP will provide education about supports and, as the program grows, gather BH CP data to report back to the ACO, in an effort to increase their support for the BH CP initiative and as a key member of the Engaged Enrollees care plan teams. The BH CP will ensure active and ongoing communication with all members of the BH CP care team. SSMH and Spectrum both have experience collaborating with ACOs to recommend Flexible Services as well as using data to drive practice, responding to the individual needs of each client, and using and partnering with community resources that respond to social determinants of health.

Outside of the BH CP, SSMH and Spectrum's current collaborations will facilitate a referral stream for Engaged enrollees. Enrollees with comorbid medical issues with no medical or less than optimal medical care can be referred to Manet Community Health Center, Steward PCP offices or other medical practices associated with SSH. These three options encompass many specialties, providing Enrollees with numerous care options located throughout the Quincy Service Area.

SSMH and Spectrum also plan to build on the numerous innovative projects currently under discussion area in order to create a better system of care. SSMH and Spectrum are involved in plans to include more embedded clinicians in a variety of medical settings, more community partnerships with the local police departments and EMS systems. These efforts will foster engagement of Assigned Enrollees and provide increased points of contact with Engaged Enrollees, facilitated by early interventions and diversion from the hospitals or jails. Embedded SSMH or Spectrum clinicians will allow for streamlined communications, rapid referrals, and an integrated overall team approach. These community connections will allow the community partner opportunities to engage with the Enrollee in a variety of forums on a more frequent basis.

7.3.C.2 ASSESSMENT TOOL

No changes to the attachments included in the original Participation Plan.

7.3.D Innovative technologies for service delivery (not to exceed 1 page)

SSMH utilizes leading edge technology to help clinicians deliver services remotely to their clients. This mobility and flexibility improves client experience and continuity of care. A cloud-based communications and collaboration tool called RingCentral allows the Care Managers and Coordinators to bring a client and other care team members into conference by phone or video. The clinician can share a computer screen with participants, or pass control of the screen to the client to complete a self-assessment, a survey, or some other required medical form. The system has business SMS capability as well, and can be used across various devices (e.g. desk phone, cell phone, and computer). HD video can also be used for tele-psychiatry sessions when needed.

Providers are equipped with a complete set of computing tools enabling 100% mobility for delivery of services outside of the clinics. Citrix Virtual desktop technology allows care staff to connect securely into the EHR from anywhere, and at any time. The remote connection provides secure access to email, files, and filters internet traffic. Staff also have Verizon mifi devices for connectivity, eliminating any burden for connectivity on the clients served in their homes. A learning management system is also in use for all care providers and facilitates targeted on demand or scheduled training with compliance reporting for licensing and leadership use.

An appointment reminder solution called ReminderCall is currently in use at SSMH. The system links directly into the EHR system, captures client appointment data and securely transfers it to a 3rd party provider. The appointment reminders are sent via text or phone calls allowing for confirmations, cancellations or appointment changes. This assistive technology reduces missed appointments and keeps the clients engaged. The same ReminderCall technology will be leveraged to remind clients to take their medications.

As described above, SSMH will use DSRIP funding to purchase a care management platform. Working with Spectrum, SSMH is also exploring other low cost innovative technologies to augment care coordination and client adherence to treatment goals. The Care Management solution will be HIPAA compliant and include strong access management and audit controls. The solution will also enable the electronic transmission of clinical and care information between provider systems and include numerous other interoperability features. The solution will provide centralized administrative control and accommodate broadcast communication capabilities to the care teams for emergency situations, to relay to specific clients, or across all clients as needed.

A patient portal will also be available within the care management platform. Care Managers and Coordinators will access this single system for all patient centered services, which will facilitate the patients providing information and documentation to their care team in a timely manner and via a secure path. Utilizing a HIPAA compliant platform, the platform will offer administrative controls to formalize processes and workflows like document review and signoff.

SSMH plans to leverage the proliferation of wearable technologies, which offer clients numerous benefits for better health management. For example, clients presenting symptoms of high blood pressure maybe incentivized to wear heart monitors, or those with diabetes could use blood sugar monitors. Achieving better health goes beyond behavioral health treatment. Growth in the use of these new technologies will help improve clinical outcomes for patients with co-morbidities.

7.3.E Personnel and staffing

1. Organizational Chart

Attachment 7.3.E includes an organizational chart of SSMH and Spectrum personnel, senior managers and other staff that will be assigned to the BH CP to carry out the full Contractor Responsibilities as articulated in Attachment A, Model Contract.

2. Staffing Model

Below is the BH CP's proposed staffing model based on an assumption of 1,000 Engaged Enrollees in a 12-month period for the Quincy Service Area as articulated in Attachment D.

Staffing Category	Staff title	**Engaged Enrollees** (1,000 total)	Number of FTEs
Supervision	Medical Director		0.1
	Program Director		1
	Director of Integration		.5
Administration	Administrative Assistant		1
Care Management	Clinical Care Manager (LICSW)		2
	Clinical Care Manager (RN)		3
Care Coordination	Care Coordinators	53	19
	Recovery Coach/ Peer Specialist		3
	LPN		1

Staffing model notes:

- SSMH and Spectrum will both staff Care Coordinators, Clinical Care Managers, and RNs who specialize in either mental health (SSMH) or substance use (Spectrum).
- SSMH and Spectrum will hire a one FTE Program Director.
- The Program Director will determine at intake which clients will be assigned to an RN versus a LICSW Clinical Care Manager based on presenting issues.
- SSMH's Medical Director, Dr. Richard Reiner, and Spectrum's Vice President of Clinical Development, Romas Buivydas, Ph.D., LMHC, will provide leadership, oversight, and supervision to the BH CP Team. Dr. Reiner maintains relationships with medical providers and other resources, including medical directors at local outpatient, diversionary, and inpatient services programs, hospital emergency department physicians, and primary care clinicians. Dr. Buivydas provides training and consultation in co-occurring disorders to program staff and is available for consultation as needed.

3. Recruitment Plans, Job Descriptions and Qualifications

Starting in November 2017, SSMH and Spectrum will post job vacancies for Care Coordinators, Clinical Care Managers and RNs on several different platforms. SSMH and Spectrum will share recruitment strategies and common recruitment channels. Each agency will also have unique sources that they engage separately. SSMH and Spectrum will post on their internal websites, general job websites like indeed.com, and on other BH specific job websites including but not limited to: Masspsych.org, Psychiatry-mps.org, thenationalcouncil.org, careersofsubstance.org, SocialService.com, the new social worker online, NASWMA.org (National Association of Social Workers-MA chapter), and MACHW.org (Massachusetts Association of Community Health Workers). SSMH will also post positions in local newspapers like the Boston Globe, the Boston Herald, Quincy Sun, and Brockton Enterprise and at the South Coastal Career Center in Brockton. SSMH has relationships with and a strong recruitment presence at area colleges and

universities including: Boston College, Boston University, Bridgewater State University, UMass Boston, Simmons, Tufts University, Stonehill College, Eastern Nazarene, Smith College, Wheelock College, Cape Cod Community College, Lesley College, Cambridge College, Rhode Island College, Regis College, and UMass Dartmouth. SSMH plans on attending job fairs and networking events, posting jobs on these school's websites, and directly contacting school's Career Services and head of Social Work and or Psychology programs. Spectrum senior staff serve as adjunct faculty at colleges and universities including Boston College School of Social Work and Assumption College and will actively recruit students through these affiliations.

SSMH and Spectrum are committed to regular review of staff compensation levels relative to current industry trends. Both agencies use formal, externally compensation surveys to conduct annual assessments of compensation levels. SSMH has highlighted plans to continue this approach in the current Strategic Plan under the heading of employee engagement.

SSMH and Spectrum each have a robust internship program that provides opportunities for recruitment. SSMH also offers externship and practicum opportunities with a number of colleges and Training programs, including Cambridge College, Smith College, Simmons, Boston College, and Lincoln Technical Institute. SSMH plans to recruit current and former students who already have experience with the organization. SSMH will also send direct mailings to clinical professionals including nurses, social workers, mental health counselors, rehabilitation counselors, and substance abuse specialists and advertise in professional publications. SSMH also plans to put a profile page on Glassdoor, and add photos, videos and awards. Having a profile page blocks competitors from accessing SSMH's site. SSMH will illicit employees that have a positive view of SSMH to write reviews. We also plan to advertise on Pandora Radio which is more expensive than typical radio shows, but provides an opportunity to target our audience by age, sex and geography. In addition to these extensive formal recruitment efforts, the BH CP will use its informal network of contacts to identify and locate potential candidates.

Both agencies will conduct Criminal Offender Records Information checks on all employees assigned to the BH CP contract, as well as cross-reference the Inspector General's List of Excluded Individuals and Entities upon initial hiring as well as on a monthly basis thereafter, notifying EOHHS of any discovered exclusions.

Recruitment timeline:

- November 2017: Start advertising
- December 2017: Review applications, conduct screenings, and schedule interviews
- January – May, 2018: Interview and hire qualified candidates
- January – May, 2018: Conduct orientation and training
- June 1, 2018: New staff will be ready to support members

Please see Attachment 7.3 E-3 for detailed job descriptions.

4. Recruitment from the Cultural and Linguistic Communities We Intend to Serve

SSMH and Spectrum will continue to post positions on culturally and ethnically diverse websites and professional organizations including: Asian American Civic Association, QARI-Quincy Asian Resource Institute, Workplace Diversity.com, El Mundo-Hispanic newspaper in

Boston, Spanish Cultural Association in Boston, Hispanic American Chamber, National Association of Puerto Rican Hispanic Social Workers, MAPS-Alliance of Portuguese speakers, Portuguese American Association of Falmouth, and Portuguese American Journal. SSMH will also conduct community outreach with Quincy Asian Resources, Inc., the Quincy Career Center (which includes an Asian Access Project), and the Massachusetts Rehabilitation Commission. Lastly, SSMH and Spectrum will highlight their interest in culturally and linguistically diverse candidates in the job postings at colleges and universities. Spectrum also attends job fairs at all area colleges with the aim of recruiting skilled and diverse workforce. Spectrum also uses social media to reach a varied and extensive target audience. Internal promotion of employee referrals through a bonus system assists in recruiting diverse applicant pools.

4. Proposed Training, Orientation Plans and Modules for Staff

SSMH will develop a joint staff training module for newly hired BH CP program staff. Spectrum staff will attend the SSMH training and be reimbursed for their time through DSRIP funds. The BH CP will provide Care Coordinators, Clinical Care Managers and RNs training through both Live and Online training methods. All BH CP staff have full access to and are required to complete courses through the Relias Learning online learning management system. Relias Learning is the leader in online training and personnel training record keeping in mental and behavioral health offering over 700 courses online in addition to BH CP customized courses.

Orientation training will include:

1. Two-part Privacy and HIPAA training (live and online)
    a. HIPAA
    b. Review SSMH or Spectrum policies, depending upon the hiring agency
2. Workplace Safety
    a. Live training orientation with safety booklet
    b. Review SSMH off-site safety procedures
3. Compliance and Quality of Care/SSMH Policies (live and online)
    a. Conflicts of interest
    b. Documentation

First 90 days training will utilize the following resources: a supervisor orientation, live training in conjunction with Relias Learning, SAMHSA integrated materials (print, online and webinars), and documentation of compliance for training completion within Relias. Training will cover:

1. Integration model, values in care delivery, collaboration, program: overview, elements, and goals, care planning, and training requirements
2. Population served including training on: BH, SMI, and SUDs
3. Care Coordinator role. Including; Support/Strengthen linkages, coordinating services, crisis intervention, Navigating BH systems, Outreach & Engagement, NASW Case Mgmt. Standards, other contract requirements
4. RNs will get training in medication reconciliation and working in care planning teams.
5. Program Workflow & Expectations:
    a. Communication/Supervision requirements, Training requirements including attending EOHHS or designate provided training, Rounds/Monthly Team Mtgs.
    b. Documentation
    c. Technology

6. Training Completion on following topics:
    a. Cultural Competency
    b. Accessibility/Accommodations
    c. Individual Living/Recovery Principles
    d. Access to care/systems/BH LTSS
    e. Motivational Interviewing
    f. Trauma-Informed Care
    g. Health and wellness, including health risk factors of: smoking, inadequate nutrition and exercise, and addressing homelessness
    h. Medication Reconciliation
    i. Assessment and Treatment Planning, and Person-Centered approach
    j. Co-morbid medical issues and impact on population served
    k. Social determinants such as stable housing, food, social networks

Ongoing training will be conducted by the Program Managers through:

- Individual supervision
- Monthly team meetings and trainings
- Access to monthly clinical trainings (delivered by SSMH both Live and online), and
- Access to all current training resources like in-house, specialty consultations, safety training, CPR/First Aid, and all Relias Learning courses.

Specific examples include best practices in Integrated Care and Evidenced-Based Practice.

6. Staff Retention Strategy.

SSMH and Spectrum highly value staff commitment and offer incentives and opportunities for growth within the organization. SSMH sponsors an in-house referral bonus program, as well as sign-on and retention bonuses for specific positions. SSMH is one of a few hundred organizations in the country with an APA accredited psychology training program, which allows psychologists the opportunity to serve as clinical supervisors for psychology interns. SSMH and Spectrum also offer a social work internship, providing supervision opportunities for many senior level social work staff. This supervisory role allows participating clinicians to remain in their current fields with a broadened scope of work. SSMH provides for vertical advancement based on skill sets and certifications, and horizontal based opportunities for special projects. Furthermore, SSMH strives to promote from within the organization by posting all positions for a minimum of seven days and interviewing qualified internal staff before filling positions externally. In recognition of our employees' dedication and commitment, SSMH established corporate engagement programs, including the annual service awards and the "celebration of staff." Spectrum also emphasizes annual staff recognition with a birthday care and a gift card for every employee. Spectrum staff members receive benefits reviews regularly, tuition remission opportunities, and access to an online educational system to get continuing education credits. SSMH has also developed a multi-pronged approach to staff communication, which includes weekly Senior Management meetings, monthly Management Meetings, electronic CEO updates, as well as establishing a Diversity Committee and a Safety Committee available to all staff.

7.3.E.1 ORGANIZATIONAL CHART

Please see updated staffing model in BH Attachment A.

7.3.E.3 JOB DESCRIPTIONS

The title of the Vice President of Integrated Care has changed to Director of Integrated Care; the responsibilities are the same. Other job descriptions in the attachments to the original Participation Plan remain unchanged.

7.3.F Implementation Plan and Timeline

Please refer to BH Attachment A.

7.3.G Budget Report and Budget Narrative

Please refer to BH Attachment A.

7.3.H Sustainability

The SSMH-Spectrum BH CP will work to demonstrate our ongoing value and cost savings benefit. The BH CP Team will also work to ensure that gaps in care do not occur, especially after high intensive levels of care, such as hospitalizations or emergency department visits. Market economics and quality care will assure the sustainability the SSMH-Spectrum program model.

Care management and care coordination have demonstrated success in improving client satisfaction and engagement in integrative care while reducing total medical expenses for clients with co-morbid physical and behavioral health illnesses. The actuarial company Milliman found that the existence of a comorbid psychiatric illness among individuals with chronic illness resulted in an average cost of **$505 more per month** for healthcare. They summarized: *"If a 10% reduction can be made in the excess healthcare costs of patients with comorbid psychiatric disorders via an effective integrated medical-behavioral healthcare program, $5.4 million of healthcare savings could be achieved for each group of 100,000 insured members...the cost of doing nothing may exceed $300 billion per year in the United States."*[1]

Recognizing these potential cost savings of this magnitude will incentivize ACOs to continue contracting with BH CPs at the end of the five-year contract. Greene et. al. (2008) reviewed the impact of behaviorally based care-management programs addressing both chronic illnesses and comorbid psychiatric disorders on a Medicaid population. They found the program expense in addressing patients with comorbid psychiatric illnesses resulted in healthcare savings in excess of 12 times the program cost.

During the initial contract term, the BH CP will maintain and expand existing community and healthcare system collaborations and partnerships. At the end of this term, these relationships will be well-established, thereby forging a pathway for long-term engagements aimed at sustaining care coordination service, even in the absence of the BH CP structure. Following the initial contract period, SSMH and Spectrum will continue collaborating around care management and coordination activities, given the shared activities and operational structures that will be increasingly well-established throughout the contract term. SSMH and Spectrum will also continue using the established Enrollee Assessment Tool and Basic Needs Identification Form for engaging future clients around care coordination.

SSMH and Spectrum will also identify strategies for securing and supplementing existing internal resources in order to transition BH CP staff to permanent agency positions and also to seamlessly continue providing care management and coordination services to the target high needs population. Each agency will seek outside philanthropic and major donor funding to continue many of the BH CP care management and coordination activities. Currently, SSMH has two major funds, the Linburn Fund and the Shulman Fund, currently worth over $150k. Both agencies also have individual giving programs, public and private grant funding, as well as federal, state, and local operating grants. SSMH's existing and developing ACO relationships will allow for additional cost savings opportunities. Lastly, partnerships with community resources and advocacy organizations, such as NAMI, may create opportunities for legislative

[1] *Melek, 2008*

appropriations through ongoing advocacy, with groups such as the Association for Behavioral Health.

Following the contract period, shared IT capacity will remain intact, after significantly maturing during the contract period. SSMH and Spectrum will continue to use the care management platform, purchased with initial DSRIP capacity building funding, after the contract period. DSRIP funding will also help to establish a sustainable IT infrastructure to support ongoing BH CP supports and activities. Additionally, SSMH will have a strong working relationship with IT care management platform partner(s) by the end of the contract period. Ongoing use of the care management platform will continue to allow for better outcomes and foster measurement of efficiencies, including identify potential cost savings opportunities.

Lastly, as described above, the initial DSRIP funding will also be invested in developing and implementing robust, comprehensive training programs designed to train and orient new care managers and coordinators to a broad array of topics, including areas such as the rationale and structure of MassHealth reform, philosophy of care management, and the role of care management in attaining strengthened access, outcomes and cost. Training will also include administrative requirements such as data input, reporting, use of IT solutions, care management development and tracking. SSMH will continue to use these training modules after the contract period as a means for instilling in new staff an understanding of the value and role that care management and coordination serves in meeting the care needs of high service needs clients.

7.3.I Quality Management and Performance Monitoring

1. Quality Improvement Program

SSMH's continuous QI process is at the core of the organization's sustained delivery of efficient and effective services. SSMH's Director of Compliance and Quality, Dean Tsapatsaris, LICSW, manages and monitors a variety of QM initiatives, including: quality assurance, QI, and UM. The Director oversees the Meaningful Use Manager and Senior Compliance and Quality Analyst, who work together to monitor QM initiatives. The Director serves as a consultant to any SSMH program wanting to plan a QI project. This consultation includes analyzing data, creating formatted reports, and assisting the program to interpret and utilize the results in an ongoing quality improvement effort. The Director also chairs several SSMH-wide teams/committees.

SSMH's Quality Management Program is based on the following general principles:

- Quality service concerns every clinician and is a major focus of senior management staff. In addition to assuring quality through the retrospective review process, SSMH employs proactive quality management efforts to identify and address issues as they arise.
- Regular involvement in Quality Assurance and Multi-Disciplinary Group activities allows SSMH staff to easily integrate quality standards and include self-monitoring in their own clinical activities, in addition to maintaining compliance with established requirements.
- Managers and clinical staff are available for quality management and review as needed.
- Regular data gathering facilitates changes to organizational functioning and structure by effectively linking quality assurance activities, management, and operational staff.

SSMH's Here-for-You QM plan offers a detailed example of our QM approach. It includes:

- A continuous quality improvement process including outcome measures and satisfaction surveys to measure and improve the quality of care and services delivered to members.
- Outcomes measures used by all partners to identify opportunities for program improvement.
- A technical assistance process provided by Beacon and facilitated by the Quality Analyst that includes quality and process measures shared at regular intervals, thereby enabling the establishment of joint opportunities for improvement when applicable.

SSMH must meet two metrics to be eligible to share in Total Medical Expense savings.

2. Quality Initiative

SSMH and Spectrum will maintain a QI plan established to improve processes and outcomes by using continuous QI principles. The plan will include at least one specific QI initiative to be implemented and evaluated annually. In Budget Period 1, SSMH will focus on the Care Coordination and Care Management Initiative. In order to measure success of this initiative, SSMH will audit and analyze the following measures: 1) medical history identifiable in the record; 2) collateral communication evidence; and, 3) the number of in-person client contacts.

3. Quality Committee

The QM Department is comprised of the Director of Compliance and Quality, the Meaningful Use Manager, and the Senior Compliance and Quality Analyst. QM staff members meet with SSMH managers and line staff on a regular basis to provide consultation and offer trainings on related topics. The Department is responsible for ensuring adherence to the numerous QM requirements stipulated in SSMH's contracts with MBHP and state agencies. In addition, the

Department is responsible for managing and monitoring a variety of internal QM initiatives, including:

- *Quality Assurance Committee:* The Quality Assurance Committee (QAC) is an SSMH-wide committee that serves several roles. QAC meets on a regular basis and has several members, including the Medical Director, Director of Nursing, Director of Quality Management, Human Rights Officers, and representatives from SSMH's Outpatient and the Crisis/Rehab Divisions. The QAC reviews the CQD's incident and investigative reports, developing corrective action plans when needed. When necessary, QAC will recommend that policies or procedures be changed, or certain corrective actions be taken, so that SSMH will continue to meet the highest standards of care. QAC investigates client complaints that cannot be resolved at the program level. QAC approves privileges for clinical staff who meet established criteria to allow those staff to provide specific clinical functions in their work at SSMH. QAC is also responsible for approving the forms and documentation standards for medical records, as well as for reviewing and approving of any research requests.
- *Client Satisfaction:* SSMH has a long history of having consumers and family members participate in quality monitoring. All SSMH programs conduct annual consumer satisfaction surveys. This process provides rich data, as each year we receive approximately 1500 responses across the organization. Although each program has its own individualized questionnaire addressing issues specific to that program, there are six core questions that appear on every program's satisfaction survey. In addition to answering the predefined questions on the survey, we encourage clients to tell us in their own words what is most useful and least helpful about the services they receive from us. When the survey period is complete, the QM team produces reports that show individual program results, compare the results of the six core questions to national benchmarks, and determine if internal standards were met. A report is also provided to all directors analyzing cross-agency program satisfaction. Programs not meeting the standards are required to develop an action plan indicating how they will achieve compliance by the next satisfaction survey period. SSMH has used previous survey results to generate program changes in site locations, develop a centralized intake process, and foster significant growth in home-based outreach services.
- *Clinical Outcomes:* SSMH has long believed that in order assess treatment impact, it is necessary to evaluate outcomes. SSMH uses a variety of standardized tools to measure outcomes. Many of these tools are used to report on Meaningful Use Clinical Quality Measures (MU), Physician Quality Reporting System Quality Measures (PQRS), and Merit-based Incentive Payment System Quality Measures (MIPS). Positive quality outcomes depend on the ability to capture and report on outcomes data. SSMH's outcomes data has guided our team approach to educate staff in the use of these tools, monitor administration compliance, and interpret and use research data.
- *Utilization Management:* As described above, the QM Director uses data to monitor utilization parameters, such as no-show rates and service utilization, and produces monthly reports on access and multidisciplinary team record reviews. SSMH's employs a Quality Analyst to supports this work. The Staff member's functions include describing practice patterns and mining the collected data to help program managers decrease service bottlenecks and improve program effectiveness and efficiency.
- *Staff Performance:* SSMH conducts routine staff evaluations aimed to help each employee and supervisor assess in a constructive way the employee's performance over a specific period of time. Staff evaluations assess employee performance according to clearly identified

and agreed upon standards and objectives in order to assure that goals are being fulfilled. Supervisors monitor clinical performance by reviewing staff notes, case assessments, service plans and outcomes and by discussing cases with staff during supervision. Assessment of staff performance includes utilization, productivity, prior authorization management, case management skills and other non-clinical matters. All employees participate in an annual, formal review process where they receive feedback from supervisors on overall performance.

- *Program Performance:* Program evaluation concentrates on wide-ranging factors, including needs assessment, process evaluation, program efficiency and effectiveness, impact, and outcome evaluation. On a routine basis, QM staff members prepare reports that describe a variety of operational and financial measures on a program by program basis. Program managers review these reports and implement changes needed to meet client expectations.
- *Plan Review Teams:* Plan Review Teams consist of a multi-disciplinary group of senior clinicians that provide quality assurance and clinical risk management on a program/service level. The Teams conduct regular clinical record reviews focusing on appropriateness/quality of treatment provided, insure timely and thorough documentation of all clinical and collateral services provided, and provide data regarding each of the areas to the QM Director. Multi-disciplinary groups complete the initial plan review after developing an initial treatment plan which must be submitted for review after two sessions or 30 days. For clients receiving pharmacotherapy services, treatment plans shall reflect specific target problems expressed in behavioral terms, as well as behavioral goals and timelines for these services. Initial treatment plans are reviewed for quality and completeness. Subsequent reviews are done at least semi-annually, and at other times if required by the regulatory agencies or payers.
- *Human Rights Committee:* The purpose of the Human Rights Committee is to promote, safeguard, and protect the dignity, legal rights and liberties of all SSMH clients. The Human Rights Committee monitors clients' human and civil rights to ensure compliance with State and Federal regulations, ensure compliance with the appropriate human rights standards of accrediting agencies, and make recommendations to improve understanding and enforcement of client rights. The Chief Human Rights Officer staffs the Human Rights Committee, which is comprised of consumers, family members, and members of the public. All Committee members participate in carrying out the duties of the Committee as defined by the Human Rights Committee bylaws. The Committee holds regular meetings at least four times a year, with dates scheduled in June for the following year. In addition, the Committee meets in Special Session as often as necessary upon request. The Committee functions in an advisory capacity to the QM Director.
- *Risk Management Team:* The Risk Management Team supports all SSMH programs in mitigating clinical and operational risk, as well as ensuring staff and client safety, with program staff present presenting cases of high-risk clients. The Team meets on a regular basis and has several members, including the Medical Director, Director of Compliance and Quality, and representatives from the SSMH's Outpatient and the Crisis/Rehab Divisions. The Team also provides consultations to staff and when appropriate makes recommendations for changing treatment plans to mitigate risk and improve quality of care.
- *Safety Committee:* The Safety Committee, co-chaired by the Director of Compliance and Quality and the Vice President of Human Resources, conducts an annual Safety Assessment of all SSMH sites, then makes recommendations for changes and monitors implementation.

7.3.J Coordination with ACOs and MCOs

1. Communication with potential ACOs and MCOs

SSMH has repeatedly demonstrated our skills, expertise and values through longstanding contractual relationships with all Medicaid MCOs for the provision of a full continuum of BH services in the Quincy services areas. SSMH provides care coordination and management through the following Community Support Program: Here-for-You, Children's Behavioral Health Initiative, CBFS, PACT and the REACH program. SSMH has participated in a number of innovative pilot projects with MCOs. In 2005 to 2007, MBHP funded a pilot project with UMass Medical to facilitate integrated care between Manet Community Health Center and SSMH. In addition, Beacon engaged with SSMH on a pilot program waiving outpatient authorizations, granting SSMH the capacity to manage outpatient utilization. DPH and BSAS engaged with SSMH on building capacity for adolescents with co-occurring disorders. In outpatient reviews with MBHP, SSMH demonstrated low ED and inpatient utilization, below 25th percentile.

SSMH has engaged with multiple hospital systems and its primary care practices in providing integrated services. This experience demonstrates the expertise, skill, value and readiness that SSMH offers in working with ACOs as a community partner. SSMH's experience working with MCOs on providing care management, wraparound services, innovative services, and integrated care will also be an asset in communicating our skills and expertise as well as presenting a strong case for the value and benefits of creating ACO partnerships. In addition, SSMH has established working relationships with several potential ACOs in the Quincy service areas. SSMH is currently working with Steward Health Care Systems primary care practices in Quincy as well as in the nearby communities of Dorchester, New Bedford, Fall River, Wareham, and Brockton. Services are provided through a contract with Quartet Inc., a software company that provides a communication platform to facilitate rapid referrals between PCPs and BH providers.

SSMH has also been working with Steward's Hawthorn Medical in North Dartmouth to provide co-located services in the primary care practice, including screening, diagnostic evaluation, short-term treatment and referral, medication management, and psychopharm consultation to the PCPs. Using Quartet, SSMH provides preferred access, real time communication and coordination between PCPs and SSMH's Quincy and Wareham clinics. Physicians initiate service requests through the Quartet platform, which connect directly with SSMH clinicians, who then respond directly to physician requests at intake and provide treatment and care coordination updates on a regular basis. All clients are administered outcome instruments on admission and at six months that include the Patient Health Questionnaire-9 (PHQ9) for depression screening and the Alcohol Use Disorders Identification Test (AUDIT) for SUD.

2. Branding and Marketing Plans

SSMH and Spectrum will develop a specific marketing strategy focused on prospective member engagement. Specific methodologies will include direct mail with a letter and brochure to members' homes introducing the BH CP Care Coordinators. The initial letter will state supports that the BH CPs offer, including existing SSMH and Spectrum programs addressing basic client needs. The letter will also reference and promote the affiliated ACOs and MCOs.

SSMH is uniquely positioned to provide additional supports to clients through two established philanthropic funds. The Linburn Fund provides grants to clients to assist with long-term goals, including education, social skills and independence. The Client Basic Needs Fund provides funding for urgent basic needs, including food, shelter and clothing. These funds are accessed through clinician referral and managed by SSMH's Marketing and Development Department. SSMH supporters have donated to these funds.

A direct mail piece will include an incentive of a $10 gift card upon completion of an initial assessment with the Care Coordinator. The gift card will be for a store where the client can access healthy food or clothing. This mailing will be followed up with a phone call from the Care Coordinator within a week of delivery. A follow-up mailing will be sent to Assigned Enrollees who have not responded to the initial mailing, two weeks later, along with the same incentive. If the member does not make contact after receipt of the two mailings, the Care Coordinator will call again. If an email address is available, the same information will be sent via email.

3. Collaboration with Multiple ACOs and MCOs

SSMH has working partnerships that bridge health care to promote collaborative, comprehensive and holistic care for MassHealth members. SSMH has affiliation agreements and contractual relationships with care providers in the Quincy Service Area, including BID-Milton, South Shore Health System, and Steward Health System. We are improving our clients' level of wellness by increasing access to care coordination and management while delivering cost-effective and non-duplicative services. SSMH is improving clients' experience with the health care system; reducing costs; and providing the right care at the right time in the lowest cost setting. We share health care information with our community partners in real time.

SSMH will be joining Steward Health Care System's ACO Referral Circle, building upon the existing partnership. As a BH CP, the collaboration with Steward would facilitate referrals, access, service coordination, and service delivery. SSMH is in final negotiations with Signature Health System to embed staff. SSMH is currently working with Manet and SSH, which are included in the Boston Medical Center ACO. SSMH clinicians are located at the SSH ED to facilitate assessment, coordination and engagement of presenting patients. SSMH also provides co-located clinical and care management services at Manet clinics. This experience with Manet in attributing Medicaid clients for care management is transferrable to the BH CP. SSMH also intends to contract with Tufts Health Public Plan, which is the ACO for BID health system.

The engagement and communication with ACOs and MCOs will be coordinated by the BH CP's Governing Body with input from the Consumer Advisory Board. Service coordination is in place with many ACOs through existing clinical and care management relationships with PCPs, hospitals, EDs, and administrators. SSMH and Spectrum will further develop these referral relationships, care coordination and clinical pathways through the evolving community and health system partnerships.

4. Conflict Resolution with MCO or ACO

Conflict resolution with the ACOs or MCOs will occur on the service delivery level utilizing the Care Managers and Program Managers. Conflict resolution on the administrative level will be reviewed and managed by the Governing Body.

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:

The program director will will provide day-to-day management, ensure that contract deliverables are met and coordinate with affiliate partners and materials subcontractor to plan the ramp up to (and eventual delivery of) CP services.
Martha's Vineyard is dedicating 40 hours of time for a supervisory staff, clinical care manager, and care coordinator to attend SSTARs prep period training for staff. This training will provide staff who will be starting June 1 with all the information they need on workflows, utilization of the EHR, quality metrics etc that they need to know in order to do their jobs come June 1. 40 hours of work for staff translates to .2308 FTE in a single month, hence the numbers above.
Fellowship will be providing a clinical care manager and 2 care coordinators to attend the 40 hour training. Additionally they'll send one supervisory staff member who will also act as the liason for the project averaging around 1 hour per week to the various needs of the CP grant. Additionally they're dedicating 7 hours of staff time for a Board Member to attend the monthly governance meetings SSTAR will be putting on.
GNBCHC will be sending a clinical care manager and care coordinator to the training, and the clinical care manager will additionally act as the main liason/support staff for all necessary ramp-up activities for the organization.
Health First will also be providing a clinical care manager to attend the training and manage all ramp-up liason activities
SSTAR will be sending 20 Care Coordinator staff and 4 RNs to the 40 hours of training. These are staff that already work in other parts of the agency as FFS but who are prepared to transition to the CP grant as needed given the number of enrollees.

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Total Training and Professional Development (Program Budget Line 3)			

Provide a description of each Training and Professional Development line item included in the table above:

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
MV: Supervisory Staff for governance	120	3	0.535	$ 192.60
MV Supervisory staff for training	120	2	0.535	$ 128.40
MV: Clinical care Manager - RN	Same car as superv.	0	0	$ -
MV: Care Coordinator	Same car as superv.	0	0	$ -
Fellowship: Supervisory staff for governan	50	7	0.535	$ 187.25
Fellowship: Supervisory staff for training	75	2	0.535	$ 80.25
Fellowship: Clinical care Manager - RN	75	2	0.535	$ 80.25
Fellowship: Care Coordinator	75	2	0.535	$ 80.25
Fellowship: Care Coordinator	75	2	0.535	$ 80.25
			Total Mileage	$ 829.25

Travel Expense Description	Cost
Total Mileage	$ 829.25
Parking and tolls	
Public transportation (ferry)	$ 499.00
Hotel for MV staff	$ 1,380.00
Per Diem for MV staff	$ 1,062.00
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ 3,770.25**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

Martha's Vineyard will be sending a supervisory staff member, an RN, and a Care coordinator to two separate trainings hosted by SSTAR. These staff will carepool together for an estimated 120 miles round trip at .535/mile for 1 car for 2 trips (two trainings), for a total of $128.40. The cost of the ferry auto reservation for 1 car includes passenger tickets and will be $217 total for these trips. A meal allowance of $59/day for 3 staff for 3 days for two sets of trainings will be $1,062, and hotel for 3 rooms for 2 nights at $115 per night include taxes/fees will be 1,380 for two trips.

Additionally Martha's Vineyard will contribute one governance committee representative who will attend 3 of the monthly meetings in person (the rest by phone) Ferry auto reservation for those 3 trips at $94 per trip is $282, Mileage to/from Fall River @ 120 miles round trip @ .535/mile for 3 trips is $192.60

Total milage for MV for the trainings and meetings is: $321 for 600 miles (5 trips)
Total ferry cost for MV for the trips is: $499
Total cost for travel for MV including hotel and per diem is: $4,000

Fellowship will be sending 1 supervisory staff member, an RN, and 2 Care coordinators to SSTAR for trainings. 50 miles round trip at $.42/mile for 4 staffis $84 for 3 trips is $252. 3 trips in 2 months averages to 75 miles a month in trips (150 miles in 2 months)
Fellowship will send one Governance Committee Rep to attend 7 meetings (1 per month) for $147 in total milage costs
Total cost for travel for Fellowship: $399
Total travel costs: $3,770.25

Row 5 - Equipment

Description of Equipment	Unit Cost or Cost/FTE	#units or FTEs	Cost
Total Equipment (Program Budget Line 5)			

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost
Total Supplies (Program Budget Line 6)			

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
		Total Software Licensing (Program Budget Line 8)	

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
		Total Telecommunications (Program Budget Line 9)	

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost
Rent	3515	10	$ 35,150.00
Utilities			$ -
Repair and Maintenance			$ -
Pro-rate for several months rent in PBY			$ (29,157.00)
			$ -
		Total Occupancy (Program Budget Line 10)	**$ 5,993.00**

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:

3 large areas with 15 cubicles each 7 offices for individual staff Reception/admin area with two seats 1 meeting room that would accommodate 15-20 people, kitchen/lounge area, space will be rented, so annual cost at $10/SqFT will be 35,150 or approx. 2929/month however space will not be rented out until April/May of 2018 so $5858 for two months brought up to $5993 to account for variances in pro-rate rate for partial month depending on day we sign lease.

Row 11 - Other

Other Direct Expense Description	Cost
Total Other (Program Budget Line 11)	

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 12)		

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

				$ -

Total Salary	0		$	-	
Fringe rate	20.0%	Total Fringe	$	-	
Total Workforce Development Staffing including Fringe (Infrastructure Budget Line 5)			**$**	**-**	

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Row 6 - Recruitment Expenses

Description of Expense	Cost
Advertising in the local papers and on-line for additiona	$ 1,010.00
Total Recruitment Expenses (Infrastructure Budget Line 6)	**$ 1,010.00**

Provide a description of each recruitment expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Martha's vineyard and Fellowship will both be dedicating resources to recruitment towards obtaining additional staff. MV is budgeting $912 and Fellowship is budgeting $98

Row 7 - Training Expenses

Description of Expense	Cost
Development of training program for pre-go live trainin	$ 7,500.00
Total Training Expenses (Infrastructure Budget Line 7)	

Provide a description of each training expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

SSTAR intends to engage a consultant to develop a training course to be administrated to all staff in preparation of go live on June 1. Course will include workflows, utilization of eHana software, role responsibilities, metrics, and required services. 75 hours at $100/ hr for a consultant to develop/prep/conduct training

Row 8 - Retention Expenses

Description of Expense	Cost
Total Retention Expenses (Infrastructure Budget Line 8)

Fringe rate	20.0%	Total Fringe	$	4,640.00	
Total Program Staffing including Fringe (Infrastructure Budget Line 12)			**$**	**27,840.00**	

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

The data directior will conduct data analysis for the CP program and ensure all data associated with the project are gathered and reported in a timely manner. The data director is responsible for monitoring and reporting on all quality and performance metrics. Additionally the data director serves as a back-up point of contact to the project director for communications/management of the affiliated partners and the state. The data director will be at .35 FTE for November and December, and .5 FTE as the new care management system eHana gets up and running and ramp up activities/preparation increase. Technically the data director averages out at 0.4571428571428571 FTEs for the full 7 months but it seemed easier to break it into two lines.

Row 13 - Other Operational Expenses

Description of Expense	Cost
Administrative costs for contract for MV	$ 1,444.00
Administrative costs for contract for Fellowship	$ 2,021.00
FHR Governance Board Member	$ 701
Total Other Operational Expenses (Infrastructure Budget Line 13)	**$ 4,165.50**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Martha's Vineyard and Fellowship are allocating a portion of their DSRIP funding toward administrative contract costs for $1,444 and $2,021 respectively. Additionally Fellowship will be dedicating an hour a month for a governance board member to attend monthly meetings (was advised by MassHealth to add this here, not to program budget)

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 14)	**9.80%**	**$ 39,977.00**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined: Indirect/Admin costs are expected to adjust in future years however this preliminary funding will be utilized for general overhead costs and the time of the CEO and COO participating in a number of activities in preparation for ramp-up

BH Community Partner - Staffing Model

Insert Contractor Name Here

line #			
1	Estimated number of Engaged Enrollees (including CBFS if applicable) at the end of Budget Period 1	3000	*Should align with Program Budget*

	BH CP Program Staff	FTEs (Do not duplicate FTE - FTE's may be allocated across staffing positons as applicable)	Comment
2	BH CP Director and Assistant/Deputy Director	0.5	*Total management oversight of BH CP*
3	Medical Director	0.5	*Portion of Medical Director allocated to BH CP for the number of enrollees shown in line 1*
4	RNs		
5	Clinical Care Managers (RN)	12	*Do not include FTEs listed in line 4*
6	Clinical Care Managers (LPHA)	3	*LPHA includes LICSW, LMHA, LADC I*
7	Supervisors/Team Leaders	3	*Do not include FTEs listed in lines 4, 5 or 6*
8	Other Licensed Staff		*Do not include FTEs listed in lines 4, 5, 6 or 7*
9	Care Coordinators	60	*FTEs providing Care Coordination (may include Health Outreach Workers, Community Health Workers, Peer Specialists, Recovery Support Navigators providing care coordination)*
10	Peer Specialist/ Recovery Coaches (non-Care Coordination)		*Do not include FTEs of Peer Specialists or Recovery Coaches included in line 9*
11	Intake Coordinators/Engagement Specialists		
12	Administrative Support	1	
13			
14			
	Total FTE	80	

	Staff Ratios - Please calculate the following ratios:		
15	Ratio of RN and Clinical Care Manager (RN) to Assigned and Engaged Enrollees	1:250	*Estimated number of Assigned and Engaged Enrollees at the end of BP1 divided by total FTEs of (RN+RN Clinical Care Managers)*
16	Ratio of Care Coordinator Supervision to Care Coordinators	1:20	*Total Care Coordinator FTEs divided by Total Care Coordination Supervision FTEs*

Please describe which Program staff listed in lines 2 through 8 above directly supervise Care Coordinator staff: Supervisors will be liscensed behavioral health clinicians and each will supervise 20 care coordinators

Section 7.3 Initial DSRIP Participation Plan

A. Executive Summary

1. Goals, identified challenges related to the care delivery system and behavioral health, and proposed solutions to be effectuated through the CP program.
The goals for our Community Partners program are 1) to establish a network of strategic partners to address factors that contribute to high utilization of health services and 2) to improve health and social outcomes for enrollees through an integrated patient-centered care model. SSTAR will partner with a diverse group of organizations such as hospitals, health centers, community-based organizations, housing programs, homeless shelters, private practitioners, and local government entities to achieve these goals. The roles of these strategic partners are varied; they range from affiliated partnerships, which will deliver CP services, to referral organizations that will address social needs such as transportation, housing, food etc. SSTAR plans to implement a variety of evidence-based approaches to improve health and social outcomes for enrollees, including care coordination and management, integration of care, and addressing unmet social needs.

The challenges we currently face in the delivery of care to SMI/SUD patients are unmet social needs (i.e., transportation and housing), coordinating care among multiple providers, lack of insurance due to churn, and stabilization/self-management. Studies have found that addressing a patient's basic resource needs such housing, transportation, and food can significantly improve health outcomes. A recent study by Harvard Medical School researchers at Massachusetts General Hospital found that addressing the social needs of hypertensive patients significantly reduced their blood pressure compared to patients whose needs were not addressed. A pilot project by Kaiser Permanente found that among its high utilizers, unmet social needs was quite prevalent. Based on these and other similar findings, SSTAR and its project partners will place emphasis on addressing unmet social needs to improve health outcomes among enrollees.

A major contributor to poor health outcomes is when patients have multiple providers that are not aware of one another and/or communicate with one another. Our care coordinators will work with enrollees to identify all health and social providers involved in their care. We will work extensively with internal departments and external partners to facilitate communication and collaboration around service delivery so as to reduce duplication of services. Our Behavioral Health Community Partners program will strengthen collaborations with local hospitals so that we can receive daily reports on enrollees who use the ER for non-emergency visits. We also want the hospitals to include us in discharge planning to ensure continuity of care for our enrollees after they have been discharged from the hospital. These types of collaborations will help us to decrease unnecessary health care costs and improve health outcomes for enrollees.

Among residents surveyed for our 2016 Community Health Needs Assessment, 30% reported being uninsured. The most common reason identified for lack of insurance among these individuals is "churn" meaning that they were disenrolled from MassHealth for failing to renew the annual application. Many patients forget that they have to renew their MassHealth

insurance annually. When they fail to complete the renewal application, they often lose coverage and have to start the process over again. Through the BH CP program, we will have care coordinators work with the outreach and enrollment navigators to reduce churn and increase stable insurance coverage. We will make it possible for outreach staff to enroll/re-enroll individuals during community outreach. We will provide laptops for all outreach and enrollment navigators that will allow them to access the Health Connector in during community outreach.

Self-management and stabilization is an important component of care management. One of our outcomes for this project is to have enrollees take charge of their health. We will do this by working collaboratively with enrollees to develop a treatment plan, identify unmet social needs, and provide health and wellness events.

2. The number of Assigned and Engaged Enrollees the Bidder intends to support under the Contract

SSTAR, in collaboration with its affiliated partners and material subcontractor, intends to serve 5,275 enrollees.

3. The Service Areas for which the Bidder is bidding

SSTAR has selected to serve six service areas in the southern region; these are Fall River, Attleboro, New Bedford, Oak Bluffs, Taunton, Barnstable, Falmouth, Orleans, and Wareham.

4. The Bidder's plans to operationalize the CP program and time frames associated with implementing such activities.

Table 3: CP Operational Plan

Period	Activities	Time Frames
Preparation Budget Period	Convene initial BH CP governing committee meeting	November 2017
	Recruit for vacant positions	March 2018- and ongoing
	Recruit CAB members	
	Establish CP Quality Management Committee	Nov 2017- June 2018
	Conduct infrastructure improvements	
	Establish policies and procedures for BH CP	
	Submit Readiness Review to EOHHS	
Budget Period 1	Implement care coordination services	June -Dec 2018
	Conduct orientation and training for care coordinators	
	Conduct quarterly meetings of CAB & QM Committee	
	Develop annual quality improvement plan	
Budget Period 2	Conduct marketing to ACOs and MCOs	Jan-Dec 2019
	Conduct annual trainings for care coordinators	
	Conduct CP program evaluation	
	Revise program services based on evaluation findings	
Budget Period 3	Identify new community partners for referrals	Jan-Dec 2020
Budget Period 4	Continuity of BH CP services	Jan- Dec 2021
Budget Period 5	Conduct outreach to ACOs and MCOs	Jan- Dec 2021

B. Supporting Populations and Community Engagement

1. Connections to the community, including current and planned collaborations and partnerships with community-based organizations.

SSTAR has grown from a 20-bed alcohol detox organization, with an annual budget of less than one million, to a $26 million integrated addiction, mental health, primary care, social service organization with two locations in Fall River. Most services are available at SSTAR's 386 Stanley Street campus. At our more recently-established south end location, 1010 South Main Street, SSTAR operates the Lifeline methadone program, a satellite site for SSTAR's Family Healthcare Center and outpatient behavioral health counseling.

The Fall River organizations with which we collaborate are as follows: Department of Mental Health's new ESP provider for the Fall River area, Boston Medical Center working with Bay Cove, and Vinfen. SSTAR has had long and collaborative relationships with the two hospital systems: Southcoast and Steward. SSTAR subcontracts with Steppingstone—the leading provider of halfway house services in the area—for residential addiction services under our Federal Probation contract. SSTAR currently collaborates with the Fellowship Health Resources to provide substance abuse training, consultation, and direct treatment services to FHR staff and the residents of their community homes in Fall River.

ATTLEBORO

SSTAR's Opioid Triage Center is one of three in the state with a service area of Southeastern Massachusetts, including Attleboro. SSTAR's OTC aims to utilize technology to overcome some of the geographic barriers facing individuals and families affected by the opioid epidemic. SSTAR plans to reach out to social service organizations such as On Common Ground, the Salvation Army, and others that address the social/economic needs of residents. SSTAR works with Attleboro police on overdose prevention. We have a regular referral system with Arbor hospital and utilize a shared medical director for our dual diagnosis unit.

NEW BEDFORD

For several years, SSTAR has been providing substance abuse screening, brief intervention, and case management at the New Bedford Court. In 2015, SSTAR was selected by the Bristol County District Attorney to implement the Drug Court program at the New Bedford Court. SSTAR also has a long-standing contract with Positive Action Against Chemical Addiction of New Bedford to transport its patients to SSTAR for detox admission. As part of the referral network to be established in New Bedford, we plan to collaborate with food pantries such as Mercy Meals and More, organizations addressing domestic violence such as the New Bedford Women's Center for domestic violence, and Catholic Social Services.

TAUNTON

For the past three years, SSTAR has managed an opiate abuse prevention initiative in Taunton funded under a grant from the Bureau of Substance Abuse Services (BSAS). Taunton is one of the service areas for two other addiction prevention grants managed by SSTAR: Massachusetts Opiate Abuse Prevention Collaborative (MOAPC) and Substance Abuse Prevention Collaborative (SAPC). Under the SAPC initiative, SSTAR implements underage

drinking and drug prevention activities in Taunton, Fall River, Dighton, and Norton. Since 2015, the city of Taunton has subcontracted with SSTAR to manage the grant activities associated with their Department of Public Health Bureau of Substance Abuse Services and Partnership for Success grant. The project targets youth prescription drug abuse.

WAREHAM
SSTAR currently serves residents of Wareham and plans to collaborate with the Greater New Bedford Community Health Center. In addition, we will seek referral relationships with Damien Place Food Pantry and Evergreen House, a recovery-housing program.

BARNSTABLE, FALMOUTH, ORLEANS
SSTAR's Opioid Triage Center (BSAS-funded Opioid Urgent Care Center) is one of three in the state with a service area of Southeastern Massachusetts, including the Cape and Islands. SSTAR's OTC aims to utilize technology to overcome some of the geographic barriers facing individuals and families affected by the opioid epidemic. SSTAR is collaborating with Fellowship Health Resources to serve residents in this service area. We plan on establishing referral relationships with shelters such as Angel House and Carriage House, as well as with food pantries such as Nam Vets Association of Cape and Islands Pantry, and the Falmouth Service Center Community.

OAK BLUFFS
In October of 2016, SSTAR entered into an agreement with Martha's Vineyard Community Services and Martha's Vineyard Hospital to reduce opiate overdoses on the island by improving access to detox and care coordination for MV residents. The agreement calls for expedited referral and admission to detox at SSTAR and makes provisions for MVCS Recovery Coach accompaniment of the patient to Fall River, as well as provisions for communication between detox counseling staff and MVCS Recovery Coaches. Our partner MVCS operates a thrift shop providing no-cost items to those in need, and we plan on including Vineyard House, sober- housing, and transportation services through the Lift Van Service and Medivan.

2. How SSTAR will grow its connections to the community in the Service Areas.
SSTAR plans on implementing the following strategies to grow our connections to the service areas we have identified. In collaboration with our affiliated partners and material subcontractor, we plan on identifying new referral resources in order to have a wide array of supportive services that can be offered to our enrollees. We also plan on making some of the trainings we conduct, such as opioid overdose prevention, available to community organizations in the service areas that may need this skill.

3. Plans to ensure staff is informed of community resources over the course of the Contract Term.
SSTAR will develop a secure intranet from its webpage that will allow all care coordinators to find up-to-date information on community resources. Information on housing, transportation, food pantries, etc. will be listed by geographic region. This resource site will also include a monthly calendar of dates of wellness events across the selected service areas.

C. Community Partner Supports and Activities

1. Outreach and Active Engagement

1.a. Planned strategies for outreaching to and engaging with Assigned Enrollees, including individuals who are homeless and hard to reach

SSTAR has employed a wide range of outreach strategies to successfully conduct follow-up among the challenging populations targeted by our many SAMHSA demonstration grants as well as by the studies conducted through our Research Department. We expect that our experience in this regard will be an asset in developing and implementing successful outreach protocols for the BH CP initiative. Initial outreach to referred members will be through phone. It is common for people to change mobile phone numbers or have phone service cut off/run out of minutes. Depending on what information is provided in the referral from EOHHS or the ACO, lack of success with voice phone contact could lead to efforts to contact via email or text. Phone messages, email, and text will be carefully utilized and omit personal information, to protect the individual's privacy. Depending on case information provided, it may make sense to conduct online searches such as checking prison databases and Googling the person.

Once contact has been made and enrollment takes place, the individual will be asked to authorize the BH CP project to contact them through identified "locator" contacts (significant other, parent, child, or friend). They will also be asked to provide explicit consent for the care coordinator to reach out to them through Facebook. Several years ago, SSTAR's Research Department received IRB approval to implement a HIPAA-compliant outreach strategy using Facebook. Researchers found that people who used Facebook tended to check their Facebook page even when their phones were turned off. SSTAR will set up a FB account under a generic name. During the enrollment process, care coordinators will familiarize enrollees with the name and appearance of the FB account. Enrollees will also show their care coordinator what their own Facebook page looks like so we can be confident we message the correct FB account. If contact through traditional means becomes unsuccessful then a private message will be sent through FB messenger, asking that they contact their care coordinator. When this FB outreach was introduced seven years ago as part of a NIDA Clinical Trials Network (CTN) study, the research staff at SSTAR found that it worked very well. The people who agreed to let us use it would call within 30 minutes of receiving a private message.

Another approach that we plan on using is identifying unmet social needs among hard to reach enrollees. The care coordinators initial contact with enrollees will involve having them identify the economic and social factors that are preventing their engagement in care. By having a patient-centered conversation, rather than stressing aspects of compliance with a medical regimen, we think enrollees will have a more vested interest in talking with and engaging with the care manager.

Our affiliated partner HealthFirst Family Care Center will apply aspects of its Complex Care Management (CCM) model to engage enrollees in care. The CCM model delivers care management services to the enrollees' in their homes and offers support and assessments such as health education, disease management, and depression assessment during home visits.

Martha's Vineyard Community Services plans to engage youth and young adults (ages 18-26). Care coordinators from the MVCS Island Wide Youth Collaborative will provide the CP services for these individuals. The care coordinators will connect with enrollees at their residence, through the schools, or make the connection through their clinician. Private practice clinicians and schools will be pints of connection for those receiving care through our outpatient mental health clinic. For adults (ages 26 and above) recovery coaches will provide the care coordination and outreach will occur through their systems of care (DMH, DDS etc.). The recovery coach will connect with consumers at their residence, Daybreak Clubhouse, hospital emergency department, or wherever they are on the island.

1.b. Planned strategies for outreaching to and engaging with Assigned Enrollees with Substance Use Disorders

Mobility is a key strategy for the outreach and engagement of enrollees with substance use disorder. SSTAR plans to use two approaches that are aimed to "meet the client where they are". We will place a care coordinator at Fellowship's residential and supportive housing program and Steward Hospital to outreach to enrollees in need of support. In addition to these placements, care coordinators will routinely travel to local events and area businesses, shelters, and other places where enrollees may likely be. SSTAR will have outreach staff who work with law enforcement and homeless shelter staff to stay actively in touch with enrollees. By monitoring social media, care coordinators may be able to determine where an enrollee may be and if they are in need of outreach. SSTAR will use a University of Wisconsin phone app that works to link enrollees internally to a care manager, along with other key features that help with recovery, including a GPS location feature. SSTAR is currently researching other health and wellness apps and technologies (such as MyStrength) that allow for greater interaction and consistency in connecting with clients.

Fellowship Health Resources (FHR), one of our affiliated partners, will have care coordinators throughout the Cape involved in community outreach. Care coordinators will be working out of FHR's support housing and in the community with enrollees who are living independently. Their roles will be to ensure that the enrollees make it to their medical appointments and self-help meetings such as AA or NA. FHR has agreements with Cape hospitals, health centers, and recovery centers to conduct outreach at their facilities as well.

1.c. Planned process to obtain and document Assigned Enrollee's agreement to participate in CP Supports through a participation form

With the integration of behavioral health and medical health electronic records, the SSTAR has implemented signature pads for enrollees to sign enrollment agreements at the time of the initial visit. In addition, all enrollment questionnaires will document whether or not an enrollee has given verbal consent to participate in CP support. All enrollees will have signed

consent agreements either in a paper record or electronically stored in the EHR via signature pads, or transmitted/scanned in from other sources. Affiliated partners with an EHR will receive an alert to update the treatment plan and remind them when enrollment agreements are due. Other partners will establish a reminder system for updating treatment plans.

2. Comprehensive Assessment and Person-Centered Treatment Planning

2.a. Process for conducting Comprehensive Assessments

A comprehensive treatment planning process will begin at the initial visit and is completed in most cases by the third session. The comprehensive assessment will be completed by a clinician who will interview the enrollee and, if appropriate with proper releases, his/her family and/or support system to assess the enrollee's physical health; psychological, social, economic, educational, functional, and development statuses; vocational assets and disabilities; and a comprehensive drug and alcohol history. Throughout the process, enrollees' strengths, abilities, and needs will be identified. The comprehensive assessment will also capture information on services to be provided, frequency, the service goals described in behavioral terms with timelines, clearly defined staff and enrollee responsibilities, and assignments for implementing the plan.

SSTAR and its affiliated partners will try to obtain input for the comprehensive assessment from the enrollee's primary care provider. The care coordinator will ask the enrollee to sign a release of information in order to contact their primary care provider. The care coordinator will send a request to the primary care provider indicating that the enrollee has engaged in behavioral health services and requesting a copy of the latest physical, a description of past treatment procedures, past and current diagnoses or problems, and currently and recently used medications. If the enrollee does not have a primary care provider, the care coordinator will encourage them to establish a relationship with a primary care provider at SSTAR and with one of our health provider partners. The comprehensive assessment plan will be updated annually.

2.b. Process for conducting Person-Centered Treatment Plans

2.b.1. Planned processes for developing the Person-Centered Treatment Plan, including ensuring the Assigned Enrollee participates in the process

Usually the comprehensive assessment will be completed at the second visit, and the enrollee's treatment plan will be formulated based on their cited goals and objectives for their care. Each treatment plan is patient-centered and focused—the care coordinator will not dictate any goal. The care coordinator may include family members or other supportive individuals at the request of the enrollee in the development of treatment goals. The treatment plan will reflect identified problems, measurable goals of treatment, and anticipated length of treatment to accomplish goals. The enrollee and care coordinator will sign the treatment plan. The treatment plan will include at least the following information:

- The enrollee's strengths, skills, resources, and degree of family involvement

- Type of intervention(s)
- Preferences in terms of counselor, appointment time, and services
- Treatment goals with observable and measurable objects
- Time frames for accomplishing goals
- Enrollee's signature on the treatment plan indicating their involvement in its formulation
- The date the plan was last reviewed and/or revised
- Clearly defined responsibilities and assignments for enrollee and staff in implementing the plan.
- The signatures and licenses of the clinical supervisor reviewing and/or revising the treatment plan

2.b.2. Planned processes for documenting the Person-Centered Treatment Plan
SSTAR and all affiliated partners, including the materials subcontractor, have an EHR that will allow us to maintain the treatment plan in the electronic record.

2.b.3. Planned processes for updating the Person-Centered Treatment Plan
At a minimum, the care coordinators and enrollees will review treatment plans and goals every six months or sooner if there are major changes in health or achievement of goals/objectives. When goals/objectives are achieved or new ones are added, this will be reflected in the treatment plan.

2.b.4. Planned process for ensuring the Assigned Enrollee and the Assigned Enrollee's PCP or PCP Designee approve the Person-Centered Treatment Plan
Enrollees that have a PCP at SSTAR or at our community health partners' sites, the plan will be in the EHR or other health information system for them to review and approve. If an enrollee's PCP is outside of the organization, the care coordinator will work with the medical practice to get the plan approved if the enrollee has signed a release of information form. SSTAR will work with external PCP practices to explore electronic transmission options using secure data transmission resources.

3. Care Coordination and Care Management

3.a. Identifying stakeholders involved in an Enrollee's care
As part of the comprehensive assessment, enrollees will be asked to provide the names and contact information for all health and social service providers, state agencies, and others involved in their care. The care coordinators will first contact these stakeholders by phone to inform them of our involvement with the enrollee. If care coordinators are unable to reach them by phone, then written communication will be sent out either by email or regular mail.

3.b. Exchanging information with such stakeholders
Upon initial contact, enrollees will be asked to sign a release of information form for their primary care provider and other support service agencies in order to obtain medical and service records. SSTAR has a number of approaches for exchanging information with providers to facilitate enrollees' care coordination. The method of transmission will depend on the capabilities of the provider in question; however, SSTAR is capable of both sending

and receiving electronic information via interfaces with NextGen Share, FTP, Mass HIway, encrypted email files, etc. As an ONC certified system, NextGen conforms to the HL7 standards for transferring clinical and administrative data between applications so, for all providers who are also on an ONC certified system, SSTAR will be able to transmit information back and forth electronically through the transmission of CCDAs. SSTAR is working with its affiliated partners to explore setting up more robust interfaces to support the regular transmission of information that is expected to be required in supporting this contract. SSTAR also has relationships with local hospitals and is pursuing expanding its capabilities to receive more information from them in an electronic format to better facilitate rapid awareness of enrollee hospitalization.

3.c. Identifying and organizing members of the Enrollee's care team

All enrollees participating in the CP program will have a care coordinator as a member of their team. Other medical and service providers that will be part of the team will depend on the enrollee's request that such a provider is included on the care team or if the provider is able to be part of the care team. SSTAR and affiliated partners with medical staff will not have much difficulty involving medical providers as part of the team. For those that are more social service-based, it may be difficult to formally include a medical provider on the care team. In these cases, we will request input for care coordination as appropriate or requested by the enrollee.

3.d. Ensuring effective ongoing communication across all stakeholders, including exchanging essential documentation

SSTAR and its Community Partners will make every attempt to include enrollees' PCP, outside agency providers, in the care coordination activities for the enrollee. When an enrollee has issues related to medical care, input from a PCP will be sought. For other service providers that are outside of the organization, we will invite them to care planning meetings and/or have them participate through teleconference or email communication.

4. Care Transitions

An enrollee may transition out of the CP program for the following reasons:

- ***The treatment plan goals have been successfully achieved and no further care coordination intervention is warranted.***
- ***The treatment plan goals have been successfully achieved, and although other issues have been identified, the enrollee is not willing or able to continue treatment on the other identified issues at this time. In this event the enrollee will be provided information on how to access CP services if they want to reenter into care.***
- ***The client expressed the desire to not continue with the care coordinator and/or behavioral health team, in which case the enrollee will be referred by the care coordinator to another team within the organization or to another CP.***

In all care transitions that involve the enrollee accessing services with another organization, SSTAR and its affiliated partners will assist the enrollee in identifying a new service provider and arrange meetings with the new provider to introduce the enrollee. Care

coordination services, such as arranging for transportation to the site or visiting the site with the enrollee, will be offered. All records that are required for a smooth transition of services will be shared with the new provider after the enrollee signs a release of information form.

5. Medication Reconciliation

Care Coordinators will obtain a complete and accurate list of each enrollee's current medications (including Name, Dosage, Frequency, and Route). Medications will be verified in several ways.

- Enrollees may bring medications in an up-to-date container. The medication should match the description on the bottle. If the medication is out of date, care coordinators should inquire why and, if the enrollee wants to restart it, contact a medical provider.
- Care coordinators will call the prescriber's office if the enrollee has an outside PCP.
- A call to a pharmacy may be placed to confirm medication dosage, frequency, etc.

Reconciliation will be done minimally at admission to the CP program, discharge, and whenever medications are changed. All medication information will be entered into an electronic medical record or paper medical record.

6. Health and Wellness Coaching

6.a. Health and wellness education, coaching and health promotion programs

Through several programs, including our SAMHSA health integration project and MBHP Practice-Based Care Management program (PBCM), all patients are sent mailings, as well as local flyers inviting them to a variety of wellness activities. On a weekly basis, SSTAR offers over 10 wellness groups on a variety of topics such meditation, healthy cooking, medical screenings, and walking programs to more social activities like painting for relaxation, journaling and mindfulness techniques. Enrollees will be able to participate in these programs at SSTAR and at affiliated partner sites that offer health and wellness classes. In instances where our partner organizations do not offer these activities, the care coordinators will be able to link enrollees through referral to community resources such as the YMCA.

6.b. Methods for ensuring the Engaged Enrollee's goals for the health and wellness programs are recorded and tracked

During treatment planning, enrollees will be asked to identify at least one health and wellness goal. Depending on the goal that the enrollee is working on, we will research and access free mobile apps that can be used to help them stay engaged. In addition, SSTAR will use text-messaging software that care coordinators can use to send reminders and messages of encouragement to enable enrollees to meet their goals. The information on the health and wellness goals and progress will be kept in the EHR.

7. Connection to Community and Social Services

7.a. Plans to evaluate Engaged Enrollees for social service needs
Enrollees' social service needs are evaluated during the initial interview, which will include an HRQOL (Health-Related Quality of Life) measuring healthy days, along with questions that focus on barriers to care. The utilization of an assessment tool will facilitate clear identification of social needs rather than direct questions or confrontation about medical or behavioral needs. These measures focus on the impact that the health or behavioral health status has on quality of life, as well as assess for positive, supportive factors.

7.b. Ensuring Care Coordinators are familiar with a wide breadth of social services and supports, and providers of these supports
As part of the CP's planned meetings, care coordinators will meet regularly to review member activities and discuss/share information about various services at their agency and in the community. This process will ensure that all care managers are knowledgeable about available resources in the community. In addition to these meetings, all care coordinators will have access to online support tools and services that allow for on-demand learning and communication. Care coordinators will have access to Office365, available on their phones and computers to share resource information, ideas for a new program, etc.

7.c. Planned strategies for collaborating with ACOs to recommend Flexible Services on behalf of Engaged Enrollees, and following-up on the outcomes of such supports.
Care coordinators will be in regular contact with the enrollee's ACO in terms of overall care management and, when indicated, Flexible Services. The care coordinators will recommend Flexible Services based on information gathered in the comprehensive assessment, care planning, and care coordination processes. Recommendations such as air conditioners for asthmatic children, housing support for enrollees with unstable housing, etc. will be common as part of the care coordination process. Flexible Services will be an agenda topic at each quarterly CP meeting so that staff carrying out CP activities across SSTAR and all affiliated partners and the material subcontractor will have a high level of knowledge of available Flexible Services they can recommend. While it will be the ACO's responsibility and decision to approve recommended Flexible Services, the care coordinators will be responsible to follow-up on any approved Flexible Services. This includes working with the patient to ensure they receive the approved services, helping to remove any barriers to receiving the services, and tracking the outcomes and reporting back to the ACO once the services have been received.

D. Innovative technologies for service delivery
SSTAR's Community Support program and Recovery Coach services rely on cell phones and text messaging to maintain contact with the clients on their caseloads, and we expect all the care coordinators will adopt these tools. Mobile phone apps have also been incorporated in various services at SSTAR. SSTAR was a founding member of the ACHESS research consortium that evaluated the effectiveness of a mobile phone app to support recovery. Patients at SSTAR's Methadone Maintenance program are now using this app, and we expect to be able to offer its use to enrollees through the BH CP. Among the popular features of this app is the group chat with other recovering clients, a daily check-in questionnaire that

produces a graph representing recovery risk and resilience levels over time, and feedback to care coordinators alerting them of a need for help.

Telehealth strategies are currently used to link an off-site psychiatrist to the daily team meeting on SSTAR's dual diagnosis unit. We're using a HIPAA-compliant video conferencing platform, a large TV monitor in the team room with the psychiatrist participating remotely, and the client record from our electronic health record displayed as well. Care coordinators and enrollees in geographically distant locations may be offered consultation to care coordination and/or care conferencing via this technology. SSTAR's classroom has a large interactive whiteboard that works well with video and audio conferencing. Through these tools, remote access to governance, the advisory board, and other meetings will be an option for those who cannot attend in person.

Care coordinators will have tablets linked to the project's EHR/Care Coordination software for both inquiries and entry of service notes. When services are provided in the community, enrollees will be able to sign treatment plans and other documents digitally via the tablets.

E. Personnel and staffing

1. An organizational chart of CP program staff

Please see attached organizational chart.

2. A sample staffing model for the number of Engaged Enrollees in each Service Area

Table 4: Estimated Number of Enrollees by Service Area

Service Area	Estimated Number of Enrollees	Agency Responsible for Care Coordination	Care Coordination FTEs	RN FTEs
Fall River	2500	SSTAR, HealthFirst, Fellowship Health Resources	50	10
New Bedford	900	Greater New Bedford Community Health Center & Fellowship Health Resources	18	3.6
Barnstable	500	Fellowship Health Resources	10	2
Orleans	425	Fellowship Health Resources	8.5	1.7
Falmouth	250	Fellowship Health Resources	5	1
Taunton	250	SSTAR	5	1
Attleboro	200	SSTAR	4	.8

Wareham	150	Greater New Bedford Community Health Center	3	.6
Oak Bluffs	100	Martha's Vineyard Community Services & Fellowship	2	.4

3. Recruitment plans including timelines to recruit staff for any personnel positions not currently filled, and job descriptions and qualifications for each personnel position.
SSTAR and its affiliated partners plan to reallocate time of some current employees providing care management and related services under other programs such as Recovery Coach and CSP to the BH CP. Each partner has some nursing care management staff a portion of whose time could be reallocated as well. Beginning in Spring, we and our partners will begin recruitment of additional staff . Staff recruitment will be an ongoing effort as caseloads increase.

4. Recruitment and hiring of staff from the cultural and linguistic communities
SSTAR will make every effort to recruit and retain staff that mirror our population of focus. We will work with local organizations and community groups to identify qualified individuals that have the cultural competency and language skills to serve our population. As we recruit for care coordinators, we will advertise in local media and job search sites. In our job descriptions, bilingual/bicultural personnel will be clearly stated.

5. Proposed training, orientation plans and modules for staff
SSTAR will provide training for all our care coordinators and those of our affiliated partners and subcontractor at initial hire and annually. This training will consist of basic information about mental illness and substance abuse, health and wellness principles, trauma informed care, client-centered assessment/treatment planning, monitoring, and follow-up. Overdose prevention training will be included for all staff. Staff not proficient in using Motivational Interviewing and Family Systems will be afforded additional training in these modalities. Likewise, staff that have not been trained in SBIRT will be trained. For SBIRT training, we will conduct annual SBIRT trainings and professional development for all care coordinators. Staff will have access to an online learning platform, Relias, which, in addition to required trainings related to all disciplines employed, is also customized to include agency-specific trainings and competency exams. SSTAR's EHR trainer is adept at creating online courses for staff that are job and site specific. In so doing, she can create training programs that review social services and supports with required competency tests at the completion of each module. Since the system is available to staff 24/7 and is self-paced, all staff can complete trainings at times that are most convenient to them. In addition to the topics outlined above, we plan to conduct focused training on the following curriculums, models, and standards.

Training for cultural competency: Targeted to all care coordinators, training will focus on sensitivity to the cultural context in which referral, assessment, and treatment occur; recognition of individuals cultural backgrounds, belief systems, the role of spiritual practice; traditional remedies in both assessing the problem and in designing and carrying out

interventions; understanding DSM-V culture-bound syndromes; and effective treatment regimens in minority populations.

Recovery Support Navigator program: SSTAR will utilize an existing curriculum based on the SAMHSA Recovery Support Imitative (SAMHSA Financing Center of Excellence). Training will include substance abuse care, motivational interviewing, and group coaching. The Brief Negotiated Interview and Active Referral to Treatment (BNI-ART) Institute, a program of Boston University's School of Public Health, will provide training. The BNI was originally developed for use in the emergency departments and has been reviewed in several studies demonstrating lasting, positive changes in health behavior. It is a patient-centered intervention and intended to be brief.

Case Management Society of America (CMSA): SSTAR will include Standards of Practice and Care for Case Management in its training for care coordinators. The standards outline knowledge, skills, and competencies for professional care managers with a focus on collaborative care coordination. It was developed by nurses and provides a thorough approach and understanding of how care management should work.

Nonviolent Crisis Intervention (NVCI): All care coordinators will participate in training for staff that may conduct home visits to enrollees' homes. SSTAR has an NVCI-certified staff that can train care coordinators. Our staff is trained in and uses the program designed by the Crisis Prevention Institute (CPI). CPI was established in 1980 to train staff to use respectful, noninvasive methods for managing disruptive and assaultive behavior.

ARISE: A family engagement model that uses an invitational approach to help family members help individuals with substance abuse disorder seek treatment. SSTAR has on staff certified ARISE interventionists who are certified supervisors and provider/interventionists. Our staff have been trained by the founder of ARISE, Dr. Judith Landau, who has spent over 50 years developing, implementing, and training providers in this model. Research studies have demonstrated the effectiveness of ARISE in that 83% of individuals entered into treatment as a result of family intervention.

6. Description of staff retention strategy

SSTAR has a robust retention strategy in order to attract the most qualified staff. We offer a competitive salary and benefits package and generous earned leave time. Our health benefits include dental and vision, and a 403b retirement plan is also offered to all employees. When possible, tuition assistance and training/education opportunities are afforded to staff. SSTAR also participates in the National Health Service Corp loan repayment program for all licensed providers. We work with staff to manage work/life balance and to further their education by providing flexible scheduling and support. Currently medical doctors receive $3,000 for continuing medical education, and other licensed clinicians receive $2,000 in continuing education annually. We also pay for all health providers' licensure and certifications.

F. Implementation Plan and Timeline

Please refer to attached monthly and quarterly implementation plans.

G. Budget Report and Budget Narrative

Please refer to Attachments B and C for Budget Report and Budget Narrative.

H. Sustainability

DSRIP funds will be used to purchase software, consultation, and hardware to facilitate electronic communication among the sites that relate to care coordination functions, data collection and analysis, etc. These funds will also be used to offset initial staff recruitment costs, training and staff wages during the start-up period. Once the BH CP services are fully operational, the staff costs will be sustained by service-related revenue. As much as possible SSTAR will try to reduce cost by using models such as training the trainer for new care coordinators and e-learning tools such as Relias for professional development requirements. The IT and related expenses are primarily one-time start-up costs. Maintenance of these systems represent a level of expense that would be sustainable through each partner's general operating revenue including the BH CP service-related fees. Other income sources such as shared savings/quality performance bonuses through the ACOs is another means by which the infrastructure and capacity building projects implemented will be sustained.

I. Quality Management and Performance Monitoring

1. A description of the Bidder's quality improvement program

SSTAR's agency-wide Q/I Committee is made up of a selected group of staff members who are responsible for collecting and reviewing data on performance-based activities in clinical and program areas. We perform reviews of regulatory compliance and compliance with clinical standards and identify areas where corrective measures are needed. Periodically, we administer patient satisfaction surveys by program to help identify issues coming out of a patient's experience. Our organization also does chart/record audits conducted by clinical teams of program managers on a periodic basis throughout the year. Upon completion, results are discussed with program managers in order to address identified issues.

For the CP program, SSTAR in collaboration with its Affiliated Partners will establish a quality management/quality improvement committee within three months of the planning phase. Each partner will assign a representative to participate on the CP QA/QI committee, and a chair of this committee will be selected among the representatives. Members of the committee will develop a plan annually on a selected area of care such as chronic disease management, care transitions, care management, etc. The annual QI plan to be developed by the committee will include goals and measurable objectives for the selected area of care and a timeline for meeting objectives. Similar to our current QI Committee, the CP's committee will use PDSA Cycles: Plan-Do-Study-Act. The PDSA Rapid Cycle will allow us to identify areas

for improvement, implement interventions, and measure changes over periods of three months rather than the standard eight to twelve months. As the lead organization, SSTAR will ensure that data reporting for quality measures are gathered and stored in a central database that can be accessed by our partners for data sharing. The committee will establish that the frequency of data is collected to allow enough time for data review and analysis prior to the annual submission to EOHHS.

2. Quality initiative for Budget Period 1, including measures for success
*Quality Improvement Area***:** Care Coordination and Care Management
Care coordinators will complete a comprehensive assessment for each enrollee who signs a participation form.

Evaluation Method: The clinical manager will review EHRs of enrollees for completed comprehensive assessments.

Measure of Success Goal: 80% of enrollees with a signed participation form will have a completed comprehensive assessment.

3. The functions of the Bidder's quality committee, including the composition and reporting structure within the Bidder's organization.
SSTAR's organization-wide Medical Quality Improvement Committee (Q/I) utilizes a total quality management approach. It is multidisciplinary and members include senior managers and health center staff, who are encouraged to participate in a systematic approach to planning and implementing a continuous organizational improvement process. Its approach is focused on satisfying customers' expectations, identifying problems, building commitment, and promoting open discussion among workers. We use PDSA Cycles: Plan-Do-Study-Act as our process. This method allows for rapid cycle testing on a continuous basis. Quality indicators are monitored and reported monthly. CP program indicators will be added to the Q/I committee, and a member of SSTAR's CP staff will participate on the committee. The Q/I Committee addresses critical issues and monitors compliances to identify potential problems, which could impact client care and staff performance and ensure that corrective action has been instituted and quality of care is improved. The Q/I Committee identifies ways to improve and standardize internal communication, implement client and staff satisfaction surveys and improvement processes, and streamline programmatic data collection to measure success. The Medical QI committee submits quarterly reports to the Board of Directors.

J. Coordination with ACOs and MCOs

1. Communicate skills, expertise, and value to potential ACOs and MCOs

SSTAR has a 40-year history in Massachusetts, and our programs are well-known to the Accountable Care Organizations (ACO) and Managed Care Organizations (MCO) in the service areas selected for this project. As an integrated primary/behavioral health organization, we were chosen by the ACOs in our area to become part of their primary care network. We have now met with three of the ACO's in our service area (Boston Medical Center, Southcoast Hospital Group, and Steward Health Care Systems) to discuss our interest in providing care management services. We have also met with the Beacon MCO, which will

be providing managed behavioral healthcare for both BMC Health Care and for Southcoast ACO. We have agreed to work with Beacon MCO in order to provide the best quality care for our clients. For the past three years, SSTAR has been working with Beacon's subsidiary MBHP on a pilot care management for its highest utilizers. The project has produced meaningful outcomes and was extended by Beacon beyond its initial pilot phase.

SSTAR has a long history of collaboration with the two largest ACOs in Fall River—Southcoast Hospital Group and Steward Health Care Systems—and will be able to build on these existing relationships to collaborate on new care management services. Similarly, SSTAR has a long-standing history of collaborating with many MCOs in the state including MBHP, Beacon, and Blue Cross/Blue Shield Foundation on demonstration projects and grants. SSTAR's experience in implementing projects collaboratively with ACOs/MCOs is a powerful marketing tool. Our knowledge of their organizational structures provides the necessary skill sets to craft a successful marketing strategy. For example, knowing the roles of medical directors, clinical practice committees, etc. in these organizations will help us more accurately and successfully market our services. We also know that a marketing strategy that is education-based rather than sales-based will increase the likelihood of success in collaborating with ACOs/MCOs. SSTAR is well positioned to market to and communicate with local ACOs, and our experience offers a valuable option for these entities when selecting organizations that can best meet their needs and that of their enrollees.

2. Branding and marketing plans to ACOs and MCOs

SSTAR's marketing strategy will be to develop collateral materials such as brochures, newsletters, etc. that highlight our reputation as an integrated behavioral health care organization that uses a whole-person approach to care delivery. As one of the first agencies to integrate care at the start of the HIV epidemic, SSTAR has built a reputation as a holistic/multi-service provider. With nearly 40 years in the field of integrated care and addiction treatment, SSTAR has developed many significant relationships with area ACO's and MCO's and has direct contact with their decision-makers. Our marketing plan will be to highlight our decade-long relationships with ACOs and MCOs and showcase our care delivery approaches that are grounded in innovative research, evidence-based practices, and professional educational training. We plan to hold workshops and seminars on these research findings and practices for ACOs and MCOs, as well as for other area providers. In addition to live events, we plan to use our local media and social media platforms, such as Facebook and Twitter, to bring greater awareness to our services.

3. Strategy to engage and collaborate with multiple ACOs and MCOs in the proposed Services Areas

SSTAR has already established relationships with many of the ACOs and MCOs including Beacon, MBHP, NHP, and others. We will continue to engage and collaborate with all ACOs and MCOs in our area. Our plan is to have an open line of communication with these organizations by holding frequent meetings to discuss and develop procedures, protocols, and responsibilities for the new CP program. SSTAR is also planning on developing training and educational sessions that will be beneficial to the CP/ACO/ MCO partnerships.

4. Strategy for conflict resolution with an MCO or ACO

Conflict often arises simply due to a lack of clear and consistent communication. SSTAR will strive to keep all lines of communication open and provide clear lines of communication so that both organizations' staffs will know the proper channels to discuss potential issues. We are planning to use a variety of communication channels such as telephone conferences, emails, and face-to-face meetings. In the event that one form of communication breaks down, we will try other means to resolve any misunderstandings. For example, should verbal communication not clarify an issue, SSTAR will encourage written communication. Written communication may provide a more effective way to clarify issues, and it offers a means of documenting issues that can be referred to at a later date. If a conflictual situation arises in working with an MCO or ACO where both organizations cannot reach an agreement, then the assistance of a third party mediator will be used to reach a mutually agreed upon solution.

Section 7.5 Initial DSRIP Participation Plan

A. Executive Summary

1. Goals, Challenges, and Proposed Solutions

Goals. Our strategic business plan affirms our commitment to EOHHS' goals for the LTSS Community Partners(CP) program over the next five years.

EOHHS' Goal	CCHP/LTSS Approach
Improve the Enrollee experience and quality of care for Enrollees with LTSS needs	• Invest in initiatives to increase Enrollee awareness of available services and supports such as education that targets increasing understanding of health care needs and services • Promote Enrollee access to services
Create opportunities for ACOs and MCOs to leverage the expertise and capabilities of existing CBOs	• Work with our partners to implement consistent practices across our programs that support LTSS services to manage high-risk populations including Transitional Care Management • Invest in new technology and workforce
Improve collaboration across ACOs, MCOs, CPs, and CBOs to address social determinants of health through collaborative efforts	• Prioritize expansion of community linkages with ACO Plans, medical and behavioral health providers, other community partners, and social service providers • Invest in and support initiatives that promote a shift from institutional care towards community-based LTSS as well as our community-based primary and preventative care • Collaborate/partner with programs that address Enrollees' social service needs and establish linkages with social service organizations
Support Enrollees with complex LTSS needs and help them to navigate the system	• Develop educational materials and opportunities (community forums, classes) to inform Enrollees and families of available services and supports • Implement consistent processes across organizations to coordinate care

Opportunities and Proposed Solutions. The MassHealth LTSS CP program requirements create both opportunities and challenges for our collective organizations. Our success as an LTSS CP will be defined by our ability to re-define ourselves, including our capacity to integrate LTSS and Behavioral Health (BH) services for the highest-risk MassHealth Enrollees within our Central Community Health Partnership LTSS (CCHP/LTSS) and CCHP BH organizations. We also see challenges and opportunities in partnering with ACOs, State agencies, medical and BH providers, ancillary service providers, and Community-based Organizations (CBOs) to coordinate care to meet Enrollee needs in the least restrictive setting of the Enrollee's choice.

CCHP/LTSS recognizes an opportunity to design and implement an integrated care model that has the potential for better, sustainable outcomes at a lower cost to the State. We have the opportunity to integrate BH and LTSS services for Enrollees we already serve within our organizations. Maintaining this level of continuity and trust is ideal for the Enrollees we serve as they can receive the full array of services in one location through a trusted source of care.

The CCHP/LTSS timeline calls for a rapid pace of implementation to conduct complex work. CCHP brings a major advantage, given our existing strong relationships with ACO Contractors and their Partners in our geographic catchment area.

CCHP/LTSS recognizes the importance of sharing assessments and care plans across the full provider continuum and of conducting reporting activities. We will work closely and collaboratively with the State and ACOs to develop efficient technology solutions that bring the various stakeholders together rather than developing independent systems that do not speak to one another.

2. Number of Assigned and Engaged Enrollees

CCHP/LTSS intends to support approximately1,000 Engaged Enrollees under the Contract by the end of Budget Year 1 and grow to support over 1,700 Engaged Enrollees in Budget Year 5.

3. Service Areas

CCHP/LTSS is bidding to provide LTSS CP services in most of the service areas within the Central Region. The same group of organizational partners (identified as CCHP/BH for which The Bridge is the Lead Agency) are also bidding to provide BH CP services the same service areas. See Section 7.2.A. Attachment D.

4. Plans to Operationalize the LTSS CP program

Implementing the Plan. During 2017-2018, CCHP/LTSS will implement the LTSS CP start-up requirements to deliver the required services and supports on Day 1 of Contract start. We will conduct significant contracting efforts that establish key organizational and governance structures and roles, define significant contractual relationships with our network providers and ACOs, build operational functions, work flows, policies and procedures and prepare for the Readiness Review. Once the Contract is operational and basic requirements are met, CCHP/LTSS will enhance and improve our competencies, including our capacity to serve more Enrollees; the breadth and depth of our relationships with ACOs, and CBOs; and our IT capacity. Together, our work will evolve over time in a manner that enhances the Enrollee experience and improves their health outcomes.

A summary of our five-year plan follows.

B. Supporting Populations and Community Engagement

1. Connections to the Community and Community Members

Existing Community Partnerships	
Organization	**Description**
Community-Based Organizations (CBOs)	Our LTSS CP has a history of developing strong community connections. We actively engage with CBOs in our Service Area including, but not limited to the United Way organizations in each of our Service Areas, Archway, Youth Connect, City of Worcester DPH, Coalition for a Health Greater Worcester, the Spanish American Center, CENTRO, the YWCA, Worcester Community Action Council, Community HealthLink and other Federally Qualified Health Centers. We will build on these existing relationships to develop and sustain connections to CBOs and augment our portfolio of services and competencies.
Advocacy Groups	We collaborate with organizations such as The Arc of Massachusetts, Association of Developmental Disabilities Providers, the Brain Injury Association of MA and Mass Advocates Standing Strong.
Behavioral Health Providers	We work closely with community-based BH providers to coordinate care by referring Enrollees to providers including: Community Healthlink, Riverside Community Care, CHL Lipton Center, UMass Memorial and affiliates, Heywood Hospital, The Griswald Center, The Wells Center, Harrington Hospital, South Bay Intervention, Justice Resource Center, Advocates, Inc., South Middlesex Opportunity Council, Clinical and Support Options and Center for Human Development, among others.
Housing/Shelter Providers	We work closely with the City of Worcester's Executive Office of Economic Development, Office of Housing Development, on a program funded through an Emergency Solutions Grant to provide support for homeless individuals who have mental health and substance use challenges. We serve on the Worcester County Continuum of Care Committee and partner with the Central Massachusetts Housing Alliance and others to address homelessness in the area. Additionally, we partner with organizations such as Central MA Housing Alliance (homelessness continuum of care) and various housing agencies to link Enrollees to housing services.
Social Service Organizations	We have close relationships with social services organizations including Worcester Community Action Council, Employment Options, and Genesis Clubhouses. We also directly refer Enrollees to agencies such as: Montachusett Opportunity Council (child care, education, workforce development, nutrition, health, community services, asset development, energy conservation and housing and homelessness services), Our Father's House, Gardner Community Action Committee, The Hoyt Foundation, Friendly House, and Daybreak for emergency housing; South Middlesex Opportunity Council; and, Central MA Housing Alliance.
State Agencies	We maintain contracts and long-standing relationships with MassHealth, Department of Public Health, Department of Developmental Services, Department of Mental Health, DPH-Bureau of Substance Abuse Services, Department of Children and Families, Massachusetts Rehabilitation Commission, local Health Departments, and others.

Participation in Community Health Needs Assessments: We participated in the Central MA Regional Public Health Alliance, which has enabled us to develop relationships with CBOs and gain an understanding of Service Area needs.

Examples of successful community connections: Alternatives successfully links individuals served with local community organizations by training its staff as 'community connectors,' mapping the community resources available in each locality, and matching individuals' preferences with available organizations. Examples include: matching aspiring actors with community theater groups; music lovers with community concert bands; volunteers with churches that host community suppers; and book lovers with local book clubs. We will apply the lessons learned to other collaborative community connections and continue to expand our relationships within the communities we serve while combatting pervasive social isolation.

Link to Business Plan: CCHP/LTSS sees multiple opportunities to link our community connections and our business plan. We seek to increase sharing of information using IT connectivity with ACOs and MCOs. One prospective ACO has committed to including CCHP/LTSS in a secure text and email-based system to alert the appropriate Care Coordinator if an Enrollee is hospitalized at one of four community hospitals. Going forward, we will enhance overall connectivity with CBOs beginning in year two.

2. How We Will Grow Community Connections

CCHP/LTSS will continue to assess Enrollee needs and community services and develop creative solutions to grow those connections. We will also enhance our ability to identify and address social determinants of health such as housing, food, and safety, breaking down existing silos and improving care integration.

3. Maintaining Information on Providers and Community Resources

We will systematically update information regarding community organizations as changes occur and, as we add organizational relationships to serve Enrollees within:

A Community resource guide: We will develop and maintain a community resource guide as a reference for staff in both hard copy and electronic formats.

Staff training: CCHP/LTSS will organize and conduct on-going educational sessions for staff during work hours, including community resource information and updates during new staff orientation, staff conferences, invited guest speakers from community organizations, and participation in community events.

Care Team meetings: The Care Team will review community resources included in each Enrollee's Patient-Centered Treatment Plan and will consider services and relationships with additional community organizations. We will review available options with Enrollees during Care Team meetings and educate the team regarding available services and supports.

Website updates/newsletters: CCHP/LTSS will develop and issue electronic information updates to ACOS, MCOs, CBOs and other stakeholders regarding key developments within CCHP/LTSS.

C. Community Partner Supports and Activities

1. Outreach

a. Locating and Engaging with Assigned Enrollees with Complex LTSS Needs

We will employ all available resources to locate and engage Assigned Enrollees who have not otherwise been engaged in services. As we do today, our approach will begin with understanding the Enrollee's needs, as they define them. We will seek to meet their basic needs by building rapport and trust and connect Enrollees to services without making them feel uncomfortable, judged or threatened. Our key outreach strategies, which are in place today, include:

CCHP meets the Enrollee at any available location in the community where they are personally comfortable and that the Enrollee selects. This includes their home, neighborhood locations, tent cities, motels, shelters, or congregate meal sites among other locales. We connect with the Enrollee and build trust, regardless of where we physically meet. During all contacts, we respect Enrollees and their families and seek to create an open, safe, friendly environment.

We will continue to hire highly qualified, skilled individuals who are trained in motivational coaching and understand cultural and linguistic needs. CCHP/LTSS staff are skilled at interacting with Enrollees with intellectual impairments, complex medical conditions and poor behavioral self-control and, are experienced at serving individuals on the autism spectrum. We will continue to hire staff with demonstrated skill and experience serving Enrollees with complex needs and that understand cultural, linguistic and other needs.

Engagement Process. CCHP/LTSS will employ Bachelor's level LTSS CP Care Coordinators to perform outreach, assessment, care planning and care management tasks for Assigned and other potential Enrollees. CCHP/LTSS will make at least three attempts, including at least one attempt to contact the Assigned Enrollee face-to-face, unless the Assigned Enrollee wants to meet telephonically.

CCHP staff will obtain a participation agreement to confirm that the Assigned Enrollee wishes to participate in the delivery of LTSS CP services and will assign a Care Coordinator within five business days of receiving the signed participation form.

The initial LTSS visit will occur within three months of the Enrollee's assignment to CCHP/LTSS. Using motivational interviewing techniques, our Care Coordinator will explain how this initiative can help the Enrollee achieve their goals. CCHP/LTSS Care Coordinators will explain that the program is intended to help Enrollees overcome barriers to care; build a support network; and introduce ways to participate in community activities to improve their well-being. We will also explain the anticipated frequency and type of interaction available for CP service delivery.

If appropriate, CCHP/LTSS will make the first in-person contact during an acute care event at a local hospital, taking care to ensure that the Enrollee is comfortable. In this manner, CCHP/LTSS partners will proactively participate in the Enrollee's transition of care at the outset of their enrollment. Our Care Coordinator will explain that the Enrollee can opt out of receiving CP services at any time. Enrollees will also be able to request assignment to a different staff

member within our organization or assignment to a different EOHHS-designated LTSS CP at any point in time. We will further provide information on how to access the LTSS CP organizations' website and Consumer Advisory Board or an LTSS CP. Individuals who choose not to enroll will be provided with contact information should they choose to enroll later, and will be asked if periodic outreach from an advocate is acceptable.

Staff will provide individuals that choose to receive LTSS CP services information regarding the benefits, design, and purpose of LTSS CP supports. This information will be offered in written and verbal formats and will be available to Enrollees' in their primary preferred language for the most commonly spoken languages among the population served. Information regarding the LTSS CP service delivery process will focus on helping the Enrollee understand how to engage with their Care Coordinator. For example, we will provide Enrollees with detailed information regarding how to reach their LTSS Care Coordinator.

At the initial meeting, CCHP/LTSS staff will assess the Enrollee's needs in their primary preferred language with attention to cultural beliefs, building upon the ACO's Comprehensive Assessment. When a CCHP/LTSS Care Coordinator meets with the Enrollee, our staff will confirm the Enrollee's needs, as they define them, and provide support to help the Enrollee understand their LTSS options. CCHP/LTSS staff will develop an LTSS Care Plan under the direction of the Enrollee or their representative, if appropriate. The Care Plan will be based on the Comprehensive Assessment and conversations with the Enrollee and the Care Team. Where possible and desired by the Enrollee, the Care Coordinator who performs the initial contact with the Enrollee will serve as the LTSS CP Care Coordinator on an ongoing basis and will take a leadership role in delivering LTSS services as part of the Care Team.

If the Enrollee has both LTSS and BH CP needs, the BH CP Care Coordinator will serve as the primary contact. Within CCHP/LTSS, the BH CP coordination staff have the distinct advantage of being dually trained and can reach out to an LTSS Care Coordinators within the organization at any point in time, especially for Enrollees who are seen by CCHP/LTSS providers for both BH and LTSS services. This is the major reason that CCHP is applying to provide both BH and LTSS CP services; our qualifications to provide both sets of services afford an ideal level of coordination and convenience for Enrollees.

2. LTSS Care Planning

a. Ensuring Enrollee Meaningful Participation in Care Planning

We will place the Enrollee at the center of their Care Plan development and support them in communicating their goals, needs, and preferences to their Care Coordinator. We will include the Enrollee and their family at every step of the process. Our goal is to fully involve each Enrollee and, if appropriate, their family member, informal caregiver or guardian where applicable in developing and managing the LTSS Care Plan.

As part of the care planning process, we will identify and document person-centered goals and objectives and help the Enrollee meet their needs. We will listen to Enrollee feedback, document their needs in the Care Plan and continually reinforce their choices and preferences among care professionals on the Care Team.

b. Providing Informed Choice

Options Counseling is a cornerstone of the work that all CCHP/LTSS organizations provide. As such, providing informed choice will be a key aspect of our work with Assigned Enrollees.

CCHP/LTSS will ensure that the Enrollee and their family/caregiver have a full understanding of the benefits and services available to meet their needs, as they define such needs. Throughout the care planning process, staff will educate Enrollees on available resources, tools, and treatments, and encourage the Enrollee to make informed choices about their care.

We will train staff to provide unbiased information about LTSS to help the Enrollee take their next steps while ensuring he/she maintains control over the process. Based on the Enrollee's opinion, we may refer them to a regional Aging and Disability Resources Consortia (ARDC) for choices counseling. We will work in concert with CBOs to provide Enrollees with efficient access to LTSS.

3. Care Team Participation

a. Promoting Integration of LTSS Communication

CCHP is aware that the success of the LTSS CP program relies on our ability to coordinate care and information with ACOs and their provider networks that serve our Enrollees. We will develop and strengthen, on an ongoing basis, relationships with ACOs, MCOs and providers across the full continuum. Today, we advocate for the population we serve to help them consider their options and articulate their needs as a leader on their own Care Team in collaboration with the CCHP/LTSS Care Coordinator.

We are already working with ACOs in our geographic catchment area to develop the technology and processes that will allow the LTSS CP to participate on the Enrollee's Care Team during initial Team meetings, throughout the care planning process and at transitions of care. We believe that as medical and BH providers observe firsthand the expertise that we offer, our relationships will evolve and grow stronger, thereby allowing us to serve Enrollees better.

We are aware that Enrollees are best served by sharing complete, up-to-date information about their needs in a comprehensive Care Plan. Going forward, we aspire to share information across the ACO, the Enrollee's PCP, the BH CP if appropriate, State agencies and CBOs which are involved in the Enrollee's care delivery. Given this important need, CCHP/LTSS will seek to promote integration through our Information Technology (IT) strategy, described in **RFR Section 7.4** of this RFR submission. At the outset, we will a have a compliant, functioning IT solution; and, over time, we will participate in the development of an interoperable system that will enable us to share assessments, care plans, reporting and quality management functions.

b. Providing LTSS Expertise on Care Teams

We will connect each Enrollee to the services they need through collaboration with medical, BH and social service providers. As part of our ongoing processes, we will educate service providers on the unique needs of Enrollees with LTSS needs, LTSS services and supports, eligibility criteria, and how to access available benefits. We will do this as part of the care planning process, during routine communications, and when we work with specific providers to address Enrollee needs.

CCHP/LTSS's coordination and collaboration processes are in place among our participating organizations today. CCHP/LTSS already provides direct services to hundreds of qualified LTSS Enrollees and has developed significant expertise in involving key stakeholders on the Enrollee's Care Team to jointly plan and coordinate the delivery of quality services on behalf of the Enrollee. We will make the most of every contact with a medical, BH or CBO provider to educate them on the value of LTSS services and, on options available to support Enrollees.

4. LTSS Care Coordination

Today, CCHP/LTSS staff provide care coordination services to Enrollees to help them navigate the service delivery system and access the most appropriate available care. All CCHP/LTSS organizations excel in this area.

a. Monitoring and Managing the Member's Status

We will leverage CCHP/LTSS's existing care management and care coordination processes, to monitor and manage the member's status and life events. The LTSS CP Care Coordinator will monitor and implement the Enrollee's Care Plan and ensure that services are relevant, appropriate and satisfying to the Enrollee. Our processes include:

- Conducting home safety assessments as part of the planning process
- Linking the Enrollee to community-based resources and social supports (housing, food, benefits)
- Facilitating LTSS treatment planning with the Enrollee and Care Team to develop the LTSS Care Plan
- Contacting the Enrollees Primary Care Provider (PCP) to coordinate LTSS services and obtain PCP sign-off
- Meeting with the Enrollee when their condition changes (e.g., the visit the ED multiple times, they experience an inpatient admission, they lose a caregiver, or they become homeless) to reassess their level of need
- Addressing barriers to care, such as transportation or other critical services that support the Enrollee in their efforts to remain independent in the community
- Supporting Enrollees during transitions between levels of care.

Through our relationships with ACOs providers and other stakeholders we will coordinate care and facilitate Enrollee access to LTSS.

b. Supporting Enrollee's Ongoing Engagement in Care

We accept and appreciate all Enrollees, protect their rights, and prevent or eliminate discrimination and stigma wherever possible. Our existing Care Coordinators are trained to actively listen to the Enrollee's perspectives and beliefs, and to ask questions to fully understand their impact on the Enrollee's choices. LTSS CP will continue to provide the same level of active listening for each LTSS CP Eligible individual. During each interaction, our Care Coordinator will seek to develop a trusting relationship with the Enrollee and empower him/her to verbalize his or her opinions. We will continue to train staff to enhance Enrollee engagement including, but not limited to, self-identification of goals, and recovery/resiliency opportunities.

To further promote Enrollee engagement, LTSS Care Plans will focus on the individual's life goals and incorporate his/her strengths, opinions and needs in a culturally and linguistically appropriate manner.

5. Support for Transitions of Care

Through our affiliated partners, the LTSS CP brings a wealth of experience in managing transitions in care. We will leverage their effective processes to provide Enrollees with informed choices, make sure supports are in place to enable successful transitions in care, and ensure Enrollee's stability and satisfaction post-transition.

a. Enabling Successful Transitions

Providing Informed Choice. CCHP/LTSS will ensure that the Enrollee and their family/caregiver have a full understanding of the benefits and services available to meet their needs as they transition from an institutional setting back to the community. We will train staff to provide unbiased information about LTSS to help the Enrollee determine the next steps to take following a transition of care. Based on the Enrollee's choices, we may also refer them to a regional Aging and Disability Resources Consortia (ADRC) for choice counseling. We will work with CBO partners to provide efficient access to LTSS for individuals regardless of age, income or disability.

Throughout the care planning process, staff will educate Enrollees on available resources, tools, and treatments, and encourage Enrollees to make informed choices, based on our Community First philosophy and approach. We will not only inform the Enrollee of their LTSS options but will document the options presented to the Enrollee in their record. Enrollees will consistently be offered a choice of at least two providers per service option.

Ensuring Supports are in Place. As part of the transition process, CCHP/LTSS will assign a Care Coordinator to facilitate coordination among LTSS providers and, among Care Team participants. At a minimum, LTSS Care Coordinators will be responsible for the following activities to support Enrollees transitioning between levels of care:

- Contacting the Enrollee to complete an assessment and update their LTSS Care Plan to reflect their status, with the benefit of assessment data from the ACO
- Proactively participating in discharge/transition planning with the Enrollee, facility, and providers
- Contacting the Enrollee's PCP to coordinate discharge planning and follow-up services
- Educating the Enrollee on available services and supports to assist them in transitioning to the community
- Updating the Enrollee's LTSS Care Plan in coordination with the Care Team
- Making referrals for services delivered by other systems (medical care)
- Arranging for follow-up services and ensuring that such services are delivered, based on the Enrollee's needs as they define them
- Connecting the Enrollee to community-based supports

b. Ensuring Enrollee's Stability and Satisfaction Post-Transition

The Care Coordinator will contact the Enrollee within 24 hours of discharge to make sure they understand their discharge instructions, answer questions, verify that the Enrollee has their medications and knows how to take them, and remind the Enrollee of follow-up appointments. The Care Coordinator will conduct regular and ongoing follow-up based on the Enrollee's needs to make sure the Enrollee is receiving all needed services, assess his/her progress toward treatment goals, and determine the need to update the Care Plan. The Care Coordinator also facilitates communication between Care Team participants to promote care coordination.

The LTSS Care Coordinator will review Care Plans with the Enrollees during transitions and assist in developing an appropriate plan, given the Enrollee's needs at the point of transition. The Care Coordinator will participate in the ACO's discharge planning and transition process directly, wherever possible.

CCHP's Care Coordinator will follow-up with any Enrollee in transition within three days of discharge from an inpatient stay, skilled nursing facility, chronic disease or rehabilitation hospital to update the care plan and provide transitional care management. Whenever possible, and desired by the Enrollee, the post-discharge visit will occur face-to-face with the goal of connecting the Enrollee to community services and supports, including Flexible Services where appropriate.

6. Health and Wellness Coaching

CCHP/LTSS will infuse health and wellness information throughout all LTSS service delivery with the goal of assisting Enrollees in preventing chronic medical conditions by promoting proper nutrition, physical activities, and tobacco cessation. For example, during the care planning process, we will engage Enrollees in evaluating their overall health and wellness. We will support Enrollees in incorporating health and wellness goals into their treatment plans when they identify a desire to do so. Examples of treatment goals related to wellness include: keeping food journals, learning healthy recipes, exercising, and tobacco cessation.

Promoting Proper Nutrition**.** Proper nutrition is important for overall wellbeing. Therefore, Care Coordinators will provide education and coaching on healthy diets in alignment with Executive Order 509 (EO 509) Establishing Nutrition Standards for Food Purchased and Served by State Agencies. Staff will be trained in EO 509 standards so that they can assist individuals in determining healthy food options by reading nutrition labels, knowing recommended serving sizes, reducing sodium, increasing fiber, flavoring food with spices and herbs, and avoiding unhealthy fats. Venture currently utilizes Healthy Eating Officers in programs to assist Enrollees with menu and meal planning.

Through a partnership with the UMASS Extension Program, Enrollees will have access to groups and trainings on healthy eating, including cooking demonstrations in programs. Staff also assist people in finding resources for healthy eating, including providing information on local farmer's markets that accept SNAP benefits.

Encouraging Physical Activity**.** CCHP/LTSS organizations will encourage Enrollees to stay active by:

- Learning about the benefits of regular physical activity

- Offering regular opportunities for exercise including walking groups, gym memberships, and exercise equipment in programs
- Assisting individuals in attending fitness classes
- Hosting agency-wide physical activities including kickball, chair volleyball, and basketball tournaments
- Conducting an annual "fitness challenge" in which individuals and staff participate and log their physical activities; participants receive T-shirts, water bottles, and other fitness swag

Promoting Tobacco Cessation. We are aware of, and concerned about the long-term effects of tobacco use in our individuals and actively promote tobacco reduction and smoking cessation. Staff who are trained and certified as Tobacco Treatment Specialists (TTS) provide education on the benefits of smoking cessation. We run smoking cessation groups, and provide individuals with resources and supplies to quit smoking. Individuals who are not interested in quitting are encouraged to reduce the amount of tobacco used. TTS staff also do 1:1 work with individuals on tobacco treatment. Each year the agency promotes and participates in the Great American Smoke Out and provides bag with supplies to quit smoking to staff and individuals who are interested.

7. Connecting Enrollees to Social Services and Community Resources

We recognize that, to improve Enrollee health and assist them in achieving their goals for independence, we must address their holistic health needs. We promote integration of care across physical, behavior health, LTSS and social services through our Comprehensive Assessment, care planning, and ongoing care coordination processes.

a. Evaluating Enrollee Social Service Needs

CCHP/LTSS employs a person-centered approach that considers the total care needs of Enrollees with LTSS needs. We will foster an integrated system of care by collaborating with medical providers, Care Coordinators, ACOs and MCOs, and other stakeholders to identify psychosocial needs that can be met by social services and supports agencies. CCHP will use the ACO's Comprehensive Assessment; we will further work with our partner ACOs to discuss the financial and operational feasibility of having CCHP/LTSS staff conduct a specific LTSS assessment using our extensive knowledge and skills.

Additionally, we will jointly develop processes and procedures with ACOs in our service area to collaborate and coordinate in the delivery or facilitation of access to Flexible Supports authorized by the ACO. Care Coordinators will work with ACO Care Coordinators for Engaged Enrollees to identify supports (as documented and authorized by the ACO) and jointly establish a plan for providing or arranging for them (as appropriate). Such services will be included in the Enrollee's Care Plan and monitored by the Care Team. Specific strategies for collaborating with ACOs and MCOs include our desire, pending contract negotiation with the ACO, to:

- Provide the ACO or MCO a detailed orientation to our organization, services provided or facilitated, structure and operations of our Care Team model, and contact information

- Establish and facilitate joint processes to conduct Comprehensive Assessment and care planning meetings with the Enrollee under a single integrated care management team
- Establish and maintain a cadence of periodic joint case conference meetings to discuss especially challenging joint cases (telephonic, WebEx, face-to-face) to ensure appropriate communication, collaboration, follow-up and accountability
- Develop and maintain a common community resource directory for Enrollees and staff
- Conduct joint trainings (initial and periodic) for care management and care coordination staff
- To the extent allowed by the Enrollee, share care plans, progress reports, status reports, and other pertinent information about Engaged Enrollees with the ACO and MCO partners

b. Ensuring Ongoing Connections to Community Resources and Social Services

CCHP has longstanding existing relationships with community and social service agencies in our service area and will leverage these relationships to ensure access to needed supports and Flexible Services. We have processes in place to provide referrals and coordinate with community services providers and social service agencies and will leverage these existing processes to facilitate ongoing communication and information-sharing and ensure that Enrollees have timely access to needed community supports.

Our formal current and planned approaches include:

- Developing comprehensive referral and community resource guides for Engaged Enrollees and CP staff
- Appointing dedicated points of contact
- Executing memoranda of understanding with providers and community organizations regarding the delivery and coordination of services
- Appointing liaisons to foster relationships and communication with community agencies

Through their care coordination processes, staff follow up with all providers, systems, and organizations to make sure the Enrollee receives all services and supports in accordance with the integrated care plan.

D. Innovative Technologies for Service Delivery

As part of its regular outcome evaluation and quality improvement processes, Alternatives became aware of the fact that it served many individuals in its day habilitation and residential programs who were severely limited in their ability to communicate their basic needs or learn new skills. To address this need, Alternatives partnered with students from Clark University to explore the use of available technology to facilitate individual improvement and satisfaction. Clark assessed individuals' adaptive skills in all 5-day habilitation programs and developed a proposed menu of software products for IPads which individuals with cognitive limitations could use (with some adaptations) to learn new skills and engage in recreational activities.

The agency invested in several IPads for each day habilitation program. Results from the first year indicated a high level of satisfaction and success. Individuals increased the length of time they remained engaged, their observable level of enjoyment appeared to grow, and they used a

variety of programs for learning, fun, and communication. The staff are now evaluating the software programs to determine those that were less engaging or too difficult and finding new software to replace them

CM Platform to Monitor Utilization, Care Management, Activity Counts. CCHP/LTSS staff will use mobile technology to improve their ability to outreach and engage Enrollees. In addition to smartphones, Care Coordinators will have laptops or tablets, mobile printing devices, and electronic signature pads. Over time we will enhance the tools available to staff in a manner that improves the Enrollee experience and outcomes.

Our Material Subcontractors, Elder Services of Worcester Area (ESWA) and Center for Living & Working Inc. (CLW), will use their extensive resources and experience to help CCHP/LTSS extend safety nets through comprehensive LTSS programming. Each agency supports a large number of individuals with a wide range of needs and as material subcontractors both ESWA and CLW will be able to assure continuity of care for these individuals assigned to the CP. The agencies will be responsible for integrating care for each of these enrollees and will use existing staff to coordinate through CCHP/LTSS. As the ACO model of care develops, it is possible that ESWA and CLW will be assigned staff by the CP as budgeting allows. Also, the two agencies will be crucial in managing transitions for enrollees leaving nursing homes or hospital care. Each agency is equipped to fulfill this responsibility through the use of existing mobile resources and an array of transition models and experience. ESWA and CLW will also play an important role in options counseling for the enrollees they support as well as for new enrollees seeking assistance in Central Massachusetts. Also, as an Independent Living Center, CLW will assist with assessment and training around mobility issues. As the CP and ACO models evolve over the first five years, each Material Subcontractor will also have a role in staff training and program development that ensures coordination of care that is holistic and innovative. Both agencies will also represent CCHP/LTSS and Enrollees through the Aging Disability Resource Consortium of Central Massachusetts.

E. Personnel and Staffing

1. Organizational Chart

We provide our organizational chart as **Attachment 7.5.E-1**, identifying personnel who will be assigned to accomplish the Contractor responsibilities described in Attachment A of the RFR.

2. Sample Staffing Model

We propose serving approximately 1,000 LTSS CP eligible Enrollees within the defined Service Areas, in year one as detailed in **Attachment 7.2.A**. Our staffing model will include the following positions and number of full-time equivalents (FTEs) in Budget Year one.

Table 7.3.E.2. Staffing Model

Positions	FTEs
Administration	
Director	.19
Quality Manager	.19

Positions	FTEs
Referral Coordinator	.19
Administrative Assistant	.19
Supervisors	0
Senior Clinical Care Manager	1
Care Management	
Clinical Care Manager (1-8)	1
Care Coordination	
Care Coordinators (1:70)	6
TOTAL	9.5

3. Description Recruitment Plans

Upon award, we will begin recruiting for Managers and Care Coordinators. We will work with the ACO/MCO's to determine eligible Enrollee numbers and geography in our service area to aid in planning for the staff needed for program launch in April. We anticipate starting the program with 8-10 Care Coordinators and 1 Care Manager/RN. Recruitment will continue for additional Care Coordinators as the program grows. We will continue to recruit for positions in advance of program growth, using the budget periods as milestones for assessment of enrollment and attrition rates, so that all staff is appropriately trained before they interact with individuals served.

CCHP/LTSS will expand partnerships with local colleges to recruit staff through career fairs, internships, shadowing, and may include innovative programs like student loan payment stipends.

Table 7.3. E.3. Recruitment Plan

Position	Begin Recruitment	Target Hire Month
Director	October 2017	December 2017
RN	Will be recruited as one of two Sr. Care Managers (see below)	
Care Coordinator	December 2017	April 2018
Referral Coordinator	December 2017	March 2018
Admin Assistant		
Quality Analyst	December 2017	February 2018
Sr. Care Manager	December 2017	March 2018
Care Manager	December 2017	March 2018

Job descriptions are provided as Attachment 7.5.E-3.

4. How We Will Recruit and Hire Staff from the Cultural and Linguistic Communities

CCHP/LTSS will ensure that staff is representative of the communities we serve. We recognize that "culture" encompasses more than linguistic diversity, and includes racial or ethnic background, national origin, immigration/refugee experience, physical or mental disability, gender and gender identity, and sexual orientation.

To that end, we will ensure that our providers, staff, and volunteers are responsive to the linguistic, cultural, ethnic, or other unique needs of all Enrollees. We will assess our current capacity and competencies through an initial survey of provider and staff about CP supports and cultural diversity. We will also use existing community needs assessments and studies, and will work with our ACO and MCO partners to maintain ongoing demographic, cultural, and epidemiological profile of the community.

CCHP/LTSS will use community profiles to identify hiring priorities, and training needs to increase staff sensitivity to the needs of Enrollees from different cultural and ethnic backgrounds. We will work closely with community-based organizations (e.g. immigrant and refugee coalitions, advocacy coalitions, LGBTQ advocacy agencies) to identify and leverage opportunities for targeted recruitment activities. We will also partner with ACOs and MCOs to conduct job fairs in specific communities and in languages other than English, where possible.

5. Description of How We Will Ensure That All Staff Meet the Competencies and Trainings Requirements

CCHP/LTSS' training programs will provide staff with an understanding and awareness of Enrollees with LTSS CP needs. We will train our staff on key topics using existing training modules. Refresher training, as well as updated training on best practices, will occur at least annually. We will finalize training modules and training schedules before the contract effective date. Below are examples of potential training modules.

Listing of Proposed Training Modules	
Understanding and awareness of the needs of Enrollees with LTSS needs	• Chronic Illnesses • Intellectual, Cognitive, and Developmental Disabilities • Medical Care and Coordination • LTSS Services: What are LTSS Services, Who Provides them, and How Do We Work Collaboratively?
Understanding Community Partner Supports	• Scope of services • Partnership and Collaboration with ACOs/MCOs • Comprehensive Assessment and Treatment Plan • Flexible Service: Resources, referral, follow-up • Collaboration and Communication with community agencies
Cultural Perspectives – Recognizing sensitivities to different cultures, religions, values, and backgrounds	• The Impact of Culture on health and health care • Health Disparities • Culturally Competent Behavioral Health Care Delivery • The LGBTQ Community

Staff training will be facilitated by: enabling staff to participate in mandatory training during work hours; tracking participation electronically through a learning management system (LMS); enabling online evaluations and scoring; providing resource guides and training materials to reinforce learning.

We will incorporate existing MassHealth training and resources into staff trainings and material, encourage staff to participate in MassHealth training forums and ensure staff who interact with Enrollees with BH needs complete required training on BH competencies. In addition, Alternatives and its Affiliated Partners have deep training resources within their organizations and currently provide tens of thousands of hours of training on a broad array of relevant topics including many recognized as evidence-based practices.

CCHP/LTSS is also considering the Providers' Council E-Academy training program as well as an in-house mentoring program created by Venture to support professional growth and development. We will partner with ACOs and MCOs to hold periodic conferences for Enrollees, staff, advocates, BH-CPs, social service and community agencies that will provide opportunities for them to learn from Subject Matter Experts (including experts from the ACOs, MCOs, and ILCs). When possible, we will collaborate with ACOs and MCOs to develop and deliver trainings on topics of mutual and common interest, such as care coordination strategies, community collaboration, and cultural competence.

6. Description of the Staff Retention Strategy

In our experience, there are systemic challenges and barriers to recruiting and retaining qualified, trained and experienced staff. We believe that addressing these challenges requires a long-range, comprehensive, multi-pronged strategy, including ongoing career development, educational assistance, on-going licensing and credentialing opportunities, and leadership training.

In the short term, we will explore using DSRIP funds for certain defined workforce development initiatives, including staff retention efforts. We propose collaborating with other LTSS CPs, ACOs, MCOs, and industry groups to explore opportunities for collaborative efforts to develop and implement staff retention programs, including professional development. Potential areas of focus to be evaluated may include:

- Strategies to encourage workforce to continue to earn degrees in higher education and professional credentials through current tuition reimbursement programs
- Provide leadership training and mentoring to staff who seek to advance in their careers
- Provide on-going opportunities for continuing education for licensing and credentialing

We believe that being able to raise salary levels and benefits will likely result in better retention, but the current environment will allow for this. However, there are additional non-financial benefits that can also aid in retention by improving staff experience in the workplace. These include:

- Foster an enhanced sense of ownership and accountability among staff by expanding our existing mechanisms to solicit, obtain, and incorporate (to the extent appropriate) staff input into program development, administration, and management

- Cultivate a supportive organizational culture by providing more focused and personalized management, supervision, and mentoring
- Exploring opportunities to reduce the administrative burden on staff by streamlining recordkeeping and other documentation requirements
- Exploring and implementing creative work allocation and scheduling to allow staff to achieve a healthy work-life balance.

F. Implementation Plan and Timeline

Timelines with implementation plans are included in **Attachment 7.5.F.**

G. Budget Report and Budget Narrative

The Budget Report is submitted as **Attachment 7.5.G-1**. The Budget Narrative is submitted as **Attachment 7.5.G-2**.

H. Sustainability

CCHP/LTSS will sustainably fund proposed infrastructure, capacity building investments and LTSS CP supports through:

- DSRIP Dollars (initial investment and ongoing funds distribution associated with volume)
- Shared savings initiatives developed over time with the ACOs/MCOs
- The ability to sell services to MCOs for non-CP eligible individuals who can benefit from CP services to manage the total cost of care for more Enrollees
- Managing fixed costs associated with IT, licensing, fees and general expenditures over time
- Identifying and developing new services for ACO, MCO, and commercially enrolled individuals to help individuals remain independent in the community and decrease the total cost of care associated with avoidable hospital utilization.

I. Quality Management and Performance Monitoring

1. Description of the Quality Improvement Program

CCHP/LTSS will collaborate with our affiliates to create a Quality Management and Quality Improvement (QM/QI) Program for this proposed LTSS CP. Our QM/QI program, which will support our mission, will measure and improve: clinical quality of care; care coordination; access and availability; continuity; and Member experience. Through our QM/QI program, we will apply a data-driven, evidence-based approach to service delivery and analyze and compare data against internal, local, and state benchmarks to identify opportunities for improvement. Our QM/QI program will establish goals, processes, and include an interdisciplinary committee structure with Enrollees and family members and representatives from each affiliated partner.

Applying Principles of Continuous Quality Improvement

CCHP/LTSS's QM/QI Program will be based on continuous monitoring of quality performance measure indicators, clinical practice guidelines and activities. Our goal is to deliver quality care that helps Enrollees maintain and improve health and wellness. Our objectives are to: improve clinical quality; improve coordination of care; improve access to services; and, enhance all aspects of the Enrollee experience. We will achieve our goal and objectives by relying on data-

driven decision making, evidence-based practices and expert advice – all of which will be used to drive improvement. These goals will form the basis of our QM/QI program and provide areas of focus that drive our improvement strategies. We will work to continuously improve care by:

- Using data to identify and address anomalies in care and outcomes
- Developing interventions to ensure that goals are achieved
- Completing objective measurement processes and implementing improvement initiatives

The information used for quality monitoring and improvement derives from several sources including but not limited to: medical record review, member and/or provider complaints, utilization review, and survey data.

The QM/QI Program will define clear assignment of roles and responsibilities to each affiliated partner; performance benchmarks in alignment with program goals and contractual requirements; and Enrollee satisfaction measures. Further, the program will include meaningful roles for Enrollees and their families in QM/QI activities on advisory councils; monitoring processes to review medical record-based studies; and, plans to monitor care management. Using a continuous quality improvement approach, we will compare our outcome results to prior year results to assess our performance in meeting goals, and advance performance by establishing outcome objectives for the next year.

QM/QI Plan

Our QM/QI Plan and Annual Work Plan will constitute the blueprint for all quality goals and describe the activities that the LTSS CP will undertake to address all contractual QM/QI requirements. As outlined in the QM/QI Plan, we will collect and analyze qualitative and quantitative data to drive quality improvement initiatives. The QM/QI Plan will be a responsive, dynamic document and we will continually update it based on stakeholder input and data analysis. CCHP/LTSS will also maintain an Annual Quality Work Plan that delineates a core set of performance metrics and is updated based on the annual review of systems. The Work Plan will define strategies to address priorities outlined in the QM/QI Plan.

Annually, CCHP/LTSS will conduct a comprehensive program assessment that examines QM/QI program effectiveness, service utilization, cost, quality data, the prior year's outcomes, and compliance with contractual requirements. Progress toward goals will be reported to the Quality Committee, which will determine opportunities for improvement and design interventions and track the effectiveness of interventions. In this way, we will ensure our QM/QI program is relevant to the population we serve and results in better care for Enrollees.

2. Description of at Least One Quality Initiative

CCHP/LTSS is committed to improving Enrollee care by enhancing the quality of services we provide. To that end, we propose to implement a quality initiative related to enhancing care coordination for high-cost, high-risk Enrollees served by the MassHealth program. Specifically, as described below, we plan to implement an initiative that seeks to increase the number of Care Team meetings in which the LTSS actively participates to create a single Care Plan in collaboration with the ACO.

Description: CCHP/LTSS will establish a protocol with each ACO in our geographic service area designed to promote the creation of a single Care Plan that includes LTSS for Enrollees who are LTSS CP eligible.

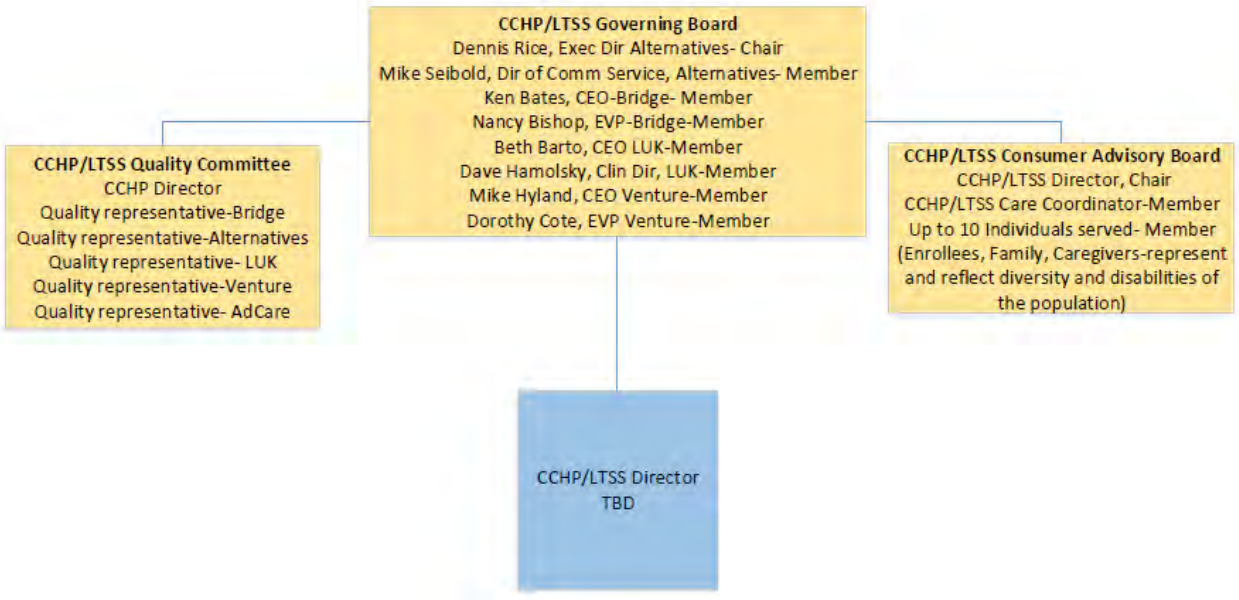
Target Population: The target population for this initiative includes individuals who are LTSS CP eligible and Engaged Enrollees.

Measures for Success: Data related to this initiative will be continuously monitored through our Quality Committee. Measures of success will include:

- The percentage of Integrated Care Plans that include a CCHP/LTSS Care Plan as part of the overall ACO Care Plan
- The percentage of ACO care planning meetings that CCHP/LTSS Care Coordinators are invited to attend
- The percentage of Enrollees that meet their LTSS goals documented in the Care Plan

3. Functions of the Quality Management Committee

CCHP/LTSS will maintain a multidisciplinary committee structure that drives quality improvement through the review of quality data, includes representatives from each affiliated partner, and incorporates Enrollee and family feedback. Our Quality Committee will meet monthly and be responsible for: identifying quality improvement opportunities; finalizing intervention strategies to improve quality and cost effectiveness; establishing timeframes for interventions; and tracking the effectiveness of interventions and making modifications to improvement strategies, as needed. The Quality Committee will report to the Governing Board as shown below.



Our Committee structure will include:

Governing Board: The Governing Board will include two representatives from each affiliated partner and the CCHP Executive Director, all of whom have voting rights. This committee will

serve as the decision-making authority for the LTSS CP and provide strategic direction and programmatic oversight. The Governing Board will be chaired by the LTSS Director.

Quality Committee: Performance data will be reported to the Quality Committee which analyzes data against program goals and develops performance improvement initiatives. This committee will meet monthly and include one representative from each affiliated partner and will be chaired by the LTSS Director.

Consumer Advisory Board (CAB): The CAB will be responsible for ensuring that services delivered are consistent with our mission and values, identifying service gaps and solutions to address them, and gathering direct feedback regarding service delivery from individuals served and direct care workers. Information gathered from our CAB will be used to inform changes in policy and practice. The Board will be composed of a total of ten consumers and two CCHP/LTSS Employees, one of which will be the Director.

J. Coordination with ACOs and MCOs

1. How We Will Communicate Our Skills, Expertise, and Value to Potential ACOs and MCOs

We have already initiated discussions with ACOs and MCOs in our service area to discuss our skills, expertise, and value to care integration efforts. Such discussions will continue over the next several months as BH CP, LTSS CP, ACO and MCO contracts are awarded by EOHHS. We are communicating with and will continue to educate ACOs and MCOs regarding:

- Shared responsibility in caring for MassHealth Enrollees with the greatest needs and level of risk.
- The contribution that the LTSS CP can make to delivering quality care for Enrollees with LTSS needs. We will positively impact integration, Enrollee satisfaction and the total cost of care among other measures, all of which will be vitally important to Enrollees and our organization, ACOs, and MCOs, and facilitate our joint efforts to deliver care.
- The breadth and depth of LTSS CP services available to Enrollees who are eligible for such services. For example, we will discuss the specialized nature of the LTSS Care Plan and ongoing care plan implementation and monitoring.
- The importance of primary care delivery for Enrollees with LTSS needs, many of whom go without primary care services for a variety of reasons.
- Collaborative strategies to integrate care for LTSS CP eligible Enrollees in the assessment, care planning, and care delivery process.

2. Branding and Marketing Plan

CCHP/LTSS's Marketing and Branding Plans will be guided by MassHealth policy and procedure, which clearly prohibits MassHealth vendors from directly marketing to Enrollees. Our priority will be to serve Assigned Enrollees who have a pre-existing relationship with our organization and, those who are Assigned by the ACO.

For Marketing and Branding, our organization plans to:

- Focus on public awareness of health and wellness as well as ACO and LTSS service delivery
- Develop an awareness campaign of the value of BH CP services for Enrollees with LTSS needs to enhance access to services. Materials will be made available to ACOs and MCOs in the most commonly spoken languages in the service area and will be distributed to Enrollees as part of the Enrollment process.
- Educate ACO and MCO partners regarding our services, our approach to Enrollee services and the nature of integration we offer, which will benefit Enrollees.

3. Strategy to Engage and Collaborate with Multiple ACOs and MCOs

CCHP will provide information to all ACO and MCO partners in the Service Areas for which this bid applies. We will care for Enrollees who are assigned by or enrolled in any ACO in the Service Area and will work to develop processes that promote care integration and coordination with the full provider network. Ultimately, our goal is to provide care that is satisfying to Enrollees.

4. Strategy for Conflict Resolution

CCHP/LTSS will partner with ACOs and MCOs in the Service Area to serve the needs of Enrollees with LTSS needs. We will build upon the strengths of our organization. While we do not anticipate disagreements in areas of shared responsibility, we recognize that differences of opinion may arise, specifically related to Care Management decisions that affect Enrollees or, the way the Contract is managed. Our mutual intention is to resolve those disagreements promptly that causes no harm whatsoever to Enrollees and, maintains compliance with the terms of the contract.

K. Providing Culturally Competent and Informed Services

1. Providing Effective, Equitable, and Respectful Supports

a. Providing Language/Communication Assistance

CCHP/LTSS will provide language/communication assistance, including access to qualified interpreters, for Enrollees with Limited English Proficiency, deaf Enrollees, Enrollees who are hard of hearing and Enrollees with cognitive disabilities through multiple mechanisms. For Enrollees who require interpreters, CCHP/LTSS will make available and/or hire individuals who speak the major languages spoken within the Service Area. If staff who speak a language is not available, CCHP/LTSS will contract with the ATT Language Line, which will be available 24/7.

For Enrollees who are deaf or hard of hearing, CCHP/LTSS will provide qualified staff who can expertly communicate with Enrollees in ASL. We will also provide written materials in alternative formats, ensuring that such information is accessible to Enrollees. For individuals with Cognitive Disabilities, our staff will work with the Enrollee to communicate at their level; for individuals with guardians or involved family members/caregivers, we will collaborate with them to communicate with the Enrollee. We plan to use CDI, CART, Relay Services, Video Phone, Braille,

Large Print, and accessible computers in our day to day operations and special events. We will also use assistive listening devices that are readily accessible for Enrollees or staff

b. Informing Enrollees of Available Language and Communication Assistance

CCHP/LTSS will make information available to Enrollees, families, and caregivers regarding the availability of multi-lingual services and communication assistance. At the outset of meetings with the Enrollee and their family, CCHP/LTSS will obtain information regarding the Enrollees' language preference of format, and we will respect that choice as appropriate.

c. Being Responsive to Diverse Cultural Beliefs and Practices

CCHP/LTSS understands the critical role that culture, ethnicity, and equal opportunities play in health. Today, our affiliate's processes are designed with the Enrollee at the center of their care while respecting their language, age, race, ethnicity, preferences, beliefs, or disability. During the screening process, we offer the Enrollee the opportunity to self-identify any cultural preferences that impact the way they view and access services. If the preference impacts other areas of the Enrollee's life (isolation, depression), we conduct an assessment to guide our next steps and engage the Enrollee in appropriate care. Information from the assessment is incorporated into the Enrollee's LTSS Care Plan, and we make appropriate referrals to community services that specialize in serving Enrollees with diverse needs.

2. Expertise and Experience Providing Care to Special Populations

a. Individuals experiencing homelessness

CCHP/LTSS partners work closely with individuals experiencing homelessness. In fact, The Bridge of Central MA, Inc. is a Public Housing Authority (PHA) providing Section 8 tenant-based assistance under the housing choice voucher program funded through the US Department of Housing and Urban Development (HUD). The Bridge works closely with Worcester's Executive Office of Economic Development, Office of Housing Development on a program funded through ESG (Emergency Solutions Grant) to provide support for homeless individuals who have mental health and substance use challenges. The Bridge also serves on the Worcester County Continuum of Care and partner with the Central Massachusetts Housing Alliance and others in working to address homelessness in the region. As another example, Alternatives has longstanding working relationships with the Worcester, Leominster, Fitchburg and Milford Housing Authorities and several other city and town authorities who administer a variety of Federal and State affordable housing and subsidy programs. Through these programs, we have secured housing resources that support hundreds of individuals who would otherwise experience high risk for homelessness.

b. LGBTQ populations

The Bridge offers The Safe Homes program for LGBTQ youth ages 14-23 and works closely with City Manager Ed Augustus and Mayor Joe Petty who have been staunch supporters of the program. City leaders have actively participated in and supported the annual Safe Homes People

of Courage event to recognize leaders who have exhibited courage in social justice, advocacy and action.

c. Criminal Justice-involved individuals

CCHP organizations have long-standing relationships with correctional facilities, probation departments, reentry programs, courts, and police departments throughout Central MA. For example, The Bridge trained the entire Worcester Police Department on how to work more effectively with people in crisis who have a disability.

d. Individuals who are blind, low vision, deaf or hard of hearing

CCHP/LTSS partners have experience caring for individuals who are deaf or hard of hearing. For example, Alternatives has had long-standing working relationships with DMH and DDS area offices throughout the Central Region and has successfully provided services through service contracts for the past 40 years. Alternatives also provides culturally competent care management deaf services to Enrollees through our team of staff who themselves are deaf.

e. Individuals with cognitive disabilities

As described throughout this RFR submission, CCHP/LTSS organizations have four decades of experience serving individuals with cognitive disabilities. For example, Alternatives serves individuals in Day Habilitation and AFC programs with cognitive impairments due to head injury as well as individuals who experience cognitive decline as the result of aging. Additionally, The Bridge provides community support and residential services under acquired brain injury (ABI) waivers to help Medicaid-eligible persons with ABI and cognitive disabilities move to the community and obtain community-based services. This includes providing assistance with transitioning individuals to the community from Nursing and Rehabilitation facilities.

Community Partner Program Budget Report

Alternatives Unlimited, Inc.

	Program Revenue	Prep Budget Period	Budget Year 1	Budget Year 2	Budget Year 3	Budget Year 4	Budget Year 5	Total Revenues
	Estimated Enrollees- Start of Period (All Enrollees)		600	1,036	1,301	1,486	1,617

Community Partner Program Budget Report - Prep Budget Period

Only complete this Program Budget Narrative using amounts anticipated for PBP.
Lines may be added to the Program Budget Narrative tables as necessary

Row 1 - Salary

Position	Annual Salary	FTEs	# Months	Total
Referral Coordinator	$ 55,000.00	0.5	3	$ 6,875
Senior Clinical Care Manager	$ 65,000.00	1	3	$ 16,250
Clinical Care Manager	$ 60,000.00	1	3	$ 15,000
Care Coordinator	$ 45,000.00	6	1.5	$ 33,750
				$ -
				$ -
				$ -
				$ -
				$ -
Total Salary (Program Budget Line 1)		**8.5**		**$ 71,875**

Row 2 - Fringe

Fringe Item	Total Salary	Fringe Rate	Fringe
Fringe Item	$ 71,875.00	24.87%	$ 17,875
Total Fringe (Program Budget Line 2)			**$ 17,875**

Total Personnel*	**$ 89,750**

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:
Referral Coordinator *- Building and strengthening business relationship with the ACO/MCO. Distribute enrollee information to care teams to engage for enrollment in preparation for Go-Live.*
Senior Clinical Care Manager *- Oversee the LTSS component of CP. Recruit, hire, train, and supervise the LTSS Clinical Care Managers in support of CP contract requirements. Requires RN or Licensed Clinician.*
Clinical Care Manager *- Participate in various trainings to provide integrated care coordination and management for individuals to be enrolled in the program in accordance with CP contract requirements. Requires RN or Licensed Clinician.*
Care Coordinator *- Provide integrated care coordination and management for individuals to be enrolled in the program in accordance with CP contract requirements.*

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Training and staff orientation		8	$ 2,000.00
Total Training and Professional Development (Program Budget Line 3)			**$ 2,000.00**

Provide a description of each Training and Professional Development line item included in the table above:

Staff training - Training and orientation to be provided to the staff hired in the preparatory period specifically for program onboarding and care management platform training.

The Central Community Health Partnership will form a combined orientation and training group for staff hired into the CP program. Newly hired staff will be oriented into their employer organization and then by the Central Community Health Partnership training collaborative. New employees will be oriented into the service delivery system of CP services and the service delivery standards of the model Minimally, we will maintain annual refresher training days or updates if there is a significant change to service expectations.

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
Staff Travel	366	3	0.45	$ 494.10
				$ -
				$ -
				$ -
				$ -
				$ -
			Total Mileage	$ 494.10

.

Travel Expense Description	Cost
Total Mileage	$ 494.10
Parking and tolls	$ 161.00
Public transportation	
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ 655.10**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

Staff Travel - staff mileage paid to staff for travel to meetings with affiliated partners, ACOs, and MCOs. Mileage is also paid to staff for travel to off-site trainings, conferences, etc. The staff mileage will be paid to all staff included in Row 1 as well as all staff included in the Infrastructure budget Row 12.

Row 13 - Other Operational Expenses

Description of Expense	Cost
Operational expenses	$ 39,000.00
Total Other Operational Expenses (Infrastructure Budget Line 13)	**$ 39,000.00**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Other operational expenses include: $30,000 Consulting Cost to provide expertise in start up activity such as defining and organizing Partnership Structure, formulating policies with regard to service delivery, best practice and quality.The contract is for a three month period and is for approximately 200 hours @ 150 per hour. Consultant Responsibilities*:*
Lead CCHP Steering Team: a. oversight of the implementation, approval of material decisions related to implementation of the community partners . b. defining how the community partners will be governed. c. contracting with ACOs and MCOs, and developing MOUs among Affiliated Partners, Lead Agencies and Material Subcontractors. d. conducting and completing Readiness Review. e. executing contracts with EOHHS.
Lead for CCPH Model & Quality Team : a. defining the service models b. developing policies & procedures c. defining all aspects of operations . d. engaging other work groups (ex: HR, Finance) to complete activities.
Legal 9,000 External partnerships: a. represent CCHP with external partners including ACOs, MCOs, EOHHS, b.

Legal 5,000 External partnerships: a. Represent CCHP with external partners including ACOs, MCOs, EOHHS ; b. Interface with legal counsel. Approximatly 45 hrs at $200 per hour. No legal fee are allocated to contacting with EOHHS contracts,

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead	12.5	$ 35,161.00

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

The 12.5% is Alternatives' standard overhead rate covering all administrative functions including payroll, HR, IT, Prroperty Services and senior management.

Community Partner Program Budget Report - Prep Budget Period

Only complete this Program Budget Narrative using amounts anticipated for PBP.
Lines may be added to the Program Budget Narrative tables as necessary

Row 1 - Salary

Position	Annual Salary	FTEs	# Months	Total
Project Manager - BMC	$ 75,000.00	0.8	6	$ 30,000
Care Coordinator 1 - BMC	$ 45,000.00	1	5	$ 18,750
Care Coordinator 1 - BSHC	$ 45,000.00	1	3	$ 11,250
Care Coordinator 1 - CBES	$ 45,000.00	1	3	$ 11,250
Care Coordinator 1 - Ethos	$ 45,000.00	1	3	$ 11,250
Total Salary (Program Budget Line 1)		**4.8**		**$ 82,500**

Row 2 - Fringe

Fringe Item	Total Salary	Fringe Rate	Fringe
Fringe Item	$ 82,500.00	31%	$ 25,740
Total Fringe (Program Budget Line 2)			**$ 25,740**

Total Personnel*	**$ 108,240**

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:

BMC Project Manager - The TBN Project Manager will dedicate all of her/his budgeted effort during the Prep Period towards training and preparation for project implementation on Day 1 of Year 1 of the project. S/he will be trained to provide trauma-informed care and brief motivational interviewing. S/he will devote their effort to workforce development during the Prep Period and will supervise the BMC Care Coordinators, oversee administrative responsibilities and support the Project Director.

BMC (Lead) Care Coordinator 1 - The TBN Lead Care Coordinator (CC1) will dedicate all of her/his budgeted effort during the prep period towards training and preparations for project implementation on Day 1 of Year 1 of the project. S/he will receive appropriate training to provide care coordination and linkage to LTSS for enrollees. Each Coordinator will be trained to deliver culturally and economically responsive care, and the CC1 will utilize his/her skills and training to help train the other BMC Care Coordinators as they join the project.

BSHC Care Coordinator - The TBN BSHC Care Coordinator will dedicate all of her/his budgeted effort during the Prep Period towards training and preparation for project implementation on Day 1 of Year 1 of the project. The TBN Care Coordinator will provide care coordination and linkage to LTSS for enrollees. The Coordinators will be trained to deliver culturally appropriate and economically responsive care. The BSHC Care Coordinators will be supervised day-to-day by the BSHC Project Manager, but will also be responsible for ensuring the accurate and timely reporting of project related activities to the BMC Project Manager and Lead Care Coordinator.

CBES Care Coordinator - The TBN CBES Care Coordinator will dedicate all of her/his budgeted effort during the prep period towards training and preparation for project implementation on Day 1 of Year 1 of the project. S/he will provide care coordination and linkage to LTSS for enrollees. The Coordinators will be trained to deliver culturally appropriate and economically responsive care. The CBES Care Coordinators will be supervised day-to-day by the CBES Project Manager, but will also be responsible for ensuring the accurate and timely reporting of project related activities to the BMC Project Manager and Lead Care Coordinator.

Ethos Care Coordinator - The TBN Ethos Care Coordinator will dedicate all of her/his budgeted effort during the prep period towards training and preparation for project implementation on Day 1 of Year 1 of the project. S/he will provide care coordination and linkage to LTSS for enrollees. The Coordinators will be trained to deliver culturally appropriate and economically responsive care. The Ethos Care Coordinators will be supervised day-to-day by the Ethos Project Manager, but will also be responsible for ensuring the accurate and timely reporting of project related activities to the BMC Project Manager and Lead Care Coordinator.

3% cost of living increases for staff beginning in Year 2

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Not budgeted in the Project Budget for the Prep Period			
Total Training and Professional Development (Program Budget Line 3)			

Provide a description of each Training and Professional Development line item included in the table abovNot budgeted in the Project Budget for the Prep Period:

Not budgeted in the Project Budget for the Prep Period

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
N/A for this Period				
			Total Mileage	

Travel Expense Description	Cost
Total Mileage	$ -
Parking and tolls	
Public transportation	
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ -**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

N/A for this Period

Row 5 - Equipment

Description of Equipment	Unit Cost	#units or FTEs	Cost
N/A for this Period			
Total Equipment (Program Budget Line 5)			

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

N/A for this Period

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost
N/A for this Period			
Total Supplies (Program Budget Line 6)			

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

N/A for this Period

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

ACT.md and **Verizon Wireless-** Although not included in the Budget Prep Period, in subsequent budget periods (Years 1-5) we will include yearly ACT.md and Verizon user fees/subscription costs here.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
N/A for this Period			
Total Software Licensing (Program Budget Line 8)			

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

N/A for this Period

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
N/A for this Period			
Total Telecommunications (Program Budget Line 9)			

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

N/A for this Period

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost
Rent- N/A			$ -
Utilities - N/A			$ -
Repair and Maintenance - N/A			$ -
Total Occupancy (Program Budget Line 10)			

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:

Row 11 - Other

Other Direct Expense Description	Cost
Affiliated Partners CA Fees	$9,300
Total Other Direct Costs (Program Budget Line 11)	**$ 9,300.00**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

We have included Contract Administrative costs for our three affiliated partners in their subcontracts at the rate of 15% of

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead	**15.00%**	**$17,631**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

	A	B	C	D	E	F
229	In addition to the costs detailed above, BMC is requesting indirect costs to cover the administration of the contract. Indirect costs are calculated at 15% of total costs for this project and are a vital part of infrastructure building. Costs for Prep are calculated at $17,631

	Fringe rate	31.2%	Total Fringe	$ -
			Total IT Staffing including Fringe (Infrastructure Budget Line 1)	**$ -**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Row 2 - Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
ACT.md Cloud-Based Case Management	$77,000
Total Development and Adaptation of EHR and Care Management System (Infrastructure Budget Line 2)	$77,000

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

We will contract with ACT.md for use of their electronic cloud-based platform. ACT.md provides a HIPAA-compliant, cloud-based platform designed for team-based care. ACT.md connects care teams, facilitates communication and collaboration, and drives coordinated action. For this project, ACT.md is expected to support the following program initiatives: 1)serve as the unifying technology for multi-disciplinary and multi-agency care coordination; 2) capture enrollee information and contact information for care team members, including PCPs and ACO/MCO; 3) develop and execute patient-centered, goal-oriented care plans; 4) administer, record and export enrollee assessment data; 5) create templates and suggested workflows and provide visibility into the care process; and 6) report on number of engaged enrollees, care plans created, and referrals for LTSS community support services. There will be a one-time Implementation Fee which include fees for: Project Management and consulting; Eligibility file upload and data mapping; One custom care plan template; Six custom workflows; Three Custom Assessments (or discrete data field creation); Two Days Centralized Training for Care Team Users; One Day Administrative User Training; Technical Integration Fees; Event Notification Service Integration; and Health Information Exchange Integration. The total cost for the one-time implementation fee is $77,000.

Row 3 - Technology for Service Delivery

Description of Expense	Cost
16 Lenovo ThinkPad P51 Mobile Workstations	$ 24,000.00
Symantec (or an equivalent) Encryption Software	$ 3,200.00

	A	B	C	D	E	F	G
61	**Total Technology for Service Delivery**	**$ 27,200.00**					
62	**(Infrastructure Budget Line 3)**						

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

We are budgeting funds to purchase 16 Lenovo ThinkPad P51 Mobile Workstations for program staff at $1,500 each. We are budgeting to also purchase Symantec (or an equivalent) encryption software for each Think Pad at $200 each. These project-specific workstations will be vital to capturing and maintaining data security. The total cost for laptops is $1,500 x 16 = $24,000. The total cost of the software is $200 x 16 = $3,200. Total combined cost = $27,200.

Laptop allocation is as follows:

BMC
C0-Director 1 = 1
Project Director = 1
Project Manager = 1
Care Coordinators (4) = 4

BSHC
Project Manager = 1
Care Coordinators (2) = 2

CBES
Project Manager = 1
Care Coordinators (2) = 2

Ethos
Project Manager = 1
Care Coordinators (2) = 2

Row 4 - Other Technology Expenses

Description of Expense	Cost
10 IPads	$4,150
10 Data plans	$1,650
Total Other Technology Expenses (Infrastructure Budget Line 4)	**$ 5,800.00**

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

We plan to provide our 10 care coordinators with IPads to allow them to develop, review and update the online ACT.md HIPAA secure care plans with our Enrollees in their homes or other community settings. Each IPad will have a monthly wireless data plan through Verizon Wireless. Data usage will be monitored by the Project Director.

IPad allocation is as follows:

BMC
Care Coordinators (4) = 4

BSHC
Care Coordinators (2) = 2

CBES
Care Coordinators (2) = 2

Ethos
Care Coordinators (2) = 2

Community Partner Infrastructure Budget Report - Workforce Development - Prep Budget Period

Row 5 - Workforce Development Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Co-Director 2 - BMC	$ 177,055.00	0.12	6	$ 10,623
Project Director - BMC	$ 110,400.00	0.5	5	$ 23,000
	$ -	0		$ -
	Total Salary	0.62		$ 33,623
	Fringe rate	31.2%	Total Fringe	$ 10,490
Total Workforce Development Staffing including Fringe (Infrastructure Budget Line 5)				**$ 44,114**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Workforce Development and Staffing

Co-Director 2 - She will be responsible for ensuring that the social determinants of health are mitigated for Enrollees and will work with staff to help them identify and remove barriers to care. She is a national expert in examining how the social determinants of health impact healthcare access and treatment. During the Prep Period she will be dedicated to helping design the training curriculum and workforce development. This essential work will provide a foundation on which we will build an unmatched and self-sustaining program. Co-Director 2 will remain involved with the project in an advisory role in subsequent years, but will draw salary support from either the Infrastructure or Program Budget.

BMC Project Director - She will be responsible for overseeing all aspects of the project—hiring, training, and supporting personnel and reporting up to the Co-Directors and Governing Body. She will also work with the Consumer Advisory Board throughout the project to make sure they are abreast of all activities and integrate their input into BAP. Because the Project Director will be focused on training, workforce development and operations we have allocated 100% of her budgeted effort to the Infrastructure Budget in the Prep Period, with 50% devoted to workforce development and staffing, and 50% devoted to operations and administration.. However, in subsequent years percentages of the Project Director's effort will be accounted for in both the Infrastructure and Project Budgets.

Row 6 - Recruitment Expenses

Description of Expense	Cost
N/A	
Total Recruitment Expenses (Infrastructure Budget Line 6)	

Provide a description of each recruitment expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

N/A this Period

Row 7 - Training Expenses

Description of Expense	Cost
Workforce Training	$20,000.00
Total Training Expenses	**$20,000**

	A	B
187	**(Infrastructure Budget Line 7)**	~~$20,000~~

Provide a description of each training expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

BAP plans to develop a standardized mandatory training curriculum for all care coordinators. The Project Director is consulting with Co-Director 2 and the Executive Director of Boston Senior Home Care in the creation of this curriculum. We anticipate that we will need to contract with external training providers for the development and/or delivery of many of the planned training sessions. Once the curriculum is developed, the Project Director with members of the BMC team will be responsible for implementing the training curriculum for all BAP staff.

Based on a calculation of 15 separate trainings at an estimated cost of $130/training for each of the 10 care coordinators, we have budgeted $20,000 in the Prep Period for these contracted trainings. If the budget allows we would also include our affiliated partners four project manager.

Training topics may include:

1. Overview of LTSS CP Program and Approach - To be developed jointly by BMC and the ASAPs with input from EOHHS.
2. Overview of LTSS Populations: including, behavioral and cognitive impairments, physical disabilities, autism and ID/DD. Also definitions, diagnosis criteria, associated entitlements, cultural implications, costs associated with condition, etc.
3. LTSS Care Plan Development Processes and Implementation, including Care Team development and principles of Self Determination and Community First
4. Orientation to Care Coordination and Information Technology System
5. Overview of MassHealth State Plan: LTSS services and eligibility criteria, choice counseling, person centered planning
6. Overview of Independent Living: movement and recovery principles, accessibility and accommodations
7. Orientation to roles and responsibilities of state, community, municipal agencies and organizations
8. Orientation to Local Resources and Community Mapping Techniques
9. Enrollee Rights and Protections: human, legal, civil rights: community, LTSS, SDH services, etc.
10. Enrollee Engagement Strategies: motivational interviewing, stage of change and harm reduction techniques
11. Orientation to Health Care Integration Strategies: population health management, health and wellness Principles and Coaching tools
12. Orientation to National Research and Advances
13. Empowerment and Self-advocacy Techniques
14. Cultural Competency

Row 8 - Retention Expenses

Description of Expense	Cost
N/A	
Total Retention Expenses (Infrastructure Budget Line 8)	

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

N/A this Period

Row 9 - Office Equipment

Description of Expense	Cost
N/A	
Total Office Equipment (Infrastructure Budget Line 9)	

Provide a description of purpose for each office equipment expense listed in the tables above, including how the costs were determined:

N/A this Period

Row 10 - Office Furniture

Description of Expense	Cost
N/A	
Total Office Furniture (Infrastructure Budget Line 10)	

Provide a description of purpose for each office furniture expense listed in the table above, including how the costs were determined:

N/A this Period

Community Partner Infrastructure Budget Report - Operational Infrastructure - Prep Budget Period

Row 12 - Operational Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Co-Director 1 - BMC	$ 175,849.00	0.144	5	$ 10,550.94
Project Administrator - BMC	$ 94,416.00	0.12	6	$ 5,664.96
Project Manager - BSHC	$ 75,000.00	0.12	6	$ 4,500.00
Project Manager - CBES	$ 75,000.00	0.12	6	$ 4,500.00
Project Manager - Ethos	$ 75,000.00	0.12	6	$ 4,500.00
Project Director - BMC	$ 110,400.00	0.5	5	$ 23,000.00
				$ -
				$ -
				$ -
	Total Salary	1.124		$ 52,715.90
	Fringe rate	31.2%	Total Fringe	$ 16,447.36
			Total Program Staffing including Fringe	$ 69,163.26

	A	B	C	D	E	F	G
304				**(Infrastructure Budget Line 12)**	$ 69,163.20		

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Operations Staffing

Co-Director 1 - He will oversee the project in conjunction with Co-Director 2. He has extensive experience coordinating large projects that deliver LTSS to vulnerable populations. Co-Director 1 will oversee all operational infrastructure and work to enhance performance management in the Prep Period, helping to ensure the program is self-sustaining beyond the contract period. (*In subsequent years, percentages of the Co-Director's effort will be accounted for in both the Infrastructure and Program Budgets*.)

Project Administrator -He will ensure all aspects of the project are in compliance with state regulations. He is an experienced administrator and will track enrollees and handle all reporting. The Project Administrator will focus entirely on business startup and infrastructure building and therefore is not budgeted on the program budget. BMC has a federally approved indirect cost rate of 28%. We chose to use the MassHealth allowable rate of 15%, cutting indirect costs in half, and allowing us to devote more funding to direct project costs to the benefit of our targeted consumers. Therefore we are requesting to include our staffing-related administrative costs in our direct costs, as is generally allowed for federally funded projects.

BSHC Project Manager - The TBN BSHC Project Manager will devote their effort to infrastructure and workforce development during the Prep Period. S/he will provide day-to-day supervision to the BSHC Care Coordinators focused on ensuring all activities of the BSHC Care Coordinators are appropriately aligned with the mission and goals of the program. S/he will manage administrative responsibilities for BSHC and will report to the BMC Project Manager for project related matters.

CBES Project Manager - The TBN CBES Project Manager will devote their effort to infrastructure and workforce development during the Prep Period. S/he will provide day-to-day supervision to the CBES Care Coordinators focused on ensuring all activities of the CBES Care Coordinators are appropriately aligned with the mission and goals of the program. S/he will manage administrative responsibilities for CBES and will report to the BMC Project Manager for project related matters.

Ethos - Project Manager - The TBN Ethos Project Manager will devote their effort to infrastructure and workforce development during the Prep Period. S/he will provide day-to-day supervision to the Ethos Care Coordinators focused on ensuring all activities of the Ethos Care Coordinators are appropriately aligned with the mission and goals of the program. S/he will manage administrative responsibilities for Ethos and will report to the BMC Project Manager for project related matters.

BMC Project Director - She will be responsible for overseeing all aspects of the project—hiring, training, and supporting personnel and reporting up to the Co-Directors and Governing Body. She will also work with the Consumer Advisory Board throughout the project to make sure they are abreast of all activities and integrate their input into BAP. Because the Project Director will be focused on training, workforce development and operations we have allocated 100% of her budgeted effort to the Infrastructure Budget in the Prep Period, with 50% devoted to workforce development and staffing, and 50% devoted to operations and administration.. However, in subsequent years percentages of the Project Director's effort will be accounted for in both the Infrastructure and Project Budgets.

Row 13 - Other Operational Expenses

Description of Expense	Cost
Legal	$ 4,000.00
Printing	$ 4,500.00
Promotional/Collatarel Materials	$ 4,000.00
Translation Services	$ 7,500.00
Marketing/Advertising	$ 4,000.00
Statistician	$ 6,000.00
Total Other Operational Expenses (Infrastructure Budget Line 13)	**$30,000.00**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Evaluation/Statistician - We have budgeted to contract with a **statistician** to help evaluate our project. The statistician will allow us to examine the effectiveness of our program. We will iterate our strategic plan based on feedback and effectiveness. The statistician has a rate of $150/hour and will devote 40 hours in the Prep Period for a total of $6,000. During the PBP s/he to begin to build the models and become familiar with the data components involved for the work we had outlined in the original Program Plan for this role

BMC will work with EOHHS and its ACO/MCO partners to determine the return on investment of the BAP, which holds the key to its sustainability. This will be an iterative process in which the impact of the BAP on utilization and the cost of care is routinely reviewed

sustainability. This will be an iterative process in which the impact of the BAP on utilization and the cost of care is routinely reviewed by the BAP Management Team. To this end, we have budgeted for the use of DSRIP funds in support of a statistician from the Boston University School of Public who will examine utilization, cost and DxCG risk score (if available from the ACO/MCO), overall and by age, gender, LTSS population type, services utilization, and other variables of interest. We anticipate that the minimum 1,000 Enrollees served by the BAP will adequately power analyses to determine if significant effects are found for most, if not all of these variables

A number of research questions will be examined. Overall, do LTSS, social services, and/or Flexible Services bring down the total cost of care, and does this amount cover the $80 PMPM payment used to cover LTSS CP costs? Does a reduction in DxCG risk score moderate the reductions in cost? Which services are most effective in containing the cost of care, for which Enrollees, and where are the greatest savings evident? How long does it take for LTSS to achieve their greatest impact? What is the optimum frequency and intensity of Care Coordinator services?

An annual formative evaluation, to be reviewed by the BAP Management Team and Quality Committee in collaboration with ACO/MCOs and EOHHS, will guide efforts to improve the overall quality of the program by strengthening the use of the most effective LTSS services and supports and focusing the time and attention of the Care Coordinators on Enrollees at highest risk. Summative evaluation will assess the overall effectiveness of the program for various populations, as well as its return on investment.

ANOVA, multiple regressions and time-series analysis will be used in the analyses.

Legal - We are requesting $4,000 to cover the costs of possible Legal Fees related to contracting with ACO and MCOs during the Prep Period. Costs will ensure we are able to meet all contractual requirements.

EXTERNAL COMMUNICATION AND MARKETING RELATED COSTS

1. Promotional/Collateral Materials - We have budgeted $4,000 to cover the costs of designing and creating promotional and Enrollee focused collateral materials for the project. These materials will explain the purpose of BAP, it's expertise, and the benefits of LTSS for targeted Enrollees.

2. Translation Services - We have budgeted $7,500 for the cost of translating Enrollee focused print and electronic project materials into languages commonly spoken by patients at the participating sites. At BMC these languages include Spanish, Portuguese, Haitian Creole, Arabic, Chinese and Vietnamese. Understanding that costs will vary for each language, we are estimating an average cost of $30/hour and have budgeted for 250 hours = $7,500

3. Printing - We are requesting $4,500 to cover the costs of printing patient materials for Targeted Enrollees in multiple languages. Printing linguistically appropriate, culturally responsive materials for all potential Enrollees will allow us to meet the requirements of the contract.

4. Marketing/Advertising - We have budgeted $4,000 to cover the costs of marketing/advertising the availability of LTSS in the communities served by BAP.

Affiliated Partners Infrastructure Support - Although not included in the Prep Period, in subsequent budget periods we will include

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 14)	**15.00%**	**$40,992**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

In addition to the costs detailed above, BMC is requesting indirect costs to cover the administration of the contract. Indirect costs are calculated at 15% of total costs for this project and are a vital part of infrastructure building.
Costs for Prep are calculated at $40,992.

Revised DSRIP Participation Plan for Boston Allied Partners

A. Executive Summary

1. Goals, Challenges and Solutions

Goals. Boston Allied Partners (BAP) for Community-based Services and Supports has designed its DSRIP Participation Plan to achieve the following goals: 1) To standardize and streamline the processes of assessment, care planning and delivery of LTSS, leveraging our existing systems and working in collaboration with the ACOs and MCOs contracting with us; 2) To improve the quality of care through comprehensive assessment and matching of enrollees to best evidence-based services and supports, while optimizing enrollee choice; 3) To coordinate the delivery of fully integrated services for a minimum of 1,000 Boston-based LTSS CP Enrollees; 4) To foster integration of services and supports across domains and systems of care; 6) To participate actively and meaningfully on the Enrollee's care team; 6) To strive continuously to improve the quality of CP services; and 7) To execute the LTSS CP contract in an efficient, effective manner.

Challenges. Our DSRIP Participation Plan is designed to anticipate and prevent most operational, financial or compliance-related challenges. At the same time, we know from experience that any new organization—especially one forging new pathways for integrating, coordinating, and monitoring the quality of care for complex populations—will face unexpected challenges. There are often unexpected delays in achieving milestones for program design and development and/or hiring and training of project staff. To avoid such a scenario, the BAP initiated weekly meetings in September and we plan to generate draft policies, procedures and templates for assessment, care planning, Qualifying Activities and Documented Processes before the end of the year. We have also begun to bring ACT.md on board and to meet with ACOs.

By being proactive, we expect to "hit the ground running" when our contract with EOHHS is executed in December 2017, having jumpstarted achievement of many of the milestones in our Prep Period Budget Report. This in turn will allow us to focus on other critical tasks during the Prep Budget Period, including the development and testing of the CPMIS; convening of our Community Advisory Board, Governing Body, and Quality Management Committee; and completion of deliverables including our Grievance Procedure, Conflict Resolution Procedure and Quality Improvement Plan. We have budgeted DSRIP funds for the Project Director to work full-time for 5 months during the Prep Budget Period on these tasks in collaboration with .12 FTE senior staff from each participating Aging Services Access Point (Senior Boston Health Care, Central Boston Elder Services and Ethos).

After the Prep Budget Period concludes, we will need to continuously calibrate workloads and may need to adjust our processes, protocols and staffing in real time to reflect service demands. As new partnerships develop between the LTSS CP and ACOs/MCOs, there will be a learning curve about how best to contain cost while ensuring the full spectrum of LTSS is in place for Enrollees. The BAP will thus serve as a learning collaborative to prepare for capitation of LTSS in Year 3.

Solutions. Our plan includes processes, workflows, and systems to monitor our progress toward work plan milestones and to track enrollments, referrals, and encounters with Enrollees to ensure that achieve numerical targets as required by the contract. We also have methods in place to resolve any conflicts that may arise with ACOs and MCOs, within our Governing Body, and among the key personnel serving on the BAP Management Team. Our Quality Management Committee and Management Team will work closely with ACOs and MCOs to ensure that we meet quality targets, to be reviewed monthly along with reports from EOHHS. Finally, we have devised procedures for ongoing review and response to concerns expressed by individual

Enrollees and the CAB, including a procedure in which all Enrollee complaints are reviewed by the Management Team, with a response due to the consumer within 30 days with concurrent corrections made to protocols and procedures.

Given the developmental nature of this project, which will benefit all involved parties from the consumer up to and including EOHHS, we consider ourselves to be in full partnership with the Commonwealth and our ACO/MCO partners, with whom we share strong shared incentives to identify and resolve any challenges that may arise.

2. Assigned and Engaged Enrollees

The BAP will support the required minimum of 1,000 Engaged Enrollees—equal to more than half of the estimated 1,859 eligible individuals in the Boston-Primary service area. We understand and agree that Assigned Enrollees will not be considered Engaged Enrollees until the LTSS Care Plan has been completed. To meet our target enrollment, we expect to accept 1,250 Assigned Enrollees and engage 80% of them. However, we will accept as many Assigned Enrollees as necessary to fill available slots

3. Service Area

Our proposed service area is Boston-Primary. As described in Appendix A of the RFR, this encompasses the neighborhoods of Allston, Babson Park, Boston, Brighton, Brookline, Brookline Village, Charlestown, Chestnut Hill, Dorchester, Hyde Park, Jamaica Plain, Mattapan, Readville, Roslindale, Roxbury, Waban, Waverley and West Roxbury.

4. Operationalizing the LTSS CP

Development of the BAP LTSS CP will take place during the Preparation Budget Period beginning with execution of the contract between EOHHS in December 2017 through May 31, 2018, by which time the organization will be fully operational and ready to accept Assigned Enrollees. During this period, as the official contractor, BMC will collaborate with the ASAPs in four key areas:

- *Design, development and testing of the electronic care coordination system.* BMC will work with ASAPs and selected IT vendor to program, test, and scale the electronic care coordination system, the BAP Care Planning and Management Information System (CPMIS), which will contain Enrollee Identifying Information, Contact Information for the Enrollee and Auxiliary Contacts, Assessment Results, the Enrollee Care Plan, as well as the name and contact information for the Enrollee's the PCP, Care Team Members, and ACO/MCO. The system will ideally incorporate decision support for care transitions; contain edits to identify areas of potential duplication and/or missing information; and provide fields for baseline and follow-up data on Quality of Life (our proposed measure for Quality Improvement). It will incorporate alerts to inform the Care Coordinator when action is necessary (e.g., to achieve performance standards on Qualifying Activities and execute Documented Processes for communicating with ACOs/MCOs. It will allow for multi-disciplinary and multi-agency coordination and will have the ability to generate routine reports on Assigned and Engaged Enrollees, Qualifying Activities, and referrals for LTSS and community social services. It will have the flexibility to evolve into a full-fledged care management system. Our health IT vendor will be ACT.md.
- *Staffing of the BAP LTSS CP.* BMC and the ASAPs will collaborate on efforts to recruit, select and train new project personnel, including ten Care Coordinators, one Project Manager, and a Project Director. At a minimum, training will cover best practices in Outreach, Assessment and Care Planning, , Navigation, Motivational Interviewing, Social Determinants of Health, Community-based Resources, the Community First Vision, and

Contractual Requirements.

- *Building of BAP infrastructure and systems*. Infrastructure will include, but not be limited to, the Governing Body and Quality Management Committee, and the Consumer Advisory Board. Building of this infrastructure will include membership, procedures, and guidelines. In addition, we will devise systems and standards for all LTSS Qualifying Activities—outreach, assessment, care planning, care coordination, transitions of care, health and wellness coaching, screening and referrals for social services and/or flexible services, support for care transitions, and monitoring of services utilization. Documented Services will be another "build-out" of infrastructure. As noted previously, we have budgeted needed support for the Management Team to assist with development of all infrastructure and systems during the Prep Budget Period. We have also budgeted for subject matter assistance in pediatrics (Maypole) and on the social determinants of health (Sandel).
- *Development of management processes.* Management processes, including monitoring of services utilization, handling of grievances, quality improvement plans and procedures, reporting to EOHHS, use of CAB recommendations and EOHHS reports, and relationship of the Management Team to the Governing Body will also be developed.

  Completion of these critical functions will be the responsibility of the BAP Management Team, to include the Project Director, Project Manager and representatives of each ASAP, who will meet weekly throughout the Preparation Budget Period. Consultation will be available as needed from BMC experts in IT, Integration of Services, Children with Medical Complexity, Social Determinants of Health, and other areas. The remaining 42 months of the project period will consist of full operation of the BAP, including its Governing Body, Consumer Advisory Board, and Quality Improvement Plan.

B. Supporting Populations and Community Engagement

1. Planned Collaborations and Partnerships

Planned partnerships. Boston Medical Center (BMC) has aligned itself with three affiliated partners for the purposes of forming an organization able to serve as a Long-Term Services and Supports (LTSS) Community Partner (CP) to MassHealth Accountable Care Organizations (ACOs) and Managed Care Organizations (MCOs). These are the three Aging Services Access Points (ASAPs) currently responsible for providing LTSS to residents of the city of Boston—Boston Senior Home Care (BSHC), Central Boston Elder Services (CBES) and Ethos. Together, BMC and the three ASAPs possess the breadth and depth of expertise and experience to serve the LTSS population ages 3 to 64 years.

The ASAPs are already well known to BMC's Nurse Care Managers, Social Workers, and Navigators working in inpatient, outpatient and emergency settings throughout the hospital. These BMC providers frequently work with the ASAPs during discharge planning, as well in the context of the many BMC programs designed to address the needs of complex patients and high utilizers accessing outpatient care at BMC. The BAP will take our current relationships with the ASAPs to the next level. It will build on, standardize, and expand the availability of best practices in care coordination and achieve new economies of scale. It will make it possible to export standardized best practices to LTSS Enrollees throughout Boston, regardless of where they access care or which MassHealth ACP/MCO insures them. Through the partners, the LTSS population will have access to more than 100 community-based providers already under contract with the ASAPs, as well as those identified by project staff in the course of BAP implementation.

Planned collaborations with services providers. Together, BMC and the ASAPs offer a constellation of contractual and referral relationships with providers of home health, homemaking, transportation, rehabilitation, durable medical equipment, adult day health, personal care services, private nursing, physical therapy, occupational therapy, speech, Programs of All-Inclusive Care for the Elderly (PACE), hospice and other community-based LTSS. The three ASAPS have worked to form community connections and partnerships since their inception approximately 40 years ago and now collaborate with a range of mental health providers (e.g., Boston Emergency Services Team, CityPsych Wellness, Inc.); medical and health services providers (Boston Medical Center, community health centers, Boston Public Health Commission, Barbara McInnis House); law enforcement, legal and criminal justice services (Greater Boston Elderly Legal Services, Suffolk County District Attorney); victim's services (Jane Doe, Inc.); shelters and housing stabilization services (Pine Street Inn, Rosie's Place, Hearth, Tenancy Preservation Program); and many other community resources (food banks, congregate meal sites, churches, etc.).

BMC links directly to many of the same LTSS providers primarily through its Care Management and Social Work Departments, Center for Family Navigation, and the hospital's many programs serving people with disabilities and medically complex patients. BMC also has productive and longstanding relationships with providers of housing stabilization and emergency housing services, as well as advocacy and medical-legal partnership services. Many of these relationships are summarized in BMC's searchable database of community resources needed to address the social determinants of health in the areas of income supports, housing, education and employment, legal services, and personal safety. The database contains more than 150 providers and includes contact information, and a brief description of the provider and its services.

Recently, BMC entered into a service agreement with Aunt Bertha, a national database of resources to help meet basic needs for housing, food, health care, social services, legal assistance, employment services, income supports, and other needed services. We anticipate that the BAP will have access to this database through BMC and that Aunt Bertha will provide a wealth of information for our Provider Directory.

Other collaborations. Over and above our many collaborations with direct providers of LTSS supports and social services, BMC and the ASAPs have established strong working relationships with many of the state agencies and programs providing case management to the LTSS population, including case managers and care coordinators in the 1915(C) Home- and Community-Based Services Waiver (HCBS) Program and the Home Care Program of the Executive Office of Elder Affairs. We look forward to building upon and expanding these collaborations in the course of executing the LTSS CP contract.

2. Growing Community Connections

During the fourth and fifth months of the LTSS CP Preparation Budget Period, BMC and the ASAPs will compile their individual provider databases into a single Provider Directory and conduct a thorough assessment of existing LTSS providers to identify any areas where additional community resources are needed, using Aunt Bertha as needed. In the remaining month of the Preparation Budget Period, the BAP Management Team will work with the MassHealth Office of Long-Term Services and Supports to identify possible additions to our inventory of LTSS providers. Concurrently, the Management Team will provide outreach to key providers to obtain additional information on their capacity and ability to accept new referrals. The Provider Directory will be attached to a mobile application developed by BSHC that will make it possible

for Care Coordinators to access the database on their smart phones during home visits.

We anticipate that one of the most prominent unmet needs in the LTSS population will be for affordable housing. To address this issue, BMC has received grant funding from Robert Wood Johnson Foundation and others to formulate its "Housing Prescriptions" program, designed to create a "pharmacy" of housing solutions with which we can match families. Some of the partners involved in this project are Project Hope, which provides housing stabilization case management and a problem-solving education approach; Nuestra Comunidad, a community development corporation offering benefit maximization and financial counseling; Medical-Legal Partnership | Boston, offering deep expertise in addressing health-harming legal needs; and the Boston Housing Authority. The LTSS CP may be able to leverage this program to serve the needs of the broader LTSS population. Additionally, the ASAPs have developed and implemented an enhanced case management model in Supportive Housing sites.

Some of the other unmet needs in the LTSS population are for dental care, mental health services, transportation, and communication supports [1]. Here, the lines between the responsibility of the ACO/MCO and the LTSS CP blur. However, in the spirit of true partnership with the ACOs and MCOs who contract with us, we will bend all efforts to ensuring that needed services and supports are in place to the benefit of all parties—beginning with the Enrollee.

The Management Team will keep abreast of the need to add community LTSS providers as front-line staff report any challenges they encounter in arranging for needed services. For instance, waiting times for critical services may be unacceptable or Enrollees may complain that a particular provider is not sensitive to disability issues. Findings such as these will prompt the Management Team to continuously seek out new collaborations.

3. Maintaining Up to Date Information

The Project Director will request quarterly updates from the MassHealth Office of LTSS on newly approved MassHealth LTSS providers and any that may have closed their doors, and update the database accordingly. We will also request and receive notice of any updates to BMC database of community resources maintained by the Office of the Senior Vice President of Mission, Thea James, MD, and update the Provider Directory at least once per quarter.

C. Community Partner Supports and Activities

BAP has designed the present DSRIP Participation Plan to achieve the following goals: 1) To standardize and streamline the processes of assessment, care planning and delivery of LTSS, leveraging our existing systems and working in collaboration with the ACOs and MCOs contracting with us; 2) To improve the quality of care by matching of enrollees to best evidence-based services and supports, while optimizing enrollee choice; 3) To coordinate the delivery of services for a minimum of 1,000 Boston-based LTSS CP Enrollees at full capacity; 4) To foster integration of services and supports across domains and systems of care; 6) To participate actively and meaningfully on the Enrollee's care team; 6) To strive continuously to improve the quality of CP services; and 7) To execute the LTSS CP contract in an efficient, effective manner. Below, we describe our methods to achieve these goals.

1. Outreach, Enrollment and Engagement[1]

[1]Documented processes embedded in this section are subject to approval by ACOs and MCOs contracting with the BAP.

Locating Assigned Enrollees. Working closely with the ACOs and MCOs, we will use our services to locate Assigned Enrollees, beginning with the telephone, email and other contact information for the Enrollee, and following up with ancillary contacts. If needed, visits will be made to the last known address and/or public places the Enrollee has been known to frequent. If the Assigned Enrollee speaks a language other than English or has one or more sensory disabilities, arrangements will be made to assign a Care Coordinator who speaks the language spoken at home or to request that the ACO or MCO assign an interpreter (including a deaf interpreter if needed) to work with the Care Coordinator. A minimum of three attempts will be made to contact an Assigned Enrollee, including at least one attempt to meet in person, unless the individual prefers to meet only by phone. During the initial and each subsequent encounter with the Enrollee, the Care Coordinator will obtain updated information on the best methods to contact the Enrollee. The Care Coordinator will document all attempted and completed contacts with the Assigned Enrollee in the Care Plan.

The initial encounter with the Assigned Enrollee. The BAP will afford Enrollees the *option* to receive LTSS CP supports as required by the Model Contract (Attachment A). To assist the Assigned Enrollee during the decision-making process, the Care Coordinator will furnish an informational packet describing the LTSS CP and the services and supports available. At a minimum, the informational packet will include materials describing the functions of a CP Care Coordinator and the benefits of receiving LTSS CP supports; the option for an Assigned Enrollee to choose to or choose not to receive LTSS CP supports; if the Assigned Enrollee chooses to enroll in the LTSS CP program, the ability to request a different CP Care Coordinator from the LTSS CP or choose to receive LTSS CP supports from a different LTSS CP entity; and the process for enrolling in the LTSS CP program. Over and above these contractual requirements, we will include contact information of the Care Coordinator and his or her immediate supervisor; a description of the Enrollee Complaint Process, a Participation Form, a Sample LTSS Plan; and a description of Community First Vision and our the BAP's overarching quality target—i.e., to improve the Enrollee's quality of life across domains. All materials will underscore the important role that the Enrollee plays in designing and approving the LTSS Care Plan and choosing providers.

BAP materials will be written at a fifth grade reading level and available in English, Spanish, Haitian Creole, Cape Verdean, Portuguese and Vietnamese. Some of these materials already are available from BMC and the ASAPs; others will be developed using DSRIP funds. Versions will be available in audiotape form in these languages for visually impaired and low literacy Enrollees. We will obtain EOHHS approval for all BAP materials prior to distribution.

The Care Coordinator will review the materials with the Assigned Enrollee, answer any questions, and offer more time for the Assigned Enrollee to think about the materials and review them with family members or friends, with follow-up scheduled within five business days.

Obtaining the Participation Form. Once an Assigned Enrollee agrees to participate, the Care Coordinator will explain the purpose of the Participation Form and the uses of the Protected Information (PI), which the Care Coordinate will obtain from the Enrollee and share with authorized providers to coordinate the delivery of LTSS. Either the Assigned Enrollee or an authorized representative may sign the Participation Form, which will authorize the uses and disclosures of PI.

The LTSS Participation Form will be scanned and uploaded to the Enrollee's cloud-based Case Record, and the original copy will be maintained in a locked drawer in a locked office accessible only to the Project Director.

2. LTSS Care Planning and Management

Meaningful participation of the Assigned and Engaged Enrollee. Meaningful participation of the Assigned Enrollee in the development and management of the LTSS Care Plan will be critical to ensuring that the Care Plan reflects the goals, needs, and strengths of the Enrollee, as well as any cultural considerations, and that the Enrollee is fully invested in the Plan. To facilitate meaningful participation, the Care Coordinator will review the results of the Comprehensive Assessment completed by the ACO/MCO and meet with his or her supervisor to formulate a preliminary plan and to consider what questions the Care Coordinator will need to ask of the Enrollee. The Care Coordinator will subsequently arrange to meet with the Enrollee in the Enrollee's home or neighborhood to initiate the Care Planning process.

The Care Coordinator will begin the planning process by reminding the Enrollee that the purpose of the Plan is to make it possible for the Enrollee to have the best health, quality of life and level of functionality possible, and that the Enrollee—not the Care Coordinator--is the person in charge of the Plan. The Care Coordinator will then guide the Enrollee into a conversation about his or her goals for the LTSS Care Plan. For instance, would the Enrollee like to have additional help with homemaking, laundry, transportation? Would a Personal Care Attendant improve his or her quality of life and ability to remain at home? Could a family member assist with household duties or Activities of Daily Living (ADL)? Would he or she like to stop smoking, or improve exercise habits? Would he or she like to become stronger and more able to handle activities of daily living? To reduce the number of medications s/he must depend upon? What personal strengths can he or she build upon in service to these goals?

Toward the conclusion of the session, the Care Coordinator will administer two instruments that will be useful in completing the draft Care Plan. These will include:

- *The BAP Assessment Tool.* The BAP Assessment Tool will be based on a review of the SAMS (Social Assistance Management System) Assessments now used by the ASAPs and also incorporate elements of the adapted WECARE Tool (see below) to screen for social determinants, including unmet needs in the areas of payment for medications, housing, nutrition, income, education, personal safety, legal status, and related needs. Depending on the methods selected by ACOs/MCOs to assess people in need of LTSS, it may overlap with information provided by the ACO to the CP. To prevent duplication, the Care Coordinator will check the ACO/MCO assessment against the BAP Assessment Tool, transfer any data that applies, and limit the assessment to remaining items on the BAP Tool.
- *The Quality of Life Scale (QOLS),* which measures five domains: material and physical wellbeing; relationships with other people; social, community, and civic activities; personal development and fulfillment; and recreation (see Section I.2).

The two instruments will be administered on an iPad and electronically scored. Findings will be entered into the CPMIS. Findings will be presented to the Enrollee, along with options for LTSS that might improve quality of life and social connectedness and social services that might help with concrete needs, e.g., for nutritious food, safe and stable housing and income supports. The two instruments will be readministered at least once every six months.

Within 30 days of the initial planning session, the Care Coordinator will provide a draft plan to the Enrollee, along with suggestions for specific services. The Care Coordinator will work with the Enrollee to finalize the Care Plan and to select among available options for LTSS, with the caveat that some proposed LTSS may require prior authorization from the Enrollee's health plan. Once the Enrollee has approved the Care Plan, the Care Coordinator will seek the approval

of the Primary Care Physician (PCP) or designee. This may lead to an iterative process in which the PCP and Care Coordinator have several give-and-take discussions before an agreement is reached. Meaningful participation of the Enrollee will continue throughout LTSS Plan implementation. The Enrollee will be encouraged to contact the Care Coordinator for any issues or concerns as they arise, and the Care Coordinator will follow up, minimally, every three months, at which time the Enrollee's progress will be reevaluated and the Care Plan revised as needed. As detailed below, the Care Coordinator will notify the ACO/MCO of any changes in the functional status or LTSS needs of the Enrollee. Conversely, the ACO/MCO will notify the Care Coordinator of any emergency department encounters and/or inpatient admissions, triggering the BAP's protocol for managing care transitions. *Each of these points of intervention will offer the potential for the Care Coordinator to elicit the Enrollee's thoughts and feelings about needed changes to the Care Plan.* In addition, the administration of the Quality of Life Scale (QOLS) every six months will reignite the conversation between Enrollee and Care Coordinator on the Enrollee's well-being within and across domains and possible improvements (see Section I.2). All contacts with the Enrollee and the Enrollee's health plan will be documented as specified in the RFR #17EHSLTSSCPRFR Model Contract between EOHHS and the CP (Attachment A, page 26) and Model Contract Appendix B (ACO/MCO and CP Agreement/Contract Template).

Enrollee supports. The CP Care Coordinator will ensure that the Assigned or Engaged Enrollee receives necessary assistance and accommodations to prepare for, fully participate in and, to the extent preferred, direct the care planning process and that the Assigned or Engaged Enrollee receives assistance in understanding LTSS terms and LTSS concepts, including information on: his or her functional status; how family members, social supports and other individuals of the Enrollee's choosing can be involved in care planning and services delivery; self-directed care options and assistance available to help with self-directed care; and LTSS services the Enrollee is currently receiving or authorized to receive, if applicable.

Informed choice of providers. Each of the BAP ASAPs has multiple contracts in place for the provision of various LTSS. Once the Enrollee has approved the contents of the LTSS Care Plan, the Care Coordinator will offer at least two provider options for each type of service, using the Provider Directory, and work with the enrollee to finalize provider selection. At any time, the Enrollee may contact the Care Coordinator to request a change of providers.

Contents of the LTSS Care Plan. The BAP understands and agrees that the LTSS Care Plan, at a minimum, will contain 1) the Enrollee's preferences, strengths, challenges, interests, and LTSS goals; 2) a list of LTSS, social services and Flexible Supports providers recommended by the Care Coordinator and/or desired by the Enrollee, including names and contact information; 3) Enrollee accommodation needs; 4) a back-up plan to address contingencies in Enrollee LTSS services, including: occasions when LTSS critical services or caregivers are unavailable, when back-up transportation is needed, when emergency repair is needed for durable medical equipment, and when there is a failure of other essential supports and service; 5) a description of how LTSS will be integrated and coordinated among health care providers, BH providers, LTSS providers and community/social service providers; 6) a contact list that includes phone and email of the Assigned or Engaged Enrollee's PCP, CP Care Coordinator, ACO or MCO care coordinator, if applicable, Assigned or Engaged Enrollee's caregiver, guardian (if applicable), other natural supports or caregivers and emergency contact(s), LTSS service authorizations; and 7) LTSS service authorizations from EOHHS, where applicable, and as received from EOHHS, or its designee. We will work with EOHHS and/or our ACO/MCO partners to develop an

acceptable format(s) for the Care Plans for pediatric and adult Enrollees, to be programmed into our ACT.md Care Planning and Management Information System (see below).

Other LTSS Care Plan features. Our proposed LTSS Care Plan will be cloud-based and HIPAA-compliant with the *ability to share various levels of information among authorized individuals* who need to remain abreast of the Enrollee's functional status and LTSS Care Plans and to coordinate their services. These parties include the Engaged Enrollee's Care Team, LTSS providers, case managers from other agencies, and the Enrollee's authorized representative and family members. The Participation Form signed at the time enrollment will authorize the Care Coordinator, Care Team, and other state agencies to access the Care Plan. The Enrollee may authorize other providers and family members to access the plan at the time of enrollment or any time thereafter.

Our working model for the shared Care Plan is ACT.md, used in the 4C Program, which will accommodate the results of multidisciplinary assessments and Care Plans involving multiple agencies and providers, as well as needed documentation. The secure, HIPAA-compliant ACT.md platform can readily be adapted to meet the requirements of the LTSS Care Plan as specified in the Model Contract. It will be used to generate reports on any aspect of the LTSS Care Plans and associated documentation, and will link to the MassHIway for the purposes of information-sharing with EOHHS and our ACO/MCO partners. It will be programmed to ensure that information in the Care Plans is complete; to provide reminders of upcoming deadlines (e.g., for plan completion, plan updates, and needed contacts with Enrollees); and to alert the ACOs/MCOs to plan updates and changes in the Enrollee's status.

Our LTSS Care Plans will be prepared in the primary language of the Assigned or Engaged Enrollee and explained in this language with the assistance of an interpreter as needed. As noted, we will work with our ACO/MCO partners to ensure that alternative methods or formats (e.g., audio taping) to ensure that the Assigned or Engaged Enrollee understands the plan.

LTSS Care Plan documentation. The BAP understands that LTSS Care Plans must include documentation that the plan was provided to, agreed to, and signed by the Enrollee or authorized representative; that the Enrollee was informed that recommended LTSS are subject to MassHealth medical necessity criteria and utilization management requirements including prior authorization; that the Enrollee has been provided choice in LTSS services, programs and providers during the care planning process; and that the Enrollee has been notified of his or her rights, including the right to approve the LTSS Care Plan; the right to appeal any denial, termination, suspension, or reduction in services through MassHealth; the right to request a different CP Care Coordinator from the BAP; the right to request a different LTSS CP; and the right to submit an internal grievance to the BAP and the BAP's internal grievances procedure. Fields for this documentation will be built into our Care Planning and Coordination IT System.

Fields will also be built into the Care Plan to include the demographic information on the Enrollee and a record of communications with the Enrollee. Each communication entry will include date of contact, mode of communications, person contacted, results of the contact, planned follow-up and the electronic signature of the Care Coordinator. The results of the Comprehensive Assessment will be attached to the Care Plan, as well as the results of the WECARE Tool and the QOLS.

Finally, the ACT.md record will capture Qualifying Activities, including outreach, care planning, care coordination, care plan completion, care transitions, health and wellness coaching, and connections to community, as well as communications between the Enrollee's ACO/MCO. The record will specify the date of the activity, the mode of contact, with whom contact was

made, a brief description of what took place, and the electronic signature of the staff person conducing the activity. We will update and maintain the Care Plans and case records in accordance with all EOHHS requirements and provide a copy of the case record to EOHHS within thirty of any request.

LTSS Care Plan development and submission. The BAP further understands and agrees that the initial LTSS Care Plan must be developed, approved and signed by the Enrollee and his or her PCP or designee within 90 days of the initial assignment and, further, that the plan must be reviewed at the request of the Enrollee; and reviewed, revised and approved by the Enrollee and the Enrollee's PCP every 12 months, as well as following any major change in the Enrollee's status due to functional limitations that is not temporary or episodic. These changes may be in the Enrollee's Activities of Daily Living (ADLs), Instrumental ADLs (IADLs), natural supports and caregivers, and/or living situation.

Completed Care Plans will be submitted to the ACO or MCO for approval by the PCP or designee and provided to the Enrollee in an appropriate and accessible format once approved.

3. Care Team Participation[2]

Integration and Communications. The Care Coordinator's participation on the ACO/MCO Care Team is an especially exciting innovation in the LTSS CP Program, and one that BMC feels especially well-qualified to design and develop. BMC's primary care practices in General Internal Medicine, Pediatrics, and Family Medicine have been certified by the National Commission on Quality Assurance (NCQA) as Level 3 Patient-Centered Medical Homes (PCMHs). These practices serve many chronically ill patients and people with disabilities. They offer integrated behavioral health services, including screening and brief cognitive-behavioral treatment for mental health and substance use disorders by a Licensed Independent Clinical Social Worker, as well as nurse care management and patient navigation services. High risk patients also are screened for social determinants and referred to community resources. The system-wide BMC electronic health record, Epic, facilitates care coordination across services and levels of care. Thus, our Care Teams are mature and high-functioning and, as such, offer a prototypical framework into which the LTSS Care Coordinator can be integrated.

In the Preparation Budget Period, the BAP Management Team will work with physician leaders in BMC's pediatric and adult practices to define the functions of the LTSS Care Coordinator on the primary care team and to workflows for the 11 Documented Processes delineated by EOHHS in Appendix B to the Model Contract between EOHHS and CPs. At a minimum, the Care Coordinator will be required to attend any special case conferences on the Enrollee's status and to follow up with the Care Team whenever the Enrollee's functional status and/or LTSS needs change, as well as within three business days of any transitions in care. The minimum standard for the Care Coordinators will be to coordinate at least once annually with the Enrollee's primary care team.

Specific duties of the Care Coordinator on the Care Team, as outlined in the Model Contract between EOHHS and the LTSS CP, include: providing information and subject matter expertise to the care team about LTSS, the Enrollee's LTSS needs and preferences, service options, provider options, accessibility requirements, and barriers to care; advocating for appropriate care; facilitating communication with other coordinators at state agencies and LTSS providers;

[2] Documented processes embedded in this section are subject to approval by ACOs and MCOs contracting with the BAP.

and promoting and facilitating the integration of LTSS across physical, behavioral and social domains.

The exchange of essential documentation will be through our dedicated ACT.md Care Planning and Coordination IT System, which will be accessible to the Care Team. Ideally, in the future, we will be able to integrate the ACT.md system into the electronic health records of our ACO/MCO partners, transmitting information across the MassHIway. We know from our experience to date with ACT.md—currently used in two BMC programs—that integration of its care management systems into electronic health records is both feasible and affordable.

The LTSS Care Coordinators also will coordinate the delivery of LTSS in the community, particularly among state agencies providing case management services. To this end, the Care Coordinator may arrange for meetings among LTSS and social services providers to discuss especially challenging cases.

LTSS Advocacy and Expertise. As described in Sections 7.2 and 7.3, the BMC and the ASAPs have substantial experience and expertise in LTSS for pediatric and adult populations ages 3 through 64 years. Given our dedication to vulnerable populations, we are also accustomed to serving as advocates. As the state transitions to full capitation of LTSS, advocacy with our ACO/MCO partners will become increasingly important.

Our philosophy in this connection is that education and advocacy are opposite sides of the same coin, and that our ACO/MCO partners, as well as Enrollees, share a common goal—i.e., maintaining the best possible health status and functionality, so that the Enrollee can achieve optimum health and functionality. We are hopeful that ongoing efforts to educate primary care teams as to the effectiveness of various LTSS and Flexible Supports, drawing on the research literature whenever possible, will minimize unfair denials, terminations, suspensions and/or reductions of services. In cases in which there is disagreement on the need for or level of LTSS, the Care Coordinator will advocate for needed services and supports in his or her interactions with the ACO/MCO Care Team. If the Team denies services the Care Coordinator deems necessary, the Enrollee will be able to appeal the ACO/MCO decision. The Care Coordinator will empower, assist and support the Enrollee in the appeals process.

Teaching our Care Coordinators to play the part of advocate will be an important part of their education and training in the Preparation Budget Period, when we will employ liberal use of role plays and guided group discussions to impart needed skills. In addition, as described below, we will provide skill training in Motivational Interviewing and Problem-Solving Education, preparing the Care Coordinators to help empower the Enrollee when an appeal is needed. Care Coordinators will be required to discuss any planned appeals with their immediate supervisors. The supervisor may choose to negotiate further with the Care Team prior to the appeal.

4. LTSS Care Coordination

LTSS care coordination activities are foundational to the work of the BAP and will take place at several levels—i.e., with the Enrollee, with the ACO/MCO, and with providers of LTSS, social services, and Flexible Supports. Initial care coordination with the Enrollee will take place during the Care Planning process, when the Care Coordinator will provide information about various options for LTSS services and programs and LTSS providers that could meet the Engaged Enrollee's LTSS needs. Once the Enrollee begins to access carehe or she will follow up with providers periodically to monitor adherence, and also invite providers to report non-adherence, which will trigger needed follow-up with the patient.

Once the Care Plan is in motion, the Care Coordinator will facilitate needed communications

among the Enrollee, the ACO/MCO, and LTSS and LTSS-related providers (see Model Contract Appendix B). During the quarterly face-to-face meeting with the Enrollee, the Care Coordinator will work with the Enrollee to assess the relevance, appropriateness, comprehensiveness, and effectiveness of the Care Plan, make needed adjustments, and obtain the necessary approvals.

Changes in status and life cycle events. Changes in the Enrollee's functional status and life cycle events may come to the attention of the Care Coordinator from any number of sources—an LTSS or social services provider, members of the ACO/MCO Care Team, a family member, an authorized representative, and/or the Enrollee him- or herself. These changes may involve deterioration of the patient's medical condition, the loss of family supports, accidental injury, cardiovascular events, changes in housing status, and any of a number of other adverse events. Any of these changes will trigger immediate notification of the ACO/MCO, which may then determine that a new Comprehensive Assessment is required. The Care Coordinator will review the LTSS Care Plan with the Enrollee within five business days and submit it to the ACO/MCO Care Team within ten working days. If the Care team subsequently revises Comprehensive Assessment, the Care Coordinator will adjust the plan as needed. (See Model Contract Appendix B.)

Strategies for engaging and empowering BAP Enrollees. BAP Care Coordinators will strive continuously to engage, motivate and empower BAP Enrollees to direct and participate in their own care. In our experience, the LTSS populations who are the focus of the LTSS CP, particularly those who experience depression and other co-occurring behavioral health problems, are more accustomed to being acted upon than to acting in their own best interests. After years of treatment by paternalistic (if well-meaning) providers, many have succumbed to a state of passivity, or learned helplessness [2]. The antidote to this condition is self-efficacy, or belief that one has some degree of control over his or her well-being and ability to effect positive changes [3-4].

Our philosophy, and that underlying the LTSS CP RFR, is that even the most compromised Enrollees can actively participate in care planning and services delivery. For this to take place, Care Coordinators must be skilled in communication methods that eliminate the traditional power differential between patient and provider and that solicit, acknowledge and value the thoughts and feelings of the Enrollee. To facilitate these communications, we propose to train our Care Coordinators to use motivational interviewing (MI) and Problem-Solving Education (PSE) as they apply to communications with diverse populations of children, adolescents and adults with LTSS needs and their parents, guardians, authorized representatives and/or family members. MI will be used to help motivate Enrollees to play an active role in their care, while PSE will be used to help foster self-advocacy.

MI employs a client-centered, non-judgmental, empathic manner, acknowledging the client's position and exploring his/her opposition or ambivalence about behavioral change [5-6]. The five main techniques used in MI are 1) expressing empathy through reflective listening, 2) developing discrepancy between client's goals or values and his or her current behavior; 3) avoiding argument and direct confrontation; 4) adjusting to client resistance rather than opposing it directly; and supporting self-efficacy and optimism. More than a set of techniques, MI has been described by its developers as "a way of being with a client [7]." An evidence-based practice, it is widely used in health care settings [8]. BAP Care Coordinators will utilize MI to explore and address ambivalence about adhering to LTSS Care Plans and other life challenges.

PSE is designed to build self-efficacy by teaching clients a simple method of problem-solving. PSE is a manualized cognitive behavioral prevention intervention adapted from Problem

Solving Treatment, an evidence-based depression treatment [9]. In a PSE session, the educator guides the subject in selecting a measurable problem, then proceeds through a series of steps including goal-setting, brainstorming, evaluating solutions, choosing a solution and implementing an action plan. Subsequent sessions review the client's progress in resolving the problem and address any barriers. PSE has been shown to reduce symptoms of depression in postpartum women and other populations [10].

MI and PSE are expected to work together, motivating Enrollees to actively engage in pursuing their LTSS goals and imparting the skills they need to resolve any challenges that may arise. The use of these methods will be regularly reviewed in individual and group supervision of the Care Coordinators.

Regular contact with the Engaged Enrollee. The BAP Care Coordinator will maintain regular contact with the Enrollee to monitor and coordinate the Enrollee's LTSS Care Plan. At a minimum, the Care Coordinator will conduct a face-to-face visit at home or in a location agreed upon by the Enrollee on a quarterly basis; make regular telephone contact with the Engaged Enrollee between face-to-face visits; provide advice and assistance in support of the Enrollee's goals and objectives; and document all visits and contacts in the Enrollee's case record.

5. Support for Transitions of Care

Plan for providing informed choices for transitions. The participation of the Care Coordinator on the ACO/MCO Care Team will be especially critical during transitions in care. Transitions from acute care to the community in particular can be fraught with potential misunderstandings and miscommunications. Patients and their caregivers and family members may be too overwhelmed at the point of discharge to understand and remember the many instructions given to them for medications, follow-up care, and potential complications. Pain after surgery may undermine their motivation to adhere to recommendations for preventing post-operative pulmonary complications and surgical site infections. The patient's functionality may have declined as result of illness or injury, and the caregivers/family may not fully understand the need for new post-discharge instructions and supports.

b.Steps to ensure stability and satisfaction. The Care Coordinator can play a vitally important role during discharge planning in arranging needed services and supports and making sure that personal care attendants and family members understand discharge instructions. After discharge, the Care Coordinator can provide continuity of care, following up with the Enrollee to see if they have encountered problems after any change of setting and notifying the ACO/MCO of any challenges encountered. In our research at BMC on Project RED (ReEngineered Discharge), we have found many barriers to adherence to discharge plans, such as a lack of understanding of the importance of certain recommendations, a lack of transportation, and a lack of co-payments for medications, to name a few [11-12].

Although the responsibility for preventing readmissions rests with the ACO/MCO, the Care Coordinator can serve as a key adviser in the development of the discharge plan and will therefore be present at discharge planning meetings, as well as other meetings to discuss changes in the Enrollee's setting. Further, the Care Coordinator will follow-up with the Enrollee within three business days of discharge to reassess the Enrollee's needs for LTSS and social services, including Flexible Services. As is the case with all revisions to the LTSS Care Plan, needed approvals will be obtained and needed enabling services arranged to facilitate access.

6. Health and Wellness Coaching

Health and wellness. As described in the preceding narrative, our Care Coordinators will receive intensive training and ongoing supervision on the use of MI and PSE—methods to motivate and empower Enrollees to remain active and engaged in achieving LTSS goals. Health and wellness coaching will employ these two methods liberally, and will be conducted at each face-to-face visit with the Enrollee. The content of health and wellness coaching will be driven by the recommendations of the ACO/MCO, and may include symptom management; prevention and management of chronic conditions; health risks such as smoking, overweight/obesity, and infrequent exercise; and adequate nutrition. Generally speaking, MI will be utilized to move Enrollees forward on the Stages of Change continuum (Precontemplation, Contemplation, Preparation, Action, Maintenance) [13-14] with respect to committing to make positive changes in their habits and behaviors. PSE will be used to help overcome perceived barriers to action and maintenance.

Importantly, the three ASAPS already offer a number of evidence-based programs and workshops to promote health, prevent disease and support the ability to live independently in the community, independently and/or in collaboration with other organizations, including Boston Public Health Commission and local community health centers. Among the topics covered are falls prevention (A Matter of Balance; Tai Chi for Healthy Aging), chronic disease self-management (My Life, My Health, Diabetes Self-Management), family caregiving (Powerful Tools for Caregivers), depression management (Healthy Ideas), brain health (Stay Sharp) and nutrition (Healthy Eating for Success). These programs have proven to be of great benefit to populations served by SCO and OneCare.

The BAP will assemble a manual of best practices in improving health habits and modifying risk behaviors that will be reviewed during the training of Care Coordinators and available to them electronically as a searchable reference. We also plan to maintain a stock of patient education brochures on various wellness topics.

7. Connecting the Engaged Enrollee to Social Services and Community Resources

Evaluating social services needs. To evaluate and connect Enrollees to social services and community resources, we plan to adapt the Well Child Care, Evaluation, Community Resources, Advocacy, Referral, Education (WECARE) clinic-based screening and referral system to this target populations. Pioneered by the BMC Pediatrics Department, the WECARE tool is used to screen for social determinants and address the basic needs of low-income families [15-16]. Because for many low-income families the only point of access to services of any kind is the child's medical home, the WECARE tool has proven useful in reaching families with unmet needs for fuel assistance, utilities assistance, healthy foods, and safe and stable housing. Studies have shown that parents and families feel comfortable asking for and receiving assistance from their child's healthcare provider.

WECARE is a seven-question screening tool administered at the time of a well-child visit. The survey asks the respondent to circle "Yes" or "No" next to any unmet basic needs (paying for medications, housing, transportation, food, utility bills, employment, and education). It was adapted from a larger family psychosocial screening that has a test-retest reliability of .92.

The BAP will expand the number of questions on WECARE to include issues of community and family violence, immigration status, and (other) legal problems. The Care Coordinator will administer the tool during the initial encounter and biannually thereafter for as long as the client receives LTSS. Survey results will be used to ensure that enrollees are connecting to the appropriate social services and community resources. The results of the surveys, along with

referrals to community resources, will be recorded in the patient's LTSS Care Plan.

Ensuring ongoing connections and monitoring utilization. The Enrollee's utilization of social services and community resources will be monitored by the Care Coordinator during quarterly face-to-face meetings. In addition to asking Enrollees if they have connected with the social services and community resources, the Care Coordinator may follow up directly with key social services providers or ask providers to report non-adherence.

D. Innovative Technologies

Although we have not made our final vendor selection, at the time of this writing we anticipate using ACT.md to program and maintain our cloud-based LTSS Care Coordination IT System. ACT.md is built to support complex team interactions and workflows that involve patients, families, and a broad array of care providers, each contributing aspects of a complex care plan. Care plans are accessible to all involved across care and community settings–24 hours a day, 7 days a week–supporting care transitions across the care continuum and fostering integration and collaboration across various service delivery systems, programs, providers and levels of care.

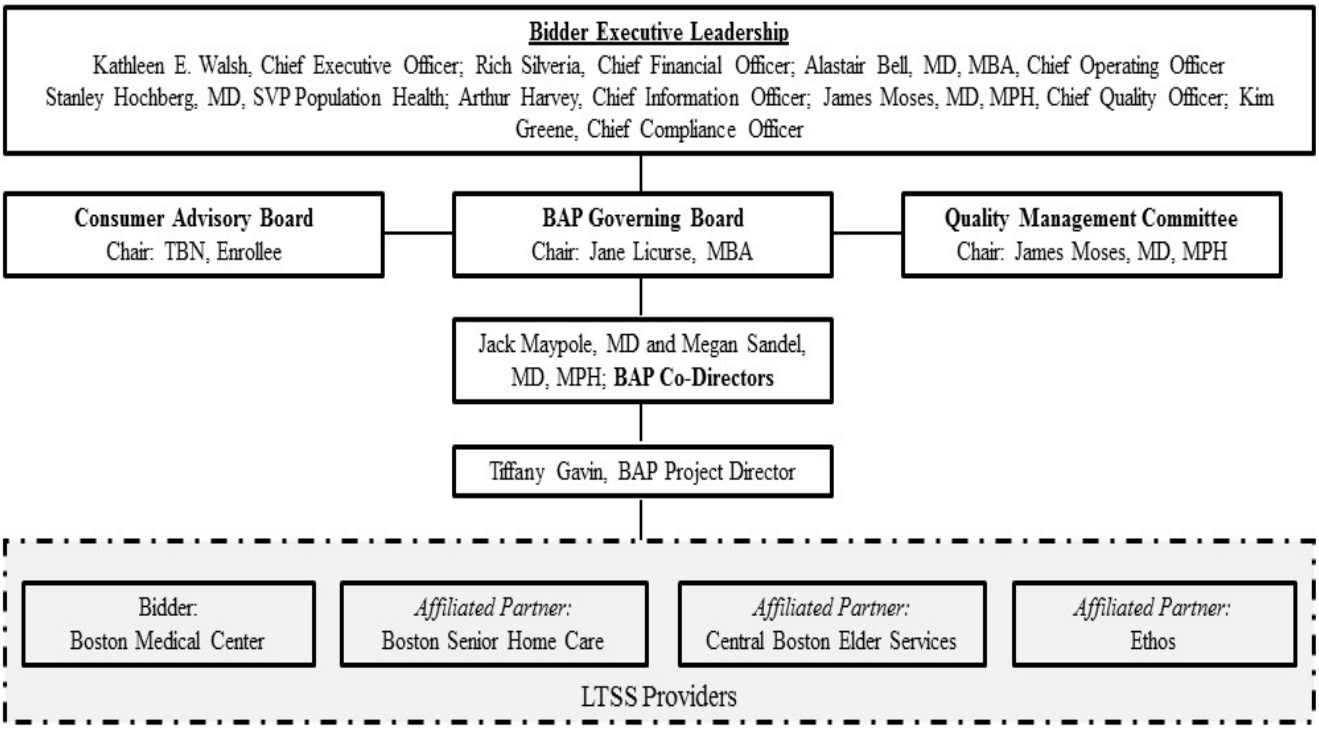
A mobile health application, ACT.md is HIPAA-compliant and allows for sharing of encrypted information by users authorized to access or edit the content of the Cares Plans and associated documentation. It offers the ability to assign and track care plan action items, as well as send reminders to patients and providers via text message. ACT.md also possesses the ability to track and report aggregated data useful in program management, including the numbers of Assigned and Engaged Enrollees, Qualifying Events, the average time to completion of the Care Plans, and adherence to other timelines and standards in the Model Contract. Data files from ACT.md can be exported and imported in real time using the MassHIway as required.

As noted, ACT.md is now in use in two BMC programs. The first, as mentioned is the 4C Program, in which ACT.md has been used to support consultative, collaborative care coordination for children with medical complexity. In this application, specialty medical and behavioral health care provided at BMC is documented and coordinated with care in the community, as well as with services provided under the Individuals with Disabilities Education Act, by the Department of Child and Family Services, and by various community-based social services providers. The other application is a HRSA-funded telemedicine initiative titled, "Delivering High Quality Care to Children and Youth with Epilepsy in Urban and Rural Settings," in which BMC pediatric neurologists consult with local pediatricians to screen, diagnosis and care for children and youth with epilepsy.

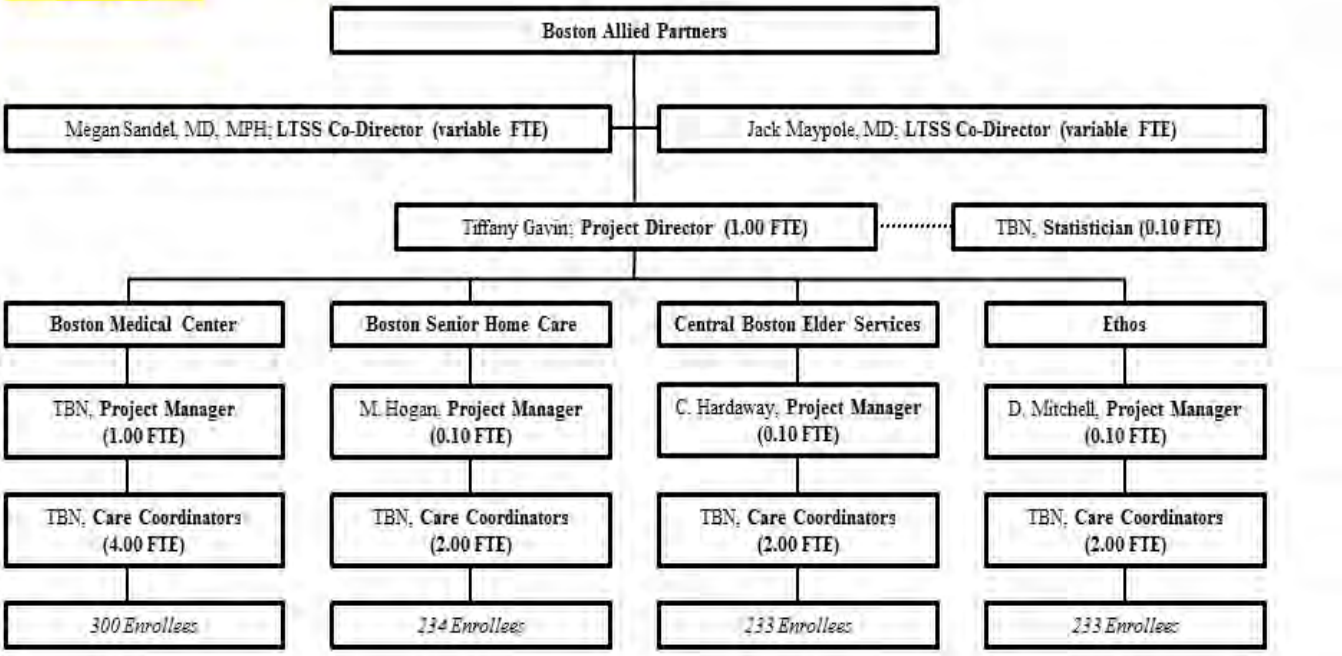
Our experience with ACT.md has demonstrated the utility and effectiveness of the ACT.md software in complex care management. It has also demonstrated that the company is customer-oriented, flexible, and affordable. We are confident that, with ACT.md as its IT vendor, the BAP will be able to "hit the ground running."

E. Personnel and Staffing

1. Organization Chart



2. Staffing Model



3. Staff Recruitment and Training

A description of the Bidder's recruitment plans, including timelines to recruit staff for any personnel positions not currently filled, and job descriptions and qualifications for each personnel position have been submitted as attachments. The job descriptions contain information regarding education, background, qualifications, credentials, and relevant recent work experience.

We plan to have several new positions filled by Month 4 of the Budget Preparation Period to ensure proper training and onboarding, including the Project Manager and four Care Coordinators. All open positions will be advertised on the organizations' Careers website as well as the popular staffing sites Indeed, LinkedIn, and Monster. Each organization will also open these positions to internal competition and all qualified staff will be considered. As a hospital and community organizations, it is important to the BAP that staff are mission driven and come from or have experience with diverse cultural and linguistic backgrounds. All staff will be subject to a Criminal Offender Records Information (CORI) check and monthly United States Office of the Inspector General's List of Excluded Individuals and Entities (LEIE) screen.

For Job Descriptions, see Attachment 7.5.E.1.

4. Recruiting Culturally and Linguistically Competent Staff

At BMC, we serve a predominantly minority patient population that is 48% black, 44% white, 6% Asian, 2% other races, and 23% Hispanic/Latino, regardless of race. As such, we hope to hire bilingual staff for this project. Because so many BMC patients are racial, ethnic and cultural minorities, our staff is highly sensitized to issues of culture, language, and gender.

All staff will be trained in the cultural competency model developed by the Diversity Curriculum Task Force of the Section of General Internal Medicine at BMC. The model is based on findings that successful cross-racial, cross-cultural care includes attention to the power differential between providers and patients, proactive demonstration of respect to redress the power differential and the clear communication of empathy. This model's value has been recognized in the American College of Physicians textbook, *Cross-cultural Medicine* [17]. Lessons are reinforced in clinic settings where cultural concerns often compete with medical problems for attention.

BSHC serves over 8,000 ethnically and racially diverse clients residing in the neighborhoods of East Boston, Charlestown, the North End, Chinatown, Beacon Hill, the West End, South Boston, Dorchester and Mattapan. BSHC believes that the diversity of its employees should mirror the diversity of the clients we serve. In our last audit, we reflected 58% diversity within our workforce. BSHC staff speaks 22 different languages including: Cantonese, Mandarin, Italian, Spanish, Portuguese, French, Haitian Creole, Vietnamese, Greek, Hebrew, Toisanese and Cape Verdean Creole. When BSHC has need to communicate in a particular language, it actively recruits staff who speak the language.

CBES serves more than 8,000 residents across the entire city of Boston. The EOEA-funded Home Care programs center on the neighborhoods of Roxbury, South End, Mission Hill, North Dorchester, North Jamaica Plain, Allston, Brighton, Back Bay, and the Fenway. Given the diversity throughout the city and its commitment to respect the cultural preferences and linguistic profiles of the populations it serves, CBES strives to employ a multicultural workforce that reflects the community and ideally is a member of it. In 2016, 14% of the workforce identified as Hispanic, 45% as African American, 27% as Caucasian and 9% as Asian. CBES staff speaks at least 15 different foreign languages including Russian, Spanish, Haitian Creole, Cape Verdean

Creole, Portuguese, Somali, and various Chinese dialects.

Ethos serves approximately 7,900 residents in the neighborhoods of Mattapan, Jamaica Plain, Roslindale, West Roxbury and Hyde Park. The major languages and cultures in the Ethos service area are English, Spanish and Haitian Creole. Ethos currently employs 28 individuals who speak these major languages. In addition, staff includes individuals who speak Cape Verdean Creole, Russian, Korean, French, Mandarin and German.

Ethos hires culturally competent individuals. Staff have access to a variety of online trainings including accessibility and accommodations, and independent living philosophy. Motivational interviewing is a cornerstone of the Healthy Ideas evidence-based program, and health and wellness principles are a cornerstone of My Life, My Health and Ethos has significant experience in training to these models. Ethos trains all employees in fraud, waste and abuse as well as conflict of interest. Ethos staff have experience with person-centered planning and with MassHealth state plan LTSS and eligibility. All new employees are trained and retrained as programs change.

5. Staff Competency and Training Requirements

In order to meet the competency and training requirements in Section 2.4B of Attachment A, all staff will be required to attend trainings on the processes, protocols, and contractual requirements for all aspects of the LTSS Care Plan, including the Comprehensive Assessment, planning process, informed choice, contents of the Care Plan, social services and flexible services assessment, documentation, development timeframes, and Care Plan submission. Staff will be required to attend these trainings upon hire and monthly beginning Budget Year 1.

6. Staff Retention Strategy

BMC. BMC's staff retention strategy is driven by our understanding that retention is an outcome of our employees' engagement with our patients and our mission, and confidence that employment at BMC will enable them to achieve their career and life goals. Our retention strategy starts with a hiring process which prioritizes offering career advancement opportunities to existing employees, and finding new hires who will thrive in our environment and culture; providing employees with information about BMC's strategies and performance, and the healthcare world, thru regular communications, Town Hall meetings, and workplace Huddles; regular goal setting and performance review discussions to enable employees to input their ideas for improvement; training in essential career and job skills enable our employees to be successful in their jobs; recognition programs which acknowledge and reward effective performance; and community engagement opportunities which enable employees to give back to their colleagues, our patients, and their communities.

Every year BMC surveys our entire staff population, to assess their level of engagement, and understand and respond to issues of concern. BMC equips Managers with tools and skills to address the immediate concerns of their employees, and remove barriers to their individual and collective success. At an enterprise level we implement initiatives which address common concerns.

Our 2016 Employee Survey showed that our staff understand and appreciate our policy of paying salaries which are competitive to the market, and we ensure that all full time and part time entry level employees make a living wage of at least $15 per hour. As well as BMC Select (the free medical plan for employees and their families), a very generous Earned Time program, and employer contribution towards our employees' retirement plans, BMC offers an employee

benefit and wellbeing program that focuses on the unique needs of our diverse employee population, with the goal of reducing daily stressors in our employees' lives; addressing issues such as affordable housing and medical care, access to healthy food, emotional resiliency programs, and free financial literacy, planning, and investment advice services.

ASAPs. The three ASAP share similar recruitment and retention strategies that include the following:

- Implementation of Stay Interviews as a proactive approach to identify staff job satisfaction and areas in which they are looking to grow professionally.
- Implement new mentoring Program to support new staff
- Implement enhanced Buddy Program to support new staff
- External training opportunities in areas of interest and need
- Expanded Social Media to attract those who look for jobs outside of traditional print
- Facebook, Twitter and upgraded LinkedIn employment postings
- New local Newspaper Placement
- Targeted Postcard mailings
- Expanded College Relations to introduce home care to those graduating

Staff retention is a major challenge to all organizations. Each organization provides a collegial environment and empowers employees to manage their workload and supports personal growth through educational opportunities including internal trainings and external conferences.

F. Implementation Plan and Timeline

F. Implementation Plan and Timeline								
Activities	**Responsible Party**	**Budget Preparation Period**						
		Q1			**Q2**			
		1	**2**	**3**	**4**	**5**	**6**
Execute BAP Memorandum of Agreement	Management Team						
Hire and train Project Manager	Management Team						
Contract with ACOs and MCOs	Management Team						
Hire and train 4 Care Coordinators	Management Team						
Design protocols for all LTSS services and management processes	Management Team						
Design/test IT system	Project Director						
Provide EOHHS with written Grievance policies and procedures for Assigned and Engaged Enrollees	Management Team						

Subscribe and connect to statewide Event Notification System (ENS)	Project Director						
Governing Body kick-off meeting	Management Team						
Consumer Advisory Board kick-off meeting	Management Team						
Quality Management Committee kick-off meeting	Management Team						
Submit Quality Improvement Plan to EOHHS	Management Team						

Activities	**Responsible Party**	**Budget Period 1**					
		Q3			**Q4**		
		7	**8**	**9**	**10**	**11**	**12**
Outreach to 200-210 Assigned Enrollees per month	Care Coordinators						
Consent and enroll 167 Assigned Enrollees per month	Care Coordinators						
Create LTSS Care Plans for Enrollees	Care Coordinators						
Administer WECARE screening tool	Care Coordinators						
Monitor Care Plans for Enrollees	Care Coordinators						
Governing Body meeting	Project Director, Governing Body, Quality Management Committee						
Quality Management Committee meeting	Project Director, Quality Management Committee						
Consumer Advisory Board meeting	Project Director						
Notify EOHHS and contracted ACOs/MCOs of ability to accept Assigned Enrollees based on capacity	Project Director						
Submit Qualifying Activities to EOHHS on a monthly basis	Project Managers						
Meet with EOHHS to discuss performance and provide written report	Management Team						

Submit monthly Member Status reports to EOHHS	Project Managers						
Submit annual Quality Improvement plan	Management Team						
Meet with EOHHS to discuss progress on meeting quality assurance measures and performance standards	Management Team						
Submit Budget Report and Budget Narrative to EOHHS for upcoming Budget Period	Project Director						
Submit Semiannual Report to EOHHS	Project Director						

Activities	Responsible Party	Budget Periods 2-5			
		Q1	Q2	Q3	Q4
Monitor Care Plans for Enrollees	Care Coordinators				
Review, revise, and approve all Care Plans every 12 months	Care Coordinators				
Administer WECARE screening tool	Care Coordinators				
Governing Body meeting	Project Director, Governing Body, Quality Management Committee				
Quality Management Committee meeting	Project Director, Quality Management Committee				
Consumer Advisory Board meeting	Project Director				
Notify EOHHS and contracted ACOs/MCOs monthly of ability to accept Assigned Enrollees based on capacity	Project Director				
Submit Qualifying Activities to EOHHS on a monthly basis	Project Managers				
Meet with EOHHS to discuss performance and provide written report	Management Team				
Submit monthly Member Status reports to EOHHS	Project Managers				
Submit Annual Report to EOHHS	Project Director				
Submit Semiannual Report to EOHHS	Project Director				

Submit annual Quality Improvement plan	Management Team					
Meet with EOHHS to discuss progress on meeting quality assurance measures and performance standards	Management Team					
Submit Budget Report and Budget Narrative to EOHHS for upcoming Budget Period	Project Director					

G. Budget Report and Budget Narrative

See Attachment A.

H. Effectiveness and Sustainability

BMC will work with EOHHS and its ACO/MCO partners to determine the return on investment of the BAP, which holds the key to its sustainability. This will be an iterative process in which the impact of the BAP on utilization and the cost of care is routinely reviewed by the BAP Management Team. To this end, we have budgeted for the use of DSRIP funds in support of a statistician from the Boston University School of Public Health who will examine utilization and cost) overall and by age, gender, LTSS population type, services utilization, and other variables of interest. We anticipate that the minimum 1,000 Enrollees served by the BAP will adequately power analyses to determine if significant effects are found for most, if not all of these variables

A number of research questions will be examined. Overall, do LTSS, social services, and/or Flexible Services bring down the total cost of care, and does this amount cover the $80 PMPM payment used to cover LTSS CP costs? Which services are most effective in containing the cost of care, for which Enrollees, and where are the greatest savings evident? How long does it take for LTSS to achieve their greatest impact? What is the optimum frequency and intensity of Care Coordinator services?

An annual formative evaluation, to be reviewed by the BAP Management Team and Quality Committee in collaboration with ACO/MCOs and EOHHS, will guide efforts to improve the overall quality of the program by strengthening the use of the most effective LTSS services and supports and focusing the time and attention of the Care Coordinators on Enrollees at highest risk. Summative evaluation will assess the overall effectiveness of the program for various populations, as well as its return on investment.

ANOVA, multiple regressions and time-series analysis will be used in the analyses.

I. Quality Management and Performance Monitoring

1. Proposed Quality Improvement Program

BMC uses the Plan-Do-Study-Act (PDSA) cycle for quality improvement. Based on the Model for Improvement [18-19] and endorsed by the Institute for Healthcare Improvement, the PDSA cycle is widely used in health care to test quality improvements in real-world settings prior to implementation. It consists of a series of systematic steps in which the team (in this instance, the Project Management Team) selects an area for improvement, gathers baseline information on performance and sets a measureable target for improvement (Plan), implements a method to

achieve the target (Do), observes the results and assesses the impact of the method on the measurable target (Study); and adopts and/or disseminates the improvement (Act). Multiple cycles allow for the cycle to start small and the team to make ongoing adaptations prior to broader implementation. Essentially, then, the PDSA is an application of the scientific method adapted for rapid learning and action in the healthcare setting.

Beginning in Year 2, the BAP Management Team will generate 1 or 2 quality improvement targets (over and above the ongoing QI initiative in Item 2 below) based on issues identified to date and review progress at least quarterly. Both process and outcome data will be used in the quality improvement program. Once satisfactory progress has been made on a particular QI target, the Team will identify another target to replace it, so that there will be one or two QI targets at any given time.

2. Proposed Quality Improvement Initiative

Our proposed QI initiative will center on improving the quality of life for BAP Enrollees. Baseline data will be recorded at the time of enrollment using Quality of Life Scale (QOLS), a 15-item instrument measuring six domains: material and physical wellbeing; relationships with other people; social, community, and civic activities; personal development and fulfillment; and recreation. The QOLS has an internal consistency of .82-.92 and a high test-retest reliability of .78-.84. Since its inception, the QOLS has been a reliable and valid instrument for measuring a patient-centered, quality of life in adults across gender, language, and cultures. (**CITATION**: https://www.ncbi.nlm.nih.gov/pmc/articles/PMC269997/)

The QOLS will be administered to Enrollees once every six months. Chi squares and t-tests will be used to determine significance of pre/post differences overall, by age range, and by subpopulation. Analyses will be conducted every six months as well, with results communicated to EOHHS, ACOs/MCOs, the Quality Committee of the Governing Board, and the BAP staff, each of which will consider where improvements can be made in LTSS Care Planning and Management for various subpopulations to improve scores on targeted quality of life domains.

The ACT.md reporting function will be used to generate the raw data needed for the analysis, to be conducted in SPSS.

3. Composition and Reporting of QI Team

The Quality Management Committee will consist of a subset of three members of the Governing Body. Meeting quarterly, the Committee will conduct periodic audits of case records and review sentinel events, bringing these to the attention of the Governing Body, EOHHS, the Enrollee's ACO/MCO, and BMC as warranted. The Committee will review quality data furnished by the EOHHS on prevention and wellness, member care experience, avoidable utilization, integration, and engagement and work with the BAP Management Team to identify new quality targets and action plans. Members of the Committee may request special analyses from the project statistician, and also will receive and review other project-related data to assess their implications for QI.

The Quality Management Committee will provide a written report to the Governing Body on a quarterly basis, to include quarterly and cumulative findings on quality indicators and any QI trend. Members will include James Moses, BMC Chief Quality Officer; Joanne McMahan, BSHC Chief Quality and Compliance Officer; Lisa Hamilton, CBES Quality Assurance Manager; and Kathy Evans, Ethos Quality Manager.

J. Coordination with ACOs and MCOs

1. Communications with ACOs and MCOs

The BAP will communicate regularly with the ACOs and MCOs contracting for its services as required in the Model Contract, Attachment A to the RFR, and Model Contract Appendix B, which describes the required "Documented Processes" governing bilateral communications between the ACO/MCO and LTSS CP We plan to provide monthly reports to each contracting entity as follows:

- **The Member Status Report for the ACO/MCO**. For this report, we will employ the EOHHS template reporting the number of Assigned Enrollees that the BAP was NOT able to locate; the number of Assigned Enrollees as of the first of the month; the number of Assigned Enrollees declining to participate in the preceding month, and the reasons for declining; the number of Engaged Enrollees as of the first of the Month; the number of Engaged Enrollees who Disengaged in the previous month and reasons for disengagement; the number of Assigned and Engaged Enrollees with one or more Qualifying Activities completed during the month; the number of grievances made to the BAP and the resolution of the same; and the average caseload for the month.
- **The Quality Measures Report for the ACO/MCO.** The BAP will cooperate fully with EOHHS and our ACO/MCO partners to assemble the data for quarterly reports on the quality of BAP services, overall and by ACO/MCO. As described in Exhibit 2 in RFR Appendix C, the EOHHS template for the Quality Measures Report is expected to assemble data from a variety of sources—the National Commission on Quality Assurance; the Dental Quality Alliance, reviews of medical charts, the National Quality Forum, 3M, EOHHS claims, and surveys of Enrollees. Many of these measures consist of protected health information that is already tracked by ACO/MCO providers and EOHHS and will not be tracked by BAP as they would require additional follow-up beyond the capacity of our Care Coordinators (who will track referrals and follow up on reported non-adherence, but who will not have time to follow-up on every appointment), as well as duplicative data entry. Among the measures best tracked by the ACOs/MCOs and EOHHS using claims are well-child visits, adolescent well-care visits, oral evaluations/dental services, annual adult primary care visits, all-cause readmissions, and potentially preventable ED visits. Measures that will be documented in our electronic case records and reported to EOHHS include social services screenings, completion of the initial LTSS Care Plan within 90 days, and annual updates to the Plan. We will also be able to generate reports on other contractually mandated timelines, including updating of the Care Plans after care transitions and major life event/changes in status. In addition, the BAP is open to administering Enrollee surveys on service delivery; health and wellness, choice and control/consumer voice and perceived quality of care. Finally, we will report to our partnering ACOs/MCOs on the quality measures selected by the BAP Management Team for our QI Program (see Sections I.1 and I.2).

The BAP also will keep ACOs/MCOs abreast of any changes reported in the functional status or living situations of Enrollees, as well as any updates to the individual Care Plans of Enrollees.

Special meetings may be called at the discretion of the BAP or the contracting ACO/MCO to discuss aspects of the Member Status and/or Quality Measurement Reports and engage in joint problem-solving.

2. Branding and Marketing Plan

Our brand is Boston Allied Partners, and we will include our logo (to be designed) on any printed educational and/or promotional materials. Our marketing plan, quite simply, is to meet with all the EOHHS-approved ACOs and MCOs serving residents of Boston during the Preparation Budget Period, to walk through our LTSS CP Program and the Model Contract (and any subsequent versions) prepared by EOHHS, and to finalize contractual requirements. We will include at least one ASAP representative in these meetings, which will be led by Dr. Maypole and Ms. Gavin. They will provide a packet of promotional materials to our potential partners delineating our philosophy, staffing, approach to partnering with ACOs/MCOs, methods for Care Planning and Coordination, planned reports, and other relevant materials. These materials can be shared at an educational lunch-and-learn session.

BMC is a known entity to MassHealth MCOs and emerging ACOs, as are the ASAPs, and we believe that the BAP has a high level of operational readiness to implement the LTSS CP. Thus, we see little need for more extensive marketing of BAP services.

3. Collaboration Strategy

The BAP will have two levels of collaboration with our ACO/MCO partners. The first, as described in Sections C.1 and C.2, will involve front-line collaborative assessment and care planning processes, mutually agreed upon Care Plans for BAP Enrollees, and inclusion of the LTSS CP Care Coordinator on the ACO/MCO care team. The second level of collaboration will consist of routine reports (see Section J.1) ongoing communications in which the Project Director and Management Team engage with the ACOs/MCOs to resolve grievances and conflicts (see below).

4. Conflict Resolution Strategy

Many safeguards to prevent conflict are built into the Model Agreement and this DSRIP Participation Plan. Even more fundamentally, the BAP and the ACOs/MCOs share the same overarching goals to maximizing the independence, functioning, and satisfaction of Enrollees. Nevertheless disagreements may arise regarding the best methods to use to achieve these goals. Should any conflicts of this nature arise in the course of contract execution, the BAP and ACO/MCO partner will refer them to a mutually agreed upon third party with expertise in the area being disputed. Conflicts may also arise as to the interpretation of the requirements in the BAP contract with an ACO/MCO. Should this occur, the matter will be referred to EOHHS for resolution. Once an immediate resolution is achieved, the Management Team will assess if the problem was a one-time issue, a systemic problem, or an incident requiring changes in policy. A root cause analysis may be conducted as necessary.

A foremost consideration in problem solving is to ensure that the issue does not continue to arise and impact the ability of the team to provide high-quality, cost efficient coordinated services. The best practice in this regard is to maintain ongoing, regular meetings that facilitate and foster communication within the interdisciplinary team to prevent conflicts from arising.

K. Providing Culturally Competent and Informed Services and Supports

1. Cultural and Linguistic Competence

Language and communication assistance. Broadly speaking, issues of age, race, ethnicity, culture, language, sexual orientation, disability, literacy, and gender will be considered throughout the duration of the contract. All patient materials will be available in English,

Spanish, Haitian Creole, Cape Verdean and Vietnamese, as well as in audio format. Care Coordinators will be trained to ask Enrollees if they would like to have important documents read out loud to ensure all literacy issues are appropriately addressed.

BMC offers language assistance to individuals who have limited English proficiency and/or other communication needs, at no cost to them, to facilitate timely access to all health care and services. The BMC Interpreter Services Department is one of the most extensive in New England. In addition to providing face-to-face interpreters on-site in 21 spoken languages, American Sign Language and Certified Deaf Interpreting, the department utilizes the latest advances in technology such as telephonic and video interpreting, providing coverage 24 hours a day, 365 days a year. We have budgeted DSRIP funds to pay for these services, in the event that our ACO/MCO partners cannot cover them.

b. Informing Enrollees of available assistance. Enrollees will be informed about available assistance at the time of enrollment and initial assessment, and at each quarterly check-in meeting with their assigned Care Coordinator. Care Coordinators will connect enrollees to health education and social support; neighborhood resources for culturally responsive social services; and supports overcome barriers to accessing services. Additionally, Care Coordinators will provide the three types of support, expressing empathy and concern; providing access to needed concrete supports; and educating them about their health, the importance of preventive and primary care, and available services and supports.

c. Responsiveness to diverse beliefs and practices. BMC embraces all forms of diversity. Our providers are passionate about the hospital's safety net mission and pleased to serve our "majority minority," low-income populations and take pride in our ability to provide culturally and linguistically appropriate care for people of all races/ethnicities and sexual orientations.

We are acutely aware of the different beliefs, behaviors, and roles surrounding issues of health and disability related to our target populations. To the extent possible, the proposed CAB will reflect the racial, ethnic, linguistic, and gender diversity of the Enrollees we will serve. In addition, the evidence-based practices to be built into our program have been (or will be) evaluated with diverse populations, consulting as needed with BMC personnel who have experience with various populations. All hospital staff participates in mandatory yearly refresher trainings on cultural sensitivity and has access to ongoing supports and resources provided by the hospital. Cases in which individual differences influence the delivery of care will be immediately brought to the attention of the Program Director for review, who will assess the issue and implement corrective action as needed or seek additional supports to corrective the issue.

2. BMC and ASAP Experience in Serving Diverse Populations

Individuals experiencing homelessness. Boston Healthcare for the Homeless is a Section 330 funded community health center affiliated with BMC through Boston Healthnet, an affiliation of BMC, Boston University School of Medicine, and 13 community health centers. BMC therefore serves as the tertiary care center for much of Boston's homeless population.

BMC also has several programs targeting homelessness prevention and care of the homeless. BMC's Elders Living At Home Program (ELAHP) has been providing intensive case management services to homeless and at risk older adults since 1986. In the last 31 years, ELAHP has served more than 4,000 individuals, and more than 80% of the time overall homelessness was ended or prevented. ELAHP's retention rate—individuals maintaining housing once they have initially transitioned or stabilized—has remained at about 95%. Over the past 31 years, ELAHP staff have developed innovative and collaborative solutions to address

elder homelessness, including the first in the state emergency housing program.

LGBTQ populations. In 2015, we opened our Transgender Clinic, a regional referral center for patients transitioning to a gender other than that on their birth certificates. In 2016 BMC was named by the Human Rights Campaign (HRC) Foundation as one of 303 facilities nationwide qualifying as a "Leader in LGBTQ Healthcare Equality." This designation was based on HRC's determination that we provide "LGBTQ patient-centered care, patient services and support, employee benefits and policies and patient and community engagement."

Criminal justice-involved individuals. In 2006 BMC founded the Violence Intervention Advocacy Program (VIAP) as a way to stem the tide of gun and knife violence in Boston's neighborhoods. Violence has long-lasting effects on the victim and his or her family and simultaneously impacts the quality of life throughout the surrounding neighborhood and larger community. As the busiest and largest Level 1 trauma center in New England, BMC treats 70% of the city's gunshot and stabbing victims, averaging 465 cases per year, with 68% of them being boys and young men of color.

When a gunshot or stabbing victim is admitted to the hospital, the victim is visited by a Violence Intervention Advocate within 48 hours to begin case management, which includes being assigned a care management team comprised of a case manager, mental health clinician and family support advocate to help them break down barriers and turn their life around. As the victim heals, the VIAP team continues the 360-degree treatment program that includes counseling, safety planning, job and educational training, mental health, and family support services.

Individuals who are blind, low vision, deaf or hard of hearing. BMC has made many accommodations for blind and low vision individuals and frequently provides care, including surgical treatment and low vision rehabilitation, to visually impaired patients in its Ophthalmology Clinic. Examples of low-tech, low-cost accommodations made for these patients include braille signage throughout the hospital, lighting adjustments, use of large print, and having staff read documents to patients. Service animals are welcome at BMC. In addition, BMC Volunteer Services assigns Patient Ambassadors to greet, welcome and accompany patients with disabilities to appointments across the campus.

Patients with hearing impairments are assigned a sign language interpreter to assist during encounters. TTY is also available on all of the phones at BMC for additional assistance.

Individuals with cognitive disabilities. Patients with cognitive and developmental challenges are frequent visitors to BMC, which has developed special programs and low literacy materials for these patients in several areas of the hospital, including Family Medicine and the Diabetes Clinic. All patient education materials and consent forms are written at the fourth grade level, and clinical staff will offer to read these materials aloud if the patient is unable to read at that level. In these cases, staff often use the "teachback" method to make sure that patients understand important points.

Ramp-up costs in Prep Budget Period, Budget Year 1, 2 and 3 can be covered by Infrastructure Funding

Community Partner Program Budget Report - Prep Budget Period

Only complete this Program Budget Narrative using amounts anticipated for PBP.
Lines may be added to the Program Budget Narrative tables as necessary

Row 1 - Salary

Position	Annual Salary	FTEs	# Months	Total		
Senior Management	$ 100,000.00	0.00	0	$ -		
Program Director	$ 80,000.00	1.00	6	$ 40,000	6.00	
Managers	$ 65,000.00	1.00	7	$ 37,917	7.00	
Data Quality Manager	$ 75,000.00	0.00	7	$ 0	0.00	
Intake/Administration	$ 40,000.00	1.00	1	$ 3,333	1.00	
Navigators (POC & Field)	$ 40,000.00	7.00	1	$ 23,333	7.00	
				$ -	21.00	420.00014
				$ -		
				$ -		
Total Salary (Program Budget Line 1)		**10.00**		**$ 104,583**		

Row 2 - Fringe

Fringe Item	Total Salary	Fringe Rate	Fringe
Fringe Item	$ 104,583.38	23.5%	$ 24,577
Total Fringe (Program Budget Line 2)			

Total Personnel*	**$ 104,583**

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:

Senior Leadership: To provide strategic and operational leadership for the program. This includes the leadership team from both NILP and ESMV. This is proposed to be funded through an "inkind" and indirect.
Program Director: The LTSS CP Program Director is responsible for working collaboratively with the Care Coordination Directors to lead and direct the Care Coordination Department including planning, program development, quality improvement efforts, staff and interdisciplinary team development, compliance issues and customer service. Also serves as key liaison to ACO leadership during startup.
Manager: Day to day supervision of the navigators. Monitor daily triage and Intake distribution. Manage caseload coverage and redistribution as needed. Other special projects related to coaching, training, quality, customer services and ACO support. During start up, works to design and test workflows and training materials.
Data Quality Manager: Develop, implement and monitor systems and processes for quality assurance to measure compliance with LTSS CP standards, consistent with the goals, vision and values of ESMV. Provide education and coaching to direct service staff relative to Quality Assurance. This position is funded by DSRIP funding during the PBP.
Intake/Administration: To provide administrative support to the Long Term Supports and Services Program and staff. Receive referrals for Assigned Enrollees, enter data into eHana Care Management platform and assign referral to Point of Care Navigator for outreach.
Navigator: To assist Assigned Enrollees to make informed choices about receiving LTSS CP Supports and promote coordination in the delivery and receipt of LTSS services to Enrollees.

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Total Training and Professional Development (Program Budget Line 3)			

Provide a description of each Training and Professional Development line item included in the table above:

There are no training and professiona development items in the prep budget period other than the NILP provided Disability Awareness Training. Training for the navigators is funded through the salary line for their first month of hire, which is included above.

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
Program Director	100	6	0.50	$ 300.00
Managers	100	7	0.50	$ 350.00
Data Quality Manager	100	7	0.50	$ 350.00
Intake/Administration				$ -
Navigators (POC & Field)				
				$ 1,000.00

Travel Expense Description	Cost
Total Mileage	$ 1,000.00
Parking and tolls	
Public transportation	
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ 1,000.00**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

The above estimates assume that staff will travel an average of 25 miles per week. These meetings will occur between NILP and ESMV, between ESMV offices and EOHHS and between ESMV and the ACO sites. No enrollee expenses are anticpated in the Prep Budget Period.

Row 5 - Equipment

Description of Equipment	Unit Cost	#units or FTEs	Cost
Copier/Printer Monthly Lease Cost - 1 Copie	500	1	$ 3,500.00
Total Equipment (Program Budget Line 5)			**$ 3,500.00**

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

The copier/printer is for day to day office use for all LTSS CP staff. The monthly cost is estimated based on a quote from the copier vendor.. The calculation is based on a monthly cost of $500 times 7 months which is the duration of the prep budget period.

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost	
Office Supplies	$ 22.86	22.75	$ 520.00	$ 520.00

	A	B	C	D	E	F	G
163							
164							
165							
166	**Total Supplies (Program Budget Line 6)**			**$ 520.00**			

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

This is to cover general office supplies such as paper, toner, pens, folders etc.This also includes shredding. The costs are estimated at ESMV historical spending levels. The units above are calculated by FTE x the # of months.

Program Director 1 FTE for 6 Months = 6
Managers 1 FTE for 7 Months = 7
Navigators/Intake 8 FTES for 1 Month = 8
Data Quality = .5 FTE for 3.5 Months = 1.75
Total "FTES/Months" = 22.75

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			**$ -**

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

There are no contractor services anticipated during the prep budget period.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
		Total Software Licensing (Program Budget Line 8)	

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

There are no software licensing costs anticpated duringthe prep budget period. It is anticipated that we will incur costs for a one time purchase of eHana software and then for each member enrolled which will start in budget period 1. Costs related to the care management software are included in the DSRIP budget.

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
Landline Phones	29.2	21.00	$ 612.59
Mobile Phones	63.0	20.00	$ 1,260.00
Total Telecommunications (Program Budget Line 9)			**$ 1,872.59**

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

The telecommunications line supports desk phone service for all staff and a mobile phone and mobile laptop for all positions except the data quality manager and the intake coordinator which are not considered "mobile" positions..

Landline Phones
Program Director for 6 months
Manager for 7 months
7 Navigators for 1 month
1 Intake Coordinator for 1 month
Total "FTES/Months" = 21

Mobile Phones
Program Director for 6 months
Manager for 7 months
7 Navigators for 1 month
Total "FTES/Months" = 20

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost
Rent	3,240	13	$ 7,020.00
Utilities			$ 621.00
Repair and Maintenance			$ 945.00
			$ -
			$ -
Total Occupancy (Program Budget Line 10)			**$ 8,586.00**

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how

the costs were determined:

Merrimack Valley Community Partnership (MVCP) will rent additional space from the current ESMV landlord to accomodate the new staff. This is anticipated to begin 4/1/18. Therefore the occupancy budget reflects 2 months of costs during the prep budget period.

The above numbers have been corrected as we uncovered a formula error. The anticipated square feet is 3,240 and the price per sq foot is $13. The square foot estimate includes an allocation for common space such as conference rooms, rest rooms and lunch rooms.

Row 11 - Other

Other Direct Expense Description	Cost
Insurances	$ 300.00
Total Other Direct Costs (Program Budget Line 11)	**$ 300.00**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Insurance will be charged to the program when the major hiring occurs in early May. Therefore the amount assumed in the DSRIP budget is minimal. The allocation and rates are based on our current insurance.

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead	**10.00%**	**$ 14,493.91**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

The assumed indirect rate is 10% for the prep budget period. This is consistent with ESMV's rate. The rate may change in years 1 to 5 as NILP has a higher rate as their agency is smaller. The indirect allocation covers staffing for senior management , Human Resources, Core IT, Finance, Billing and Legal. It also includes costs associated with that staff such as occupancy and travel.

Community Partner Infrastructure Budget Report

Community Partner Infrastructure Budget Report - Technology - Prep Budget Period

Only complete this Infrastructure Budget Narrative using amounts anticipated for PBP.

Lines may be added to the Infrastructure Budget Narrative tables as necessary

Row 1 - IT Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
IT Consultant	$ 42,857.14	1	7	$ 25,000
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
	Total Salary	1		$ 25,000
	Fringe rate		Total Fringe	$ -
			Total IT Staffing including Fringe (Infrastructure Budget Line 1)	**$ 25,000**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

MVCP will contract with an IT Consulting firm to supplment our IT Departments to assist in the implementation of the care management software . The scope will include project management, requirements gathering, system roles, security, workflow , reporting and initial training.

Row 2 - Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
Purchase of Care Management Software	$ 149,000.00

	A	B
34		
35		
36		
37		
38		
39	**Total Development and Adaptation of EHR and Care**	
40	**Management System**	$ 149,000.00
41	**(Infrastructure Budget Line 2)**	
42		

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

MVCP is planning to work with eHana to deploy care management software. We anticipate having a signed contract by mid October. The contract is currently b eing negotiated. We have assumed staggered payments based on key deliverables and milestones. The solution offered by eHana includes:

- a comprehensive workflow solution covering all CP requirements for Assessment, Care Planning, Consents, Participation Forms, and Activity Notes, including signoff and approvals
- Analytics and benchmarking for key quality and performance indicators
- Complete MassHealth billing and eligibility for Community Partner activities
- Standards-driven interoperability with EOHHS, Accountable Care Organizations, and Electronic Health Records
- Robust security architecture to support Community Partner collaborative entities, stand-alone CPs, and affiliated partners

Row 3 - Technology for Service Delivery

	Description of Expense	Cost
60	Laptops to use Care Management Software	$ 25,500.00
61		
62		
63		
64		
65		
66	**Total Technology for Service Delivery**	$ 25,500.00

	A	B	C	D	E	F	G
67	**(Infrastructure Budget Line 3)**	$ 25,500.00					

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Each Navigator will have a laptop so that the care management software can be deployed in the field. We estimate the purchase of 17 laptops at a current price of $1,500 each.

Row 4 - Other Technology Expenses

Description of Expense	Cost
Switch Modules	$ 1,200.00
Total Other Technology Expenses (Infrastructure Budget Line 4)	

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

The budget includes $1,200 for switch modules at a cost of $600 each to accomodate the additional networking requirements of new staff.

Community Partner Infrastructure Budget Report - Workforce Development - Prep Budget Period

Row 5 - Workforce Development Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
	Total Salary	0		$ -
	Fringe rate		Total Fringe	$ -
			Total Workforce Development Staffing including Fringe (Infrastructure Budget Line 5)	**$ -**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Row 6 - Recruitment Expenses

Description of Expense	Cost
Recruitment Expenses	$ 2,000.00
Total Recruitment Expenses (Infrastructure Budget Line 6)	

Provide a description of each recruitment expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

MVCP will spend approximately $2,000 on "Indeed" advertisements to support the hiring of all positions including the Navigators. It is anticipated that 2-3 positions will be filled with internal candidates.

Row 7 - Training Expenses

Description of Expense	Cost
Cultural Competence Training	$ 9,000.00
Other Staff Training	$ 1,000.00
Total Training Expenses (Infrastructure Budget Line 7)	**$ 10,000.00**

Provide a description of each training expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

The Northeast Independent Living Program, Inc. (NILP) is a consumer controlled, cross-disability Independent Living Center. NILP's Education Division, The Training and Learning Collaborative (TLC) is comprised of a qualified team of professionals who are persons with disabilities and/or have many years of training and consulting experience in the disability community. NILP designs and delivers customizes training to address the needs of healthcare providers and community organizations to better serve the needs of their members, patients, and clients resulting in improving the integrated health care delivery system to provide self determined models of care in the least restrictive environments. Core Tenets of Cultural Competence Training for LTSS CP Training include:

- Compare and Contrast the Person Centered Planning and Consumer Directed Models of Care. Why? Transfer the knowledge of IL history, values and beliefs to meet the diverse needs of ACO members living with chronic conditions.
- ADA and Cultural Competence : Beyond Compliance
Health Care Disparities – consumer stories and examples demonstrating the need for a paradigm shift in making health care access an equal benefit for all.
- Communication and Cultural Competence with diverse experiences, belief systems and cultures within the disability Community. For Example: DEAF, Recovery, Ethnicity, Gender, and the intersectionality of our community.
- LTSS CP roles and community perspectives in how to ensure the ACO enrollee's preferences, needs and self determination are met in the Integrated care planning teams.

This training will be provided to key staff throughout ESMV, the LTSS management team and navigators. It will also be offered to ACO partners and CBOs in subsequent periods.

Additional Detail Added 11/15/17

The training provided by NILP consists of 4 modules provided over a 3 day period. Each hour of training is $375. The 3 day training will cost $9K.

The cost for each full-day training session (all 4 modules) was established as $3,000.00 per full day 8 hour training session. This cost is inclusive of our training design and preparation hours. (Formula: 1 hour of preparation for each 1 hour of training or $375.00 per each one hour = $3,000.00 for a full-day training session.) The targeted audience for the training is direct and indirect staff involved in serving the LTSS Community members. Please note that TLC provides all pertinent handout materials for the participants and also **offers CEU's through the NASWs and is recognized and transferrable for Nursing CEU's.**

Lastly, it is important to note that our TLC Training Sessions are very interactive therefore we keep an absolute maximum cap of **30 students** per each training session so that the participants can best absorb the impact and positive outcomes of our TLC curriculum. The targetted audience for the initial training will be the LTSS CP staff and senior managers within ESMV. If space allows, we may invite key contacts within our ACO partners though the plan is to offer this training to our network and partners in later phases of the initiative.

Backup for NILP Disabality Cultural Competence Training Training

Hours Per Day	8
Cost Per Hour	$375.00
# of Days	3
Total	$9,000
# of People Trained	30
Cost Per Person	$300.00

In addition to the Disability Cultural Competence Training, we have set aside an additional $1,000 for other trainings that staff may need such as Performance Management and Analytics, Care Delivery Transformation, or Clinical Integration.

Community Partner Infrastructure Budget Report - Operational Infrastructure - Prep Budget Period

Row 12 - Operational Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Data Quality Manager (.5)	$ 75,000.00	0.5	7	$ 21,875.00
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
	Total Salary	0.5		$ 21,875.00
	Fringe rate	23.5%	Total Fringe	$ 5,140.63
			Total Program Staffing including Fringe (Infrastructure Budget Line 12)	**$ 27,015.63**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the

terms of the CP's contract:

Data Quality Manager: Develop, implement and monitor systems and processes for quality assurance to measure compliance with LTSS CP standards, consistent with the goals, vision and values of ESMV. Provide education and coaching to direct service staff relative to Quality Assurance. This position is partially funded in the program budget and partially funded in the DSRIP budget.

Row 13 - Other Operational Expenses

Description of Expense	Cost
Marketing	$ 3,000.00
Total Other Operational Expenses (Infrastructure Budget Line 13)	

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

This line item funds development, print and marketing materials to share with ACOs and CBOs as well as resource materials that we will give enrollees. It also includes a small allocation to adapt our website to include the LTSS CP program.

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 14)	**10.00%**	**$ 26,379.56**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

The assumed indirect rate is 10% for the prep budget period. This is consistent with ESMV's rate. The rate may change in years 1 to 5 as NILP has a higher rate as their agency is smaller. The indirect allocation covers staffing for senior management , Human Resoures, Core IT, Finance, Billing and Legal. It also includes costs associated with that staff such as occupancy and travel.

Section 7. 5 Initial DSRIP Participation Plan

A. Executive Summary

1. Goals, Challenges, and Proposed Solutions

Strategic Goals

Merrimack Valley Community Partnership (MVCP), consisting of Elder Services of the Merrimack Valley (ESMV) and Northeast Independent Living Center (NILP), working with the Northeast Community Collaborative (NCC) as a strategic network partner, affirms our commitment to EOHHS' goals for the LTSS CP program over the next five years. Our strategic goals and strategies, which are closely aligned with EOHHS's goals, are as follows:

EOHHS' Goal	MVCP's Approach
Improve collaboration across ACOs, MCOs, providers and CBOs	Expand community linkages with ACOs, providers and other community partners through our community-based coalition, NCC.
Improve Enrollee experience and quality of care; assist Enrollees in access to settings and levels of care	Invest in initiatives to increase Enrollee awareness of available services and supports. In addition, we will support educational and training initiatives to improve access to culturally and linguistically appropriate services.
Leverage ACO and MCO expertise serving LTSS needs	Collaborate with ACOs and MCOs to leverage infrastructure including connectivity. We will also educate ACOs and MCOs regarding LTSS CP services.

MVCP is fortunate to have established strong relationships with three entities that have submitted ACO applications within our identified Service Areas. All three ACO-applicants have indicated their intention to work with MVCP as an LTSS CP and have asked us to be involved in the roll-out of their ACOs if awarded.

Opportunities and Challenges

MVCP's timeline calls for rapid implementation to create complex systems, including Information Technology (IT). Educating networks, ACOs, MCOs and others will be integral to the challenge of having others appreciate the value of LTSS. We will use DSRIP funds efficiently, leveraging resources available across the ACO system. Our goal is to participate in an integrated system, eliminating silos that have historically impeded care integration.

2. Projected Assigned and Engaged Enrollees

The MVCP intends to support 1,125 Engaged Enrollees under any Contract that results from this Request for Responses (RFR) submission.

3. Service Area

The MVCP will provide LTSS CP services in the Haverhill, Lawrence and Lowell Service Areas.

4. Implementing the Plan

During 2017-2018, the MVCP will focus on implementing essential CP requirements and Enrollee-related initiatives. We will complete all Management Agreements between ESMV and NILP and with ACO and MCO partners. Over the course of the Contract, MVCP will focus our efforts on enhancing and improving: our ability to serve increasing numbers of Enrollees (e.g., capacity); the breadth and depth of our relationships with ACOs and Community-based Organizations (CBOs), leveraging our relationship with NCC; and the level of sophistication of Information Technology

(IT) tools and functions moving from a focus on pay-for-reporting to full connectivity and sharing of comprehensive assessments and Individualized Care Plans (ICPs)

B. Supporting Populations and Community Engagement

1. Service Areas

Examples of our close community-based relationships appear below. A complete list is available.

Organization Type	Service Area	Description	Nature of Collaboration/Partnership
CBOs	Haverhill	LGBT Collaborative	Provides socialization, information, and support
	Haverhill	Food Collaborative	Offer Food relief programs at housing sites
	Haverhill/Lawrence	COA,YWCA, hospitals	Provide evidence-based healthy living programs
	Lowell	Enterprise Bank	Money management education for Cambodian elders
	Lowell	Minority outreach	Coordinate services for minority populations
Advocacy groups	Haverhill	Breakfast Exchange	Support community programs
	Lawrence	Lawrence COA	Annual information and support caregiver event
		Aging and Disability Resource Consortium	Collaborative event to ensure "no wrong door" for individuals and caregivers needing access to services.
Housing/ shelter providers	Haverhill/Lawrence	Evergreen House with Emmaus;	Funded and built elder housing unit for homeless
	Lowell	Housing partnership	Built affordable and supportive housing in Chelmsford, Westford, and Tewksbury

2. Growing Community Connections

We have meaningful relationships within each local community that we serve. ESMV holds monthly Provider Network meetings across the Merrimack Valley, offering speakers on topics of interest, the chance to highlight new programs/services, opportunities to network and deepen connections with ESMV and each other. We will broaden our community connections beyond the aging services network by inviting disability organizations involved in providing LTSS, agencies serving children and youth, health care providers and BH providers, to attend meetings and/or join our extended network.

ESMV is fortunate to share the same building in Lawrence with local offices of many of the state agencies that serve the populations targeted by the LTSS CP RFR. In the past, ESMV had convened professionals who served multiple populations to discuss individual cases, share information on resources, identify options and facilitate collaboration. We see great value in bringing together this kind of group as an LTSS CP for the Merrimack Valley.

Another key component of our success is the Northeast Community Collaborative (NCC), formed by ESMV and NILP in 2016. ESMV and NILP brought 20+ providers, as well as potential Accountable Care Organizations (ACOs), Managed Care Organizations (MCOs) and Community-based Organizations (CBOs) together to share expertise and innovative approaches, identify and confront common challenges faced by entities involved in LTSS and to offer ongoing guidance to the MVCP. NCC members deliver a significant volume of LTSS and other services that impact social determinants of health in the Merrimack Valley. The NCC will have a voice in the LTSS CP through ongoing participation in service delivery and will have a voting member on the MVCP Governing Body as described in **Section 7.2 C**.

Link to Business Plan: There are multiple linkages between ESMV's and NILP's plans to enhance the breadth and depth of our community connections and our business plan: Under our business plan, we will focus on IT connectivity with ACOs and MCOs in our Service Areas. We also hope to increase overall connectivity with CBOs in year 2, as these relationships will increase in number in Year 1.

3. Updating Community Resource Information

We will inform and update staff on available resources in several ways:

Community resource information: ESMV's Information and Resource Department has one FTE devoted exclusively to resource development and management of information for all staff. In addition to the Green Book, a comprehensive resource guide developed by ESMV and NILP, we also maintain a database and resource library. ESMV will maintain these resources. NILP will collaborate with ESMV to develop, update and distribute information. **Section 7.5.K 1** includes additional information about NILP's Training and Learning Collaborative.

Staff training: We will organize and conduct ongoing educational sessions for staff to support collaboration with CBOs including community resource information and staff orientation updates as well as staff conferences, guest speakers, and community events.

Interdisciplinary care team meetings: The care team will review the community resources included in each Enrollee's LTSS Care Plan and review additional community resources as needed.

Website updates/newsletters: The MVCP will develop and issue electronic information updates to ACOS, MCOs, CBOs and other stakeholders.

C. Community Partner Supports and Activities

1. Enrollee Outreach

ESMV and NILP employ all available resources to truly engage individuals where they are – physically, emotionally, linguistically and otherwise. Our approach begins with learning about how individuals define their needs, which is critical to the process of building rapport and trust. Key outreach strategies are as follows:

We meet the Enrollee at a location of their choosing. The location may include, but not be limited to, the Enrollee's home, neighborhood locations, homeless encampments, motels, shelters, or congregate meal sites among other locations. MVCP will deploy Point of Care (POC) Navigators who will be embedded in hospitals or other health care facilities. The POC Navigator or a "field" Navigator will initiate contact with referred Enrollees wherever they are located or choose to meet. We will truly connect with the Enrollee and build trust. If a contact is not made after multiple attempts, we will reach out to shelters and/or BH providers and other CBOs.

The relationship between Enrollee and our staff is primary. We begin by listening to the Enrollee and engaging them with respect. We create an open, safe, friendly environment in which to meet and immediately focus on the Enrollee's basic needs.

We hire highly qualified, skilled individuals who are trained in motivational interviewing and coaching and are very skillful in interacting with individuals with complex LTSS needs. Our staff are passionate about serving the target population and understand their needs and preferences.

Engagement Process

Effective engagement will begin with the Enrollees' first MVCP contact: the POC Navigator. The Administrative/Intake Coordinator will schedule the first in-person contact with LTSS CP-eligible Enrollees. Navigators, employed by ESMV and NILP, will follow up to reach out to, and connect with, Enrollees wherever they are located. We will adapt outreach protocols from current processes that our outreach teams use today within ESMV's Care Transitions program. We have produced successful results establishing contact and engaging individuals, including those who are homeless, with complex medical and BH challenges.

Engagement and Enrollment Specialists will also participate in the engagement process and focus on those enrollees that are identified as highest risk. These specialists are clinically trained to work with high risk individuals that may be reluctant to enroll in the MVCP program and resistant to care. The specialist participates in outreach activities that allows for direct engagement with potential consumers where they live. This includes establishing good relationships with service organizations like shelters or mental health clinics or soup kitchens; as well as local contact with police and public officials who may be aware where these individuals reside. This specialized attention helps establish the trust and good will needed to encourage someone to participate. Specialists are trained to "work through" someone's resistance or denial to get them enrolled; and then provide encouragement and support once a person becomes an enrollee. These specialists will also provide follow up with consumers who refused help, and work to arrange another CP-LTSS provider if someone doesn't want our services. Once engaged, the consumers would transition to Navigators for ongoing LTSS care coordination.

Outreach may involve seeing Enrollees during an acute care event at a local hospital if the Enrollee is comfortable meeting at that time. We maintain communication and interaction protocols including notification to POC Navigators of an Enrollees' admission or Emergency Department (ED) registration at service area hospitals. In the ED, and during inpatient stays, POC Navigators will partner with hospital-based case managers to improve care plan consistency, while eliminating duplication of effort and confusion for Enrollees. Our POC Navigator will participate in discharge planning; a Navigator will follow-up on transitions to reduce the likelihood of readmission. This innovative approach allows the POC Navigator to partner with hospital care managers to engage the Enrollee, reducing avoidable high-cost services.

During the first in-person contact, the POC Navigator will focus on understanding the individual's needs, their health status and their hopes and/or frustrations with their current situation in a culturally and linguistically appropriate manner. Once the Enrollee feels heard, MCVP will utilize motivational interviewing techniques, and the POC Navigator will explain how LTSS CP services can help address the Enrollee's defined needs and preferences. Our POC Navigators will listen actively, respond to the individual's questions and concerns to overcome barriers to care and help create a support network for the Enrollee. MVCP will provide information regarding our service delivery process with attention to the individual's preferred way of engaging with our organization. We will provide Enrollees with detailed information regarding how to reach their primary Navigator.

The Navigator will explain the anticipated frequency and options available for CP service delivery and will meet with the Enrollee at a place and time that is most comfortable for the individual and their family member or caregiver if appropriate. If agreed to by the Enrollee, MVCP believes that home visits are preferable as they can provide insight into social determinants of health and home

safety. Some Enrollees may be difficult to reach; meeting them where they are increases the likelihood of success.

Ideally, the individual who performs the initial contact and assessment would serve as the Enrollee's Navigator. Due to the volume of referrals, this may not be possible. When necessary, the POC Navigator will make a "warm transfer" to a Navigator as soon in the engagement process as possible. If a better match exists, or if the Enrollee prefers a different Navigator, another MVCP staff member will be assigned. Our Navigator will explain that the Enrollee can opt out of receiving CP services at any time. Enrollees will also be able to request assignment to a different LTSS CP organization at any point in time.

Individuals who choose not to enroll will be provided with contact information should they choose to enroll later, and will be asked if periodic outreach from a Navigator is acceptable.

2. LTSS Care Planning

a. Ensuring Enrollee Meaningful Participation in Care Planning

The MVCP will incorporate Comprehensive Assessment data from the ACO or MCO to which the Enrollee belongs, combined with the full involvement of the enrollee in making their needs and preferences known. We will also review available medical records information and other relevant data.

Using all available information, MVCP POC Navigators and Navigators will develop a person-centered LTSS Care Plan. We will fully involve the Enrollee in the development and management of the LTSS Care Plan through care planning meetings and telephonic contract. We place the Enrollee at the center of their LTSS Care Plan process in order to ensure that the Enrollee participates in the LTSS Care Plan development in a meaningful manner.

b. Providing Informed Choice

Throughout the care planning process, staff will talk with Enrollees about options and the best resources to meet their needs, as they define them. MVCP will listen to the Enrollee and make sure they and their family/caregiver have a full understanding of the benefits and services available to meet the needs they have identified. Then we will actively involve the Enrollee in selecting optimal services and supports. Our goal is to help the Enrollee advocate for their own well-being and health.

The Enrollee's LTSS Care Plan will be designed with the primary goal of meeting the individual's defined needs and preferences. If the Enrollee wishes to remain in or return to the community independently, we will support their desire to live in the least restrictive environment. We will arrange services and supports to maintain, and where possible, extend the function and maximize independence. Enrollees will always be encouraged to be as independent as possible, both in performing Activities of Daily Living and Instrumental Activities of Daily Living, and in choosing and arranging for the programs, services, and resources they utilize to assist with those activities.

We will train staff to provide unbiased information about LTSS and resources to help the Enrollee determine the next steps to take while ensuring that the Enrollee maintains control over the process. We will work in concert with community-based partners to provide Enrollees with efficient access to LTSS for people regardless of age, income or disability.

We will support consumer choice and assist Enrollees with the selection of LTSS contracted providers; if the individual wishes to maintain existing relationships, we will arrange services with that provider where possible. If the Enrollee wishes to select a different provider, we will arrange such a change. As is our current practice, all Enrollee complaints regarding contracted service providers are taken seriously and will be thoroughly investigated to ensure satisfactory resolution.

3. Care Team Participation

a. Promoting Integration of LTSS Communication

ESMV and NILP are aware that the success of the LTSS CP program relies on our shared ability to coordinate care across stakeholders. We believe that Enrollees will be best served through the sharing of complete, up-to-date integrated Enrollee information across organizations, including state agencies and CBOs. Such sharing of information is crucial to the delivery of integrated care coordination and represents an opportunity to achieve savings on infrastructure and IT resources. At the outset, we will a have a compliant, functioning solution that supports care integration; however, over time, our desire is to have a fully interoperable system capable of supporting shared assessments, care plans, reporting and quality management functions. We currently collaborate with ACO and MCO partners in our service area and will do everything possible to support such collaboration. We are also seeking to purchase a care management platform that has interoperable functionality with ACOs.

ESMV and NILP will leverage current and future tools based on the selected IT vendor's technology platform to support effective communication across all stakeholders, including support for the exchange of essential documentation to effectively coordinate care.

Information Sharing & Interoperability. The MVCP intends to leverage standardized technology frameworks to facilitate data exchange with EOHHS, ACOs, MCOs, and other stakeholders. MVCP's IT vendor (eHana)'s Meaningful Use-certified EHR provides validated support for healthcare interoperability standards and standardized transactions formats. We recognize that specific infrastructure and technology investments will be necessary to support the information sharing requirements of EOHHS and ACOs fully, include bespoke/custom extracts and integrations. Our IT solution is further described in **Section 7.4** of this RFR submission.

b. Providing LTSS Expertise on Care Teams

ESMV and NILP will connect each Enrollee to appropriate services by actively collaborating with ACO, MCO, physical, BH and social service providers based on the Enrollee's needs as they define them. When possible, MVCP will participate on the Enrollees' care teams (e.g., ACO, MCO, BH Community Partner), acting as a knowledgeable resource regarding hearing the importance of providers' ability to hear the Enrollee's voice and, regarding LTSS.

As part of the ongoing care delivery process, we will educate service providers on the unique needs of Enrollees with LTSS needs, LTSS services and supports, eligibility criteria, and how to access available benefits. We interact with, and educate, providers as a routine part of our care planning process.

4. LTSS Care Coordination

a. Monitoring and Managing the Member's Status

The MVCP will monitor and manage the member's status and life events using existing care coordination processes which will include:

- Conducting comprehensive assessments and reassessments of the Enrollee's strengths and needs
- Facilitating Enrollee-driven treatment planning with the interdisciplinary care team to develop an individual LTSS Care Plan
- Coordinating care across all systems and providers serving the Enrollee by sharing critical information (inpatient admissions, medications) and facilitating communication (participating in meetings, making telephone calls)

- Identifying if the Enrollee has had appropriate preventive (medical) care and making referrals for treatment
- Contacting the Enrollees Primary Care Provider (PCP) to coordinate care
- Meeting with the Enrollee when their condition changes (e.g., the visit the ED multiple times, they experience an inpatient admission, they lose a caregiver, or they become homeless) to reassess their level of need
- Addressing barriers to care, such as transportation
- Linking the Enrollee to community-based resources and social supports (housing, food, benefits)
- Assessing the Enrollee's progress toward treatment goals and coordinating with the Enrollee and the interdisciplinary care team to update the Person-Centered Treatment Plan generally and the LTSS Care Plan specifically
- Supporting Enrollees during transitions between levels of care

As community-based service providers, the MVCP is well-positioned to continue providing care coordination to Enrollees with complex LTSS needs. Through our relationships with ACOs, MCOs, providers, and CBOs, we will readily coordinate care and facilitate Enrollee access to services.

b. Supporting Enrollee's Ongoing Engagement in Care

All Enrollees will be approached with respect, sensitivity to their beliefs and cultural heritage, and a sincere desire to understand what they want for themselves. We seek to build trust while recognizing the impact of trauma, stigma, and discrimination that many of our consumers have experienced. Our Navigators will be trained to listen to the Enrollee's perspectives and beliefs actively, and to ask questions to understand their impact on his/her choices fully. During each interaction, the Navigator will work to develop a trusting relationship with the Enrollee to enable him/her to ask questions and share honest opinions. MVCP staff will receive training in disability awareness, cultural competency, strategies for enhancing Enrollee engagement in the treatment process, self-identification of goals, and engagement in opportunities that promote recovery and resiliency.

To further promote Enrollee engagement, LTSS Care Plans are designed to focus on each Enrollee's life goals while incorporating his/her strengths, preferences, and needs into the LTSS Care Plan in a culturally and linguistically appropriate manner. Treatment services are individualized to meet each Enrollee's and their family's needs, preferences, and capabilities.

5. Transitions in Care

The MVCP brings a wealth of experience in managing transitions in care. We will leverage our effective processes to provide Enrollees with informed choices, ensure supports are in place to enable successful transitions in care, and ensure Enrollee's stability and satisfaction post-transition.

a. Enabling Successful Transitions

Providing Informed Choice. ESMV provides Transitional Care Coordination which includes a focus on the social determinants of health. We will provide a choice of multiple service options with at least two providers per service option based on Enrollee needs and preferences. NILP and its NERLC offer Peer Support and Peer Bridgers who assist consumers in their transitions from hospital/institution to home including the development of a Wellness Recovery Action Plan (WRAP), an evidence-based approach that facilitates self-determination and empowerment and clearly expresses how the consumer wishes to be supported in recovery.

Ensuring Supports are in Place. As part of the transition process, an MVCP Navigator will coordinate across disciplines to meet the consumer's identified needs and develop a transition plan

to ensure the Enrollee receives the support needed for a successful transition. At a minimum, the MVCP Navigator will:

- Participate in discharge/transition planning with the Enrollee, facility, and providers
- Contact the Enrollee to hear their needs, complete an assessment and update their LTSS Care Plan to reflect their status
- Educate the Enrollee on available services and supports to assist them in transitioning to the community
- Contact the Enrollee's PCP to coordinate discharge planning and follow-up services
- Update the Enrollee's LTSS Care Plan in coordination with the Enrollee and their interdisciplinary care team
- Make referrals for services delivered by other systems (medical care)
- Connect the Enrollee to community-based supports

b. Ensuring Enrollee's Stability and Satisfaction Post-Transition

The Navigator will contact the Enrollee within three business days of discharge to identify their needs and update the LTSS Care Plan to provide transitional care support. The MVCP Navigator will further coordinate the Enrollee's LTSS needs, according to LTSS CP Model Contract requirements. The Navigator will: conduct regular and ongoing follow-up based on the Enrollee's needs; make sure they are receiving all needed services; assess progress toward treatment goals; and, determine the need to update the LTSS Care Plan. The Navigator will also facilitate communication between the interdisciplinary team to ensure care coordination of medical, BH, psychosocial and LTSS care and supports.

6. Health and Wellness Coaching

The MVCP will provide health and wellness coaching as directed by the Enrollee's care team and as detailed in the Enrollee's Care Plan. Navigators will have access to an array of evidence-based health and wellness programs offered through ESMV's Healthy Living Center of Excellence (HLCE) and NILP. The HLCE represents a unique statewide collaboration of community-based organizations, aging service providers, health care systems, government agencies, and health care payors. This nationally recognized Center strives to promote good health and independence for participants by offering 14 evidence-based health programs that address individual health issues and empowers patients to be better health care advocates and consumers. See also: www.healthyliving4me.org.

NILP offers consumer-directed education to empower consumers to take better care of their health and focus on wellness including but not limited to:

- Wellness Recovery Action Planning (WRAP): A 10-week training session where WRAP participants learn how to create a self-designed plan for maintaining an overall sense of wellness, ways of overcoming feelings of un-wellness, improve their quality of life, focus on recovery and lasting well-being.

- Whole Health Action Management (WHAM): Peer Support Training developed by the SAMHSA/HRSA Center for Integrated Health Solutions (CIHS). The primary goal of this training is to teach skills to better self-manage chronic physical health conditions, and mental illnesses and addictions (BH) to achieve whole health. In the context of this training, whole health is defined as having a healthy mind and body. This evidence-based educational and support program is now being used by trained peers in MA to help other peers to identify

what wellness goals are important to them, and with support, to develop action plans for reaching those goals.

7. Connecting Enrollees to Social Services

a. Evaluating Enrollee Social Service Needs

In our current practice, ESMV uses the CDS assessment tool and NILP uses the Independent Living Service Plan (ILSP). Both have elements that assess social service needs. In addition, we have developed risk management tools related to social determinants specific to the health care partners with whom we were engaged. We plan to work with ACO's to review these and other tools they may suggest to determine which tools are best.

b. Ensuring Ongoing Connections to Community Resources and Social Services

The MVCP will jointly develop processes and procedures with ACOs in our Service Areas to collaborate and coordinate the delivery of Flexible Supports authorized by the ACO. LTSS CP Navigators will work with ACO Care Managers for Engaged Enrollees to identify such supports (as documented and authorized by the ACO) and jointly establish a plan for providing or arranging for them (as appropriate).

The MVCP has longstanding existing relationships with community and social service agencies in our service area. We will leverage our relationships within and outside the NCC, e.g., school systems, to ensure the broadest access possible to needed supports and Flexible Supports. We will build upon existing referral and coordination processes to facilitate ongoing communication with both Enrollees and providers and ensure that Enrollees have timely access to needed community supports. Our formal current and planned approach includes:

- Developing comprehensive referral and community resource guides for Engaged Enrollees and CP staff
- Appointing dedicated Point of Care Navigators
- Executing memoranda of understanding with providers and community organizations regarding the delivery and coordination of services

Through our care coordination processes, MVCP staff will follow up with all providers, systems, and organizations to make sure the Enrollee receives all services and supports in accordance with the LTSS Care Plan.

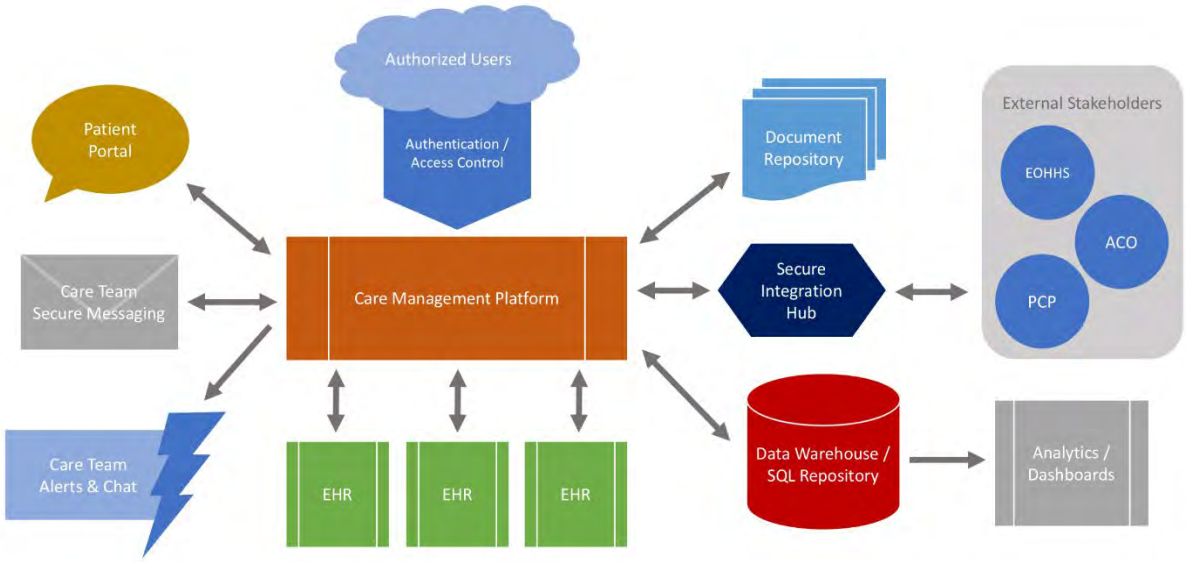
D. Innovative Technologies for Service Delivery

Community Partner Program Requirements

The MVCP intends to partner with an IT organization, eHana, to deploy Care Coordination/Care Management platform technology to meet the various requirements of the LTSS CP program.

Below, the MVCP offers a conceptual diagram that illustrates how we hope to use technology to ultimate meet the LTSS CP IT requirements. Following is a description of our innovative approach to service delivery; our goal is to finalize plans with eHana and produce the functionality illustrated below early in the implementation period of any Contract that may result from this RFR submission.

The overall innovative system that we hope to create can be depicted as follows:



Architecture diagram (simplified)

MVCP will work closely with the selected vendor to develop forms, workflows, processes, reports, and data extracts that meet or exceed the compliance requirements of the Community Partner program, including:

- Storing assessment data
- Documenting Care Plans
- Tracking enrollee assignment, engagement, disengagement, and overall capacity
- Capturing appropriate signatures and document approvals per EOHHS requirements in the timeframes specified
- Surfacing alerts, reminders, and tasks as necessary to prompt Care Team action
- Tracking enrollee events, admissions, referrals, and prompting for necessary follow-up
- Tracking, reporting, and billing appropriate Qualifying Activities to EOHHS in formats specified

Care Coordination

The MVCP will leverage current and future tools based on eHana's technology platform to support effective communication across all stakeholders, including support for the exchange of essential documentation that will allow for optimal care coordination. Our goal is to share assessment and care plan data as essential integrated care tools.

Information Sharing & Interoperability

MVCP will leverage standardized technology frameworks to facilitate data exchange with EOHHS, ACOs, MCOs, and other stakeholders. IT vendor's Meaningful Use-certified EHR provides validated support for healthcare interoperability standards and standardized transactions formats. MVCP also recognizes that specific infrastructure and technology investments will be necessary to support the information sharing requirements of EOHHS and ACOs fully, including bespoke/custom extracts and integrations. By way of example, IT vendor technology is currently capable of producing and transmitting CCD files, querying EOHHS eligibility data, and submitting structured outcomes reports to EOHHS DMH.

Technologies to be used to support care management include: Standards-based transactions including CCD over Mass HIway/Direct Project; Importing eligibility files and enrollment rosters from EOHHS and ACOs; Bespoke reporting and data extracts in formats specified by EOHHS and ACO partners; Standardized HIPAA billing transactions (837p) of Qualifying Activities to EOHHS; Future use of EOHHS Event Notification System (ENS) or, where possible, event data integration directly with healthcare stakeholders.

The MVCP will also use innovative technologies including lightweight laptops, cell phones, and real-time notification systems (e.g., to obtain notification of Emergency Department [ED] or hospital use).

E. Personnel and Staffing

1. Organizational Chart

An organization chart is included in this RFR submission as **Attachment 7.5 E 1**.

The MVCP staffing model will be comprised of a Program Director, Program Managers, an Enrollment and Engagement Manager, Navigators and Point of Care (POC) Navigators, Enrollment and Engagement Specialists, an Admin/Intake Coordinator and a Quality/Data Manager. POC Navigators and Navigators, as well as the engagement and enrollment specialists will meet with Assigned Enrollees at their location of choice, e.g., home, skilled nursing facility or any other location of the Enrollee's choosing.

The Enrollment and Engagement Manager will work with the LTSS-CP team and management staff to help establish effective working relationships with Accountable Care Organizations. These activities will help ensure consumer enrollment and engagement activities are well established in the first year of operations. This includes development and distribution of marketing and education materials and outreach activities with potential partners and ACO principles. The Enrollment and Engagement Manager would also play a key role in providing education to PCP's and other members of the enrollee care team on the role of MVCP, and how the navigator impacts care planning and implementation for both the care team and the ACO enrollees that are referred.

Enrollment and Engagement Specialists will work on engaging those members considered at highest risk. All Navigators will perform contractual Outreach requirements by informing the Assigned Enrollee of the option to receive LTSS CP Supports and the benefits and process for enrolling in the LTSS CP program. The POC Navigator will participate in the discharge-planning process, helping create a smooth transition home with appropriate services and supports. Both POC Navigators and Navigators will be responsible for explaining the Protected Information (PI) that MVCP requires in order to provide LTSS CP services. After explaining the program and PI, the POC Navigator will obtain the signed LTSS CP Participation Form from the Assigned Enrollee, confirming their interest in participating in the LTSS CP program. The signed Participation Form will be stored in the Enrollee's record. MVCP will obtain written authorization to disclose PI to the extent required.

Within five business days of receiving the signed Participation Form, MVCP will assign the now Engaged Enrollee a Navigator who best matches the Enrollee's cultural and linguistic needs. The Enrollee's Navigator will then initiate LTSS Care Planning.

MVCP will have teams consisting of an Enrollment and Engagement Specialist, two Navigators and two POC Navigators. These staff will report to the Program Managers. Based on anticipated

volume, we are preparing to staff three teams, two Program Managers and an Enrollment and Engagement Manager. The Enrollment and Engagement Manager will be a 1.0 FTE. Each Program Manager will be a .5 FTE employee. ESMV and NILP will employ the Navigators, POC Navigators, the Enrollment and Engagement Specialists, the Program Managers and the Enrollment and Engagement Manager. A Program Director will have oversight of the program and will be a 1.0 FTE employee of ESMV. A Quality/Data Manager and Administrative/Intake Coordinator will round out the staffing for our LTSS CP.

2. Staffing Model for Proposed Engaged Enrollees

We propose serving 1,125 LTSS CP eligible Enrollees across the three Service Areas, as described in **Attachment D**. Our staffing model will include the following positions and number of full-time equivalents (FTEs). Job descriptions are provided as **Attachments 7.5. E-3 A-F**.

Table 7. 3. E. 2. Staffing Model

Positions	FTEs
Program Director	1.0
Program Managers	1.0
Enrollment and Engagement Manager	1.0
Enrollment and Engagement Specialists	3.0
Point of Care Navigators	6.0
Navigators	7.0
Quality/Data Manager	1.0
Admin/Intake Coordinator.	1.0
TOTAL	21.0

3. Recruitment Plans

We will begin the recruitment process for key positions once we have received a signed contract. ESMV and NILP are equal employment opportunity organizations that are committed to providing equal treatment for all who seek opportunities for employment or advancement. All qualified applicants receive consideration for employment without regard to race, color, religion, creed, sex (including pregnancy), sexual orientation, national origin, ancestry, age, or disability/handicap, genetic information, veteran status, National Guard or reserve unit obligations or other protected status.

All job announcements are posted internally, as well as on our websites and sent out electronically for placement on a variety of external job boards including indeed.com. This allows for as much exposure as possible. Positions are analyzed prior to posting to ensure that any cultural and linguistic backgrounds needed are requested in the posting; providing a base of competent staff who can support the needs of the communities within the areas we serve.

Both ESMV and NILP provide generous benefits including significant contributions to medical and dental plans. Both organizations offer a 403(b)-retirement plan and generous paid time off for personal time, sick time and vacation time for full and part-time employees.

4. Recruitment and Hiring from Culturally and Linguistically Appropriate Communities

We will maintain and enhance our visibility within the minority community - this allows us to be "seen" and known within a minority community and meet potential staff for future employment.

- We have formal outreach programs to reach minority communities in the Merrimack Valley (particularly Asian, Latino and Portuguese communities).
- We establish working relationships with agencies or organizations that work directly with minority populations.
- We provide specialized services geared to minority populations. Two examples; a Cambodian Money Management workshop offered in Khmer; a Latino caregiver event annually in collaboration with the Lawrence Council on Aging.
- We are a primary sponsor and often attend events hosted specific to a minority population or community. This generally allows us some free advertising – an ability to network or to display information about the agency or a specific program or need.

We currently serve a large minority population particularly in the Lawrence and Lowell areas and have long had a concerted effort to recruit bilingual/bicultural staff members. Currently, our language capacity as an agency includes 27 different languages. These staffs serve as a gateway for recruiting and hiring other bilingual and bicultural staff. This is a real advantage to our efforts for diversity, as they often are the catalyst for finding staff with ability and sensitivity to a variety of cultures and languages.

We advertise in several different media that include diverse languages and cultures. (e.g., Rumbo, a Spanish weekly newspaper in Lawrence). We have established contracts with SCOs and service providers who also have bilingual-bicultural staff. It is not unusual for recruitment between agencies to occur. We attend minority outreach job fairs and participate in local civic events (including political advocacy events and chamber of commerce activities) to reach a larger population.

5. Staff Training

The goal of our training programs will be to provide MVCP staff with an understanding and awareness of the issues facing individuals with complex LTSS needs, understanding CP supports, social services and supports available in the community, disability awareness and delivery of culturally competent care. We will train our LTSS CP Team and other key staff on these topics and will leverage existing training modules to develop comprehensive CP training. Refresher training, as well as updated training on best practices, will occur at least annually. We will finalize training modules and training schedules prior to the contract effective date. Below are examples of our current training programs:

- Cultural competency – we have provided numerous cultural diversity training in the agency as well as established a cultural diversity council for us to determine the best systems, training and staff to support minority outreach and casework activities. This includes cultural diversity and LGBTQIA training. NILP's Training & Learning Collaborative (described in **Section 7.5 K 1**) offers an entire training module on Disability Awareness and Cultural Competence, which all MVCP staff will complete. In training, both ESMV and NILP will emphasize communication and cultural competence with diverse experiences, belief systems, and cultures. NILP's Training and Learning Collaborative (TLC) offers extensive training in Disability Awareness and Cultural Competence. TLC's core curriculum addresses: History, Philosophy & Consumer Direction; ADA and Cultural Competence – Beyond Compliance to the Real Spirit of the Law; Diverse

Experiences and Cultures within the Disability Community; Cultural Competency in diverse cross-disability populations including Enrollee self-determination and autonomy in the Integrated Care Team.

- Accessibility and accommodations – we have a formal in-service department that provides clinical in-services once a month for all field staff. This has included information about low vision needs, accessibility and disability rights, durable medical equipment and assistive technology, dementia simulation and adaptation, and home environment training for those with vision and/or memory issues.
- Independent Living and Recovery Principles - Cross-training is already planned for this spring with NILP's Training & Learning Collaborative to enhance ESMV's understanding of disability issues and independent living and recovery principles, which we plan to continue. These principles can be reinforced in group supervision with Navigators. ESMV has a state-of-the-art training center that accommodates large groups to participate in training.
- Motivational interviewing – This course has already been developed at ESMV and is offered annually to staff to ensure all are trained in motivational interviewing techniques.
- Conflicts of interest, and mitigation strategy for conflicts of interest-
  - a. ESMV has an established Conflict of Interest policy and practice; all employees are trained in and must comply with this policy, which includes clear protocols for mitigation activities.
  - b. We have an established ethics committee that includes members of our Board of Directors to ensure our practice is sound and ethical.
  - c. We have a full-time attorney on staff who works directly with community care programs and can provide advice, counsel, and training on conflicts of interest and mitigation issues. ESMV also consults with attorneys outside of our agency in our protective service and crisis work to ensure the standards of our efforts.
  - D. Health and Wellness principles- we established the Healthy Living Center of Excellence at ESMV over 10 years ago, offering 14 different evidence-based health programs to over 20,000 participants statewide. This center has served as a national model for operating health and wellness programs that address the basics of preventive care, patient empowerment, and good chronic disease management practice. Programs are offered in both Spanish and English. NILP's NERLC also offers evidence-based health and wellness programs such as WRAP and WHAM which promote consumer empowerment.
- For LTSS CP Navigators and Program Managers:
  - Person-centered planning processes – using a curriculum approved by EOHHS and developed by Boston University. Within our training, orientation, and group supervisory practice there are numerous opportunities for training on person-centered planning processes. The curriculum was developed based on EOEA's standards as well as national and state practice in both the disability and aging fields. NILP's Options Counselors also participated in this training.
  - MassHealth state plan and LTSS eligibility criteria – our staff orientation and training program includes information about MassHealth LTSS eligibility practice and criteria. MassHealth consultants are available to consult with ESMV and NILP staff on an every other week basis.
- We have established training and workshops for various clinical initiatives and have been involved in both national and state presentations on subjects including suicide prevention, brain injury, homelessness, abuse and neglect, hoarding, Alzheimer and related dementias, depression,

risk management processes and protocols, and financial fraud and abuse interventions. Training in each of these topics can enhance the basic core knowledge of Navigators and be provided in tandem with other training opportunities.

- The NCC also offers considerable knowledge and expertise for staff who want to understand both the disability and aging support and service networks.

We will seek to partner with ACOs and MCOs to hold periodic conferences for Enrollees, staff, Care Navigators, BH-CPs, social service and community agencies to which Subject Matter Experts (including experts from the ACOs, MCOs, and ILCs) will be invited as speakers.

Staff training will be facilitated by making work hours available for staff to participate on a mandatory basis; and tracking participation electronically through a learning management system (LMS); enabling online evaluations and scoring; providing resource guides and training materials to reinforce learning.

Whenever possible, we will work with ACOs and MCO to develop and deliver training on topics of mutual and common interest, such as care coordination strategies, community collaboration and cultural competence. We will leverage existing MassHealth training and resources into staff training and material, encourage MassHealth training forum attendance and ensure staff interacting with Enrollees with LTSS needs complete required training on LTSS competencies.

6. Retention Strategy

ESMV and NILP maintain an organizational culture and environment that respects and supports a committed workforce through a combination of flexibility and benefits. In addition to competitive salaries and generous benefit packages, ESMV and NILP provide ongoing training and CEU opportunities for their professional staff. ESMV's Social Worker Licensing Program also provides free supervision to employees both before and after licensing, test preparation, reimbursement for testing costs, and an incentive pay increase after one year license. NILP offers tuition reimbursement for eligible employees who wish to take job-related courses. Additionally, ESMV has been voted one of the Top 100 Places to Work by the Boston Globe for three consecutive years and boasts several employees with 30+ years of service at the agency.

F. Implementation Plan and Timeline

MVCP's Implementation Plan and Timeline is presented in **Attachment 7.5 F 1**:

G. Budget Report and Budget Narrative

MVCP's Budget Report and Narrative is presented in **Attachment 7.5 G-1 Attachment B** and **Attachment 7.5 G-2 Attachment C**.

H. Sustainability

ESMV has been able to successfully sustain programs and initiatives such as its Community Care Transitions Program, initially funded by CMS, by leveraging its strong partnerships with local hospitals and contracts with SCOs and other health care providers to secure new payers for our services. We plan to utilize these and other approaches to develop a sustainable foundation for LTSS CP services.

Specifically, the MVCP will sustainably fund the proposed infrastructure and capacity-building investments and LTSS CP supports during the Contract Term and following the initial Contract Term through:

- DSRIP Dollars (initial investment and ongoing funds distribution associated with volume

- Shared savings initiatives developed over time with the ACOs/MCOs
- The ability to sell services to MCOs for non-CP eligible individuals who can benefit from CP services to manage the Total Cost of Care (TCOC)for more Enrollees
- Managing fixed costs associated with IT, licensing, fees and general expenditures over time
- Identifying and developing new services for ACO, MCO and commercially enrolled individuals that support consumers remaining independent in the community and decrease TCOC associated with avoidable hospital utilization.

I. Quality Management and Performance Monitoring

1. Quality Improvement Program Description

The MVCP will create a Quality Management and Quality Improvement (QM/QI) Program. Our QM/QI program, which will support our mission, will measure and improve: clinical quality of care; care coordination; access and availability; continuity; and Member experience. Through our QM/QI program, we will apply a data-driven, evidence-based approach to service delivery and analyze and compare data against internal, local, and state benchmarks to identify opportunities for improvement. Our QM/QI program will establish goals, processes, and include an interdisciplinary committee structure.

ESMV has successfully implemented a PDSA (Plan, Do, Study, Act) Cycle quality improvement initiative. This program examined how medical information was shared between ESMV and Lowell General Hospital. Based on these findings, a streamlined transition of care record was established and shared through the health information exchange to ESMV.

Applying Principles of Continuous Quality Improvement

The MVCP's QM/QI Program will be based on continuous monitoring of quality performance measure indicators, clinical practice guidelines and other QM/QI activities. Our goal is to deliver quality care that helps Enrollees maintain and improve health and wellness. Our objectives are to: improve clinical quality; improve coordination of care; improve access to services; and, enhance all aspects of the Enrollee experience. We will achieve our goal and objectives by relying on data-driven decision making, evidence-based practices, and expert advice – all of which will be used to drive improvement. These goals will form the basis of our QM/QI program and provide areas of focus that drive our improvement strategies. We will work to improve care continuously by:

- Using data to identify and address anomalies in care and outcomes
- Developing interventions to ensure that goals are achieved
- Completing objective measurement processes and implementing improvement initiatives

The information used for quality monitoring and improvement derives from several sources including but not limited to: medical record review, consumer and/or provider feedback, utilization review, and survey data.

The QM/QI Program will define clear assignment of roles and responsibilities to each affiliated partner; performance benchmarks in alignment with program goals and contractual requirements; and Enrollee satisfaction measures. Using a continuous quality improvement approach, we will compare our outcome results to prior year results to assess our performance in meeting goals, and advance performance by establishing outcome objectives for the next year.

QM/QI Plan

Our QM/QI Plan and Annual Work Plan will constitute the blueprint for all quality goals and describe the activities that the MVCP will undertake to address all contractual QM/QI requirements.

As outlined in the QM/QI Plan, we will collect and analyze qualitative and quantitative data to drive quality improvement initiatives. The QM/QI Plan will be a responsive, dynamic document and we will continually update it based on stakeholder input and data analysis. The MVCP will also maintain an Annual Quality Workplan that delineates a core set of performance metrics and is updated based on the annual review of systems. The Work Plan will define strategies to address priorities outlined in the QM/QI Plan.

Annually, the MVCP will conduct a comprehensive program assessment that examines QM/QI program effectiveness, service utilization, cost, quality data, the prior year's outcomes, and compliance with contractual requirements. Progress toward goals will be reported to the Quality Committee, which will determine opportunities for improvement, design interventions, and track the effectiveness of interventions. In this way, we will ensure our QM/QI program is relevant to the population we serve and results in better Enrollee care.

2. Proposed QM Initiative

The MVCP is committed to improving Enrollee care by enhancing the quality of services we provide. To that end, we propose to implement a quality initiative related to enhancing Care Coordination for high-cost, high-risk Enrollees served by the MassHealth program. Specifically, as described below, we plan to implement an initiative that seeks to increase the number of Interdisciplinary Care Team (ICT) meetings in which the LTSS actively participates to create a single Interdisciplinary Care Plan (ICP) in collaboration with the ACO.

Description: The MVCP will establish a protocol with each ACO in our geographic service area designed to promote the creation of a single ICP that includes LTSS for individuals who are LTSS CP eligible.

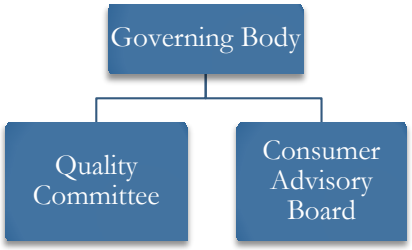
Target Population: The target population for this initiative includes individuals who are LTSS CP eligible and Engaged.

Measures for Success: Data related to this initiative will be continuously monitored through our Quality Committee. Measures of success will include:

- The number of integrated care plans that include MVCP's LTSS Care Plan as part of the overall ACO ICP.

3. Quality Management Committee

The MVCP will maintain a multidisciplinary committee structure that drives quality improvement through the review of quality data, includes representatives from each affiliated partner, and incorporates feedback from MVCP's Consumer Advisory Board. Our Quality Committee will meet monthly and be responsible for 1) identification of quality improvement opportunities; 2) finalizing intervention strategies to improve quality and cost-effectiveness; 3) establishing timeframes for interventions; and 4) tracking the effectiveness of interventions and making modifications to improvement strategies, as needed. The Quality Committee will report to the Governing Body as shown below.



Performance data will be reported to the Quality Committee which analyzes data against program goals and develops performance improvement initiatives. This committee will meet monthly and include one representative from each affiliated partner and will be chaired by the Program Director.

J. Coordination with ACOs and MCOs

1. Communicating MVCP's Skills and Expertise to ACOs and MCOs

We have already initiated discussions with ACOs who are members of our NCC and MCOs in our service area to discuss integration strategies. Such discussions will continue over the next several months as BH CP, LTSS CP, ACO and MCO contracts are awarded by EOHHS and, as Management Agreements are developed. We are communicating with and will continue to educate ACOs and MCOs regarding:

- The contribution that the MVCP can make to delivering quality care for individuals with LTSS needs. We will impact integration, patient satisfaction and Total Cost of Care (TCOC) among other measures, all of which will be vitally important to our Enrollees and to our organization, ACOS and MCOs our joint efforts to deliver care.
- The breadth and depth of LTSS CP services available to Enrollees who are eligible for such services. For example, we will discuss the specialized nature of the LTSS Care Plan and ongoing care plan implementation and monitoring.
- Collaborative strategies to integrate care for LTSS CP eligible individuals in the assessment, care planning, and care delivery process.
- Shared responsibility in caring for MassHealth Members with the greatest needs.
- The importance of primary care delivery for individuals with LTSS needs, many of whom go without primary care services for a variety of reasons.

2. Branding and Marketing with ACOs and MCOs

The MVCP's branding and marketing plans will be guided by MassHealth policy and procedure, which prohibits MassHealth vendors from directly marketing to Enrollees.

We believe that we are not marketing a product, but rather educating people about a valuable potential resource. It is important that effective branding materials are created, and outreach and education activities are well defined and comprehensive. To that end:

- Executive Leadership staff is proactive in network and outreach activities with community partners. We are quick to visit and establish our willingness to be an effective partner in care. We have a long practice off shaping ideas into reality. We also have a long history of working in partnership with multiple partners and disciplines to create an effective quality care program.
- The development staff at the agency includes both design and production capacity for marketing and education materials. We also have many media tools at our disposal to get our message out and our efforts "branded." That includes:
  - An e-newsletter distributed monthly to a wide range of readers

- An active website with a recent portal established specifically for caregivers
- A Facebook page for agency news that is managed daily
- Video production capacity
- A weekly newspaper column that covers the Merrimack Valley readership and includes a Spanish-language newspaper
- Guest appearances on radio and TV programs

ESMV's Development staff also create and produce resource and education materials for individual programs, and have vast experience working in teams and across disciplines to hone the right message and "look." They produce all agency annual reports, education materials, and resources, including a comprehensive resource guide for both aging and disability interests as well as a "person-centered" resource and planning guide for veterans.

3. Collaboration with ACOs and MCOs

The MVCP will provide information to all ACO and MCO partners in the Service Areas for which this bid applies. We intend to contract with all ACOs and MCOs in three Service Areas and will employ the collaboration strategy described above.

4. Conflict Resolution

The MVCP will partner closely with ACOs in the Service Areas to serve the needs of Enrollees with LTSS needs. Our LTSS CP will leverage and build upon the strengths that ESMV and NILP and our NCC, bring to this engagement. While we do not anticipate disagreements in areas of shared responsibility, we recognize that differences of opinion may arise, specifically related to care coordination decisions that affect Enrollees or, the way the Contract is managed. Our mutual intention is to resolve those disagreements in a timely manner that causes no harm whatsoever to Enrollees and, maintains compliance with the terms of the contract.

K. Providing Culturally Competent and Informed Services and Supports

1. Effective, Equitable, Understandable, and Respectful Quality Supports

ESMV has over 40 years of experience accommodating the diverse needs and special interests of consumers. These include:

1. Our Information and Referral department dedicated to resource development and maintenance of current information. Our bilingual capacity includes 16 languages spoken by staff in the agency and a formal contract with an interpreter service for languages not covered by staff.
2. ESMV prints educational materials in different languages including Spanish and Khmer. NILP has a full-time Deaf staff person and an ASL Interpreter on staff; they regularly utilize CDI, CART, Relay Services, Video Phone, Braille, Large Print, and accessible computers in our daily operations and special events. NILP also owns 20 Assistive Listening Devices that are readily accessible for any consumer or staff to use. NILP provides extensive peer role modeling and related services for dozens of people who are Deaf Hard of hearing, and late-deafened.
3. We use different platforms, including social media, ESMV website with portals for specific populations "e-newsletters", and web-based training platforms.

In addition to our Help Desk staff who assist callers by phone or TTY device, ESMV's website describes our capacity to offer language and communication assistance (described above). NILP's website also describes their linguistic and assistive capacity, which includes a full-time Deaf staff

person and an ASL Interpreter on staff. Both agencies respond to specific requests and special needs related to communication promptly, either through in-house resources or contracted services.

NILP's Deaf and Hard of Hearing Independent Living Services (DHILS) Program is highly visible within the deaf community. DHILS staff work with people who are culturally Deaf, late deafened or hard of hearing offering a comprehensive array of services to help consumers live independently.

The MVCP understands the critical role that culture, ethnicity, and ethnicity play in equal access to health care, and enrollees engage more easily when systems, services, and providers are culturally, linguistically and geographically sensitive. ESMV's and NILP's processes are designed with the Enrollee at the center of their care, regardless of language, age, race, ethnicity, preferences, beliefs, or disability.

We recognize that "culture" encompasses diverse language, racial or ethnic background, national origin, immigration/refugee experience, physical or mental disability, religious affiliation, gender and gender identity, and sexual orientation. During screening, we offer the Enrollee an opportunity to identify any preferences that impact how they view and access services. Their preferences will guide our care planning.

NILP's DHILS program also works collaboratively with their Recovery Learning Community (NERLC) to provide wellness and recovery supports and services to consumers who are Deaf or hard of hearing who also have a BH condition. Supports include monthly Deaf Peer groups and a Deaf Parent Support group to provide them with information and support.

In training, both ESMV and NILP will emphasize communication and cultural competence with diverse experiences, belief systems, and cultures. NILP's Training and Learning Collaborative (TLC) offers extensive training in Disability Awareness and Cultural Competence. TLC's core curriculum addresses: History, Philosophy & Consumer Direction; ADA and Cultural Competence – Beyond Compliance to the Real Spirit of the Law; Diverse Experiences and Cultures within the Disability Community; Cultural Competency in diverse cross-disability populations including Enrollee self-determination and autonomy in the Integrated Care Team.

2. Expertise and Experience Providing Care to Special Populations

Table Section 7.5.K.2. Expertise and Experience Providing Care to Special Populations

Special Population	ESMV	NILP
Homeless Individuals	ESMV meets Enrollees at any location where they are comfortable including, tent cities, homeless shelters, or congregate meal sites.	NILP also meets Enrollees at any location where they are comfortable (homeless shelters, or congregate meal sites).
LGBTQ Populations	ESMV co-sponsors an LGBT Senior Social Connection, offering participants the chance to connect, and build a sense of community	Recovery Learning Community hosts peer support groups monthly including LBGTQIA and Allies
Criminal Justice-involved Individuals	ESMV's Protective Services staff often work with individuals who have had criminal justice involvement. People who experience homelessness, struggle with substance abuse/addiction, and/or mental illness have often had such contact.	NILP 's Peer Recovery Program has partnered with youth and adults with involvement in the criminal justice system. A history of court involvement due to substance use and recovery wellness can be challenging. Peers with lived experience offer a special perspective in providing care to these individuals. NILP also collaborated with the Turning Point Re-Entry Program (TPRP), designed to help inmates from

Special Population	ESMV	NILP
		the Essex County Sheriff's Department re-enter society.
Low Vision, Deaf or Hard of Hearing	ESMV assists many consumers with low vision or hearing impairments. We connect consumers with resources from the Perkins School, MCB, ASL interpreter services and we have TTY access.	NERLC peer support groups monthly including Deaf or hard of hearing services led by a Deaf peer.
Individuals with Cognitive Disabilities	ESMV serves individuals with cognitive disabilities. We also have a federal grant to promote screening and identification of older adults with TBI and referral to SHIP, BIA, or to Habilitation Therapy, Adult Day Health programs or in-home LTSS, if appropriate.	NILP supports individuals with brain injuries and cognitive impairments in developing self-help skills, a recovery orientation, and self-advocacy skills.

Community Partner Program Budget Report - Prep Budget Period

Only complete this Program Budget Narrative using amounts anticipated for PBP.
Lines may be added to the Program Budget Narrative tables as necessary

Row 1 - Salary

Position	Annual Salary	FTEs	# Months	Total
Director of Healthcare Transformation	$ 78,241.80	1.00	7	$ 45,641
Program Supervisor	$ 45,354.40	1.00	5	$ 18,898
LTSS Community Partner Care Coordinator	$ 38,220.00	7.00	2	$ 44,590
LTSS Community Partner Support Worker	$ 27,300.00	2.00	2	$ 9,100
LTSS Community Partner Support Worker	$ 29,120.00	1.00	2	$ 4,853
Administrative Assistant	$ 36,946.00	1	7	$ 21,552
				$ -
				$ -
				$ -
Total Salary (Program Budget Line 1)		**$12.00**		**$ 144,634**

Row 2 - Fringe

Fringe Item	Total Salary	Fringe Rate	Fringe
Fringe Item	$ 144,633.88	30%	$ 43,390
Total Fringe (Program Budget Line 2)			**$ 43,390**

Total Personnel*	**$ 188,024**

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:

Director Of Healthcare Transformation: Oversee all aspects of the services, including program development, operations, analytics, hiring, supervising, and training staff.

Program Supervisor: Provides direct supervision to LTSS Community Partner Care Coordinators and LTSS Community Partner Support Workers to ensure program processes, philosophy, and services are high quality

LTSS Community Partner Care Coordinator: Promotes coordination in the delivery and receipt of LTSS to enrollees assigned by Accountable Care Organizations (ACO) and Managed Care Organizations (MCO).

LTSS Community Partner Support Worker**:** Provides support to the LTSS Care Coordinator to promote coordination in the delivery and receipt of LTSS to enrollees assigned by Accountable Care Organizations (ACO) and Managed Care Organizations (MCO).

Administrative Assistant: Provide clerical and organizational support

Some expenses in this section were shifted to indirect per the budget guidance document instructions.

Fringe benefits includes health insurance for employees. Estimates are based current utilization of a variety of plans that run

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Cultural Competency			$ 400.00
Total Training and Professional Development (Program Budget Line 3)			**$ 400.00**

Provide a description of each Training and Professional Development line item included in the table above:

Cultural Competency: 1 – 4 hour training on Cultural Competency for all employees through Katie Brown Educational Program at a flat rate of $400.00 for 11 FTE's

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
Dir of Healthcare Transformation	698.6	7	0.535	$ 2,616.15
Program Supervisor	320.4	5	0.535	$ 857.07
LTSS Community Partner Care Coordinators	321	2	0.535	$ 343.47
			Total Mileage	$ 3,816.69

Travel Expense Description	Cost
Total Mileage	$ 3,816.69
Parking and tolls	$ 480.00
Total Travel (Program Budget Line 4)	**$ 4,296.69**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

Total Mileage

Program Director: Estimate includes regular trips to Boston and Worcester, in addition to miles for covering proposed geographic area for education and relationship building with ACO's/MCO's

Supervisor: Estimate includes regular trips to Boston and Worcester, in addition to miles for covering proposed geographic area for education and coordination and meetings with ACO's/MCO's.

Community Partners: Estimate includes regular trips to Boston and Worcester for educational purposes, in addition to miles for covering proposed geographic area for public education

Parking: Based on estimate of two trips per month to Boston/Worcester

Cost was added since original submission to ensure enrolles get assistance as needed.

Row 5 - Equipment

Description of Equipment	Unit Cost	#units or FTEs	Cost
			$ -
		Total Equipment (Program Budget Line 5)	**$ -**

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost

Printing supplies	53.85	4	$ 215.40
Cartridges	47.47	10	$ 474.70
Paper	30.99	10	$ 309.90
Desk supplies	100	12	$ 1,200.00
Postage			$ 461.60
Total Supplies (Program Budget Line 6)			**$ 2,661.60**

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:
Printing

Printing supplies, cartridges, and paper: Cost determined by current vendor

Postage: To send education materials, letters, flyers.

Desk Supplies: Costs include: desk organizer, trash basket, stapler, scissors, tape dispensers, calculator, writing pads, envelopes,

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
License for Director	289.8	1	$ 289.80
License for Supervisor	207	1	$ 207.00
Total Software Licensing (Program Budget Line 8)			**$ 496.80**

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

Carelogic licenses: Costs included for access during preparatory budget period for monitoring and testing of the system.
for Director for 7 mths, for Supervisor for 5 mths @ $41.40 per mth

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
Smart phone data plans			

Director of Healthcare Transformation	$	371.00	1	$	371.00
Program Supervisor	$	265.00	1	$	265.00
LTSS Community Partners Care Coordinators	$	159.00	7	$	1,113.00
LTSS Community Partner Support Workers	$	106.00	3	$	318.00
Hosted Email Accounts					
Director of Healthcare Transformation	$	63.00	1	$	63.00
Program Supervisor	$	45.00	1	$	45.00
LTSS Community Partners Care Coordinators	$	18.00	7	$	126.00
LTSS Community Partner Support Workers	$	18.00	3	$	54.00

				$	-
			Total Telecommunications (Program Budget Line 9)	**$**	**2,355.00**

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

Smart phones with data plan: All employees will be issued smart phones upon hire to ensure they are accessible to clients and other providers, and to allow efficient and timely communication while in the community. *for Director for 7 mths, for Supervisor for 5 mths, for 7 LTSS Care Coordinators for 2 ,3 LTSS Community Partner Support Workers for 2 mth. The cost for each individual license is currently $53.00.*

Hosted e-mail accounts: Provide all employees with electronic communications, including encryption for confidential communications.

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost
Fall River Office	905	6.58	$ 5,954.90
			$ -
			$ -
		Total Occupancy (Program Budget Line 10)	**$ 5,954.90**

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:

Rent: Work location needed for employees who are developing program. Office space is calculated @ $11.36 per sq for 905 sq ft of space for the 7 mths - $850.70 * 7 mths

Rental costs have been adjusted to reflect the new format provided and the change in budget period

Row 11 - Other

Other Direct Expense Description	Cost

Total Other Direct Costs (Program Budget Line 11)	**$ -**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 12)		**$ -**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Indirect cost**:** rate of 15%

FSA Senior Leadership will provide direct oversight to program during implementation period, as well as administrative guidance to ensure program has full agency service support and seamless integration with other organization programs. This includes programatic, financial (payroll and accounting), technological and operational services and support, including professional laibility insurance. In addition, indirect costs include leasing or routine replacement (depreciation and financing interest only) of office equipment, costs related to occupancy of administrative premises, some officer/director compensation, auditing, management costs, working capital interest, and other similar or related resources /expenses.

Community Partner Infrastructure Budget Report - Technology - Prep Budget Period

Only complete this Infrastructure Budget Narrative using amounts anticipated for PBP.
Lines may be added to the Infrastructure Budget Narrative tables as necessary

Row 1 - IT Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
IT Manager	$ 62,662.60	0.29	7	$ 10,600
IT Technical Assistant	$ 41,808.00	0.1	7	$ 2,439
SQL Report Writer	$ 38,316.00	0.4	7	$ 8,940
				$ -
	Total Salary	0.79		$ 21,980
	Fringe rate	30.0%	Total Fringe	$ 6,594
			Total IT Staffing including Fringe (Infrastructure Budget Line 1)	**$ 28,574**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

IT Manager: Responsible for the overall development and implementation of the EHR, including monitoring consultative service provision by Carelogic, developing training documentation, and technology deployment for sites. Provides oversight of IT employees to ensure equipment is operational and EHR workflows and reports are meeting programmatic needs. **The budget has been adjusted so that this position will assume project management responsibilities once the plan is established by the consultants, and also provide day-to-day oversight of all technology activities.**

IT Technical Assistant: Ensure all equipment is properly installed, configured, and operational. Provide proper security access to end-user.

SQL Report Writer: Create reports within the EHR to allow for efficient proper workflow for users, as well as provide analytics to program leadership to assist with monitoring operations and provide useful information for decision making. **This is a new position in the IT department since the original proposal, and will provide some report writing that had been previously incorporated into the consultant's hours.**

Row 2 - Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
Qualifacts-Carelogic Consultation	$46,200
Total Development and Adaptation of EHR and Care Management System (Infrastructure Budget Line 2)	$46,200

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Qualifact - Carelogic Consultation: Assistance and consultation will focus on developing configurable forms and user- friendly service documents, mapping for new services and workflow development, secure access to share data with ACO's/MCO's and integration of records. Services will also include comprehensive data analytics/reporting development for compliance, outcome and quality measures to meet operational, State, and payer needs and requirements.

This amount has been decreased from the original proposal and includes all contract services previously listed in Program Budget Year one. FSA has hired a SQL Report Writer. This position can perform some of the work that would have been delegated to the consultants.

Row 3 - Technology for Service Delivery

Description of Expense	Cost
Desktop Computers	$ 4,320.00
Surface Tablets	$ 18,360.00
Monitors and adaptors	$ 2,400.00
Chromebooks	$ 2,000.00
Total Technology for Service Delivery (Infrastructure Budget Line 3)	**$ 27,080.00**

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Desktop computers: 4 desktops @ $1080.00 each will be located in each office to allow for efficient work production, specifically creating documents not related to EHR.

Surface Tablets: 12 tablets @$ 1530.00 each will be issued to all program employees to allow for ease while working in the field, including access to the EHR. (18,360.00)

Desktop monitors and adapters: 12 monitors with adaptors @ $200.00 each will be used to allow for ease in using EHR and other software for office -based work (e.g. client document creation).($2400.00)

Chromebooks: 5 chromebooks @ $400.00 each will be used by clients, with assistance from program staff, to afford internet access for education, research, and assistance with securing appropriate services.

Since the initial proposal, FSA has completed some IT upgrades. The increase in Row 3 from the original proposal reflects the cost of new appliances and installation for LTSS CP Supports that did not exist at the time of the proposal.

Row 4 - Other Technology Expenses

Description of Expense	Cost
Network Switch and Wiring	$ 4,000.00
Website development	$ 379.10
Internet Security and VPN connectivity	$ 1,666.67
Budgeting and Accounting Software set -up fees	$ 1,000.00
Mileage software fees	$ 525.00
Total Other Technology Expenses (Infrastructure Budget Line 4)	**$ 7,570.77**

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Network Switch and Wiring: Ensure technology is accessible with computers, printers, fax and copier. Cost is based on similar recent work project.

Website development: FRFSA.org website will be enhanced to provide program description, contact information, and educational information, including useful links. **This was an addition from the previous proposal to ensure optimal visibility.**

Internet security and VPN connectivity: Secure internet connectivity and provide access via VPN to employees from remote location. *This increase includes the cost of the appliance (Sonic Wall) and installation.*

Budgeting and Accounting Software set-up fees: Set up fees to build new program into current system.

Mileage Software User fees-: Fees for employee mileage tracking and payment

Community Partner Infrastructure Budget Report - Workforce Development - Prep Budget Period

Row 5 - Workforce Development Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
HR Coordinator	$ 32,032.00	0.10	7	$ 1,869
Recruitment Manager	$ 26,000.00	1.00	4	$ 8,667
HR Generalist	$ 39,985.40	0.02	7	$ 466
	Total Salary	1.12		$ 11,002
	Fringe rate	30.0%	Total Fringe	$ 3,301
	Total Workforce Development Staffing including Fringe (Infrastructure Budget Line 5)			**$ 14,302**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

HR Coordinator: Provide assistance with recruiting (advertising, screening, references) new employees and conducting part of new employee orientation

Recruitment Manager: Implement recruitment plan, and ensure timeliness of hiring and on-boarding processes. **This temporary position was added to ensure timely recruitment to meet proposed staffing patterns will be in place on June 1, 2018.**

HR Generalist: Provide some portions of new employee orientation, include benefit administration and data tracking

Other adjustments within the Workforce Development Staffing Row reflect changes to accommodate the adjusted start date for the contract.

Row 6 - Recruitment Expenses

Description of Expense	Cost
Employee Referral Bonuses	$ 1,000.00
Sign-on bonuses	$ 11,000.00
Advertisement	$ 9,331.00
Total Recruitment Expenses (Infrastructure Budget Line 6)	**$ 21,331.00**

Provide a description of each recruitment expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Employee referral bonuses : Bonuses ill be awarded to existing employees who refer candidates for these positions; Program Supervisor ,LTSS Community Partner Care Coordinator and LTSS Community Partner Support Worker

Referral Award Program Amount:

Referral awards will be made in two payments. The first award of a $100 Amazon Gift Card will be made after the referred candidate has been employed for a minimum of one week. The final award, a $150 Amazon Gift Card will be made after the new employee has completed his or her first six months of employment. Maximum estimated amount would be $1,000.00

Sign on bonuses : Bonuses will be offered to well-qualified candidates who accept a position in the program. Increased from previous budget due to local competition. A sign-on bonus will be offered to well-qualified candidates who accept a position in the following roles:

Program Supervisor - $1,000
LTSS Community Partner Care Coordinator - $7,000
LTSS Community Partner Support Worker - $3,000

Advertisement: A targeted recruitment plan will include multiple sources, including on-line sources (Indeed.com , O'Jornal , Craig's List, and Idealist.org). Additional advertising through local media will include SouthCoast Media, and Fall River Herald News.
A targeted recruitment plan will include the following on-line sources and local media sources:

Indeed.com @ $3,000.00 each month of the Infrastructure period of 2 months.	$ 6,000.00
Craig's List @ $40.00 per week every other week, for 5 month period.	$ 560.00
Idealist.org @ $90.00 per job posting for 30 days, for 5 month period.	$ 450.00
O'Jornal @ $180.00 per month for 5 month.	$ 900.00
Herald News @ $395.00 for 3 month period.	$1,185.00
Southcoast Media @ $236.00 to start multiple publications up to 5 weeks.	$ 236.00

This was increased to ensure better visibility in competitive market.

Row 7 - Training Expenses

Description of Expense	Cost
Trauma Informed Care	$ 3,000.00
Motivational Interviewing	$ 3,400.00
Engagement Strategies	$ 1,200.00
Case Management/Care Coordination Prog.	$ 5,000.00
Meetings with Community Partners	$ 1,125.40
Total Training Expenses (Infrastructure Budget Line 7)	**$ 13,725.40**

Provide a description of each training expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Trauma Informed Care: 3 - 5 hour training sessions for all employees on Trauma Informed Care, Mental Health First Aid and Working with adult survivors of trauma through The Center for Professional & Community Education at a flat rate of $3000.00 for 11 FTE's

Motivational Interviewing: 4 – 4 hour training sessions for all employees on Motivational Interviewing through The Center for Professional & Community Education at a flat rate of $3400.00 for 11 FTE's

Engagement Strategies: 3- 3 hour trainings on Engagement Strategies for all employees by H & H Consulting, LLC. at a flat rate of $1200.00 for 11 FTE's

Case Management/Care Coordination Program: 8 employees will participate in an 8 week Case Management/Care Coordination on-line course offered by University of Southern Indiana at a rate of $625.00 per staff for 8 FTE's

Conferences and Meetings: Food for monthly meetings for proivder network/advisory work groups in all satellite areas, including educational meetings

Row 8 - Retention Expenses

Description of Expense	Cost
Incentive payment	$ 1,532.42
Total Retention Expenses (Infrastructure Budget Line 8)	**$ 1,532.42**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Incentive payments: Provided to Program Director and IT Project Manager for completion of specific goals focused on timeliness of project completion and quality of service roll-out and provision. **This is a new retention strategy and expense that was not included in the original proposal.**

Community Partner Infrastructure Budget Report - Business Start Up Costs - Prep Budget Period

Row 9 - Office Equipment

Description of Expense	Cost
Desktop Printers	$ 800.00
Total Office Equipment (Infrastructure Budget Line 9)	**$ 800.00**

Provide a description of purpose for each office equipment expense listed in the tables above, including how the costs were determined:

Desktop Printers: 4 printers at $200.00 each provided at each site to allow employees to print written information to clients as appropriate.

Row 10 - Office Furniture

Description of Expense	Cost
Desks	$ 6,548.70
Chairs	$ 3,834.90
Filing cabinets	$ 598.00
Chair mats	$ 367.05
Total Office Furniture (Infrastructure Budget Line 10)	**$ 11,348.65**

Provide a description of purpose for each office furniture expense listed in the table above, including how the costs were determined:

Desks, chairs, filing cabinets, and chair mats: 15 desks at $436.58 each; 15 desk chairs and 15 guest chairs at $127.83 each; one four drawer file cabinet at $229.00 and one storage cabinet at $369.00; 15 chair mats at $24.47 each

Costs are based on costs from WB Mason.

Community Partner Infrastructure Budget Report - Operational Infrastructure - Prep Budget Period

Row 12 - Operational Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Data Coordinator	$ 38,183.60	0.21	7	$ 4,677.49
Director of Marketing	$ 71,066.09	0.08	7	$ 3,124
				$ -
	Total Salary	0.29		$ 7,801.21
	Fringe rate	30.0%	Total Fringe	$ 2,340.36
			Total Program Staffing including Fringe (Infrastructure Budget Line 12)	**$ 10,141.57**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Data Coordinator: Provide clerical support to Director of Healthcare Transformation, including data entry and reporting.

Director of Marketing**:** Develop and implement marketing plan which will include the creation of flyers, brochures and designs for additional marketing items

Row 13 - Other Operational Expenses

Description of Expense	Cost
Marketing	$ 1,701.23
Legal Fees	$ 2,700.00
Total Other Operational Expenses (Infrastructure Budget Line 13)	**$ 4,401.23**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Marketing: Includes business cards and all promotional materials, as well as sponsoring community meetings

Legal Fees: For review of contracts with ACO's and MCO's

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost	
Total Indirect Cost/Administrative Overhead (Program Budget Line 14)			**$ -**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Indirect cost**:** rate of 15%

FSA Senior Leadership will provide direct oversight to program during implementation period, as well as administrative guidance to ensure program has full agency service support and seamless integration with other organization programs. This includes programatic, financial(Accounting and Payroll), and operational services and support, including professional liability insurance. In addition, indirect costs include leasing or routine replacement (depreciation and financing interest only) of office equipment, costs related to occupancy of administrative premises, some officer/director compensation, auditing, management costs, working capital interest, and other similar or related resources /expenses.

Business Start Up Costs	Ramp-up Costs	Fully operational business locations for all service areas included in the LTSS CP contract	11/01/17	12/31/19	Draft Project Management plan to establish business locations across geographic region to be served	Project Management Plan						
Operational Infrastructure	Operation Staffing including Fringe	The LTSS CP will develop collaborative business relationships with other community providers, ACOs and MCOs	11/01/17	04/30/18	Finalize and execute ACO/MCO agreements	Executed agreements						
Operational Infrastructure	Other Operational Expenses	The LTSS CP program will operate with an established quality assurance and quality improvement framework to support the achievement of performance and quality measures.	11/01/17	12/31/19	Begin design of quality management infrastructure	Meeting minutes						

7.5 INITIAL DSRIP PARTICIPATION PLAN

A. Executive Summary: The five year Business Plan for implementing the LTSS CP program is detailed in the timeline and reflected through our response; but it can be articulated in a single simple vision statement. When awarded, FSA will dedicate all available resources to the complete and successful implementation of the LTSS CP program and all required quality measures. Over the last seven years, FSA has initiated four new and innovative programs. Each is delivering high quality services at or exceeding volume thresholds and each is sustainable. FSA has no reason to anticipate anything less than success with implementation of the LTSS CP Supports.

The implementation of the LTSS CP Supports will not be without its challenges. The first challenge we anticipate related to the delivery system is its capacity to meet the needs of engaged enrollees. For example, the waitlist for behavioral health care and medication management services is exceedingly long throughout the state. Meeting these needs will be a significant challenge. Proposed solutions will be to identify alternative supports and services that may sustain the individual until the required service is available. Care Coordinators (CC) can also work with the enrollees to keep their names current on waitlists, to check in periodically to determine their status on the waitlist and to ensure the enrollees are prepared to respond when offered an appointment. The CC can also advocate with the primary care providers to intervene to address behavioral health symptoms to the degree feasible. FSA will explore the feasibility of offering "on-demand" behavioral health services with open scheduling to address the demand in the Greater Fall River area.

Another challenge we anticipate related to the delivery system capacity relates to integration of care. The integration of physical, behavioral and substance use services, along with LTSS and other social services, is in its infancy as a delivery system. It will take a lot of education, system change, coordination and advocacy to ensure the successful reform from the current silo approach to full integration.

Yet another challenge is the lack of clear definition of an enrollee profile. There is a basic premise for defining who might be an optimal candidate for CP Supports, but since it has not yet occurred, there are no details known. Specifics around age, gender, diagnostic profile, family system, education, vocation and the like are vastly unknown. In addition, the public, those individuals we will attempt to serve, are totally disengaged from the topic. There is little community level knowledge of the passive enrollment that will occur with ACOs and no communication about CP Supports and what they intend to provide. This is not new to human services or new to FSA. We have successfully navigated such territory before and are confident we can succeed again. We have a strong reputation for serving all demographics. We are known in the geographic area we have applied to serve for having diverse programs. We know that we can leverage our existing community relationships and favorable reputation to succeed in the implementation of LTSS CP Supports and the community education that will need to accompany implementation.

Below is the projection for the ***minimum*** number of assigned and engaged enrollees we intend to support under the contract:

Calendar Year	Number Served	Please see LTSS Attachment A, Program Budget Report, for estimated enrollees
2018	No less than 805	
2019	No less than 968	
2020	No less than 1000	
2021	No less than 1000	
2022	No less than 1000	

FSA is bidding on the entire Southern Region of the state. FSA is already serving individuals in the majority of these cities and towns and by the operational start date, we will have the capacity to serve the entire area for which we are bidding. FSA already has satellite offices in locations that can support the

geographic regions we intend to serve. The current office space is sufficient in size to accommodate additional staff. As the program grows and reaches outputs needed, additional office space will be procured.

The plan for operationalizing the LTSS CP Supports is detailed in the timeline provided for section 7.5 F. It aligns with the budget formulation and the budget narrative. In short, FSA anticipates we will be fully operational for the entire geographic area for which we are bidding and ready to accept assignment of enrollees and begin outreach and engagement on June 1st, 2018.

B. Supporting Populations and Community Engagement

FSA has strong connections to the community and community members for the Service Area for which we are bidding. This includes existing collaborations with a variety of community-based organizations, advocacy groups, LTSS providers, housing and shelter providers and social service organizations. FSA was mindful in selecting the area for which we planned to bid; ensuring that it was well within the scope of current operations.

One of the most effective strategies for the successful implementation of LTSS CP Supports is building a strong network for collaboration and care coordination. FSA will capitalize upon the strong and meaningful connections with like-minded and mission driven providers and organizations we already have to further grow community connections in our Service Area. As the staffing plan details, care coordination teams will be strategically placed through the Service Area. This will embed workers in the various communities and make it possible for them to be active and involved, becoming the face of FSA and LTSS CP Supports in their assigned regions. Staff will join work groups, coalitions, advisory boards and the like and create provider networks where none exist.

A second strategy will be to share our knowledge and expertise. FSA has provided high quality services that are person-centered, mission driven and culturally responsive for 129 years. A lot of knowledge and expertise has been gained over that time and FSA will candidly share what we know, and the knowledge garnered over decades of service to advance LTSS CP Supports and better meet the needs of enrollees. Maintaining integrity and accountability will further support the development of strong community relationships. FSA has an outstanding reputation for open, honest and ethical operations. Those standards will not be compromised. Staff will be candid on what they can do and deliver on promises. Staff will honor commitments, fulfill requests and responsibilities and meet required deadlines in keeping with expectations for professional conduct.

Finally, FSA will maximize the use of technology and networking strategies to further advance the LTSS CP Supports. Staff will stay connected with community partners through email, social media, telephone and text messaging, FSA will take full advantage of mobile communication in support of promoting connections and maximizing availability.

Developing and sustaining community connections will also help to ensure staff stay informed of the ever-changing landscape of human services. One way to stay connected with up-to-date information on resources and providers is through the community connections coalitions. Another is through the Family Resource Centers throughout the state that are charged with coordinating resources for families. Most human service agencies have resource guides and FSA will continually update our accumulation of resources to be sure we have current information. FSA will also monitor email communications, participate in events sponsored by state agencies and ACOs/MCOs and maintain membership in trade organizations as a means of staying abreast of changes.

The scope of FSA's community contacts and collaborations is extensive. The table that follows provides a meaningful glimpse into the diverse connections FSA has developed in each of the regions we plan to serve.

GREATER FALL RIVER AREA			
Citizen's for Citizens	SSTAR	Steppingstone, Inc.	Fall River Housing Authority
Community Preservation Coalition	Fall River School Community Partnership	High Point Treatment and Recovery	Partners for a Healthy Community
Fall River Juvenile Court	Southeast Interagency Team	Bristol Elder Services	Community Health Network
Institute for Health and Recovery	DCF Trauma-informed Leadership Team	South Coast Anti-trafficking Group	Steward Health Care Network
Salvation Army	United Neighbors	Health First	United Way of GFR
Shepherd's Center	Child Protection Council	St. Vincent's Home	People, Inc.

7.5 INITIAL DSRIP PARTICIPATION PLAN

Cape Cod and the Islands			
Barnstable County Social Services	Department of Social Services of Hyannis	Family and Social Services in Hyannis	Eliot Community Human Services
Cape Cod Health Care	Justice Resource Institute	Catholic Social Services	May Institute
Child and Family Services of Cape Cod	Bay State Community Services	South Bay Community Services	SouthCoast Health System
Cape Cod Pride	Seven Hills	Community Systems, Inc.	VinFin
NAMI of Cape Cod	Falmouth Social Services	Kennedy Donovan Center	Family Continuity
Fellowship Health Resources	Martha's Vineyard Community Services	Cape Cod Resource Center	Cape Abilities
GREATER NEW BEDFORD			
Coastline Elder Services	Child and Family Services	The Bridge	Life Stream
Women's Resource Center	Seven Hills	PACE	Gateway Adult Day Health
Department of Human Services	Community Autism Resource	SouthCoast Wellness Collaborative	South Coastal Counties Legal Services
May Behavioral Health	Community Systems, Inc.	Better Community Living	United Interfaith Action
New Bedford Housing Authority	Department of Developmental Services	Community Connections Coalition	Fellowship Health Resources
Kennedy Donavan Center	Capeway Adult Day Heath	Mass Mentor	Catholic Social Services
GREATER TAUNTON			
A New Day	Sturdy Memorial Hosp.	Self Help, Inc.	Pride Inc. Day Habilitation
American Red Cross	ARC of Bristol County	DEAF, Inc.	Greater Taunton YMCA
Associates for Human Services	Department of Developmental Services	Department of Early Education and Care	Greenlock Therapeutic Riding Center
Brockton Area Multi Service Center	Social Security Administration	Options for Independent Living	Home for our Troops Taunton
Community Counseling of Bristol County	Taunton Dept. of Human Services	Brigham and Women's/Mass General Health Care Center	Commission for the Deaf & Hard of Hearing
Amego, Inc.	Father Bills and Mainspring	Dare Family Services	Southbay Mental Health
GREATER ATTLEBORO			
Comprehensive Social Services of Attleboro	Human Services of Southeastern Ma	ARC of Northern Bristol County	Big Brothers – Big Sisters
Hillside Adult Day Health	Doorways, Inc.	Community Care Services	Attleboro Housing Authority
New Hope, Inc.	Mansfield Day Habilitation	Our Daily Bread	Enable, Inc.
Self Help, Inc.	Community Health Link	Mansfield Food pantry	Attleboro Council On Aging
Beta Community Partnerships ,Inc.	Old Colony Habitat For Humanity	United Way of Greater Attleboro	Healthcare Transportation Resources
Harmony Adult Day Center	American Red Cross	Key Program	American Red Cross
GREATER BROCKTON			
BAMSI, Inc.	Blue Hills Family Center	Bayview Associates	MASSCAP
Brockton Coalition for Human Services	Jewish Family and Children's Services	South Shore Women's Resource Center	Northeast Health Services and family Counseling
Old Colony Elder Services	Lutheran Social Services	Mainspring Coalition	Interfaith Social Services
Brockton Area ARC	Salvation Army	Brockton Housing Authority	Brockton Neighbors United
Cope	Social Service League	Brockton Resource Center	Growthways, Inc.
Brockton Early Intervention	South Shore AIDSProject	Mass. Rehab. Commission	Brockton Social Services

7.5 INITIAL DSRIP PARTICIPATION PLAN

7.5 Community Partner Supports and Activities

Outreach: A diverse approach will be used to locate and engage enrollees with complex LTSS needs. One strategy will be to rely upon our relationships with other community providers who serve the target population to facilitate contact. FSA will also use our existing strong and well-established relationships as a foundation to further our network and expand to neighboring communities. While the CP Supports will be a new service, assigned enrollees are likely to have relationships with various community organizations and providers. That too can serve as a springboard to additional alliances, as FSA builds a bridge to connect with assigned and engaged enrollees through community collaborations.

It is the practice in FSA programs to work with members to identify areas of strength as well as areas of need. We then work with members to connect with resources in the community that may meet their needs. In this manner, we build community tenure and connections. In some instances, members have been in our programs for over 20 years, continuing to live in the communities where they were born and raised. We have a strong commitment to meet members where they are, work collaboratively to leverage individual strengths in order to mitigate and support areas of need. We work with members to create a realistic plan to get to where they want to be and then set the steps to support realization of their goals. These goals can be as small as preparing to accept services to preparing a nutritious meal, seeking social opportunities and rebuilding family connections. We have worked with members to take their first plane ride, establish their own savings account, use a debit card, seek and obtain employment and acquire their first pet. We have also worked with members to avoid eviction, resolve legal challenges and settle significant debts. FSA is well known in the community for being an organization that gets the job done. We are recognized for succeeding in serving individuals who have failed with other providers. We do what it takes to get the job done and that strong drive and commitment to person-centered and goal-directed service will be applied to the LTSS CP Supports.

Outreach is a common practice in current FSA programs. All employees are expected to be visible in the community and actively participate in community groups. Employees receive training to provide community education. Outreach has always been a part of job descriptions and our program leaders track the outreach of employees to help build their programs.

FSA already serves individuals with complex LTSS and BH needs and we will apply the specific approaches that have brought success in existing programs to locate and engage LTSS CP Support enrollees. First attempts at locating enrollees will be through the use of provided demographics; with telephone calls, written correspondence and drop-by visits forming the basis of initial attempts. Contacts with family, friends and authorized representatives will follow if the direct efforts prove unsuccessful. If an individual cannot be located, versus failing to respond, FSA will scan the network of inpatient facilities to rule out hospitalization. Community locations where the individual is likely to visit will also be checked. These can include community centers, shelters, food pantries, soup kitchens and community programs. FSA will also work with housing authorities to address housing instability. Basically, FSA will apply the full scope of existing resources and capacities and proven successful outreach strategies to locate and engage enrollees.

Successful engagement of the enrollee will hinge upon our effectiveness to connect on a genuine level with each individual and establish a meaningful relationship. The specific path may vary for each individual, but the basic approach will be consistent. FSA needs to identify that which is meaningful for the individual, where gaps exist and the wants and needs of enrollees. Working from a respectful perspective and allowing the individual to drive the process to the greatest extent feasible will lend credibility to FSA as a provider and foster more favorable outcomes. Trust will develop over time, but demonstrating respect, tolerance, understanding, openness and flexibility will lay a solid foundation for an effective partnership that fosters engagement.

Clear and honest communication will also be critical. From a general outreach and engagement perspective, materials need to be provided in a manner that is accessible to the target population, whether that be in the appropriate language, an accessible literacy style or in locations and venues that are likely to reach the target population. From a direct engagement perspective, successful interaction with assigned enrollees will require accessibility by staff and a consistent approach. Staff persons need to build trust by doing what they commit to do in a timely fashion. They also need to be available, responding to calls and messages in a timely manner. The presentation of the program and a demonstration of its anticipated achievements need to be clear, honest and upfront, particularly regarding the reasons the enrollee is assigned and how CP Supports can help.

Additional strategies include maintaining consistency by avoiding changes in workers. Engagement can be fostered by giving careful consideration to case assignment; matching enrollees with workers based on gender, age and cultural factors to the greatest extent feasible. Striking a balance between authority and enrollee empowerment will be important to achieving progress. Giving practical assistance will lend credence to the worker and to what they are trying to achieve. Ensuring the enrollees' voice is heard is also important. Taking a strength-based approach and celebrating small steps, emphasizing positive accomplishment, will put CP Supports in a favorable light rather than be perceived as a burdensome role. Being flexible and working at a pace that makes the assigned enrollee comfortable will also help to foster engagement. The FSA staff works every day with individuals who find themselves assigned or referred due to life circumstances or legal constraints and not solely by choice. FSA has effectively served these individuals and the majority ends their affiliation with FSA happy, whole and grateful for the encounter.

LTSS Care Planning: Care planning for a variety of services is an area of strength in every FSA program. Ensuring the enrollee has meaningful participation in the development and management of the LTSS Care Plan will be achieved using a variety of methods. The process begins with ensuring the assessment is in hand, that it is complete and that there have been no changes. That is followed by actions to ensure that the enrollee has a clear understanding of the CP Support role and intended impact or goals of participation. Offering the enrollee the option of an alternative CP Support not only meets contract requirements but demonstrates respect for individual choice as well as flexibility on the part of our organization.

Once it is established that the enrollee will engage, active participation in the planning process begins. The CP Support worker will assist the enrollee to identify and articulate realistic goals. The process will move at a pace that is comfortable for the enrollee and will include natural supports and other providers to the degree desired and approved by the enrollee. Workers will use motivational interviewing to help the enrollee articulate the path that should be pursued by the plan. The approach will take a strength-based rather than a problem-oriented approach. The enrollee will be offered choice in the planning process. Those choices will be provided in writing, using materials from various community providers as well as FSA summary materials. The CP Care Coordinator will work with the enrollee to weigh the pros and cons of each decision/option so that enrollees can make the best decision for their particular situation. When choosing service delivery providers, FSA will utilize technology to aid the enrollee in the decision making process. For example, we will use the internet to show the enrollee websites and photographs of locations, reviews if available and other relevant material to support choice. FSA will also be mindful of cultural factors and how they may influence decision-making and choice. The enrollee's choice will be evidenced in writing so that it is clear that the final decision, considering all available options, was made by the enrollee.

7.5 INITIAL DSRIP PARTICIPATION PLAN

FSA's Community Service Agency (CSA) has operated with a strength-based approach that, since its inception, has honored client/family voice and choice. In the most recent program evaluation, the program scored between 95% and 100% for creative brainstorming, individualized process, consumer voice and consumer choice. It exceeded the state mean score by 1 to 2% on each of the domains and the national mean by as much as 11%. FSA intends to model the CP Supports after this successful delivery of services, using Care Coordinators from the CSA to coach and model for the LTSS CPs as needed.

Care Team Participation: FSA's current LTSS programs demonstrate the same level of proficiency in coordinating care and exchanging essential documentation as its Children's Behavioral Health Initiative (CBHI) programs. This demonstrated capacity will be replicated for CP Supports, using many of the same workflow systems that have ensured success for existing services. In the current menu of LTSS programs, each service is required to share essential documents with primary care providers and fiscal agents. This may include assessments, service authorization requests and care plans. The workflow already exists to ensure this happens consistently. Programs have systems in place to facilitate timely and efficient communication for other providers and the process for CP Supports will be built upon this successful model. FSA will also enlist feedback from involved stakeholders to promote integration of LTSS communication. Stakeholders will be involved in establishing the most effective way to communicate and to achieve the mutually favorable outcomes for enrollees. Secure digital communication will be used to the greatest extent possible to make communication quick and efficient. The assignment of enrollees to Care Coordinators will be synchronized to match external stakeholders, when feasible, to promote efficiency. This will allow one or two coordinators to work with certain designees rather than require all CP Supports staff to contact the same providers for different enrollees.

A system of checks and balances exists within FSA to ensure compliance with external communication with stakeholders. The various reporting and data-sharing requirements are consistently met. One component of the system is FSA's internal record review committee. The committee assess compliance with key activities as well as the quality and appropriateness of care. The committee is comprised of peer reviewers from programs other than the one being evaluated. Committee members meet monthly and by the end of each calendar year, 100% of records for FSA program serving 125 individuals or less are reviewed. For larger programs, 50% are reviewed with 100% completed every two years. The case record review committee will be expanded to include the CP Supports as a means to ensure that the organization's high level of efficiency continues.

LTSS Care Coordination: The integration of LTSS CP Supports into the care team will be deliberate, with the right information shared with the right providers at the right time. The enrollee will be the center of the dialogue, with his/her needs and preferences ascertained, documented, and communicated to guide the delivery of care by all providers. Communication will be organized and deliberate with a primary goal of ensuring that the enrollee's needs are met.

Broad-based approaches to integrating the plan of care will include fostering teamwork between providers, using open, honest and direct communication and modelling collaboration. The application of care management principles will support the process, with care coordinators managing information, sharing the enrollee's perspective and promoting multi-disciplinary communication and cooperation. Care Coordinators will advocate, communicate, educate, identify and share appropriate, thereby facilitating access to care. Cultural beliefs, values and needs will be honored while helping the enrollee navigate the various care settings. Coordinators will take a holistic approach, advocating for the enrollee's family and support systems as well. The physical, emotional, financial, psychosocial, behavioral, housing, education and vocations needs will be integrated into the plan. The primary responsibility of CP Supports will be the

enrollee, and the coordination of care that is safe, timely, effective, equitable and client-centered; understanding that succeeding in these hallmarks ensures success for every provider. Care Coordinators will be adaptive, flexible and collaborative with a single focus on bringing the team of formal and informal supports together for the common goal of improving and/or maintaining the enrollee's clinical, functional, emotional and psychosocial state. The individual with complex LTSS and BH needs is at the focus of care. However, all providers will benefit when the individual achieves and maintains optimum wellness, self-care management and functional capacity. Care Coordinators will maintain privacy, confidentiality, enrollee health and safety through advocacy and strict adherence to ethical and legal standards, FSA policy and guidelines, and the mandates of the LTSS CP contract. The FSA Care Coordinators will use their education, skills, knowledge, competencies and experience to provide the highest quality supports to individuals with complex LTSS and BH needs.

Specific care coordination activities will also be employed. Assessment and monitoring will be ongoing expectations for contact with enrollees to identify and mitigate significant events such as life cycle stages, changes in relationships and exacerbation of health conditions. This can be achieved in part by integrating proactive components into the plan of care. It is important to continually monitor for change, identify triggers, clearly define baselines, and monitor follow-up with identified tasks and activities. The care plan should drive the process with the Care Coordinator working from the plan, measuring progress toward goals and adjusting and accommodating as service delivery unfolds. Establishing accountability and agreeing on individual responsibilities will eliminate confusion and duplication. It is essential to constantly work at communication with team members and provide rapid response to changes in the enrollee's status. Respecting the enrollee's choice, celebrating achievements, promoting linkage to community resources and acknowledging self-management gains will help build the confidence necessary for enrollees to mitigate life cycle events and changes.

Life cycle events and challenges can be either anticipated or unpredictable. Navigating unpredictable events successfully will require a strong foundation of trust with the enrollee. Spotlighting success and achievements can also mitigate the impact of unpredictable events. Demonstrating progress and positive achievement can soften the impact of a setback. As enrollees build self-management skills and an informal support network, life cycle events become challenges but not barriers to success.

Navigating predictable life cycle events, especially those that impact eligibility, requires foresight and planning. Helping the enrollee identify the upcoming event and how it may affect their goals is important; reflecting back to goal formulation, enrollee education and coaching, and honoring voice and choice. Managing life cycle events and fostering ongoing enrollee engagement can be achieved by promoting self-determination. Supporting a sense of control over one's own life, especially in times of crisis or when faced with events outside of one's control, is critical. Self-determination is a construct with many facets and there is no single practice or approach that will work for all enrollees in all situations. Hallmark principles include ensuring enrollees have access to the information they need, in a way that they can understand and use it. This will help them to make their own decisions and execute their own free will. All individuals have the capacity for self-determination, although fostering it requires an individualized approach. Skill building for problem-solving, decision-making, goal setting and self-advocacy may be needed. Modifying the service delivery environment to be more welcoming and supportive of self-determination may also be needed. Self-determination encourages the enrollee to be "the expert" on what is in their best interest, allowing them to control the services provided instead of the services controlling them. Strategies to promote ongoing engagement with care planning and implementation will include presenting all available options, while coaching the enrollee to recognize and weigh each option based on the risks and benefits of each choice. Aiding the enrollee to recognize potential long and short-term

implications of choices and proactively developing plans to overcome barriers will also build self-determination skills. Breaking down problem-solving into smaller steps will also foster engagement.

Strategies to promote self-determination will be paired with motivational interviewing to support ongoing engagement in care planning and implementation of the care plan. Care Coordinators will work to build a democratic partnership with enrollees. The role of the Care Coordinator, using motivational interviewing, is to build a collaborative partnership with enrollees. The Care Coordinator will be empathetic and supportive but also direct the enrollee toward self-motivated goal setting. As stated by Miller and Rollnick in *Motivational Interviewing: Preparing People for Change;* motivational interviewing is "more persuasive than coercive, more supportive than argumentative." The successful application of motivational interviewing techniques will express empathy through reflective listening. It will help enrollees see the difference and gaps between what they want, their goals, and their current patterns of behavior and decision-making. Care Coordinators will use a "parking lot" for sensitive or difficult topics that the enrollee may not be ready to address. This allows Care Coordinators and enrollees to acknowledge the topic, but understand that the enrollee is not ready to tackle that area. Care Coordinators will continue to address readiness and "parked" topics will be revisited as the enrollee builds trust with the Care Coordinator> This will help the enrollee to develop self-management skills and achieve successes to gain the confidence to tackle more complex challenges. Care Coordinators will demonstrate confidence in the enrollee and optimism; demonstrating respect by accepting and validating enrollees' feelings in a non-judgmental manner.

Transitions in Care: FSA will manage transitions in care successfully by motivating providers across various care settings to work as a team to make transitions smoother. The process begins with building strong, professional and respectful relationships with providers and keeping the client at the center of decision-making. The first step for promoting transitions is an accurate and appropriate care plan that is clearly communicated to all members of the enrollees' care team. As the enrollee transitions from one level of care to another and from one provider to another, the care plan should drive the process, following and supporting the goals identified by the enrollee. Facilitating this care plan and continually advocating for the enrollee's voice and choice will be a key responsibility for CP Support staff.

Another key responsibility for CP Support staff will be ensuring that the enrollee has the information needed to make informed choices about LTSS programs and providers as part of transitions. FSA will provide access to information about the providers and services available to the enrollee. The information will be presented in a manner that meets the enrollee's language and cognitive capacity. Some of the interventions that could be used include site visits, internet research with the enrollee, written brochures and materials, telephone contacts with provider staff and anonymous contact with current service recipients. Family members and personal representatives of the enrollee can be solicited to help gather information for the enrollee to help them make their best decisions. When multiple options are available, a comprehensive list will be provided for the enrollee. When only one option is available, that will be clearly explained. All work toward transitions will be clearly documented, as well as evidence of choice, in the enrollee record. FSA will present at least two choices, more if feasible; any time the enrollee is connected with services.

After a transition in care, assuming the enrollee remains engaged, the Care Coordinator will follow-up at prescribed intervals to support the transition and ensure the enrollee remains satisfied with the choice of provider. If there is indication of dissatisfaction, the Care Coordinator will work with the enrollee and provider to broker a solution. The identification of a designated contact person at the new provider who can serve as the point of contact for the enrollee and the Care Coordinator will further support transitions. Care Coordinators may provide the supports directly to the enrollee or facilitate supports from family and friends

and other natural supports to serve as transition "coaches". Coaches will ensure the enrollee is maintaining ground in self-care activities, know and recognize signs of distress related to the transition, and reflect optimism and compliment the enrollee's achievements during transition. Enrollees can also be coached to articulate their concerns, identify needed contacts and ways to address concerns. These actions empower the enrollee and provide a sense of control in a changing environment that can be unsettling and even frightening. Finally, the coaches can ensure that all follow-up activities related to the transition are completed within designated timelines.

Health and Wellness Coaching: Health and wellness education and coaching have been organizational priorities at FSA for the last decade. In 2007, in response to the Department of Public Health's Working on Wellness initiative, FSA embarked on a path to promote health and wellness for employees. The organization recognized that healthier employees would be better equipped to deliver quality services. We also believed that health and wellness education provided to employees would positively impact service recipients. FSA's success was well recognized with several awards and citations from state-wide and national publications on employee health.

The skills and knowledge acquired through the employee wellness program are readily transferrable to service recipients. Employees gained tremendous insight into the unique needs of adult learners. FSA staff were trained to deliver the Center for Disease Control (CDC) evidenced-based curriculum for Diabetes Prevention. Modules from that curriculum can be used for health and wellness coaching for enrollees. FSA offered a diverse array of tobacco cessation programs and interventions which can easily be replicated for enrollees. Weight management and improved nutrition have been recurrent themes in the employee wellness program, as well as management of hypertension, cholesterol and heart disease. The importance of physical exercise has been addressed with walking programs, activity challenges, exercise instruction and physical activity incentives. Once again, the curriculum and materials for these activities can be applied to support health and wellness coaching for enrollees.

The current LTSS programs within FSA employ nurses who can be consulted to support health and wellness coaching. FSA is prepared to offer individualized and even group coaching. Over the ten-year period of the employee wellness program, FSA has built strong alliances with health promoting organizations such as Partners for a Healthier Community, the YMCA, the Diabetes Association, the local chapters of the American Heart Association, American Lung Association and the American Cancer Society.

Beyond the realm of employee health achievements, FSA also has accomplishments in promoting community and public health. We have provided community-based and consumer health promotion for years. At the present time, FSA is wrapping up a program called *Eat to Live*. This nutrition education and coaching program strives to improve the eating habits of older adults and chronically disabled individuals. It features assessment, identification of needs, referral and linkage to community supports along with education, monthly coaching and hands-on assistance with meal preparation. To assess nutrition, the Mini-Nutritional Assessment (MNA) is administered. The MNA is a validated screening and assessment tool designed to identify individuals who are malnourished or at-risk of malnutrition. The MNA was developed over 20 years ago and is the most validated screening tool for use with adults. Once assessed, the program helps individuals recognize indicators of poor nutrition, access public assistance resources and learn simple ways the nutritional quality of food can be increased. The program helps adults make smart food choices and make the most of their limited financial resources.

FSA has also offered education on how to self-manage chronic conditions and the effects that illness has on people's lives. Education has been provided on chronic disease, the effective management of health, making lifestyle changes to support improved quality of life. Participants learn how to become

actively engaged consumers of healthcare rather than powerless victims of illness. Community-based health education has tackled medication management, weight control, physical activity, nutrition and effective communication with healthcare providers.

FSA provides fall prevention screening and education in all of its existing LTSS programs. Sparked by a rise in the number of individuals who experienced a fall event each year, FSA worked with the UMass Dartmouth Nursing Program to design and deploy a unique fall prevention program that included consumer education, employee education, screening and protective measures. The program produced remarkable results. According to CDC data at the time, 30% of elderly and disabled adults would experience at least one fall event in a year. For FSA consumers, that fall rate was at 21%, but was climbing from year to year. After the deployment of the fall prevention program, that number dropped to 9%. FSA continues to have fall rates among the population we serve in the 9 to11% range. The fall prevention initiative is a fundamental component of our LTSS programs and has been offered as a community education program through a variety of forums. Our fall prevention programs have been so successful that area social service agencies have asked FSA to continue to offer them as a part of other community service programs. Health and wellness education and coaching have been provided to FSA enrolled members in the LTSS programs and to the public as a form of community outreach. Additionally, the FSA Adult Day Health programs provided monthly wellness education to enrolled members.

FSA will work with enrollees to actively engage with primary care providers. We will encourage and support enrollees to effectively communicate with their providers to manage their health. At the same time, enrollees will be urged to comply with medication and therapeutic interventions and FSA will help them identify and overcome obstacles to compliance. FSA will coach to proactively manage their care and take advantage of preventative programs as a means of reducing costly emergency department visits in the future. In FY 16, our adult foster care program set a Performance Improvement Target to address the rising rate of emergency department (ED) usage. After any ED visit, nurses meet with members to look at what precipitated the visit and provide prevention education, including early warning signs of urinary tract infections, self-management of upper respiratory infections without fever, when to call the doctor and alternatives to ED visits such as urgent care centers. Thus far, the program has seen a 31% reduction in ED visits as of April 30th compared to last year at this time. Based on our proven success in providing evidence-based wellness programs, using validated screening instruments and the delivery of wellness education with measurable results, there is little doubt that FSA has the capacity and proven effectiveness to provide health and wellness coaching as stipulated in the Model Contract.

Connecting Enrollees to Social Services and Community Resources: Evaluating enrollees for social service needs and facilitating access to Flexible Supports will be achieved through a comprehensive assessment. FSA already has comprehensive assessment tools in place in its own LTSS programs. A combination of an FSA developed social service assessment and the MDS-Home Care is used in three of the four programs. FSA will create a Social Service Needs Assessment for CP Supports based on the tools already in use. Its development will be guided by principles established by the National Association of Social Work. The LTSS CP Supports assessment will include the following:

- Interpersonal Assessment – who are the important people in the enrollee's life; who can be relied upon and in what capacity, what formal and informal supports are they providing, what are they willing to continue to provide, and where do they need or want relief?

- Environmental Systems – what is significant in the enrollee's daily routine, what is lacking, what resources are available, what barriers or obstacles exist, is the environmental system safe, are there features of the environmental system that bring the enrollee joy/comfort?
- Social Context – what societal issues impact the enrollee positively and negatively, are there cultural, socioeconomic, race/ethnicity or socialization challenges, is the enrollee satisfied with the current level of socialization and community inclusion, are there advocacy issues that need to be addressed?
- Special Considerations – what makes the enrollee unique, are there language or literacy factors to be considered, are there unique communication needs, do grief, loss or trauma concerns exist that need to be addressed, is housing stable?
- Spirituality – what are the enrollee's beliefs and values and how will that influence care planning and service delivery?
- Transitions – are there predictable or foreseeable transitions to consider, any impending life cycle events that may impact the enrollee?

Upon completion of the assessment, areas for consideration will be identified with the enrollee and prioritized, based on the enrollee's choice. The Care Coordinator will work with enrollee to set goals based on the assessment findings and evidence those goals on the care plan. FSA will encourage self-directed care and facilitate access to services to the degree appropriate for and approved by each individual. FSA will work with the ACO to design cost effective service options that align with the enrollee's choice and that reduce or eliminate fragmentation and duplication. The care plan will guide Care Coordinator contacts and the delivery of services, keeping the findings of the Social Service Needs Assessment in the forefront of care. As stated earlier, the care plan will be widely communicated and the Care Coordinator will serve as an advocate for the enrollee and the established plan of care. The Social Service Needs Assessment will be updated annually and whenever there are significant changes in the enrollee's physical, mental or functional capacity as a means to ensure ongoing connections to community resources.

The scope of services for the LTSS Community Partners is broad and comprehensive. FSA has the expertise working with the identified population. Outreach, care planning, care team participation, care coordination, transitional care, health and wellness coaching and fostering connections to social services are hallmarks of human services. They are part of service delivery every day in FSA programs. FSA has excelled at the delivery of high quality human services for 129 years and we are confident we have the capacity to excel as the LTSS Community Partner for Southeastern Massachusetts and Cape Cod.

7.5 D. Innovative Technologies for Service Delivery Initially, FSA intends to deploy laptops, smart phones with roaming data capacity, tablets and netbooks in support of the delivery of LTSS CP supports. A variety of software systems, web-sites and applications will be used to make services efficient and effective. Tools like Skype and Face Time can help connect workers in different parts of the service area. They can also be used to engage enrollees if they have the tools to participate. FSA will utilize the capacity of mobile phones for communication including voice calls, texting and email to support mobile communications. Software applications for smartphones and tablets will also be used to serve as translation tools, adaptive technologies and other means to foster communication and enhance service delivery. FSA does not intend at this time to utilize any specific Case Management software systems as the current EHR is fully customizable to meet these needs. Signature pads will be deployed with laptops to gather enrollee signatures on required electronic documents. FSA will also make use of its website, Facebook and Twitter for outreach and to engage consumers. FSA staff will also make liberal use of internet research to find resources for consumers and share information.

While innovative technologies open a whole new realm of opportunities for workers and consumers, they can be fragile and create vulnerabilities. FSA will ensure that IT policies stay abreast of current trends and continually address the risk of service delivery in a digital world. Employee training will be critical to be sure privacy and confidentiality are maintained. Attention will also be paid to ensuring professional boundaries are maintained. FSA will also ensure that the ease of mobile and digital communication is used to support and enhance relationship development, and that the convenience does not hinder or replace face-to-face encounters.

Beyond what is known for innovative technologies, FSA proposes to take a proactive and reactive approach to deploying innovative technology for the delivery of LTSS CP Supports. The proactive approach will include assessing the technological capacity of enrollees. While some enrollees may be digitally savvy, others may function in a digital void so an all or nothing approach will not benefit the people we aim to serve. LTSS CP support staff will work to promote access to digital resources for enrollees whenever feasible.

A second feature of the proactive approach is vigilance in staying informed of emerging tools and technologies. FSA will stay engaged with other providers, using networking as an opportunity to stay ahead of new technology. FSA will strive to learn from enrollees as to best practices approaches and emerging trends and technologies. Sources such as the National Association of Social Workers and the Association of Social Work Boards are good resources for how emerging technologies can be deployed. The FSA IT Manager remains an active member of the CareLogic Electronic Learning Community which is another great source for identifying new tools.

FSA will also take a reactive approach to the use of innovative tools and technology. If a resource is identified, FSA will react by finding a way to utilize that resource. FSA will also react to suspend the use of any innovative technology that negatively impacts the quality of services, increases vulnerability or fails to meets it objective. With a balanced approach or learning, exploring and prudent risk management, FSA will appropriately deploy existence and emerging technology in support of CP services.

E. Personnel and Staffing

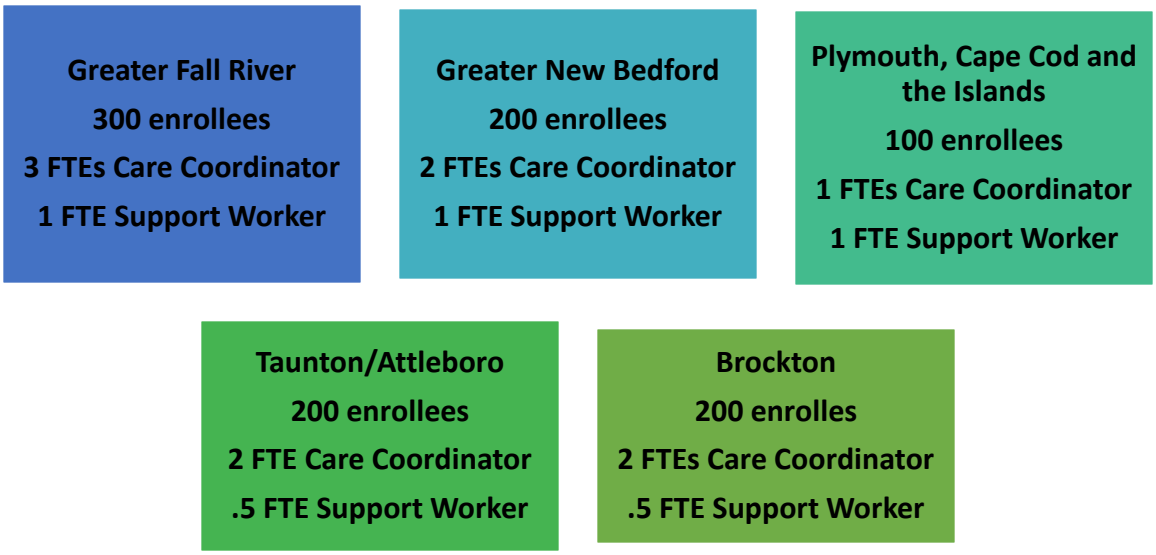
Staffing Model: FSA recognizes that it greatest resources is personnel. We are dedicated to recruiting, hiring, onboarding and developing staff that can provide the highest quality, mission-driven and culturally competent services to a diverse set of consumers. The staffing plan proposed to fully implement the required scope of CP Supports as well as administrative aspects of the contract includes existing internal resources and recruitment for new positions.

FSA proposes to create care coordination teams comprised of Bachelor's level Care Coordinators and Community Support Workers. Each team will be assigned to certain geographic regions and will include a dedicated number of Care Coordinators supported by a Community Support Worker. The Care Coordinators will be responsible for the delivery of the scope of services detailed in the contract including outreach, enrollee engagement, care planning, care team participation, LTSS Care Coordination, transitional care, health and wellness coaching, and connecting enrollees with social services and community resources. The Care Coordinators will assign tasks to the Community Support Workers to facilitate operations. For example, Community Support Workers may facilitate getting primary care providers signature on care plans, help with distributing care plans though secure email correspondence on behalf of the Care Coordinators, help with data entry and running performance reports, monitor EHR alerts for deadlines, coordinate logistics for Consumer Advisory Boards and network provider meetings, maintain minutes of meetings, and provider general support for the delivery of LTSS CP Supports.

FSA is bidding to serve the entire Southeast Region as defined by the RFR. We plan to create ~~four~~ five care coordination teams. One team will be housed in Fall River within FSA's current administrative headquarters. The Fall River team will serve the Greater Fall River area. The second team will be housed out of FSA's satellite office in New Bedford and will serve the Greater New Bedford area including Wareham. A third team will operate from FSA's Plymouth satellite location and will serve Plymouth, Cape Cod and the Islands. A fourth team will operate out of FSA's satellite location in Raynham and serve the Taunton and Attleboro areas. A fifth team will serve the Brockton area. This team will initially be housed in the Raynham office.

The staffing plan starts with seven FTEs for Care Coordinators, 3 FTEs for Community Support Workers, one FTE for a Care Coordination supervisor and one FTE for a Director of Healthcare Transformation. The start-up staffing plan and utilization of existing satellite locations allows FSA the flexibility to assign workers to regions once the contract is awarded and we have a clearer picture of what regions we will be assigned and the rate of enrollee assignment. It also provides sufficient resources to cover the entire region for which we are bidding. The team assigned to the Greater Fall River area will serve as back-up to both the Greater New Bedford and Taunton/Attleboro teams. By the third year of the contract, we expect to be at full capacity to serve 1000 enrollees annually and will grow the complement of Care Coordinators to 10 FTEs and the Community Support Workers to 4 FTEs.

The chart on the following page demonstrates the proposed staffing plan and geographic assignment by the third year of the contract:



Recruitment: FSA will follow a comprehensive recruitment plan to ensure that new employees for the LTSS CP Supports will adequately represent the communities served. A multifaceted approach includes on-line targeted advertising, college networking, local career centers, and word-of mouth referrals. FSA routinely uses an Applicant Tracking System, which provides an efficient and cost effective way to increase our on-line presence. The applicant tracking system connects FSA to Indeed, a world-wide employment-related search engine for job listings. Indeed reaches a large and diverse population and has historically provided a good pool of candidates. Indeed will be one on-line source, and will be supplemented by Monster and focused advertising to reach diverse populations. We will also use O Jornal, which is the ethnic division of The Herald News, located in Fall River. In the past we have had success with posting on other boards, such as Craig's List and Linked In, and will include that in our on-line resources to advertise and network. Additionally, FSA's Facebook presence and corporate website will highlight new opportunities.

FSA already works with several area colleges and universities to recruit culturally and linguistically diverse candidates with Associates, Bachelors and Masters level degrees. We work with Bristol Community College in Fall River, UMASS Dartmouth, Bridgewater State University, Rhode Island College, University of Rhode Island, and Community College of RI. FSA fosters close relationships with the local colleges, in an effort to increase internship placements, thereby increasing referrals and potential hires. On many cases we can connect to a target population (eg Spanish or Portuguese speaking) through affiliations with campus groups. Networking with Department Deans, posting on job boards, and attending Job Fairs have all been productive components of the college recruitment plans.

We also utilize the Career Center in Fall River that networks to the surrounding areas by posting FSA positions on their state website Job Quest. This too reaches a broad and diverse population. On-going relationships with career counselors are helpful in identifying possible candidates. The applicants from these locations are an excellent representation of the local community. Additionally, we are well connected to many different community organizations and have found success with word-of-mouth

referrals. Positions in the LTSS CP Supports will be made available to current FSA employees and generating word-of-mouth referrals from current employees will be incentivized through an Employee Referral Incentive Program.

FSA offers a very generous benefit package including excellent medical and dental insurance plans, short term and long term disability insurance, life insurance, and generous employer contribution to the 403B plan. Paid time off benefits provide employees a healthy work life balance, with 11 paid holidays, 10 days sick leave, and 3 weeks' vacation in the first year. Employees entering the organization with a Master's degree or higher start with 4 weeks of vacation and employees who stay for five years are also increased to four weeks of paid vacation. This comprehensive benefit package aids in recruitment and retention.

Competency: A consistent and rigorous screening process ensures candidates meet the competencies required by the Contract. This includes initial screening by Human Resources, face-to-face interview with the hiring Director and at least one additional round of interviewing with a member of Senior Leadership. All candidates must provide at least three references; two of which must be professional references who can attest to work experience and skills. FSA confirms all credentials submitted included licenses and degrees and a cross check of the excluded providers is completed prior to hiring. All candidates must all complete a criminal offender record information (CORI) screening and be approved for hire by the CORI officer.

To promote the continual development of the workforce, FSA offers a comprehensive training program. Driven by a training matrix assigned by Senior Leadership, employees are provided ongoing training on legally mandated topics and program specific subjects. Each program has a budget with allocated training resources. Employees have the flexibility to attend workshops, conferences and training opportunities as part of the work day with fees paid by FSA with prior approval. A consistent schedule of supervision provides individualize coaching and each employee receives and annual performance appraisal.

Retention: FSA recognizes that a thorough and interactive on-boarding process is an important aspect of employee retention. FSA provides an informative organizational orientation, specific program/department orientation, and thorough training throughout the orientation period. Additionally, recent enhancements to our onboarding program, including a 3 month survey, face-to-face meetings with Human Resources, and an annual follow-up survey, are all designed to receive valuable feedback on the onboarding experience, training, and overall communication.

Throughout their employment, employees receive ongoing training, regular partnership meetings (supervision) and various types of recognition and incentives, both directly from their leaders, as well as organization wide. FSA prides itself on a workplace culture that continually looks for ways to support, motivate, inspire and recognize talented workforce that serves its mission. FSA leaders consistently keep the focus on our mission, while ensuring they support and coach employees to remain energized and healthy, so they in turn are able to maintain that mission focus. This emphasis in training and supervision ensure our employees know that FSA cares about them as individuals. In the most recent employee feedback survey, 98.8% of employees responding to the survey agreed that FSA cares about the health and well-being of its employees.

FSA has an active Recognition Committee, which highlights the achievement of employees, departments or programs as they strive to meet our mission. Awards are given based on nominations from peers and leadership, and individuals or teams can receive this recognition.

7.5 INITIAL DSRIP PARTICIPATION PLAN

FSA offers generous benefits, which are consistently rated positively by our employees. Unlike many other non-profit organizations, FSA has provided annual wage increases to their employees for the past 15 years. Salaries have increased by 3-3.5% annually allowing FSA to remain a competitive employer. In addition to regular wage increases, FSA often provides bonuses to employees for recognition and appreciation. Another benefit that demonstrates FSA's commitment to its employees is its award – winning Worksite Wellness Program. Led by a team of volunteer wellness coaches, this program offers regular activities designed to support employee's physical and emotional well-being.

Job Description

Position: Director of Healthcare Transformation

Program: LTSS Community Partner Supports

FLSA Status: Exempt

WCC Code: (8810)

Accountability: Chief Program Officer

Job Summary:

The Director of Health Transformation is responsible for the development and oversight of the Long Term Services and Supports (LTSS) and Community Partner (CP) Supports.

Duties and Responsibilities:

1. Develop an Outreach Plan to engage and educate members as to the benefits of enrollment.
2. Develop workflow process and documents in support of LTSS CP Supports.
3. Strengthen linkages between health care providers and community-based organizations that serve individuals with LTSS needs.
4. Develop a LTSS infrastructure (e.g. technology, information systems) reporting and monitoring mechanism that is sustainable over time.
5. Collaborate with ACO/MCO's to address the social determinants of health and breakdown existing silos to promote delivery of integrated care.
6. Create a program that supports person-centeredness, independent living, aging in place and cultural competence.
7. Oversee general program operations, ensuring that activities align with EOHHS policies.
8. Ensure workflow supports achievement of performance expectations including engagement of enrollees; development, approval and communication of care plans with care team members; and attainment of quality measures as determined by EOHHS.
9. Monitor data on program performance and make program/workflow adjustments in response to performance trends, and sustainability.
10. Research best and evidence based practices for member education, engagement and coordination of care.
11. Ensure staff development and training supports quality performance.
12. Create and sustain Consumer Advisory Board and provider network.
13. Appraise the performance of the supervisory staff.
14. Meets with Leadership Teams across the state to ensure that services are aligned and information is shared.

Education and Experience:

Must have a minimum of a LICSW or RN licensure. Experience providing social services, care coordination, LTSS and/or health care education.

Experience managing data and electronic health technology. Must have strong written and oral communication skills and demonstrated computer skills.

I have read, understand and accept the responsibilities outlined in this job description.

Job Description

Position: Care Coordination Supervisor

Program: LTSS CP Supports

FLSA Status: Exempt

WCC Code: (8742)

Accountability: Director of Healthcare Transformation

Job Summary:

Under the direction of the Director of Healthcare Transformation, the Care Coordination Supervisor (CCS) serves as the supervisor of the LTSS CP Supports Care Coordination team. The CCS provides regular supervision for Care Coordinators and Community Support Workers and the delivery of all LTSS CP Support interventions.

Duties and Responsibilities:

1. Supervise Care Coordinators and Community Support Workers on a regular (no less than bi-weekly) basis using in group and individual settings.
2. Demonstrate knowledge and experience in the delivery of LTSS Supports and Care Coordination.
3. Ensure Care Coordinators develop person-centered care plans that reflect the voice and choice of assigned enrollees within required timeframes.
4. Ensure LTSS CP Supports care plans are endorsed by primary care providers and shared with all members of the enrollee's care team.
5. Demonstrate willingness to work with individuals with complex LTSS and BH needs.
6. Support the engagement of assigned enrollees within specified timeframes.
7. Promote achievement of Quality Measures for the LTSS CP Supports.
8. Support the development of Consumer Advisory Boards and provider networks.
9. Have a willingness and ability to work with ACOs, MCOs, state agencies, service providers and community organizations.
10. Willingness and ability to work flexible hours and across the geographic area served by the program.
11. Provide guidance to the care coordination team for the development of health and wellness coaching and current listing of community resources.
12. Participate in 24 hour on call coverage on a rotating basis.
13. Triage referrals and provide referral resource with accurate and timely availability of needed resources.
14. Maintain paperwork requirements for LTSS CP Supports in compliance with established timeframes.
15. Assist in the orientation of new employees and the ongoing professional development of all LTSS CP Supports employees.
16. Provide assistance to the Director in reporting and monitoring program performance.
17. Demonstrate and promote respectful, culturally competent and linguistically responsive delivery of services.
18. Understand and demonstrate commitment to agency mission, values and philosophy in performing job responsibilities, including compliance with all ethical and legal requirements of the organization.
19. Respond to reasonable expectations of the Director of Healthcare Transformation and the organization.

Education and Experience:

Must have a Master's degree in social work, human services\, nursing, psychology, sociology or related fields. Must have a minimum of three years of relevant professional experience. Must have the skills necessary to engage and work with others from diverse backgrounds. Maintain a nonjudgmental attitude toward families. Must be willing to work across the entire geographic region assigned to the organization and demonstrate willingness to work with yhe target population.

I have read, understand and accept the responsibilities outlined in this job description.

Job Description

Position: LTSS Community Partner Care Coordinator
Program: LTSS Community Partner Program
FLSA Status: Non-Exempt
WCC Code: (8810)
Accountability: Care Coordination Supervisor

Job Summary:
The Long Term Services and Supports (LTSS) Community Partner (CP) Care Coordinator is responsible for promoting coordination in the delivery and receipt of LTSS to enrollees assigned by Accountable Care Organizations (ACO) and Managed Care Organizations (MCO).

Duties and Responsibilities:

1. Conduct outreach to assigned enrollees to inform about the functions of a CP Care Coordinator, the optional nature of CP enrollment, choice in CP providers, the benefits of enrollment and the process for enrolling.
2. Document all outreach attempts including 3 separate attempts; and at least one face-to-face attempt unless the enrollee voices a preference for only telephonic contact.
3. Execute all required documents for participation in the CP program including but not limited to a Participation Form and all required authorizations for Use and Disclosure.
4. Obtain the Comprehensive Assessment from the referring ACO/MCO and update as needed for any changes in functional status, ADL or IADL needs.
5. Utilizing the Comprehensive Assessment, and under the direction of the enrollee/authorized representative, develop a LTSS Care Plan that identifies preferences, goals, strengths, needs and cultural considerations and is signed by the enrollee/authorized representative. Complete updates to the LTSS Care Plan upon request of the enrollee, as needed due to major changes in functional, ADL or IADL status, and at least every 12 months
6. Ensure LTSS Care Plan is approved by the Primary Care Provider and shared with all members of the enrollees care team including providers, members of state agencies and other case managers within 90 days of assignment.
7. Utilize alternative methods and formats of documentation and communication to ensure the enrollee understand the LTSS Care Plan; including but not limited to accommodation for sensory disabilities, literacy and primary language of the enrollee.
8. Utilize appropriate interventions to engage and support the enrollee in development of the LTSS Care Plan including self-directed care options and informed choice for applicable services, programs and providers.
9. Assess enrollees for Social Services and resources including Flexible Services and facilitate access to Social Services and Community Resources.
10. Participate as a member of the enrollees care team, providing subject matter expertise to the care team about LTSS, the enrollee's needs, preferences and service options; advocating for appropriate care, facilitating communication with other providers and promoting integration of care across all spectrums.
11. Maintain regular contact with the enrollee and a minimum of one face-to-face contact quarterly to assist the enrollee to navigate and access needed services, providing ongoing monitoring of the implementation of the LTSS Care Plan and monitoring for changes in status including health, housing, natural supports and caregivers.
12. Provide support for transitions of care and facilitate the development of appropriate discharge plans as indicated.
13. Conduct follow-up within 3 business days following any transition in care and conduct a face-to-face visit with enrollees within 3 business days post discharge from any facility.
14. Provide health and wellness coaching in accordance with the LTSS Care Plan including symptom management, health risk factors and behaviors, health promotion and setting and achieving health and wellness goals.

15. Maintain all documentation required for the delivery of LTSS Community Partner services.
16. Foster and maintain collaborative relationships with Primary Care Providers, Social Service Providers and representatives from state agencies.

Education and Experience:
Must have a minimum of a Bachelor's Degree in social work, human services, nursing, psychology, sociology, or a related field; or, an Associate's Degree and at least year of experience in the field. Must have strong written and oral communication skills and demonstrated computer skills.

I have read, understand and accept the responsibilities outlined in this job description.

Carol A. Nagle
President & CEO
Sharon Ford
Chief Program Officer
Director of Healthcare Transformation
Care Coordinator Supervisor
Care Coordinator
Community Support Worker

PREPARATION BUDGET PERIOD TIMELINE

December 2017

- Hire Director of Healthcare Transformation
- Secure consultant services for EHR customization
- Begin IT planning and purchasing of material good, determine EHR workflow
- Begin outreach and contracting activities with ACOs and MCOs

January 2018

- Start drafting recruitment plan
- Begin configuration of laptops, tablets, desktop adaptors and smartphones
- Assess satellite office capaxity to support LTSS CP operations
- Determine preliminary workflow process and infrastructure design

February 2018

- Source qualified internal candidates and recruitment for Program Supervisor
- Begin configuration of laptops, tablets, desktop adaptors and smarphones
- Purchase, receive and set up office furniture and equipment
- Explore and establish data sharing platforms with ACOs/MCOs

March 2018

- Hire Program Supervisor and begin onboarding/orientation
- Source internal candidates and begin recruitment for Care Coordinators and Community Support Workers
- Draft marketing plan including targeted advertising and promotional materials
- Test EHR customization & report writing, confirm EOHHS reporting

April 2018

- Finalize marketing plan; print brochures, flyers, community promotion and outreach materials
- Continue hiring, onboarding and orientation
- Complete website updates and initiate social media campaigns
- Job shadowing for Care Coordinators with ICCs and LTSS staff

May 2018

- Begin professional development plan, train staff on IHR and workflow processes
- Begin establishing Advisory/ Provider Network groups
- Finalize EHR workflow and test all sytems and reporting
- Prepare for readiness evaluation

I. Quality Management and Performance Monitoring

Quality Improvement Program: FSA continuously seeks to achieve excellence in service delivery, demonstrated through the application of its Quality Improvement Program (QIP). The program engages a systems-approach to quality management as it applies various methods of measurement and the skills and knowledge of the organization's employees to systematically evaluate and improve the overall environment. The program includes the consideration of internal and external systems, processes and data that measure performance, focusing specifically on what directly supports the agency's mission and contributes to meeting the needs of consumers. It recognizes the value of stakeholder contribution and incorporates feedback into improvement plans. Below is a description of the general infrastructure, processes and activities:

Long-term Planning	The Strategic Plan sets broad-based goals for quality improvement and promotes fidelity to the organization's mission, vision, and goals
Short-term Planning	Evaluates progress toward strategic goals with update and amendment to the Strategic Plan as needed.
Outcome Measurement	Outcomes are based upon standards set forth by licensing, regulatory, and accrediting authorities and best practice guidelines. All programs measure at least one of the following: change in clinical status; change in functional status; health, welfare, and safety; permanency of life situation; and/or quality of life indicators
Performance Improvement Targets (PIT)	Each program sets at least two PITs that are data-driven and intended to improve the quality of the program or address areas for improvement. PITs must be measurable and relevant to the services provided.
Feedback Mechanisms and Response/Action Plans	Ensures critical areas identified for improvement are addressed and resolved with feedback through the chain of command and to CQI
Stakeholder Participation and Feedback	Consumers in all programs are offered an opportunity to participate in anonymous feedback surveys each year. Feedback is incorporated into PITs and organizational goals as applicable. .
Case Record Review (CRR) and Utilization Review (UR)	CRR and UR uses peer review teams to evaluate the quality and appropriateness of care as well as the presence or absence of required documentation (legal and regulatory compliance). CRR and UR data is regularly monitored and analyzed and may be used for PITs and organizational goals
Internal Quality Monitoring	At least once each year programs undergo some form of objective review under the purview of the Director of Quality. The design and scope of the review is based on various factors, including industry trends, emerging risks, identified vulnerabilities etc.
Risk Management	Continual monitoring of adverse and/or unplanned events related to the delivery of services and consumer outcomes. Events of a serious nature are subject to internal review.

7.5 INITIAL DSRIP PARTICIPATION PLAN

Quality Initiative Year One: The Quality Initiative FSA proposes for the first year is to measure success at enrollee engagement and length of stay. It is recognized that under a per-member-per-month payment methodology, FSA must maintain a threshold of engaged members with Qualifying Activities each month for the LTSS CP Supports to remain sustainable. By setting this as the first quality initiative and continually monitoring the number of assigned enrollees who initially engage, the number who remain engaged, and average length of stay for enrollees, FSA can keep a watchful eye on outputs. This will also support monitoring of quality as it is reasonable to believe that quality service delivery will promote engagement and tenure. The better FSA staff become at outreach and engagement practices, the more likely enrollees are to engage and to remain engage.

It is anticipated that the rate of engagement will improve from one quarter to the next and that the last quarter would have both the highest rates of engagement and the longest enrollee tenure. We will also look at these markers by region as defined in the staffing plan and on a program-wide basis. The measures of success will be the number of assigned enrollees and the percentage engaged, with an expectation for improvement from quarter to quarter. FSA will also track reasons for disengagement and which may be attributable to factors outside the control of FSA (i.e. move out of state, death).

Functions of the QM Committee: The Administrative Quality Council functions as the quality management committee and provides support and guidance for the implementation of the Quality Improvement Plan. The Administrative Quality Council is chaired by the Director of Quality Improvement and meets at least bi-monthly. Membership includes at least the following departments, disciplines and/or programs; Quality Improvement, Administration, Nursing, Clinical Services, Elder Services, Support/Administrative Staff, Financial Services, Human Resources and off-site programming. The purpose of the Council is to ensure quality care and services are delivered to consumers by providing direction and assistance in the implementation of the organization's Quality Improvement Program. The Council reviews and provides recommendation regarding accreditation activities, organizational Policy and Procedure, Risk Management data analysis, internal and external reviews, outcome measurement systems and stakeholder feedback. The Council is driven by a charter. Minutes of each meeting are maintained and reported to the Senior Leadership Team which includes the President and Chief Executive Officer.

H. Sustainability: The sustainability of infrastructure and capacity building investments after the initial Contract Term will be contingent upon the rate of enrollee assignment and FSA's ability to perform Qualifying Activities as detailed in the Model Contract. Given that FSA operates a variety of programs with performance metrics, and given that FSA has a longstanding reputation for meeting and/or exceeding thresholds for performance, FSA is confident that we can complete sufficient Qualifying Activities to sustain the program. That assumption however is based on the rate of enrollee assignment, which is out of our control. FSA has built the program infrastructure for staged growth.

A system of checks and balances exists within FSA to monitor program performance and compliance with deliverables. The same system of checks and balances will be applied to the LTSS CP Supports. In this way, Leadership can effectively monitor performance on an ongoing basis and address shortfalls as they are identified. LTSS CP Supports will rely heavily on the configurable features of the EHR to support and monitor performance. FSA is making significant investments into the programming of the EHR's customizable features to design data entry, documentation, tracking and reporting modules. This is a substantial investment; however, once completed, will be fully operational using only internal resource within the IT department or within the LTSS CP Supports. This makes good use of infrastructure investments that will produce deliverables for the program that have no incurred cost once in production. As the workflow modules are built, the required, compliant choice will be the default choice. For example, enrollees will not move in the system from "assigned" to "engaged" until a signed participation agreement is entered. The system will have built in reminders for key activities to promote achievement of quality measures. An example of this can be seen in the execution of care plans. A reminder will be issued 60 days from enrollee assignment as a trigger to ensure care plans are completed within 90 days. Alert reports will go to Leadership for any enrollee that hits the 75 day mark without a fully executed care plan entered. The only other investment into the EHR is a per-user license fee. If the program operates at less than the required number of enrollees needed to meet the budget projections, fewer staff may be needed. In that case, FSA can easily will decrease the number of user licenses. After the initial infrastructure investment for programming and the user licenses, there is small allocation for additional EHR consultant time to provide any additional modules that may be needed related to start up and to facilitate communication with the ACO and improve our capacity to share and access information. Beyond these initial investments, there are no investments in tools, resources or processes that will require additional resources to remain sustainable.

FSA has a keen understanding of material costs and what it will take to keep the program operational. This understanding is built from having provided human services for so long and from having recently operationalized a number of effective programs including the Community Service Agency, Therapeutic Mentoring, In-Home Therapy and the Family Resource Center. In terms of material investments, such as computers, monitors, desks, file cabinets, telephones and the like, FSA has a budgeting format that dedicates a percentage of revenues each year to program needs to upgrade and/or replace material goods as needed.

Part of the infrastructure investment in the initial contract term is in Human Resources with the recruitment, hiring and training of employees. FSA has a succession plan in place for the key positions within the LTSS CP Supports. An internal candidate has been identified to serve as the Director to oversee the program. The individual is a seasoned member of the Leadership team with a diverse background. If the LTSS CP Supports do not receive sufficient referrals to be sustainable, FSA has the ability to utilize the Director in another capacity within the organization. The same is true for the Care Coordinators and Support Workers that will be brought in to serve in the program. Since care coordination is a hallmark of so many of FSA's existing services, staff can be absorbed by other FSA programs. On the other hand, if additional resources are needed for LTSS CP Supports that exceed the programs' current staffing capacity,

workers from other programs can be engaged to assist with the volume until sufficient staff can be recruited, hired and trained for the program.

The final, but probably most important element of the sustainability plan, is FSA's strong fiscal standing. FSA has sufficient operating reserves that can be applied to support the program as it evolves and begins to generate revenue.

J. Coordination with ACOs and MCOs

In FY 15, FSA began work with the Steward Health Care Network (SHCN) on a pilot project related to an Executive Office of Health and Human Services Infrastructure and Capacity Building Grant. The first successful pilot explored shared governance and enhanced organizational integration. The second pilot, which ran concurrently with the first, tested data integration, clinical informatics, and population-based analytics. Currently, FSA is working with SHCN on a clinical integration project that addresses avoidable emergency department (ED) visits. Thus far, using data provided by MassHealth we have successfully identified a cohort of individuals who were simultaneously serviced by FSA, attributed to a SHCN primary care provider and experienced one or more ED visits. The data provided was retrospective and looked back to 2015. FSA has been able to cross reference the data and identify which individuals remain attributed to SHCN and actively engaged in one or more FSA services. The next step in the project will be direct contact with the individuals to test the capacity to engage with members to provide consultation on the appropriate use of EDs and ensure follow=up and compliance with ED discharge plans. This final pilot is in the early stages but is already showing promise in the coordination of care.

It is FSA's intent to build upon the successful work with SHCN for the implementation of the LTSS CP Supports. That success lends credence to our capacity to work with ACOs and MCOs and will be leveraged in support of contracts with additional ACOs and MCOs. FSA already coordinates LTSS with areas hospitals so the skills and expertise of our staff is widely recognized. The successful partnership with SHCN and the progress we have made on the pilot projects will help confirm FSA's value to additional ACOs and MCOs. Currently FSA works with a number of SCOs in a variety of programs without any difficulty. The same is true of the Behavioral Health Center which contracts with a number of insurances and Medicare MCOs. The knowledge gained from these experiences in other programs can be applied in support of LTSS CP Supports.

The marketing and branding plan with respect to the ACOs and MCOs will be determined through consultation with the various ACOs and MCOs. FSA plans to begin designing a marketing plan in the second month of the Budget Preparation Period. The FSA Director of Marketing with work with the Director of Healthcare Transformation on coordinated marketing strategies with ACOs and MCOs.

The staffing plan proposed by FSA for the implementation of LTSS CP Supports will facilitate engagement and collaboration with multiple ACOs and MCOs. The plan outlines a strategy to create care coordination teams comprised of care coordinators and community support workers. Each team will be assigned to cover specific cities and towns in the areas FSA plans to serve. Similarly, care teams can be assigned to different ACOs and MCOs as a means of working with multiple providers are one time.

The strategy for conflict resolution will include open, honest and direct communication. Taking steps to prevent conflict from arising in the first place is an important first step. FSA intends to create a provider network group that will be similar to FSA's successful Systems of Care Committee utilized in the CBHI programs. The provider network will create an opportunity for workers to get to know each other and for information sharing. Representatives from MCOs and ACOs will be invited to participate in the provider network to help build rapport. Staying abreast of changes in eligibility criteria and protocols will prevent confusion and inconsistency which can lead to conflict. Making sure roles and responsibilities are clearly defined and consistent application of protocols and procedures will also help to build productive relationships. If conflict does arise, keeping the client at the forefront of discussion will create the common ground needed to start meaningful communication. If needed, the chain of command will be accessed and ACO and MCO staff will be encouraged to do the same.

K. Providing Culturally Competent and Informed Services and Supports

FSA intends to continue its tradition of providing effective, equitable, understandable, and respectful services that are responsive to diverse cultural beliefs and practice. We will continue to honor language, health literacy and communication needs as we have done for decades. FSA programs offer strength-based person/family-centered, culturally and linguistically responsive and trauma-informed services, in both center-based and outreach settings. Outreach settings where services may be offered include, but are not limited to, person's homes, schools, day care centers, nursing homes and adult day health centers. In keeping with FSA's mission, a diverse staff provides services in a culturally sensitive manner in the language of the consumer, wherever possible. Cultural competence is an expectation for all staff and on-going training is offered on this subject.

Multiple programs employ staff who speak Spanish, Portuguese, French and Hmong. This mirrors the primary languages spoken in the communities we serve. The agency also uses a language translation service that provides telephonic interpreter services for a variety of languages. Written materials needed for engagement are available in Portuguese and Spanish including participation agreements, statements of client rights and the FSA Privacy Notice. To ensure applicants are aware of the organization's capacity to accommodate different languages, materials in reception areas are posted in a variety of languages. Brochures and flyers for LTSS CP Supports will include a statement that materials are available in a variety of languages and that communication assistance is available. This statement will be included on all marketing and outreach materials.

FSA recognizes that people with speech and language challenges use a variety of ways to communicate. FSA is prepared to accommodate for the individual communication needs of every service applicant, including the use of technology in support of communication. The methods FSA will provide will vary depending on the abilities of the person and on the complexity and nature of the communication that must occur. Written notes may be effective for brief and relatively simple face-to-face communication. Written forms and information sheets may be sufficient in situations where there is little need for interactive communication. For more complicated communication, more sophisticated resources will be deployed such as assistive listening devices or the use of a qualified sign language interpreter.

Communication with individuals with cognitive disabilities involves determining their ability to understand spoken information and to read and comprehend written materials. Assumptions cannot be made based on the individual's verbal skills. Taking time to present materials in a manner that can be understood will foster good communication. Repetition, validation and verification of key facts along with following verbal instructions with written materials may also be helpful.

FSA provides services in a manner that is responsive to diverse cultural beliefs and practices, including those related to an individual's race, ethnicity, disability, sexual orientation and gender identity. This is achieved through a number of strategies. The first is through the recruitment and hiring process. Applicants for employment are advised of the population served by FSA and the expectation to demonstrate sensitivity to the service population's cultural and socioeconomic characteristics. The next strategy is the orientation or onboarding process. New hire orientation which includes an introduction to culturally competent care and establishes the expectation for respectful care. Every employee is required to attend culturally competent care training on an annual basis. Curriculum components include recognizing the changing demographics of our community, understanding the influence culture can have on the delivery of services and realizing the value of culturally competent care. Training is followed by supervision and coaching. Organizationally we also track effectiveness in providing culturally competent care through stakeholder feedback surveys.

The FSA workforce is experienced working with a diverse population. Highlights of FSA's work with the population specified is provided in the table below.

7.5 INITIAL DSRIP PARTICIPATION PLAN

Population	Expertise and Experience
Individuals experiencing homelessness	• Group adult foster care: collaboration with housing authorities throughout the service area to prevent evictions • Guardianship: applies legal, social and fiscal resources to prevent homelessness • Adult foster care: placement in a host home for individuals who cannot live independently in the community • Representative Payee program: ensure rents are consistently paid to prevent evictions and homelessness. Works with individuals who are homeless to apply fiscal resources to secure housing
LGBTQ Populations	• Community Service Agency: support and advocacy for LGBTQ youth. Specialized staff training to work with youth experiencing violence/bullying related to sexual identify • Behavioral Health Center: trauma-informed care to victims of violence related to sexual and/or gender identify • Family Resource Center: information and referral for LGBTQ populations in need of community resources • Adult foster care: specialized services for adults with HIV and AIDS
Criminal Justice involved individuals	• Community Service Agency, Therapeutic Mentoring and In-Home Therapy: services to youth involved with the juvenile justice system. • Representative Payee: allocate benefits to pay court cost, fines and legal fees • Behavioral Health Center: counseling and support to individuals facing legal challenges, impending incarceration and upon return to the community • Family Resource Center: specialized services to Children Requiring Assistance (Juvenile Justice involved)
Individuals who are blind, low vision, Deaf or hard of hearing	• Group adult foster care: in-home modifications to support individuals with sensory deficits; facilitates referral for additional community supports • Adult foster care: individualized education to host families/caregivers on meeting the needs of bling/deaf/hard of hearing individuals • Adult Day Health: program modification to ensure meaningful participation in program activities • Behavioral Health Center, Family Resource Center: accommodate communication needs for blind/deaf/hard of hearing individuals
Individuals with cognitive disabilities	• Group adult foster care: daily hands on assistance, meal prep and medication cueing • Adult foster care: safe and secure housing for individuals who can no longer safely live alone • Adult Day Health: therapeutic activities for individuals with cognitive impairments

Ramp-up costs in Prep Budget Period, Budget Year 1, 2 and 3 can be covered by Infrastructure Funding

Community Partner Program Budget Report - Prep Budget Period

Only complete this Program Budget Narrative using amounts anticipated for PBP.

Lines may be added to the Program Budget Narrative tables as necessary

Row 1 - Salary

Position	Annual Salary	FTEs	# Months	Total
LTSS Coordination Manager	$ 60,000.00	1.00	3.00	$ 15,000
LTSS Coordination	$ 41,600.00	4.00	1.50	$ 20,800
Senior LTSS Coordinator	$ 55,000.00	1.00	1.50	$ 6,875
Call Center Staff	$ 33,280.00	1.00	1.25	$ 3,467
Program/Admin Staff	$ 40,000.00	0.50	5.00	$ 8,333
Total Salary (Program Budget Line 1)		**7.50**		**$ 54,475**

Row 2 - Fringe

Fringe Item	Total Salary	Fringe Rate	Fringe
Fringe Item	$ 54,475.00	29%	$ 15,798
Total Fringe (Program Budget Line 2)			**$ 15,798**

Total Personnel*	**$ 70,273**

* Should align with Personnel Costs row in Program Budget

The above positions are related to direct program operations as opposed to infrastructure development and infrastructure management.

There will be **4 LTSS Certified Partner Coordinators** hired and trained prior to the start of year 1. These staff will coordinate care for up to 92 consumers, each. They will be hired at an annual salary of $41,600. Over the course of the first year, an additional 16 LTSS-CPC's will be hired in concert with caseload growth. The overall average FTE for the year, supported by the program budget*, will be 10.86, with the final number being 20.

There will **be 1 LTSS-CPC Supervisor** hired and trained prior to the start of year 1. This person will ultimately carry a caseload of up to 15 consumers and supervise 6 to 7 LTSS-CPC's. Over the course of year 1, 2 additional supervisors will be hired and trained, as the caseloads and number of LTSS-CPC's increase. They will be hired at a salary of $55,000. The overall average FTE over the course of year 1, supported by the program budget**, will be 1.68, with the final number being 3.

The **LTSS Coordination Manager**, (1.0 FTE @ $60000 for 3 months = $15,000), will be hired by the MSO in advance of the other program staff and will be involved in the hiring, training and oversight of all program staff.

Program/Admin Staff, (0.5 FTE @$40,000 for 5 months = $8,333), will provide administrative support to all members of the implementation team and will ultimately provide ongoing administrative support to the LTSS Coordination Manager.

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Total Training and Professional Development (Program Budget Line 3)			**N.A.**

Provide a description of each Training and Professional Development line item included in the table abovNot budgeted in the Project Budget for the Prep Period: *The training and professional development costs are not reflected in the program budget since theses services will be provided through the MSO and are reflected in the infrastructure budget. Ongoing training services beyond the infrastructure building period will be provided by the*

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
LTSS Coordination Manager	325	3	$ 0.53	$ 516.75
LTSS Coordinator	155	1.5	$ 0.53	$ 123.23
Senior LTSS Coordinator	147	1.5	$ 0.53	$ 116.87
Program Administrative Staff	265	5	$ 0.53	$ 702.25
			Total Mileage	$ 1,459.09

Travel Expense Description	Cost
Total Mileage	$ 1,459.09
Parking and tolls	
Public transportation	
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ 1,459.09**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees. *LTSS Coordination staff will be distributed between 3 sites within the North Region. One site will be located in Lynn, one site will be located in Beverly and one site will be located in Lowell. The MSO site will be in Lynn. The LTSS Coordination Manager and the Administrative staff will be homebased in Lynn and traveling to the other sites to make sure that the locations are properly outfitted and that the new-hires are situated at their home base locations. Once hired, the LTSS Coordination staff will be travelling back and forth between their home sites and Lynn for trainings and staff meetings.*

Row 5 - Equipment

Description of Equipment	Unit Cost	#units or FTEs	Cost
Total Equipment (Program Budget Line 5)			**NA**

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined: *Computer and other digital devises will be supplied by the MSO as part of the infrastructure budget, during PBP. Initial office equipment and furnishings will be provided by the host sites as part of their occupancy cost reimbursement.*

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost
Total Supplies (Program Budget Line 6)			**NA**

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined: *Initial office supplies will be provided by the MSO during the PBP.*

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost

	A	B	C	D
140	**MSO- (Silver Otter Strategies)**	Subcontract	Management Servic	$13,500
141				
144				
145			**Total Contract Services (Program Budget Line 7)**	**$13,500**

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS. *During the PBP, the MSO will provide both capacity building services, covered in the infrastructure budget and ongoing management services, reflected in the Program budget. The role of the MSO is described in the PBP infrastructure budget narrative and in the RFP. The MSO will oversee and deliver: technology/communications, QA and Evaluation, Workforce Development, Fiscal and Administrative Supports, Workflow Design and Implementation, work site coordination and supports, Marketing, inter- and intra-organizational communications/connections, implementation of innovations (as*

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
		Total Software Licensing (Program Budget Line 8)	**N.A.**

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined: *Software licinsing costs will be paid based on consumer enrollment, starting in BP1. No license fees will be paid during PBP. All software related costs in PBP will be related to configuration and implementation. Those costs are reflected in the Infrastructure Budget.*

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
		Total Telecommunications (Program Budget Line 9)	**N.A.**

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined: *All telecommunication devises will be issued by the MSO. Any initial PBP costs during PBP will be absorbed by the MSO.*

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost
Rent			$ -
Utilities			$ -
Repair and Maintenance			$ -
	Total Occupancy (Program Budget Line 10)		**$ 27,230.00** **See Below**

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined: *Each host site will be paid a flat fee during the PBP of $2,800 per FTE, for occupancy, to include rent, utilities, repairs & maintenance, office furnishings and access to office equipment.*

Row 11 - Other

Other Direct Expense Description	Cost
Miscellaneous	$ 250.00
Total Other Direct Costs (Program Budget Line 11)	**$ 250.00**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined: *$250.00 is budgeted for miscellaneous expenses, not otherwise anticipated.*

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead	**12.50%**	**$ 8,784**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined*: Indirect OH is based on 12.5% of personnel costs only.*

Community Partner Infrastructure Budget Report - Technology - Prep Budget Period

Only complete this Infrastructure Budget Narrative using amounts anticipated for PBP.

Lines may be added to the Infrastructure Budget Narrative tables as necessary

Row 1 - IT Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
IT Director	$ 103,000.00	0.25	5	$ 10,729
	$ -	0		$ -
	$ -	0		$ -
	$ -	0		$ -
	$ -	0		$ -
	$ -	0		$ -
	$ -	0		$ -
	$ -	0		$ -
	$ -	0		$ -
	Total Salary	0.25		$ 10,729
	Fringe rate	29.0%	Total Fringe	$ 3,111
			Total IT Staffing including Fringe (Infrastructure Budget Line 1)	**$ 13,841**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

The IT Director, working for the MSO, will work with Thrasys and the MSO implementation team to configure and implement the Syntranet EHR system.

Row 2 - Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
Syntranet Implementation fixed fee	$230,000
Total Development and Adaptation of EHR and Care Management System (Infrastructure Budget Line 2)	$230,000

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Thrasys has quoted an all inclusive initial configuration and implementation fee of $230,000.00. This process will occur within the PBP.

Row 3 - Technology for Service Delivery

Description of Expense	Cost

	Total Technology for Service Delivery (Infrastructure Budget Line 3)	N.A.

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

There will be no costs incurred during PBP.

Row 4 - Other Technology Expenses

Description of Expense	Cost
Total Other Technology Expenses (Infrastructure Budget Line 4)	**N.A.**

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

There will be no costs incurred during PBP.

Community Partner Infrastructure Budget Report - Workforce Development - Prep Budget Period

Row 5 - Workforce Development Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Trainer	$ 71,000.00	0.25	1	$ 1,479
Subject Matter Experts	$ 70,000.00	0.25	1.75	$ 2,552
	$ -	0		$ -
	Total Salary	0.5		$ 4,031
	Fringe rate	29.0%	Total Fringe	$ 1,169
Total Workforce Development Staffing including Fringe (Infrastructure Budget Line 5)				**$ 5,200**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting

the terms of the CP's contract:

Subject Matter Experts, averaging 10 hours per week during the last 7.5 weeks of the PBP, will be employed by the MSO, from GLSS and each Affiliated Partner to cross-train all LTSS staff around disabilities, age and/or populationn specific issues likely to present among our anticipated consumer population, diversity in community contexts, aonflict-free case coordination, communication and other protocols, and effective data tracking/management/ and analytics..An internal MSO trainer, experienced in the delivery of enhanced LTSS coordination will assist in the training of all new staff and in the continuous training updates. This position will also be critical in delivering the training and supports that ensure a conisistent "LTSS CP" culture across partners.

Row 6 - Recruitment Expenses

Description of Expense	Cost
Advertising	$ 5,000.00
Total Recruitment Expenses (Infrastructure Budget Line 6)	**$ 5,000.00**

Provide a description of each recruitment expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

The MSO will conduct a multi-media/multipronged advertising and recruitment campaign for program staff during the PBP focusing on k

Row 7 - Training Expenses

Description of Expense	Cost
Outside Training Resources	$2,000.00
Total Training Expenses (Infrastructure Budget Line 7)	

Provide a description of each training expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

In addition to the employed training resources, we are allowing for up to 25 hours at an average rate per hour of $80.00 for consultant trainers to deliver supports to staff around needs identified and not sufficiently covered in our ongoing LTSS CP Training program.

Row 8 - Retention Expenses

Description of Expense	Cost
Total Retention Expenses (Infrastructure Budget Line 8)	**N.A.**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

We do not anticipate any retention related expenses during the PBP.

Community Partner Infrastructure Budget Report - Business Start Up Costs - Prep Budget Period

Row 9 - Office Equipment

Description of Expense	Cost
All-in-one printer, copier, fax, scanner	$ 5,000.00
Total Office Equipment (Infrastructure Budget Line 9)	

Provide a description of purpose for each office equipment expense listed in the tables above, including how the costs were determined:

High speed multi-function office machine to be acquired by the MSO and shared by MSO LTSS-CP staff.

Row 10 - Office Furniture

Description of Expense	Cost
Total Office Furniture (Infrastructure Budget Line 10)	**N.A.**

Provide a description of purpose for each office furniture expense listed in the table above, including how the costs were determined:

To be supplied by host sites under occupancy reimbursement.

Community Partner Infrastructure Budget Report - Operational Infrastructure - Prep Budget Period

Row 12 - Operational Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Executive Director	$ 145,000.00	0.200	5	$ 12,083
COO	$ 62,000.00	0.200	5	$ 5,167
Director of HC Transformation	$ 141,440.00	0.125	5	$ 7,367
Director of Quality Management	$ 100,000.00	0.075	5	$ 3,125
Compliance Officer	$ 81,120.00	0.025	3	$ 507
CFO	$ 145,000.00	0.10	5	$ 6,042
Evaluation & Analytics Staff	$ 47,840.00	0.5	3	$ 5,980
Marketing Suppost	$ 43,680.00	0.25	2	$ 1,820
				$ -
	Total Salary	1.475		$ 42,090
	Fringe rate	29.0%	Total Fringe	$ 12,206
			Total Program Staffing including Fringe (Infrastructure Budget Line 12)	**$ 54,297**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract: Each of the below positions will be employed by the MSO:

The Executive Director of the MSO will provide executive level oversight of all program development and program infrastructure activities. **The COO** of the MSO will work directly with all of the below staff to assure timely implementation of all aspects of the infrastructure development. **The Director of HC Transformation** will oversee implementation of the enhanced LTSS coordination program design**. The Director of Quality Management** will assist in the operationalization of on ongoing monitoring of quality and outcome measures. **The Compliance Officer** will help to define all applicable regulatory and contractual compliance requirements and assure adherence to the same. **The CFO** will oversee the set-up and management of financial systems. **The Evaluation and Analytics** staff will work with QA and IT on setting up the business process for gathering and analyzing data, to measure outcomes and develop predictive analytics. **Marketing Support** will assist in the development and publication of all program informational and educational documents and brochures.

Row 13 - Other Operational Expenses

Description of Expense	Cost
Legal Consultation	$ 4,000.00
Total Other Operational Expenses (Infrastructure Budget Line 13)	**$ 4,000.00**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Converting current Management Agreements, in the for of MOU's, to long-term contracts. Developing written agreements with other entities, as needed.

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 14)	**12.50%**	**$ 9,167**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

This overhead rate is applied to personnel costs only, not to total direct program expenses. It includes all corporate level support costs, including, but not limited to Accounting and finance, HR, IT, board expenses, Audit fees, D&O insurance, etc.

Community Partner Milestones Report

Infrastructure Category	Infrastructure Investment Project	Project Goal	Goal Start Date	Anticipated Goal End Date	PBP Update - Due to EOHHS March 31, 2018				Report on PBP - Due to EOHHS August 31, 2018			
					Anticipated Milestone Target by 3/31/18	Evidence of Success	Has Milestone been met? (Y/N)	If NO, please explain:	Anticipated Milestone Target by End of PBP (5/31/18)	Evidence of Success	Has Milestone been met? (Y/N)	If NO, please explain:
Technology	Development and Adaptation of E.H.R/Care Management System	Install Thrasys Syntranet as primary database/communications platform	12/01/17	05/31/18	LTSS CP database parameters established	Database captures, stores, and manipulates data according to specs			Syntranet communicates effectively with affiliated partner database systems	Effective portals are established for entering and retrieving data between different systems		
Technology	Development and Adaptation of E.H.R/Care Management System	Train staff on Syntranet	03/01/18	12/31/22	Key staff are trained	Key staff demonstrate competence in using full range of syntranet features			All appropriate LTSSC and MSO staff are trained in use of syntranet	All trained staff demonstrate competence in using full range of syntranet features		
Technology	Technology for Service Delivery	Establish inter-operability with ACOs/MCOs	03/01/18	02/28/19	Agreement established with at least one ACO to develop interoperable capabilities	NRLP and at least one ACO can exchange data through Syntranet platform			GLSS and ACO agree on IT requirements and workflows for interoperability and data sharing	Signed MoU between GLSS and ACO outlining interoperability/data sharing protocols involving Syntranet platform		
Technology	Other Technology Investments	Establish and launch predictive analytics capacity	03/01/18	12/31/22	Framework developed for identifying and measuring Social Determinants of Health	Theoretical model with appropriate hypotheses, variable relationships, and indicators established			At least one predictive analytics model developed capable of identifying appropriate "positive deviance" relative to improved health outcomes around one or more chronic diseases	Model is developed and shared with ACO partners		
Workforce Development	Recruitment	establish and implement uniform and unified recruitment and hiring capacities across all partner entities	01/01/18	12/31/22	uniform and unified policies established including appropriate protocols around NRLP recuritment, hiring, and retention	Policies are written and approved			Protocols and guidelines implemented to hire first group of new staff	Staff are hired using uniform and unifed procedures		
Workforce Development	Training	establish and implement comprehensive training that distinguishes NRLP LTSS capacities	01/01/18	12/31/22	Comprehensive curriculum developed for "LTSS Institute"	Curriculum exists for all identified topics in multiple formats addressing multiple learning styles; curriculum has been approved by SMEs and each partner entity			NRLP staff trained on curriculum	Staff demonstrate competencies on curriculm assessments		
Workforce Development	Retention	Establish an atmosphere of learning and best practice as key to retention strategy	01/01/18	12/31/22	Establish change and best practice culture for NRLP	Change campaign is developed with timelines and benchmarks			Change campaign is implemented	Change campaign begins to be assessed according to pre-established timelines and benchmarks		
Workforce Development												
Business Start Up Costs	Office Equipment	Establish LTSSC base sites in Lynn, Beverly, and Lowell	01/01/18	05/31/18	Sites are secured and at least one site is properly outfitted to receive NRLP staff	all facility arrangements are legally finalized; first site is available for new NRLP staff			All sites are properly outfitted to receive NRLP staff	all facility arrangements for each of the three sites are legally finalized and each is available to receive new NRLP staff		
Business Start Up Costs	Office furniture	Establish LTSSC base sites in Lynn, Beverly, and Lowell	01/01/18	05/31/18	Sites are secured and at least one site is properly outfitted to receive NRLP staff	all facility arrangements are legally finalized; first site is available for new NRLP staff			All sites are properly outfitted to receive NRLP staff	all facility arrangements for each of the three sites are legally finalized and each is available to receive new NRLP staff		
Business Start Up Costs												
Business Start Up Costs												
Operational Infrastructure	Other Operational Expenses	Develop formal NRLP policies in accordance with model contract	01/01/18	05/31/18	Draft completed of NRLP policies completed and ready for circulation to Executive Committee	Draft is completed			All requisite NRLP policies are reviewed, revied as appropriate, and formally adopted by Executive Committee	Publication of official NRLP policies		
Operational Infrastructure	Other Operational Expenses	Develop formal QA/QI Plan	03/01/18	05/31/18	Outline of QA/QI plan developed and prepared for circulation to QA and Executive Committees	Draft of Plan with clear metrics is developed and ready for circulation			QA/QI Plan is approved	QA/QI plan becomes template for preliminary data analytics		
Operational Infrastructure	Other Operational Expenses	Develop ACO MoUs	01/01/18	05/31/18	Outreach and conduct negotiations with all appropriate ACOs in the region, establishing a comprehensive draft MoU outlining key elements for LTSS best practices	Draft MoUs established			MoUs are signed and implemented	MoUs reflect adequate datasharing, communications, and analytic collaboration		
Operational Infrastructure	Other Operational Expenses	Implement Marketing Strategies	02/01/18	05/31/18	Identify target sites for outreach and networking	Targets established in all North region communities			Marketing materials, collateral and overall campaign (including social media as well as other virtual technologies) is established and launched	Using various recognition metrics. NRLP visibility significantly increases		

PLEASE NOTE CHANGES IN PBP TIMELINE ON PAGE 51.
The Original Attachments B and C are not included here as they are superseded by the CP Workbook

7.5 Initial DSRIP Participation Plan

A. Executive Summary (*NOT TO EXCEED 2 PAGES*)

1. Goals, Challenges, and Solutions

The principal **goals** for the NRLP five-year business plan include:

- To develop a comprehensive and unified LTSS Coordination capacity across the Northern region that actively promotes the *Community First* agenda for all identified focus populations and that adheres to the values of conflict-free management.
- To create stronger pathways and connections among community resources and services that promote greater consumer choices and easier navigation, eliminate silos, and support the principles of community livability for all.
- To create a strong and dynamic training system for LTSS Coordination staff that fosters best practices in the delivery of all elements of the LTSS CP function.
- To develop a comprehensive quality management system that provides timely feedback and comprehensively supports best practice and cost-effective operations for all elements of the LTSS CP function.
- To develop seamless communication systems across LTSS providers, between LTSS providers and health providers, and with EOHHS and meets all EOHHS requirements as stated in the Model Contract.
- To establish and effectively maintain a value-based resource and LTSS provider capacity and performance database.
- To identify, pilot, and disseminate appropriate promising technology and other innovations that support greater consumer access and choices relative to *Community First* and community livability principles.
- To strengthen clinical-community linkages to support better health and lower health care costs for all identified focus populations.
- To develop appropriate indicators, rigorously capture the relevant data, and consistently measure the impact of the LTSS CP function relative to consumer health behaviors, status, and health care costs.
- To fully establish the critical value-add which best-practice LTSS Coordination brings to the health care system both in its capacity to address the social determinants of health and its impact in lowering the total cost of care for the focus populations.

The key **challenges** which the NRLP anticipates as its five-year plan unfolds involve the following:

- Creating a uniform, dynamic, best-practice "LTSS Coordination" culture across the NRLP LTSS CP operations.
- Developing unified communications, data reporting, and data sharing system.
- Establishing a cohesive value-based system to measure LTSS provider and other community resource capacities and performance.
- Developing and implementing a "real time" quality management system
- Strengthening clinical-community linkages
- Aligning community resources to facilitate easier consumer access and navigation.
- Establishing critical indicators for LTSS Coordination that are reliable, measurable, reflect social determinants of health, and demonstrate impact.

The NRLP, using principles of intentional design, proposes this LTSS CP partnership with the aim of integrating the innovative capacities of each member and of the LINK to address the critical barriers currently precluding integration of health and LTSS services. **Solutions** strategies towards that end include:

- Developing a comprehensive training component for LTSS Coordination that includes required learning modules (and certification of completion) around critical areas of subject matter expertise (*Community First* principles; motivational listening, and other proven approaches to optimizing self-determination and engagement; person-centered/person-driven supports, community diversity and context issues; conflict-free case management; diverse focus population characteristics and needs; understanding of disabilities and chronic disease issues; care planning, implementation, monitoring; principles of value-based referrals; social determinant of health and quality measures; approaches to health and wellness coaching, etc.) to develop a uniform best practice LTSS Coordination capacity.
- Embedding LTSS Coordinators/Liaisons in ACO Health Care facilities to strengthen clinical-community linkages.
- Designing workflows, protocols, and key objectives in tandem with quality management systems to generate opportunities for real time analysis and ensure QM is fully integrated into all aspects of the LTSS CP system.
- Implementing Thrasys/S*yntranet* communications and data system as a meaningful use certified EHR inter-operable platform to utilize capacities of existing systems, ensure appropriate communications with ACOs, health and behavioral health providers, social service providers, and EOHHS to support and facilitate overall LTSS CP functions.
- Exploring the potential to establish an After-Hours Call Center to support LTSS functions – facilitating greater consumer access, providing "reminder" calls, etc. to avoid missed appointments, connecting with late shift providers to better align community resources.
- Working with the LINK to establish appropriate forums to focus on expansion of No Wrong Door access through NRLP to better align community resources.
- Exploring use of existing GLSS caregiver app as well as working with SeniorLink's VELA app to help consumers better navigate community resources.
- Harnessing the power of the Kiosks for Living Well to support health and wellness coaching and for expanded populations and communities to promote stronger clinical-community linkages, consumer engagement, and consumer health outcomes.
- Using NRLP's ongoing evaluation research around *One Care* to design data capture mechanisms and analytics around the impact of LTSS Coordination functions to better demonstrate value and promote stronger clinical-community linkages.

2. **NUMBER OF ASSIGNED AND ENGAGED ENROLLEES BIDDER INTENDS TO SUPPORT:**

The NRLP expects to support **2365** assigned enrollees, which represents 53% of the identified FFS LTSS population in the Northern Region. We estimate the number that will be engaged at any one point in time will be **1892** (80%).

3. **SERVICE AREAS: ALL SERVICE AREAS IN THE MCO NORTHERN REGION**
4. **BIDDER'S PLAN TO OPERATIONALIZE LTSS CP:** *Please see 7.5F*

B. Supporting Populations and Community Engagement (*not to exceed 2 pages*)

1. Current Connections

GLSS, through the LINK and other networks, has partner connections with over 100 organizations throughout the North service area, regularly participates in partner meetings which these different networks convene, and can use networks such as the LINK as a foundation for further outreach. The LINK, for example, maintains a listing of advocacy, housing/shelter, LTSS providers, and social service organizations across the region and can facilitate access to many diverse organizations. Similarly, NRLP members have cultivated key relationships in the service areas of the Northern region, including:

- **Bridgewell:** Bridgewell works closely and enthusiastically with many other nonprofit and minority organizations to seek comprehensive and holistic solutions to the needs of people with disabilities and other life challenges. Bridgewell actively participates with various home health care agencies, Care Dimensions, community health centers, physicians and inpatient hospitals in over 24 communities in the Northern Region and is an active member of trade organizations such as Association of Developmental Disabilities providers (ADDP), Providers' Council, ABH and ARC Mass as well as the Lynn Non-Profit Business Partnership, Chamber of Commerce in Lynn, Peabody, Salem and the North Shore, Lynn Housing Authority and Neighborhood Development, Non-Profit Alliance of Greater Lowell and various other forums around Massachusetts that advocate for people with disabilities. We are a major contributor to the mainstream Continuum of Care networks in Lynn and Lowell which includes representation from local social service agencies.
- **GLSS:** GLSS has contractual connections with approximately 50 different LTSS provider entities which serve populations across multiple service areas, work in multiple coalitions across the region including Lifetime Care Solutions, Inc., co-chairs RCC which brings together regional transportation and human services organizations to do further networking, and maintains region-wide Mobility Links data base which includes information on a variety of entities who provide diverse services and supports.
- **NeArc:** NeArc works closely and collaboratively with many other nonprofit and minority organizations to seek comprehensive and holistic solutions to the needs of people with disabilities. Northeast Arc actively participates with various home health care agencies, Care Dimensions, community health centers, physicians and inpatient hospitals in over 100 communities in the Northern Region, is an active member of trade organizations such as Association of Developmental Disabilities providers (ADDP), Massachusetts Council of Human Service Providers, Massachusetts Day Hab Coalition, and Arc Massachusetts, and is a member of the Peabody Cultural Collaborative, North Shore Chamber of Commerce and local chambers. Northeast Arc also works with Housing Authorities in Swampscott, Salem, and Lynn and has partnerships with Salem State University, North Shore Community College, and the United Way, among many others.

2. Growing Connections

The NRLP will use the extensive networking connections of both the LINK and its member entities to further expand its capacity to identify, partner with, and appropriately catalogue new community connections. Using the capabilities of *SyntraNet,* NRLP will develop a centralized and user-friendly database of these resources, which will be updated regularly by Call Center staff who will receive appropriate training in techniques for building dynamic inventories. To further ensure comprehensive connections, the NRLP will work with key subcontractors who will provide expertise around community networking in their area for specific populations and community contexts. Such expertise will include training for NRLP staff on community history and contexts, introductions to community leaders and

consumer advocates, access to organizational networks, co-sponsored informational events or workshops, and other outreach techniques. Two such subcontractors,[1] will be EMARC and NuPath, which are briefly described below.

- **EMARC:** Since 1954, East Middlesex Arc's mission has been to support, serve and advocate for people with developmental disabilities and their families to ensure they are valued and respected members of their communities. Notably, East Middlesex Arc (EMARC) provides comprehensive Family Support Services including After-school programs, a broad range of targeted Recreation services, Adult Family Care, and Transition Support services throughout many Metro-North communities in particular, to the city of Malden. The family support program is led by an expert team of Master's level social workers and Registered Nurses that assess, support and coordinate care for the hundreds of individual and families served. Through a continuum of services including our Beverly Day Habilitation--"Life Choices Program"--and our In-Home Support services, EMARC works in concert with its sister agencies to maximize each individual's independence within the community, and support their ability to maintain and enhance essential daily living skills. EMARC[2] is headquartered in Wakefield, and also provides a continuum of residential and employment services to more than 1,000 individuals and their families each year.
- **NuPath:** Based in Woburn, MA, and offering services at locations across Eastern Massachusetts, NuPath serves 450 individuals and is proud to be part of a growing network of regional agencies changing the way the wider world views people living with disabilities. Program services provide education, coaching, opportunity and success, and include Day Services (Employment Supports, Community Based Day Supports and Day Habilitation); Residential Services (Autism residential Supports, Shared living, Independent Supports); Autism Focused Programs that address the unique and expanding needs of people living with Autism Spectrum Disorders; Clinical Services and transportation services that include a fleet of modern vehicles to meet the transportation needs of the people in programs.

3. Plans to Ensure Staff Maintain Up-to-Date Information

The NRLP will establish a centralized database using the *SyntraNet* platform to incorporate existing community resource / LTSS provider inventories and build new and more comprehensive information features that include quality measures. The platform will generate electronic update reminders to organizations in the database on a regular basis to verify descriptive information, and notify database administrators when responses are not forthcoming, which will then prompt the administrator to initiate appropriate telephonic inquiry to gather the information. Requests for information updates from participants will be a regular feature of LINK and other collaborative meetings. *SyntraNet* will produce periodic analytic reports identifying community resource/LTSS provider performance around identified indicators including consumer satisfaction, care plan progress, provider responsiveness, value-adds, and so forth.

Staff will have full access to this centralized inventory to support care planning, implementation and monitoring and will be trained on using this tool as part of their general orientation to the NRLP LTSS Coordination role.

[1] Pending EOHHS approval. All subcontractors will adhere to all terms and conditions as outlined in the Model Contract, including HIPAA provisions.

[2] EMARC is licensed and certified by the MA Department of Developmental Services, is a certified MassHealth provider and accredited by CARF.

C. COMMUNITY PARTNER SUPPORTS AND ACTIVITIES (*NOT TO EXCEED 10 PAGES*)

1. OUTREACH:[3]

The NRLP will accept all assigned enrollees to the fullest extent of its capacity and will confirm receipt of the assignment to EOHHS or the assigning ACO/MCO within one business day. After receiving notification of an assigned enrollee to the NRLP LTSS CP, an LTSS Coordinator will seek to make contact with him or her through telephone call and/or text, letter and/or email (if possible) and/or a face-to-face visit. Each of these modalities will be tried at least once, but there will be a minimum of two phone calls and one face-to-face effort, unless the enrollee indicates a preference for phone rather than in-person contact. All attempts to reach an enrollee will be fully documented.

a. Planned strategies to locate and engage with Assigned enrollees w complex LTSS needs

Through its various programs and initiatives, the NRLP offers extensive experience in locating and engaging with Assigned Enrollees with complex LTSS needs who are not easily reached. While protecting confidentiality, these strategies are designed to alert assigned enrollees to the LTSS CP opportunity. Some proven outreach strategies which the NRLP will incorporate in its role as an LTSS CP include those listed below. All outreach and informational materials and mechanisms will be submitted to EOHHS for prior approval before implementation.

- Developing an "Outreach Task Force" among LTSS Coordination staff who regularly contact (including in-person visits) shelters, soup kitchens, food pantries, community centers, clinics and health centers, faith-based organizations, potential gathering sites (e.g., coffee shops, fast food places), the Kiosks for Living Well sites, schools, employment support centers, etc. to connect with potential assigned enrollees and describe the opportunity for LTSS supports. The Task Force will also provide short presentations to community and consumer advocacy groups on a regular basis and broader presentations about LTSS CP Supports in more formal educational forums, including *Conversations for Caring*[4] LINK Partner Meetings, and other Regional meetings.
- Disseminating written information in appropriate languages and formats about LTSS CP Supports through various outreach workers, including Mental Health, Nursing, and Care Management staff employed by the NRLP, who are routinely in diverse corners of communities. This information will include directions on how to identify whether or not the individual is an assigned enrollee.
- Publicizing LTSS CP Support opportunities using accessible "post card" flyers that are left at pharmacies, clinics and health centers, targeted employment sites, local RMVs, Department of Transitional Assistance offices, schools, and community gathering sites.
- Developing Public Service Announcements about LTSS CP supports and the importance of connecting with assigned enrollees and arranging to appear on various Public Media broadcasts to describe the LTSS CP and the effort to reach assigned enrollees who may be difficult to contact.
- Establishing a social media presence with consistently engaging messaging around LTSS CP.
- Securing sponsorships to "wrap" vehicles with appropriate messaging about LTSS CP supports.

[3] Reports on all Qualifying Activities as described in 7.5C.1-7 will be documented in the database in the format specified by EOHHS and provided to EOHHS in the form, format and frequency required by EOHHS.

[4] Conversations for Caring, a GLSS program, is a monthly forum delivering "information from the field" around critical topics relative to health and well-being which has an active mailing list of over a thousand and features regular presentations in Lynn, Beverly/Peabody, and Chelsea (Soldier's Home).

Once the NRLP connects with the assigned enrollee, the LTSS Coordinator will provide information about the LTSS option and the supports this entails, including a description of the Coordinator role. The Coordinator will inform the assigned enrollee about his or her right to refuse LTSS CP supports, the choice to enroll in the NRLP and select a different Coordinator, and the choice to enroll in a different LTSS CP. Should the assigned enrollee choose to receive LTSS CP supports, the Coordinator will outline the enrollment process which begins by explaining the purpose of the Enrollee Participation Form and clarifying that the assigned enrollee's signature confirms his or her consent to participate in the LTSS CP program. As part of this conversation, the Coordinator also identifies the nature of "protected information" that will be asked from the assigned enrollee and explains how this will be used to provide LTSS supports. The Coordinator will then request the assigned enrollee's – or authorized representative – to sign the Participation Form. When appropriate, the Coordinator will also request that the assigned enrollee – or authorized representative – sign a written authorization to use the assigned enrollee's protected information as necessary in the provision of LTSS CP supports. Once the Participation Form is signed by the assigned enrollee, a copy is maintained in the assigned enrollee record and a permanent NRLP CP Coordinator (which may or may not be the same Coordinator facilitating enrollment) is assigned within 5 business days. This step initiates the LTSS Care Planning phase.

2. LTSS CARE PLANNING

As described in the Model Contract, the NRLP will receive the Comprehensive Assessment results from the ACO/MCO. Where these results do not appear to accurately reflect the enrollee's functional status, the NRLP CP Coordinator will notify the ACO or MCO. Using the most accurate assessment possible, the NRLP CP Coordinator (CPC) will develop a care plan under the direction of the enrollee (and/or authorized representative) that will address identified needs and which will be regularly updated to reflect progress towards goals as well as any changes in status. All plans will be uniquely designed for each enrollee; written and documented in the EOHHS-required format[5] and entered into the NRLP CP database system, translated and explained in the enrollee's primary language and also prepared in alternative media formats when necessary and as appropriate to ensure that all legally competent enrollees have full understanding of the plan; reflect results from the Comprehensive Assessment and other NRLP assessments; clearly identify the enrollee's goals, preferences, strengths and challenges as well as cultural context; be signed by the enrollee or authorized representative and shared with the enrollee's PCP and shared with members of the enrollee's Care Team and others providing supports, all of whose contact information is included.

The care plan will uniquely represent each enrollee and will shift to appropriately reflect changes in the enrollee's status, needs, and preferences. Including a cohesive overview of the enrollee's strengths and challenges, interests and personal goals, the plan will also address his or her service goals and the choices he or she considered for addressing each of these as well as the accommodations provided to support enrollee decision-making. The plan will also include a section reflecting strategies that the enrollee can use to address service-related issues that are not a part of the plan's basic framework as well as back-up arrangements for recommended or ongoing

[5] Stored data will include date of contact, mode of contact, person contacted, results of contact, CPC electronic signature, results of all assessments including for flexible benefits, demographic information. All EHRs will be current and maintained in accordance with EOHHS standards and, upon request, the EHR will be provided to EOHHS within 30 days.

LTSS and social services should they become unavailable for any reason and will include emergency contact information. The CPC will ensure the enrollee is aware that all service and support recommendations require EOHHS (or designee) authorization prior to activation, and the request for and response to the request for authorization will be documented as part of the plan.

The plan will also include documentation certifying that the enrollee has: approved and signed the plan; been provided choice around both LTSS providers and programs; been advised that recommended services are subject to MassHealth medical necessity criteria and utilization management requirements; been notified of specific rights, including right to approve the care plan, right to appeal denial, termination, suspension, or reduction in services through MassHealth; the right to request a different CPC from NRLP and the right to request a different LTSS CP; and the right to submit an internal Grievance[6] to the NRLP.

The CPC will shepherd development of a care plan, in concert with the enrollee, to completion (signed by enrollee and approved by his or her PCP and submitted to EOHHS as a "Care Plan Complete" qualifying activity) within 90 days of the enrollee's assignment to NRLP. Upon approval by all required parties, the plan will be provided to the enrollee in the most appropriate and accessible format, reviewed at the enrollee's request at any time, and at least every 12 months and more frequently if there is a major change in the enrollee's status that is not temporary.[7]

a. HOW THE BIDDER WILL ENSURE THE ENROLLEE HAS MEANINGFUL PARTICIPATION…

The NRLP will assign to each enrollee a CPC with the experience and expertise that best addresses the enrollee's situation. Consequently, the CPC will understand how to recognize and provide to the enrollee the supports and accommodations necessary so that he or she can participate as fully as he or she wishes in directing the care plan. The CPC will also administer appropriate assessment tools, submitted and approved for use by EOHHS, designed to identify the community and social services that will optimally support the enrollee's health and well-being. The assessment will also identify appropriate flexible benefits which ACO enrollees may qualify to receive.

Using decision support techniques such as motivational interviewing where appropriate, the CPC will engage the enrollee (or authorized representative) to identify the fundamental framework for the care planning process by clarifying both how the enrollee wants to live his or her life and exploring what may be necessary to make that happen. Serving as coach rather than care manager, the CPC will, when necessary, help strengthen the enrollee's understanding around key elements of the care planning process so the enrollee can better manage it, to the extent he or she wishes, and so that it remains responsive to the fundamental framework. In this way, the enrollee remains at the center of the plan as a whole person with uniquely defined goals that reflect his or her complexities. The plan *does not* define the enrollee primarily in terms of either functional needs or service prescriptions.

However, functional status is among the issues the CPC discusses with the enrollee to support the plan's person-centeredness so that the enrollee understands what this means in terms of daily life as well as service eligibility. Clarifying this promotes the enrollee's ability to drive the plan and to more effectively consider what roles, if any, he or she may wish for family members, friends, and other social supports to play in the care plan, and/or if the enrollee can self-direct his or her care and how that can happen. The CPC will carefully review the range of LTSS services and community resources available to the enrollee (for which he or she is authorized to receive),

[6] The NRLP will develop and submit to EOHHS for approval an internal Grievance Policy outlining protocols and procedures for enrollee as well as staff and stakeholder grievances.

[7] Due to changes in functional limitations, including ADLs and IADLs, natural supports/caregivers, or living situation.

how they address enrollee goals, how they are delivered, how they can be managed, and the degree to which they can be individually tailored to meet specific needs or preferences. Where enrollees are already engaged and receiving services, the CPC will regularly review all of these issues under the direction of the enrollee to identify areas where adjustments may be necessary to support optimal fit between the care plan and the enrollee's needs, preferences, and goals.

b. A DESCRIPTION OF THE BIDDER'S PROTOCOLS FOR PROVIDING INFORMED CHOICE…

Choice is one of the most critical elements of the *Community First* doctrine and as such, providing meaningful choices to enrollees is a principal goal of the NRLP LTSS Coordination model. At its heart, offering choices means providing information about services and resources that is jargon-free, has relevance to who the enrollee is, his or her goals, and what he or she enjoys doing. Providing choices is about supporting the enrollee's access to the "driver wheel" of the care plan, to the extent that he or she wishes to do the driving. Consequently, the NRLP CPC explains the "road map," identifying different LTSS service and community resource options and talking with the enrollee (or authorized representative) about how different LTSS services and community resources work to support consumers and the routines or logistics that may be involved in participating in each one. The CPC will offer at least two providers for each service option. For this reason, the CPC is keenly aware of the LTSS and resource landscape in each community, uses the NRLP centralized inventory and similar sources to ensure the most comprehensive and up-to-date knowledge of what services and supports are available to each enrollee, and follows the enrollee's lead in tailoring a service package that meets the enrollee's needs and best reflects his or her preferences. Ensuring optimal choice also means offering multiple avenues for enrollees to connect with the community in ways that increase sense of belonging and inclusion and that can potentially introduce the enrollee to new and/or desired positive experiences.

The care plan will uniquely represent each enrollee and will shift to appropriately reflect changes in the enrollee's status, needs, and preferences. Including a cohesive overview of the enrollee's strengths and challenges, interests and personal goals, the plan will also address his or her service goals, the choices he or she considered in addressing each of these, as well as the accommodations provided to support enrollee decision-making. The plan will include a section reflecting strategies the enrollee can use to address service-related issues that are not a part of the plan's basic framework as well as back-up arrangements for recommended or ongoing LTSS and social services should they become unavailable for any reason.

Every care plan will identify the LTSS services and programs which the CPC has recommended in concert with the enrollee, including appropriate contact information, and description of how these will be integrated among the various health care, BH, and existing LTSS services which the enrollee may be receiving. The care plan will also include a description of the services and supports that are intended to address identified social determinants of health needs and how these will support the enrollee's improved health, independence and self-determination.

3. CARE TEAM PARTICIPATION

The NRLP CPC will coach the enrollee as the plan unfolds, assisting him or her to navigate through the LTSS service and support networks as appropriate, monitoring plan implementation and ensuring it is fully relevant to the enrollee, monitoring the enrollee's sense of progress as well as tracking changes in the enrollee's context (housing, work, family dynamics, losses, etc.); and working with the enrollee and the Care Team to make adjustments to the plan as appropriate. The CPC will, at the direction of the engaged enrollee, serve as a member of the Care Team and will maintain regular contact with the enrollee that will include a face-to-face meeting at least every three months

(in the enrollee's home or location agreed upon by the enrollee) with consistent telephone connections between meetings, all of which will be fully documented in the enrollee's record.

a. HOW THE BIDDER WILL PROMOTE INTEGRATION OF LTSS COMMUNICATION…

The NRLP CPC will serve as the enrollee's primary advocate, ensuring that the enrollee as a whole person with specific goals and preferences remains at the center of all conversations about him or her and that the choices the enrollee makes are honored as fully as possible. Ensuring that this platform is the basis for all stakeholder activity around the enrollee will facilitate overall coordination, which will involve ongoing communications with area providers, including LTSS, flexible and social service providers as well as primary care providers, and where applicable, MassHealth programs providing case management and Home Care programs to ensure LTSS CP supports supplement but do not duplicate existing supports. Essential documentation will be securely communicated through NRLP's *SyntraNet* capacities on the Mass HIway. The CPC will share appropriate documents with the enrollee in a format that meets his or her language or accessibility needs.

b. HOW THE BIDDER WILL PROVIDE LTSS EXPERTISE AND ADVOCATE FOR APPROPRIATE…

Each NRLP CPC is matched with an assigned/engaged enrollee based on the CPC's experience and expertise working with consumers who have similar disabilities, needs, and social contexts. The CPC therefore begins the journey with the enrollee from a critical vantage point and can more easily discern the enrollee's strengths and challenges and work more effectively with him or her to weave an appropriate service and support plan. As the enrollee's coach, the CPC is also a chief advocate focusing on ensuring that the enrollee's goals remain paramount in all aspects of care delivery. To facilitate this, the CPC will provide ongoing updates – and insights – to the Care Team about the enrollee's experiences and context including social determinant of health issues and how these are being addressed, the impact of LTSS and social service supports on the enrollee's goal achievement, health and well-being, and changes in the enrollee's attitudes, behaviors, and overall status. These updates will be based both on documented personal observations through ongoing contacts with the enrollee, and on the analytics which the *SyntraNet* platform will provide. The CPC will also support the enrollee's role as the primary voice on the Care Team, work to ensure the enrollee understands all communication, and that his or her views have been adequately solicited and appropriately considered.

4. LTSS COORDINATION

The NRLP CPC will maintain ongoing connections with the enrollee, effectively monitoring the enrollee's health, functional, and social status and facilitating communication between the engaged enrollee, ACO/MCO and all relevant LTSS, social service, and community resource providers. As part of the monitoring role, the CPC will also track provider performance according to key service delivery indicators, including: level and nature of staffing; consistency in following care plan; responsiveness to enrollee and other members of Care Team; timeliness of service delivery; quality of logistics (e.g., transportation); enrollee and/or caregiver satisfaction, and more.

a. HOW THE BIDDER WILL MONITOR/MANAGE STATUS/LIFE CYCLE EVENTS…

Because the NRLP CPC is both highly skilled in working with the enrollee population in general and is keenly familiar with the specific context of each enrollee in particular, the CPC can swiftly assess – and even predict – changes which the enrollee may experience. To support the latter capacity, the CPC will utilize the predictive analytics which the *SyntraNet* platform can produce integrating relevant social determinant of health indicators and claims data.

The NRLP CPC will act to alert the Care Team of events that can be counterproductive to the

enrollee's progress and will re-align resources as appropriate to preclude or minimize the impact of such events. For example, the CPC may identify rising tensions within the family context which are negatively affecting the enrollee and offer supports for resolving those. Other examples include issues of grief and loss, medication management, changes in the community and social connections, changes in staffing/service delivery patterns or auxiliary logistics (e.g., transportation), and other developments that can precipitate difficulties for the enrollee which the CPC can proactively address before they escalate.

The CPC works with the enrollee to support his or her progress and therefore will also ensure that opportunities for promoting appropriate growth are optimized. As a coach, the CPC seeks to foster enrollee confidence, sense of competence, sense of belonging, and self-determination. Some life cycle changes, while difficult, are also opportunities. Transition from school to work is one such example, as is transition to a more independent living arrangement. During these times, the CPC will help the enrollee to establish and focus on appropriate daily routines, partialize tasks as necessary, and work to ensure the enrollee feels a sense of accomplishment in making the changes

b. HOW THE BIDDER WILL SUPPORT/ENCOURAGE ENROLLEE'S ONGOING ENGAGEMENT…

The NRLP CPC role is, at its heart, a coaching role. As such, the role emphasizes enrollee engagement as a primary goal, so that the CPC strives to keep choice and control in the hands of the enrollee (or authorized representative) as much as possible, ensuring that the decisions are made by those who know the enrollee best and are most committed to understanding and helping implement the enrollee's goals and preferences. For enrollees who are not able or do not wish to control decision-making, the question is not whether the enrollee can pursue self-determination, but what kind of supports will he or she need to do so and how might caregivers, family, friends, etc. help provide them and promote greater self-advocacy.

At all stages of the care planning process, the CPC seeks to ensure the enrollee (and family) can see him- or herself as a whole person with a multi-dimensional life and opportunities for fulfilling personal goals. Techniques to inspire engagement include motivational interviewing and similar readiness for change approaches wherein the CPC helps the enrollee to explore the ambivalence which he or she (or family members) may hold around making change. The motivation for change belongs to the enrollee. The CPC seeks to clarify what that may entail and encourages the enrollee to use that motivation in the design of the care plan and the choices he or she makes about how the care plan will operate. Motivational interviewing can help the enrollee to remain engaged around the fundamental questions – *how do I want to live my life and what do I need to make that happen?* – and to view the care planning and coordination process as a dynamic means to a very desired end. This is the cornerstone of self-determination, which the CPC supports by helping the enrollee to focus on gains and to consider options for self-directed care.

5. SUPPORT FOR TRANSITIONS IN CARE

The transition in care process is often one of the most perilous for consumers in general, and exponentially more so for those with complex LTSS needs. Consequently, the NRLP LTSS CP will deliver a comprehensive care transitions protocol designed to ensure "safe passage" across care settings. Where transitions are planned, the CPC can provide supports to the enrollee in advance, preparing him or her for the process, clarifying procedures, and ensuring the enrollee knows about and can effectively access appropriate choices around care settings, services, and supports. The CPC can also help ensure that all appropriate staff at all transition points are fully informed about the enrollee's needs and preferences. However, some transitions are not planned or expected and,

in these cases, communications as well as care can become fragmented. Consequently, establishing communications policies with ACOs and MCOs, enrollee PCPs, relevant LTSS providers, and enrollees (and/or authorized representative, caregiver, family, etc.) and the NRLP CPC outlining procedures for notifications that the enrollee is in transition is a high priority.

To facilitate this process, all NRLP LTSS CP enrollees will be provided a "Passport to Health," which serves as the enrollee's advanced directive around health care emergencies and transitions, providing critical health and personal information and identifying important individuals who must be contacted in the event of an emergency. Enrollees keep their Passports with them, often in the accompanying magnetized holder so it adheres to the refrigerator, for example (copies will be on file with the CPC) and are asked to give the Passport to EMTs, ED personnel, or other staff at the transitions points.[8] This facilitates more comprehensive and responsive transition planning, especially when transitions are unplanned. The CPC will contact all appropriate staff related to the enrollee's change in care settings to provide information both about the enrollee as well as the community resources that will strengthen discharge planning and promote more appropriate transition.

a. A DESCRIPTION OF THE BIDDER'S PLAN FOR PROVIDING INFORMED CHOICES…

NRLP staff include trained Care Transitions Intervention™ (CTI) coaches who use motivational listening techniques in conjunction with the Four Pillars of transition established through Dr. Eric Coleman's Care Transitions Intervention™ Coaching method. The CPCs will be trained by the NRLPs certified coaches to implement these procedures:

- Meet the enrollee at the care setting from which he or she is transitioning to discuss the discharge plan, the changes the enrollee has experienced, what the enrollee can expect to happen in the near future and the choices he or she has about this, and concerns which the enrollee and/or family may have about the transition and its aftermath, etc.[9]
- The CPC participates, with the enrollee and/or appropriate designees, in the discharge planning process and helps ensure that all parties focus on the needs and preferences of the enrollee and that the enrollee has as much choice as possible in the care setting to which he or she is transitioning and in the services and supports received there.
- Meet the enrollee at the subsequent care setting (home, SNF, etc.) within 48-72 hours of his or her arrival there to assess the enrollee's status, review the care plan as appropriate, clarify choices available to the enrollee around services and supports, and work to ensure that these are in place. If the enrollee is agreeable, the CPC can begin the Four Pillar review:
  - Help ensure the enrollee has an appropriately scheduled PCP appointment and the logistics are in place to get him or her there comfortably
  - Work with the enrollee and/or designees to reconcile medications
  - Review "red flags" and situations wherein the enrollee should seek emergency help
  - Update the Passport's Personal Health Section and/or other Personal Health Records

[8] NRLP staff have, and will continue to, provide trainings to area EMTs and other medical personnel around the Passport. Several area SNFs have participated in distributing the Passport and the NRLP will expand this number. With over 500 distributed in the initial pilot, the Passports have been helpful for those needing emergency health care, according to preliminary follow-up survey results.

[9] Based on significant experience delivering CTI, the hospital visit is often problematic. NRLP hopes to reduce this barrier as a result of its partnership with the ACO/MCO, which should facilitate access to the enrollee at the appropriate times in the appropriate places.

to include relevant new information. Remind enrollee to take the Passport or other Personal Health Record to all health care visits and make sure the health care provider reviews it.

- Call the enrollee within three business days to assess progress and review care plan. Schedule another visit or phone call as appropriate to review Four Pillars. Schedule a follow-up call for after the PCP visit
- Make follow-up calls as scheduled. Continue weekly calls--and visits as appropriate--until enrollee is stable in new setting.

b. A DESCRIPTION OF STEPS BIDDER WILL TAKE TO ENSURE ENROLLEE'S STABILITY…

The CPC will remain in close contact as the enrollee transitions across care-settings, helping him or her to navigate the changes as effectively as possible by providing critical coaching supports, engaging the enrollee in reviewing and modulating the care plan as appropriate, and keeping him or her focused on moving forward and "sustaining the gains" wherever possible. Because the CPC is a skilled professional with significant expertise in working with populations who have complex LTSS needs in general and with the specific needs of the enrollee in particular, monitoring to ensure stability will include assessing for signs of depression and anxiety as well as other symptoms indicating concern. When these emerge, the CPC will alert the enrollee as appropriate and notify the Care Team. Swift intervention can make an enormous difference in the capacity to sustain transition stability, and the CPC will advocate for the appropriately quick and comprehensive response from the key Care Team members. The CPC will continue an ongoing monitoring.

As part of the transition process, the CPC will re-assess the enrollee relative to needs and preferences around LTSS services and community supports as well as flexible services and discuss how these can be added to or amended in the care plan.

6. HEALTH AND WELLNESS COACHING, INCLUDING BUT NOT LIMITED TO:

a. A DESCRIPTION OF HEALTH AND WELLNESS EDUCATION, COACHING AND HEALTH…

The NRLP offers great expertise around promoting and managing the health and wellness of the target population. Each member entity has an extensive health education capacity that includes highly skilled nurses and social workers who have long experience in delivering health and wellness programming, both as a separate function and as an integral part of overall LTSS direct services delivery. These staff (and curriculum resources) will be available for training and consultation as appropriate to support the CPCs in providing comprehensive education, coaching, and overall health promotion supports.

NRLP CPC will ensure enrollees receive the health and wellness coaching directed by his or her Care Team as specified in the Care Plan, including symptom management, recognition of "red flags" relative to potential negative changes in medical conditions (e.g., what to do when this occurs and when to call for emergency assistance), as well as meaningful and usable knowledge around general disease and injury prevention and chronic disease management. Prevention supports will include working with the enrollee and members of the Care Team as appropriate to reduce high risk behaviors and health risk factors such as inappropriate alcohol or substance use, medication non-compliance, over-eating, poor nutrition, non-compliance with safety measures, lack of exercise, smoking, inadequate sleep patterns, etc. The CPC will work with enrollee to set attainable health and wellness goals and will facilitate the enrollee's access--including resolving logistical barriers such as transportation--to the relevant health promotion activities to support goal attainment. All health and wellness activities, such as those identified below, will be documented in the enrollee's care plan:

- Support to attend specific smoking cessation and weight reduction programs/classes

- Support to attend Kiosk for Living Well sessions at both the permanently sited kiosks around the region and the "roving kiosks" that offer:
  - One-on-one coaching supports as well as a "very fun" interactive virtual technology platform (It's Never 2 Late) that explore health and wellness through a variety of entertaining games, memory exercises, cognitive and therapy programs that promote health engagement and can track progress
  - Health monitoring (by Nurses and CHWs) around hypertension reduction, management of diabetes and COPD and include BP and weight monitoring, individual counseling, group education session, and home visits as appropriate
  - Mobility counseling (by certified practitioners) to prevent falls, including falls risk assessments, balance and coordination exercises, group classes and exercise sessions, travel training, and home safety risk assessments as appropriate
  - Depression screening and mobile mental health counseling supports, as appropriate
  - Memory Cafes, to support both caregivers and care recipients
- Support to attend the Healthy Living Suite of evidence-based Health Self-Management classes available around falls prevention, chronic disease self-management, healthy eating and depression. The CPC will coordinate with the multiple providers of these sessions; maintain a calendar of offerings, and facilitate enrollee's participation in these classes
- Support to attend appropriate health fairs and health offerings, such as yoga
- Support to participate in new Initiatives, such as the Tablet Pilot which features stress and anxiety reduction applications on a large user-friendly tablet with direct communications capacities to mobile mental health staff

7. Connecting Enrollees to Social Services and Community Resources…

a. How the Bidder will evaluate social service needs…

As part of the care planning process, the CPC will complete a social services assessment with the enrollee that will foster a full discussion around the social services and community resources available to him or her and the logistics for successfully accessing these. Currently, the NRLP member entities use a variety of assessment tools as mandated by the various state oversight agencies as well as tools developed to capture additional information on the social determinants of health, including the Risk Assessment and Member Engagement Tools developed for *One Care*. The GLSS-MSO, in concert with subject matter experts from each organization, will consolidate these assessments into a uniform tool-set, following best practice formats such as that recommended by LTQA[10] which stresses clarity of concept and concreteness of measures around at least these key domains:

- Demographics (e.g., age, gender, marital status, language and cultural preferences, household composition) and Family Dynamics (composition, roles, supports)
- Personal interests and meaningful experiences
- Social goals, interests, activities and network (including sense of social inclusion; sense of social competence and confidence, nature of relationships, etc.) and Work-related interests and goals
- Socio-economic status (e.g., income, employment)
- Health status (e.g., health conditions and therapies, self-reported health, vision/hearing, use of medical care, use of prevention strategies, recent health care crises, etc.) and level of

[10] "The Need to Standardized Assessment", LTQA.com, last modified April 29, 2014, http://www.ltqa.org/wp-content/themes/ltqaMain/custom/images//LTQA-The-Need-to-Standardize-Assessment-Items-4-14-1.pdf.

interest in maintaining and/or improving health
- Cognition and communication (e.g., memory, speech)
- Medications (e.g., drug regimens, medication use, compliance with medication use)
- Functional status (e.g., ADLs and IADLs, mobility)
- Mental health (e.g., depression, anxiety, sleeplessness, problem behaviors, substance use)
- Nutrition (e.g., diet, height/weight, hydration, food preferences, eating habits)
- Environment (e.g., residential conditions, pets and appropriateness of animal therapy programs)

The screening tool will be coded to integrate with the NRLP Central Resource Database through the *SyntraNet* platform in order to produce the fullest array of resources in the appropriate communities that match assessment results. Based on the conversations that ensue from the assessment, the CPC and enrollee will review the social service and community resources that can be marshalled to meet the assessed needs and expressed preferences. For ACO enrollees, the assessment will identify the flexible services for which he or she is eligible that will best promote his or her health and well-being. The CPC will initiate re-assessments for social services, community resources, and flexible benefits whenever there is a change in the enrollee's status or circumstances. All assessment results and subsequent recommendations will be thoroughly documented as part of the enrollee's care plan. Once authorized, the CPC will assist with navigational supports around accessing services and resources, integrating them as appropriate, and resolving any logistical barriers that may emerge.

b. HOW THE BIDDER INTENDS TO ENSURE ONGOING CONNECTIONS TO COMMUNITY…

To ensure ongoing connections to the community, the CPCs will regularly check-in with enrollees to support sustaining the desired connections and help enrollees problem solve if necessary to remove barriers or disincentives to remaining engaged. For example, in some cases, adjustments in transportation, or in scheduling may be required to meet a changing enrollee circumstance. In others, enrollees may need and want support to navigate through a change in the support resource, such as an unavoidable change in staffing or routine. The CPC will also routinely check-in with the social service or community programs in which the enrollee participates for appropriate feedback on his or her experiences there and to assess whether adjustments can or should be made that would better meet the care plan goals.

D. INNOVATIVE TECHNOLOGIES (*NOT TO EXCEED 1 PAGE*)

The NRLP plans to institute several innovative technological capacities to maximize the impact of its Community Partnership in meeting EOHHS goals. This includes:

- The NRLP will offer a comprehensive communications and database system through *Thrasys/SyntraNet* that is interoperable with internal partners and interfaces with external partners through the Mass HIway. Featuring operational workflow and fiscal management capacities, the system also has important analytical capabilities that include:
  - Integrating claims data with socio-demographic and social determinant indicators to develop risk models that can effectively target interventions and preclude events that undermine health and wellness. This has great potential for reducing both health crises and care costs.
  - Providing ongoing QI measures around NRLP performance relative to quality domains outlined in Appendix C of the RFR, to risk reduction measures, and to the annual QI projects as described in 7.5 I.
  - Providing a centralized database of area-wide LTSS providers, social service providers and other community resources that includes appropriate performance measures.
- The NRLP will explore deploying GLSS' existing mobility management capacities to centralize transportation through its current transportation technology to coordinate trips and vehicles among partner agencies for enrollees in the NRLP CP. The NRLP will also use existing Shore-Tel technologies to operate an after-hours Call Center.
- The NRLP will pilot expansion of a dementia-focused caregiver app developed by GLSS. The App, which uses the smartphone or android mobile phone platforms, focuses on stress reduction, helpful tips, facilitating quick communications, and can be redesigned for a broader caregiver population.
- The NRLP has also been in discussion with SeniorLink around use of its VELA Caregiver Communications app and is proposing a small pilot to determine if the VELA App -- which has had great success in facilitating communications, reducing stress, and optimally supporting caregivers in Adult Family Care programs serving older adults--will work equally well for caregivers of younger populations with potentially more complex LTSS needs.
- The NRLP will also promote the Kiosk for Living Well Tablet pilot which provides a tablet featuring evidence-based depression and anxiety reduction apps to appropriate consumers working with mental health counselors. The Tablet reduces "middle of the night" crises by providing consumers with individually-tailored apps to break escalation cycles. The Tablet offers a "click to request a Counselor call-back in the AM" button and can be configured to connect with emergency personnel at any time.
- The NRLP will leverage the success of the *Kiosk for Living Well* in additional sites across the North Region. Kiosks feature personal health monitoring and education supports, as described in 7.5.C.6, as well as a comprehensive library of *eTools for Health* encompassing short health engagement videos, on a broad range of chronic disease issues, related games, quizzes and activities, tip sheets and so forth which, developed by GLSS, reside on the iN2L virtual technology platforms at each Kiosk under the "GLSS BUTTON" portal on the user screen. *eTools,* moreover, can be transferred to a variety of technology platforms. New programming, reflecting the subject matter expertise of NRLP members, will be developed to meet specific needs of enrollee populations. The NRLP will explore transferring the *eTools for Health* to tablets and smartphones, including the GLSS and VELA Caregiver Apps.

E. Personnel and Staffing (*NOT TO EXCEED 5 PAGES EXCLUDING ATTACHMENTS*)

1. Organizational Chart Attachment that Provides Personnel, Senior Managers …

PLEASE SEE CHART ATTACHED AT END OF SECTION 7.5.E

2. A Sample Staffing Model for the Number of Engaged Enrollees in Each Service Area…

The NRLP LTSS CP has developed a staffing model that reflects these assumptions: 1) the NRLP will: serve 53% of eligible enrollees as described in Table 4 below; 2) maintain an overall ratio of 80% engaged enrollees relative to assigned enrollees; and 3) will, to its fullest capacity, increase the numbers of assigned and engaged enrollees in accordance with EOHHS needs and requests.

The NRLP LTSS CP will operate, at least initially, from well-appointed facilities in three separate locations currently controlled by NRLP members in Beverly, Lynn, and Lowell. However, should the volume of assigned enrollees require additional or different logistics, the NRLP will explore expanding to additional sites held by the members in other areas of the Northern region.

Table 4: Estimated Annualized Enrollees by Service Areas

Region	Service Area	Annualized Members	NRLP Estimated Assigned Enrollees	NRLP Estimated Engaged Enrollees
NORTHERN	Beverly	120	114	91
NORTHERN	Gloucester	133	126	101
NORTHERN	Haverhill	374	94	75
NORTHERN	Lawrence	1,377	551	441
NORTHERN	Lowell	1,062	531	425
NORTHERN	Lynn	528	502	402
NORTHERN	Malden	370	93	74
NORTHERN	Salem	325	309	247
NORTHERN	Woburn	178	45	36
Total		**4,467**	**2,365**	**1,892**

The GLSS-MSO, which will provide the administrative support and operational oversight for the LTSS CP functions, will be located in Lynn and will communicate regularly with staff at other sites as appropriate through scheduled weekly contacts including teleconference, skype, and in-person meetings as appropriate. **Table 5** below provides a brief overview of the proposed GLSS-MSO staffing model.

Through the GNS LINK, the NRLP will lease **LTSS CP Coordinators (CPC)**, **LTSS CPC Supervisors**, as well as **Subject Matter Experts** from its member entities. The NRLP anticipates hiring 20 LTSS CPCs, each of whom will manage a caseload of a maximum of 93 enrollees. The LTSS CPCs will be supervised by 3 LTSS CPC Supervisors, each of whom will carry a caseload of 15 enrollees and will supervise 6-7 LTSS CPCs. Although adjustments will reflect actual volume, the initial plan will site one LTSS CPC Supervisor and a minimum of 5 LTSS CPCs in Beverly, Lynn, and Lowell. The NRLP staff model also assumes 5-7 Subject Matter Experts are identified and available to provide expertise around each population focus group and community contexts as needed, averaging a total of approximately 4 hours per week.

Table 5: GLSS-MSO Staffing Model		
Role	**FTE**	**Brief Role Synopsis**
GLSS-MSO Director	0.1	To supervise overall functioning of the MSO, ensuring that operational strategies optimally meet all NRLP LTSS CP goals and objectives; to serve as primary liaison between MSO and NRLP Executive Committee
Chief Operating Officer	0.15	To coordinate the multiple facets of the MSO operations on a day-to-day basis to ensure effective process and outcome
Director of Care Coordination (Health Care Transformation)	0.1	To provide the clinical management necessary across LTSS CP supports that deliver better health care and health outcomes and lower costs
LTSS CPC Coordinator	1	To serve as overall "ombudsman" in supporting the delivery of consistent and quality LTSS Coordination by facilitating communication, resource flows, technical assistance, training, data gathering and reporting, etc. across sites as appropriate; to oversee the Call Center; to support the Consumer Advisory Board
LTSS CP Trainer	0.13	To work with the LTSS CP Coordinator and the Subject Matter expert in the design and delivery of appropriate training modules
QM Director	0.06	To design and oversee implementation of a comprehensive QA and QI plan; to supervise Analytics and Evaluation Staff
Analytics and Evaluation Staff	1.25	To collect and analyze data to support both QA and QI recommendations; to provide predictive analytics and risk models
Compliance Officer	0.03	To ensure all LTSS CP functions meet EOHHS regulatory and policy requirements
IT Director	0.03	To ensure the seamless functioning of IT systems to their necessary capacities
Fiscal Director	0.03	To ensure quality fiscal management for all aspects of the NRLP LTSS CP
Call Center Staff	1	To support the LTSS CP after-hours I&R/reminder calls; to ensure an up-to-date and accurate Community Resource Database
Admin Support Staff	1.25	To provide the administrative support required to deliver on all functions, including regular reporting
Marketing	0.1	To design and implement appropriate outreach and marketing campaigns/collateral for the LTSS CP

3. A Descriptions of the Bidder's Recruitment Plans…

All proposed positions in the GLSS-MSO are currently filled. NRLP recruitment will focus on LTSS CPCs and LTSS CPC Supervisors. As identified in the **attached job descriptions**, requirements for these positions will meet or exceed those described in the Model Contract. Recruitment efforts will include: postings placed within NRLP member agencies; through GNS LINK partner networks, ACO/MCO partner systems, as well as appropriate regional and statewide coalitions and advocacy groups; at area colleges and universities; and in professional journals as well as local and social media. Postings will be available in fully accessible formats, will clearly delineate job functions and requirements, and include a preference for the bilingual, bicultural capacities that reflect the specific contexts of the communities where the CPCs or Supervisors will work. Numbers and types of staff will be recruited in accordance with projected enrollee volume, which will be carefully calibrated based on information from EOHHS and ACO/MCO partners relative to rates of assigned enrollee referrals.

Table 6. LTSS CPC and Supervisor Recruitment Based on Projected Enrollees

Month	Expected No. of Enrollees	Number of LTSS CPS in Place	Number of LTSS CPC Supervisors in Place	Staff Capacity
1	158	4	1	375
2	315	6	1	555
3	473	6	1	555
4	631	8	2	758
5	788	10	2	940
6	946	12	2	1134
7	1104	14	3	1333
8	1261	16	3	1517
9	1419	18	3	1701
10	1577	19	3	1793
11	1734	20	3	1892
12	1892	20	3	1892

Based on these projections, adjusted to reflect appropriate trends, the NRLP will develop a reasonable "ramp-up" plan that assumes the risk of proactively recruiting, hiring, and training sufficient staff to provide the full range of quality Coordination supports for all expected assigned and engaged enrollees. Table 6 provides a snapshot of current projections and assumes recruitment will begin in January 2018 to begin operations in June 2018 with the targeted number of properly trained staff.

NRLP hiring practices will conform with all contractor employment requirements specified in the Model Contract, including conducting pre-employment CORI checks as well as screening new employees upon hiring and every month thereafter using the US Office of Inspector General's List of Excluded Individuals and Entities relative to participation in federal health care programs. All new hires will be required to participate in a comprehensive training program as described below.

4. A DESCRIPTION OF HOW BIDDER WILL RECRUIT CULTURAL AND LINGUISTIC MINORITIES…

To create a workforce that is fully reflective of the communities which the LTSS CP will serve, the NRLP will establish a multi-level diversity strategy. First, it will convene a Diversity Task Force, comprised of internal staff as well as key external advisors from identified target groups who will: 1) promote extensive diversity networking through local, regional, and statewide cultural associations, community groups, as well as informal connections; professional associations representing diverse groups, and online social media; 2) review and advise on recruiting tools and outreach efforts to ensure resonance with diverse communities; 3) conduct appropriate cultural competence assessments across the NRLP; 4) work with the GLSS-MSO and NRLP member HR Departments to develop and implement resulting recommendations from the assessment to ensure all aspects of the NRLP workplace are appropriately welcoming and supportive to cultural and linguistic minorities; and 5) participate in screening and interviews with the hiring managers as appropriate. Second, the NRLP will work to establish "pipelines" to attract cultural and linguistic minorities by: sustaining and broadening existing relationships with academic and professional groups to develop appropriate internships and externships as well as offer presentations to students or members around opportunities which the NRLP can offer. Third, the NRLP will establish diversity hiring and retention goals, track progress towards those goals, and regularly share these efforts with both internal and external audiences.

5. A Description of How the Bidder will Ensure all Staff Meet competencies…

The NRLP will seek to hire LTSS CP staff who have the experience, expertise, and work ethic to commit to continuously learning, integrating and demonstrating best practices in performance. Towards that end, all new staff will receive comprehensive orientation and training upon hire, annual refresher courses, and additional trainings on new topics as appropriate. Training will include learning modules on:

- Cultural competency
- Disability Awareness
- Accessibility and accommodations
- Independent Living and Recovery Principles
- Motivational Interviewing
- Person-centered planning (for CPCs and Supervisors, using EOHHS-approved curriculum)
- Understanding needs and patterns within the 6 targeted LTSS population groups (for CPCs and Supervisors)
- Principles of Care Transitions (for CPCs and Supervisors)
- MassHealth State Plan LTSS and eligibility criteria (for CPCs and Supervisors, using EOHHS-approved curriculum)
- Health and Wellness principles
- Chronic disease management, red flags, and co-morbidities (for CPCs and Supervisors)
- Using the centralized resource inventory effectively and keeping it dynamic and updated
- Strategies for finding and accessing community resources (for CPCs and Supervisors)
- Mobility Management (for CPCs and Supervisors)
- NRLP mitigation strategies to resolve potential conflicts of interest, including those identified in Section 2.4D of the model contract, which emphasize transparency and disclosure, information and choice, and careful documentation
- Effectively using EHRs and related communication and technology systems, including *SyntraNet*, and its report generation capacities
- Exploring and effectively using outcome and predictive analytics
- Compliance requirements
- Safety requirements and techniques

Learning modules will be presented in multiple formats as appropriate, including in-person group trainings, webinars, and on-line modules. All formats will include opportunities for interaction and feedback as well as assessments to reflect mastery of material. The NRLP will provide training materials to EOHHS as EOHHS prefers and requests and will utilize pre- and post-evaluation as well as other feedback techniques to determine the impact of different modules and different formats relative to achieving learning objectives. The multi-modal learning approach allows for greater flexibility in timing as well as greater capacity to address diverse learning styles. To ensure that the NRLP staff are trained and prepared by the start date, new staff will begin training at least one month prior to full operations launch and will have successfully completed all relevant assessments. After this initial period, NRLP anticipates that CPC staff will complete

necessary pre-employment training within two-weeks prior to independently delivering (or supervising) coordination supports. New CPC staff will shadow existing CPCs during this period as part of their training. Additional and ongoing trainings will be scheduled as appropriate for all staff both as "refreshers" on a regular basis and to introduce new best practice techniques or policy changes as these may emerge.

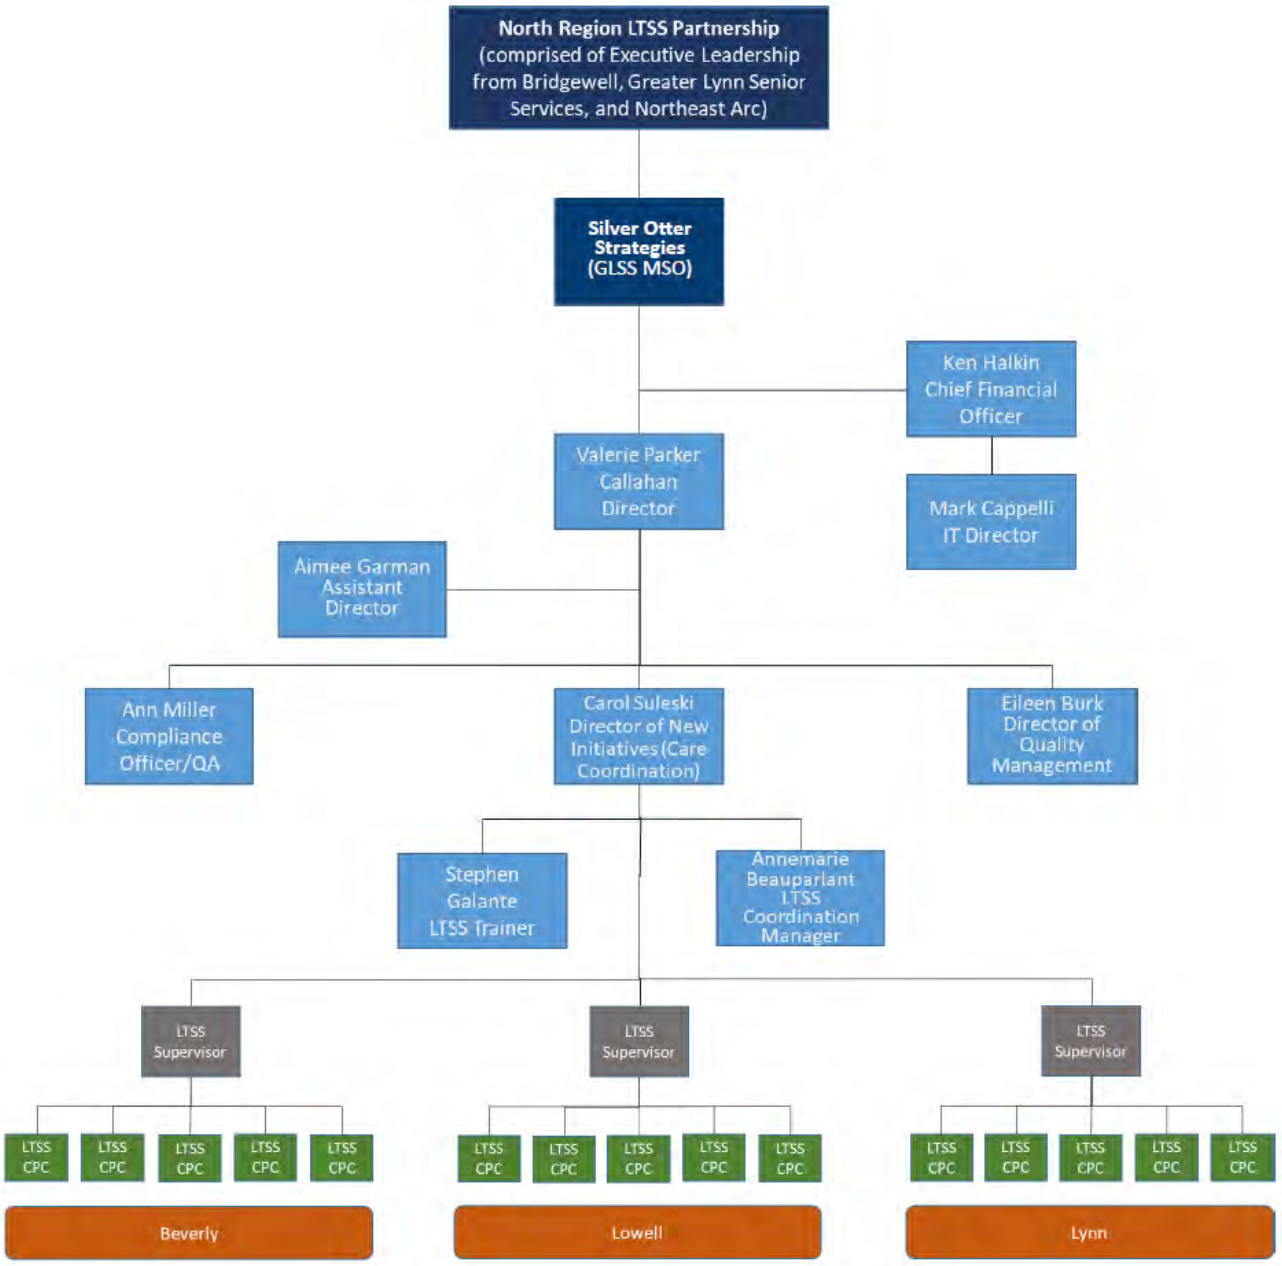
In addition, NRLP staff will participate in the periodic trainings conducted or sponsored by EOHHS that cover various aspects of MassHealth payment reform including Accountable Care Organization and/or Community Partners initiatives, as stated in the Model Contract.

6. A DESCRIPTION OF BIDDER'S STAFF RETENTION STRATEGY

Retention of competent and committed staff is a high NRLP priority. Towards that end, the NRLP seeks to promote a collaborative, supportive and learning-focused environment that encourages and rewards professional growth and performance excellence. To do this, the NRLP focuses on these elements:

- **Clarity of Role:** ensuring that staff understand their role and both its limits and opportunities for innovation. This means correctly identifying the different roles that staff and stakeholders play within the broader context of the NRLP CP and its constituent members, as well as within the context of in the ACO/MCO-BH-LTSS CP partnership and the different communities which the NRLP serves.
- **Appropriate Support:** ensuring that staff are always comfortable asking for assistance or clarification and that they receive clear and meaningful answers. This includes regular check-ins with all staff, eliciting and thoughtfully reviewing feedback and suggestions, and developing a "mentoring" capacity so that staff can connect with "coaches" around specific issues as appropriate.
- **Stress Reduction Activities:** providing NRLP-sponsored activities such as regular yoga, exercise or tai chi classes, periodic "fun" events (e.g. potluck lunches), walking clubs, scavenger hunts, trivia contests, etc. that will engage staff across all NRLP sites
- **Recognizing Achievement:** designing opportunities – based on staff input and preferences – to recognize achievement that "goes above and beyond" on a regular basis which staff find rewarding.
- **Developing a Career Ladder:** developing opportunities within the NRLP for professional growth, including providing or arranging for staff to attend appropriate trainings to build capacities, creating new staff positions as appropriate, etc., and seeking to maintain a competitive pay structure.
- **Emphasize Learning and Best Practice:** emphasize the NRLP's commitment to maintaining a culture of learning and best practice that permeates throughout the Partnership. The NRLP will ensure staff have ample incentive and capacity to pursue regular training opportunities both within the NRLP and through other professional webinars, workshops, and conferences. Staff will be aware of QM and QI findings and encouraged to participate in innovating around improvements.

North Region LTSS Partnership Staffing Model



* Number of LTSS CPCs at each site to vary according to staffing needs/consumer volumes.

F. Implementation Plan and Timeline

PLEASE REFER TO THE REVISED PBP TIME LINE BELOW TO SUPERSEDE THE ORIGINAL ON THE FOLLOWING PAGE

Implementation Tasks	Jan	Feb	Mar	Apr	May
Establish Executive Committee based on GLSS-Affiliated Partner MOU	■				
Hold and properly document monthly Exec Committee Meetings		■	■	■	■
Establish QM Committee, Outreach and Diversity Task Forces with written protocols and clear roles, responsibilities and reporting functions	■	■			
Hold monthly meetings		■	■	■	■
Coordinate HR, Fiscal, etc. Departments across NRLP member entities to design uniform/unified policies and protocols around key NRLP functions	■	■	■	■	■
Develop formal NRLP policies in accordance with Model Contract to include Enrollee Grievance and Rights, Conflict of Interest, Diversity, Compliance, Safety, Etc.	■	■	■	■	■
Design policies, procedures, and systems for coordinating LTSSCs and LTSSC Supervisors across sites and secure approvals to implement		■	■	■	
Install Syntranet and ensure appropriate interface with member communications/data systems	■	■	■	■	■
Develop data sharing support capacities with ACO/MCO partners			■	■	■
Train appropriate staff on new technologies			■	■	■
Design and implement change management campaign to develop uniform LTSS CP culture and approach across different sites and partner entities	■	■	■	■	■
Develop staff orientation and training modules in multiple formats with appropriate assessments; bring in SMEs as appropriate	■	■	■		
Recruit and hire staff (LTSSCs, LTSSC Supervisor, Call Center staff)				■	■
Train both new and existing staff taking on new duties			■	■	■
Conduct outreach to potential ACO/MCO partners	■	■	■	■	■
Develop and finalize MoUs with ACO/MCO partners that clarify roles and procedures	■	■	■		
Explore opportunities to embed NRLP staff at ACO sites as appropriate as part of MOUs				■	■
Initialize Call Center; develop protocols, assign and train Call Center Staff			■	■	■
Build community resource inventories for North Region communities				■	■
Design comprehensive QA/QI plan for NRLP with clear metrics			■	■	■
Design compliance assessment framework			■	■	
Design predictive analytics and reporting framework (using Syntranet)			■	■	■
Design LTSS CP marketing strategies and collateral				■	■
Define, build, activate networks for outreach		■	■	■	■
Prepare facilities in 3 sites for LTSS operations as needed	■	■	■	■	■
Conduct extensive outreach and networking around NRLP throughout service area			■	■	■
Begin development of Consumer Advisory Board, including protocols and member roles, etc.				■	■
Begin plans around launching Kiosks and Mobility Links as part of NRLP				■	■
Provide EOHHS with proof of readiness (as required)	■	■	■	■	■

PLEASE DISREGARD THIS ORIGINAL PBP TIMELINE BELOW AND SEE PRIOR PAGE												
Implementation Tasks	De	Ja	Feb	Mar	Apr	May						
Governance and Administration												
Establish Executive Committee Meeting and Decision-making Protocols												
Hold Monthly Executive Committee Meetings												
Establish NRLP Committees, including Diversity Task Force, Quality Management Committee												
Hold regular (at least monthly) Committee Meetings												
Coordinate HR, Fiscal, etc. Departments across Member entities to create Uniform procedures. Design Workflows												
Develop formal LTSS CP policies in accordance with Model Contract to include Enrollee Grievance and Rights, Conflict of Interest, Diversity, Compliance, Safety, etc.												
Design policies, procedures and systems for coordinating LTSS CPs and Supervisors across sites; secure approvals to implement												
Install SyntraNet and ensure appropriate inter-face with member communication systems and support data sharing with all ACO/MCO partners												
Train appropriate staff on new technologies												
Conduct change management campaign												
Develop staff orientation and training modules in multiple formats with assessments. Bring in SMEs												
Recruit and hire staff												
Train staff												
Conduct outreach to potential ACO/MCO partners												
Develop and finalize MoUs with ACO/MCO partners that clarify roles and procedures												
Initialize Call Center and Protocols; assign Call Center Staff												
Build Community Resource Inventories												
Design QA/QI plan												
Design Compliance Assessment Framework												
Design Predictive Analytics and Reporting Frameworks												
Design LTSS CP marketing strategies and collateral												
Prepare facilities for LTSS CP operations as appropriate												
Conduct extensive outreach and networking around LTSS CP throughout all service areas; Begin CAB development												
Provide EOHHS with proof of readiness												

Budget Period 1												
Implementation Tasks	Jan	Feb	Ma	Apr	Ma	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Accept assigned enrollees												
Conduct Outreach to connect with enrollees; explain program, benefits, rights, options, etc.												
Deliver all LTSS CP coordination supports to assigned enrollees according to principles of person-centered planning and promoting optimal choice; Develop flexible service plans where appropriate												
Acquire authorization for LTSS Service plan												
Provide documentation; utilize data sharing systems, etc. to capture all information appropriately												
Advocate for enrollee as appropriate												
Convene/facilitate CAB meetings and integrate with CP ops												
Conduct regular LTSS CPC supervision with CPCs												
Follow-up with enrollees as appropriate												
Recruit and Hire Additional LTSS CP Staff as needed												
Deliver staff trainings as appropriate												
Provide QA and Analytic Reports												
Assess and adjust workflows as appropriate												
Hold monthly Exec Committee Meetings												
Hold regular QM Committee meetings												
Task Forces and Special Committees meet with Exec Committee at least quarterly												
Provide ongoing presentations about LTSS CP at network meetings throughout region												
Hold NRLP-wide LTSS CPCs and Supervisor meetings w/LTSS Coordinator at least monthly												
Deliver reports to EOHHS as requested												
Conduct Call Center Operations												
Meet with ACO/MCO partners												
Provide risk scores and predictive analytics to ACO/MCO partners and EOHHS using claims data, social determinant of health inventories, and social service assessment data.												
Design and implement effective mobility management strategies as needed and appropriate												
Annually assess and adjust impact of Change Management and Diversity Campaigns												
Implement special annual QI Initiative(s); review findings; make appropriate adjustments												
Conduct all appropriate fiscal management tasks												
Set up additional Kiosk for Living Well Sites and widen potential Tablet pilot to include appropriate enrollees												
Explore expansion of caregiver app and expansion of "eTools for Health" project to other platforms												
Identify impact of predictive analytics on effectiveness of ACO/MCO and LTSS CP interventions												
Prepare an Annual LTSS CP report												

Budget Period 2-5

G. Budget Report and Budget Narrative

Attachment B has been completed in an Excel format and is placed in the document as an attachment in the hard copy and as a separate file attachment in the electronic version.

Please see Attachment C following this page.

H. SUSTAINABILITY (*NOT TO EXCEED 2 PAGES*)

The NRLP's DSRIP investment plan is designed to ensure that our Community Partnership develops the structure and capacity to realize and fully sustain the transformational mission required to deliver *Community First* supports to populations with complex LTSS needs in ways that promote the principles of the MassHealth reform. The NRLP intends to substantively improve health outcomes while reducing health care costs of its consumers, while also promoting community livability and inclusion for all. In this way, we anticipate the NRLP can become a national model, ultimately attracting diverse payors, delivering technical assistance and training around the NRLP model and the innovations that support it. Therefore, by the end of the 5-year Demonstration Program, the NRLP expects DSRIP investment in the key elements described below will continue to maximize impact well beyond the contract term:

***The CPC Model and Training Institute*:** The NRLP is creating a unique CPC model, integrating subject matter expertise from the long-term experiences of its members into a highly skilled, flexible and responsive coaching/coordinator role with strengthened capacities to: deliver person-centered and person-driven supports to a diverse population with complex LTSS needs; communicate clearly and effectively across multiple social, community, and health care sectors and develop sustained collaborations; assess and appropriately marshal LTSS resources according to both clearly documented performance standards and principles of conflict-free case management; effectively manage databases and support data-driven discovery around best practices, and ensure the *Community First* and *Independent Living* paradigms remain the governing precepts in the delivery of health and community supports.

Embedded CPC Liaison. To strengthen critical clinical-community linkages, the NRLP will seek to embed selected CPCs for a portion of their time each week at relevant ACO clinical sites to facilitate referrals, communication flow, and greater care integration in general. Embedding ensures the CPC Liaison becomes a natural and meaningful member of the Care team who, by virtue of sustained interactions, becomes more aware of clinical processes, has more opportunity to provide important perspective and information, and can then better coordinate the community connections for enrollees.

The SyntraNet Platform. The NRLP will implement the *Thrasys/SyntraNet* communications and database platform that will effectively interface with the database systems of each NRLP partner and create a single, unified LTSS CP EHR, effectively connect with ACO/MCO partners and EOHHS; offer an expansive case management software capacity with integrated communications across multiple sites; provide comprehensive analyses incorporating disparate databases; develop predictive analytics based on claims data, assessment data, and social determinants of health data that can significantly strengthen clinical-community linkages, target resources more effectively, and lower health care costs; and create user-friendly area-wide resource inventories.

Community Resource Inventory. The NRLP will design and develop a community resource inventory powered by *SyntraNet,* that captures critical information about LTSS, social service, and other community providers that will be indexed by resource type, location, eligibility criteria, performance ratings (including consumer feedback and NRLP interaction experiences), auxiliary supports provided (e.g., transportation), etc. The Inventory for the Northern Region will be completed in stages and will be updated on a regular basis as a dynamic, interactive tool with at least annual reviews to ensure information is current. Used by all CPC staff, the Inventory will be updated by the NRLP's Call Center operators.

NRLP CP Call Center. The NRLP intends to create an after-hours Call Center capacity to

provide basic information and referral about the LTSS CP, triage inquiries as applicable including to designated on-call NRLP CP staff, connect with enrollees as appropriate to provide reminders around appointments, ensure logistics are in order (and other check-ins), and work on developing the Community Resource Inventory. An after-hours capacity using GLSS existing *Shoretel* call center technology will facilitate better communications with enrollees and their caregivers who may wish support after the LTSS CP is officially closed for the day. Call Center operators will not be clinicians, but will be trained to recognize when callers need immediate assistance and to follow clear protocols connecting them with appropriate supports in those instances. In all other cases where basic NRLP CP information is not sufficient, the Call Center will forward messages to the CPCs who will return the call at the start of the next business day.

Mobility Management. The NRLP will seek to integrate its current Transportation Call Center capacities within the NRLP to better coordinate member transportation programs and vehicles to create efficiencies. The NRLP plans to offer mobility counseling to enrollees (available at the Kiosk for Living Well sites and by appointment elsewhere) which includes falls risk assessments, falls prevention, balance and coordination exercises, home safety assessments, travel training, and trip planning.

E*xpansion of the Kiosk for Living Well.* The NRLP will seek to leverage the powerful capacity of the Kiosks for Living Well by expanding its locations and programming to support a broader population with more complex LTSS needs. A particular focus will be development of additional applications for the iN2L virtual platform that address the needs of younger consumers living with a wider range of disabilities. While this capacity will initially be available through the iN2L stations, it will ultimately be transferrable to tablets and potentially smartphones, etc.

Expansion of the Kiosk for Living Well Tablet Pilot. The NRLP will explore expansion of its existing tablet pilot, which offers consumers struggling with anxiety and depression a user-friendly tablet loaded only with evidence-based applications to reduce anxiety and depression symptoms. Designed to support consumers through overnight crises and avoid preventable emergencies during this time, the tablet includes the capacity to connect with appropriate staff as needed.

Caregiver Apps. The NRLP will also explore expanding the GLSS Caregiver smartphone/Android App (*Caregivers Matter by GLSS)*, currently designed for caregivers of care recipients with dementia, to meet the needs of a broader caregiver population. It will also actively explore a partnership with SeniorLink to pilot their VELA caregiver smartphone applications for a targeted group of enrollee caregivers.

Discovery. The NRLP will generate substantive reports on its various innovations, identifying most promising practices, and providing empirical evidence around impact. Based on this effort, we will then seek to partner with professional/academic evaluation teams (as we are currently doing with Boston University for the Kiosks for Living Well) to deliver more in-depth analyses.

I. QUALITY MANAGEMENT (*NOT TO EXCEED 3 PAGES*)

1. A DESCRIPTION OF THE BIDDER'S QUALITY IMPROVEMENT PROGRAM

The NRLP QM framework will fully embrace the three core elements of quality assurance:

Discovery: gathering the data and information that reflects consumer experiences relative to key variables such as choice, self-determination, satisfaction, and health and well-being outcomes. The discovery process helps identify how well programs are working, where they are strong, and where there are opportunities for improvement. Discovery elements include:

- Documentation reviews and ensuring documentation data is appropriately correlated to identify patterns of service need, delivery, outcomes, and consumer satisfaction
- Consumer surveys, focus groups
- Staff/Consumer/Provider Complaint/Compliment log
- Direct observations (staff, supervisors, etc. through journal notes and interviews)
- Integration of multiple data sources to clarify outcome relationships
- Effective capture, organization, and correlation of assessment data, claims data, and relevant health status data

Remediation: developing the correctives to program implementation that addresses barriers to goal achievement and/or to compliance with quality standards. Remediation elements may include:

- Increased supervision and corrective action plans
- Increased training
- Changes in staffing patterns
- Changes in supervision structure
- Changes in staff and/or department routines and responsibilities
- Changes to program processes
- Changes in quality management procedures
- Changes in program implementation or contracting agreements

Continuous Improvement: using and disseminating data and information that is ongoing and continually updated to strengthen both process and outcomes. Information from both Discovery and Remediation phases should be used to create more effective staff routines and stronger consumer outcomes. Key aspects of continuous improvement efforts include:

- Greater focus on quality assurance procedures and their relationships to outcomes
- Sustaining a management culture that encourages continuous improvement through an annual review process
- Staff training to ensure uniform practices, increased competencies and adherence to protocols and procedures
- Participation in regional collaborations around QA issues to identify best practice approaches

The NRLP will use the *SyntraNet* platform (described above) to capture and integrate disparate data sources to measure CP performance. This will include the slate of Quality Measures outlined in Appendix C[11], will also include the constituent indicators that will identify NRLP progress in the key areas of Prevention and Wellness, Member Experience, Integration, Avoidable Utilization and

[11] NRLP will provide EOHHS with data for each quality measure as requested, including medical data as appropriate, and in the form and format requested by EOHHS.

Engagement. Consequently, QI efforts will include a focus on improving the rates with which enrollees make wellness and annual primary and dental care visits, are appropriately screened for social services and use of flexible services, experience a reduction in all-cause 30 day readmissions and preventable ER visits, have a documented and approved care plan within 90 days of assignment to the NRLP and complete the care plan. QI efforts will also focus on improving member experience working with the NRLP LTSS CP relative to service delivery, health and wellness, choice, and quality of care, based on information received from the EOHHS. As part of its annual update process and with approval from EOHHS, the NRLP will also ask enrollees for feedback on these elements.

SyntraNet will also allow the NRLP to develop predictive analytics based on claims data and appropriate social determinant of health (SDOH) data gleaned through the NRLP's social services screening tool set. To ensure that SDOH data is most meaningful, the NRLP Quality Task Force will work with its ACO partners to clarify meanings and establish clear definitions for SDOH indicators. The ensuing predictive analytics will allow the NRLP CPs to provide critical information to the Care Team about specific enrollee risks including the likelihood of preventable events and the strategies that can best prevent them, including targeting interventions and resources more precisely. The data will also help the NRLP focus on harnessing its capacities to reduce risk areas and measure the effectiveness therein over time.

2. A Description of at least one Quality Initiative the Bidder Proposes to Undertake…

The GLSS-MSO QM Director will ensure the delivery of an annual QA report for approval by the Quality Management and Executive Committees and submitted to EOHHS. The plan will include QI initiatives around one or more of the following each year: consumer quality of life, chronic disease management, caregiver stress, community tenure, isolation and social connectedness, care coordination and care transitions. In its first year, the NRLP will conduct a quality improvement initiative designed to reduce caregiver stress as measured by changes in these indicators:

- caregiver's self-reported levels of stress
- caregiver's self-reported levels of health and wellness
- caregiver's assessment of the quality of interactions with care recipient
- caregiver's assessment of the quality of interactions with NRLP CP and LTSS providers
- caregiver's assessment of care recipient's life quality, well-being, engagement
- caregiver's degree of social interactions and sense of belonging/inclusion in the community
- caregiver's assessment of his/her navigational capacity around identifying and securing resources
- caregiver's willingness and ability to follow and complete a care plan
- caregiver's overall assessment of confidence, competence, and support around caregiving

Data will be gathered at time of enrollment and 9-10 months after participation in NRLP has begun. As part of the "post-intervention" survey and/or interview, caregivers will be asked to rate the impact of the following on their stress level assessments:

- The overall impact of the care plan
- The level of ease in implementing the care plan
- The level and impact of the Coordinator's knowledge and skills in responding to questions, issues, etc. and the timeliness of the response
- Use and assessment of the "after-hours" Call Center for information and faster response
- The degree of ease of access to the Coordinator and timeliness of responses, etc.

- The impact of an After-Hours Call Center on making connections and relieving stress
- The impact of the technology connections offered them (where relevant)– through the Kiosks for Living Well/Memory Cafes, Tablet, or Caregiver Apps[12]
- The impact of caregiving support groups (where relevant)

To facilitate overall quality improvement, the NRLP will also institute and design appropriate assessments of the impact of these programmatic initiatives during Year One:

- Implementation of consolidated electronic health record database that accurately, completely and efficiently captures relevant information from NRLP members and supports robust reporting of critical and clearly defined quality outcomes indicators that address quality of life, chronic disease management, caregiver stress, community tenure, social connectedness, care coordination and care transitions as well as the specific slate of measures identified in Appendix C of the RFR.
- Integration of methodologies for collecting data and reporting on results to provide consistent and accurate reporting from the entire NRLP, ensuring a focus on the impact of care coordination.
- Developing meaningful and measurable targets for key indicators related to health and wellness in concert with ACO/MCO partners (quality of life, social connectedness, social determinants of heath) and institute methodologies to achieve targets.

3. The Functions of the Bidder's Quality Management Committee

The Executive Committee will authorize a Quality Management (QM) Committee comprised of appropriate senior level professionals from each member organization who will work closely with the GLSS-MSO QM Director and QM staff. The Executive Committee will maintain oversight of QM operations through at least quarterly meetings with the QM Committee (which will include the MSO-QM Director) and QM reports will be included at all regular Executive Committee meetings. The QM Committee will meet at least monthly to review the status of each QM initiative; track progress against key indicator targets; discuss causes, trends and patterns which the data collected demonstrate, and identify quality concerns as they arise. These discussions may prompt the development of an ad-hoc committee to address any issues as needed. Action items will be addressed by the appropriate operations staff and closely monitored by the QM team who will provide updates about such action items at subsequent QM and Executive Committee meetings. The Executive Committee will receive a thorough annual review of all QM/QI initiatives from the QM Director, as approved by the QM Committee.

[12] Dissemination of technology options will be preceded by appropriate PDSA cycles and subsequent carefully constructed pilots.

J. COORDINATION WITH ACOS AND MCOS (*NOT TO EXCEED 2 PAGES*)

1. HOW BIDDER WILL COMMUNICATE BIDDER'S SKILLS, EXPERTISE, VALUE TO POTENTIAL ACOS/MCOS

The NRLP intends to communicate its skills, expertise, and value to potential ACOs/MCOs through multiple mechanisms that include: initial face-to-face meetings with appropriate staff to introduce the NRLP, its strengths and experience, its capacity to effectively manage community connections in support of the MassHealth reform mission, and its capability to deliver critical and predictive analytics that will ultimately reduce ACO costs and improve health care quality and health outcomes. The NRLP will discuss its experience in strengthening clinical-community linkages and facilitating patient access to care, finding at-risk patients and supporting appropriate connections to primary care, providing effective health monitoring and follow-ups for vulnerable patients and communicating appropriate information to clinical staff. The initial discussion will also include an overview of experience with LTSS Coordination, including *One Care*, and the ongoing outcomes evidence collected demonstrating the value of the proposed NRLP LTSS Coordination model. In this discussion, NRLP members will identify the scope of their presence and impact across the Northern region and provide examples of the unique assets they offer and how these can be tailored to meet specific ACO/MCO needs. The proposed technology innovations, as discussed in 7.5D, will be presented. The NRLP will leave the ACO/MCO representatives with brief written materials summarizing portions of the discussion as well as links to relevant NRLP organization and/or project websites and videos.

After the initial introductory discussion, the NRLP will invite ACO/MCO staff to more formal presentations, site visits or other demonstrations around the programs and projects of particular interest to them and will provide additional reports and materials as requested. NRLP staff will follow-up with the ACO/MCO participants to solicit feedback and, if not already in place, generate a collaborative agenda on moving forward with a Memorandum of Understanding (MOU).

2. THE BIDDER'S BRANDING AND MARKETING PLAN W RESPECT TO ITS RELATIONSHIPS W ACOS/MCOS

The NRLP will launch a multi-faceted marketing campaign to promote strong relationships with ACOs/MCOs that will include:

- Building on existing relationships -- that include initial partner conversations around improving health care and health outcomes while reducing costs -- which the NRLP has developed with potential ACO/MCO entities in the Northern Region
- Establishing uniform and concise NRLP collateral materials with consistent messaging in multiple formats including conventional brochures as well as web sites and social media
- Developing a short presentation brief and video (accessible on-line) that emphasizes the NRLP brand
- Inviting ACO/MCO representatives to relevant meetings through the LINK partnership where the short presentation brief is delivered and where attendees may receive collateral such as an NRLP mug, etc.
- Attending appropriate conferences and tradeshows to connect with ACO/MCO staff and share NRLP collateral materials
- Writing appropriate articles and/or briefs in conjunction with existing academic partners that are germane to ACO/MCOs relative to LTSS CP

- Securing and leveraging appropriate endorsements from health care providers for whom collaborating with NRLP members has made a significant positive difference

3. The Bidder's Strategy to Engage/Collaborate w Multiple ACOs and MCOs in Service Areas

The NRLP will approach all ACOs/MCOs in consistent fashion, following the general outline described above. However, the NRLP will strive to tailor its approach to meet the specific needs and preferences of each potential ACO/MCO partner in the Northern MCO region. The NRLP will be transparent with each ACO/MCO about its potential for and interest in multiple partnerships but will maintain full confidentiality around specific negotiations and proposed collaboration details with each.

The NRLP will offer each ACO/MCO the opportunity to participate in the NRLP training program by: 1) contributing subject matter expertise around a particular learning module; and/or 2) identifying ACO/MCO staff to participate in select learning modules, either in person or through on-line access and webinars. This process will facilitate greater inter-organizational awareness and, once launched with one ACO/MCO, can leverage greater participation by additional ACO/MCOs who do not wish their "competitors" to be the single clinical partners in the effort. Promoting area-wide learning collaboratives in this way is an important strategy for creating stronger connections and less dissonance in protocols and procedures across service regions.

4. The Bidder's Strategy for Conflict Resolution, Should Any Conflicts Arise Between Bidder and…

The NRLP strategy for conflict resolution is grounded in the basic tenets of effective partnerships, which includes:

- Establishing and maintaining clear communications and ongoing capacities to identify issues before they become conflicts. This can include scheduling regular meetings of key program staff as well as decision makers to review ongoing efforts.
- Clarifying expectations and roles from the outset of the partnership and capturing this in a clearly developed MOU, with options for revisions and amendments as needed, appropriate, and approved by EOHHS.
- Sharing substantive experiences on a regular basis, such as presentations on innovations, findings, unusual issues, etc. relative to the enrollees and their care. These presentations should further clarify and inform the shared data and potentially open the door to further collaborations.
- Developing mutually agreed-upon protocols for resolving differences that include notifying appropriate staff contacts about issues, the preferred form of contact and the parameters for response time, procedures for resolution including documentation of the process, which may include revision of the MOU.

K. Providing Culturally Competent, Informed Service Supports (*not to exceed 2 pages*)

1. Describe how the Bidder will Provide Effective, Equitable, Understandable and Respectful

a. How the Bidder will provide language/communication assistance

The NRLP fully embraces diversity as a core value of organizational culture and places high priority on its strategic initiative to continually increase access to isolated, low income and culturally diverse communities. NLRP members actively recruit employees who reflect the diversity of the communities and consumers served, maintaining multi-lingual staff throughout each organization and providing linguistic translation for 16 languages including ASL, Cantonese, Creole, French, Italian, Khmer, Portuguese, Russian and Spanish. The NRLP can also access GLSS' contract with a secure, qualified interpreter (International Medical Interpreters of the North Shore) for both medical and non-medical purposes. To accommodate specific linguistic needs of each consumer beyond this capacity, the NRLP staff can utilize the AT&T Language Line for callers with limited English proficiency providing translation for virtually all languages spoken in the Commonwealth as well as TTY telephony machines to communicate with consumers with hearing and speech impediments. NRLP staff can access the Mass Relay Operator who transcribes conversations for consumers with hearing impediments. The NRLP will also revamp its websites and electronic forms with accessibility in mind by employing universal design principles and WCAG 2.0 guidelines. WCAG guidelines require that we keep the layout simple and easy to use for people with cognitive disabilities.

b. How the Bidder will inform Enrollees of available language and…

The NRLP will ensure that enrollees are aware of the language and communication assistance available to them and that the preferred language is noted in the Care Plan and made available to all relevant staff. Notices of Availability of Free Language Assistance Services will be posted on websites, included in all marketing materials and correspondence, posted at key cultural sites in the various communities served, and included with the Care Plan document itself. The CPC will ask if such assistance is preferred at the earliest encounter with the enrollee and document both the response and, where desired, the resources utilized to provide the assistance.

c. How the Bidder will provide supports in a manner response to cultural…

The NRLP CPCs will be trained to respectfully engage enrollees in simple, non-judgmental conversations about their health beliefs, customs, and experiences, gently but clearly inquiring about whether and how cultural values – e.g., restrictions around clothing, exercise, personal interactions and personal space – play a role in their daily lives. Asking the enrollee, for example, what the CPC should know about his or her religious or cultural beliefs that will help to develop a better care plan also helps the enrollee to maintain control of the care planning process. The CPC will use this information to help identify the LTSS and community services with which the enrollee will be most comfortable.

Through conversations with the enrollee, the CPC will identify his or her overall health literacy and will provide information and supports in a manner that avoids challenging enrollee assumptions but that also offer meaningful learning opportunities. As part of the ongoing health and wellness coaching element of the CPC role, these opportunities will be documented in the care plan and will include one-on-one counseling as well as appropriate health promotion activities as described above.

2. DESCRIBE THE EXPERTISE AND EXPERIENCE THE BIDDER HAS PROVIDING CARE TO SPECIAL POPULATIONS…

a. HOMELESS: Bridgewell provides safe and affordable housing in Lowell and Lynn for individuals with disabilities, the homeless and individuals with dual diagnosis. Housing opportunities range from rooming houses to apartment living, many including rental subsidy programs funded by HUD. GLSS supports a homeless elders program helping to relocate displaced elders or elders at-risk of homelessness, prevent evictions, resolve landlord-tenant disputes and other barriers to tenancy, access benefits to augment income, complete and file housing applications and prepare associated documentation. GLSS also sponsors a weekday breakfast for homeless and other seniors, providing them with an opportunity to informally meet with the housing advocate and nurses. NeArc focuses on finding housing for those who are medically fragile, deaf and hard of hearing and/or living with autism spectrum disorders.

b. LGBTQIA: GLSS added a part-time LGBTQIA Coordinator in July 2016 to develop and coordinate LGBTQIA-inclusive aging services, programs, and outreach. GLSS provides LGBTQIA cultural competency presentations to staff, volunteers, providers, and community partners. Bridgewell offers individuals in residential services the opportunity to participate in an LGBTQIA program run by DDS. NeArc and Bridgewell integrate LGBTQIA supports within their services.

c. CRIMINAL JUSTICE: Many individuals in NLRP programs are involved with the criminal justice system and NRLP staff provide them with support and guidance as they navigate the criminal justice system. NRLP members have developed a very strong connection with local law enforcement agencies, the Essex District Attorney's Office, and the Essex County Sheriff's Department. With the Essex County DA's Office, Bridgewell runs a Diversion Program for first time offenders. GLSS sponsors: Protective Services, Women's and Family Abuse (formerly known as Older Battered Women's) Program; and Elder Law Project to address a variety of concerns such as benefits issues, housing matters and elder abuse cases.

d. LIVING WITH VISION OR HEARING CHALLENGES: As noted earlier, each NLRP member actively accommodates those individuals who are blind, low vision, deaf or hard of hearing throughout the service system, through enhancements made to the agency websites and tools offered to individuals (such as the Kiosks for Living Well adaptive programs), use of the TTY and Mass Relay Operator, and by a sensitive care plan crafted by and for the individual. GLSS also offers training to community agencies on 508 compliance and pre-audit preparation.

e. COGNITIVE DISABILITIES: NRLP staff work with individuals living with cognitive disabilities every day, (autism spectrum, intellectual or developmental disabilities, traumatic brain injuries, progressive dementia, Alzheimer's, or mental health disorders). Besides the day-to-day interaction, NRLP staff actively promote additional programs such as caregiver and community education on creating dementia-friendly communities; and delivery of the Disability Awareness Training now available to professionals and community.

NRLP members have long served people from different cultures,[13] locating key programs in areas rich in diversity, building a culturally competent staff capacity, and ensuring that facilities, equipment, and communications meet all appropriate ADA 508 and 504 compliance requirements.

[13] Further examples: Bridgewell opened a Cultural/ Linguistic/ Autism Specific Family Support Center in Lynn in 2016 providing a culturally and linguistically diverse Family Support Center for Cambodian and Latino families living in Lynn and surrounding areas who have children and adults living at home who are on the Autism spectrum. GLSS actively promotes its Latino Outreach program drawing hundreds of visitors each year for assistance with housing, public benefits and translation support.

Administrative Assistant	$ 30,000.00	0.6	6	$ 9,000
Trainer	$ 70,000.00	0.4	6	$ 14,000
				$ -
				$ -
Total Salary (Program Budget Line 1)		**11.8**		**$ 89,167**

Row 2 - Fringe

Fringe Item	Total Salary	Fringe Rate	Fringe
Fringe Item	$ 89,166.67	24%	$ 21,656
Total Fringe (Program Budget Line 2)			$ 21,656

Total Personnel*	**$ 110,822**

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:

The Director provides overall management of BH CP program;
-Care Coordinator Supervisor supervises Care Coordinators assigned to CC Team; review and sign off on comprehensive assessments;
-Care Coordinators advocate and coach enrollees to achieve treatment goals, linking enrollees with resources; documentation of member encounters in medical records
-Enrollment Manager designs enrollment plan, manages department, supervises Enrollment Specialists, conducts outreach; provides liaison function with ACOs and MCOs.
-Enrollment Specialist conducts enrollee intake, including outreach to Assigned Enrollees, and assigns enrollees to appropriate Service hub.
-Administrative Assistant provides administrative support to Program Director and is responsible for compiling and updating Community Resources Directory.
- Trainer is responsible for assessing the training needs of the Community Partners staff and developing training curriculum to meet those needs. Plans in-person and online training; oversees training records;

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost

Total Training and Professional Development (Program Budget Line 3)	

Provide a description of each Training and Professional Development line item included in the table above:

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
			Total Mileage	

Travel Expense Description	Cost
Total Mileage	$ -
Parking and tolls	
Public transportation	

Enrollee travel	
Total Travel (Program Budget Line 4)	**$ -**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

Row 5 - Equipment

Description of Equipment	Unit Cost	#units or FTEs	Cost
Total Equipment (Program Budget Line 5)			

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost
Postage & office supplies			$ 5,500
Total Supplies (Program Budget Line 6)			**$ 5,500**

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

Routine general office materials to be used in normal course of administration. Estimate is pursuant to provider experience and assumed adequate levels for anticipated prep period staff.

During prep period, there will be approximately 12 FTEs. It is expected that over the course of the 7 months, office supplies will account for $1,500 or $125 per FTE. The remainder of the estimate ($4,000) is for postage. It is expected that a significant amount of material will me mailed to numerous constituents and others regarding the development of the program, recruitment for the program, etc.

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost

			Total Software Licensing (Program Budget Line 8)	

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
Land lines for 3 sites for 3 months; assume $300 per month/per site, apportioned as 60% for BH CP; remaining 40% is LTSS CP	300	3	$ 1,080.00
Internet data lines for 3 months for 3 sites; assumed $400 cost per site using current experience;	400	3	$ 3,600.00

Total Telecommunications (Program Budget Line 9)	**$ 4,680.00**

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

Land lines will support desk-top activity for communication with clients and other constituents, complimenting availability of cellular communication. Internet data lines are essential for routine communication as well as for web-based access to EHR software.

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost
Rent	9000	15	$ 13,500.00
Utilities			$ -
Repair and Maintenance			$ -
			$ -
			$ -
Total Occupancy (Program Budget Line 10)			**$ 13,500.00**

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:

Provider will require 3 regional offices in service areas at 3K square feet each for ultimate staffing levels. Rent would begin 3 months prior to 6/1 start of services to support hiring, staffing, training and general program start-up. Rental rate is presumed at $15 inclusive of utilities, housekeeping and common area management. No repairs and maintenance are expected in prep period (general CAM is included in $15/psf rate). Note: costs are allocated 60% to

maintenance are expected in prep period (general O&M is included in $25/psf rate). Note: costs are allocated 60% to BH CP and 40% to LTSS CP in prep period only. Thereafter, BH CP absorbs full space for common use with LTSS CP, given financial inability for LTSS funds to share in allocation.

At maximum staffing levels, 140 individuals between LTSS and BH will be employed, office space for which will be provided in regional locations. While all staff are not expeccted to be at each office 100% of their time and many staff can share space (rather than dedicated cubicle/office per person), 9,000 sq feet is based on general allocation of approximately 60 sq feet per work station/area, plus common space such as conference rooms.

Row 11 - Other

Other Direct Expense Description	Cost
Total Other Direct Costs (Program Budget Line 11)	

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead	**11.00%**	**$ 14,795.00**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Administrative overhead required to effectively execute and coordinate the business functions of the community partner services is inclusive of following support services:
A) Finance administration
B) HR management
C) Qualitative performance measurement & reporting
D) Tax and cost report compliance
E) Third party billing and contract management
The 11% rate reflects historical experience of Innovative Care Partner's managing partner (CHD). CHD's current federal allowable indirect rate is 11.7%.

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Row 2 - Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
Development of Care Management platform	$ 124,000.00

Total Development and Adaptation of EHR and Care Management System (Infrastructure Budget Line 2)	$ 124,000.00

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Development fee for care management platform to include configuration, ACO interoperability, billing and other CP specific platform initiatives. The total cost for development is allocated between BH CP and LTSS CP, for total of $200K. The allocation to LTSS is based on availability of funds within the $450K in either budget. A more specific allocation as based on antinipated utilization would be $120K to BH CP and $80K to LTSS CP.

For purposes of the Infrastructure Allocation, this cost is allocated fully to CHD as the services will be part of the general management of the CP. CHD is the managing member of ICP and has responsibility for coordinating general services including EHR.

Row 3 - Technology for Service Delivery

Description of Expense	Cost
Mobile technology, laptops, devices	$ 33,000.00
Total Technology for Service Delivery	$ 33,000.00

(Infrastructure Budget Line 3)	**$ 33,000.00**

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Providing staff with laptop for performance of care coordinatyion and electronic data recording. Expected costs are based on provider experience and vendor relationship for quantiity purchasing. It is estimated that individual set-ups of lap top, signature pads and sufficient print devices will cost approximately $1,000 per individual.

In the prep period, accomodations are being made for 33 individuals, building towards full capacity in later years.

The technology models/devicces expected are reflected in the following table. Several options/models have historically been used and are easily supported by our tecnolody departments. These are included herein as potential choices. Actual determination of which model is chosen (are chosen) will continue to be driven by availability and cost at time of purchase. Based on volume, ICP expects to leverage its purchasing power.

ICP confirms that 33 FTEs will be LTSS CP staff.

Type	Brand	Model
Laptop	Hewlett Packard	ProBook 400, 550, 850
Laptop	Hewlett Packard	EliteBook 8460P
Laptop	Lenovo	ThinkPad T530
Tablet	Microsoft	Surface Pro 4
Printer	Hewlett Packard	LaserJet, MFP, Color, BW
Printer/Copier	Canon	IR ADV 4545 I
Cell phones	Apple	iPhone 6s

Row 4 - Other Technology Expenses

Description of Expense	Cost

Total Other Technology Expenses (Infrastructure Budget Line 4)	

Provide a description of each IT line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Community Partner Infrastructure Budget Report - Workforce Development - Prep Budget Period

Row 5 - Workforce Development Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Recruiter	$ 60,000.00	0.4	6	$ 12,000
				$ -
				$ -
				$ -
				$ -

				$	-
				$	-
				$	-
				$	-
	Total Salary	0.4		$	12,000
	Fringe rate	24.2%	Total Fringe	$	2,900
	Total Workforce Development Staffing including Fringe (Infrastructure Budget Line 5)			**$**	**14,900**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

The recruiter is essential to implementing targeted activities intended to hire staff quickly and effectively. The recruiter is responsible for confirming roles, identifying core competencies and developing attractive, thoughtful job postings. Recruiter will use a number of online resources for advertising, including both broad-based and niche job boards

For purposes of the Infrastructure Allocation, this position /cost is allocated fully to CHD as the position will be part of the general management of the CP. CHD is the managing member of ICP and has responsibility for coordinating general services including employment of such positions.

Row 6 - Recruitment Expenses

Description of Expense	Cost
Advertisements, job fair expenses, web-based postings, materials, travel for recruitment	$ 20,000.00
Total Recruitment Expenses (Infrastructure Budget Line 6)	**$ 20,000.00**

Provide a description of each recruitment expense line item included in the table above, how each will assist in meeting the terms of

the CP's contract and how the costs were determined:

Expenses reflect routine activities and related costs based on provider experience as well as intentions to target certain markets and bilingual individuals. Costs are determined based on current experience and contracts for services (message boards, web services, newspapers). The total budget is broken down as follows:

Internet recruitment board (Indeed.com) $5K
Marketing Materials (professional informational brochures, billboards, general media) $7K
Job fairs & targeted recruitment - cost of venues and services (food/bevrages) & out of area travel $8K

For purposes of the Infrastructure Allocation, this cost is allocated 1/3 ($6,667) to each member of the consortium.

Row 7 - Training Expenses

Description of Expense	Cost
Total Training Expenses (Infrastructure Budget Line 7)	

Provide a description of each training expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Row 8 - Retention Expenses

Description of Expense	Cost
Total Retention Expenses (Infrastructure Budget Line 8)	

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Community Partner Infrastructure Budget Report - Business Start Up Costs - Prep Budget Period

Row 9 - Office Equipment

Description of Expense	Cost
Total Office Equipment (Infrastructure Budget Line 9)	

Provide a description of purpose for each office equipment expense listed in the tables above, including how the costs were determined:

Row 10 - Office Furniture

Description of Expense	Cost
Cubicles, desks, chairs, common area furniture, cabinets	$ 40,000.00
Total Office Furniture (Infrastructure Budget Line 10)	**$ 40,000.00**

Provide a description of purpose for each office furniture expense listed in the table above, including how the costs were determined:

Traditional administrative office furniture items in support of daily functions. Cost is based on provider experience and leveraging exisiting volume purchase agreements. It is estimated that furniture sufficient to support administrative functions (including above noted items) approximates $1K per individual for 40 positions at full operations.

For purposes of the Infrastructure Allocation, this cost is allocated 1/3 ($13,333) to each member of the consortium.

ICP confirms that 40 FTEs will be LTSS CP staff.

Community Partner Infrastructure Budget Report - Operational Infrastructure - Prep Budget Period

Row 12 - Operational Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total

Quality improvement manager	$ 70,000.00	1	4	$	23,333
				$	-
				$	-
				$	-
				$	-
				$	-
				$	-
				$	-

	Total Salary	1		$	23,333
	Fringe rate	24.3%	Total Fringe	$	5,666
			Total Program Staffing including Fringe (Infrastructure Budget Line 12)	**$**	**29,000**

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in meeting the terms of the CP's contract:

Quality Manager is responsible for creating and monitoring the QM plan; the manager will provide data and reports and staff the Quality Committee.

For purposes of the Infrastructure Allocation, this position /cost is allocated fully to CHD as the position will be part of the general management of the CP. CHD is the managing member of ICP and has responsibility for coordinating general services including employment of such positions.

Row 13 - Other Operational Expenses

Description of Expense	Cost
Professional business development	$ 10,000.00

Total Other Operational Expenses (Infrastructure Budget Line 13)	**$ 10,000.00**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

Marketing material to educate clients, medical community, ACOs regarding CP services and ICP program. The full amount will be for professional material including brochures in various sizes and detail about the benefits of the CP program and how ICP can provide those services. It is anticipated that the brochures and material which will be mailed and otherwise distrubuted will cost $7K and media placement will cost $3K.

For purposes of the Infrastructure Allocation, this cost is allocated 1/3 ($3,333) to each member of the consortium.

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 14)	**11.00%**	**$ 29,799.00**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Administrative overhead required to effectively execute and coordinate the business functions of the community partner services is inclusive of following support services:

A) Finance administration
B) HR management
C) Qualitative performance measurement & reporting
D) Tax and cost report compliance
E) Third party billing and contract management
The 11% rate reflects historical experience of Innovative Care Partner's managing partner (CHD). CHD's current federal allowable indirect rate is 11.7%.

Section 7.5 Initial DSRIP Participation Plan

A. Executive Summary

1. **Goals and Challenges:** The five-year business plan for implementing the LTSS CP program, in compliance with the requirements of Section 4.1 of Attachment A, reflects the following goals:

a. Supporting Enrollees with complex LTSS and behavioral health needs, brain injury or cognitive impairments, physical disabilities, intellectual and developmental disabilities, including autism, older adults with LTSS needs, and children and youth with LTSS needs;
b. Improving the care experience, continuity and quality of care for Enrollees by holistically engaging Enrollees in care coordination and care management activities;
c. Facilitating collaboration between ACOs and MCOs and community-based organizations to break down silos and promote integrated care so that the social determinants of health are more effectively addressed for members with LTSS needs;
d. Working collaboratively with ACOs and MCOs to avoid duplication of care coordination and care management services for the LTSS population; and
e. Promoting and supporting the values of Community First, self-determination principles, and cultural competence in providing care coordination and care management services to members with LTSS needs.

ICP's business plan will incorporate strategies that address anticipated challenges, including, as examples, the following:

Potential Challenge	**Solutions/Strategies**
Enrollee Resistance to LTSS CP services	1. Effective matching of Enrollees to Care Coordinators in terms of language, cultural affinity, and experience with presenting Enrollee conditions 2. Enrollment Specialists and Care Coordinators trained in Motivational Interviewing (MI); 3. Collaboration with Enrollee's PCP, family members, and other care givers.
Personnel Recruitment and Retention	1. Comprehensive staff recruitment plan including creative use of social media and other outreach avenues (See Sections 7.5.E below); 2. Apply "Employer of Choice" strategies that have helped earn CHD "Best Non-profit Workplace" awards for the past two years.
ACO and MCO Engagement	1. Leverage existing positive relationship of the Consortium Entities with each ACO and MCO; 2. Establish collaboration processes, such as monthly Joint Operating Committee meetings, beginning in the Preparation Period (See Section 7.5.J. below).
Risk Sharing	1. Establish effective data analysis and reporting systems to allow timely monitoring of quality and financial measures; 2. Maintain adequate cash and liquidity ratios.
Technology	1. Devote adequate resources for information system software and hardware that meet contract requirements; 2. Maintain active involvement with State and local planning groups working toward interoperability among entities and connection to Mass HiWay; 3. Involve content experts within Bidder's LTSS CP program with eHana design engineers to continuously improve the CC/CM platform during the Preparation Period and beyond.

A list of activities that will be accomplished in each contract year is provided in Section 7.5.F below (Implementation Plan and Timeline).

2. The number of Assigned and Engaged Enrollees the Bidder intends to support under the Contract: ICP proposes to serve a maximum caseload of ~~4,159~~2,700 Enrollees who reside within the seven Service Areas comprising the Western Region. It is expected that this target would be reached by the middle of Budget Year 2 (See Budget Narrative, Appendix B).

3. Proposed Western Region Service Areas: Adams, Greenfield, Holyoke, Northampton, Pittsfield, Springfield, and Westfield.

4. ICP plans to operationalize the CP program and time frames associated with implementing such activities: A summary of significant components of the plan for operationalizing the LTSS CP program is provided below:

Nov. 2017- ~~March~~ June 2018 – Preparation Period: (1) Hire Program Director by ~~November~~ December 1 and implement staff recruitment plan (See Section 7.5.E below); (2) Work with IS vendor (eHana) to complete customized Care Coordination/Care Management IS platform; (3) Finalize governance policies and procedures with Consortium Entities; (4) Equip Hub offices; (5) establish Quality Committee and Consumer Advisory Board; and (5) Conduct initial outreach meetings with ACOs and MCOs, execute Memorandum of Agreements, and establish referral and communication pathways and protocols.

~~April~~ June – Dec. 2018 – Budget Period 1: (1) Continue to hire, train, and deploy CP personnel to meet member enrollment needs; (2) Implement program and quality data collection and reporting processes; (3) Maintain monthly joint operating meetings with ACOs and MCOs; and (4) Monitor Enrollee assignment process and Hub caseloads and adjust as needed.

Budget Periods 2-5: Continue to monitor all program and quality measures and adjust as needed.

Please also refer to Section 7.5.F- Implementation Plan, below, for a more detailed plan

E. Personnel and staffing

1. An **organizational chart** for the LTSS CP initiative is included as Attachment 2 (Revised).

2. **Sample staffing model:** Each of the three Consortium Entities and two Material Subcontractors will operate one Service Hub each to serve Engaged Enrollees in the proposed service areas listed in Attachment D (Revised). These Hubs will all operate under a single set of program policies and procedures (LTSS CP Operating Manual), as described in Section 7.2.

Figure 2

3. Recruitment Plan: Innovative Care Partners (ICP) will implement a robust and dynamic recruitment plan to ensure that all key roles are filled in anticipation of an April 1, 2018 start date. The CHD human resources department includes dedicated recruitment staffing, led by a full-time Recruiter, that will conduct LTSS CP recruitment activities, with support from HR departments at ServiceNet, Gandara Center, Berkshire County ARC, and Pathlight. The Program Director will be hired by ~~November~~ December 1, 2017 to direct and oversee all aspects of program planning and development during the Preparation Period. Care Coordinator Supervisors will by hired by ~~February~~ April 2018. These individuals, working closely with the Program Director, will help screen and hire the Care Coordinators.

The recruitment process begins with confirming roles, identifying core competencies and developing attractive, thoughtful job postings. Recruitment activities that will be centralized at ICP include sourcing, processing online applications, and conducting initial candidate

screening and interviews. Final interviews and job offers will be accomplished at the Consortium Entity or Material Subcontractor where the staff person will be assigned.

ICP will employ a wide variety of candidate sourcing and outreach strategies, including:

- Social media outlets such as LinkedIn, Facebook, Twitter;
- Professional associations to reach individuals with specific educational and professional background;
- Professional and civic associations to reach minority and bilingual candidates, such as Spanish Nurses Association, Vietnamese American Civic Association, National Association of Puerto Rican and Hispanic Social Workers, New North Citizens Council, Recovery Learning Center, and the Transformation Center;
- Job fairs held in each proposed service area;
- Direct mail using mail lists from professional associations, licensing and certification agencies, etc.;

4. Cultural and Linguistic Staff Diversity: Innovative Care Partners (ICP) will actively recruit staff from a variety of cultural and linguistic communities, with a special focus on bi-lingual English- and Spanish-speaking candidates. Gandara Center employs a full-time bilingual/bicultural Recruiter who will lead candidate sourcing and outreach activities, such as organizing and attending job fairs, screening, and conducting initial interviews. In addition, ICP and Consortium Member staff will travel to Puerto Rico and Spain in order to reach a qualified pool of candidates. Recruitment at universities on Puerto Rico has been a successful recruiting tool and we will also host job fairs and other recruiting events there as well. ICP also has had success working with professional and civic associations to reach those candidates in targeted cultural or linguistic communities. Examples of organizations which have access to diverse communities include the Spanish Nurses Association, Russian Community Association, Vietnamese American Civic Association, National Association of Puerto Rican and Hispanic Social Workers, and New North Citizens Council. ICP will also recruit and hire qualified candidates with lived experience, including persons in recovery from mental illness and substance use disorders.

5. Staff Orientation and Training: Innovative Care Partners (ICP) recognizes that planning and implementing a comprehensive staff orientation and training plan is critical to the success of the LTSS CP program. The components of the proposed plan include: (1) orientation to CP goals, policies, procedures and individual staff position expectations and to relevant Hub agency policies and procedures and safety, privacy, and other compliance training; (2) specialized care coordination and care management training; (3) orientation to individual CP roles; and (4) management training for CP leaders. A Training Specialist will be hired to plan and oversee the CP Training and Orientation Plan. This position will report to the CP Quality Manager, but will also work closely with the CHD Vice President of Human Resources and the CP Program Director.

All new CP personnel will undergo a standardized four week pre-service orientation and training program that will consist of group sessions, individual on-line learning through the Relias e-learning platform, and job shadowing.

a. **Orientation and Universal Training (conducted during the pre-service, orientation period, at CP Central Office and at individual host Hub):**
   i. Orientation to the LTSS CP program: mission, values, policies and procedures, role descriptions, program organization;
   ii. Training in eHana Care Coordination/Care Management Information System;
   iii. Orientation to Consortium Entity Hubs: Host agency mission, values, policies and procedures, organization, employment rules and benefit programs;
   iv. Relias web-based curriculum: HIPAA, 42 CFR, and other confidentiality/privacy requirements; universal precautions and safety for human service workers; cultural diversity and human rights; and sexual harassment;
   v. Human rights training, mandated by the Department of Mental Health; and
   vi. First Aid and CPR Certification.

b. Specialized Behavioral Health and Community Partner (CP) Training (Initiated in the pre-service, orientation period and continuing during first year of employment):

i. Motivational Interviewing (MI) – An eight-hour training for Clinical Care Managers, Care Coordinators, Enrollment Manager, and Enrollment Specialists;

ii. Integrated Care Management Certificate Program – A 20-module, on-line learning program, conducted by UMASS Medical Center, for Clinical Care Managers and Care Coordinators. The program develops general skills for engaging Enrollees, promoting their activation to improve their own health, and general medical and behavioral health skills to be able to connect Enrollees to appropriate services, to address questions, to teach healthy living and support patient-centered treatment plans;

iii. Non-Violent Crisis Intervention Training: Eight hour program, conducted by the Crisis Prevention Institute (CPI), for Clinical Care Managers and Care Coordinators;

iv. Screening, Brief Intervention, Referral, and Treatment (SBIRT): Offered by the National Council for Behavioral Health, this 1 ½ hour online training in the use of SBIRT tools will assist Clinical Care Managers and Care Coordinators to assist Enrollees with possible alcohol and other substance use issues;

v. Recovery Support Navigation: Two Care Coordinators on each Care Coordination Team will attend five-day Recovery Coach Academy, sponsored by AdCare Educational Institute. The Academy teaches the principles, philosophy, and functions of Recovery Coaches; and

vi. EOHHS-Mandated or Recommended Training: ICP will cooperate with, and support the provision of, CP training programs that EOHHS may develop, sponsor, or otherwise require during the period of the Contract.

c. CP Role Orientation and Job Shadowing (conducted during the pre-service period): Each new CP staff person will spend at least one week working alongside seasoned workers to learn the details of their role. The first "wave" of staff who are hired in the Preparation Period and early part of Budget Year 1 will receive simulated training, including Enrollee role playing.

d. Management Training: (a) three-hour pre-service orientation to administrative services, including Fiscal, Human Resources, IT, Organizational Excellence, Development and Marketing; and (b) participation in CHD-sponsored management training programs.

6. Staff Retention Strategies

Staff retention and engagement efforts start from day one at Innovative Care Partners (ICP). Our orientation and onboarding efforts connect and ground new staff in the important mission of the organization and make the most of their enthusiasm and energy. Amidst all of the paperwork and policies is the strong message about mission and values that drives the work that we do in the community.

ICP offers highly competitive compensation and benefits, both in traditional and non-traditional ways. Our salaries are at or above market rates and we continually review both internal and external equity to ensure that we can attract and retain the highest caliber staff. We provide sign-on and referral bonus for difficult to fill positions and offer bonuses and incentives for our clinical staff, along with reimbursement for their professional licensure. We have been able to provide regular bonuses, gift cards, and other financial recognition of the good work of our staff.

Insurance benefits are an important part of our benefits package and Innovative Care Partners is committed to contributing toward the majority of the health and dental insurance premiums on behalf of our staff. Life insurance as well as both short and long-term disability coverage are offered to staff at full company expense and we provide important retirement plan benefits as well. Caring about our staff's health goes well beyond insurance coverage – Innovative Care Partners has vibrant wellness activities, incentives, and initiatives in order to support our staff in a myriad of ways. From non-smoking support and incentives to health-related trainings to Employee Assistance Programs, we support our staff in their total health and wellness so that they can, in turn, focus on the support of those we serve.

We also recognize that in this difficult work, it's important for staff to have a break and to have fun. We provide generous paid time off benefits so that our staff can rejuvenate and recharge and we understand the importance of work/life balance. Whenever possible, we provide flexibility and appreciation for personal time. While staff are at work though, we also ensure that they are recognized for their good work and we highlight our appreciation with a variety of recognition awards and events throughout the year, including employee of the month, Star Awards, work anniversary acknowledgments and staff social events.

Another important retention strategy is ensuring that staff are well trained, well supervised, and well prepared for the next stage in their careers. To that end, we support a strong learning culture at Innovative Care Partners with an emphasis on professional development and training. With both extensive in-person and online training opportunities, CHD staff are able to expand their clinical, administrative and management knowledge. On the job training, in-house expertise, clinical supervision and an electronic training module provide staff an array of content areas as well as forums to learn about the latest treatment models, stay abreast of compliance and safety standards, and develop important supervisory and management skills. Our organization size also provides unique opportunities for mobility – both clinical and managerial advancement are common.

Communication and participation are important for staff to feel a commitment to an organization. Innovative Care Partners has a strong human resources department to provide additional support and assistance to staff on a number of issues as well as formal open door and grievance policies to ensure that people are heard and listened to throughout their employment. We actively seek involvement from staff in agency-wide committees that provide guidance and direction to management. There are also a number of communication tools – email, intranet, staff meetings, open forums, etc. – that enable staff to provide input to management and for management to inform staff about issues of importance to the work that we do.

Finally, ICP and its Consortium Entities are strong, stable agencies with reputations for quality services. Staff want to be part of our creative, mission-driven organization. And the organization seeks staff that are active participants and truly engaged in the important work and ongoing success of those we serve. We are committed to providing staff with a unique employment opportunity based on mutual respect and collaboration. We have created a culture where joint problem-solving, entrepreneurial service delivery, and positive relationships thrive. All of that takes regular care and attention. Therefore, Innovative Care Partners considers retention strategies in a very broad manner – there are many things that impact someone's experience at work and keep them enthusiastic and excited about the work they do and where they do it. We strive to develop strategies that support a highly engaged staff, foster creativity and enthusiasm, and recognize the individual strengths and collective power of staff to enhance people's lives.

F. Implementation Plan and Timeline (Revised)

Innovative Care Partners (ICP) shall attach timelines that display ICP's monthly implementation plans for the Preparation Budget Period, and quarterly implementation plans for each subsequent Budget Period. The timelines shall include all necessary operational activities to meet the Contractor Requirements described in Attachment A.

Preparation Period:

Nov 2017	~~• Program Director Hired; Begins policy and procedures (P&Ps) development~~ ~~• Governing Board begins review and approval of initial set of P&Ps~~ • Bidder/Vendor IT Work Team meets weekly on software customization (Vendor contract executed and project plan developed in Sept-October) ~~• Program Director and Consortium Entity leaders initiate outreach to ACOs and MCOs; hold initial meeting with each ACO; begin negotiating written Agreements~~ • ~~Program Director develops outreach/marketing materials and strategies w/CHD Marketing Department technical assistance and support~~
Dec 2017- Jan . 2018	• Program Director Hired; Begins policy and procedures (P&Ps) development • Governing Board begins review and approval of initial set of P&Ps • Program Director and Consortium Entity leaders initiate outreach to ACOs and MCOs; hold initial meeting with each ACO; begin negotiating written Agreements • Program Director develops outreach/marketing materials and strategies w/CHD Marketing Department technical assistance and support • Program Director continues policy and procedures development • Governing Board continues review and approval of P&Ps • Bidder/Vendor IT Work Team meets weekly on software customization project • MCO/ACO Agreements are executed; Program Director establishes monthly joint operating meeting structure with each ACO; solicits ACO suggestions on Enrollee outreach/engagement
~~Jan~~ Feb 2018	• Quality Manager hired; begins working with Program Director to establish Quality Committee; begins work with Consortium Entity QM leaders to design CP CQI Plan • Governing Board meets, reviews and approves new policies and project plans • Enrollment Manager hired; begins designing outreach/engagement plan w/ Program Director and CHD Marketing Dept • Program Director and Enrollment Manager bring draft outreach/engagement plan to monthly ACO joint operating meetings for input • IT Work Team presents test-mode demonstration of customized CC/CM software to Governing Board, Program Director and Consortium Entity personnel • Program Director initiates active outreach to community resource/collaboration agencies w/support from CHD Marketing Department • Consumer Advisory Board membership recruitment begins
~~Feb~~ March 2018	• Care Coordinator Supervisors are hired for each Hub; • Training Specialist is hired; • Quality Manager presents draft CQI plan for Committee feedback and approval • Program Director presents Policy Manual for Governing Board approval (that addresses all requirements of EOHHS Contract) • Program Director and Enrollment Manager finalize outreach/engagement plan and communicates it at each ACO joint operating meetings • IT Work Team beta tests customized CC/CM software; develops specs for initial report set w/Quality Manager, Program Director and Care Coordinator Supervisors • Program Director, Care Coordinator Supervisors, and Enrollment Manager continue outreach to community resource/collaboration agencies w/support from CHD Marketing Department • Consumer Advisory Board holds kick-off meeting • Quality Committee holds kick-off meeting

	• Business Associate Agreements (BAA) are executed with each Consortium Entity, Material • Subcontractor, IT Vendor, and other applicable third parties
~~March~~ April 2018	• One Enrollment Specialist is hired and trained • Personnel is hired and trained to staff one Care Coordination Team in each Hub • IT Work Team installs CC/CM software and trains teams at each Hub • Enrollment Department w/IT support conducts test with EOHHS and each ACO for transmittal of Assigned Enrollee data • Consumer Advisory Board holds meets and reviews final implementation plan • Quality Committee meets and recommends final CQI Plan for Budget Period 1 • Governing Board approves Year 1 CQI Plan

Budget Year 1:

~~April – June~~June 2018	• Enrollment Dept receives initial transmittal of Assigned Enrollees from MassHealth, conducts outreach to members consistent with outreach/engagement plan, and makes assignments to each Hub following approved assignment criteria • Additional Care Coordinators are hired and trained each month based on number of new Assigned Enrollees • IT Team troubleshoots and resolves any system and end user problems • Continued outreach to ACOs to facilitate and generate Enrollee Assignments; monthly joint operating conference calls with each ACO and MCO to address issues and facilitate coordination • Continued outreach to community resources • Quality Manager analyzes Month 1 enrollment and engagement data and distributes first dashboard reports to each Hub; Assistant Directors • Quality Committee meets monthly to review reports • Consumer Advisory Board meets to review Program Director report on implementation progress and provides suggestions to address outreach, engagement, and other challenges • Progress report submitted to EOHHS as required
July – Sept 2018	• Second Enrollment Specialist hired and trained • Additional CCs are hired and trained each month based on number of new Assigned Enrollees • Joint operating conference calls with each ACO and MCO to address issues and facilitate coordination continue on quarterly basis • Quality Manager analyzes Quarter 1 program performance and quality data and distributes first dashboard reports to each Hub; Assistant Directors implement action plans to address below target measures • Year 1 CQI initiative to increase Enrollee engagement rate is conducted; results are reported to Quality Committee and Governing Board • Consumer Advisory Board meets to review Program Director report on implementation progress and provides suggestions to address outreach, engagement, and other challenges • Progress report submitted to EOHHS as required
Oct-Dec 2018	• Enrollee mobile app launched on pilot basis • Additional Care Coordinators are hired and trained each month based on number of new Assigned Enrollees • Joint operating conference calls with each ACO and MCO to address issues and facilitate coordination continue on quarterly basis • Quality Manager analyzes Quarter 2 program performance and quality data and distributes first dashboard reports to each Hub; Teams implement action plans to address below target measures • Continue tracking data related to CQI initiative and implement action plan as needed; • Report results to Quality Committee and Governing Board • Consumer Advisory Board meets to review Program Director report on implementation progress and provides suggestions to address outreach, engagement, and other challenges • Progress report submitted to EOHHS as required

Year 2:

Jan-Mar 2019	• Mobile app pilot results reviewed, IT dept makes changes as needed, and app is rolled out to all interested Enrollees • Program Director produces Year 1 report for Board and EOHHS, incorporating quality and performance data from Quality Manager • Quality Committee and Consumer Advisory Board review Year 1 results and provide suggestions to address challenges • First Year 2 CQI initiative is planned, with input from Quality Committee and Consumer Advisory Board • Quarterly joint operating meetings with ACOs and MCOs continue • Consumer and ACO/MCO surveys are designed, with input from Quality Committee and Consumer Advisory Board, approved by EOHHS, and distributed • Planning for first annual Community Partners conference begins • Quality Committee and Consumer Advisory Committee meet • Progress report submitted to EOHHS as required
April-June 2019	• Consumer and ACO/MCO survey results are analyzed and reported to Quality Committee, Consumer Board ,Governing Board, and EOHHS; action plans are developed to address areas for improvement • First annual CP conference held • IT enhancements related to interoperability, data analytics, and predictive analysis are tested and installed on CC/CM platform • Quarterly joint operating meetings with ACOs and MCOs continue • First Year 2 CQI initiative is implemented • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Committee meet • Progress report submitted to EOHHS as required
July-Sept 2019	• Second Year 2 CQI initiative is planned • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Board meet • Joint operating meetings with ACOs and MCOs are held • Progress report submitted to EOHHS as required
Oct-Dec 2019	• Second Year 2 CQI initiative is implemented • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Board meet • Joint operating meetings with ACOs and MCOs are held • Progress report submitted to EOHHS as required

Year 3:

Jan-Mar 2020	• Program Director produces Year 2 report for Board and EOHHS, incorporating quality and performance data from Quality Manager • Quality Committee and Consumer Advisory Board review Year 2 results and provide suggestions to address challenges • First Year 3 CQI initiative is planned, with input from Quality Committee and Consumer Advisory Board • Quarterly joint operating meetings with ACOs and MCOs continue • Consumer and ACO/MCO surveys are distributed • Planning for annual Community Partners conference begins • Quality Committee and Consumer Advisory Committee meet • Progress report submitted to EOHHS as required
April-June 2020	• Consumer and ACO/MCO survey results are analyzed and reported to Quality Committee, Consumer Board, Governing Board, and EOHHS; action plans are developed to address areas for improvement • Second annual CP conference held • Quarterly joint operating meetings with ACOs and MCOs continue

	• Second Year 3 CQI initiative is implemented • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Committee meet • Progress report submitted to EOHHS as required
July-Sept 2020	• Second Year 3 CQI initiative is planned • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Board meet • Joint operating meetings with ACOs and MCOs are held • Progress report submitted to EOHHS as required
Oct-Dec 2020	• Second Year 3 CQI initiative is implemented • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Board meet • Joint operating meetings with ACOs and MCOs are held • Progress report submitted to EOHHS as required

Year 4:

Jan-Mar 2021	• Program Director produces Year 3 report for Board and EOHHS, incorporating quality and performance data from Quality Manager • Quality Committee and Consumer Advisory Board review Year 3 results and provide suggestions to address challenges • First Year 4 CQI initiative is planned, with input from Quality Committee and Consumer Advisory Board • Quarterly joint operating meetings with ACOs and MCOs continue • Consumer and ACO/MCO surveys are distributed • Planning for annual Community Partners conference begins • Quality Committee and Consumer Advisory Committee meet • Progress report submitted to EOHHS as required
April-June 2021	• Consumer and ACO/MCO survey results are analyzed and reported to Quality Committee, Consumer Board ,Governing Board, and EOHHS; action plans are developed to address areas for improvement • Third annual CP conference held • Quarterly joint operating meetings with ACOs and MCOs continue • Second Year 4 CQI initiative is implemented • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Committee meet • Progress report submitted to EOHHS as required
July-Sept 2021	• Second Year 4 CQI initiative is planned • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Board meet • Joint operating meetings with ACOs and MCOs are held • Progress report submitted to EOHHS as required
Oct-Dec 2021	• Second Year 4 CQI initiative is implemented • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Board meet • Joint operating meetings with ACOs and MCOs are held • Progress report submitted to EOHHS as required

Year 5:

Jan-Mar 2022	• Program Director produces Year 4 report for Board and EOHHS, incorporating quality and performance data from Quality Manager • Quality Committee and Consumer Advisory Board review Year 4 results and provide suggestions to address challenges

	• First Year 5 CQI initiative is planned, with input from Quality Committee and Consumer Advisory Board • Quarterly joint operating meetings with ACOs and MCOs continue • Consumer and ACO/MCO surveys are distributed • Planning for annual Community Partners conference begins • Quality Committee and Consumer Advisory Committee meet • Progress report submitted to EOHHS as required
April-June 2022	• Consumer and ACO/MCO survey results are analyzed and reported to Quality Committee, Consumer Board ,Governing Board, and EOHHS; action plans are developed to address areas for improvement • Fourth annual CP conference held • Quarterly joint operating meetings with ACOs and MCOs continue • Second Year 5 CQI initiative is implemented • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Committee meet • Progress report submitted to EOHHS as required
July-Sept 2022	• Second Year 5 CQI initiative is planned • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Board meet • Joint operating meetings with ACOs and MCOs are held • Progress report submitted to EOHHS as required
Oct-Dec 2022	• Second Year 5 CQI initiative is implemented • Quarterly joint operating meetings with ACOs and MCOs continue • Quality Committee and Consumer Advisory Board meet • Joint operating meetings with ACOs and MCOs are held • Progress report submitted to EOHHS as required

Ramp-up costs in Prep Budget Period, Budget Year 1, 2 and 3 can be covered by Infrastructure Funding

Community Partner Program Budget Report - Prep Budget Period

Only complete this Program Budget Narrative using amounts anticipated for PBP.

Lines may be added to the Program Budget Narrative tables as necessary

Row 1 - Salary

Position	Annual Salary	FTEs	# Months	Total
Executive Director	$ 150,000.00	0.8	4.5	$ 45,000
LTSS Program Manager	$ 75,000.00	1	2.10	$ 13,105
LTSS Care Coordinator	$ 48,000.00	14	2.0	$ 112,000
				$ -
				$ -
				$ -
				$ -
				$ -
				$ -
Total Salary (Program Budget Line 1)		**15.8**		**$ 170,105**

For each position listed above, provide a brief statement of the position's responsibilities:

Executive Director: responsible for the oversight and operations of BLTSSCP. The role collaborates with the governing board and the member organizations and is responsible for all administrative and related activities including management of the human, fiscal and community resources necessary to ensure that the Community Partners program is planned and managed to the highest standards of the industry. The Executive Director represents BLTSSCP to all external constituencies.

LTSS Program Manager: This position will be responsible for managing sub-contracts with the 7 BLTSSCP member organizations that include program guidelines and will develop operational processes internal to BLTSSCP and with ACO/MCOs.

LTSS Care Coordinators: Each of the 7 organizations will hire an LTSS Care Coordinator April 1 to be trained and prepared to begin serving Enrollees on June 1, 2018.

** Funds for hiring an LTSS Care Coordinator in advance roll-over to the Infrastructure budget and are included in the Infrastructure Allocation (tab 5). Each of the 7 organizations is provided with the same amount of funding.

Row 2 - Fringe

Fringe Item	Total Salary	Fringe	Fringe
Fringe Item	$ 170,105.00	24%	$ 40,825
Total Fringe (Program Budget Line 2)			

Total Personnel*	**$ 170,105**

* Should align with Personnel Costs row in Program Budget

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Ongoing training			$ 1,513.38
Total Training and Professional Development (Program Budget Line 3)			**$ 1,513.38**

Provide a description of each Training and Professional Development line item included in the table above:

Based on the experience of the Member organizations, $546/year/FTE has been allocated to support the administration of training for CP employees as well as ongoing training and professional development. The above budget line represents approximately 3 FTEs (approximately 34 FTE months).

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
Executive Director	350	4.5	0.535	$ 842.63
LTSS Program Manager	350	2.1	0.535	$ 393.23
LTSS Care Coordinators	70	28	0.535	$ 1,048.60
			Total Mileage	$ 2,284.45

Travel Expense Description	Cost
Total Mileage	$ 2,284.45
Parking and tolls	$ 1,281.55
Public transportation	
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ 3,566.00**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

In the Prep Budget Period, the LTSS Program Manager and Executive Director will travel to meetings with ACOs and MCOs leaders across across Boston and Eastern Massachusetts. They will also attend MassHealth meetings. In addition, the LTSS Care Coordinators will be hired at each of the 7 organizations and will be expected to travel prior to the program start for trainings, meetings with ACOs and other network providers. Travel expenses include mileage and parking costs.

Row 5 - Equipment

Description of Equipment	Unit Cost	#units or FTEs	Cost
Total Equipment (Program Budget Line 5)			

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost

	A	B	C	D
153	Office supplies, printing, copying, postage			$ 1,297.19
154				
155				
156				
157	**Total Supplies (Program Budget Line 6)**			**$ 1,297.19**

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

Based on the experience of the Member organizations existing LTSS care coordination programs, $39/month/FTE has been allocated for supplies including office supplies, printing, copying, and postage. This is for approximately 3 FTEs.

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
		Total Software Licensing (Program Budget Line 8)	

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
		Total Telecommunications (Program Budget Line 9)	

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

Row 10 - Occupancy

	Occupancy Expense	Total SqFt	Cost/SqFT	Cost
310	Rent			$ 6,494.50
311	Utilities			$ 1,558.68
312	Repair and Maintenance			$ -
313				$ -
314				$ -
315	**Total Occupancy (Program Budget Line 10)**			**$ 8,053.18**

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:

This funding will support 8 different locations including work space for 7 care teams each containing 2 LTSS Care Coordinators and a space for the management team that includes the Executive Director and the LTSS Program Manager. The space will provide flexible work stations for care coordinators who spend the majority of their time in the community but need a place to dock for supervision, documentation, copying, printing, etc. Each of the 8 locations is allocated $811.81 in the prep budget period for rent and $194.84 in the prep budget period for utilities. Each of the 8 locations will provide space for 2 employees (7 locations will provide space for 2 LTSS Care Coordinators and 1 location will provide space for the Executive Director and LTSS Program Manager). This is approximately $200/FTE/month for rent and $48.75/FTE/month for utilities. The members' experience is that these are adequate amounts.

We commit to not allocating more than $25/ square foot for rent.

Row 11 - Other

Community Partner Infrastructure Budget Report - Operational Infrastructure - Prep Budget Period

Row 12 - Operational Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Director of Operations	$ 95,000.00	0.8	3.4	$ 21,381.21
Director of Quality and Analytics	$ 95,000.00	0.8	3.4	$ 21,381.21
Project Manager	$ 75,000.00	0.8	5.5	$ 27,500.00
VP - Controller	$ 128,000.00	0.14	5.5	$ 8,213.33
Budget Director	$ 85,000.00	0.07	5.5	$ 2,727.08
Director of Accounts Receivable	$ 91,250.00	0.105	5.5	$ 4,391.41
Business Analyst	$ 75,000.00	0.42	5.5	$ 14,437.50
Senior Accountant	$ 70,000.00	0.42	5.5	$ 13,475.00
Billing Coordinator	$ 40,000.00	0.7	5.5	$ 12,833.33
Manager of Business Systems	$ 84,482.00	0.07	5.5	$ 2,710.46
	Total Salary	4.325		$ 129,050.53
	Fringe rate	24.0%	Total Fringe	$ 30,972.13
			Total Program Staffing including Fringe (Infrastructure Budget Line 12)	**$ 160,022.66**

Row 13 - Other Operational Expenses

Description of Expense	Cost
Financial software (setup, mgmt, license)	$ 6,300.00
Design of logo and brand ($100/hour * 15 hours)	$ 1,500.00
Website development and hosting	$ 12,500.00
Printing of a brochure for ACOs (500@ $2 each)	$ 1,000.00
Total Other Operational Expenses (Infrastructure Budget Line 13)	**$ 21,300.00**

Provide a description of each retention expense line item included in the table above, how each will assist in meeting the terms of the CP's contract and how the costs were determined:

As part of standing up the financial system for the program, it will be necessary to license, set up, and expand the users of the software for all the payors and payees. This is more financial set up and management than IT.

Marketing funds will be used to develop a website, logo and basic promotional materials for Enrollees and providers.

Community Partner Infrastructure Budget Report - Indirect Cost/Administrative Overhead- Prep Budget Period

Row 14 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead (Program Budget Line 14)		

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

BLTSSCP is choosing not to include an administrative overhead rate in the infrastructure budget for two reasons:
1) BLTSSCP is the management company for administering the LTSS CP program on behalf of 7 Consortium Entities. We consider BLTSSCP itself as administrative overhead for the LTSS CP program.
2) In the infrastructure budget, there are costs that are not within the BLTSSCP organization itself. For example, financial services are contracted out to Bay Cove and IT services are contracted out to Vinfen. Our assumption is that the administrative overhead rate within the program budget will cover administration of those additional services.

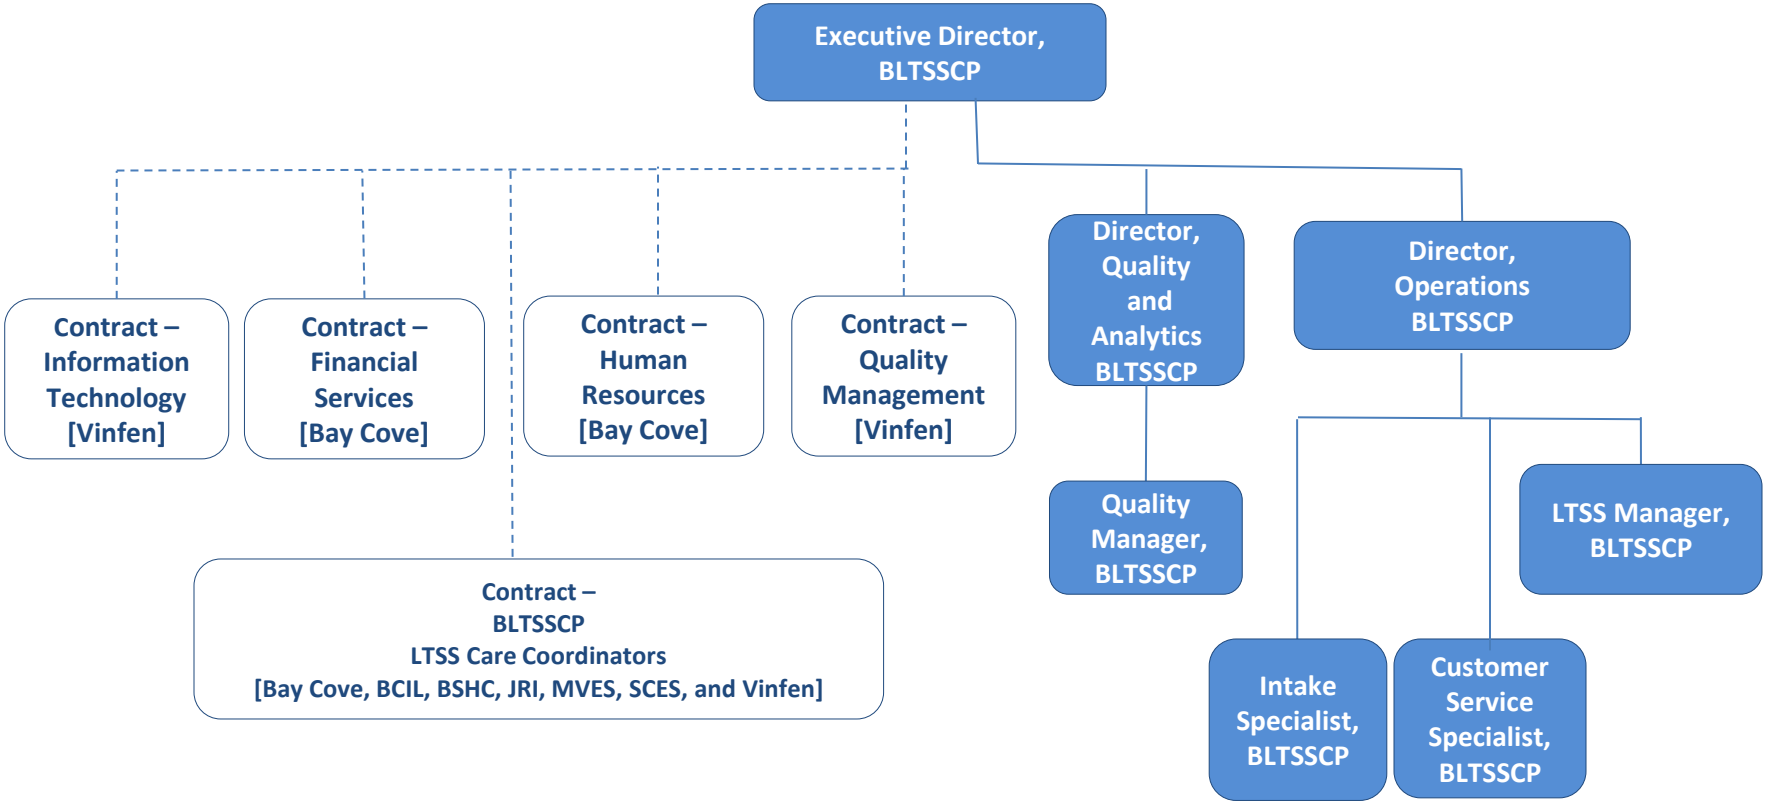
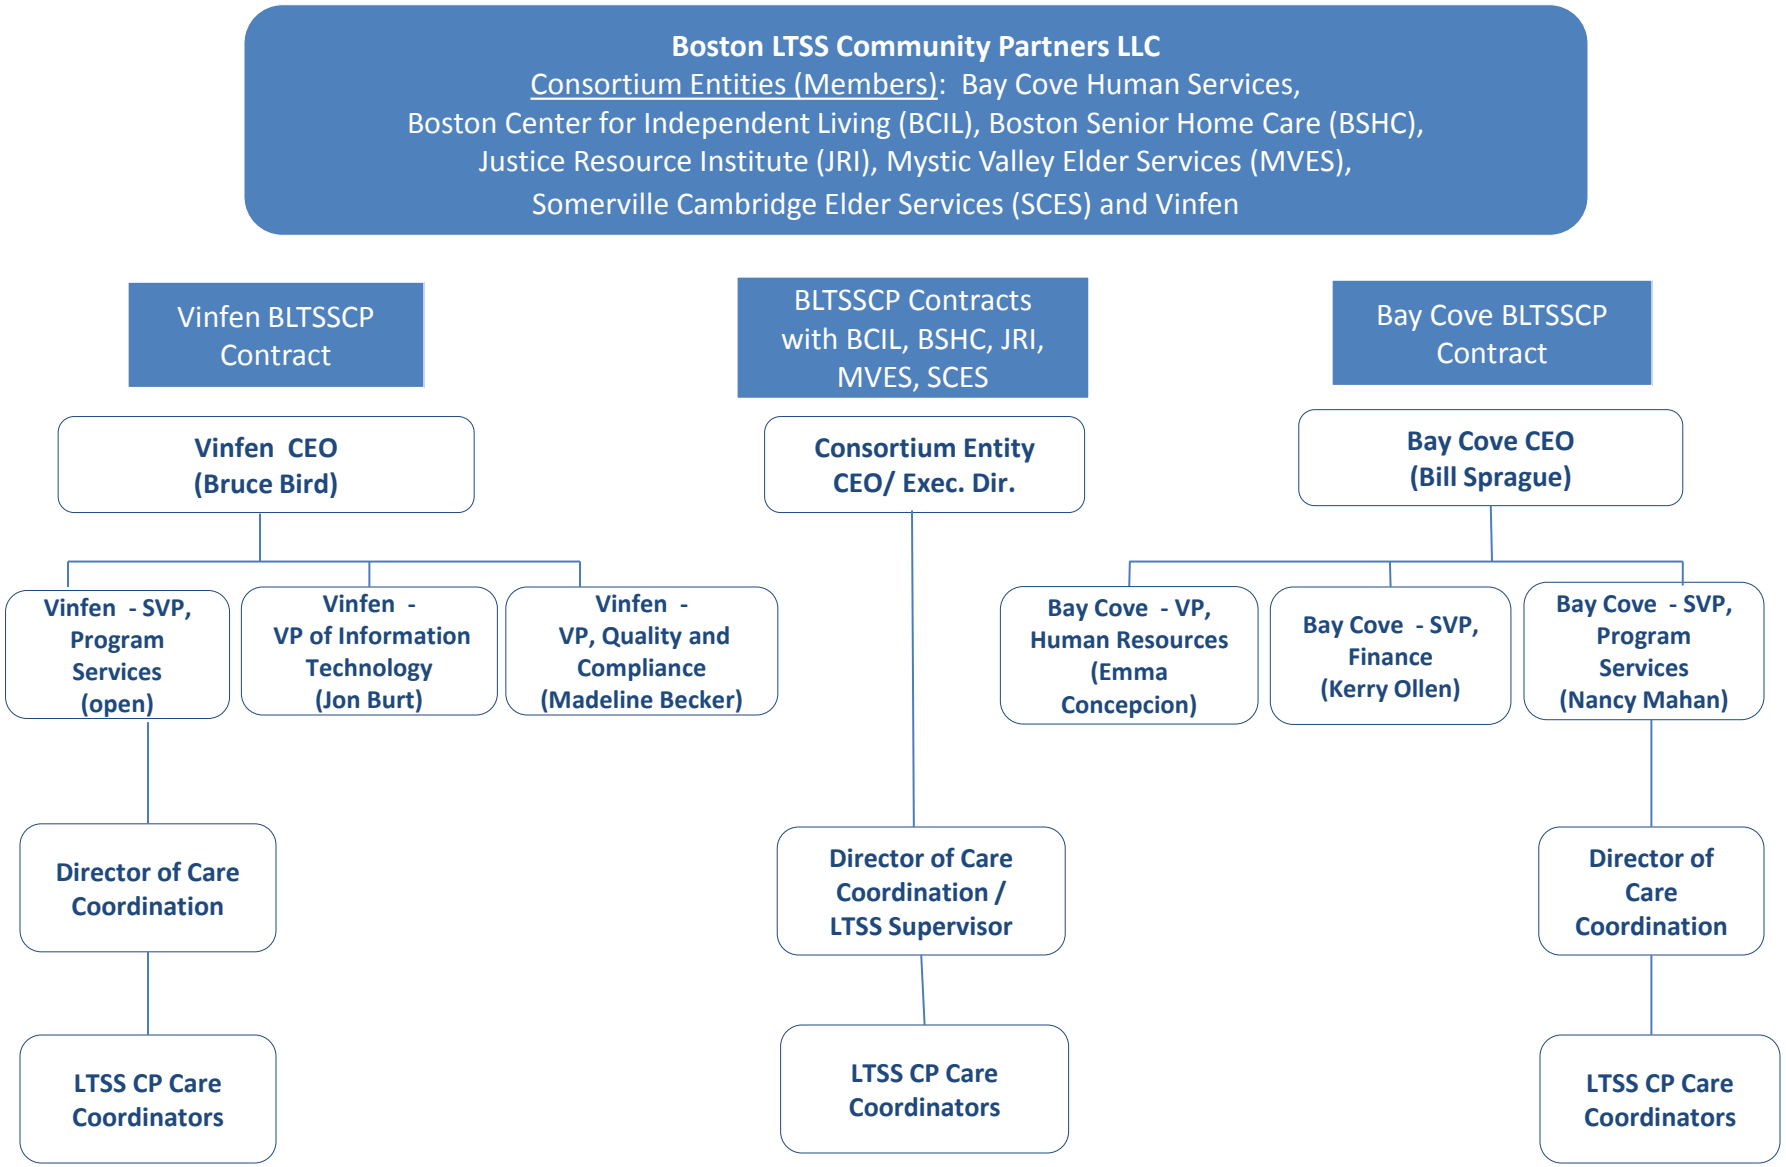
Attachment A – BLTSSCP Organizational Chart

Boston LTSS Community Partners LLC

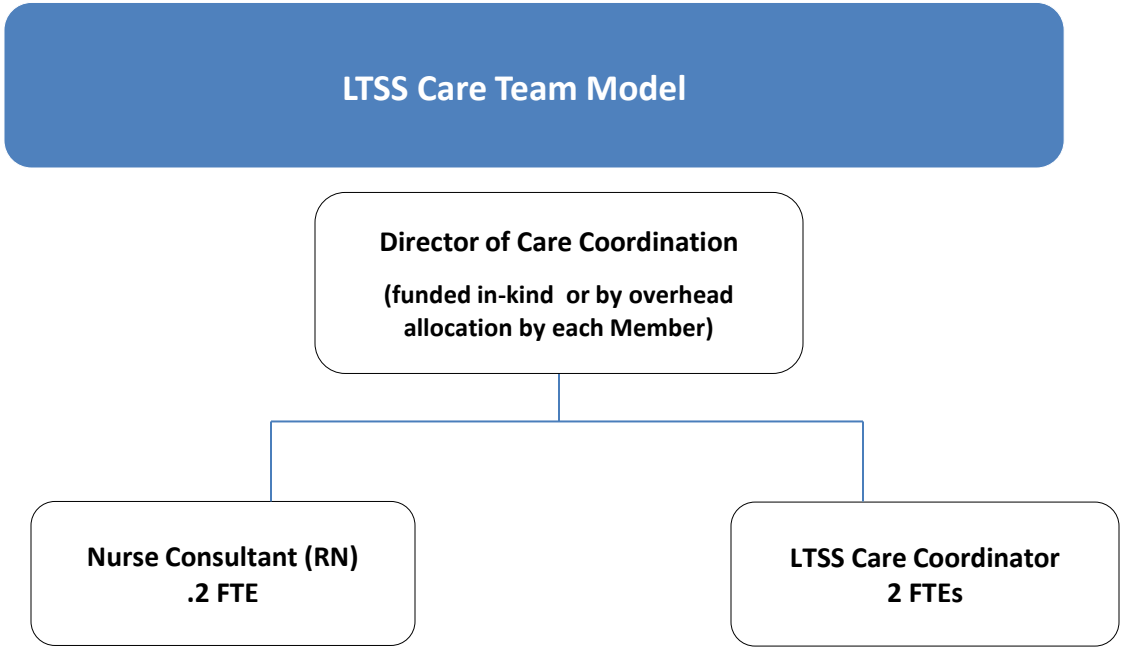
Consortium Entities (Members): Bay Cove Human Services, Boston Center for Independent Living (BCIL), Boston Senior Home Care (BSHC), Justice Resource Institute (JRI), Mystic Valley Elder Services (MVES), Somerville Cambridge Elder Services (SCES), and Vinfen



Attachment B – BLTSSCP Organizational Chart of Contracted Services



Attachment C – Care Team Organizational Chart



7.5 E Personnel and Staffing

Provide proposed staffing plan to perform the Contractor Responsibilities set forth in Attachment A, including fully implementing required scope of CP Supports and administrative aspects of Contract

The Members of BLTSSCP have extensive experience developing new programs that must be launched and staffed within short time frames. For example, in 2009, Bay Cove and Vinfen each implemented the newly awarded DMH CBFS programs on time, re-designing jobs of existing employees and hiring hundreds of new staff. Boston Senior Home Care (BSHC), Boston Center for Independent Living (BCIL), Mystic Valley Elder Services (MVES) and Somerville Cambridge Elder Services (SCES) staffed up quickly to meet the needs of the One Care plans Long Terms Services and Supports Coordinator (LTSC).

Each BLTSSCP Member will provide LTSS Care Coordination to Enrollees and will employ an outreach model where each LTSS Care Coordinator has an office as a home base, but will accomplish their work outside the limits of an office: in an Enrollee's home or preferred location in the community; in some cases on the street; very often at locations of other community support and social services providers; or in ACO/MCO medical and behavioral health clinics. Decisions on care team locations and the number of Enrollees assigned to each team will be based on several factors: the number of ACO/MCO referrals, the needs of the Enrollee populations, the expertise of each Member in serving LTSS sub-populations, and where Enrollees live. Prior to the start of the program, BLTSSCP Members will agree to an algorithm for assigning the Enrollees to a particular Member for LTSS Care Coordination. The assignment algorithm will be based on the needs of the Enrollee, the expertise of the Member in serving certain populations, existing relationship between the Enrollee and a Member organization and geography.

As discussed in **Section 7.2.B**, key administrative functions will be performed by a small BLTSSCP central management team or delegated to a Member to perform.

1. Provide organizational chart that identifies personnel, senior managers, and other staff by title to be assigned to accomplish Contractor Responsibilities described in Attachment A

See **Attachment 4:** BLTSSCP organizational chart and **Attachment 5:** BLTSSCP care team organizational chart.

2. Sample staffing model for number of Enrollees in each Service Area, including the number of FTEs for supervision, administration, Care Management/Care Coordination positions

BLTSSCP has developed a care team model that will be adapted by each Member and support caseloads of between 100 and 200 Enrollees. See **Attachment 6:** BLTSSCP care team organizational chart for care team composition. Each team will consist of an LTSS Care Coordinator with a caseload of 80 Enrollees in Y1, 90 Enrollees in Y2, and 100 Enrollees in Y3-Y5, 10% of an RN Consultant and 25% of an LTSS supervisor for the LTSS Care Coordinators. Please see **Attachment 7** for Care Team job descriptions. The table below summarizes the number of FTEs for each position that will be required when BLTSSCP Enrollment is at

Capacity (1,624 Enrollees). Staffing will be adjusted based on number of Enrollees as care teams are starting up.

Position	Number of FTEs [assumes 1,624 Enrollees]
LTSS Supervisor (Director of Care Coordination) .25 FTE appointed in each Member)	4
LTSS Care Coordinator	16
RN Consultant (.1 for every 100 Enrollees)	1.6
Total	**21.6**

For administrative functions, BLTSSCP will employ a central management team to provide EOHHS contract oversight and manage central operations such as intake of Enrollees, referral to care teams, grievances, marketing, ACO/MCO contract development, and management of LTSS Care Coordination contracts with Member organizations. The BLTSSCP management team will include an Executive Director, Director of Quality and Analytics, Director of Operations, LTSS Manager, Customer Service Specialist and Intake Specialist. (Please reference **Attachment 2** in Section 7.2B for job descriptions of these central management positions). The central management team will contract with Bay Cove for financial services and HR, and with Vinfen for IT services, website and quality management. The staff positions required for those contracted services are detailed in **Attachment C**: Budget Narrative and job descriptions are detailed in **Attachment 7**.

3. Describe recruitment plans, including timelines to recruit staff for any personnel positions not currently filled, and job descriptions and qualifications for each personnel position.

Each BLTSSCP Member has a professional HR Department responsible for meeting the recruitment needs across service types while promoting staff retention. The seven Members have a combined workforce of more than 8,000 employees. Each has extensive experience at both "staffing up" new programs and new service types, and sustaining a capable, well trained and engaged mobile workforce.

As soon as BLTSSCP learns of its LTSS CP award, the BLTSSCP will launch both internal and external recruitment plans in order to fill key management positions such as Executive Director and Deputy Director. With job descriptions developed and finalized in advance (see attached), recruitment of these key positions will begin in early November 2017. In January each Member will allocate part of an existing staff person to serve as Director of Care Coordination for the LTSS CP. In mid-March, each CE will hire an LTSS Care Coordinator. DSRIP funds will be used to subsidize the LTSS Care Coordinators while ramping up to full caseloads. The Directors of Care Coordination, approximately a .1FTE to .2FTE position in each Member, will be self-funded by each Member. The following is the timeline for filling key positions:

Recruiting	Start date	Key Positions
Sep 2017- Mar 2018	Jan 2017- Mar 2018	BLTSSCP Executive Director, BLTSSCP Project Manager, BLTSSCP IT Systems Administrator,

		BLTSSCP Financial Analyst, Director of Care Coordination (appointed / allocated / hired by each Member)
Dec 2017 – Apr 2018	Feb 2018- Apr 2018	BLTSSCP LTSS Manager, BLTSSCP Director of Operations, BLTSSCP Director of Quality and Analytics, BLTSSCP NP and Psychiatrist, LTSS Supervisors (appointed / allocated), CCIT Systems Support
Mar 2018 – Jun 2018	May 2018- Jun 2018	LTSS Care Coordinators (1 FTE for each Consortium Entity), Nurse Consultant allocated as needed, IT User Support Specialist, BLTSSCP Intake Specialist, BLTSSCP Customer Service Specialist

Our recruitment campaigns will include widespread advertising; outreach to career fairs, trade organizations, community based organizations and cultural centers; college and certification program outreach; and by sourcing through online resume mining. Our campaigns will also benefit from sourcing internally. Each Member promotes a strong employee referral program as well as a commitment to promoting from within. Each has demonstrated experience in launching new programs through the promotion of qualified candidates and expects to make the most of this practice to staff our CP care teams. This multi-pronged approach to recruitment will yield both internal and external candidates and meet timelines. Members operate in time-sensitive processing of interview candidates to quickly complete screenings and hiring, expediting drug testing, background and reference checks for selected candidates. Our goal will be to have official offers made within 4 weeks of initial screening, which include program level interviews and drug testing, background and references checks. Through multi-faceted recruitment approaches and expedited hiring processes, we will ensure sufficient staff are hired, oriented and trained so that they can effectively begin outreach / engagement activities on June 1, 2018.

4. Describe plan to recruit and hire staff from cultural/linguistic communities served

The Members of BLTSSCP are committed to hiring staff that are reflective of those we serve. To exemplify this principle, in April 2017 Vinfen launched a new recruitment and retention campaign: "My Job, My Community, My Vinfen." This tagline was selected not by Vinfen leadership, but by direct care staff and front line managers. Extensive focus group review further reinforces that our employees identify strongly with the programs, clients, and communities with which they work. BLTSSCP will target its advertising specific to the geographic and demographic communities our Community Partner services will reach in order to meet our staffing needs.

As noted above, each Member will use a variety of strategies and sources to recruit and on-board personnel needed, including a combination of internet advertising, social media, print media, billboards, and advertisements on public transit. As in past campaigns, Members will: use newspapers, websites, and radio spots that reach ethnic and cultural communities of those we serve; attend Boston's Annual Diversity Employment Day Career Fair as well as Boston's Bilingual and Diversity Job Fair; advertise in print media such as Bay Windows; and outreach to cultural organizations such as the Haitian Multi-Service Center and to colleges and universities

with diverse student populations. Through these efforts, we intend to continue our practices of hiring staff who are bilingual and bicultural to match the needs of targeted populations.

5. Describe proposed training, orientation plans and modules for staff

As noted earlier, each Member of BLTSSCP has a centralized Human Resources Department serving a combined workforce of more than 8,000 employees. Each Member also has a robust training system which starts with weekly new employee orientation. New employee orientations are comprehensive and inclusive of: agency history and mission, organizational structure, overview of populations served, agency policies and procedures, employee relations, professional ethics, diversity, communication systems, culture of caring, and training and advancement opportunities. Mandatory trainings such Compliance, Universal Precautions, and Sexual Harassment are included in this initial new employee orientation.

After completing new hire orientation, employees begin their program-specific orientation and training. While each Member's Training department is staffed with full time trainers, each also benefits from a cadre of Subject Matter Experts - operational staff within each service type that offer specialized training complimentary to the training department courses. For our LTSS Care Coordinators and RN Consultants, program specific modules will include the following required trainings:

- Overview of the LTSS CP program and approach
- Overview of LTSS populations including those with brain injuries, cognitive impairments, physical disabilities, autism and intellectual/developmental disabilities;
- LTSS Care Plan development process and implementation, including Care Team development and the principles of Self Determination and Community First;
- Overview of MassHealth state plan LTSS services and eligibility criteria, as well as choice counseling and person centered planning processes(using EOHHS approved curriculum);
- Orientation to roles/responsibilities of state/community/municipal agencies and organizations
- Overview of independent living movement/recoveryprinciples(accessibility/ accommodations;
- Orientation to local resources and community mapping techniques
- Orientation to national research and advances
- Orientation to health care integration strategies such as Population Health Management
- Orientation to Enrollee Engagement strategies including Motivational Interviewing, stage of change and harm reduction techniques;
- Orientation to Health and Wellness Principles and Coaching tools
- Orientation to available human, legal, civil rights, community, LTSS, SDH, mental health, community health, SUD services and other resources
- Knowledge of empowerment and self-advocacy techniques
- Cultural competencies training including cultural, religious, ethnic, disability, and gender awareness and resources;
- Enrollee Rights and Protections;
- Conflict of interest and ethics policies, and conflict of interest mitigation strategies
- Orientation to Care Coordination Information Technology (CCIT) system.

6. Describe staff retention strategy

BLTSSCP Members have robust strategies for effectively promoting retention of talented personnel. The Members' collective experience validates that staff retention is highly correlated with engagement in Mission, as employees seek to make a meaningful contribution, to make a difference, and to positively impact people served. Leadership teams in turn value their employees and the day to day contributions they make to those served. Retention strategies employed by each Member promote such cultures of dignity and respect. They promote cultures of flexibility, of team work, and they embrace diversity. They enable employees to attend to both their professional responsibilities and their commitment to home and family. And they invite ongoing dialogue between management and direct care staff through a variety of avenues including staff satisfaction and engagement surveys, direct care roundtables and town meetings with the CEO, suggestion boxes, and the promotion of an open door policy. Formal retention strategies employed by each Member are outlined below:

- Competitive wages within the Human Services Industry: Each Member continually assesses how its wages compare to those of its competitors. Through careful financial stewardship, each has been able to remain competitive within the industry.

- Outstanding Employee Benefits: Member employees regularly cite generous benefits as something important to them and as something that factors into their decision to maintain their tenure with their employer. Each Member continuously assesses and adjusts its benefits program to offer a package that supports an employee's personal and family needs, and may include any combination of: health insurance, dental insurance, vision plan; retirement plan; 403(b) Tax-deferred annuity plan; vacation, sick, holiday and personal time; life insurance; Long-term Disability Insurance; Commuter Benefits; Employee Assistance Program; Healthcare and Dependent Care Spending Plans; Professional Development and Educational Assistance; Compassionate Relief and Natural Disaster Programs.

- Training / Staff Development: Each Member promotes and embodies the principles and practices fundamental to Learning Organizations. Each is committed to doing their part to promote the development of our workforces, personally and professionally. Whether through training refresher or recertification courses or newly developed classes to promote evidence based practices, the Members' collective workforce is continually receiving the information they need to perform most effectively and advance in their careers. New Managers are offered training specific to the administrative functions of their new role while Basic and Advanced Supervisory Skill Trainings offer modules specific to becoming an effective supervisor; employee coaching, conflict resolution; diversity in the workplace; interviewing and hiring; and tough issues. All Members offer Employees the opportunity to attend external trainings, workshops and CEU's (as applicable) to promote their professional development.

- Employee Recognition: Each Member promotes employee recognition in a variety of ways. As such, it is an intrinsic part of our respective cultures. Sample Employee Recognition programs include: years of service awards, including gifts (monetary or items); quality of care awards; monthly themed awards by job category; peer recognition programs and awards; Employee Newsletters; scholarships; for employees pursuing higher education, fee reimbursements; holiday and seasonal celebrations highlighting staff contributions.

Effective retention strategies are particularly essential for long term growth at a time when the landscape of the human services industry is overwhelmed with challenges, from the consequences of over 3 decades of level funding, to high employee burn out rates, to losing a percentage of the workforce to higher paying opportunities in the for-profit world. With a balanced approach to recruitment and retention, BLTSSCP Members are prepared to meet the scope and capacity of the LTSS Community Partner Program.

7.2 B Organizational Overview

1. Provide a brief summary of organizational history: date of first incorporation; organizational goals; relevance of Care Management and Care Coordination to mission

Boston LTSS Community Partners (BLTSSCP) is a Limited Liability Corporation formed by Bay Cove Human Services (Bay Cove), Vinfen Corporation (Vinfen), Somerville Cambridge Elder Services (SCES), Mystic Valley Elder Services (MVES), Boston Center for Independent Living (BCIL), Justice Resource Institute (JRI), and Boston Senior Home Care (BSHC) in May 2017 to provide Long Term Services and Supports Community Partner (LTSS CP) Services in the Greater Boston Region and single Service Areas in the Southern and Northern Regions. All Consortium Entities (Members) of BLTSSCP have been anticipating and preparing for the LTSS CP program and the larger MassHealth Delivery Reform initiative which promise to alter the landscape of care and support for people with disabilities in a manner that all Members fully support.

BLTSSCP Members have had decades of experience serving a wide range of people with disabilities, including those with LTSS needs, and representing the varying cultural and linguistic communities of Eastern Massachusetts. The Members have annual operating budgets adding up to nearly $570 million, employ over 8,000 staff and serve over 70,000 people in Eastern Massachusetts. Members have extensive affiliations within a majority of communities in Greater Boston, Malden and Brockton areas including long-standing relationships with schools, faith communities, local municipal organizations, social service organizations, home-based services providers, police and the courts. Each Member has been embedded in the fabric of these communities for decades, and is recognized as the "go to" service provider.

Each Member is committed to care management and coordination for people with LTSS needs and each Member has an impressive experience and history that it brings to the LTSS CP program:

- Bay Cove and Vinfen provide care management for people with Serious Mental Illness through Community Based Flexible Support (CBFS) programs funded by DMH and through the One Care Health Home program funded by Commonwealth Care Alliance. In CBFS, they serve over 3,500 individuals; in the One Care Health Home they serve nearly 400.
- As ASAPs, BSHC, MVES and SCES assist elders and people with disabilities to live in the community with dignity and independence. Through state Home Care program, SCO programs and One Care, LTSS coordination is provided to a range of people with disabilities.
- Bay Cove and Vinfen, as service providers for people with Intellectual/Development Disabilities, are committed to care coordination as an integral part of supporting individuals and coordinate with social service agencies, health care providers, DDS and families.
- JRI's commitment to care management and care coordination has been built through 20 years of successful and innovative programs for DCF as a Commonworks lead, Southeast Regional Resource Center, and Family Networks Lead Agency. JRI is the Community Service Agency (CSA) in four regions of the Commonwealth providing Intensive Care Coordination for youth with serious emotional disturbance (SED) and their families.
- BCIL has been a champion of care coordination for people with disabilities both in its role providing LTSS coordination, PCA services and options counseling as well as in its role advocating for integrated systems of community-based LTSS care in public forums.

2. Describe process of administering Contract: processes and resources for human resources, quality management, compliance, billing, financial accounting, facilities, and legal support

All Members of BLTSSCP have experience managing large, complex government contracts and have built a reputation for excellence in partnering with government agencies to provide human services to a wide range of individuals and families in need. To administer the LTSS CP contract, BLTSSCP will hire a central management team to provide overall contract management for its LTSS CP contract with EOHHS; develop contracts with ACO/MCOs; perform intake and reconciliation functions for referrals and assignment to care teams; and provide oversight on utilization and quality management functions. For some functions such as finance, IT, legal, and quality, BLTSSCP will leverage the expertise and robust departments of its Members, Bay Cove and Vinfen. The central BLTSSCP management team will include an Executive Director, Deputy Director and LTSS CP Program Manager. The central management team will be responsible for ensuring that standards and requirements of the LTSS CP Contract are upheld and provided by each Member. The following services will be contracted to Members:

- Care Teams: Each Member will develop a locally-based care team composed of LTSS Care Coordinators and part-time RN to provide LTSS CP supports to Enrollees and allocate part of an existing staff to serve as Director of Care Coordination and supervise team members.
- Human Resources: Each Member will recruit, hire, and train its own LTSS CP care team employees based on standards developed by BLTSSCP Board of Members and the Executive Director. The organizations have long and successful histories of managing HR functions and are successful in retaining a diverse workforce that provides culturally and linguistically responsive services. Bay Cove will provide HR services to the BLTSSCP management team.
- Legal: Members will offer legal support through in-house or contracted General Counsels.
- Quality Management and Compliance: Each Member has a proven track record of robust quality and compliance systems. Each Member will be responsible for implementing systems and actions to meet Quality and Compliance requirements of federal and state regulations, the standards set by MassHealth for CPs, and the provisions of contracts with ACOs and MCOs. Vinfen's VP of Quality and Compliance of Vinfen, will provide oversight of all these activities, leading the BLTSSS Quality Management Committee with all Members participating.
- Billing and Financial Accounting: Bay Cove will manage the financial services for BLTSSCP. Bay Cove currently manages a financial system with effective cash management, banking, billing, collections and financial reporting for about $105M annually, including contracts with a wide array of public sector funding sources, including DMH, DDS, DPH, MassHealth, MassHealth MCOs, and commercial Behavioral Health payers. Annual audits and Massachusetts Uniform Financial Reports of all Members demonstrate sound financial performance, and strong and effective internal controls in financial management
- Facilities: Members will manage facilities for their care teams; Bay Cove will manage the facility of BLTSSCP's central management team.
- Information Technology: Vinfen will manage BLTSSCP's care coordination information technology (CCIT) system software and data warehouses. Each organization will be responsible for purchasing and managing the IT needs of the LTSS CP care teams. **Section 7.2.E** describes the plans for this CCIT system.

- Marketing Support: While the Executive Director and Deputy Director will do much of the in-person marketing with ACOs/MCOs, and care coordinators will market to assigned Enrollees, Vinfen will provide the back office marketing support.

Of note, Bay Cove and Vinfen are participating as Members along with one other Member to submit a BH CP Bid. If both Bids are successful, the Members will seek administrative efficiencies by centralizing certain functions such as finance, IT management, marketing, and quality in a management company. In addition, two of the central management positions – Executive Director and Deputy Director – will work across the BH and LTSS Community Partner programs.

3. Describe change management processes and capacity and preparation to deliver internal cultural change and systematic change towards integrated care

Members of BLTSSCP have significant experience managing large scale systems changes, and in creating working models with the cultural and practice changes needed. To accomplish systems changes, Members have utilized a number of change management strategies: engagement of staff at all levels, obtaining continuous feedback from persons served and staff, conducting focus groups and training sessions to address cultural and practice model changes, and above all, reviewing and analyzing data on program performance and outcomes to continuously shape the change process and model development. These approaches serve to promote key phases of change management: creating awareness of the mission and business reasons for change; risks if change is not achieved; assessing readiness; ongoing communication of change management map; providing tools for change management; and training of new skills/knowledge needed. Members have learned over the years the importance of managing resistance and acknowledging successes in an ongoing way.

In July of 2009, Bay Cove and Vinfen were each awarded DMH CBFS contracts of significant scale (totaling over 3,500 clients). To implement CBFS, both needed to convert previously-funded DMH programs into the CBFS model, move into new geographies, develop new staff roles, hire hundreds of new employees, re-train existing employees, hire staff from other providers and implement electronic systems to collect and manage data. In addition, Bay Cove, JRI and Vinfen have worked in close partnership with DDS on DDS initiatives such as Employment First and the closing of sheltered workshops, Positive Behavioral Supports, Self Advocacy, and requirements necessary to comply with the CMS Final Rule. These changing landscapes of service provision have required system changes within provider agencies including additions and modifications to staff training, quality systems and reporting, housing, clinical plans, and documentation. Based on collective lessons learned and many successes, we are confident in our ability to manage the requirements of the LTSS CP program and the challenges of working with multiple stakeholders. BLTSSCP can and will facilitate the indicated changes in an effective and timely way.

4. Submit résumés of individuals in Bidder's organization holding the following positions and job descriptions for such positions (does not count towards page limit):

BLTSSCP will recruit and hire a central management team to oversee the LTSS CP Contract with EOHHS. The management team will include the following positions and the individuals that are filling those roles. Please see attached resumes and job descriptions

- Executive Director (Acting): Bruce Bird, Ph.D and Deputy Director (Acting): Bill Sprague
- Chief Financial Officer: Kerry Ollen (SVP and CFO for Bay Cove)

- Director of Care Coordination: This role within each Member organization will supervise each Member's LTSS Care Team.
- Director of Quality Management / Designated Compliance Officer: Madeline Becker, Ph.D. (VP of Quality and Compliance for Vinfen)
- Director of Information Technology: Jon Burt (VP of Information Technology for Vinfen)

7.2 C Governance Structure and Consumer Advisory Board

1a. Describe the responsibilities and functions that each Consortium Entity (Member) will perform under the Contract

BLTSSCP is the Bidder for the LTSS CP program and is comprised of seven Consortium Entities (Members): Bay Cove, Vinfen, Somerville Cambridge Elder Services (SCES), Mystic Valley Elder Services (MVES), Boston Center for Independent Living (BCIL), Justice Resource Institute (JRI), and Boston Senior Home Care (BSHC) which are also its only Members. BLTSSCP is a single legal entity comprised of seven Members, one of the Bidder configurations allowed by MassHealth (see **Section 2.1.A.1** of **Attachment A: Model Contract for Behavioral Health CP**). BLTSSCP is governed by its Members. As described above in **Section 7.2.B.2**, each Member will have the following responsibilities and functions:

- Bay Cove: operate LTSS CP care teams that will serve LTSS CP Enrollees; recruit, hire, train and manage the employees who comprise the LTSS CP care teams; provide financial management, billing and collection services for BLTSSCP
- Vinfen: operate LTSS CP care teams that will serve LTSS CP Enrollees; recruit, hire, train and manage the employees who comprise the LTSS CP care teams; manage the central BLTSSCP Information Technology systems including Care Coordination IT (CCIT) software and data warehouse and exchanges; oversee quality management and compliance; perform marketing support functions such as creation of website and marketing materials
- Somerville Cambridge Elder Services, Mystic Valley Elder Services, Boston Center for Independent Living, Justice Resource Institute, and Boston Senior Home Care: operate LTSS CP care teams that will serve LTSS CP Enrollees; recruit, hire, train and manage the employees who comprise the LTSS CP care teams
- BLTSSCP central management team: oversee LTSS CP Contract with EOHHS; develop relationships and contracts with ACO/MCOs; oversee contracts with Consortium Entities for LTSS CP care teams to ensure quality control; provide intake/enrollment services for MassHealth and ACO referrals for the LTSS CP; develop Consumer Advisory Boards; oversee utilization management

1b. Describe how the Bidder will manage the entity to ensure smooth performance under the Contract:

The Bidder's central management team, reporting to the Members of BLTSSCP, will oversee the contracts with Member for each particular service. For examples, Bay Cove will have a contract with BLTSSCP to provide financial services, billing and collections. The Executive Director of BLTSSCP will ensure Bay Cove is meeting the terms of its contract to provide financial services. Similarly, the Executive Director will develop contracts with each Consortium Entity to establish care teams that provide the LTSS CP coordination services. The BLTSSCP central management team will ensure that the seven Members are implementing LTSS CP coordination teams to the standards required by MassHealth and proposed in this Bid including adequate staffing of and supervision for LTSS coordinators; and the key quality measures specified in **Appendix C: LTSS CP Quality and Accountability**.

1c Describe how the Bidder will allocate DSRIP funding to the entity:

The Bidder has developed a five year LTSS CP program budget that allocates DSRIP funding to each function and each Member. Each Member will receive a monthly per member, per month payment for the core LTSS CP support services that equals 90% of the MassHealth payment as stated in **Appendix F: LTSS Community Partner Payment Rates**. That payment will fund care teams that are locally based and provided by Bay Cove, BSHC, BCIL, JRI, MVES, SCES and Vinfen. The remainder of the MassHealth payment (10%) described in **Appendix F: LTSS Community Partner Payment Rates** will be used to support administrative functions such as IT, finance, quality, contract management, ACO relationship development and consumer advisory boards that are located in the BLTSSCP central management team or sub-contracted to BLTSSCP Members. As described above in **Section 7.2.B.2**, BLTSSCP will contract with two Members - Bay Cove and Vinfen - to perform key functions according to the budget. The BLTSSCP central management team will be supported both through a DSRIP allocation and through the allocation of 10% of the base MassHealth PMPM payment. In addition, as described in **Attachment B: Budget Report and Attachment C: Budget Narrative** each of the seven Members will be provided with supplemental funds of $20,000 in the first year to support the hiring of an LTSS Care Coordinator in advance of having a full caseload. DSRIP funding will also support each Member in the following ways: support for purchase of laptop computers for each LTSS Care Coordinator, purchase of Care Coordination Information Technology (CCIT) license fees, configuration and development of the CCIT.

1d Describe the Bidder's protocols for conflict resolution with the entity:

The Operating Agreement of BLTSSCP defines the processes of the Board of Managers and includes the framework of a more formal conflict resolution process. We will employ a collaborative approach to conflict resolution between Members. We will view conflict as an opportunity to promote greater cohesion, and will invest the time and resources indicated to find a resolution that is acceptable to all.

2. The Bidder shall describe the policy and decision-making process of its Governance Structure, including:

a. The roles of the Bidder, the Bidder's Consortium Entities and Affiliated Partners as part of the decision-making process:

The Bidder is BLTSSCP and its Governance Structure is comprised of seven Members: Bay Cove, Boston Center for Independent Living, Boston Senior Home Care, Justice Resource Institute, Mystic Valley Elder Services, Somerville Cambridge Elder Services, and Vinfen. The BLTSSCP Governance including policy and decision-making processes are detailed in the BLTSSCP Operating Agreement which has been agreed to and adopted by all Members. A unanimous vote of the Founding Members is required to make the following decisions: expansion of the BLTSSCP service area, the addition of a new Member to the BLTSSCP Governance Structure, approval of contractual arrangements with ACO/MCOs that are beyond the MassHealth required elements, hiring an Executive Director to manage BLTSSCP, amending the Operating Agreement, and exit of any of the Founding Members.

b. The Bidder's processes for making decisions on partnership and financial matters:

As it exists today, BLTSSCP is a Consortium of seven Entities. A mutually agreed upon Operating Agreement has been executed between the seven Consortium Entities (Members) which clearly delineates policy and decision making processes. These processes will be implemented when the Governing Board of BLTSSCP is making financial decisions, for example in relation to the contract to be executed with EOHHS and the expense of a Care Coordination System to be implemented within each respective Member organization. Processes to determine policy and decision making will also be implemented when BLTSSCP is executing partnership agreements, for example with ACO/MCOs.

3. The Bidder shall describe its strategy for forming and utilizing a consumer advisory board, as described in Section 2.1 of Attachment A. Such description shall include:

a. The Bidder's plan for forming the consumer advisory board, including procedures to ensure the board is representative of Engaged Enrollees, family Entities, and other caregivers that reflect the diversity of the Service Area(s) for which the Bidder is bidding:

MassHealth's restructuring and reform planning recognizes that multiple stakeholders are essential to delivering key goals of the overall initiative. BLTSSCP affirms that the goals of improving Enrollees' experiences and health outcomes will more readily progress with the learning and input of a robust Consumer Advisory Board (CAB) in place. Therefore, BLTSSCP intends to form and utilize a CAB. The BLTSS Program Manager will be responsible for developing the CAB and holding three meetings each year.

In 2012, Elna Nagasako, MD, PhD, MPH of Community Catalyst authored a paper highlighting national best practices that serve to engage consumers in providing meaningful input in emerging health care delivery services. As Dr. Nagasako contends, CABs are imperative to successful innovations in health care. A robust CAB will inform BLTSSCP's strategies and further promote our mission. As such, BLTSSCP will apply the principles and practices as set forth in her brief [1.]

- Include consumers at the highest possible level of governance and input
- Ensure that the CAB recruitment processes identifies people who are representative of our Enrollees
- Demonstrate commitment to meaningful involvement of the CAB by dedicating sufficient resources
- Promote engagement in CAB by minimizing barriers to meaningful involvement. For example, BLTSSCP will ensure meeting times work for the majority of CAB members, ensure that meetings occur in accessible space near public transportation and provide stipends to support transportation needs. BLTSSCP will also ensure for needed translation supports and stipends to support family care needs
- Ensure that the CAB provide meaningful feedback in assessing and evaluating activities and processes central to BLTSSCP's mission such as access to care, quality of care, outcomes, Enrollee engagement and satisfaction, and the provision of ongoing input in improving member experience and system responsiveness

b. What information or issues that Bidder intends to bring to the consumer advisory board and the processes and procedures the consumer advisory board will follow in considering such matters:

The CAB agenda will include equal parts reporting and listening. BLTSSCP management team, and the seven Consortium Entities will provide reports and updates on topics such as access to and utilization of all services process and outcome measures of quality, Enrollee engagement and satisfaction. In addition, the CAB meeting will serve as a focus group for the BLTSSCP Executive Director and the seven Consortium Entities, eliciting feedback from CAB participants on key topics such as coordination with primary care, Enrollee engagement, and other key questions or practices that BLTSSCP is grappling with.

CAB members will be provided with an agenda one week in advance of each meeting so that they can reflect and provide thoughtful feedback. Leadership staff from each Consortium Entity will participate as active listeners in CAB meetings. Each meeting (three per year) will include a formal review of minutes, considerations given to CAB recommendations and a review of action steps and/or changes made in response to the CAB's recommendations.

c. How recommendations from the consumer advisory board will be incorporated into the Bidder's strategic plan and operations:

Representatives of BLTSSCP will review CAB recommendations with the BLTSSCP Governing Board, BLTSS Executive Director and care team supervisors of each Member. They will consider and prioritize action steps that can respond to and operationalize CAB recommendations. Prioritized action steps, progress and changes made in response to CAB recommendations will be reported on at the next CAB meeting.

7.2 D Experience Serving People

1. All Members comprising the Boston LTSS Community Partners (BLTSSCP) have significant long term and comprehensive experience in supporting people with complex LTSS needs, experience that extends to their families and caregivers as well. For over 40 years, each of the Members has responded to the complexity of needs of individuals coming from institutional care, individuals who benefit from an alternative to institutional care, and individuals living in the community who, due to the intricacies of their needs and situations, are prioritized for services and supports. The Members have proven track records in demonstrating commitment and in effectively supporting people in community settings through integration of care across a wide range of services. The roles of families and caregivers have been fortified and sustained through the development of collaborative teams working on behalf of each person. Please refer to the Table at the end of this section for the numbers of people served.

a. Individuals with complex LTSS and BH Needs

Each Member of BLTSSCP has substantial experience working with people with complex LTSS and BH needs. The co-existing factors of homelessness, SUD, Behavioral Health issues, Psychiatric Disorders, I/DD, complex medical issues and a variety of socioeconomic situations has resulted in provision of services to people representing a cross section of challenges and presenting with a multitude of complex needs.

Bay Cove, JRI and Vinfen provide a comprehensive array of LTSS and BH supports that are designed to meet the individualized needs of those served, including Residential, Individual Supports, Day / Employment, Day Habilitation, Family Support Services to Individuals across focus groups as funded through Department of Developmental Services, Department of Mental Health, Massachusetts Rehabilitation Commission, MassHealth, SHIP, MCB, DESE, DCF, private insurance, as well as private funding. The depth of clinical resources of these Entities, including staff and consultants who are psychiatrists, psychologists, nurses, therapists, licensed social workers, and specialists certified in applied Behavioral Analysis, provides exceptional expertise in designing plans and facilitating collaborations and coordination for people with the most challenging needs.

BCIL operates independent living programs for people of varying physical and developmental disabilities. Supports and services target both LTSS and BH needs and include a PCA program, care transition supports for those leaving Skilled Nursing Facilities, LTSS coordination for One Care Enrollees as well as ILC core services of peer mentoring, advocacy and skills training. MVES, SCES and BSHC provide supports and services for elders with a multitude of care needs including LTSS and BH: nutrition, transportation, home health, care options counseling, group adult foster care, health and wellness, medical escorts and in-home BH counseling. JRI serves children with a wide range of behavioral challenges, and developmental and other disabilities.

b. Individuals with brain injury or cognitive impairments

All Members have extensive knowledge of and experience providing a wide range of supports to people with Brain Injury or cognitive impairments and their families. People served often have complicated care plans due to their injury or impairment and require not only physical care but the development of a comprehensive plan centered on rehabilitation and increased independence

as well as consistent communication with medical and other providers of LTSS, and family members. BSHC, MVES, and SCES work with elders who present with brain injury or cognitive impairments. Through partnerships with multiple agencies and funding sources, elders are connected to a variety of services including Adult Day Health programs specializing in memory loss or dementia, Memory Disorder services, and the Statewide Head Injury Program for veterans. The Hutchinson Agreement and the HCBS Waiver have resulted in targeted funding enabling Bay Cove, BCIL, JRI and Vinfen to provide residential, individual supported living, and enhanced medical and therapeutic services to people with Brain Injury and cognitive impairments up to and including the necessary development of and/or identification of accessible housing possibilities. Members assess needs for individuals and facilitate obtaining adaptive equipment for cognitive supports, durable medical equipment, lifts, accessibility devices, and other environmental modifications.

c. Individuals with physical disabilities

BLTSSCP Members provide a range of services to people who are physically disabled. The ability of all Members to assess for and coordinate the acquisition of durable medical equipment, lifts, accessibility devices, and environmental accommodations enabling individuals with physical disabilities to access their homes, communities, transportation and recreational activities is crucial to meeting the needs of the focus populations. Members also support people who are challenged by a range of visual impairments including blindness and people who are hard of hearing or deaf. BCIL is renowned for their provision of services to people with physical disabilities since it was founded by people with disabilities seeking full integration into society and became the second independent living center in the country. People served by BCIL as well as SCES, MVES and BSHC have a wide range of physical disabilities and are empowered with the practical skills, self-confidence, and self- advocacy skills to take control of their own lives and become active members of their communities.

Bay Cove, JRI and Vinfen have been instrumental in providing the assessment, care coordination, transition planning, and ongoing services required to place hundreds of individuals with LTSS needs throughout the service systems including those transitioning from high-cost nursing care facilities into community-based, integrated services under the auspices of the Rolland Settlement. All services that have been developed have utilized technological and care advances in the field. Nurses and Allied Health Professionals have been integral members of both the teams and the staffing patterns for these supports, providing care coordination with community practitioners, VNA's, hospitals and pharmacy services.

d. Individuals with I/DD, including Autism

Several Members of BLTSSCP have long histories of providing supports to people with I/DD, including Autism, and thereby specialize in serving this population. Since the de-institutionalization of the state facilities in the 1970's, Bay Cove, JRI and Vinfen have been at the forefront in developing group residences and day programs in communities across the Commonwealth. A variety of community based services and supports including residential, day/employment and individual supports have been provided to adults with I/DD, and these CEs operate large Family Support Centers as well as services to children as well as adults, and their family members.

A significant number of the individuals diagnosed as I/DD and eligible for services from the Department of Developmental Services (DDS) have historically also been diagnosed as Autistic. Others with a diagnosis of Autism and a co-existing diagnosis of Serious Mental Illness (SMI) have been eligible for services from the Department of Mental Health. Until 2014 and the enactment of the Autism Omnibus Law, adults with a diagnosis of Autism or Autism Spectrum Disorder but no co morbid diagnosis of Intellectual or Developmental Disability or SMI struggled to find supports. Children with this diagnosis under Developmental Disability were eligible for Family Support Services through DDS. In 2014, DDS was given the responsibility for this adult population. Currently, Bay Cove, JRI and Vinfen all have developed support services for this newly eligible population of adults on the Autism Spectrum.

e. Older Adults up to age 64 with LTSS needs

All BLTSSCP Members provide an array of services to meet the needs of older adults up to age 64 with LTSS needs. BSHC, MVES, and SCES as ASAP's (Aging Service Access Points) are designated by the Commonwealth to provide a single access point for information and services related to publicly funded, community based long term care. Supports for older adults include: care options counseling, care transitions, home modifications, meals on wheels, transportation, chronic disease self-management, group adult foster care, and adult day health. BCIL partners with ASAP's and other community organizations to have timely and worry-free access to services provided across agencies and participates in the Aging Disability Resource Consortium /No Wrong Door Network which enhances collaborations among elder and disability providers to ensure there is 'no wrong door' for an older adult who is looking for supports.

Bay Cove's 'Kit Clark Senior Services' has been a mainstay in the Dorchester community and Greater Boston region for over 40 years, serving a diverse group of participants from a variety of ethnic and cultural backgrounds. Kit Clark offers Adult Day Health, including a specialized dementia program and an ADH program for people experiencing homelessness; day shelter for older people experiencing homelessness; nutrition including Meals on Wheels; in home modifications; a Senior Center, and transportation. Kit Clark's ADH programs offer the coordination of care planning with the participant, family, physicians and other service providers, medical and social services advocacy and support, and ongoing observation and assessment of the participant's functioning.

Bay Cove, BCIL, JRI and Vinfen are dedicated to the philosophy of making provisions for people to 'age in place' and have therefore developed the necessary knowledge and expertise to ensure the appropriateness of services for people who may be experiencing the medical, cognitive, physical and/or psychiatric issues that become more challenging as people age. In addition, the Rolland Settlement afforded the opportunity for these Members to develop intensive medical homes with the purpose of moving medically compromised I/DD people out of Skilled Nursing Facilities and into community settings. Additional RN's, LPN's and CNA's were added to residential staffing to not only provide the day to day care but to also coordinate care with PCP's and other medical practitioners as well as community resources. The support for the residents of these homes has resulted in optimal and person centered care.

f. Children and Youth (ages 3-21) with LTSS needs

Several BLTSSCP Members have extensive experience meeting the LTSS needs of children and youth between the ages of 3 and 21. JRI provides support, residential and educational services for children including those with multiple severe disabilities - severe cognitive impairments, severely limited language/communication skills and severe physical impairments - as well as challenging medical conditions and/or behavioral and mental health issues. JRI is deeply committed to the philosophy and goals of care coordination on behalf of children and provides care coordination programs for DCF as a Commonworks Lead, Southeast Regional Resource Center, and Family Networks Lead Agency, and serves as the CSA for MassHealth in four regions: Boston, the Cape and Islands, Lynn and Lawrence. JRI provides intensive services for children through three residential schools, Intensive Foster Care, STARR (short term assessment programs) and congregate care, a wide range of mental health and physical health services to court involved youth, and operates a center for LGBTQ youth. JRI's Youth Harbors program works with high school aged, homeless youth who are without a supportive family, locating temporary stable housing but continuing to work with the youth to locate permanent housing options. The My Life My Choice Project is a nationally recognized groundbreaking initiative reaching adolescents who are most vulnerable to commercial sexual exploitation.

Through the Money Follows the Person program (MFP) and other waivers, BCIL arranges and provides supports to children over 3 years of age and their families to effectuate a successful transition from skilled nursing facilities, long term rehabilitation facilities, public health hospital or pediatric residential settings. BCIL's Youth Services Division helps youth to set goals, learn to access community services and resources and negotiate unpredictable barriers. Services for youth focus on developing self- advocacy skills and understanding their rights as a person with a disability; peer mentoring and leadership training are components of these services. Youth and their families are provided with information regarding community resources, support options such as personal care attendants, and housing.

Bay Cove and Vinfen provide supports to children/youth with I/DD and their families through Family Support Services. Supports include: education, support groups, assistance in navigating the complexities of service provision, assistance in locating and providing financial supports, in-home support, care coordination, skill building, behavioral interventions / Positive Behavioral Supports, day respite services, and support in finding and maintaining school placements. In addition, transition supports are offered to help families navigate options as a youth transitions out of Children's and 766 services and into Adult Services. Bay Cove also supports children as part of the Department of Elementary and Secondary Education/Department of Developmental Services (DESE/DDS) collaboration, with the goal of providing services to children in the public school system that prevent a more restrictive educational placement and allow children to live at home. Vinfen offers a Teens and Tweens group for youths diagnosed with ASD and has developed a support group for their parents/caregivers.

2. Provide a list of accreditations relevant to Bidder's work with focus population:

- Bay Cove Human Services: Commission on Accreditation of Rehabilitation Facilities (CARF), Medication Administration Program Certification of DPH (MAP), MA DDS Licensing and Certification, MA DMH Licensing and Certification, and MA DPH Licensing and Certification.

- BCIL meets the federal standards as a federally-funded independent living center under Title VII, Chapter 1, Part C of the Rehabilitation Act of 1973, as amended.
- JRI: CARF, Joint Commission accreditation, MA DDS Licensing and Certification. JRI is also a licensed provider for the MA Department of Elementary and Secondary Education, the MA Department of Early Education and Care, the MA Department of Public Health, and the MA Department of Mental Health
- Vinfen: CARF, MAP Certification of DPH, MA DDS Licensing and Certification

Table: Members' experience serving the focus populations by numbers

7.3 A Relevant experience providing LTSS Supports

1. Developing care plans

BLTSSCP Members develop over 40,000 care plans each year across the state for a range of populations including people with Intellectual and Developmental Disabilities (IDD), Autism Spectrum Disorders (ASD), Acquired Brain Injuries (ABI), Serious Mental Illness (SMI), Physical Disabilities, and chronic medical conditions as well as children and elders with disabilities. Care plans may be called Individual Service Plans, Home Care plans, LTSS plans, Independent Living plans, Day Habilitation Treatment Plans, ADH Plans and Individualized Action Plans. Although the name of the plan varies according to funding source and population, all Members develop care plans that are person-centered and support people with disabilities to achieve their self-determination and independent living goals.

BLTSSCP Members develop care plans that support Individuals to make meaningful decisions about the services and supports they receive including how these services meet their life-goals, where they live, with whom they live, who supports them, what training is critical for a caregiver, and what LTSS and providers are available. Outreach and education regarding the options and choices available to Individuals and families are core components of enabling and encouraging Individuals to make meaningful decisions regarding their supports. All Members have proven experience partnering with Individuals to create care plans reflective of self determination and independent living goals which serve as tools for self advocacy and decision making. The process of outreach and development of care plans integrates the activities delineated in Attachment A: LTSS CP Model Contract, Section 2.3 A. Members use techniques of person-centered planning such as encouraging Individuals to choose their team members, to express their interests and desires, and to build on their strengths and goals. Preliminary meetings to discuss a Vision with the Individual create the framework for all planning.

2. Applying understanding of MassHealth LTSS under M.G.L. c.118E and 130 CMR

Each Member of BLTSSCP has an in-depth understanding and an expertise in applying this understanding of MassHealth LTSS under M.G.L. c118.E and 130 CMR including service eligibility criteria, choice counseling and person-centered care planning. The three ASAPs are MassHealth agents for eligibility determination for LTSS, performing assessments and determining eligibility for nursing facility services, ADH and the Frail Elder Waiver. Through the Home Care program, the three ASAPs (Aging Services Access Point) review LTSS service options and authorize a care plan that may include a variety of LTSS services such as homemaker, personal care, chore services, or Meals on Wheels. Through the Home Care program, ASAPs also assess Individuals for “state plan” or MassHealth LTSS services, and the three ASAPs manage LTSS networks for Senior Care Option (SCO) programs and as a result are intimately familiar not only with LTSS requirements but of also of service providers in their communities.

BCIL is knowledgeable about the range of LTSS and provides choice counseling for people with disabilities. BCIL has special expertise in counseling and assessments for people with physical disabilities and is proficient in the use of assistive technologies and determining eligibility for the PCA program. Vinfen, JRI and Bay Cove have expertise in the specialized LTSS services for people with I/DD, ABI and Autism. As residential providers for people with I/DD and ABI, they

have expertise in developing Individual Service Plans that include LTSS and in ensuring that prescribed supports are accessed. As day habilitation providers, Bay Cove, JRI and Vinfen develop Day Habilitation Treatment Plans that integrate LTSS with health needs.

Some Individuals have used LTSS services for decades, others have LTSS needs that are triggered by a changing life circumstance or change in functioning level that may challenge an Individual's ability to safely remain in or return to the community. Each Member is skilled in assisting individuals through the intricacies and challenges of these transitions. Person Centered Support Planning and the implementation of this Planning consistent with the Vision of an Individual, build the foundation of the plans that are developed.

3. Coordinating care for diverse populations of individuals with disabilities

BLTSSCP Members coordinate care for approximately 40,000 people each year. Section 7.2 D above illustrates the range of populations that Members serve within proposed CP service area. Members provide care coordination and have developed care coordination practices and tools in response to the needs of specific populations. The diversity represented by the individuals has resulted in networking with a multitude of community and health care resources. Familiarity with the range of LTSS resources in the various communities and the impetus to research new and individualized resources as needs and preferences are expressed through a self determined process have led to a wealth of collective and shared knowledge that facilitates the coordination of care. The following are examples of care coordination to specialized populations:

- Bay Cove, JRI and Vinfen coordinate care for people with I/DD, Autism and brain injury, often with co-occurring psychiatric illness and/or physical disabilities. The organizations have developed expertise in the range of specialized programs for the populations including residential, day programs, home-based supports and specialized medical and BH providers.
- JRI operates three specialized, year-round, residential schools for children with high LTSS needs. In that role it has developed relationships with area providers of home-based and specialized medical services. In addition, as a Children's Service Agency (CSA) in four communities JRI coordinates care for children with Serious Emotional Disturbance (SED).
- BCIL provides care coordination and services to individuals confronted with the following challenges: cognitive, mental/emotional, physical, hearing, vision, multiple disabilities, and others including the Personal Care Assistant program.
- Through the Money Follows the Person waiver program, and Comprehensive Screening Service Model, the ASAPs assist nursing facility residents to return to the community; this includes Individuals with ABI, I/DD, SMI and physical disabilities. Many require significant multidimensional supports to transition successfully including housing, behavioral, recovery, and other LTSS needs often with increased acuity due to the absence of family and friends.
- BCIL, BSHC, MVES and SCES coordinate care for over 1,000 people with disabilities under the age of 65 who are enrolled in One Care.
- Bay Cove and Vinfen coordinate care for approximately 3,500 people with SMI and or SUD through CBFS programs.

7.3 B Experience in and approach to coordination among physical health, behavioral health, and LTSS providers

1. Working with medical, LTSS, behavioral health and social services providers

All BLTSSCP Members have considerable experience with care coordination across different types of providers - medical, LTSS, behavioral health (BH) and social service - with the consistent focus on the development and implementation of person-centered care plans while assisting Individuals to achieve their health care and personal goals. A care coordination relationship begins with an assessment process in which a care coordinator gains the Individual's consent, gathers information from the Individual, the Individual's family and the Individual's providers of care including medical, BH, and LTSS. The assessment process is the first step in building a relationship both with the Individual and with the Individual's providers of care.

Following the assessment process, the Care Coordinator and the Individual develop a care plan that allows the Individuals to make meaningful decisions about the services and supports they receive including how these services meet their life-goals, where they live, with whom they live, who supports them, what training is critical for a caregiver, who is on the care team and what LTSS services and providers are available. As part of the care plan development process, all of the providers and organizations involved in the Individual's care are identified, including contact information. With the Individual's consent, the care coordinator contacts each as appropriate to provide information regarding services and the role of the Care Coordinator. The Coordinator also assists Individuals in resolving issues with other providers and organizations.

Implementing the care plan is an ongoing process and often requires the Care Coordinator to research and arrange for services for the Individual. Coordination among providers is key to implementing the care plan and can be done telephonically and as needed. care team meetings and/or consultations are arranged to ensure coordination across all silos and settings. Members identify and establish ongoing, positive relationships with local systems and individual providers of physical health, BH, LTSS and social services who have relevant experience and a reputation for success in serving people with LTSS needs. Members work with a wide range of providers too numerous to name and falling in the following categories: hospitals, specialty medical, community health centers, primary care; rehabilitation centers, inpatient psychiatric hospitals, chronic disease hospitals, outpatient MH, SUD providers, visiting nurse associations, home care agencies, housing and homelessness organizations, and linguistically and cultural diverse resources.

2. Providing LTSS subject matter expertise to providers

All Members of BLTSSCP interact with, educate and respond to health care, behavioral health and social service providers through their coordinators, administrators and clinicians. Each Member has nursing staff and several have other types of clinicians trained in integrated health who are experienced in LTSS services and care coordination among caregivers and providers. Education and expertise is provided regularly in the course of care planning for individual cases, and also provided in more formal methods such as Bay Cove's Speakers' Bureau that is made available to various audiences including health care providers in order to share information on LTSS.

BSHC, MVES and SCES are frequently called upon to educate hospital systems and other service providers about LTSS, including the scope and limitations of service types, the LTSS needs of Individuals, environmental barriers to care, and service availability. Bay Cove, JRI and Vinfen provide LTSS subject matter expertise to health care, behavioral health, and social

services providers, educating representatives of local systems of care and individual community health and behavioral health providers. The organizations have expertise in the health and behavioral conditions of people with LTSS needs and provide education to medical and BH providers on how general health and behavioral care issues manifest differently in people with LTSS needs, such as the cluster of psoriasis, respiratory, cardiac, and early-onset dementia related to Down's Syndrome. The organizations are subject matter experts on best practices for health and behavioral health care providers treating people with LTSS needs, such as sensory appropriate care for children and adults with Autism.

3. Promoting Integration of Care across physical, behavioral health, LTSS, social services

BLTSSCP defines "Integration of Care" as system re-designs that bring together services that are typically separate and often provided by separate organizations. Sometimes, Integration means co-locating services; in other situations, Integration involves workflows or protocols that require different service providers to work together in service to the Enrollee. In contrast, Care Coordination, is the act of managing or organizing care across existing systems and providers with no changes to the systems themselves. BLTSSCP Members have extensive experience coordinating care as discussed in Sections 7.3 A 1, 7.3 A 3 and 7.3 B 1.

In contrast to the evidence based SAMHSA model for integrating BH and medical care where BH providers are co-located at primary care practices, a literature review turns up few evidence-based programs for the integration of LTSS with medical and BH services. There are health plans that integrate the payment for medical, BH and LTSS and there are pilot programs that integrate BH and LTSS or LTSS and medical care. This is an area ripe for testing and innovation. The Enhanced LTSS CP program will provide further opportunities to test and implement new programs to integrate care across the silos of BH, physical health, LTSS and social services in partnership with ACOs. Meanwhile, four of the seven Members have tested approaches to Integration:

- MVES and SCES partner with Cambridge Health Alliance and Hallmark Health on a care transitions program. In order to reduce hospital readmissions, ASAP Care Coordinators serve as "transition facilitators" and collaborate with hospital clinicians, pharmacists, social workers and primary care providers to ensure a comprehensive transition plan is developed and implemented for each hospitalized patients. Care Coordinators are physically located on the hospital floor, use the same IT systems as hospital employees, participate in hospital discharge planning meetings, but are employed by, supported by and can rely on the resources of the ASAP to meet the vast array of LTSS and social service needs of the patients. Over four years the program has reduced 30 day hospital re-admissions.
- Bay Cove and Vinfen, using a reverse integration approach, have embedded primary care Nurse Practitioners into community-based psychiatric rehabilitation teams that serve people with SMI, 60% of whom are high LTSS users as well. Funded through a three-year Innovation grant from CMS, the program integrated physical, BH and LTSS services at the Bay Cove and Vinfen team level and resulted in reduced Emergency Department use.

BLSTSSCP Members "promote" the Integration of care across service types in a number of ways currently. Clinical and outreach staff at Bay Cove, BCIL, JRI and Vinfen promote the integration of care through ISP and Day Habilitation Plan meetings, accompanying Individuals to medical and other appointments, maintaining communication with other members of the Team, and internal referrals to Clinical Rounds and Risk Committees. All Members ensure that routine,

specialty and preventive care is provided and consistent with current best practice protocols such as the DDS Preventive Health Screening recommendations which include timelines for routine evaluations. All needs, preferences and recommendations are documented for the Individual's Team to ensure that care is integrated and coordinated. All Members maintain and nurture relationships with a wide variety of hospitals, community health centers and physician practices, rehabilitation facilities and providers of behavioral health services. The coordination of care across physical, behavioral health, LTSS and social services contributes to the best outcomes for Individuals and maximizes their ability to achieve their personal goals.

7.3 C MassHealth Managed Care Programs

BLTSSCP Members have extensive experience working with MassHealth managed care programs. The experience includes contracts for care management, LTSS coordination, PCA services, outpatient mental health, day habilitation, CSA/CBHI, and Adult Day Health. The following are examples of those experiences:

- One Care plans: Six Members have worked closely with Commonwealth Care Alliance (CCA) in several roles since the start of the program in 2013. BCIL, SCES, MVES and BSHC all provide Long Term Services and Supports Coordination (LTSC) to One Care Enrollees that includes LTSS coordination and development of an LTSS care plan. Together they provide LTSC services to over 1,000 Enrollees. Bay Cove and Vinfen each contract with CCA to operate a One Care Health Home where they manage the medical, Behavioral Health and LTSS for a combined total of over 400 Enrollees with disabilities. SCES, MVES and BSHC also provide LTSC services to Tufts One Care Enrollees.
- Senior Care Options (SCO): MVES, BSHC and SCES have provided Geriatric Support Services Coordination (GSSC) for Senior Care Options (SCO) Enrollees since 2004 including contracts with Commonwealth Care Alliance, United, Senior WholeHealth and Tufts. GSSCs conduct LTSS assessments, recommend LTSS care plans, authorize and implement LTSS care plans, and monitor the provision and outcomes of services. GSSCs educate the team regarding LTSS and other community resources. The GSSC advocates for community care on behalf of SCO members when institutional placements are contemplated. ASAPs also procure and manage the LTSS provider network on behalf of four of the six SCOs.
- MassHealth MCOs: Bay Cove, JRI and Vinfen hold contracts with MassHealth MCOs to provide outpatient MH services, day habilitation services and PACT services to Enrollees. JRI also provides CBHI/CSA services. JRI estimates that its MassHealth managed care revenue in 2016 was $14 million and will grow to $20 million in 2017.

All Members have experience conducting the MDS-HC assessment for LTSS through contracts with EOEA, MassHealth, One Care plans and SCO plans. BCIL also provides PCA services to One Care Enrollees and other MassHealth managed care Enrollees.

7.3 D Collaboration with other State Agencies, Organizations, and Providers

All BLTSSCP Members are experienced in collaborating with state agencies, providers, social services organizations in order to provide better services to the Individual. Members understand that fostering and nurturing relationships with provider organizations and local resources are essential for effective service planning and implementation. In working with multiple state

agencies, organizations and providers, all Members have had the opportunity to participate in many new initiatives. One example of this is DDS's grant award to Vinfen for a project to promote social inclusion. Vinfen was asked to participate in a project on the same topic sponsored by Arc of MA that includes collaboration with 15 other providers to share ideas, best practices and successes. Also, Vinfen has partnered with UMass Medical Center (UMMC) to submit a federal grant on this topic and participated in the development of the proposal with UMMC staff.

All Members are experienced working with multi-agency teams on behalf of all populations targeted in the LTSSCP program. Through the teams of the DDS Individual Service Plans, the Individual Education Plans for children, the Day Habilitation Plans, and others, the Members work together with staff of the respective state and/or local entities and other providers of service and organizations, on planning and implementing visions, goals and support strategies. Additional or different issues or challenges at times emerge outside the established process. One example of this is the Risk Reviews that occur on behalf of the individuals served by DDS when medical, behavioral, forensic, or care transition challenges present as critical. All team members from any involved state, provider agencies, or organizations as well as other involved parties such as clinicians come together to develop a plan that may indicate referrals to other services or supports.

Members adopt best practices from the literature, and embrace key principles of care coordination, including Self Determination at the core of services provided. Maintaining the Individual's needs and preferences at the center of planning and implementation addresses the resolution of many possible conflicts. Use of the multi-disciplinary team approach with all parties contributing to produce negotiated plans and positive outcomes; as well as fostering relationships with and respect among all team members facilitates conflict resolution.

7. 3 E Experience with Alternate Payment Methodologies

1. Bay Cove and Vinfen have had contracts with Commonwealth Care Alliance (CCA) for One Care Health Home services since March 2014 and are paid as follows: a PMPM for care management based on the Enrollee's MassHealth One Care rating category; an additional fee for the annual in-person comprehensive assessment (MDS-HC) and care plan developed by an RN; and bonus payments of up to 25% of the care management PMPM. For the first three years of the program, Bay Cove and Vinfen were evaluated through the following quality measures: comprehensive in-person assessment/re-assessment and care plan timely completion and post-acute care home visit within 48 hours by an RN. Both Members have been successful in earning bonus payments for those measures. In 2017, the quality measures were revised and are as follows: initial assessment and care plan development timeliness; post-acute care visit to Enrollees within 48 hours; and reduction of hospital admissions (per 1,000, per year). Results from the new quality measures are expected in 2018. There is no downside risk or shared losses in the contract.

2. BLTSSCP understands that an increasing portion of the PMPM payment from MassHealth will be subject to a quality withhold over the length of the LTSS CP Contract period. We will draw upon its experience managing its performance and value based contracts with CCA for its

approach to measuring its financial performance in the LTSS CP program. In arrangements with CCA, Bay Cove and Vinfen receive quarterly claims data sets that they use to understand their Enrollee's total medical expenses (TME) and key drivers of TME such as spending on inpatient, LTSS, pharmacy and Emergency Department. In addition, they receive quarterly reports on its performance compared to other similar entities with CCA contracts. For the LTSS CP program, we will take the following approach:

- Track and document quality measures at the Enrollee level to ensure that LTSS Care Coordinators are meeting the measures. The BLTSSCP Care Coordination IT platform will capture the data elements required to track quality measures.
- Request quarterly claims data from the ACO/MCOs as well as from MassHealth for the Primary Care ACOs. Using quarterly claims data, BLTSSCP will track its performance longitudinally for key quality and utilization measures as well as for total cost of care. Request performance data from ACO/MCOs comparing BLTSSCP to other LTSSCPs to understand how its performance compares to peer organizations.
- Although withholds will not initially depend on achieving cost savings, BLTSSCP will begin to develop initiatives to address these objectives as soon as claims data becomes available.

Based on the monthly analysis and quarterly Quality Management Committee (QM Committee) reviews, BLTSSCP will implement quality improvement programs to address any challenges. In its contracts with CCA, Bay Cove and Vinfen have conducted several quality improvement initiatives over the past three years. One example is an initiative to review skilled nursing visits to Enrollees for medication management in their home to assess whether there are less costly, yet, as effective LTSS alternatives to be implemented. Vinfen successfully reduced unnecessary utilization in this area while maintaining quality of service. Another example is an initiative that targeted Enrollees who did not refill their prescriptions for Diabetes treatment in order to identify barriers and address those through education and support with accessing medication.

7.3 F Quality and Performance Measurement

1. Experience working with quality measures and performance based outcomes

Each Member of BLTSSCP is committed to continuously improving the quality of life for individuals receiving supports, and each is experienced in working with quality improvement assessments, analysis, outcomes and resultant plans as tools in achieving improved quality.

- Vinfen uses a Balanced Scorecard system which develops annual objectives from multiple data sources and external scans, collects data on a wide range of clinical, utilization, satisfaction and engagement measures and processes data to shape implementation modification of annual and multi-year initiatives to improve performance. Vinfen engages multiple stakeholders in assessing quality, through surveys and advisory councils of consumers and families.
- JRI's Performance Improvement Plan ensures that available resources are utilized in an effective manner to provide high quality and clinically appropriate services. The quality of processes, interventions, services, education and treatment is measured and monitored through the use of risk management and outcome data which are collected and recorded in a client assessment system. Critical aspects of care are identified by JRI leadership and prioritized for review/assessment based on those that are high risk, high volume, high cost or problem-prone.

- Bay Cove utilizes a Quality Management system that incorporates performance based outcomes, consumer satisfaction, utilization tracking and analysis and other quality management practices including: Annual Satisfaction and Quality of Service Surveys with all Stakeholders, DDS Performance Based Contracting outcomes reporting, Risk Assessment and Management, Stakeholder Annual Satisfaction Surveys, and Participant interviews.
- BCIL utilizes the varying requirements of their ten contracts to track activities, record service provision, and detail expenditures. Client satisfaction is measured through an annual survey.
- BSHC, MVES and SCES maintain a comprehensive quality assurance program that addresses all aspects of LTSS management and delivery including timeliness and quality of care management, service provision and quality and consumer satisfaction. Data is collected through a variety of means including claims, surveys, interviews, evaluations, care plans and record reviews. Measures are tracked and reported monthly, quarterly and annually and feedback is regularly communicated to responsible managers.

2. Bidder's experience with a specific quality improvement initiative that resulted in improved member outcomes and improved quality of care.

BLTSSCP Members all have significant experience in developing and managing initiatives to improve outcomes and quality. Following are some examples:

- Bay Cove expanded health care monitoring systems in DD Services by increasing the number of nurses on staff to facilitate regular assessment of health care needs, monitor medication administration, and direct communication with health care providers. There has since been a significant increase in Bay Cove's ability to identify and address health issues earlier, decrease hospitalizations, increase quality of life, and provide in-home End of Life Care.
- JRI implemented 'Impact Ability,' a comprehensive abuse prevention project including a comprehensive revision of operational policies, procedures and training curricula which resulted in improved individuals' engagement in and awareness of abuse reporting, prevention and response activities as well as the formation of four self advocacy groups.
- Vinfen implemented a Quality initiative called 'Sustainability' to review and revise systems and practices to ensure long-term sustainability, retention of institutional learning and the consistent use of proven practices. One outcome, the collection and review of data regarding routine medical appointments, has resulted in improved consistency of medical care for individuals.
- BSHC, MVES and SCES have engaged in a multi -year project to improve the quality of care to individuals with Alzheimer's disease. Elements of the plan include the implementation of new assessment procedures, appropriate referrals to medical and community organizations, and the development of a certification in care with the Alzheimer's Association. This project has resulted in improved outcomes and quality of life for individuals and their caregivers.

7.3 G Alignment and Experience with System Reform Initiatives

The Community First vision is exemplified in the supports offered by BLTSSCP Members. The roadmap and action plan developed through the Community First Olmstead Plan is consistent with the missions of each Member. Bay Cove 'partners with people to overcome challenges and realize personal potential,' BCIL 'promotes greater independence for people with disabilities,' JRI 'advances social justice by opening doors of opportunity for those who are otherwise barred

from them,' and Vinfen 'transforms lives by building the capacity of individuals, families, organizations and communities to learn, thrive, and achieve their goals.' All Members have embraced the goals of self advocacy promotion, community/social inclusion, and control over one's own services has shaped the growth of and drives the need for long term services, and several, including Vinfen and Bay Cove, have launched special self-advocacy training for individuals with disabilities.

The Members have extensive histories of developing innovative community-based services for all populations targeted in the LTSS CP program that allow Individuals to remain in the community. Examples include the expansion of accessible and affordable housing options and new programs such as intensive residences for individuals with I/DD or ABI and intense medical needs, Adult Foster Care, Shared Living and Personal Care Attendant programs.

7.4 Information Systems and Reporting Capacity

A. Describe its information system and architecture, including the name of the systems and vendors the Bidder uses for electronic health record (EHR), hardware, billing, customer service, care coordination, care planning, provider rosters, financial, etc.:

Based on recent experience, guidance from nationally recognized IT consulting firm, Gartner, and information gathered from planning sessions with ACO/MCOs, BLTSSCP leadership has decided to contract with a Care Coordination Information Technology (CCIT) vendor rather than build out existing EHR systems. The new CCIT system will be designed to meet the care coordination, data warehouse, and data exchange requirements of the LTSS CP program.

BLTSSCP's Member senior leadership, including senior IT, Quality and Care Coordination staff, have reviewed in detail a number CCIT vendors that provide care coordination platforms with data analytics and data exchanges, including Arcadia, LoopBack, LightBeam, Care Navigator, Evolent Health, and CORE Solutions. In conducting these reviews, BLTSSCP was guided by Gartner, contracted with Vinfen, to provide advice on issues of functionality and pricing of these systems and the companies which develop and manage them. As soon as feasible after the CP awards have been announced, BLTSSCP will select and contract with the most appropriate vendor, and then configure and implement a CCIT system designed to meet the requirements and timeline of the LTSS CP program. BLTSSCP's vendor choice will have a significant track record of working with health systems across the country and in Massachusetts, with features and functionality designed to meet the requirements of the new ACO system.

The new CCIT system will have the following features: secure internet access to the system for entering (in forms templates), storing, managing, reviewing and reporting on individual and aggregate client data; a data warehouse; extraction and transmission (Health Information Exchange, or HIE) functions to connect and manage information exchanges with ACO/MCO and community partner systems; data analytic capacities; easy access reporting and dashboard functions; and the capacity to use the Massachusetts HIE as it develops. EMCP has conducted detailed discussions with candidate vendors sufficient to forecast costs for contracting, configuring, implementing, and maintaining a CCIT system. Estimated costs for the CCIT are documented in **7.5.G. Budget Report and Budget Narrative**.

The seven Members of BLTSSCP, Vinfen, Bay Cove, Boston Senior Home Care (BSHC), Boston Center for Independent Living (BCIL), Justice Resource Institute (JRI), Mystic Valley Elder Services (MVES), and Somerville Cambridge Elder Services (SCES) have proven track records developing and managing IT systems for large numbers of staff, large populations of clients, and multiple referral and funder sources which meet requirements of MassHealth and EOHHS agencies for data collection, management, and reporting in domains including service planning and utilization, billing and finances, quality and outcomes. Some of the Members use commercially available EHRs (Bay Cove uses eHana and a company-developed Electronic Health Record (EHR) IT system; Vinfen now uses Icentrix, and has contracted with Core Solutions to implement a new EHR system with even more robust functionality. JRI uses eHana for its children's services and Icentrix for its adult services. Boston Senior Home Care, Mystic Valley Elder Services, and Somerville Cambridge Elder Services use the Massachusetts EOEA

system called Social Assistance Management System SAMS to document their LTSS care coordination work through the following programs: Home Care, intake and referral, Meals on Wheels, Clinical Assessment and Eligibility. In addition, BSHC, MVES and SCES document their LTSS care coordination work in the electronic health records systems for each Senior Care Options (SCO) contract and One Care contract that they hold with MassHealth managed care organizations.

BLTSSCP members each employ an intranet-based IT system throughout their respective organizations with a combined total of over 9,000 end-user devices of varying types, including PC's and mobile devices, supported by stable and effective data centers and IT staff.

In order to leverage existing resources and reduce the added costs needed to manage a new CCIT system, the Members have decided to delegate the CCIT management to Vinfen. Vinfen's IT team, working with the seven Members as needed, will have primary responsibility in the configuration, testing, implementation, and management of the new CCIT system. Vinfen currently manages a comprehensive IT platform which functions in all relevant domains, including both cloud (SaaS, public and private cloud architecture) and internally hosted systems at Vinfen's data center, which has been designed and maintained in order to meet current standards for technical performance (uptime and connectivity) and compliance requirements. Vinfen's data center currently hosts more than 100 server environments, and 160 terabytes of data.

Vinfen's system security currently includes encrypted email, HIPAA compliant file security, individual level privileging which allows employees access to information and data required for their specific job roles and programs, and anti-virus, anti-spam and anti-malware protections. Vinfen's system is periodically assessed for performance in security and compliance by external parties to ensure that the company has the technical and management systems in place to identify and respond to any weaknesses or threats.

B. Describe how it will receive, create, access, store and transmit health information with EOHHS, ACOs, MCOs, and other providers within HIPAA standards. Such description shall include:

Current and proposed uses of Electronic Health Records (EHRs) in care delivery:
Service staff of all types and roles (physicians, nursing, clinical, outreach, and residential direct care) across all Members use IT systems to enter information and data on services, including demographics, diagnoses, symptoms and functioning, medications and prescribed devices and services, care plans with assessments, goals, objectives, interventions, progress notes, claims, standardized functional rating tools, real-world outcomes, and medical data. All Members also manage IT systems which collect, store and exchange a complex array of financial data, including service events, billing, collection, reconciliation, service utilization, financial statements of performance and position, and report on these data and actions in a variety of formats which allow for timely monitoring and interventions by management, and timely reporting to external funding sources. Finally, the Members also manage quality and outcome data systems which collect and manage data on a range of domains, including customer

satisfaction and engagement, progress and outcomes in symptoms, and standardized assessment tools.

Current and proposed methods for information sharing with ACOs, MCOs, EOHHS, and other providers:
In planning discussions with 12 MassHealth ACO Bidders, BLTSSCP has learned that they are at very different stages of developing IT systems for exchanging and managing data with LTSS CPs. As noted above, BLTSSCP plans to contract with a vendor to acquire, configure, implement and manage a CCIT system inclusive of technology to ensure secure, compliant transfer of information between CPs and ACO/MCOs as required.

Although BLTSSCP has experience and will, if necessary, enter data into ACO/MCO systems, BLTSSCP is committed to acquiring and managing a CCIT system as the primary resource for managing data and information. BLTSSCP Care Coordination staff will enter data into the CCIT system directly rather than into Electronic Health Records (EHRs) of the CE's or any potential partners. It has become clear that for financial and logistical reasons, it is not feasible to consider alternative plans which would require CEs and potential partners to develop CCIT systems within their own EHRs. Therefore, the BLTSSCP CCIT system will be the primary source of data and information, and will have data warehouse capacities for analytics, reporting, and secure exchanges with ACOs/MCOs and any affiliated community partners.

In the event that there are delays in establishing exchanges with ACOs/MCOs, Members do have experience entering data into and receiving reports from other systems used by multiple health care provider organizations. For example, Bay Cove has developed and works with the Boston Emergency Services Team system. Vinfen, Bay Cove, SCES, MVES and BCIL care coordination staff document in Commonwealth Care Alliance's EHR system for their One Care Health Home and Long Term Services and Support Coordinator services. SCES and MVES document in the ACO Bidder, Cambridge Health Alliance's EHR system.

Current and proposed uses of the Mass HIway and other secure information exchange methods:
The Vice Presidents of IT at Vinfen and Bay Cove participate in a special EOHHS committee planning for interoperability in the community health and human services system and have participated in forums on the current and forecasted status of the Massachusetts HIway. Based on information to date, as noted above, BLTSSCP will engage a vendor to develop and manage a CCIT system to collect, store, facilitate analyses and reporting, and exchange data across a large number of ACO/MCO entities, (now estimated at 12), and any potentially affiliated community partners. As the Mass HIway becomes more fully developed, BLTSSCP will continue to develop the CCIT platform to take full advantage of the data transmission opportunities that it offers.

Capabilities to successfully send and receive eligibility files in an electronic format from EOHHS:
The CCIT systems which BLTSSCP has reviewed have the capacity to send and receive a variety of eligibility files. Once eligibility file specifications are released by MassHealth, BLTSSCP will ensure that the system it selects can meet those requirements. Members are familiar with the operations required to check MassHealth eligibility, and are also familiar with the challenges that MassHealth Members face in maintaining eligibility as their illnesses and

their social and economic situations change. Members currently check MassHealth eligibility frequently through eligibility verification systems, and will ensure such a system is in place for the LTSS CP program.

System security and access controls:
As noted above, Members currently manage and continuously upgrade IT systems and policies and practices to meet the technical specifications for security and to comply with HIPAA and related requirements. All Members have security technology and practices built into their systems, including encrypted emails with transport-layer security, and robust anti-virus and malware protections.

BLTSSCP recognizes that all Members will be required to demonstrate technical security, such as protections against viruses and malware and individual level credentialing to protect against unauthorized access to protected health information, within their organizations and in data exchanges, and plans to develop processes for compliance testing and reporting to ensure protections are in place.

Current uses of care management tools and software:
Members currently use a wide array of care management tools and software systems across different programs and state agencies. Examples include: 1) Bay Cove and Vinfen use the Massachusetts Standardized Data Program (MSDP) form sets which have been approved for use by DMH, DPH, MassHealth and the Behavioral Health managed care entities in Massachusetts; both organizations have incorporated the form sets in their internal systems; 2) Bay Cove, Vinfen, MVES, SCES and BSHC use the MDS HC form in their assessment and care coordination with One Care and the Senior Care Options (SCO) program; 3) Bay Cove, Vinfen, SCES, MVES and BCIL input information into Commonwealth Care Alliance's EHR for the One Care programs; 4) Bay Cove utilizes the form sets and data exchange through its contract with the Boston Emergency Services Team; 5) Bay Cove, JRI and Vinfen use the Department of Developmental Services Individual Service Plans forms and data through the DDS intranet-base Home and Community Services Information System; 6) MVES, SCES and BSHC use the EOEA SAMS system for documenting LTSS coordination work for several EOEA programs; and 7) MVES, SCES and BSHC contract with several Senior Care Options (SCO) programs and document directly into the Centralized Enrollee Record of those programs.

The Members' current systems also capture information and data on medications, medical devices, selected health conditions and interventions by medical specialties within existing electronic records. And both systems capture the increasingly recognized as important data on key social determinants of health including housing, employment and economic status.

The BLTSSCP will develop a LTSS CP template designed to capture the required elements for the LTSS CP program and will be incorporated in BLTSSCP's CCIT system (See **7.3.C.**).

A. Executive Summary

Boston LTSS Community Partners (BLTSSCP) is a newly formed organization that brings together seven Community-Based Organizations to provide LTSS CP services to people with complex LTSS needs. Each Member organization is a leader both in its local communities and in its field of service. Bay Cove and Vinfen are known for their expertise in providing a wide range of community based services to people with Intellectual and Developmental Disabilities and Autism Spectrum Disorders many of whom also have co-occurring medical and behavioral health challenges. The three Aging Service Access Point (ASAP) organizations – Boston Senior Home Care, Mystic Valley Elder Services and Somerville Cambridge Elder Services - have broad and detailed knowledge of the long term care system, including LTSS management, and they provide unbiased information to individual about their LTSS options through information and referral programs. Boston Center for Independent Living, founded in 1974, by and for people with disabilities, was the first Personal Care Management agency in Massachusetts, and provides options counseling and LTSS coordination for a range of people with disabilities. Justice Resource Institute, one of the largest human services providers in New England, operates over 100 programs serving diverse populations including a range of community based services to children and youth with behavioral challenges and disabilities.

BLTSSCP Members are committed to the goals of the LTSS CP program: to support Enrollees with complex LTSS needs to live healthfully and independently in the community by strengthening linkages between health care providers and Community-based Organizations, by providing Individual-centered care coordination and choice counseling. Evidence of this commitment is found in the history of programming at each Member organization that coordinates care for a range of populations across systems. MassHealth reforms will create the necessary structure for the LTSS CP program to be successful by holding providers accountable for total cost of care. This shift will encourage ACOs to expand their programs for people with complex LTSS needs that have only previously occurred on a much smaller scale.

The LTSS system is fragmented and can be difficult to navigate for Individuals and families. Each LTSS service has different eligibility criteria and assessment process. Service specialization in LTSS is critical to meeting the needs of specific populations. At the same time, not all LTSS providers are aware of the range of services and the eligibility criteria and determination process for each. As a result, Individuals may be referred to a particular service and provider but may not be aware of the breadth of their options and may be receiving care that is not fully aligned with their needs. For most Individuals, the LTSS system remains disconnected from the systems of medical and behavioral health care. Individuals with LTSS needs may have multiple providers of service but no single person that is coordinating care across systems and settings. Moreover, people with LTSS needs are among the most medically and behaviorally complex and costly patients in the medical care system. The result of the disconnection between systems is missed opportunities to use LTSS to reduce use of more costly services such as inpatient, Emergency Department and to prevent institutional placement.

The LTSS CP program that BLTSSCP proposes will address many of the challenges outlined above. The structure of BLTSSCP that brings together seven organizations with both specialized service offerings and a broader overview of the range of LTSS service options and experience in Options Counseling will be the first step in addressing fragmentation within the LTSS system.

BLTSSCP will leverage the experiences of Members to convene Learning Collaboratives, and develop training curriculum and service resource directories.

BLTSSCP recognizes that to best serve Enrollees, LTSS CP services must be provided in close partnerships with ACO/MCOs, the entities at risk for Total Cost of Care in the new delivery system. As a result, BLTSSCP will build on its existing relationships and methods for collaboration with ACO/MCOs and invest additional staff resources to develop collaborations to coordinate care, reduce duplication of services, and target limited resources to the right Enrollees at the right time. All BLTSSCP Members have experience participating on interdisciplinary care teams and coordinating with a range of providers in their roles as Long Term Service and Support service coordinators for One Care, as Home Care coordinators, as residential- and Day Habilitation- based coordinators, CBFS providers, and CSAs. In addition, the Members of BLTSSCP are prepared to share both their specialized LTSS service knowledge and options counseling expertise with medical providers and care managers within ACO/MCOs.

BLTSSCP welcomes the opportunity to expand services to ACO/MCO Enrollees with LTSS needs who may not currently have access to LTSS coordination services and choice counseling. BLTSSCP's designed Capacity will support 1,400 Enrollees, after a 12-month ramp-up period. BLTSSCP's enrollment projections take into account estimated numbers of ACO/MCO referrals and existing clients in specific Service Areas as well as estimated participation rates. BLTSSCP will serve all of the Greater Boston Region, the Service Areas of Brockton and Malden.

BLTSSCP will employ a management team that is responsible for overall performance and contract management with EOHHS, ACO/MCOs and Members. This team will be responsible for developing operational and programmatic elements of the LTSS CP program including training curriculum for Care teams, the Learning Collaborative, an intake process for accepting ACO/MCO referrals and assigning them to care teams, and the Consumer Advisory Board. Each Member will operate locally based care teams that utilize each organization's community-based relationships and expertise in working with particular populations to provide the core LTSS CP services. Other administrative functions will be delegated to Members: Vinfen will provide IT, marketing and quality management; Bay Cove will provide financial management and HR services. Below are key milestones with timeframes for operationalizing the LTSS CP program:

- ACO relationship development – Members began planning sessions with several ACOs/MCOs nine months ago; these will continue until contracts are final in 2018;
- Intake/referral system – BLTSSCP will develop a system for accepting Enrollees from ACO/MCOs and assigning them to local care teams for engagement;
- Central Management team–key leadership positions including the Executive Director will begin November 2017 to January 2018;
- Information Technology systems – BLTSSCP will select a CCIT in September and configure the system for the following 6 to 9 months;
- Care team start up – 7 LTSS Care Coordinators will begin in March; additional staff will be hired based on Enrollment volume.

In implementing the LTSS CP program, BLTSSCP will develop infrastructures and capacities that will sustain the program over the Contract term and beyond. These structures include Information Technology systems, a Quality Management program, a workforce trained in LTSS coordination, an organizational governance structure that facilitates the collaboration of seven separate organizations, and strengthened relationships with ACO and MCOs.

7.5 B Supporting Populations and Community Engagement

1) BLTSSCP recognizes the importance of developing positive relationships with a variety of community organizations in order to enrich the lives of and services for people we support as well as building relationships with organizations that can assist with meeting the needs related to the social determinants of health. Each Member is deeply rooted in their communities and has a wealth of experience in networking with community resources for services and supports as well as encouraging and facilitating community inclusion. This combined expertise stretches across the focus populations and across the service areas included in this proposal. These combined resources position BLTSSSCP to provide information and referral services to Enrollees and their families and provide linkages to a wide variety of resources. Each Member encourages and supports people to become active members of their communities. Individualized person-centered profiles and preferences are used to develop community connections that address religious affiliations, educational services, recreational interests, and employment opportunities. Our relationships extend to Neighborhood Health Centers and other community health networks in the Boston, Revere, Quincy, Somerville and Brockton Service Areas as well as hospitals in all Service Areas.

Region/SA	Social Service/Municipal/Community Organizations	LTSS Providers/Advocacy Groups	Housing and Homeless Shelters
Northern: Malden	Everett, Malden, Medford, Melrose and Wakefield Councils on Aging, MSG Staffing (health care staff), Seasons Hospice and Palliative Care	Eliot Community Human Services and Riverside Community Care (emergency psychiatric and behavioral screening and services)	AIDS Action Committee, MBHP, ABCD and Community Action Programs Intercity, Inc.
Greater Boston: Boston	Community Servings, Dorchester Boys and Girls Club, Urban Pride, Special Townies, Greater Boston Food Bank, Elder Care Alliance, Suffolk County Aging Disability Consortium, Age Friendly Boston, Boston Memory Cafes, COMPASS, Boston Partners in Mentoring and Alliance for Inclusion and Prevention	Multicultural AIDS Coalition, Boston Area Gay and Lesbian Youth, AIDS Action Committee, St. Mary's Center, Casa Myrna Vasquez, Horizons for Homeless Children, SPARK@ Boston Medical Center, Massachusetts Association for the Blind, Hearth, City Psych, Gandara and South Bay Mental Health	ABCD, Living and Recovery Center, Boston Housing Authority, Pine Street Inn, Rosie's Place, Health Care for the Homeless, Rebuilding Boston Together, Homestart, Tenancy Preservation Project, Boston and Brookline Housing Authorities, MBHP and Jewish Community Housing for the Elderly
Greater Boston: Revere	Chelsea Council on Elder Affairs, Revere, Winthrop Councils on Aging and Community Action Providers Inter-City, Inc.	Chelsea HUB and Nizhoni Health Services	Community Action Programs Intercity, Inc.
Greater Boston: Somerville	Cambridge and Somerville Councils on Aging, Paine Senior Services, Cambridge Economic Opportunity Committee and SCM Community Transportation	Multiservice Center of Cambridge, Cambridge Health Alliance, Cambridge and Somerville Mental Health and Aging Coalition and CASCAP	Cambridge and Somerville Housing Authorities, Homeowners Rehabilitation and Somerville Homeless Coalition
Greater	Interfaith Social Services, Quincy	Choice Community Supports	Father Bill's Place,

Boston: Quincy	Community Action Program Bay State Community Services, DOVE and New Life Counseling and Wellness	and South Shore Mental Health Center	Neighborhood Housing Service and NeighborWorks
Southern: Brockton	East Bridgewater YMCA, Catholic Charities, Cape Verdean Association, BAMSI and Brockton Family and Community Resources	Brockton Area ARC, Brockton Area Multi-Services, Inc., Horace Mann Educational Associates and Enable/First Steps	Mainspring House
Across Service Areas	Outdoor Explorations, Local Health Centers, Deaf Inc, Easter Seals, Greater Boston Legal Services, MA Alliance of Portuguese Speakers, SHINE, REquipment, Get Palliative Care Resource, Jonah & the Whale Foundation, Catholic Charities	Aging and Disability Resource Consortium, Massachusetts Advocates Standing Strong, ARC Massachusetts, Institute for Community Inclusion and MA Advocates for Children	Department of Housing and Community Development, Citizen's Housing and Planning Association and Preservation of Affordable Housing

2) Through its Members, BLTSSCP has a presence, provides services and supports and community connections in the Brockton, Quincy, Malden, Revere, Somerville and Boston Service Areas. BLTSSCP will immediately implement a robust outreach plan that builds on its existing connections and partnerships with the local community. These existing connections will be used to enhance and explore resources, network with other community resources and forge new partnerships based on current and anticipated needs of Enrollees. Trade organizations such as the Association of Developmental Disability Providers (ADDP) provide opportunities for sharing resources and information.

BLTSSCP will expand the scope of the Community Mapping that has been actively used and productive in Vinfen's service system. The catalyst for the use of this system, for which Vinfen has recently been awarded two grants, has been the focus on Social Inclusion in the community for individuals with disabilities. Community Mapping is a tool for staff to research and document community resources local to an individual's residential setting. This resource research and development tool will support Care Coordinators efforts to grow community connections on behalf of Enrollees.

3) The over 40 years of experience of Bay Cove, BCIL, BSHC, JRI , MVES, SCES and Vinfen has resulted in an extensive array of resources to be shared among the Members. A Learning Collaborative will be developed to facilitate the sharing of existing resources among Care Coordinators. Agenda items will include discussing strategies for the development of new resources including Community Mapping and sharing of identified resources. In person meetings and electronic exchange of information and questions will enhance the identification of resources to present to Enrollees. Specific contact and referral information will be gathered, recorded and maintained. Care Coordinators will have up to date access to this information through an electronic BLTSS Resource Directory of available community health and social service resources that will be developed across all Service Areas.

7.5 C Community Partners Supports and Activities

Describe plan to provide LTSS CP Supports

The foundation of BLTSSCP's work will be established on effective practices in seven domains: 1) Outreach and active engagement, 2) LTSS Care Planning, 3) Care Team participation, 4) LTSS Care Coordination, 5) Support for Care Transitions, 6) Health and Wellness Coaching and 7) Connections to Social and Community Services. BLTSSCP Members are well established community based organizations well positioned to bring extensive and demonstrated expertise in all required areas of LTSS CP functions and activities.

1. Outreach

In order to ensure the continuity of all elements of outreach activities, a checklist will be developed by BLTSSCP for the use of LTSS Care Coordinators both as a guide for discussion and as a documentation tool during Outreach and Planning. This checklist will be placed in the Enrollee's file, entered into Care Coordination Information Technology (CCIT), and will be reviewed in supervision. All contacts and attempts to contact will be documented accordingly.

a. Planned strategies to locate/engage with Assigned Enrollees with complex LTSS needs
All information regarding an Assigned Enrollee received by BLTSSCP, either through the ACO/MCO's Comprehensive Assessment or other referral information, will be utilized for outreach and engagement efforts. In addition to contact information, knowledge regarding language or communication needs and/or preferences will facilitate outreach efforts. BLTSSCP's first contact with an Assigned Enrollee will consist of an introductory telephone call by the LTSS Care Coordinator with two purposes: 1) to provide a brief overview of the role of the Community Partner, 2) to schedule a time and location for a face to face meeting. From experience, BLTSSCP has learned that for some individuals, it is more effective to call early in the month before Safe Link phone minutes are used. Initial telephone contact will be followed by a mailing to the Assigned Enrollee, inclusive of a brochure describing Long Term Services and Supports and the role of BLTSSCP (as developed and approved by EOHHS), confirmation of the scheduled follow up meeting and contact information of the LTSS Care Coordinator should an Assigned Enrollee have any follow up questions. It is also important to have call handling procedures to ensure that when an Assigned Enrollee does call BLTSSCP for any reason, appropriate staff are available to engage the individual. At each step, verbal and written communication needs, translations or interpreting will be accommodated either by BLTSSCP staff or by arrangements with other resources.

Collaboration and information sharing among health and social service providers are essential elements in order to identify communication and connection pathways. In the event that the Assigned Enrollee cannot be reached through the mechanisms described above, the Care Coordinator will call upon family members, other health care and service providers in the Assigned Enrollee's care network to obtain new or updated contact information and/or assistance in connecting with the individual. For any Assigned Enrollees who is known to be homeless, BLTSSCP will network with local homeless shelters, homeless outreach teams, homeless services, and drop in centers in an effort to connect with the individual. BLTSSCP will make a minimum of three attempts to contact an Assigned Enrollee, including at least one attempt to contact the Assigned Enrollee in person, unless the Assigned Enrollee prefers to meet only by

phone. All contacts and attempts to contact will be documented in the BLTSSCP secure electronic health record within the Care Coordination Information Technology (CCIT) and include the date of contact or attempt, mode of communication or contact, identification of the person contacted, results of the contact, and the initials or electronic signature of the LTSS Care Coordinator or other staff making the entry. If all of these outreach strategies prove to be unsuccessful, BLTSSCP will utilize a resource with which Vinfen has had success, the National Change of Address service of the US Postal Service.

Both clarity of information regarding how this program will benefit the Assigned Enrollee and the identification and use of the appropriate mode of communication are imperative in order to successfully engage with the Assigned Enrollee. Cultural, socioeconomic, environmental and other factors must also be acknowledged as factors in engagement. BLTSSCP Members will benefit from their collective cultural knowledge and language capacities. A database of these resources will be maintained through BLTSSCP and available to all Member staff. An Enrollee Engagement Library of Best Practices database will also be developed in order to document and share expertise.

The initial information to be provided to and reviewed with the Assigned Enrollee will include:

- A definition and explanation of Long Term Services and Supports
- Functions of the CP Care Coordinator and benefits of receiving LTSS CP supports
- The option for the Assigned Enrollee to choose to receive or not to receive these supports
- Information with regard to requesting a different Care Coordinator within BLTSSCP or a different LTSS CP from BLTSSCP should an Assigned Enrollee decide to enroll in the LTSS CP program
- The process for enrolling in the LTSS CP program
- The purpose of the participation form that the Assigned Enrollee will be asked to sign if the Assigned Enrollee chooses to participate, as well as the Protected Information (PI) the Contractor intends to obtain, use and share in the provision of LTSS CP Supports

Upon the Assigned Enrollee's decision to participate, the LTSS Care Coordinator will obtain a signed LTSS CP participation form and written authorization for the use and disclosure of PI as necessary in the provision of supports. These will be maintained in the Enrollee's record and LTSS care planning will be initiated within 5 days. It is likely that some Assigned Enrollees will have Legal Guardians or other authorized representatives. In those cases, all explanations of the above material will include the Legal Guardian and signatures of agreement and authorization will be necessary from the Legal Guardian. In other cases, the Assigned Enrollee may be more comfortable with or require the assistance of family or others to engage with the LTSS Care Coordinator. Every accommodation will be made to ensure that this occurs with the request and approval of the Assigned Enrollee.

2. LTSS care planning

The LTSS Care Planning process is a crucial step in the development of an effective partnership between the Enrollee and their LTSS Coordinator. This collaborative process will promote informed choice, will draw upon existing SDH and LTSS services and providers that assist an Enrollee in meeting both LTSS and SDH needs, will reflect an Enrollee's strengths, challenges, interests and goals as well as their accommodation needs.

The LTSS Care Plan (Plan) will be developed consistent with requirements of Section 2.3.A .2 of Attachment A. The Plan will be in writing, unique to each Enrollee, and will be documented in the format required in Section 2.3.A.2.d. The Plan will reflect the preferences, goals, strengths, need and cultural considerations of the Enrollee, and will incorporate the results of the ACO/MCO's Comprehensive Assessment as well as any other assessments conducted for social services including, as appropriate, Flexible Services. The Plan will also reflect any new need area an Enrollee may have developed since the time of their initial Comprehensive Assessment. The Enrollee's ACO/MCO care team will be informed of any such change. The Plan shall be approved and signed by the Enrollee or their authorized representative if any, shared and approved by the Enrollee's PCP or PCP's designee, shared with parties who need the LTSS Care Plan in connection with their support including members of the Care Team and other providers, prepared in alternative formats and/or in the Assigned or Engaged Enrollee's primary language as needed.

The development of the LTSS Care Plan and approval and signature of the Plan by the Enrollee or Authorized Representative will all occur within 90 days of the Assigned Enrollee's referral to BLTSSCP. At that time the completed Care Plan will be submitted to the ACO/MCO for approval by the PCP and, once approved, will be provided to the now Engaged Enrollee in an appropriate format.

a. Describe how you will ensure that the Enrollee has meaningful participation in the development and management of the LTSS Care Plan

The Assigned Enrollee and/or any authorized representative(s) will receive necessary assistance and accommodations throughout the entire Outreach and Care Planning and Coordination Processes. Any planning meetings and/or discussions will be scheduled to conform to the Assigned Enrollee's availability for time and/or location.

As early as the first Outreach meeting with the Assigned Enrollee, BLTSSCP Care Coordinators will begin the process of educating the Assigned Enrollee about LTSS and about the Care Plan process. Beginning with the Comprehensive Assessment results from the ACO or MCO, information will be gathered, and options discussed and reviewed with the Enrollee, options as related to their needs, desires and obstacles driven by medical, physical, or social determinant of health needs. Within 5 days following the documented decision of the Assigned Enrollee to participate in LTSS CP, the LTSS Care Coordinator will be confirmed or assigned, as needed, and the Care Planning process will be initiated. The LTSS Care Coordinator will inquire about any Legal Guardian or Authorized Representative who should be involved in the process, and who, if anyone else, the Enrollee would elect to have as part of the planning process. Information will be provided regarding self-directed care options and the assistance available.

Successful LTSS care planning begins by engaging the Enrollee in a discussion of his or her needs, goals, strengths, resources, and the services and supports he or she considers important to quality of life and health. It is critical for the LTSS Care Coordinator to hear this from the Enrollee in his/her own words before moving on to other contacts and more structured planning. The Enrollee is the expert in what the Enrollee needs and must have the opportunity to express this in language that is meaningful to him or her. The key elements of the discussion as expressed by the Enrollee then become the guiding principles of the Care Plan. Management of the Care Plan is a shared endeavor among the entire Team, as led by the Enrollee. In the

framework of Person Centered Planning, Care Team members will be chosen by the Enrollee and may include family, friends, caregivers, health care providers, clinicians, and any additional members selected by the Enrollee.

The Engaged Enrollee will be fully apprised of the ability to request a review of the Care Plan at any time and that the Care Plan must be reviewed, revised and approved every 12 months or more frequently if there is a major change in functioning.

b. Describe protocols for providing informed choice of LTSS programs and providers as part of LTSS care planning

As part of the process of the development of a Care Plan, the Comprehensive Assessment will be the starting point in providing focus as to the Enrollee's needs. Upon discussion with the Enrollee, and their signed agreement to discuss with other parties, the LTSS Care Coordinator will initiate discussions with family members, authorized representatives, health care providers, and other team members. Additional needs may arise for health care or relative to social determinants of health. The LTSS Care Coordinator will have the responsibility to identify services or supports that will meet these needs, including the status of eligibility or other funding mechanisms. The Care Coordinator will ensure that the Enrollee is informed that any recommended LTSS are subject to MassHealth medical necessity criteria and utilization management requirement and my require prior approval. If options are not readily apparent, the Care Coordinator will perform research including reaching out to other BLTSSCP Entities and their staff as well as other service providers, community resources and social service organizations to generate information. As new resources are identified, these will be shared through the BLTSSCP Learning Collaborative to develop a BLTSS Resources Directory of available community health and social service resources for specific geographies and populations, and ensure Care Coordinators have access to this Directory. Options will be presented to the Enrollee along with a thorough discussion, explanation, and comprehensive review of relevant written information to fully inform and support the Enrollee in making a decision. A minimum of two options will be identified and presented for each need. The Enrollee may choose to have family members or others present during the presentation of options. Language and culture needs will be important factors both in researching, identifying and presenting options. Standardized documentation will be completed by the Care Coordinator relative to the needs, who has identified each need, the options that were presented to address each need, the method and date of presentation, who was involved in any discussion, and decisions that were made.

3. Care team participation

a. Describe promotion of integrated LTSS communication across all stakeholders, and exchange of essential documentation as part of participation on Enrollees' care teams

Beginning with the contract award, the BLTSSCP Management Team will schedule planning meetings with ACO/MCOs to promote integrated communication across all stakeholders, and integrated care for the Enrollees. Protocols and procedures specific to effective communication and exchange of information, particularly of electronic information, will be developed and implemented across all stakeholders. These protocols will then be shared within meetings with health care providers, service providers and community resources. Agenda items will include a review of the scope of the provision of LTSS and information regarding BLTSSCP and contact

persons, LTSS Care Coordinators and the Care Plan process and processes for effective communication and shared information. For instance, it will be imperative that all members of the Care Team are provided up to date and accurate information for communication. Given the agreement of the Enrollee, the LTSS Care Coordinator will initiate contact with all known health care, service providers and other resources to gather information regarding the needs of the Enrollee as well as any past or present supports. The organization of the Team will promote open and consistent communication both formally and informally. The LTSS Care Coordinator will document all contacts and will work to ensure that information is shared in a timely manner with all Team members. As part of the Care Planning process, the LTSS Care Coordinator will develop protocols specific to the Enrollee as to how and when information will be shared among the Team members.

In response to the needs or preferences of the Enrollee, communication styles and necessary supports for effective participation by the Enrollee will be addressed at the outset of the Care Team formation. The first responsibility of the Team is to fully engage and listen to the Enrollee after which the Care Team members may offer suggestions about how the Enrollee's goals might be met. Recommendations by the health care team will be considered and discussed. The LTSS Care Coordinator and the entire Team will ensure that the orientation and dynamic of the Team is person centered, supportive, and respectful of the Enrollee's individuality and lifestyle choices, and that the plan developed reflects the desires of the Enrollee.

As directed by the Engaged Enrollee, the LTSS Care Coordinator will participate as a member of the Engaged Enrollee's ACO/MCO Care Team in order to support the Engaged Enrollee's LTSS care need decisions and LTSS integration in the Engaged Enrollee's ACO/MCO care plan as specified in Section 2.3.A.3 of Attachment A.

b. Describer how you will provide LTSS expertise and advocate for appropriate LTSS and care as part of the Engaged Enrollees' care team

BLTSSCP will work with each ACO/MCO to ascertain their preferred model of care and vision as to how best to incorporate the functions required of a community partner. LTSS Care Coordinators will be well educated in the delivery of LTSS and trained in MassHealth expectations and requirements. As such, LTSS Care Coordinators will bring both expert knowledge and vast LTSS resources, including those in the BLTSSCP Directory of Services, to the ACO/MCO Care Team serving as an expert consultant to the Care Team. The combined expertise of the Members is vast, and the internal network to share a knowledge base of resources will be well developed through the Learning Collaborative and other resource sharing mechanisms. LTSS Care Coordinators will be trained to see their role as part of this sharing network.

The long- standing focus of BLTSSCP Members on the encouragement of self advocacy in their respective service systems will provide LTSS Care Coordinators with the skills and support to work with Assigned and Engaged Enrollees to develop these skills.

4. LTSS Care Coordinators

The LTSS Care Coordinator is situated at the juncture between systems and the Enrollee, and has as a responsibility to mitigate of the effects of fragmentation that can occur in social support and health systems. Income supports, housing, health and wellness, LTSS, the role of informal supports, recovery and behavioral health all contribute to a person's overall welfare and quality

of life. Within the domain of LTSS itself, the LTSS Care Coordinator is responsible to ensure that choices in services are presented, that the services presented can achieve their objectives and are high quality. Depending on the resources and capabilities of the Enrollee, the LTSS Care Coordinator may find it necessary to assist with accessing the services in the Plan, resolving complaints, advocating on behalf of the Enrollee, scheduling services, and locating alternative services. From a systems perspective, the LTSS Care Coordinator must ensure that the services are provided with quality and continuity of care, are non-duplicative, promote integrated care, support the values of person centered planning, Community First and Principles of a Valued Life, are appropriate, and are provided in accordance with service guidelines.

The LTSS Care Coordinator is responsible for the development of the relationship with the Enrollee, gaining information regarding an Enrollee's needs and desires, playing an integral role on the Care Team, advocating when necessary, and documenting and implementing the Care Plan. The role is at the center of BLTSSCP and will be supported as such. The LTSS Care Coordinator will provide information about various options for LTSS services / programs and providers that can meet an Enrollee's needs, ensure that the needed services are authorized, assist the Enrollee in navigating and accessing these authorized services, coordinate and facilitate communication among the Enrollee, ACO/MCO and providers, and provide ongoing monitoring and implementation of LTSS Care Plan to ensure LTSS are relevant and appropriate. The LTSS Care Coordinator is also responsible for ensuring that the indicated services are implemented as directed. Through monitoring the LTSS services in an ongoing way, the Care Coordinator can ensure that the service/service provider is meeting the satisfaction of the Enrollee while monitoring for any changes in status/life events that may change the Enrollee's LTSS needs.

a. Describe how you will monitor and manage status/life cycle events that may change the Enrollee's LTSS needs

The relationships BLTSSCP will develop with ACO/MCOs and Health Care Professionals will be critical to the sharing of information related to the Enrollee's LTSS needs. Plans for regular communication will be developed by the BLTSSCP management team and negotiated with each ACO/MCO. This will enhance any verbal or written communications that occur regarding particular Enrollees. The Enrollee, family, guardian, other identified contacts, and all members of the Care Team will have contact information for the Care Coordinator and will be encouraged to contact the Coordinator with any information, questions or concerns, particularly with regard to a status/life cycle event that may change an Enrollee's LTSS needs. Such needs will be tracked in the CCIT which will in turn flag the potential need for a revision to an Enrollee's Care Plan

In addition, the monthly telephone calls and quarterly face to face meetings (at a minimum) will enable the LTSS Care Coordinator to communicate with the Enrollee directly regarding any medical, physical and/or social changes. This communication is central to LTSS planning, implementation and monitoring. The understanding of the Enrollee's strengths, resources, goals and needs forms a framework for responding to changes in circumstances and evolving needs. Any emergent changes will result in action by the LTSS Care Coordinator; this may consist of communication with the rest of the Care Team through either telephone or electronic contact, a review and modification of the Care Plan, meeting with the Care Team, referral(s) to appropriate service providers or community resources, collaboration with the appropriate resource for education on a presenting challenge, and/or conversations with family members or identified

contacts. BLTSS CP will also have the capacity to initiate an internal Risk Team process to immediately develop plans to access the appropriate resources if indicated by the information received.

b. Describe how you will support and encourage Enrollees' ongoing engagement in their care planning and implementation of their care plan. Include strategies related to motivational interviewing and promoting self-determination

BLTSSCP actively promotes self determination, independent living, consumer control and self advocacy for Enrollees and each Member, independently and collectively in this endeavor, is committed to these principles. As such, Members will draw from their existing staff training curriculum that includes Motivational Interviewing, Self Determination and Self Advocacy when training new hires for the role of LTSS Care Coordinator. The utilization of motivational interviewing is closely related to the goal of self-determination as both are person-centered and support the person to direct their goals and decisions. This will be at the core of the partnership Care Coordinators will form with Enrollees and will inform both in the development of the Care Plan and the implementation of LTSS.

Recipients of MassHealth, particularly those in need of LTSS, often have a history of being disempowered through poverty, difficulty accessing care, discrimination on the basis of a disability or language/culture, or changing circumstances. Each Enrollee of BLTSSCP will be supported and encouraged to assume responsibility for care to the greatest extent possible. To realize this goal, the LTSS Care Coordinator will first ensure that communication is designed to address any cognitive or linguistic needs, and then support the Enrollee in identifying strengths and areas of need, in expressing preferences and goals, and in making decisions about care. LTSS Care Coordinators will respect the dignity of risk and not undermine the Enrollee's autonomy while at the same time making certain that all options, challenges, risks and ramifications are fully explained and understood. Through the techniques of motivational interviewing, the LTSS Care Coordinator will use active listening to help the Enrollee explore changes without persuading or giving advice. The LTSS Care Coordinator will work in partnership with the Enrollee, supporting the Enrollee to develop and enhance their motivation to explore change and options.

5. Support for transitions of care

a. Describe your plan for providing informed choices in regard to LTSS programs and providers to Enrollees as part of transitions and how you will ensure supports are in place to enable successful transitions of care

Transitions of care can present significant challenges, particularly when exacerbated by inadequate communication and coordination among providers and systems of care. By definition, a person has experienced an adverse health event, which may also diminish the capacity to self advocate. Hospitals, rehabilitation centers, primary care, home health agencies and other LTSS providers have objectives and operating systems that may have inherently conflicting limitations, regulations, payment rules, and others. Successful transitions require the participation of all Care Team members as well as early, consistent, and active communication with the Enrollee, family members, informal and formal caregivers.

The Enrollee may require assistance from the LTSS Care Coordinator as an advocate; for example, if the Enrollee prefers to return home rather than be admitted to a nursing facility. The

LTSS Care Coordinator, in maintaining contact with the institution currently providing care to the Enrollee, will engage in discussions with staff, the PCP and other providers regarding the Enrollee's health status and post-discharge recommendations including any appointments and medications. The LTSS Care Coordinator will provide community expertise to the Enrollee's ACO/MCO, or applicable provider, to facilitate transitional care management and follow-up. The LTSS Care Coordinator will assist in developing an appropriate discharge plan and will attend the discharge meeting when at all possible. The LTSS Care Coordinator will make revisions to the Care Plan and inform all other Team members of these revisions. When an Enrollee is to return home, the LTSS Care Coordinator should be informed in advance of the date of return so as to ensure that LTSS services are or can be put in place. The Care Coordinator may need to research and present options of a new service to an Enrollee, and then coordinate the new service prior to discharge. Enrollee choice is fundamental to these decisions and activities. With early planning, at times natural supports can be explored and developed; for example, a family member could be trained to be an active caregiver.

b. Describe steps to be taken to ensure Enrollee's stability and satisfaction post-transition
The LTSS Care Coordinator will meet in person with the Enrollee within three business days of discharge, or as early as next day if the Enrollee's situation may complex to that the Care Coordinator can ensure any unanswered questions about the Enrollee's home environment or resources are addressed effectively and timely. The LTSS Care Coordinator will review changes to the Care Plan, ascertain the status of services and supports, and determine with the Enrollee if additional services, supports, or flexible services might be needed. If any changes are desired or indicated, the LTSS Care Coordinator will assume that responsibility to research and facilitate any changes possible.

It is important that the LTSS Care Coordinator maintain contact with other members of the Care Team during this post-transition period to ensure for continuity of care and promote stability. Alterations in routine, support and setting may have an effect on the Enrollee's health and/or ability to function in the new environment. This will give the Care Coordinator the opportunity to evaluate the success of the transition as well as the Enrollees satisfaction with the care transition and subsequent services implemented to ensure safety and stability of the Enrollee. The Care Coordinator will solicit feedback. Any concerns on the part of the Enrollee, family, caregivers, health care and LTTS providers and others will be shared accordingly and resolved as quickly as possible. The LTSS Care Coordinator's role will include maximizing communication strategies among these parties by developing a plan individualized to each situation.

6. Health and wellness coaching, including but not limited to:

a. Describe health and wellness education, coaching and health promotion programs or activities that will offered to Enrollees; any use of programs that are evidence-based
Health and wellness education is a multi-layered process with both the ACO/MCO Care team having a role and the LTSS Coordinator having a role. An Enrollee's ACO/MCO treatment plan will identify medical and health goals. In relation to those specified goals, the LTSS Care Coordinator will provide an Enrollee with fundamental training. In situations where there may be caregivers and/or family members who, with the Enrollee's agreement, can and will be brought into this educational process, they will be trained by the LTSS Care Coordinator as well. Following the initial training process of disease facts and prevention, a more in-depth,

personalized training will be completed as needed to assist the Enrollee and others in understanding the current health issues and prevention of new illness.

Community-based programs, both in house and as provided by other organizations, will be used as much as possible for issues such as weight control, smoking cessation, substance use, as well as support and self advocacy groups. Members offer groups for weight loss, diabetes management, PTSD management, DBT support, and provide 1:1 education when needed for such topics as diabetes management, sex education/birth control, and exercise/stress relief/weight management. The curricula used are evidence based practices and resourced through professional training literature. Member Nurses can be available, as needed, to consult with a Care Coordinator and/or with an Enrollee and provide 1:1 education on more complex medical options with the goal of reducing an Enrollee's anxiety and empowering an Enrollee to make a more informed decision about treatment.

Given that health coaching and information regarding symptom management to enable the Enrollee to be knowledgeable in the prevention and/or management of chronic medical conditions is so essential, this will be a particular focus of LTSS Care Coordinators. Education on how to reduce high risk behaviors and health risk factors such as smoking, inadequate nutrition and infrequent exercise as well as providing the assistance in accessing the concomitant health promotion activities will be provided to promote the achievement of health and wellness goals. Assistance offered by the LTSS Care Coordinator to the Enrollee in setting and meeting will promote positive health outcomes and more integrated care. Facilitation of both consistent and event based communication among health care entities such as the PCP and staff and the rest of the Team will be a crucial role of the Care Coordinator to support and educate regarding any specific and emergent health issues or concerns.

BLTSSCP Members have extensive experience in health and wellness promotion. We note in particular that MVES has been a long time member of the Healthy Living Center of Excellence (HLCE) network which advances evidence based health care promotions in the community. In the last year alone, MVES provided over 25 programs at diverse community sites as well as traditional health care delivery locations. Some of the topics covered are: Chronic Disease Self-Management, Diabetes Self -Management, Matter of Balance, Healthy Eating, Powerful Tools for Caregivers, and Chronic Pain Self-Management. MVES looks forward to expanding these successes to integrate additional Chronic Disease Self –Management Program and other support programs including Better Choices Better Health, Enhanced Wellness and Healthy IDEAS for Depression Management into the LTSS system.

7. Connecting Enrollees to social services and community resources

a. Describe evaluation of social services needs for Enrollees and facilitation of access to Flexible Services for Enrollees - include proposed screening tool the Bidder intends to use

As a component of the intake and care planning process, the LTSS Care Coordinator will become knowledgeable about the factors affecting the health needs of the Enrollee. These include social determinants of health as well as the maintenance of health supports and working toward a healthy or healthier lifestyle. A structured assessment of social service needs will occur early in the care planning process. Questions relevant to the social service needs of the Enrollee will be posed to the Enrollee as well as to collateral contacts who are part of the care planning process. Our goal is to ensure that Enrollees are informed of and are able to access all public

benefits for which they are eligible and for which there is a need such as income supports, housing, fuel assistance and utility protection, SNAP and access to food pantries, veterans' benefits, and Safelink and phone discounts. These and other local community resources will become part of the Care Plan and will be discussed with the Enrollee both at the time of the Social Assessment and at regular intervals. Enrollees will be assisted by the Care Coordinator and/or others on the Care Team as necessary to enroll in and access these resources and to approach the Enrollee's ACO/MCO Plan with any appropriate request for Flexible Services. As noted previously, BLTSSCP will establish and continuously update Resource Directories which Care Coordinators can access to select appropriate services to offer to Engaged Enrollees.

In addition, LTSS Care Coordinators will be attuned to needs for assessments of Independent Living Skills, communication, sensorimotor skills, behavior, physical and occupational therapies, social and affective development. Deficits in any of these areas can impact significantly on quality of life, health and community tenure. The Care Coordinator will focus on working with the Enrollee, the PCP / ACO Plan, MassHealth and the health care community regarding referrals and prior approval for assessments that are indicated. Please see **Attachment 3** for the draft Social Assessment that will be submitted to EOHHS for approval for use by BLTSSCP.

b. Describe how you intend to ensure ongoing connections to community resources and social services.

The connections that are established with community resources, home care programs and social services will be consistently evaluated for effectiveness, practicality and feasibility by the Care Coordinator and others on the Care Team. We will also invite resources to participate in our Learning Collaborative in order to sustain ongoing connections and promote effective collaborations. As part of our ongoing LTSS CP service, we will frequently inquire of an Enrollee and their Care Team new LTSS and SDH resources of which they may be aware so that we are expanding our network in an ongoing way. Whether related to health and healthy lifestyle, housing, income, food, spiritual needs, or social needs, the only way these resources are beneficial is with the Enrollee agreement and their follow through. As such, evaluation as described above is imperative. If a link is not working, this will be re-visited and resolved, either by making an adjustment to the current service or seeking another to address the presenting need.

BLTSSCP's familiarity with the population to be supported as well as with resources in the communities we support, both in conjunction with our own internal networks, positions us to maintain a substantial network of community and social services resources that will in turn provide choice for Enrollees. Likewise, the depth of existing partnerships all BLTSSCP Members have with a variety of state agencies, as described in earlier sections of this proposal, will serve BLTSSCP well in promoting ongoing collaboration and coordination of services for Enrollees through this innovative Community Partner program.

7.5 D Innovative Technologies

Since 2011, BLTSSCP Members Vinfen and Bay Cove, have partnered in several projects evaluating the potential contributions of innovative technologies in improving the health of people with disabilities and in reducing health care costs. All of the technologies noted below are applicable to individuals who have the capacity to use adaptive devices and learn self-management to improve health and independence.

- Vinfen and Bay Cove have deployed MedMinders with the goal of 1) helping clients take their medications on time and 2) reducing unnecessary visits by Visiting Nurse Associations (VNA). Pharmacies pre-package medications in trays, and an RN inserts and locks the trays in the MedMinder device which alerts the user to access medications at the appropriate time. Data is fed to an internet based dashboard for staff. The program, as implemented at Vinfen, has resulted in a 15% reduction in VNA spending.
- In a Behavioral Health Home program as funded by a three-year CMS Innovation Grant, Vinfen and Bay Cove embedded nursing and outreach staff into existing community-based care teams. The Behavioral Health Home clients were also provided with a Health Buddy, remote patient monitoring technology developed by Bosch. The results of the combined intervention significantly reduced Emergency Department visits as well as psychiatric hospital days. The program was evaluated by Stephen Bartels, M.D., of the Dartmouth Institute.
- Bay Cove and Vinfen are working with the Dartmouth Institute in a 5-year, NIMH-funded study to understand the benefits of deploying Phillips Telestation for use by clients living with disabilities. At the 2- year point, (with approximately 50% of the intervention group enrolled), Emergency Department visits and hospital days for the Telestation group are at rates equaling about one-third of the control group.

Outside of the above mentioned joint projects, Vinfen is launching an evaluation project with Mozazz, a company which has developed a system to support individuals with I/DD, autism and other cognitive challenges in communicating and managing their behavior and health. This system has shown significant promise in improving functioning and community tenure for these populations. Additionally, JRI uses a software called Basecamp to help facilitate community connections and improve access to information and communication among a wide range of community constituents.

In the LTSS CP program, BLTSSCP will use several types of technologies. As discussed in **Section 7.4**, all LTSS Care Coordinators will be assigned a laptop computer, will use a smart phone and will document in BLTSSCP's Care Coordination Information Technology (CCIT). In addition, BLTSSCP is committed to evaluating and pilot-testing the technologies noted above which have the potential to improve Enrollee self-management and reduce Emergency Department visits and inpatient costs. BLTSSCP has had preliminary discussions with a few ACOs about adoption and funding of innovative technologies in the LTSS CP program. BLTSSCP will evaluate technologies which have the following characteristics: address neurocognitive challenges and/or complex medical conditions; cost $50-60 PMPM, which means they are cost-effective if they save one Emergency Department visit per year and/or one hospital day; and have robust data systems which can be integrated with CCIT systems. BLTSSCP will propose use of selected technologies to ACO/MCOs to pilot-test with 10 to 20 Enrollees and is prepared to implement them should funding be available through ACO/MCO arrangements.

7.3 H Sustainability

Describe plan to sustainably fund proposed infrastructure and capacity building investments and CP Supports over the Contract Term and after the initial Contract Term. Include description of any tools, resources, or processes the Bidder intends to develop using DSRIP funds and continue to maximize after the initial Contract Term

BLTSSCP will use DSRIP funds to develop important capacities and infrastructure necessary to operate an LTSS CP program. The capacities and infrastructure that BLTSSCP develops will serve to sustain the program throughout the 5-year Contract Term and after. Certain investments will be tangible: a system to support care coordination, a data warehouse, and marketing materials including a website. Other investments will develop capacities: a workforce that is trained in LTSS Care Coordination; workflows for coordinating care across LTSS CP and ACO/MCO care teams; and a new organization that brings together seven leading Community Based Organizations into a structured collaboration –Boston LTSS Community Partners (BLTSSCP). Below are specific capacities and structures that BLTSSCP will develop to live beyond the 5-year term of the Contract:

- **ACO/MCO relationship development**: As described in **Section 7.5.J**, BLTSSCP will invest staff resources to develop relationships with ACO/MCOs in our service areas. The relationships needed to coordinate care for Enrollees go beyond a simple contract. BLTSSCP will develop, in collaboration with each ACO/MCO, specific protocols, workflows, policies and procedures to address the various areas of collaboration including: Enrollee referrals, notification of admissions, discharges and ED visits, Flexible Services processes, EHR data sharing to complete an LTSS care plan, service arrangement and authorization protocols, and transitions of care.
- **Marketing to ACO/MCOs** – BLTSSCP believes that the most important marketing work with ACOs/MCOS is the above-described relationship development work. In addition, BLTSSCP will conduct trainings for ACO/MCOs, and will create written materials.
- **Organizational structure to facilitate the collaboration of seven Members**: Each BLTSSCP Member has invested and will continue to invest the time of key personnel of its Executive and program teams to agree to a governance structure, operating agreement and key administrative functions in support of the LTSS CP program. Each Member has also devoted project management, business development and administrative staff to develop the BLTSSCP structures and policies.
- **Workforce Development** - BLTSSCP Members have existing workforces that perform LTSS care coordination responsibilities through One Care Health Homes, SCO, One Care LTSC and programs for people with I/DD. An additional 14 LTSS Care Coordinators will be recruited by Members and trained to support the LTSS CP program.
- **Training curriculum**: BLTSSCP will invest in the development of training curriculum for all BLTSSCP central and care team staff. LTSS Care Coordinators will be trained in all LTSS CP required elements. Some elements will be delivered by each respective Member and some elements that are unique to the LTSS CP program will be delivered centrally by BLTSSCP central staff.

- **Enrollee Engagement:** Success of the program will be determined in part by LTSS Care Coordinators' successes in engaging Enrollees. In addition to staff training and coordination with ACOs, BLTSSCP will invest in the following Enrollee engagement strategies: development of an Enrollee Engagement Library of best practices, and marketing materials for Enrollees. Most important is the investment to each Member organization to support the hiring of LTSS Care Coordinators in advance of having full caseloads. Although Enrollee engagement will be required throughout the Contract term, more Engagement work will be required in the first two Budget Years to reach BLTSSCP's Enrollment Capacity.
- **Resource directories and networks of community-based organizations:** BLTSSCP care teams will build on existing community-based networks to develop directories of LTSS and social service providers for the LTSS CP program.
- **Care Coordination Information Technology (CCIT) and Data Warehouse systems:** BLTSSCP will select, configure and develop a specialized care coordination system for the LTSS CP program. The CCIT will be used by all CC/CCMs to perform care management functions. It will also be used by financial, quality and programmatic staff to manage the performance of the program. The CCIT will be supported by a Data Warehouse that will store LTSS CP Enrollee data and will allow for aggregation of other data such as EHR data from ACOs and/or claims data from MassHealth and/or MCO/ACOs. DSRIP funds of over $150,000 over the five Budget Periods and the Preparation Budget Period will be spent on Information Technology solutions to support the development, implementation, and sustainability of the program.

Except where otherwise noted, all above described capacities and infrastructure will be supported through the investment of DSRIP funds. Some investments occur in the first few months of the program and other investments require sustained management over the five years of the program with less funding required to sustain after the LTSS CP Contract term. For example, Information Technology requires an up-front investment of over $65,000. These costs are capitalized and spread across the five year Contract term. On an ongoing basis, BLTSSCP's Program Budget proposes spending $30,000 per year to manage the IT systems which includes the cost of user fees, and funding to support a User Support Specialist and Systems Administrator. Another example is the ACO/MCO relationship development work. In the Preparation Period and Year 1, the Executive Director, Deputy Director and LTSS Program Manager will be dedicated to documenting workflows, protocols, policies and procedures with ACO/MCOs but in later years as the LTSS CP program is more established, those staff will focus on contract management and program improvement work.

The DSRIP investments are detailed in Section 7.5.G Budget and Budget Narrative. BLTSSCP's Budget proposes investments in infrastructure in the first few years. In later years, the base PMPM subsidizes more of the administrative functions needed to sustain the program with less support required from DSRIP funds. Sustainability of the LTSS CP program beyond the Contract Term will ultimately depend on BLTSSCP's relationships with ACO/MCOs, whether the services that BLTSSCP has provided lead to better health at reduced costs for the highest cost ACO Enrollees, and if so, whether ACO/MCOs will invest in this service moving forward.

7.5 I Quality Management and Perfromance Monitoring

1. Describe Bidder's quality improvement program

BLTSSCP will leverage Members' years of experience managing robust Quality Management (QM) systems to develop and implement quality improvement programs targeting the health domains in the new LTSS CP program. Each Member employs QM systems which include: annual objectives derived from organizations' mission, long term goals, environmental scans, and needs identified from prior year performance; data collection across a wide range of behavioral and physical health measures, including process and outcome data across domains listed in Attachment A: Model Contract and Appendix C: LTSS Community Partner Quality and Accountability of the RFR; processes for data analyses to shape implementation, and modification of annual and multi-year initiatives to improve performance. Examples include:

- Prevention and Wellness: tracking and improving adherence to annual physical exams, and participation in wellness activities, such as walking clubs, or fitness club participation.
- Member Experience: implementing and tracking satisfaction surveys from individuals served, as well as families and guardians, and use of these surveys to develop staff training or other interventions to improve these ratings.
- Avoidable Utilization: minimizing and tracking avoidable Emergency Departmenent visits and unnecessary home health services (e.g., multiple skilled nursing visits per day for simple medication administration).
- Integration: tracking of data on both behavioral and health symptoms and utilization to develop and evaluate special initiatives in which integrated services to improve process, outcome, and value-based measures. Community tenure (healthy days in the community vs days in psychiatric or medical hospitals, or Skilled Nursing Facilities) will be measured, as this metric is increasingly recognized as a key indicator of effective integrated care and overall health.
- Engagement: tracking participants adherence to scheduled appointments, participation in and approval of person-centered treatment plans.
- Chronic Disease Management: tracking claims and metrics data and developing initiatives to improve blood pressure, weight and BMI, and management of diabetes with tracking of A1c levels.

BLTSSCP's Quality Improvement (QI) Plan will be developed with the participation of the Member organizations, and input from partnering ACOs/MCOs, and will be submitted to EOHHS for approval prior to implementation. The QI Plan will be implemented and evaluated monthly by each Member and BLTSSCP's Quality Management (QM) Committee for the first year; then, if trends are stable, quarterly thereafter and throughout the Contract Term. The QI Plan and reports on required Quality Metrics will be submitted to EOHHS on an annual basis. Members' organizational leadership including Quality Managers and Care Team staff will be responsible for collecting data and implementing initatives. Adherence to the plan will ensure that BLTSSCP is providing services that meet the expectations of Engaged Enrollees, of partnering ACO/MCOs, and the requirements of Masshealth and CMS.

2. Description of at least one quality initiative the Bidder proposes to undertake in the first year including measures for success.

In the first year of the award, BLTSSCP will develop a quality management (QM) initiative to address *Care Coordination and Care Transitions* as these domains are essential to the success of the LTSS CP program.

While BLTSSCP has selected *Care Coordination and Care Transitions* as our primary focus for the first year's quality initiatives, another high priority for our service model will be providing support, linkages and referrals to assist Enrollees to remain in the community and avoid hospitalizations. We believe that measuring and evaluating the Enrollee's quality of care, chronic disease management, care transitions, caregiver stress, isolation, social connectedness and other social determinants of health are an integral part of the Enrollee's care and our Quality system will monitor these outcomes as well.

BLTSSCP's Quality Management (QM) Committee will define the metrics and processes for data collection, analyses, and improvement initiatives. The formal Quality Improvement Initiatives will address all required service components of Care Coordination and Care Transitions. BLTSSCP's CCIT will capture Care Coordination and Care Transitions data including but not limited to data related to the below requirements, processes, and outcomes.

Care Coordination of LTSS and LTSS-related Services: This initative will track the processes necessary for care coordination to meet requirements for completeness, timeliness and effectiveness, and will develop initiatives to correct or improve performance. An LTSS Care Coordinator will document the development of the LTSS Care Plan in the CCIT, including the timeliness and completeness of the following components: the ACO generated Comprehensive Assessment; an LTSS and social services needs assessment; presentation of choices of LTSS programs and providers; Enrollee (and/or guardian) acceptance of choices to meet informed choice requirements; explanation of MassHealth prior authorization requirements; and presentation of rights and appeal processes. The system will track both the submission of the LTSS Care Plan to the ACO/MCO for approval by the PCP or designee and the delivery of the approved plan to the Enrollee (or guardian) and will collect data on qualifying activities by the LTSS Care Coordinator, including type of contacts (e.g. telephone, home or hospital visit), date, time and content of meeting. An LTSS Care Coordinator will enter important data into the CCIT on changes in the status/life cycle of the Enrollee. The CCIT will be configured to produce alerts to indicate the need for potential revisions in the LTSS care plans based on these life changes, and will track data (as described above) on the processes and timetables for revising the plan. Finally, data from other sources, including claims data and reports from other LTSS providers, will be sought to enter into the CCIT in order for the Care Coordinator, Director of Care Coordination, and QM Committee to evaluate the provision of LTSS services to the Enrollee in accordance with the plan. Data on these LTSS care coordination processes and results will be available at the Care Coordinator, program, and BLTSSCP level, and will be reviewed by managers and the BLTSSCP QM Committee, to identify and develop initiatives to improve performance.

Transitions of Care: LTSS Care Coordinators will participate in and collect data on care transitions, such as Emergency Department visits, and admissions and discharges from acute hospital or Skilled Nuring Facility stays. Care Coordinators will also collect data on contact events such as visits with the Enrollee and telephone contacts to LTSS service providers. As with changes in life status noted above, these transitions may prompt re-evaluations and modifications in the LTSS care plans to meet changing needs of the Enrollee. Data on planned changes in LTSS services and on actual implementation, (for example, increased scheduled support from PCAs), will be tracked in the CCIT system. Data on LTSS care transition planning processes and results will be available at the Care Coordinator, program, and BLTSSCP level, and will be

reviewed by managers and the BLTSSCP QM Committee, to identify and develop initiatives to improve performance.

As claims and other outcome data become available for metrics such as community tenure and all-cause re-admissions, the BLTSSCP QM Committee will evaluate relations among LTSS Care Transitions and other data, and take steps to generate improvements in performance.

3. The functions of the Bidder's quality management committee including the composition and reporting structure within the Bidder's organization.

BLTSSCP will establish a Quality Management (QM) Committee chaired by Vinfen's VP of Quality and Compliance. Membership of the Committee will consist of the Executive Director, Deputy Director and LTSS Program Manager as well as Quality Directors of each Member organization. The QM Committee will meet monthly for the first budget period, at least quarterly thereafter and will report to BLTSSCP's Board of Directors. BLTSS may determine more frequent meetings are needed for the first one to two years of the contract. The QM Committee will be responsible for the establishment, maintenance and continuous review of the Quality Improvement Initiatives as well as the ongoing review of reports on all Quality Measures. The Executive Director of BLTSSCP will conduct monthly reviews of quality data with BLTSSCP Members' staff; engage in management actions to improve data as needed; participate in the QM Committee and report on actions taken to improve processes and outcomes as planned with the Committee.

BLTSSCP will collaborate with EOHHS, and with ACOs as needed, to establish performance benchmarks for all Quality Measures. BLTSSCP will review the Quality Score and DSRIP Accountability Score from EOHHS for each Budget Period. All Quality Measures, including the claims-based measures, chart review measures, and Enrollee experience surveys across required domains will be reviewed by the program leaders for each Care Team, Member organization, and the BLTSSCP QM Committee. Although Budget Periods 1 and 2 are "pay-for-reporting," BLTSSCP will implement improvement plans for any domain area that is trending or falls below the "attainment threshold," and will analyze reasons for all preventable Emergency Department visitsand all cause readmissions in preparation for Budget Period 3 when Outcomes Based Payments begin. The QM Committee will review the assigned achievement points as well as the overall Domain score in each category against the "attainment threshold" and "excellence benchmark" set by EOHHS as well as the overall Quality Score. For any domain that falls below the attainment threshold, BLTSSCP will conduct a review and determine a plan of action to implement needed improvements. Since the DSRIP score is in part based on improvements from the previous Budget Period, close monitoring of progress will be imperative to maximize possible Improvement Over Self Points. In the event that BLTSSCP does not achieve a 100% DSRIP Accountability Score, BLTSSCP will provide EOHHS with a corrective action plan that includes steps to regain any at-risk funds.

7.5 J Coordination with ACOs and MCOs

1. Describe how you will communicate your skills/expertise/value to potential ACO/MCOS

Boston LTSS Community Partners (BLTSSCP) recognizes that to be successful in serving Enrollees in the LTSS CP program, it is important to develop systems and practices to ensure coordination with ACOs and MCOs resulting in better care for people with LTSS needs. To that end, BLTSSCP Members have reached out to nearly all eleven ACO/MCO bidders in BLTSSCP's proposed Service Area (Greater Boston Region, Brockton in the Southern Region and Malden in the Northern Region) to recommend that we commence a planning process. To date, BLTSSCP Member leaders have met at least once with nine of the eleven ACO/MCO bidders. In some of those meetings BLTSSCP and ACO leaders have developed plans to conduct case reviews cases and pilot test systems. BLTSSCP views all initial ACO meetings as the first step in a longer planning process that will culminate in contracts by March 1, 2018.

BLTSSCP uses the following planning process to develop ACO/MCO relationships and contracts:

Information gathering: This phase involves as many meetings as might be indicated to 1) connect BLTSSCP program leaders with key ACO/MCO clinical and business leaders; 2) provide background information on the LTSS CP program; 3) obtain information from the ACO on projected LTSS populations; 4) and provide information on BLTSSCP's care coordination experience and approach, and current population served.

Roles, responsibilities and workflows: It will be imperative that stakeholders agree on each entity's roles and responsibilities; document workflows and points of coordination. This will be a key step in the initial planning process.

Case reviews: BLTSSCP will, with select ACO/MCO Bidders, review five to ten cases of current shared clients/patients to develop an understanding of the specific services BLTSSCP and ACO/MCO each provide and to identify service gaps, redundancies and opportunities for improved coordination.

Several Members within BLTSSCP have existing care coordination relationships with ACO/MCOs that will be the foundation for developing expanded LTSS CP programs. For example, Mystic Valley Elder Services and Somerville Cambridge Elder Services have embedded care coordinators in both inpatient settings of Cambridge Health Alliance and Hallmark Health (Wellforce ACO). In the coming months, BLTSSCP will propose pilot programs with key ACO/MCO bidders in our Service Areas. The pilot programs will serve to develop relationships between the key points of contact at BLTSSCP and ACO/MCO Bidders. This will pave the way so that contracts can be developed that accurately delineate roles and responsibilities of each stakeholder to ensure that BLTSSCP and an ACO/MCO are ready to go-live with a larger program in Spring 2018.

2. Describe branding and marketing plans you will implement with respect to your relationship with ACOs and MCOs

As described above in Section 7.5.J.1, BLTSSCP's marketing will start with meetings with ACO/MCOs, to identify the key points of contact within the ACO or MCO. Presentations for the key points of contact within the ACO or MCO will follow to ensure that all are aware of the LTSS CP program and the role that BLTSSCP plays in supporting individuals with LTSS needs.

BLTSSCP will develop its own brand, including logo, letterhead, and style templates. This brand will be used to support the in-person relationship development work. BLTSSCP will also develop the following types of media: a website, PowerPoint presentation, and succinct leave-behind materials for the key audiences at ACO/MCOs.

3. Describe your strategy to engage and collaborate with multiple ACO/MCOS in the Services Areas for which you are bidding

BLTSSCP will continue with the planning process described in Section 7.3.H.1, developing relationships with all ACO and MCO bidders in the Greater Boston Region and the Brockton Service Area in the Southern Region and the Malden Service Area in the Northern Region.

4. Describe your strategy for conflict resolution, should any conflicts arise between the Bidder and an ACP/MCO

In that the MassHealth ACO/MCO and LTSS Community Partner program initiatives bring entities together into new types of relationships, there are several areas that have the potential for conflict within this new landscape. Potential conflicts can include overlap in care coordinator roles, difference in comprehensive assessment or care plan formats, differences within the Information Systems used for documentation of care coordination activities, and different approaches to use of flexible services. The most important strategy for conflict resolution is prevention. Most conflicts arise when roles, responsibilities and expectations have not been clearly defined. BLTSSCP will invest time in developing contracts and operational relationships with ACO/MCOs prior to April 1, 2018 to avoid conflicts as much as possible. In addition, BLTSSCP will develop regular coordination meetings with ACO/MCOs to check in on our work together and will outline escalation paths for conflicts that occur in the field.

To date, we have found there to be uneven information among ACO/MCO Bidders about the LTSS Community Partner program. To the extent that MassHealth can provide all ACO/MCO and LTSS CP Contractors the same information on program design, it will prove fundamental to preventing and resolving any potential conflicts. With that said, BLTSSCP does provide ACO/MCO bidders with MassHealth LTSS CP program documents in introductory meetings as a first step to ensure that we are starting with the same program assumptions.

7.5 K Providing Culturally Competent and Informed Services and Supports

1. Describe the provision of effective, equitable, understandable, and respectful quality supports that are responsive to diverse cultural beliefs and practices, preferred languages, health literacy, and other communication needs

Members of BLTSSCP have proven track records of internal language and cultural capacity that in turn promotes equitable, understandable and respective supports to those we serve.

a. Describe how the provision of language / communication assistance (ie. qualified interpreters) for Enrollees with Limited English Proficiency, Deaf Enrollees, Enrollees who are Hard of Hearing, and Enrollees with cognitive disabilities will be achieved

Through the collective language capacity inclusive of Cantonese, Mandarin, Italian, Spanish, Portuguese, French, Haitian Creole, Vietnamese, Greek, Hebrew, Toisanese, Cape Verdean Creole, Belorusian, Dutch, Fuzhou, German, Polish, Russian, and Ukrainian, BLTSSCP is well positioned to meet the language/communication needs of CP Enrollees. In the event that an Enrollee presents with a language need that is outside the capacity of BLTSSCP, interpreter services such as Catholic Charities' Community Interpreter Services (CIS), the AT&T Language Line and in Lingua have been and will be used to access communication support. The current provision of supports to individuals who are deaf or hard of hearing through ASL and the use of certified interpreters through Language Connections, MA Department of Interpreter/CART Services and MA Department of Deaf and Hard of Hearing will in turn serve CP Enrollees well. Other communication options include the Meyer Johnson Software (e.g. Boardmaker), use of smartphones and tablets, and voice to text capacity.

b. Describe how Enrollees will be informed of available language and communication assistance clearly and in their preferred language or format

Upon assignment of the Enrollee, the language capacity and needs as well as the need for any communication assistance will be assessed through the information contained in the Comprehensive Assessment and/or through direct contact with Assigned Enrollees. Subsequently, the resources as delineated above in **7.5 K a.** will be implemented to both inform Enrollees of available language and communication assistance in their preferred language and format and meet their LTSS needs in a manner that is equitable, understandable, and respectful.

c. Describe how the provision of supports in a manner responsive to diverse cultural beliefs and practices, including those related to an individual's race, ethnicity, disability, sexual orientation, and gender identity will be achieved

Sensitivity to cultural beliefs and practices will be a cornerstone of the relationship developed by the Care Coordinator**.** BLTSSCP's training curriculum will be designed to weave responsiveness to all diversity throughout the training wherever possible. Curricula for topics including cultural beliefs, race, ethnicity, disability, sexual orientation and gender identity as well as sensitivity training have been developed and are implemented by the Members. Linkages to community resources that have been nurtured by the Members reflect the diversity in populations currently supported. And culturally and linguistically diverse community resources will be researched through staff knowledge, internet and social resources, and community input. The Learning Collaborative that BLTSSCP intends to launch will be of assistance in sharing community resources among Member Care Teams. Ascertaining cultural beliefs and practices of an Enrollee will be a component of the outreach to the Enrollee. This information will be used by the Care

Coordinator in the interactions with the Enrollee, in the development of the Care Plan, and in linkages to resources and supports.

2. Describe the expertise and experience in providing care to special populations, including but not limited to following

a. Individuals experiencing homelessness
Members of BLTSSCP have experience supporting people who are homeless or who are at risk of experiencing homelessness. Bay Cove operates ten apartments for chronically homeless Individuals who have Developmental Disabilities, a specialized Adult Day Health program for homeless individuals as well as a Day Shelter for homeless elders, and a Night Shelter in Boston with a capacity of 80. JRI's Youth Harbors Program works with school aged, homeless youth who are without family support to locate safe and temporary housing while working with the youth toward permanence.

b. LGBTQ populations
Members of BLTSSCP have experience supporting LGBTQ populations. JRI provides LGBTQ-specific mentoring, housing, and education supports, and provides services through a center for LGBTQ+ youth. BSHC, MVES, and SCES meet the needs of LGBT elder adults through collaboration and consultation with the LGBT Aging Project. And SCES connects people to LGBT meal programs across service areas.

c. Criminal Justice-involved individuals
Members of BLTSSCP have extensive experience working with Individuals who have been involved in the criminal justice system. JRI provides mental health evaluation, consultation, liaison and care planning services for court-involved youth through Juvenile Court Clinics and Juvenile Resource Centers under contract with the Juvenile courts. JRI also provides services to court involved youth through the Boston based SMART Team. Bay Cove and Vinfen provide services to Individuals with I/DD who have a history of court involvement and who require services with a forensically based specialization.

d. Individuals who are blind, low vision, Deaf or hard of hearing
BLTSSCP Members provide supports to individuals with vision and/or hearing needs. Bay Cove and Vinfen provide residential services to individuals who are deaf and communicate with ASL or adaptive technology. Likewise Day Habilitation programs of Bay Cove, JRI and Vinfen provide specialized supports to blind, low vision, deaf, or hard of hearing Individuals through Perkins assessments and accommodation, and assisted technology. Each of these programs hire and train ASL staff to ensure that individuals experience a safe and comfortable environment.

e. Individuals with cognitive disabilities
BLTSSCP Members provide an array of services and supports to individuals living with cognitive disabilities and are attuned to communication techniques that are most effective with these individuals, including clear presentation of information followed by consistent and frequent review. Bay Cove, JRI and Vinfen provide day/employment, residential and family support to adults and children with a range of cognitive disabilities, including I/DD and ABI populations, while BCIL, BSHC, MVES and SCES support individuals who present with cognitive disabilities in addition to physical and/or aging needs.

Community Partner Program Budget Report

Massachusetts Care Coordination Network

Program Revenue	Prep Budget Period	Budget Year 1	Budget Year 2	Budget Year 3	Budget Year 4	Budget Year 5	Total Revenues
Estimated Enrollees- Start of Period (All Enrollees)		250	2,000	4,500	4,500	4,500	
Estimated Enrollees - End of Period (All Enrollees)		1,750	4,500	4,500	4,500	4,500	
Estimated Enrollees - Monthly Average		1,000	3,563	4,500	4,500	4,500	
Total Estimated Program Revenue		**$ 560,000**	**$ 3,420,000**	**$ 4,320,000**	**$ 4,320,000**	**$ 4,320,000**	**$ 16,940,000**

Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
Netsmart Licensing Fee	11250	8	$ 90,000.00
		Total Software Licensing (Program Budget Line 8)	

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

The Software and Hosted System line item totaling $90,000 is based on a monthly subscription of $11,250 that will be invoiced monthly and that is calculated based on MCCN's anticipated maximum enrollment plus the Care Manager ETL for Reporting. The $90,000 covers an eight month period, October 1, 2017 through May 31, 2018, as required by Netsmart ($11,250 x 8 = $90,000). The $11,250 will be a recurring monthly fee throughout the life of this demonstration project.

Row 9 - Telecommunications

Type of Service Plan	Cost per Service Plan	# Service Plans	Cost
Connectivity for mobile devices			$ 2,205.00
Total Telecommunications (Program Budget Line 9)			

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

Connectivity for 9 Mobile Devices (8 new staff plus 1 existing staff) @$35 P/mth for 7 month period. 9 x $35 x 7 = $2,205.00

MASSACHUSETTS CARE COORDINATION NETWORK

Updated Participation Plan

October 6, 2017

7.5 Updated DSRIP Participation Plan

The Bidder's response to this **Section 7.5** shall constitute the Bidder's Initial DSRIP Participation Plan as described in **Section 4.1** of **Attachment A**.

A. Executive Summary (not to exceed 2 pages)

The Bidder shall describe its five (5) year business plan for implementing the LTSS CP program. This plan shall include, but is not limited to:

1. **The Bidder's goals, identified challenges related to the care delivery system and behavioral health, and proposed solutions to be effectuated through the LTSS CP program;**
2. **The number of Assigned and Engaged Enrollees the Bidder intends to support under the Contract;**
3. **The Service Areas for which the Bidder is bidding;**
4. **The Bidder's plans to operationalize the LTSS CP program and time frames associated with implementing such activities.**

Health outcomes of individuals with disabilities and behavioral health needs are poorer than those of the general population. For example, adults with cognitive disabilities have much higher rates of chronic conditions than those without disabilities, are five times more likely to have diabetes, three times more likely to have arthritis, and twice as likely to have asthma and heart-related conditions (Krahn and Fox, 2014). These poor health outcomes present a challenging picture for the ACOs/MCOs who are charged with not only meeting their health care needs in an integrated system, but doing so in a way that also reduces TCOC. Our goal at MCCN is to use our deep expertise and understanding of these populations and build a new system that integrates care, reduces those disparities and creates a solid Partner network throughout Massachusetts that is able to quickly respond to the health care needs of historically vulnerable populations. Using a life-course approach to health inequities (US DHHS HRSA/MCH, 2010), the Partners of MCCN will work with all of the community connections as outlined in the next section to address such social determinants of health as environmental living conditions; social and personal relationships and connections within the community; employment opportunities; ability to self-care; ability to meet transportation needs; and meaningful activities such as recreation, volunteering and educational opportunities.

The MCCN is proposing to support a total of 4500 individuals in three regions of the state: Northern, Central and Southern. The Partners are prepared to support 1500 Enrollees per region. All Partners have longstanding expertise and programming in all three regions, supporting children and adults in community settings and through behavioral health supports. Each Partner would not be a new entity to the regions, but are already known and trusted providers. Our involvement as the LTSS CP would strengthen the ties that currently exist. Our Partnership is unique in that the MCCN LTSS CP was built to align with the BH CPs (Advocates and BAMSI are bidding) in the Northern, Central and Southern regions on day one, ensuring true integration at the outset and a more efficient way to exchange clinical information among providers in the three regions. We have worked with the potential BH CPs as we have designed this LTSS CP to ensure the elimination of any duplication. In addition, it is the intention of the MCCN to bid on

the Enhanced CP RFR, to be released in the summer, given the clinical and behavioral health complexity the Partners experience in managing the needs of their populations today.

Our broad plan **(see 7.5.f)** to operationalize the MCCN is as follows:

- RFR submitted in May 2017. Partners continue to meet once a month to continue development of LTSS CP and fully develop Krokidas & Bluestein contract on roles and responsibilities and vet software vendors while waiting on potential award
- MassHealth will notify MCCN of success of bid in August 2017
- MCCN will select care coordination software, identify office space in existing buildings (6 locations) throughout the three regions, sign Partner contract in October 2017
- In November, Director of Integrated Care Management will begin
- Marketing and outreach materials designed and developed by November 2017
- Marketing and outreach to ACOs/MCOs will begin in January with expected contracts to be signed in February
- Caseload/ratio expectations to be finalized by May 2018
- November through February, care coordination software tool is configured and operational. Testing phase and training will begin in February.
- Full compliance with EOHHS readiness review to be completed in March 2018
- IT Manager begins March 1, 2018
- Intake/Outreach Coordinator, and LTSS Care Coordination staff begin on May 1, 2018 and begin their training programs.
- Director of Quality Management and Billing Specialist begins June 1.
- In June, the first 250 Enrollees begin (all three regions) plus 250 per quarter per region for remaining PBP. Thereafter, the MCCN expects to enroll 250 Enrollees per quarter, per region until the 1500 per region is reach by end of Year Two.

B. Supporting Populations and Community Engagement (not to exceed 2 pages)

1. For each Service Area(s) for which the Bidder is bidding, the Bidder shall describe its connections to the community and community members…

The following chart is a snapshot of the vast array of MCCN collaborations, partnerships, and connections by region.

Community Connections - Northern Region	
Coalitions & Advocacy Groups	Association of Developmental Disability Association (ADDP), Federation for Children with Special Needs, Provider's Council, Parents & Professional Advocacy League (PPAL); Creating Our Commonwealth; Mass Families Organizing for Change
Medical/Psychiatry	Community Health Centers; All Skilled Nursing Facilities & Rehabilitation Centers, Primary Care Group Practices; Psychiatric Facilities; Hospitals; Neuropsychology, Acupuncture, Mental Health and Substance Abuse Providers, Visiting Nurses Associations, Center for Developmental Disabilities Evaluation & Research (CDDER)
Community-Based Organizations	Homemaker/Person Care Agencies, Alzheimer's Association, Brain Injury Association of Massachusetts, Councils on Aging/Senior Centers, Assisted Living Facilities, SHINE (Serving Health Information Needs of Everyone), Faith-Based Organizations, Independent Living Centers, ASAPs, Easter Seals, Colleges & Universities; Employment and Workforce Development Programs; United Way; Best Buddies
Health & Wellness	Nutrition Counselors, PT, OT, YMCA, YWCA, Fitness & Yoga Centers, Walking Clubs, Recreational Services Programs, Family Support Centers, Special Olympics, Support Groups, Social Clubs and Programs
Social Service Providers	All Housing Authorities, SMOC, Food Pantries, Salvation Army, Department of Transitional Assistance, Catholic Social Services
Community Connections - Central Region	
Coalitions & Advocacy Groups	Association of Developmental Disability Association (ADDP), Federation for Children with Special Needs, Provider's Council, MetroWest Aging and Disability Consortium, MetroWest Prevention & Wellness Partnership Advisory Council, MetroWest Advocacy Coalition, Massachusetts Parent Training and Information Center; Creating Our Commonwealth; Advocates for Autism of Ma (AFAM), Mass Families Organizing for Change
Medical/Psychiatry	Community Health Centers; All Skilled Nursing Facilities & Rehabilitation Centers, Primary Care Group Practices; Psychiatric Facilities; Hospitals; Neuropsychology, Acupuncture, Mental Health and Substance Abuse Providers, Visiting Nurses Associations, Framingham Union/Leonard Morse/Marlborough Hospital, UMASS Memorial Medical Center, Saint Vincent , Hospital, Child and Adolescent NeuroDevelopment Initiative (**CANDI**), Center for Autism & NeuroDevelopmental Disorders (CANDO), EPIC Home Health Services; E.K. Shriver Center; Maxim Health Care, Community Health Ling, Long Term Pharmacy, Comfort Care, Gentiva, Fairlawn
Community-Based Organizations	Homemaker/Person Care Agencies, Alzheimer's Association, Brain Injury Association of Massachusetts, Councils on Aging/Senior Centers, Assisted Living Facilities, SHINE (Serving Health Information Needs of Everyone), Faith-Based Organizations, Independent Living Centers, ASAPs, Easter Seals, Colleges & Universities; Employment and Workforce Development Programs; United Way; Best Buddies;
Health & Wellness	Nutrition Counselors, PT, OT, YMCA, YWCA, Fitness Centers, Walking Clubs, Recreational Services Programs, Family Support Centers, Special Olympics, Support Groups, Social Clubs and Programs
Social Service Providers	All Housing Authorities, SMOC, Food Pantries, Salvation Army, Department of Transitional Assistance, Latino Health Insurance Program, Central Massachusetts Housing Alliance, Worcester Community Action Council's fuel

	assistance program; Catholic Social Services; Lutheran Community Services
Community Connections - Southern Region	
Coalitions & Advocacy Groups	Association of Developmental Disability Association (ADDP), Federation for Children with Special Needs, Provider's Council, Creating Our Commonwealth; Elder First Community Resources Diocesan, MA Families Organizing for Change, Mass Families Organizing for Change
Medical/Psychiatry	Community Health Centers; All Skilled Nursing Facilities & Rehabilitation Centers, Primary Care Group Practices; Psychiatric Facilities; Hospitals; Neuropsychology, Acupuncture, Mental Health and Substance Abuse Providers, Visiting Nurses Associations, Good Samaritan Hospital, Neighborhood Health Center; Health First Complex Care Team
Community-Based Organizations	Homemaker/Person Care Agencies, Alzheimer's Association, Brain Injury Association of Massachusetts, Councils on Aging/Senior Centers, Assisted Living Facilities, SHINE (Serving Health Information Needs of Everyone), Faith-Based Organizations, Independent Living Centers, ASAPs, Easter Seals, Colleges & Universities; Employment and Workforce Development Programs; United Way; Best Buddies ;Widening The Circle: Real Friends Project; "My Generation" Seniors
Health & Wellness	Nutrition Counselors, PT, OT, YMCA, YWCA, Fitness Centers, Walking Clubs, Recreational Services Programs, Family Support Centers, Special Olympics, Support Groups, Social Clubs and Programs
Social Service Providers	All Housing Authorities, SMOC, Food Pantries, Salvation Army, Department of Transitional Assistance, Catholic Social Services; WYSE Adult Day Health, Sullivan Care Solutions;

2. The Bidder shall describe how it will grow community connections in the Service Areas the Bidder intends to serve, in alignment with Section 3.7.

All Partners have long standing relationships in the three regions for which the MCCN is bidding. Within these regions, there are established linkages and affiliations will be leveraged to connect the MCCN with new community resources in a meaningful way. MCCN Partners all have relationships via our combined leadership on trade organizations and industry-wide Committees. Partners operate a total of 9 Family Support Centers (FSC) which serve as a natural information point and are well connected to Families Organizing for Change. Connections go well beyond human services and extend to entities such as corporate partners, vendors, and Chambers of Commerce. Each Partner's FSC has committed to outreach in each of the areas to develop a MCCN campaign to educate the local community resources as well as maintain a database of resources within each FSC. In addition, Partners such as BAMSI operate a Helpline which is an Information and Referral Resource for the Southern region and maintains a data base of services throughout the region. Local workshops, conferences and symposia in the three regions will be staffed with MCCN marketing staff through the Lead. MCCN also plans to bring staff together from the three regions at least quarterly for training and development and to share resource experiences. Often these networking opportunities uncover new ideas and strategies for collaboration and resource development. The website www.mccn.org will also be used to grow these local connections.

3. The Bidder shall describe its plans to ensure staff maintain up to date information on available service providers and community resources in the Service Areas covered by the Bidder.

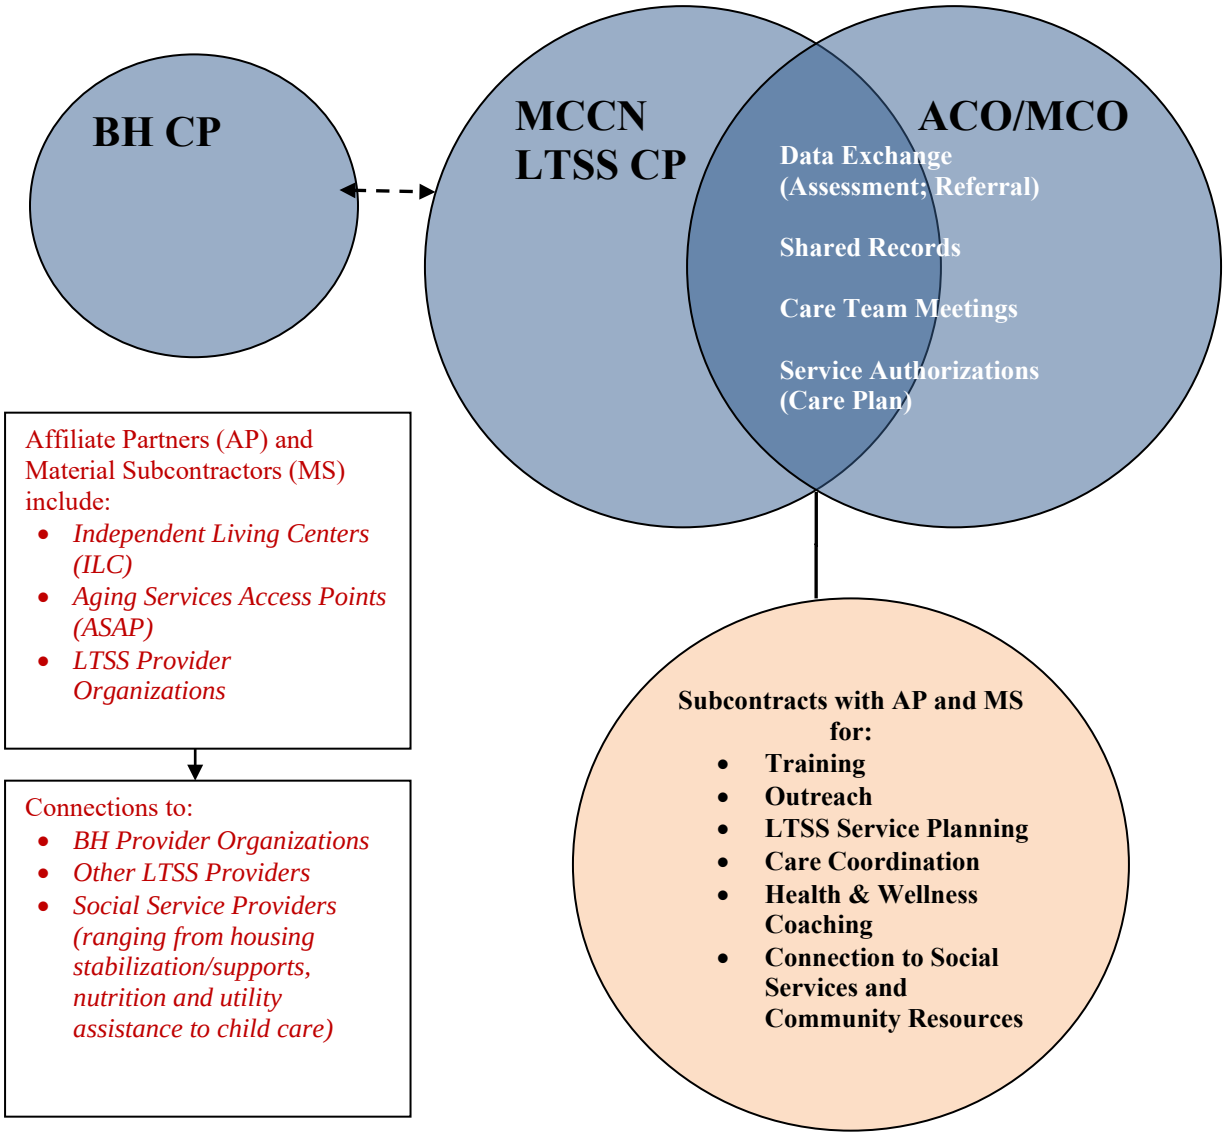
The MCCN has developed a collaborative training process in which training is provided in the three regions once a month and open to any staff at the MCCN member agencies. At each of

these training sessions, staff will be provided with updated community resource lists and MCCN listserves will be developed and updated in real time.

C. Community Partner Supports and Activities (not to exceed 10 pages)

For the following subsections, the Bidder shall describe how it will provide LTSS CP Supports, as described in Section 2.3.A of Attachment A.

MCCN will utilize a Shared Function Model as it works with EOHHS, ACOs and MCOs to provide integrated service delivery. The following diagram illustrates how the MCCN LTSS CP links to all stakeholders, including the BH CPs.



1. Outreach, including but not limited to:

a. Planned strategies to locate and engage with Assigned Enrollees with complex LTSS needs.

The MCCN Intake/Outreach Coordinator will receive information on the Assigned Enrollees from the ACO with a completed assessment. This referral will provide the Care Coordinator with the proper contact information the individual or for the individual's surrogate. If the referral provided does not have the necessary contact information, a number of steps will be taken to reach the Assigned Enrollee by their assigned LTSS Care Coordinator. There will be a minimum of three contact attempts made to reach the potential Enrollee.

First, the MCCN will contact other service providers, LTSS providers and/or MCEs. The LTSS Care Coordinator will encourage those entities to inform the Assigned Enrollee of the referral. The LTSS Care Coordinator may also stop by locations the Assigned Enrollee may frequent or go to their home or last known residence and, if appropriate, reach out to family. MCCN Partners who currently have care management contracts with MCEs and OneCare entities have employed these strategies and found them to be very effective in locating difficult to reach individuals.

The Care Coordinator will approach the Assigned Enrollee from a person-centered methodology and will become their primary contact. The approach requires the Care Coordinator to consider and evaluate a number of factors including language, method of contact or needed supports. The Care Coordinator will meet the Assigned Enrollee as a unique individual and understand their perceived needs, desires and goals. It is through this relationship that the MCCN will be able to engage the individual and develop a trusting and therapeutic approach that can then be leveraged throughout the continuum of care.

The Seven Hills 7-member marketing department will work with MCCN Partners to develop brochures and other materials for distribution to Assigned Enrollees and their support network. The materials will clearly define the role of the MCCN, the Care Coordinator, the benefits of engaging with the services, as well as the Assigned Enrollee's right to decline the service, ask for a different care coordinator or a different LTSS CP. The materials will be in the individual's primary language and will be written at the 8th grade level. These materials will be reviewed by the MCCN Care Coordinator and the individual during the outreach period and the Care Coordinator will be prepared to answer all questions.

The Care Coordinator will encourage participation while at the same time being clear that the person can choose to decline MCCN services. If the person initially declines, the MCCN Care Coordinator will ask if they can be in touch to check in on their decision again in a few weeks. The Care Coordinator will look for early opportunities to be helpful to the individual, exploring areas of challenge in their life and offering assistance as a way to engage the Assigned Enrollee. Offering to assist with individual needs can begin to foster a relationship and over time support the individual's eventual choice of engagement with the MCCN. Once the individual has elected to engage with the LTSS CP, the MCCN Care Coordinator will complete the Participation Form with the individual as well as any needed releases. Throughout the engagement process, the Care Coordinator will carefully explain the value and purpose of shared communication across various supports, including the individual's PCP. If the individual is reluctant to sign documents and consent to the service or information sharing, the Care Coordinator will leave the documents with the individual and follow up with them or encourage the individual to contact them with any questions or concerns that may come up at any time. Once the Participation Form is complete

and placed in the Enrollee's record, the MCCN Care Coordinator will begin the care planning process within five (5) business days and will inform the ACO/MCO of the status of the referral.

2. LTSS care planning, including but not limited to:

a. How the Bidder will ensure the Enrollee has meaningful participation in the development and management of the LTSS Care Plan; and

b. A description of the Bidder's protocols for providing informed choice of LTSS programs and providers as part of LTSS care planning.

The overarching goal of the MCCN is to ensure Enrollees and their family members take an active and shared role in their care. In the Deloitte Center for Health Solutions 2015 Survey of US Health Care Consumers, consumers were clear about seeking engagement and that partnering with providers continued to be important. Our goal is to engage each Enrollee in their care by providing them with the tools necessary to become informed and in charge of their care. Part of this engagement process is to inform both the Enrollee and their family about their health care needs and the healthcare system they will be participating in. Before the first PCP visit, each Enrollee will be educated on the process so they can have the confidence and skills to navigate this new environment. The ability to be truly engaged will be measured in Enrollee satisfaction scores around engaging in their own care, partnership with their healthcare organizations, and having a voice in the development of organizational practices. Using the roadmap as outlined at www.patientfamilyengagement.org as a guide, curricula will be developed for both children and adults which will build from the Partners' current care coordination tools and will include:

Care Coordination Tools
• A library of simple, condition-specific reference sheets and videos Enrollees can access • Mobile apps as a function of the care coordination software or fitness/health monitoring • Medical conditions translated into simple, easy to understand language • Ensure family and caregivers understand medical direction by using teach-back methods • Invite all Enrollees and families to ask questions about their plan • Utilize peer educator support programs either online or in person • Provide information to Enrollees on existing advocacy networks • Discuss with Enrollees barriers to meeting their treatment goals • Utilize a harm reduction approach when making behavior changes • Include outlining expectations for Enrollees and communicating expectations to medical providers • Provide opportunities to participate in research projects and conferences • Inform Enrollees of state and national stakeholder meetings • Develop staff training that incorporates the process Enrollees and their families use to participate in their medical care • Ensure this is a topic of the LCAB and CAB • Include Enrollee and family engagement/satisfaction in staff performance reviews

The care plan will be completed with the level of participation identified by the Enrollee or other supports the individual chooses within 90 days of assignment to the MCCN. The Care Coordinator will work with the individual to identify the best approach to maximize participation in their plan based on their desires and needs.

Care plan development and revision commences at the time of enrollment or when the Enrollee has life events resulting in the need for a review of the plan, but minimally, at least every 12 months. A care plan review may be needed as a result of a change in functional status due to an acute event such as a hospitalization or an illness. In addition, changes in an Enrollee's need for services and supports may occur naturally that require a different mix of services such as fewer

or increased LTSS services or different providers of the services. Technology can be used effectively to monitor health and has been shown to be particularly effective with individuals with chronic health issues and promotes positive health behavior change (Deloitte, 2015). The care plan developed by the ACO/MCO, any previous LTSS care plans, and any social service or flexible supports will be reviewed with the Enrollee and the MCCN Care Coordinator. The Care Coordinator will use a variety of approaches to ensure the Enrollee understands the assessments being reviewed, including translation services, breaking the assessment down into smaller parts, utilizing an American Sign Language interpreter, seeking assistance from natural supports, or using assistive technology and other technologies.

The MCCN Care Coordinator will seek input from other members of the Enrollee's support network, including AFC providers, day habilitation directors, DDS service coordinators and others. A list of these supports, service levels and any identified natural supports will be documented in the care plan with contact information. The care plan will meet all the expectations identified in the RFR attachment, Model A, Section 2.3. The care plan will incorporate the results of the comprehensive assessment and social/flexible support assessment. The MCCN Care Coordinator will review these options, discussing pros and cons including which services the person may not be eligible to receive. The Care Coordinator will be very clear that these services require their own authorization process and the person may or may not be found eligible for each service. If ineligibility occurs, the Care Coordinator will discuss alternative solutions. The care plan will include a list of all social service supports and the contact information identified to meet the Enrollee's social determinants of health. Ongoing communication with key members of the person's support network will be written into the care plan. The care plan will be shared and approved by the Enrollee's PCP; developing relationships with the PCPs will be critical to ensure integration and participation between the MCCN services and the PCP. The care plan will document the contact information for the PCP, the MCCN Care Coordinator and the ACO/MCO care coordinator and will include any LTSS service authorizations.

3. Care team participation, including but not limited to:

a. How the Bidder will promote integration of LTSS communication across all stakeholders, and exchange essential documentation as part of the Bidder's participation on Engaged Enrollees' care teams; and

b. How the Bidder will provide LTSS expertise and advocate for appropriate LTSS and care as part of the Bidder's participation on Engaged Enrollees' care team.

The MCCN will promote the integration of LTSS communication across all stakeholders, and exchange essential documentation through a variety of structures and mechanisms. First, the MCCN Care Coordinator will work with the Enrollee and the ACO/MCO to identify key providers and stakeholders. These could include family, friends, LTSS providers, primary care, state agency service coordinators/case managers, and behavioral health providers. Once identified, the Care Coordinator will contact these individuals within three business days. The LTSS Care Coordinator will provide education to the Enrollee on the value of integration for overall health and wellbeing and encourage the Enrollee to allow for full communication within their network. The Care Coordinator will gather contact information for identified providers and other stakeholders and, with proper releases, reach out to these individuals. An important step for the Care Coordinator will be educating this team of people about the MCCN CP role, LTSS options and the value of integrated communication for the Enrollee. During contact with these

potential care team members, the LTSS Care Coordinator will ask each individual how best to communicate with them. This could range from document sharing via care management software, utilizing the Mass HIway, faxing to medical and behavioral health providers, phone contacts, email, and formal and informal meetings.

The MCCN Care Coordinator will participate in all care planning meetings and will provide input to the ACO/MCO Care Manager. They will link LTSS service provision, individual updates and changes to the care team via documentation sharing as identified above, participation in formal and informal meetings and through regular email or telephone communication. The MCCN will use its extensive expertise regarding the various populations to provide education, ideas and resource suggestions to the care team and to other critical stakeholders. The MCCN will have access to a number of experts at their organizations that could assist the entire care team with a variety of concerns and challenges as well as providing subject matter expertise and education. With commitment to a person-centered approach along with extensive expertise, the MCCN will be well positioned to advocate with and for the Enrollee, helping the care team provide the best possible care and meeting each Enrollee's identified LTSS needs.

4. LTSS Care Coordination, including but not limited to:

a. How the Bidder will monitor and manage status/life cycle events that may change the Enrollee's LTSS needs; and

b. How the Bidder will support and encourage Enrollees' ongoing engagement in their care planning and implementation of their care plan. Include strategies related to motivational interviewing and promoting self-determination.

Over the course of an Enrollee's engagement with the MCCN, there will be status and life cycle events that necessitate a change in the individual's needs and related services and supports. The MCCN Care Coordinator will review the utilization of LTSS service provision monthly and evaluate it for any variances in care patterns. The MCCN may find out about such changes through LTSS or other service providers, the Enrollee, their informal support systems and/or their surrogate. As part of the care coordination process, the MCCN Care Coordinator will reinforce with providers and involved entities/individuals the need for timely and open communication about the dynamic and changing needs of the Enrollee. Upon notification of a status or life cycle event, the MCCN Care Coordinator will contact the Enrollee within 48 hours to discuss the situation with them, and with relevant providers and care team members, and assess the need for a modification in service levels and the care plan.

The Enrollee's engagement is critical to the initial development and revisions to the care plan that will be supportive of their care, life goals and desires. The care team will use predictive analytics, provided by the MCEs, to determine who is at risk for increased health concerns or to monitor the high utilizers of health care supports. Families and other caregivers must always feel welcomed and encouraged to participate in the care process. Family involvement policies will be developed and shared with families at the launch of the MCCN and communicated to all staff who will see caregivers not as a distraction, but as a resource. Guided conversations with the Enrollee's caregiver following the MAPCP Toolkit (2013) will include:

- Do you have any questions about the care conversations we have had?
- What are your concerns about your health?
- How would you like us to communicate with your PCP?

- Who helps you with your care?
- What medical tasks are you asked to do? Are you comfortable with that?
- How are things going for you?
- What is working well? Not working well?
- Are you taking time for yourself? Are you aware of resources that can help you?

All MCCN Care Coordinators will be trained in Motivational Interviewing (MI) to encourage the Enrollee to articulate their personal goals and desires which are critical for self-determination. All of the Partners have trained MI interviewers who will provide the core training for staff. Through the application of MI techniques, the MCCN Care Coordinator will support the Enrollee in a process of asking, listening and informing to incorporate lifestyle modifications and behaviors to prevent disease complications, alleviate symptoms, and prolong and improve quality of life. Barriers can easily lead to non-compliance with care and create further complications including poor health outcomes. When these barriers are addressed upfront in the development of care plans and service delivery schedules, the provision of services is much smoother and the Enrollee's self-determination and locus of control is supported and reinforced.

LTSS Care Coordination Example: (Social Determinants of Health)

As an illustration of the effectiveness of LTSS Care Coordination, BAMSI participated in an ACO pilot project with Good Samaritan Medical Center in Brockton, part of the Steward Health Care Network. The Community Health Worker at Good Samaritan referred a 41-year-old female recently diagnosed with COPD and asthma, who had been admitted to the hospital five times in 2016. The patient had survived a house fire that left her homeless and as a result she was living in her car. She subsequently lost her car in an accident and was living in a nearby park. While she had applied for housing, she was at the bottom of the waitlist. She had no family, no transportation, and was without insurance. Without resources for medications, her COPD and asthma were not managed causing her to go to the ED repeatedly and be hospitalized. The patient was referred to BAMSI for help with her social needs. Advocacy with the local housing authority resulted in her being moved to the top of the waiting lists for housing. She was supported to complete applications for SSDI and transportation through a PT-1, both of which were rapidly approved. After she secured housing, furnishings were obtained through collaboration with a local organization. A PCP schedule and medication regimen were established and monitored by a BAMSI service coordinator. She has begun to build a support network within housing, has been linked with local food pantries and attends the BAMSI Clubhouse, which is helping her develop employment skills. With regular check-ins, she has remained without an ED visit or hospitalization for the past 6 months.

5. Support for transitions of care, including but not limited to:

a. A description of the Bidder's plan for providing informed choices in regard to LTSS programs and providers to Enrollees as part of transitions and how the Bidder will ensure supports are in place to enable successful transitions of care.

b. A description of steps the Bidder will take to ensure the Enrollee's stability and satisfaction post-transition.

Transitions from hospitals, nursing homes or other long term placements to home, primary and specialty care and or stakeholder systems are a critical time for Enrollees. An inadequate transition can result in repeat hospitalizations, decreased personal function and a worsening of chronic conditions (Jencks, Williams, Coleman, 2009). Done well, they enable the individual to

flourish in the community. The MCCN will be notified in real time by the ACO/MCO of an admission or a scheduled admission using the care coordination software that will link to the members of the Enrollee's care team. The MCCN will utilize the evidence-based, standardized transition tool of the Coleman Transitions Program®. This model will ensure an appropriate and complete transition from one care setting to the other. The transition process will be as follows:

Transition Process	
1.	MCCN Care Coordinator receives notice of the event from MassHealth
2.	Care Coordinator contacts ACO/MCO care manager and other providers to obtain information
3.	Care Coordinator will convey unique characteristics of the individual to ACO/MCO/PCP
4.	Care Coordinator assigned to the Enrollee will visit them while in the care setting to determine needs and/or changes in needs
5.	Following stay, Care Coordinator will attend discharge planning meeting and will adjust care plan and share with care team, Enrollee and caregivers
6.	Care Coordinator will work with family caregivers to ensure they understand the regimen for care, medications and other tools
7.	Care Coordinator will use role play to teach care skills to caregivers and/or the Enrollee
8.	Care Coordinator will review red flags with caregivers that may indicate worsening condition
9.	Care Coordinator visits the home within 48 hours post-discharge to review plan and assess for compliance
10.	Care Coordinator makes weekly follow-up phone calls during the first 30 days to review the Enrollee's progress, answer questions and document progress toward health care goals
11.	One week after discharge, a Care Coordinator separate from the one working with the Enrollee, calls to administer a three-question survey which asks whether hospital staff took preferences into consideration in deciding post-discharge care; whether the Enrollee had a good understanding of the things he/she was responsible for; and if the Enrollee had a solid understanding of the medication regimen. Results of the surveys will be reported back to the entire care team including the ACO/MCO/PCP.

The MCCN will select care coordination software that includes a patient portal in which Enrollees can access information and connect to clinical staff when needed. Enrollees can also give caregivers access to the portal, allowing them to fully participate in their loved one's care. The intent is that the Enrollees, their families and their providers have a single, comprehensive view of information regarding the Enrollee's health and life goals, preferences, diagnoses, medications, treatment options and choices. Each Enrollee will have one CP contact, their MCCN Care Coordinator, when leaving a care setting in the event of questions or concerns. The Care Coordinator will also ensure appropriate supports are in place to enable transition including such items as durable medical equipment and personal care attendants or other necessary services and supports. Within three days of discharge from facility-based care, the MCCN Care Coordinator will update the individual's care plan, electronic health record and provide-follow-up and transitional support to coordinate any LTSS and social services needed by the individual. The more actively involved the MCCN and other service providers are in the process that precipitates a transition of care, the more effective the MCCN will be in working with the MCEs to reduce unnecessary costs, and improve the health and wellbeing of the Enrollee.

All Affiliated Partners and Material Subcontractors have extensive experience providing transitions in care. The ASAPs in the Central Region just completed a five-year CMS grant for a Care Transitions Program and are currently among the top performers in the nation. ASAPs are trained in the Coleman Model® and have trained Coleman coaches and continue to offer the Care Transitions program with a contract through Blue Cross/Blue Shield.

The following example demonstrates MCCN's knowledge of requirements around transitions of care involving complex cases:

A young man with significant health issues including Cerebral Palsy, dysphagia, muscle contractures and seizures spent considerable time in long term hospital stays, acute care and rehabilitation facilities due to improper care in his biological home. After his last stay, it was determined that he not return to his birth home and left the hospital with a new permanent tracheostomy and g-j tube requiring much more complex care. A nursing home was the next option for this young man in his 20's.

Seven Hills was approached by the hospital and asked to find an AFC placement. The AFC Care Coordinator worked on a transition plan to assist him in applying for benefits, acquiring a rep payee, and connecting him to new community PCPs who were comfortable handling a complex-care patient. The AFC care team identified a couple who were a good match and were willing to try to support him in their home. Together, the team worked through additional supports that would be needed to be successful and keep him medically safe in a community-based setting. Additionally, the care team secured a small amount of funding to allow two weeks of respite for the caregivers. He has since become part of the family and has been with the couple for 7 years.

6. Health and wellness coaching, including but not limited to:

a. A description of the health and wellness education, coaching and health promotion programs or activities that the Bidder will offer to Engaged Enrollees, including the use of programs that are evidence-based.

MCCN will provide health and wellness coaching as directed by the Enrollee's care team and as indicated in the Enrollee's care plan. MCCN is proposing a three-tiered approach to health and wellness coaching:

1. Health Literacy Education: The U. S. Department of Health and Human Services (2010) has identified improved health literacy as being the single most important element to improving a person's health and wellness. Health literacy is the degree to which individuals understand their basic health information and services in order to make appropriate health decisions. The majority of Enrollees supported through MCCN will likely have significant cognitive/learning, neurological, emotional and/or cultural factors which interfere with their ability to gain sufficient understanding of their basic health information within a traditional healthcare delivery experience. MCCN's Care Coordinators will utilize culturally sensitive, developmentally appropriate and neuropsychologically-informed communication and education to Enrollees on how to reduce high risk behaviors and health risk factors such as smoking, inadequate nutrition and infrequent exercise, in order to improve their health literacy.
2. Direct Information Sharing: Care Coordinators will have linguistically and developmentally appropriate written materials and referral resources available to share with Enrollees on a number of important health-related topics and activities such as:
    - Health promotion activities such as smoking cessation and weight loss classes
    - Chronic disease management including diabetes management programs
    - The importance of annual physical examinations and routine preventive testing
    - Key vaccinations

- Stress reduction and mental health awareness (including topics such as signs and symptoms of substance abuse, depression, and anxiety and coping with loss and isolation)
- Being "Heart Healthy" and the importance of "knowing your numbers" (weight/BMI, blood pressure, cholesterol levels)
- Diet, exercise and sleep habits for a healthier life
- Treatment compliance
- Parenting/caregiver supports

3. Goal Setting and Team Engagement: Care Coordinators will assist Enrollees in setting health and wellness goals as part of their care planning and will ensure goals are documented in the MCCN care plan so that the team is engaged in supporting the Enrollee towards achieving the goals.

7. Connecting Enrollees to social services and community resources, including but not limited to:

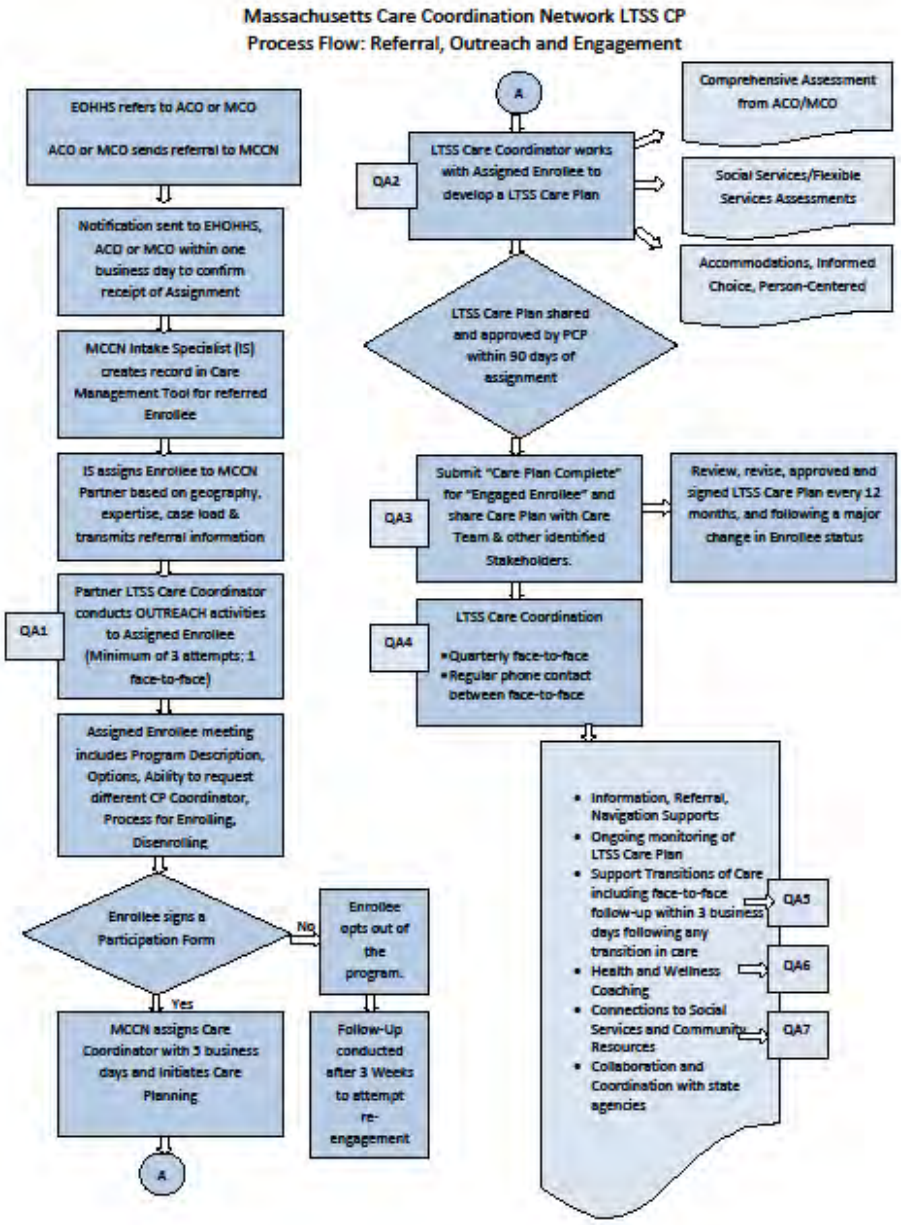
a. How the Bidder will evaluate social services needs for all Engaged Enrollees and facilitate access to Flexible Services for LTSS CP Engaged Enrollees who are enrolled in an ACO. Include proposed screening tool the Bidder intends to use; and b. How Bidder intends to ensure ongoing connections

b. How the Bidder intends to ensure ongoing connections to community resources and social services.

Recent studies have confirmed what we already knew: more than 80% of health outcomes are weighted more heavily on behavioral, emotional, financial and educational levels than on clinical issues (Robert Wood Johnson, 2014). The MCCN will work through its extensive relationships with SDOH providers to help meet the unmet needs of Enrollees. The first step in this need identification process is the Enrollee assessment. The assessment includes a thorough review of the person's current needs beginning with obtaining detailed information on the person's current supports and services, their medical/clinical diagnosis and reported presentations/behaviors, family dynamics and household composition, educational services, equipment needs, social/recreational needs, housing, legal assistance, transportation and training needs as well as identifying the Enrollee's/family's strengths and challenging issues. Much of this will come from the Enrollee's care plan.

The next step in this assessment process is the use of the Protocol for Responding to and Assessing Patient Assets, Risks, and Experiences (PRAPARE). This tool was developed by the National Association of Community Health Centers (2016) and contains 21 domains ranging from personal characteristics to questions about family and home; money and resources; social and emotional health; and optional questions related to incarceration, refugee status, and feelings of safety. Based on the information gathered from this brief survey, a support plan is developed that outlines the goals and objectives for the Enrollee seeking access to flexible services, taking into consideration the person's and families' concerns. Care coordination supports can include providing coordination and information and referral to other state systems for support including supplemental help from other health and human service agencies, connections to local resources and information on local specialists and related healthcare providers. Family navigators through the nine Family Support Centers which operate in the three regions will also be critical linkages to the needed supports. Staff will facilitate community access and inclusion to other state and local services, housing, nutrition, other sources of funding, and local resources for support. The PRAPARE is administered upon intake, but is also part of the annual plan review to ensure that

the Enrollee's status in any of these domains has not changed. The following graph illustrates the anticipated process flow from initial referral through comprehensive care coordination, including all qualifying activities outlined in the Model Contract.



D. Innovative technologies for service delivery (not to exceed 1 page)

The Bidder shall describe innovative technological tools it currently has and specifically how it will use these tools for the delivery of LTSS CP Supports. Specifically, the Bidder shall describe its planned uses of technological tools, such as care management or coordination software, telehealth tools, tablets, smartphones and other adaptive technologies.

MCCN Partners use technology and Assistive Technology (AT) in a number of programs and have seen firsthand how it can transform an individual's life in the community. The most critical piece of technology to enable all members of the care team to communicate in real time is the care coordination software. As mentioned earlier, the Partners have vetted software companies and have two finalists; Netsmart and eHana. The care management software solutions that we are considering aggregate clinical data to provide us with a broad picture at the population level, will facilitate care coordination across providers, will track clinical quality measures and outcomes, and will allow us to manage claims across care providers. In addition, the software enables the Enrollee and their caregivers access to their health data at any time.

Because the care coordination roles are mobile, the MCCN Care Coordinators will be provided with smartphones and tablets to efficiently deliver services out in the community. Smartphones and tablets will provide access to the care management software for staff working in the field and will optimize effective communication, planning, and implementation of service delivery as well as eliminate duplication of data entering and storage, thus creating efficiencies.

Recognizing the transformational impact that AT plays in working with people who have complex LTSS needs, the MCCN is committed to developing a culture within its CP that embraces its use. Seven Hills Foundation employs a full-time AT Program Director and part-time AT Specialist who will consult to the CP. With over 25 years of combined experience working in the field of AT, these staff have been instrumental in putting systems and trainings in place to fully integrate the ongoing use and support of AT throughout Seven Hills. These efforts have resulted in improved learning, communication and socialization, and functional independence for many of the people supported. AT is often integrated and incorporated into personal health care plans and goals, and staff work closely with the local clinical teams to identify the AT needs of individuals. AT assessment and outcomes tools have been developed to help non-clinical staff work with individuals to identify their AT needs. Exciting collaborations with community partners and educational institutions such as Apple, Worcester Polytechnic Institute, UMass Lowell, and Massachusetts Academy of Math and Science, have brought in engineering solutions to introduce other low-tech assistive technologies solutions to staff and residents. These partnerships have also led to creating customized engineered solutions including SMART homes for individuals living in SHF residential homes. HMEA also has extensive experience and operates TechACCESS of Rhode Island, a non-profit resource center which offers people with disabilities access to AT services. MCCN envisions that existing AT staff trainings, assessment tools, and other resources currently being utilized by Partners will be made available to the MCCN Care Coordinators and staff to incorporate into service delivery. The following illustrates the positive outcomes for individuals with complex LTSS needs when AT is integrated to enhance service delivery: *" iPads are used for House Meetings. One has Proloquo2Go programmed for House Meetings, so that Rachel, who is nonverbal, can fully participate in the meeting topics, including menu planning and activity planning. It has been obvious that this is empowering for her and her housemates now wait to hear what she has to say."*

E. Personnel and Staffing (not to exceed 5 pages, excluding attachments)

The Bidder shall provide its proposed staffing plan to perform the Contractor Responsibilities set forth in **Attachment A**, including fully implementing the required scope of CP Supports as well as administrative aspects of the Contract. The Bidder shall provide:

1. An organizational chart attachment that identifies personnel, senior managers, and other staff by title to be assigned to accomplish the Contractor Responsibilities described in Attachment A;

See attached organizational chart for the MCCN service model.

2. A sample staffing model for the number of Engaged Enrollees in each Service Area as indicated by the Bidder in Attachment D, including the number of full-time equivalent (FTEs) for supervision, administration, and care coordination positions;

MCCN Staffing Model: Fully Enrolled with 4500 Enrollees

Vice President of Seven Hills Family Services (.10 FTE)
Director of Integrated Care Management (1 FTE)
Director of Quality Management (1 FTE)
Intake/Outreach Coordinator – RN (1FTE)
IT Manager (1 FTE)
Director of Quality Management (1 FTE)
Billing Staff (1.25 FTE)

3 Regions - Engaged Enrollees:	4500 Enrollees	
Care Coordinator Supervisor:	7	FTE
Care Coordinator:	41	FTE
Associate Care Coordinator:	7	FTE

3. A description of the Bidder's recruitment plans, including timelines to recruit staff for any personnel positions not currently filled, and job descriptions and qualifications for each personnel position (job descriptions shall be submitted as attachments). The job descriptions shall contain information regarding education, background, qualifications, credentials, and relevant recent work experience;

MCCN will utilize the following timeline for the recruitment of staff for any positions not currently filled. Job Descriptions for each of the following MCCN positions to be filled include:

- Director of Integrated Care Management
- Director of Quality Management
- Intake/Outreach Coordinator -RN
- IT Manager
- Billing Specialist
- Care Coordinator Supervisor
- Care Coordinator
- Associate Care Coordinator

Preparation Budget Period (November 1, 2017 - May 31 31, 2018) Note this section/timeline has been updated:

October 2017

- Begin staff recruitment plan utilizing various types of media and HR resources.

- Hire the Director of Integrated Care Management for November 20th start date.

November 2017
- Director of Integrated Care Management begins work on the project.
- Develop a staff training plan that delineates dates, locations and instructors.

January 2018
- Staff training curriculum is developed and completed for all required areas.
- Begin recruiting MCCN IT Manager and Intake/Outreach Coordinator utilizing internal and external job postings, hosting career fairs, etc.

February 2018
- MCCN LTSS Care Coordination Staff, Director of QM, and Billing Specialist recruitment begins

March 2018
- IT Manager begins March 1, 2018
- Main CAB meets

April 2018
- Develop and organize committees

May 2018
- Intake/Outreach Coordinator, 1 Care Coordinator Supervisor,3 Care Coordinators, and 1Associate Care Coordinators begin working May 1, 2018.
- All staff receive training in areas required by the contract, attend each respective provider's standard orientation training, and are trained to use the care management tool. Training is completed by May 31, 2018.

Budget Period One (June 1, 2018 - December 31, 2018)
- Director of QM and Billing Specialist begins June 1, 2018
- Additional 19 Care Coordination staff hired to care coordinate new enrollees as they become engaged

Budget Period Two (January 1, 2019 - December 31, 2019)
January-March 2019
- Additional 32 employees hired and trained to support more engaged Enrollees as census builds to 4,500 people.
- Staff complete annual fresher training corresponding to their hire date.

April-June, 2019
- Staff complete annual refresher training corresponding to their hire date.

July-September, 2019
- Staff completes annual refresher training corresponding to their hire date.

October-December, 2019

- Staff completes annual refresher training corresponding to their hire date.

Budget Period Three (January 1, 2020 - December 31, 2020)

January-March 2020

- Staff complete annual fresher training corresponding to their hire date.

April-June, 2020

- Staff complete annual refresher training corresponding to their hire date.

July-September, 2020

- Staff complete annual refresher training corresponding to their hire date.

October-December, 2020

- Staff complete annual refresher training corresponding to their hire date.

Budget Period Four (January 1, 2021 - December 31, 2021)

January-March 2021

- Staff complete annual fresher training corresponding to their hire date.

April-June, 2021

- Staff complete annual refresher training corresponding to their hire date.

July-September, 2021

- Staff complete annual refresher training corresponding to their hire date.

October-December, 2021

- Additional staff recruited and trained to accommodate staff turnover.
- Staff complete annual refresher training corresponding to their hire date.

Budget Period Five (January 1, 2022 - December 31, 2022)

January-March 2022

- Staff complete annual fresher training corresponding to their hire date.

April-June, 2022

- Staff complete annual refresher training corresponding to their hire date.

July-September, 2022

- Staff complete annual refresher training corresponding to their hire date.

October-December, 2022

- Staff complete annual refresher training corresponding to their hire date.

4. A description of how the Bidder will recruit and hire staff from the cultural and linguistic communities they intend to serve;

MCCN is aware of the tendency toward loss of personal identity that results from being an individual in the "service system". A pervasive loss of individuality, that sense of self, is too often the direct result. How we express our ethnicity and culture defines us individually. MCCN will always seek to understand each Enrollee's preferences and provide opportunities for full expression. We honor the personal histories of those we support and will build individual service plans to meet those wishes.

As part of the MCCN staff recruitment process, every effort will be made to provide staff who can accommodate the linguistic and/or cultural needs of the Enrollees. All staff that will work with an individual will be required to be proficient in the individual's preferred communication

style; whether it is another language, ASL or use of an augmentative communication device, and training will be provided to accommodate this requirement. Seven Hills and all MCCN partners currently have staff that is representative of the cultural and linguistic needs of each regional population they serve. Linguistic and culturally competent services to current populations include: Cape Verdean; Cambodian; Native American; Lithuanian; Portuguese; Creole; Haitian; Puerto Rican (and other Spanish speaking communities); Vietnamese; and multiple countries from the African diaspora including Ghana, Sierra Leone, Liberia, Gambia and Nigeria.

MCCN will contract when necessary with translation services to support individuals and families with other language needs. The Partners have worked closely over the past several years with The Language Bank at Ascentria Community Services Inc. and other such providers to offer interpreter and translation services to clients, and will utilize this service to provide translation for staff and Enrollees.

Our cultural competency will not begin and end with the recruitment of bilingual staff. MCCN has an agency-wide commitment toward understanding the language, beliefs, communication styles, actions, social groups and values of the racial and ethnic backgrounds of the Enrollees and families it will support. For example, in the Cambodian community, health-related information, particularly around gynecological issues, is best delivered with a female elder in the room. In addition, all program materials will be provided in English, Spanish, and other languages, as needed. The MCCN protocol will be to translate critical documents in the language that is native to the Enrollee.

All staff providing MCCN services will receive cultural competency training. Staffs' skill on providing cultural competence will be assessed through direct observation and feedback from observation of Enrollee interactions. Staff members will be given self-assessments on their understanding and attitudes toward culture and belief systems. Training will be conducted annually to reinforce these skills.

5. A description of how the Bidder will ensure that all staff meet the competencies and trainings requirements in Section 2.2.B of Attachment A by Operational Start date; and

One of the benefits of a partnership such as the MCCN is the ability to draw from the deep training expertise in dozens of topic areas for use within the CP. Because of the multi-regional nature of the CP, the MCCN proposes local training, once a month, that will be open to all of the Partners and their staff. During the first 6 months of the Budget Preparatory Period, each Partner will be presenting their trainings and the Partnership, collectively, will select those that will be standardized across all regions. The MCCN will ensure that all staff who work directly with Assigned or Engaged Enrollees complete orientation trainings and annual refresher trainings on topics including, but not limited to: Cultural Competency; Accessibility and Accommodations; Independent Living and Recovery Principles; Motivational Interviewing; Conflicts of Interests, including but not limited to those described in Section 2.4.D. of the Model Contract, and the MCCN's mitigation strategy for conflict of interest; Health and Wellness Principles; and for Care Coordinators and supervisory staff, Person-Centered Planning Processes (using curricula approved by EOHHS); and lastly, MassHealth State Plan LTSS and Eligibility Criteria. This ensures fidelity to the training models and continuity across the partnership.

The Seven Hills Corporate College provides in-person and online training to hundreds of staff and community groups annually and serves as a focal point for its training locations throughout the Commonwealth. These sites, located in Worcester; Middleton; Sturbridge; Fall River; New Bedford; Oak Bluffs; and Woonsocket, Rhode Island provide the amenities necessary to accommodate training groups and have video conferencing capability and kitchen facilities. All of these training sites will be made available to the MCCN Partners.

Advocates has training locations available in Framingham, Waltham and Woburn and can offer a number of specialized trainings to the MCCN including Motivational Interviewing; Trauma Informed Care; SBIRT (screening brief intervention and referral to treatment for substance use disorders); positive psychology; smoking cessation; diabetes management; and health observations. In addition, through a care management contract with Celticare, Advocates has access to a variety of clinical trainings that include CEUs at no cost. BAMSI has training sites in Brockton, Middleboro, Plymouth, Foxboro and Worcester as well as a library of more than 200 specialized clinical and medical trainings.

6. A description of the Bidder's staff retention strategy.

Each Partner offers its staff various incentive programs as part of its retention strategy. Our goal is to show that the deep expertise of the MCCN Partners-combined with solid staff, makes it worth the MCE's investment in care coordination with the Partnership long term. The following programs will be made available to the staff hired for the LTSS CP with the hope they will stay throughout the project period and beyond. A sampling of some of the retention plans for staff includes:

- Tuition reimbursement/tuition discounts for staff seeking degrees at all levels
- 403 b contributions
- Involvement in professional growth and mentorship programs with senior leadership
- Vacation, Holiday and Personal Day pay
- Performance incentives of $500 when outcomes are met
- Emerging Leaders programs
- Opportunities for staff to move among the Partners for other positions with preferred staff status
- Full health insurance benefits
- Formal succession planning
- Referral incentives
- Work environments which promote creativity and value input
- Eligibility for bonus/holiday gift cards/Caught in the Act incentives
- Subsidized AAA and BJ memberships for all employees employed for 1 year
- Attendance at local and national conferences and workshops

F. Implementation Plan and Timeline

The Bidder shall attach timelines that display the Bidder's monthly implementation plans for the Preparation Budget Period, and quarterly implementation plans for each subsequent Budget Period. The timelines shall include all necessary operational activities to meet the Contractor Requirements described in Attachment A.

See attached timelines the display MCCN's monthly implementation plans for the Preparation Budget Period, and quarterly implementation plans for each subsequent Budget Period.

G. Budget Report and Budget Narrative

See Budget Report and Budget Narrative and the following Attachment B and Attachment C documents.

H. Sustainability (not to exceed 2 pages)

Pathway to Sustainability: Key Principles of Sustainability Models

During the five-year demonstration, MCCN will use DSRIP infrastructure funds to build its capacity to support start-up costs associated with the implementation of this new, integrated care management service line and partnership model. Year One will be a time of uncertainty, change, learning and relationship building.

MCCN's Initial Steps to Determining the Sustainability Model:

Upon award, MCCN will form a Financial Workgroup (one of three MCCN Committees) whose charge will be to develop a Sustainability Model. The following steps will inform the model.

1. Finalize care coordination model, case management software and roles of entities involved in delivering and overseeing care for Enrollees.
2. Identify and prioritize targeted care delivery and APM strategies with ACO/MCOs.
3. Build baseline administrative, medical and pay-for-performance key performance indicators and implement framework for monitoring and assessing metrics across all Partners.
4. Conduct comprehensive inventory of current cost structure and cost drivers of all Partners.
5. Catalog existing and projected sources of data, ability to manipulate data, and timeliness of data.

Building a Sustainability Plan

Once the tasks noted above are complete, MCCN's Finance Workgroup will focus sustainability planning efforts on four key tasks:

1. Build a 'straw model' 3-5 year budget/cost model that includes an estimated ROI. As part of the planning phase, a significant amount of DSRIP infrastructure funds will be used to develop and implement the new care management software. The development cost is a one-time expense. The annual, ongoing PMPM expense of maintain the software has been factored into the budget. Our sustainability model also takes into consideration that funding will be needed to key clinical staff to launch the program until such time that MCCN will engage its target number of 1500 Enrollees per region, anticipated at the end of Year Two. As the program continues to expand with the addition of Care Coordinators and other related staff, the need to rely on DSRIP funding will be largely reduced. Most of the care coordination strategies for Enrollees will focus on closing care

gaps and improving care delivery across the continuum of community providers. MCCN expects transformation will result in three basic changes– expansion of ambulatory care (particularly primary care); contraction of inpatient services; and increased need for community-based and care management services. Given this focus, it is anticipated that numerous changes will occur that will impact MCCN's caseload and resultant administrative costs and risk-based financial performance.

2. Once the 'straw-model' budget has been established, the Finance Workgroup will assess current resources and determine projected financial needs, including but not limited to clinical tools, systems, resources, training and infrastructure. As an early priority, MCCN is committed to finding opportunities to share resources and infrastructure, and MCCN leadership will begin early to address alignment and the potential phasing of that alignment (e.g. IT, staffing, human resources, finance, training, equipment, EHR, inter-operability), share best practices and identify collective payment strategies, while providing the most effective care to Enrollees.

3. Define potential savings and other financial strategies to pursue, including payment transformation that is aligned with the State's vision. MCCN's long-term sustainability plan will include the shift to increased reliance on value-based payments and ACO/MCO contracts that accurately reward efficiency, value, and managing across the care continuum. Our goal is to spend these five years understanding the MCEs and developing joint goals that will carry the MCCN forward in a shared risk relationship which will reduce costs, but will also continue the proven integrated supports that the MCCN offers to the MCEs for the care of their LTSS Enrollees. Two of the Partners have experience with APM (as mentioned earlier) and have successfully developed APM methodologies. The MCCN is interested in exploring the development of APMs during this project, understanding that this will make the Partnership more attractive to the MCEs in the long run.

4. Identify proposed financial performance metrics and key longitudinal milestones. Specifically, the sustainability plan will include:

    - Key metrics and milestones, by year, for MCCN to satisfy to stay financially viable and attain stated goals.
    - A management reporting process and timetable for comparing actual versus projected metrics/milestones for MCCN.
    - Specific reporting and monitoring of poor performance that will require oversight throughout the transformation process.

I. Quality Management and Performance Monitoring (not to exceed 3 pages)

The Bidder shall describe its plans to satisfy the quality management and quality improvement requirements, as described in Section 2.8 of Attachment A. Such description shall include:

1. A description of the Bidder's quality improvement program;

Central to an effective Quality Management Program is a commitment to achieving excellence, as demonstrated by Enrollee engagement, satisfaction and defined measures of success. Each

MCCN provider has within their existing structure advanced Quality Improvement models. Working together has afforded us the opportunity to examine various models and research from the Agency for Healthcare Research and Quality (AHRQ); studies on "Care Coordination in Managed Long Term Services and Supports (AARP Public Policy Institute); "Quality Indicators for Physical and Behavioral Health Care Integration" (JAMA), and Care Coordination Experiences of People with Disabilities Enrolled in Medicaid Managed Care (University of Chicago Department of Disability and Human Development). These studies have informed our approach to Quality Management and frame our direction for a robust and meaningful Quality Improvement Program.

Research clearly indicates that collaborative care models have demonstrated significant cost savings in low income, high risk populations with medical comorbidities as compared to traditional models of care. With a "triple aim" of achieving better care quality, improved population health, and more affordable health care, the delivery of well-coordinated and integrated health care services is paramount to success. First and foremost, then, is a Quality Improvement Program that relies on effective strategies that reinforce best practice and outcomes across ACOs, MCOs and Community Partners. Our efforts must be complementary not duplicative, with aligned quality measures and timely exchange of information and data to inform care planning. The MCCN recognizes the importance of this approach and is committed to quality management and performance that achieves the "triple aim".

To that end, MCCN will utilize a Continuous Quality Improvement (CQI) approach based on the CQI principles that incorporates a rapid Plan, Do, Check, Act cycle (PDCA). By implementing the PDCA cycle, we identify the quality initiative or problem to be solved, collect and review data, strategize as a team on solutions, implement the intervention, and, most importantly, check to determine if the desired outcome is being achieved, and take action to adopt, adapt or change. This model requires broad input from staff, supervisors, Enrollees, ACOs and MCOs.
We firmly believe that without staff and Partner "buy-in," the CQI process is something <u>others</u> do, and thus the results are limited. To be a truly effective CQI program, all parties/partners have to be involved and take responsibility for both quality and improvement activities.

The Quality Management Committee will fulfill the role of monitoring each area with a diverse representation including Enrollees, management, and Care Supervisors/Coordinators. The QM Committee will establish and maintain the MCCN Quality Improvement Plan, which will be approved by EOHHS. Specific and targeted population, healthcare, and cost outcome measures will be developed in concert with ACOs and MCOs, with methodology and frequency of reporting determined, taking into consideration the unique characteristics of each service area. Dashboards on the MCCN website will highlight the patient satisfaction outcomes. Measures of success will be determined based on the measure design principles of 1) keep it simple; 2) consider clinical, financial, and social outcomes; 3) align measures and reporting; and 4) consider a variety of measures that phase in over time. Overarching measures include:

<u>Process Measures:</u>

- Enrollees Assigned/Engaged/Disengaged
- Number and type of outreach and qualifying activities
- Documentation of Enrollee agreement and timeframe

- Development of LTSS Care Plan and timeframe
- Risk Assessments/Stratification
- Care Transitions
- Mode of Contact

Quality Outcomes:

- Quality of Life
- Chronic Disease Management
- Health Risks and Outcomes
- Caregiver Stress and Support
- Community Tenure
- Social Determinants of Health (housing stabilization, food security, basic needs, etc.)
- Adherence to Care Plan/Care Coordination
- Isolation/Connectedness/Social Networks
- Natural Supports/Family Unification

Enrollee Satisfaction:
Satisfied Enrollees are more likely to follow care plans, continue regular health services, seek continuity of care with specific provider(s) and disclose critical information. Consistent with CQI, narrowly focused question(s) with rapid results to impact change will be used:

- How likely are you to recommend MCCN?
- Experience of improved health/satisfaction with care coordination on self-assessment

Cost and Efficiency Outcomes:

- Productivity
- Revenue/Expense
- Total Cost of Care

2. A description of at least one quality initiative the Bidder proposes to undertake in the first year including measures for success; and

The MCCN envisions Year One of the project as a time of program development. Primary objectives will include utilization of case management software for data gathering and assessment of program activities, including Partner capabilities, population demographics, needs and costs, workforce development/training especially as it relates to effective care coordination; outreach; and engagement.

While these process measures are important in building program capacity, effectiveness and efficiency, the quality initiative that MCCN will focus on in Year One relates to caregiver stress. The impacts of stress on the mental health of caregivers have been estimated to be between 40-70% of all caregivers with clinically significant symptoms for depression (MIT Age Lab and AARP Public Policy Institute, 2014). Alleviating these stressors through effective care coordination is one way to strengthen the system.

The MCCN has chosen two brief, but effective evidence-based tools in order to assess caregiver stress during our first year of full operation. These tools, The Caregiver Self-Assessment Questionnaire developed by the American Medical Association and the Kingston Caregiver Stress Scale (2015) are easy to administer and brief to complete for the caregiver. Using a pre and post-test model, along with intermittent assessment as necessary, MCCN will assess caregiver stress to better understand and implement strategies to support caregivers. Caregivers will be those defined in the LTSS Care Plan.

Quality Initiative Goal: To reduce caregiver stress as perceived by the caregiver in areas related to perceived personal health; time management; personal freedom; worry; financial issues; hopelessness and anxiety.

Outcome Measure: A reduction in caregiver stress in at least 3 domains of life (based on a 5 point scale) for 60% of caregivers, as determined through self report.

3. The functions of the Bidder's quality management committee including the composition and reporting structure within the Bidder's organization.

MCCN will have one QM Committee with representation from each of the Affiliated Partners. Senior level quality management staff from each partner organization will comprise the Committee with at least one Care Manager/Coordinator, Enrollee, and community or healthcare representative included. Initially, the QM Committee will meet monthly to establish the Quality Improvement Plan, to be approved by EOHHS. Once established, the Committee will meet at least quarterly to monitor outcomes and report findings to the Governing Body. This data will then be gathered in the aggregate by the Lead Agency through the Director of Quality Management. The Director will have the responsibility of developing reports and reporting back to the Governing Body, Partners, Enrollees and families/caregivers.

J. Coordination with ACOs and MCO (not to exceed 2 pages)

1. How the Bidder will communicate the Bidder's skills, expertise, and value to potential ACOs and MCOs;

Each of the MCCN partners has current relationships with nearly all of the MCEs and has spent the last year meeting with them to help determine their joint care coordination thoughts and strategies. The MCEs readily admit that they are unsure of the LTSS population, not clear on their final data sharing software, and are looking to the CPs for expertise. These conversations included specifics about their population focus; innovative models; where they might be looking to realize savings on their TCOC; and how they anticipate exchanging health and utilization information in real time. During these conversations, MCCN Partners have detailed their deep understanding of the population, as well as the approach that the MCCN will be taking for care coordination and the exchange of information. Once the ACOs/MCOs are announced by MassHealth, the Partnership will send information to each entity outlining the population expertise of each Partner and a description of each agency's services and supports, as well as the anticipated approach of the MCCN should the award be made. Our overview will include our value proposition: our years of experience and success with the populations we support. We have already introduced MCCN to the MCEs which will expedite the contracting process once LTSS CP awards are made.

2. The Bidder's branding and marketing plan with respect to its relationships with ACOs and MCOs;

The MCCN is uniquely positioned to provide a strong value proposition: the agencies represented have decades of LTSS AND behavioral health supports. The Partners have long established connections to over 100 community-based supports and experts in the three regions and will market these connections in order to begin working with the MCEs to solve LTSS population challenges they may be facing. Each stakeholder comes at the value of the relationship differently. The CPs understand the population and the supports necessary to ensure the health of the members in the community. The MCEs understand the very different world of traditional hospital and physician culture. To improve health and overall costs of care, neither entity can be successful without the expertise of the other. Together, we can address the gaps in care and develop joint solutions that meet both of our bottom lines and improve health outcomes.

MCCN's Marketing Strategy to ACOs/MCOs

"Customers do not buy what you sell. They buy what has value to them" (Howard Gossage). The MCCN is selling knowledge and expertise with a population the MCEs struggle with. We are selling our case coordination skills which will enable our customers, the MCEs, to realize efficiencies enabling them to demonstrate to MassHealth that they have successfully met their outcomes. Within the first 30 days of a contract, the Partners will meet with the MCEs with whom they already have a relationship and will begin the discussion of how we might meet their LTSS care needs. During these conversations, we will reach consensus on shared mission, vision, goals, objectives and appropriate intervention strategy; cooperate to develop value propositions and clearly articulate MCCN's value as a critical partner to enable the mutual goals of the MCE and MCCN; present return-on-investment examples to illustrate efficacy; and clearly define and state roles and responsibilities of each Partner.

As this relationship evolves, our role will be based on the relationship we have developed with the MCEs. Once a month, the Director of Integrated Care Management will meet with the

ACO/MCO. In addition, an annual report on the MCCN's activities will be shared with MCE partners. As Partners, we will:

Branding & Marketing Plan with Relation to ACO/MCO
• Engage Partners in collaborative problem-solving of jointly shared problems • Identify and define linkages to community-based services • Discuss lessons learned on an ongoing basis to modify and strengthen partnership structure and processes. • Ensure transparent and frequent communication between Partners and other key stakeholders. • Create a common language and definitions for discussing approach • Focus on being transparent and candid • Provide a safe, respectful forum to discuss barriers and mechanisms to resolve conflicts • Build upon past partnership history to promote trust and communication

3. The Bidder's strategy to engage and collaborate with multiple ACOs and MCOs in the Services Areas for which the Bidder is bidding; and

The MCCN's goal is to be a resource to all MCEs in its three regions. Our conversations will center on their strategy for meeting the triple aim for their Enrollees and our part in managing their care so they can achieve that goal. We anticipate each MCE may have slightly different approaches to meeting those needs and we are prepared to have a flexible approach in our service delivery. Following an award from MassHealth, the MCCN will meet with each MCE and develop a contract that specifies the roles and responsibilities of the Partners and the MCE. This contract will help ensure there is full transparency in each Partner's role and will help to reduce any potential conflicts. At the beginning of the contract, the MCCN Partners will meet with each MCE and review their data: What do the trends show? Which population is the MCE struggling with the most? What areas of expertise do they most need and how might we fill that gap? If no data exists at the local level, then the MCCN Partners will work with the MCEs to gather and interpret community data in order to be better informed. Since data informs our decision making, finding multiple ways to share the data will be of paramount importance. Not only will we examine clinical data, but we will also examine data on administering the CP; results of our marketing campaigns and what potential Enrollees and their caregivers are telling us about outreach; our various IT systems and ease of exchanging information; and how ALL partners define quality and reach quality benchmarks. The MCEs want to ensure the MCCN is able to perform the tasks as set forth and is accountable for meeting the contract specifications. One of the strategies for the formation of the MCCN CP was the ability of the Partners to take on risk, share best practices and have the bandwidth to undertake a project of this scope. We know this five-year demonstration will go through multiple iterations. The MCCN will illustrate its value through the sharing of risk and development of APMs.

4. The Bidder's strategy for conflict resolution, should any conflicts arise between the Bidder and an ACO or MCO.

Our approach to conflict resolution is to communicate all expectations at the beginning of the process through a jointly developed MCE contract. For example, we would want to address how the following potential areas of conflict will be resolved in the contract:

Potential Areas of Conflict of Interest	Multi-Step Escalation Approach
• Contractual/financial issues • Compliance with laws and ethics • Technical issues such as IT performance • Clinical decisions and issues • Business operations and workflow • Data and reports (outcomes, utilization, costs)	• Lead meets with MCE to discuss/negotiate resolution • If this is not successful, an impartial mediator will be brought in to meet with both parties • If this is not successful, a formal arbitration path will be followed • The last resort would be legal action

K. Providing Culturally Competent and Informed Services and Supports (not to exceed 2 pages)

1. Describe how the Bidder will provide effective, equitable, understandable, and respectful quality supports that are responsive to diverse cultural beliefs and practices, preferred languages, health literacy, and other communication needs, including:

a. How the Bidder will provide language/communication assistance (including access to qualified interpreters) for Enrollees with Limited English Proficiency, Deaf Enrollees, Enrollees who are Hard of Hearing, and Enrollees with cognitive disabilities;

The MCCN will make every effort to recruit staff that represent the diversity of the individuals served and deliver services in their primary language. The MCCN will recruit, promote and support a culturally and linguistically diverse workforce that is compatible to the population in the service areas. Our communities are known for their cultural diversity. For this reason, we have staff who are bicultural/bilingual. Positions in some programs require that staff is bilingual in order to accommodate our Enrollee needs. Languages our staff is fluent in include: Spanish, Portuguese, French, Cape Verdean, Creole and American Sign Language and the MCCN will have the services of the Ascentria Language Bank. We continually train current and new staff in cultural and racial sensitivity. The MCCN also has experience in working with individuals who utilize an augmentative and total communication approach. American Sign Language translator support will be available to those who are deaf or hard of hearing or for those who are nonverbal and use ASL to communicate. Additionally, individuals will be supported to use augmentative communication devices such as TTY's, voice output devices, letter boards, picture boards, Tobi communication systems, Dynavox communication systems, and IOS based communication apps. Any written information and documentation will be made available in the Enrollees' primary language.

b. How the Bidder will inform Enrollees of available language and communication assistance clearly and in their preferred language or format; and

Enrollees will be informed of available language and communication assistance upon referral and throughout the intake process. Once an Enrollee has been referred, the Intake/Outreach Coordinator will review the referral packet and Comprehensive Assessment to determine the Enrollee's preferred language and communication needs. When possible, a Care Coordinator will be assigned who is fluent in the person's preferred language. For those individuals requiring the use of communication devices, a Care Coordinator specially trained in utilizing these devices will be assigned. In the event MCCN staff do not have the language capacity, interpreter services will be utilized. Potential Enrollees will be informed of language and communication assistance through information packets and brochures that are translated into the spoken languages.

c. How the Bidder will provide supports in a manner responsive to diverse cultural beliefs and practices, including those related to an individual's race, ethnicity, disability, sexual orientation, and gender identity.

Culturally competent services include respectful recognition of the differing values and culture of the individual and includes, but is not limited to recognition of economic status, gender, sexual orientation, ethnicity, race, language and the unique values and goals of each individual. To ensure that effective care is provided, agency staff, supervisors and administrators will seek consultation and additional services when necessary to overcome barriers impacting the delivery of care. An Enrollee's perspective and knowledge of culture will be incorporated into the care planning process. Many people have a strong working understanding of how culture has influenced them, while others have a more limited knowledge and understanding. The care

coordination process must be sensitive to both perspectives, and encourage the Enrollees to identify cultural influences in their daily lives.

Cultural competency accepts and respects differences, emphasizes the dynamics and challenges arising from these cultural and linguistic differences in planning and delivering of services to diverse populations, and is committed to acknowledging and incorporating the following: importance of cultural awareness; respect, relate and respond to an individuals' culture in a non-judgmental, respectful and supportive manner; sensitivity to cultural diversity brought by a variety of factors including ethnicity, language, lifestyle, age, sexual preference, and societal status; access to non-traditional services; and adapting services to meet the specific cultural needs of the Enrollee.

2. **Describe the expertise and experience the Bidder has providing care to special populations, including but not limited to: a. Individuals experiencing homelessness; b. LGBTQ populations; c. Criminal Justice-involved individuals; d. Individuals who are blind, low vision, Deaf or hard of hearing; and; e. Individuals with cognitive disabilities.**

The MCCN has extensive experience proving care to the specialized populations below:

Specialty Population	Services Provided	Service Location
Individual Experiencing Homelessness	Aggressive Treatment and Relapse Prevention-provides housing and treatment, Helpline-housing support, drop in centers, HIV/STI Screening, Education and Testing/Narcan	Central and Southeast regions
LGBTQ Population	HIV/Case Management, HIV/STI Screening, Education and Testing/Narcan, Transgender Support Groups, Community Drop-in Centers, Mobile outreach	Southeast region
Criminal Justice-Involved Individuals	Jail Diversion, Re-entry Services, Community Based Flexible Supports (forensic program), DDS Forensic Residential Services, Relationship Ladders Training Program, Mental Health Provider - Worcester County Jail, HIV/STI Screening, Education and Testing/Narcan Distribution-Dartmouth House of Corrections, and Ash Street Facility.	Throughout many communities in the Central, Northeast and Southeast Regions
Individuals who are Blind or Deaf/Hard of Hearing	Residential, Day and Respite services who have I/DD and/or behavioral health needs.	Throughout many communities in the Central, Northeast and Southeast Regions
Individuals with Cognitive Disabilities	Memory Café, Alzheimer's Support groups, Brain Injury Survivors Group, Senior Service Coordination, Alzheimer's Certified Adult Day Health	Throughout many communities in the Central, Northeast and Southeast Regions

Total Fringe (Program Budget Line 2)			**$ 43,186**

#VALUE!

Total Personnel*	**$ 178,142**

* Should align with Personnel Costs row in Program Budget

For each position listed above, provide a brief statement of the position's responsibilities:

Program Director: is responsible for training, directing, and monitoring the Care Coordinators in providing appropriate and quality services to enrollees according to the procedures of WestMass ElderCare and the regulations of the Executive Office of Health and Human Services. Referrals are treassed to partners under his/her direction.

Bookkeeper/Billing Specialist: responsibilities include billing for the LTSS CP program and then reconciling payments.

I & R Specialist :The Information and Referral Specialist shares responsibilities with the Information and Referral Supervisor for WMEC's activities related to the maintenance and dissemination of information regarding services and programs available to consumers. She/he holds a central position in directing intakes, assessments, counseling and referral of consumers and their caregivers who require information and/or services.

Care Coordinators: The LTSS CP Care Coordinator engages in activities designed toward eliminating barriers and improving the conditions and well-being of enrollees. The Care Coordinator is an integral component of the community care and long-term care management system for enrollees. She/he engages in activities, which incorporate a variety of disciplines and funding sources. The Care Coordinator is directly involved in the processes of assessment, service planning and coordination, advocacy, problem solving, and gatekeeping.

Each member of the consortium/affiliated partner will contribute 1/8 of the Care Coordinators for a cost of $8,062.50 per partner for salary and $2,580 for fringe.

System & Quality Analyst :Responsible for all facets of quality and compliance for the Long Term Support Services – Community Partner program (LTSS CP) of the Care Alliance of Western Mass (CAWM). Develop the CAWM Quality Management Committee; assist in the development and implementation of the CAWM CQI program; responsible for all quality reporting and interpreting data to all customers, both internal and external. Coordinate and facilitate system enhancements, as appropriate.

Fringe: Buget for all unfilled positions assumes family health and dental insurance. Actual fringe may be lower if significant number of

Row 3 - Training and Professional Development

Description of Service	Unit Cost (if applicable)	# Staff (if applicable)	Total Cost
Total Training and Professional Development (Program Budget Line 3)			

Provide a description of each Training and Professional Development line item included in the table above:

Row 4 - Travel

Position	Est miles per month	# months	Mileage reimbursement rate	Total Cost
Program Director	535	7	0.535	$ 2,003.58
6 Care Coordinators	2280	3	0.535	$ 3,659.40
Systems & Quality Analyst	625	7	0.535	$ 2,340.63
			Total Mileage	$ 8,003.60

Travel Expense Description	Cost
Total Mileage	$ 8,003.60
Parking and tolls	$ 450.14
Public transportation	
Enrollee travel	
Total Travel (Program Budget Line 4)	**$ 8,453.74**

Please describe how mileage estimates and other travel expenses listed above were determined . If including enrollee travel expenses above, please explain how these expenses will be used by enrollees.

Travel assumes staff will be attending trainings off site or at various community partner locations

Parking and tolls assume:
9 trips to Boston for meetings ($9 in tolls and $28 parking fee) at a cost of $296.
Mass Pike tolls for Care Coordinators, Program Director and Quality Analyst to attend meetings and trainings at partner agencies $117.

Each member of the consortium/affiliated partner will contribute 1/8 of the Care Coordinators travel expenses or $457.43 per partner.

Row 5 - Equipment

Description of Equipment	Unit Cost	#units or FTEs	Cost
Computer Rental	259	10.00	$ 2,590.00
Total Equipment (Program Budget Line 5)			**$ 2,590.00**

Provide a brief description of the intended use for each Equipment line item listed above and how the estimated costs were determined:

Computer rental at $37 per month * 7 months * Units needed

Each member of the consortium/affiliated partner will contribute 1/8 of the Care Coordinators computer expenses or $211.83 per partner.

Row 6 - Supplies

Description of Supplies	Unit Cost or Cost/FTE	# Units or FTE	Cost
Office Supplies / Printed Material	275	9.17	$ 2,521.75
Total Supplies (Program Budget Line 6)			

Provide a brief description of the intended use for each Supply line item listed above and how the estimated costs were determined:

Office supplies/ Printed Material costs were estimated a t $275 per FTE.

Office Supplies inclued: printed materials describing program, paper clips, paper, staples, toner for printer and fax machines along with laptop bag for each Care Coordinator.

Each member of the consortium/affiliated partner will contribute 1/8 of the Care Coordinators supplies expenses or $206.25 per partner.

Row 7 - Contract Services

Name of Contractor	Contractor Type	Goods and Services Provided	Cost
Total Contract Services (Program Budget Line 7)			

Provide a brief description of the purpose/need for each Contractor line item listed above, how each will support the CP's performance and how the costs for each were determined. Note that a Statement of Work must also be submitted to EOHHS.

Row 8 - Software Licensing

Description of Software	Cost per License	# Licenses	Cost
		Total Software Licensing (Program Budget Line 8)	

Provide a brief description of how each Software Licensing line item listed above will support the CP's performance and how the costs were determined:

Row 9 - Telecommunications

Type of Service Plan	Cost per Employee	Employees	Cost
Telephone Cost	284.04	10	$ 2,840.40
		Total Telecommunications (Program Budget Line 9)	**$ 2,840.40**

Provide a brief description of how each Telecommunications line item listed above will support the CP's performance and how the costs were determined:

telecomm expenses are determined by taking total land line and cell phone costs divided by employees at agency.

Telecomm costs in budget are for a 7 month time frame or $40.58 per month per employee.

Care Coordinators will have access to cell phones they can sign out as needed.

Each member of the consortium/affiliated partner will contribute 1/8 of the Care Coordinators telecomm expenses or $232.31 per partner.

Row 10 - Occupancy

Occupancy Expense	Total SqFt	Cost/SqFT	Cost	
Rent	1580	13	$ 20,540.00	** Annual
Utilities	1580	2.33	$ 3,681.40	** Annual
Repair and Maintenance	1580	1.17	$ 1,848.60	** Annual
			$ -	
			$ -	
Total Occupancy (Program Budget Line 10)			**$ 15,207.50**	** Rent for 7 months

Provide a brief description of how each Occupancy line item listed above will support the CP's performance and how the costs were determined:

SqFt calculation:
158 sq. ft. per employee * # employees in program

Total in Budget line 10 is for seven monhts rent.

Each member of the consortium/affiliated partner will contribute 1/8 of the Care Coordinators occupancy expenses or $1,243.80 per partner.

Row 11 - Other

Other Direct Expense Description	Cost
Total Other Direct Costs (Program Budget Line 11)	

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Row 12 - Indirect Cost/Administrative Overhead

Indirect Cost/Administrative Overhead	Rate	Total Indirect Cost
Total Indirect Cost/Administrative Overhead	**12.00%**	**$ 25,170.64**

Provide a brief description of each line item listed above will support the CP's performance and how the costs were determined:

Based On WestMass ElderCare's historical administrative / Overhead costs.

Each member of the consortium/affiliated partner will contribute 1/8 of the Care Coordinators Indirect costs or $2,005.88 per partner.

Section 7.5 Initial DSRIP Participation Plan Revised 12-5-17

WestMass ElderCare's response to this **Section 7.5** constitutes the Initial DSRIP Participation Plan as described in **Section 4.1** of **Attachment A.**

A. Executive Summary **(not to exceed 2 pages)**

WestMass ElderCare's five (5) year business plan for implementing the LTSS CP program is as follows:

The mission of the Care Alliance of Western Massachusetts (CAWM) is to efficiently and effectively achieve the objectives of the Long-Term Services and Supports Community Partners Program in the four counties of Western Massachusetts and in the Athol, MA service area. The aim of the CAWM is to mitigate the divide that exists between providers of LTSS care due to lack of information-sharing, coordination, and knowledge, leaving members unserved or underserved.

Specifically, the CAWM has structured itself to deliver integrated LTSS care coordination that provides the:

- highest quality member experience,
- is accessible to the member and the family,
- is the most appropriate level of care in the most appropriate setting (the right care at the right time in the right place)
- is person-centered,
- is efficient and non-duplicative,
- supports community-first and independent living values, and
- is culturally competent.

1. In order to provide effective LTSS care coordination, the CAWM must actualize the following goals:

- improve collaboration, communication, cooperation and understanding between ACOs, MCOs, CPs, BH, LTSS, and the physical health systems
- make investments in technology and information to improve the LTSS infrastructure
- install a Quality Management Program that sets specific, high and measurable quality standards for each of above stated components of optimal LTSS care coordination; manage to these standards (Expect and Inspect).

2. The CAWM has the geographic reach, covering all of the counties of Western Massachusetts, and the service capacity, to serve the entire LTSS estimated focus population of 4159 clients in the Western Region and 138 in the Central Region. However, the Alliance built its budget projections based on serving a total 2,000 members over the five year period with the understanding there will be other LTSS CP providers in Western Massachusetts.

3. The CAWM has structured itself with Behavioral Health providers, Aging, Disability and other providers of LTSS to facilitate the information, knowledge and experience exchange necessary to best meet the complex care coordination needs of those we seek to serve.

A priority goal for the CAWM will be to continue to deepen relationships with ACOs/ MCOs and the health system to find ways of working together that will meet our shared vision of excellence in care coordination. A challenge for the CAWM will be to establish the information systems that provide reliable data to be shared with our partners, to demonstrate how the work that we do can mitigate the negative impact of the social determinants of health.

4. LTSS CP Program Implementation Plan and Time Frames: **This section was been revised on 12-5-17.**

Phase 1

Activity	Time Frame
Implement LTSS CP marketing strategy/plan	11/17
Initiate infrastructure enhancements/engage consultant for EHR RFR	12/17
Grow community partnerships	12/17

Define Program Operations/Policies/Procedures	12/17
Develop Quality Standards/Metrics/ Install CAWM Quality Committee	1/18
Execute ACO/MCO contractual agreements	1/18
Implement staffing plan/begin recruitment	1/18
Phase 2 June 1, 2018	
Accept Assigned Enrollees/Initiate Care Coordination	6/18
Create Consumer Advisory Committee	8/18
Manage caseload up to 1000 enrollees	12/18
Refine Sustainability Plan	12/18
Year 2: Jan 1, 2019	
Perform Comprehensive Quality Review of Program	3/19
Retool/revise operations based on lessons learned	ongoing
Grow community partnerships, hold LTSS CP Summit	5/19
Realign and refine CAWM structure/membership, as needed.	ongoing
Annual audit, revise, retool and apply course corrections as needed.	ongoing
Serve 1250 members at minimum	12/19
Year 3: Jan. 2020	
Initiate sustainability plan	1/20
Grow community partnerships and CAWM membership	ongoing
Continue to strengthen ACO/MCO partnerships/join ACO(s)	4/20
Grow community partnerships, hold LTSS CP Summit	5/20
Execute MCO contract(s)	7/20
Continue monitor progress against stated goals and quality metrics	monthly
Engage with ACO(s) to discuss resource needs	12/20
Annual audit, revise, retool and apply course corrections as needed.	12/20
Serve 1500 members, at minimum	12/20
Year 4: Jan. 2021	
Grow community partnerships and CAWM membership	ongoing
Continue to strengthen ACO/MCO partnerships	ongoing
Increase ACO membership(s) as needed	ongoing
Continue monitor progress against stated goals and quality metrics	monthly
Grow community partnerships, hold LTSS CP Summit	5/21
Engage with ACO(s) to discuss resource needs	12/21
Annual audit, revise, retool and apply course corrections as needed.	12/21
Serve 1750, at minimum	
Year 5: Jan. 2022	
Grow community partnerships and CAWM membership	ongoing
Continue to strengthen ACO/MCO partnerships	ongoing
Grow community partnerships, hold LTSS CP Summit	5/22
Execute MCO contract(s)	7/22
Continue monitor progress against stated goals and quality metrics	monthly
Engage with ACO(s) to discuss resource needs	12/22
Annual audit, revise, retool and apply course corrections as needed.	12/22
Serve 2000 members, at minimum	12/22
Perform evaluation of 5 year program experience	2/23

Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
Program Consultant - eHana	$ 31,608.00
ehana license and implementation Fees	$ 10,990.00
Total Development and Adaptation of EHR and Care Management System	$ 42,598.00

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:
Fee for eHana programming & development of electronic enhancements consistent with Wraparound language and EOHHS goal of secured mechanisms to support data exchange.

Program Consultant eHana: Programming & Development Team: $31,598 will be paid to eHana for:
1) $5,000 Mass HiWay integration (projects & licenses);
2) $3,000 CANS Interoperability (shared with other CSAs);
3) $8,000 for Wraparound documentation development (shared with other CSAs);
4) $5,000 CSA quality and accountability measures reporting (shared with other CSAs); and
5) $10,608 (59 hours of eHana staff time at a rate of $180.00 per hour). Professional Fees: project management, business analysis, training, and development support plan.

Technology for Service Delivery

Description of Expense	Cost
Total Technology for Service Delivery	**$ -**

Technology for Service Delivery

Description of Expense	Cost
Total Technology for Service Delivery	**$ -**

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Other Technology Expenses

Description of Expense	Cost
Database for Improved Tracking	$ 1,500.00
Total Other Technology Expenses	**$ 1,500.00**

***Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how*Enhanced Tracking Database:**

Database Name: MS Access
Utilization: This tool will be used to track persons served demographics, service needs, service outcomes, gaps, license purchase, etc.
Who: The CSA Outreach Coordiantor will be able to monitor referrals from community pediatricians.
Cost: The BAMSI charge back for IT services is $50..0per hour. It is estimated the database will take 30 hours to build and test. **($1,500.00)**

eHana License and Implementation Fees: During the Preparation Budget period an investment of **$10,990** will purchase the eHana CSA module **($5,000.00)** license and pay for implementation fees**($5,040.00**; 28 hours at $180.00 per hour) eHana IT staff time associated with bringing the electronic record online at the BAMSI CSA.

Technology for Service Delivery

Description of Expense	Cost	
Purchase Surface pros - 11	**$ 8,800.00**	8800
IT set-up per device	**$ 2,090.00**	2090
Verizon Monthly Service	**$ 550.00**	550
Total Technology for Service Delivery	**$ 11,440.00**	

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:
Surface Pros for CSA staff to support community-based work during care plan team meetings. Surface Pros will include video conferencing and data exchange with ACOs/MCOs and others as needed.
Purchase 11 Surface Pros for CSA staff to remotely access the elctronic record while working with youth and families: The Devices will support a total of 17 FTEs.
*There will be 3 additonal devices to support additonal ICC and FPs (3 FTEs) given increased census as needed.

Surface Pros: ($800 plus $190 for IT support to set-up/install programs per device).
IT chargback is $50.00 per hour. It is estimated that each device will take approximately 4 hours for set-up (loading programs/applications, software, malware, gps, etc). **$190.00** will allow for 3.8 hours per device.

$10.00 monthly service charge **X** 11 devices **X** 5-month PBP = $550.00 for Verizon Internet when staff are in the field.

Other Technology Expenses

Total Recruitment Expenses	**$ -**

Provide a description of each recruitment expense line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Training Expenses

Description of Expense	Cost
Cost of (1) Production Day	**$ 3,200.00**
Post Production of Videos & Manual	**$ 4,800.00**
Reflective Supervision Training (6 FTEs)	**$ 2,000.00**
Total Training Expenses	**$ 10,000.00**

Provide a description of each training expense line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Investments in this project during the Preparation Budget period include:

1)Contracting with ***Siver Lakes Productions, Inc***. to record/film/produce at least eight training videos - **($8,000)**;

(1day) Fee for production/studio time **$3,200.00** (10 hours x $320.00)

(4 days) Post production days to produce, edit/mix sound, and editing of final product **$4,800.00** ($150.00 x 8 hours x 4 days)

Design and print manuals to accompany training modules and support/sustain staff utilization.

2) CSA Staff will participate in ***Reflective Supervison*** training **($2,000.00).** *(The regular and collaborative reflection between a service provider (clinical or other) and supervisor that builds on the supervisee's use of her thoughts, feelings, and values within a service encounter). This is an evidence-based model for supervison. A total of 6 FTEs at the CSA will be trained. The requested funding will purchase 10-hours of the trainer's time at a rate of* **$200.00 per hour**.

Note: The additional cost ($1,000.00 or 5 hrs) of the Refelctive Supervision training will be paid by the CSA.

Project 2	Helpline at the Village: Pediatric Outreach and Partnership	Collaborate with a minimum of three pediatric practices to provide an onsite resource for outreach, education and service navigation	06/01/18	12/31/21	**Operational Infrastructure**	Operational Staffing including fringe	Advertise & recruit Outreach Coordinator beginning 1/2/18	Hire Outreach Coordinator by 5/31/18						
		Develop and update, as needed, a DVD to educate families on community resources for viewing in waiting rooms	04/01/18	05/31/18	**Operational Infrastructure**	Other Operational Expenses	Conduct content research and design DVD format 4/30/18	Completed DVD in use at one pediatric site by 5/31/18						
		Host 2 community forums and educate local pediatrcians on CSA services	03/01/18	12/31/18	**Operational Infrastructure**	Other Operational Expenses	Convene Planning Team, identify invitation list of pediatric practices, and issue press release	Conduct first forum by 5/1/18 and second forum by 11/15/18						
					Operational Infrastructure									

REQUEST FOR RESPONSES: INFRASTRUCTURE AND CAPACITY BUILDING FUNDING FOR COMMUNITY SERVICES AGENCIES

SECTION 6.2: EXECUTIVE SUMMARY

BAMSI operated the Brockton Area Community Service Agency (CSA) since 2009 and has worked diligently on program enhancements and development. In accessing current needs and gaps, the CSA identified three primary projects for its Development Plan over the next 5 years: address recruitment and retention, increase ICC Engaged Members census, and enhance secure electronic communication capability. The three projects for our Development Plan are:

Project 1: **Workforce Development:** Training Enhancement, Coaching and Online Video Library.
Project 2: **Operational Infrastructure/Systems Change:** Increased access to care coordination and care management for ICC Engaged Members and Collaboration and Coordination with pediatric and other physical and behavioral health care providers across the care continuum.
Project 3 **Technology:** Build on current technology efforts to ensure timely and safe exchange of electronic information/data. Purchase mobile devices and utilize eHana HISP and Mass HIway.

A. BIDDER'S CURRENT PERFORMANCE ON ITS DEVELOPMENT PLAN:

WORKFORCE DEVELOPMENT: The Brockton Area CSA offers extensive training to staff during their tenure. Training is generally in a formal, class setting or one-to-one with supervisors or state-certified Wraparound Coaches. This process is time-consuming, costly and utilizes many resources. BAMSI CSA has designed a 5-year Development Plan that includes coordination of time, effort and resources with another CSA provider in the Southeast area. This plan will allow staff independent, diverse, multiple and role-specific skill building opportunities that is sustainable.

OPERATIONAL INFRASTRUCTURE/SYSTEMS CHANGE: EOHHS projected almost 8,000 children/youth eligible for Community Partner services in Southeast Massachusetts. BAMSI CSA has served approximately 200 unduplicated children/youth each year, since inception. In light of the EOHHS initial projections, the Brockton Area CSA needs to do more to reach eligible youth/families. Some of the efforts, to date, to increase census includes:

- BAMSI has an active and robust Local Systems of Care Committee that collaborate, network, educate and share resources for children/youth and to identify service gaps. The CSA facilitates these meetings, with over 50 members representing local schools, mobile crisis, police departments, state agencies, colleges, MCEs, faith-based organizations, parent professional organizations and medical/behavioral health providers. This forum has resulted in referrals to and from ICC and Family Partnership only services.
- The CSA has a coordinated outreach effort that has included program presentations to hospitals, CBATs, DCF, DMH, North River Health Initiatives and Social Service Agencies. Presentations have resulted in some community awareness and referrals.
- A recent partnership with Village Pediatrics of Brockton to conduct social needs assessments, information and referral, access to basic needs and resources and on-site consultation with parents. This outreach has resulted in increased referrals to BAMSI CBHI services, including ICC and Family Partnership only.

Although these efforts have been fruitful it is clear, based on "the average number of ICC-Engaged Members per month (Brockton CSA) served between March 1, 2016 and February 1, 2017 (Appendix D of RFR), that additional work must be done to reach and increase the number of children/youth eligible who benefit from CSA services in the Greater Brockton Area.

TECHNOLOGY: BAMSI uses eHana as its electronic health record (eHR) and has successfully implemented this system in its outpatient network, across 9 Day Habilitation programs and the Adult Day Treatment Center. The Brockton CSA is scheduled for implementation of eHana in late fall/winter. With the availability of DSRIP funds, the 6 CSAs using the eHana eHR have initiated discussion with them for the design of customized features that more appropriately reflects Wraparound strength-based language, supports Mass HIway integration, and easily tracks quality and accountability measures consistent with those outlined by EOHHS.
BAMSI is currently participating in a Connected Communities Grant with Signature Health, Good Samaritan Hospital, Brockton Neighborhood Health Center and High Point Inc. to transmit electronic referrals via the Mass HIway and will continue use this mode of transmission if needed to electronically transmit data/information beyond the eHana system. BAMSI also participated in the Steward Healthcare Capacity and Infrastructure Building pilot for Accountable Care Organizations. BAMSI is well positioned and ready to fully implement its eHR at the CSA and is excited to work with eHana and CSA partners to strengthen fidelity to the Wraparound process and improve care management.

B. EXAMPLES OF STRENGTHS AND NEEDS: BAMSI has 42 years of experience serving culturally diverse youth and families with SED and/or emotional distress, trauma, or complex MH/BH challenges. BAMSI's services include adult day and residential programs, outpatient mental health services, EI, WIC, therapeutic day supports, family stabilization, CBHI services, Helpline, an afterschool program and in-school consultation. BAMSI has many longstanding community linkages/affiliations and nearly 2,000 employees.
The 3 main strengths of the Brockton Area CSA are:

1. Diverse staff (language and culture), a nationally -certified Wraparound coach and 50% Family Partners have Bachelor level degrees.
2. Robust Local System of Care team, strong connection with Brockton Public schools and co-located with the Helpline resource.
3. Each staff has I-Phone, desk-top computer and is generally technologically astute.

The 3 main identified needs of the Brockton CSA are:

1. Improved recruitment and retention strategies.
2. Improved marketing and outreach efforts that support timely access to services and increased census.
3. Implementation of a secure and strength-based electronic health record.

C. PLANS FOR IMPROVING TIMELY ACCESS TO ICC SERVICES: The 1st project will work to recruit, consistently train and retain qualified staff, thus improving/increasing timely access for ICC-Engaged members and their families. The 2nd project provides information and referral linkages onsite at pediatric practices where eligible children/youth/families gather and referrals can be made in a timelier manner, through communication bridging. The 3rd project will allow CSA staff to respond more quickly to referrals at the location most convenient for

youth/families and more quickly document information electronically (keeping to Wraparound Principles) and to safely yet quickly communicate information to other involved providers and natural supports.

D. PLANS FOR IMPROVING CARE COORDINATION, CARE PLANNING, AND CARE MANAGEMENT FOR ICC ENGAGED MEMBERS: Each of the 3 projects contribute to the improvement of care coordination, care planning, and care management for ICC Engaged members.

- **Workforce Development Project**: Provide structured and convenient Tier 1 and Tier 2 coaching training and Reflective Supervision training to enhance staff skills.
- **Operational Infrastructure/Systems Change Project**: Onsite bridging of communication with pediatric primary care providers will support increased care coordination, care planning and care management amongst providers and to Engaged Members.
- **Technology Project**: Staff will have continuous access to records. Families will be able to easily review and approve/sign plans, and information will be electronically exchanged with all team members, including ACOs and MCOs.

E. PLANS TO IMPROVE PERFORMANCE ON QUALITY SCORES AND DEVELOPMENT PLAN GOALS:

BAMSI will work with eHANA to ensure that data tracking, dash-boarding, and essential reporting features are included to capture ongoing performance and quality measures. This work may include business process analysis, eHR modifications, reporting enhancements, and data export integrations, for reporting quality measures in a structure format. These features will include:

- Claims/Encounter Only Measures: BAMSI will work with eHana to automate the import/collection of quality data BAMSI will work with EOHHS/ACOs/MCOs, other health care providers, and community stakeholders to build data interchanges to support real-time quality analytics.
- Chart Review Measures. BAMSI will use existing tools and technologies, such as auditor logins, encrypted PDF exports, and data analytics to support submission of the quality reporting to EOHHS/ACOs/MCOs and to provide access to additional data or information necessary to audit or validate submitted data.
- Engaged Enrollee Experience Survey. BAMSI will support EOHHS in execution of the Engaged Enrollee Experience Survey.

F. PLANS FOR IMPROVING COORDINATION WITH PEDIATRIC PRIMARY CARE AND OTHER PHYSICAL AND BEHAVIORAL HEALTH CARE PROVIDERS ACROSS THE CARE CONTINUUM FOR YOUTH:

Lessons learned from the "Helpline at the Village" project will steer enhancements, to this partnership, and replicated in the future with other pediatric primary care providers. Some negotiated developments with Village Pediatrics include: advanced data tracking systems, two-way access to demographics, resource-based DVD for waiting area and follow-up outreach to families served.

SECTION 6.3 - POPULATIONS SERVED AND COMMUNITY ENGAGEMENT

A. MEMBER POPULATIONS, COMMUNITIES SERVED, AND EFFORTS TO PROMOTE HEALTH AND WELLBEING:

BAMSI operates the Brockton Area CSA serving Brockton and the 7 surrounding towns of Avon, Bridgewater, East Bridgewater, West Bridgewater, Easton, Holbrook and Stoughton. BAMSI's Child, Family and Community Services network includes Wraparound Family Services which extends throughout the Southeast region including programs in Taunton/Attleboro, Plymouth, Quincy, New Bedford/Fall

River and Cape Cod. BAMSI serves approximately 25,000 people a year, 70% of whom are served in the Greater Brockton area. Of those, 42% are children/youth.

The Brockton Area CSA demographics from a 2017 study indicate:

CSA Population / Languages Spoken/Presenting Primary Mental Health Challenges: July 1st 2016 – June 30th 2017

LANGUAGE	PRESENTING PRIMARY MENTAL HEALTH CHALLENGES
English = 189 Spanish = 18 Haitian Creole = 10 Cape Verdean Creole= 11	Bi-polar Disorder (1), Mood Disorder (1), Schizoaffective Disorders (2), Major Depressive Disorder (10), Major Depressive Reoccurring Disorder (8), Dysthymic Disorder (6), Generalized Anxiety Disorder (11), Oppositional Defiant Disorder (34), Intermittent Explosive Disorder (1), Pervasive Developmental Disorder (1), Attention Deficit Disorder (78), Reactive Attachment Disorder (3), Mental Disorder (NOS) (72)
TOTAL SERVED = 228	

CSA Breakdown by Self-Reported Ethnicity of Persons Served: July 1st 2016 – June 30th 2017

ETHNICITY	#	ETHNICITY	#	ETHNICITY	#		#		#
Caucasian	88	Bi-racial	20	Black	1	Cape Verdean	11	Haitian	10
African-American	27	White/Black	1	Black/Hispanic	1	Asian	2	Puerto Rican	1
Hispanic	16	White/Hispanic	1	American/Indian	4	Latino	1	Unreported	40

CSA Breakout by Age Range and Gender: July 1st 2016 – June 30th 2017

AGE RANGE	#	AGE RANGE	#	AGE RANGE	#		#	GENDER	
4 – 6 years	24	7 – 12 years	89	13 – 17 years	95	18 – 20 years	20	Female = 84	Male = 144

In service to a community with a number of risk indicators it is evident that efforts to promote health and wellbeing are crucial in strengthening the community and supporting residents, particularly children/youth. BAMSI has provided public health services including Brockton Early Intervention, nutrition services at its two WIC programs and HIV Case Management, Outreach, Prevention and Education. In the 1990's BAMSI was instrumental in establishing the Brockton Neighborhood Health Center (BNHC) and maintains a seat on the BNHC Board of Directors and collaborates on many projects including the Massachusetts eHealth Institute Connected Communities grant. BAMSI also partnered with Steward Healthcare in 2016 on 3 infrastructure and capacity building ACO pilot projects related to improved care transitions. BAMSI operates 120 residential and day programs across the state for those with disabilities and complex medical needs, employs over 300 nurses, maintains a vast library of medical policies/protocols, and has a Medical Risk Committee that meets bi-monthly to evaluate risk and improve outcomes for those served.

The Brockton Area CSA promotes the health and wellbeing of engaged members by completing Comprehensive Home Based Assessments that explores all life domains, including health and recreation. The CSA utilizes the support of the BAMSI Helpline to research and access services and support needs identified by enrolled members and their teams. The CSA ensures community involvement of members through

schools, YMCA, Boys and Girls Club, churches, community leagues, well-visits, social events, community walks, and annual resource fairs. The CSA works collaboratively with the Helpline to complete Service Needs Assessments with families and provide information, referral and consultations to bridge gaps, deter evictions, develop payment plans, access utility resources, negotiate utility discounts and obtain basic goods such as diapers, formula, food, clothing, rent assistance, etc. The CSA staff accompanies youth and parents to medical and behavioral appointments, as requested and indicated, and support families with medical follow-through and health insurance documentation. The CSA maintains engagement with members through various means of outreach, which includes face-to-face, telephone, meetings, emails, texts messages, groups, specials events and parent workshops. Team members of enrolled youth and families support ongoing engagement. BAMSI will build on the experience and expertise in serving diverse populations and meeting individual healthcare and public health needs of Engaged Members.

B. **RELATIONSHIPS WITHIN THE COMMUNITY LEVERAGED TO IMPROVE ICC SERVICES**

BAMSI has developed and maintains several linkages and affiliations with community organizations that has and/or will be leveraged to improve ICC services. Over 40 years BAMSI has developed an extensive network of affiliations and partnerships, including:

SERVICE TYPE	ORGANIZATIONS
Schools and Colleges	Public Schools (8 towns served), Massasoit Community College, Bridgewater State University, The Goddard School, North River Collaborative, South Shore Collaborative, South Eastern Regional, Recovery High School, High Roads of Mass.
Pediatric Clinics	Village Pediatrics, Brockton Neighborhood Health Center, Bulotsky & Associates, Brockton Pediatrics,
Child Care Providers	Brockton Day Nursery, PACE, Healthy Beginnings, YMCA Child Care, Little Discoveries
Family Organizations	WIC Brockton, The Family Center, Family Support Center, Adoptions Journey, Adoptions Crossroads, PIN,
Community Based Organizations	Brockton Neighborhood Health Center, Safe Corners, Brockton Police Department, Catholic Charities, Highpoint, The Castle, E.B. Hope, C.O.P.E, BAMSI Helpline, United Way, Brockton ARC, Recovery Learning Center, Health Imperatives, JRI, MAY Institute,
Youth Service Organizations	Stoughton Youth Commission, BrAGLY, Gandara, Old Colony YMCA, Boys & Girls Club, Home Based Team, Youth Villages
Advocacy Groups	Young Adult Group, Parent Information Network, Parent Professional Advocacy League, Citizens for Citizens,
Behavioral Health Providers	Bay Coast Behavioral, South Bay Community Health, Northeast Family Services, Whitman Counseling Center, Family and Community Resources, New Hope Counseling, Manet Community Health Center, Bay Coast Human Services, Bay State,
Child Serving State Agencies	Plymouth Child Advocacy Center, DCF, DDS, DEEC, DESE, DMH, DPH,
Courts	Brockton Juvenile Court, Plymouth County District Attorney's Office, Wareham Court,
Hospitals/CBATS/ESP/MCI	Caritas Good Samaritan Medical Center, Signature Healthcare – Brockton Hospital, Carney hospital, Pembroke Hospital, Walker, McLean's, Franciscans, NEMC, Boston Children's, Mass. General, Brockton Multi-Service Center, CCBC,
Housing/Shelter providers	Brockton Housing Authority, Father Bills & Mainspring, DHCD, Housing Solutions,
Social Service Organizations	Salvation Army Brockton, Self Help Inc., Old Colony Elderly Services, Inc., National Grid, Catholic Charities, Toys for Tots, Charity Guild, DJ Henry Foundation, My Brother's Keeper, Cradles 2 Crayons, Friends of the Homeless,
Recreational/Athletic Associations	YMCA, Boys and Girls Club, MATA Karate Studio,
Early Intervention Services	BAMSI Early intervention, South Bay Early Intervention,
Other	DTA, Harbor One Bank, Language line, Career Works, Make A Difference in Children, The Learning Center for the Deaf, READS Collaborative, Cape Verdean Association, Silver Lake Productions,

In addition, BAMSI participates on 22 community councils, advisory boards and organization Boards of Directors.

Improvement in ICC services is achieved by outreaching to these organizations and leveraging relationships for participation in Local Systems of Care Committee, collaboratively identifying service gaps and brainstorming solutions, providing crisis intervention and safety planning, accessing and supporting services, facilitating service navigation, and sharing in collaborative learning opportunities. BAMSI also leverages its longstanding relationship with DMH Area and Site offices through contract meetings, collaborative intakes, crisis management/mobile crisis unit and shared events, which further enhances care planning, fosters team-based collaboration and outcome-based strategies and effective clinical interventions for those served. BAMSI is committed to current affiliations and to expanding community relationships/partnerships as illustrated by the proposed Operational Infrastructure project aimed at improving connection and integration with pediatric practices, modeled after an already successful BAMSI community partnership with Village Pediatrics. BAMSI is also the provider of several child/youth programs including DPH funded Early Childhood Intervention and WIC services; DMH funded afterschool and family stabilization services, the Parent Information Network which offers parent and education advocacy and family support services; and DDS funded ICC, family support, and services for medically complex children/youth. BAMSI's Child Family and Community Services is a collaborative network that maximizes resources, shares expertise and best practices to support and promote improved ICC.

C. How Current and Planned Partnerships Align with Proposed Projects:

BAMSI proposes three projects, all of which align with current and planned partnerships. The first, Workforce Development Project, is a collaborative effort designed in conjunction with the CSA/ICC provider organizations in the Southeast region. Since its inception BAMSI has worked collaboratively with one other CSA partner teams on a number of initiatives. The second project focuses on systems change in the domain of Operational Infrastructure. Currently BAMSI partners with Village Pediatrics to conduct social needs assessments with individuals served by the Village Pediatrics practice. Given the success of this endeavor, BAMSI proposes to partner with other pediatric practices to extend this service into other pediatric offices, thereby strengthening relationships, community and breaking down barriers to access for ICC services for those who might benefit from ICC. In addition referrals will be made to other community organizations with whom BAMSI already partners. The third project in the area Technology is also a collaborative effort with other CSA/ICC providers using the eHana electronic record to build more strength based language/documents into the existing system.

SECTION 6.4 PROPOSED PROJECTS AND INVESTMENT PLAN

A. PROJECT DESCRIPTION

	WORKFORCE DEVELOPMENT	OPERATIONAL INFRASTRUCTURE	TECHNOLOGY
1. Name/Title of Project	**Online Video Training Library**	**"Helpline at the Village" - Pediatric Outreach and Partnership**	**Wraparound Strength-Based Electronic Record**
2. Goals advanced & Plans to Address Goal through the project	**Goal:** Strengthen fidelity to Wraparound processes, including care planning, care management, and care coordination for ICC Engaged Members and their families. **Plans to Achieve Goal:** Create comprehensive and sustainable employee training to improve recruitment/retention, access, engagement, and optimal care coordination. Work with Southeast Area CSA to develop a video training library for Tier 1 and Tier 2 Wraparound Coaching and Certification to facilitate improved outcomes for ICC Engaged Members. Each CSA will contribute to content and work with videographer and Massasoit Community College to create a learning segment. Format and approach has been discussed, topics researched, subject matter experts identified, experienced production team engaged.	**Goal:** Improve timely access to ICC services for children eligible to receive ICC and their families *Fostering strong integration with ACOs and primary care providers for ICC-Engaged Members* **Plans to Achieve Goal:** Based on positive outcomes of the "Helpline at the Village" pilot, BAMSI will enhance this partnership through use of advanced data tracking systems, two-way access to demographics, resource-based DVD for Village Pediatrics waiting area and other locations and ensure follow-up outreach to families served. Replicating this pilot and lessons learned from the Village Pediatrics experience, BAMSI will outreach to other pediatric practices and expand this project throughout the Brockton CSA Area.	**Goals:** *Improve timely access to ICC services for children eligible to receive ICC and their families* **and** Strengthen fidelity to Wraparound processes, including care planning, care management, and care coordination for ICC Engaged Members and their families. **Plans to Achieve Goal:** BAMSI will work collaboratively with other CSAs and eHana to design customized Wraparound fidelity features, implement its eHR assuring interoperability with Behavioral Health (BH) and Long Term Services and Supports (LTSS) Community Partners, ACOs/MCOs, and assure quality and accountability measure reporting
	WORKFORCE DEVELOPMENT	**OPERATIONAL INFRASTRUCTURE**	**TECHNOLOGY**
3. Scope (duration, methods, activities to accomplish goals)	Identify trainers for each topic. Secure permissions and licenses. Contract with videographer.	Identify (in collaboration with Village Pediatrics) pertinent data to be tracked. Identify an advanced data tracking system.	Work with eHana and other CSAs to design/enhance current eHR with features and functionality to support integrated and

	Tape topic sessions with input from State certified Wrap coaches. Develop Self-test manuals for each topic. Convene a test group to try materials. Make required edits. Post videos online for easy access to all CSA staff. ***Duration*:** Four initial videos will be available on-line by May 2018, with four additional segments added by late 2018 with full library completed in Year 2. 2, minimally supported Years 3 - 5 to print materials. Reflective Supervision training will commence in 1/1/18 thru 5 years of project	Explore two-way access to demographics. Develop a resource-based DVD with BAMSI's Community Relations. Design, test and implement plan for follow-up outreach to families served. Obtain testimonials from staff at Village Pediatrics: benefits and challenges. Also obtain testimonials from persons served at Village Pediatrics. Develop outreach/marketing strategy to engage other area pediatricians. Host community pediatric forums. Recruit and train volunteers. ***Duration:*** 5 years – Expand role at Village Pediatrics and hire Outreach Coordinator during Preparation Budget period. Host 2 forums (Preparation budget and Year 2) and expand to 3 additional practices by end of Year 5.	collaborative models of care: ▪ Implement Wraparound Strengths Based Language. ▪ Patient Portal. ▪ Standardized and Secure Data Exchange Formats (transmission via HISP to Mass HIway & other partners). ▪ Quality and Accountability Measure Reporting. Develop Implementation Plan including testing and training of staff. Continue to refine. ***Duration:*** 5 years - Design & test during Preparation Budget Period, Implement eHR by April 2018. Continue implementation of enhancements Year 1 & 2. Refine & support Years 3-5.
4. Proposed Deliverables	▪ Wraparound Fidelity best-practice and evidence-based training videos online and easily accessible. ▪ Continuous learning and professional growth opportunities. ▪ Staff retention through increased opportunities to grow and obtain free CEUs towards licensure. ▪ Enhanced staff skills in Wraparound fidelity (including care coordination, care management and care planning).	▪ Resource DVD developed and utilized at Village Pediatrics & beyond. ▪ Enhanced tracking system. ▪ At least 6 meetings with pediatricians to promote the project and collect survey responses based on their individual practice needs. ▪ At least 4 pediatric practices engaged in the project at end of 5 years.	The CSA eHana eHR will include: ▪ Strength-based forms and language, in particular the Assessment and Care Plan. ▪ A "golden thread" throughout the record, from assessment through care plan, progress monitoring and transition planning. ▪ Secure exchange of data with EOHHS; ACOs/MCOs; other primary providers. ▪ Report on claims/encounter measures. ▪ Chart Reviews. ▪ Engaged Member Satisfaction Survey. ▪ CANS Reporting.
	WORKFORCE DEVELOPMENT	**OPERATIONAL INFRASTRUCTURE**	**TECHNOLOGY**
5. Specific use of DSRIP funding & how goal supported	Fee for videographer and Massasoit Community College to produce training videos. Design and print manuals to accompany	Salary/benefits to hire new Outreach Coordinator to engage and be an onsite resource at primary pediatric practices. Develop promotional materials to	Fee for eHana programming & development of electronic enhancements consistent with Wraparound language and EOHHS goal of secured mechanisms to

	training modules and support/sustain staff utilization. Fee to use licensed/copyrighted materials to ensure evidence based best practices presented. Fee for set up of web-based hosting to assure user friendly on-line access.	distribute at pediatrician offices. Produce Resource DVD for waiting rooms to educate/inform community members of CSA and other services. Host pediatric education/engagement events to inspire participation and expansion of the program.	support data exchange. Fee for eHR implementation including licensure and IT support. Cost to purchase and set up 11 Surface Pros for CSA staff used in care plan meetings, including video conferencing and data exchange with ACOs/MCOs and others as needed.
6. Existing Internal Resources to be utilized to implement project	Corporate Relations Team to coordinate with videographer and develop training manual. Professional Development & Training Department to promote and track training Project Management - research, planning, coordination & oversight of the project. BAMSI Training Space & IT staff to support production. BAMSI Website to access training library Wrap ICC Coach to review all material and ensure fidelity to the model.	Helpline Director to enhance Village partnership and train newly hired Outreach Coordinator. Supervisory oversight of project. Information & Referral database utilized as resource for all pediatric practices. Social Needs Assessment Tool duplicated and used to assess need and connect with community members to resources, including referral to CSA. Employee Travel Expense. Office Supplies.	IT Project Management & Oversight. Leadership planning to assure successful implementation and training of staff. Development of training materials and manual as resource to support and sustain utilization. IT staff time to test and train CSA staff.
7. Allocation of Funds across CSA and BAMSI	Funds will be allocated solely to the CSA.	Funds will be allocated to the CSA. A portion of funds will be accessed by Helpline staff to support the Village effort and to train/supervise the new Outreach Coordinator.	Funds will be allocated to the CSA. The CSA will be charged licensing, implementation and set-up fees by BAMSI IT Department.
8. Evaluation, measurement or performance management strategies to demonstrate effectiveness	▪ More timely completion of coaching certification for CSA staff. Comparative data baseline: post implementation. Track improvements as library expands and incentives offered by BP5. ***Staff responsible:*** *PD&T with Sr. Program Director* ▪ Improved clinical competence for ICC staff. Pre & Post- test comparative data Match Bachelors to Masters/licensed. Self-identified scoring 75% or higher improvement by BP3. ***Staff***	▪ 10% increase in census year over year. Data: DSRIP census of 77 at baseline: DSRIP census allocation Years over years 1-5 will increase by 10% each year. ***Person responsible:*** *Sr. Director of Operations Child, Family & Community Services* ▪ Improved collaboration with primary care providers (physical & behavioral health) Year over Year as indicated by Care Plan attendance sheets/absence forms by BP3. Data generated from	▪ The eHana electronic record (eHR) will be implemented by April 1, 2018 BP2. ***Person responsible:*** *Vice President IT* ▪ All CSA staff will utilize the eHR for care planning and data collection on quality measures by the end of BP2. Data: eHR reporting. ***Persons Responsible:*** *Vice President of Child, Family & Community Services in conjunction with Sr. Director of Operations & Sr. Program Director*

	responsible: *PD&T (online test) and Sr. Program Director (analytics).* ▪ Improved WIFI - EZ and Toms 2.0 scores (Wraparound Fidelity). ▪ *Specifically, we would improve our WIFI-EZ scores in Natural Supports and Family Voice and Choice. Our scores will improve by 5% points in each area.* ▪ *In the TOMS 2.0, we would also improve in Natural supports and Family Voice and Choice by 5% percentage points in each area.* ▪ We will do this by reviewing baseline data to post training implementation by BP4. ***Staff responsible:*** *Sr. Program Director* • Improved retention of ICC staff. Comparative data prior 12 months to 1 year post training by BP2. ***Staff responsible:*** *Director Talent Acquisition and Retention*	eHR. ***Person responsible:*** *Sr. Program Director* ▪ Expansion of Village Partnership to a minimum of 3 additional pediatric practices by BP5. ***Persons responsible****: Vice President of Child, Family & Community Services in conjunction with Helpline Program Director and Outreach Coordinator* ▪ 2 Pediatric/Primary Care Forums will be held by the end of BP2. *Person Responsible: Sr. Program Director in conjunction with Outreach Coordinator*	▪ Increased electronic bidirectional communication between CSA and other care providers by the end of BP2. Year over year data analysis Year 1 forward. ***Person Responsible****: Sr. Program Director* ▪ Evidence of 'golden thread' in chart audits. Comparative data beginning & end BP2: each subsequent year. ***Person responsible:*** *eHana with Vice Presidents IT & Child Family Community Services* • Timely reporting on quality and accountability measures to EOHHS/ACOs/MCOs. Measure: continued DSRIP funding through BP5. ***Person responsible:*** *Sr. Director of Operations CF&CS*

Performance Management will be monitored by the BAMSI Quality Improvement Department. The CBHI Committee will review findings and determine any course corrections.

B. Project Team Description

1. See Organizational Chart and Job Descriptions Attached

2. – 4. Project Staff – Current and New, Qualifications and Responsibilities, including Project Management

PROJECT 1:
Online Video Library

NAME & TITLE	QUALIFICATIONS	PROJECT RESPONSIBILITIES	NEWLY HIRED/ENGAGED STAFF	QUALIFICATIONS AND RESPONSIBILITIES FOR PROJECT
Aisha Bonny Sr. Director of Operations Child, Family and Community Services	Project management, collaborative skills and an ability to facilitate teamwork. Skilled in mediation and outcome-based strategies. Experience in training and curriculum development.	**Project Manager:** Oversee project in coordination with CSA Providers to assure curriculum development and consensus, work with team to schedule and ensure conformance with timelines and budget.	Lynn Scornavaca Owner & Founder Silver Lake Productions Videographer Narrator	*Qualifications:* Over 20 years of experience in video production, produced 25 plus videos for BAMSI events. Maintains archives of photos and videos for BAMSI *Responsibilities:* Record and produce training modules
Kathy Anderson Director Brockton CSA	Certified and experienced Wrap Coach. Independently licensed Social Worker. Experience training staff in wraparound fidelity.	Develop content in coordination with other CSA Directors, develop materials for training manual.		
Barbara Duffy Vice President Community Relations	Technological skill and experience monitoring quality of productions and conformity to requirements.	Coordinate with Videographer and Website Host to upload trainings to website.		
Sonia D'Alarcao Sr. Program Director Professional Development and Training Dr. Lizzie McEnany, Psych. D. Licensened Psychologist, HSP	Experience developing curriculum materials, training trainers, coordinating and tracking required staff training for completion. Reflective Supervision Trainer	Produce training manual, maintain training database and track training completion Conduct Reflective Supervision training to CSA leadership		

PROJECT 2:
"Helpline at the Village"
– Pediatric Outreach and Partnership

NAME & TITLE	QUALIFICATIONS	PROJECT RESPONSIBILITIES	NEWLY HIRED/ENGAGED STAFF	QUALIFICATIONS AND RESPONSIBILITIES FOR PROJECT
Beverly Williams Vice President Child, Family and Community Services	Licensed Marriage and Family Clinician. Masters in management with concentration in Organizational Development. Experience in community bridging and network expansion and enhancement. Event planning, budgeting and budgeting skills.	**Project Manager:** Oversee project in coordination with Village Pediatrics and others, ensure all elements of the project implemented, including well planned and coordinated pediatric events, work with stakeholders to complete DVD, ensure conformance with timelines and budget.	Lynn Scornavaca Owner & Founder Silver Lake Productions Videographer Narrator Massasoit Community College Studio and production team	*Qualifications:* __ years of experience in video production, produced 25 plus videos for BAMSI events. Maintains archives of photos and videos for BAMSI *Responsibilities:* Produce DVD
Faith Frazier Director Helpline Information & Referral	30 years of experience in information and referral service and resource search. Strong community networking and advocacy. Ability to negotiate on behalf of others. Trainer of BAMSI's New Employee Orientation.	Expand Village Pediatric experience, ensure use of DVD and materials, train and supervise Outreach Coordinator, support pediatric events and engagement	Outreach Coordinator (To be Hired)	Administer Social Service Needs cards. Explore resources and services required. Provide information and referral services and/or consultation.
Barbara Duffy Vice President Community Relations	Technological skill and experience monitoring quality of productions and conformity to requirements. Develops and designs promotional materials, and promotes events and services.	Coordinate with Videographer, work with team to develop promotional materials and advertise events		

NAME & TITLE	QUALIFICATIONS	PROJECT RESPONSIBILITIES	NEWLY HIRED/ENGAGED	QUALIFICATIONS AND RESPONSIBILITIES FOR

			STAFF	PROJECT
Margot Carleton Vice President Information Technology Services	Attained a degree in Management Systems and a minor in Computer Science. Skilled in the selection and roll out of Electronic Healthcare Record solution.	**Technology Project Manager:** Oversee technology elements of the project in coordination with eHana, BAMSI, and CSA providers, ensure testing, security assignments, implementation and staff engagement in conformance with timeline and budget. Order surface pros and assure set up	eHana Programming and Development Team	Demonstrated and successful experience with implementation, deployment, and support of electronic health record and other complex technologies. Worked with BAMSI for 4 years to implement eHR in outpatient, day habilitation, and day treatment. Work with team to design enhanced MAP, ePrescribe and Meaningful Use features
Beverly Williams Vice President Child, Family and Community Services	Organizational Development specialist with expertise in change facilitation, time management and budget monitoring.	**Operational Project Manager:** Oversee and manage operational aspects of the project in coordination with eHana and BAMSI IT, ensure engagement of staff, advise on direction and content security, etc. and ensure compliance to timeline and budget constraints.		
Aisha Bonny Sr. Director of Operations Child, Family and Community Services	Experience in Wrap fidelity, staff training and development and coordination of services and support.	Part of the implementation team giving input on content and structure, support staff in change process, test and train staff		
Kathy Anderson Sr. Program Director Brockton CSA	Certified and experienced Wrap Coach with extensive knowledge of Wraparound process and CBHI policies, procedures and expectations.	Work as part of the implementation team giving input on content and structure, supervise CSA staff in the process, support change process, and ensure thorough testing and training of staff for on time implementation. Purchase Surface Pros.		

5. Project Management: As indicated above, each project has a named Project Manager who will be responsible for oversight and coordination of the project from beginning to end. The Project Manager will coordinate team efforts and assure timelines are met and budget adhered to. For the Technology Project two Project

Managers are identified: one to manage technology and coordinate with eHana, and the other to assure operational input, testing and field implementation. This model has been successfully used on other technology projects at BAMSI, including implementation of the electronic record.

C. IMPLEMENTATION PLAN AND TIMELINE

TIME PERIODS	PROJECT 1 Online Video Library	PROJECT 2 Village Pediatrics – Pediatric Outreach and Partnership	PROJECT 3 Wraparound Strength-Based Electronic Record
PREPARATION BUDGET PERIOD			
December 2017	Hire and sign an agreement with the videographer and Massasoit Community College. Convene 2-3 telephone &/or in-person conferences with other CSA to continue planning of library and discuss content of first 2 videos. These meetings will be attended by BAMSI's VP of Corporate Relations. Develop MOU for Reflective Supervison training with Dr. Lizzie McEnany	Collaborate with Village Pediatrics and videographer on the design and content of Resource DVD for use at Village Pediatrics. Brainstorm needs of database system, in conjunction with Village Pediatrics. Begin recruitment of Outreach Coordinator.	Collaborate with eHana and CSA providers to develop strength-based language for the assessment, care plan and other documents. Develop the enhanced features for the electronic record. The Brockton CSA will implement the existent electronic health record with the IT team. Initiate team meetings to discuss expectations, progress and utilization of the enhanced software.
January 2018	Begin the production of the first 4 videos, with input from the CSAs and Wrap ICC coach. Identify any required licenses and content needed for accompanying manual. Research proprietary curriculum and make payments. Commence Reflective Supervison training with CSA Leadership/supervisors	Continue recruitment of Outreach Coordinator. Design and develop first draft of the Resource DVD for use at Village Pediatrics. Develop promotional materials. Begin planning and promotion of the first Pediatric forum. Secure venue. Explore enhanced database system.	Order 11 Surface Pros Conduct training with staff on the ehana electronic record system. Initiate team meetings to discuss expectations, progress and utilization of the enhanced software.
January/February 2018	CSAs will review first 4 Videos and provide feedback and additional suggestions.	Hire Outreach Coordinator. Distribute invitations to the Pediatric Forum. Provide personal outreach. Obtain feedback from Village	Set-up 11 Surface Pros and conduct training with staff on its utilization. Conduct training with staff on the ehana electronic record system.

	Continue Reflective Supervision training	Pediatrics on the drafted Resource DVD for use at Village Pediatrics. Test database systems.	Testing and refinement of electronic health record based on staff feedback and identified challenges. Develop security protocols. Initiate team meetings to discuss expectations, progress and utilization of the enhanced software.
February – March 2018	CSAs will refine first 4 videos provide feedback and additional suggestions for completion gathering input from staff and families.	Train the new Outreach Coordinator Finalize edits and produce the Resource DVD for use at Village Pediatrics. Select enhanced database system.	Testing and refinement of electronic health record based on staff feedback and identified challenges. Develop security protocols. Initiate team meetings to discuss expectations, progress and utilization of the enhanced software.
April – May 2018	Finalize and post the first 4 videos And complete 4 additional videos Complete Reflective Supervision training	Host the first Pediatric Luncheon Forum. Launch the Resource DVD at Village Pediatrics. Develop a promotional PowerPoint to demonstrate the benefits and successes experienced in the partnership with Village pediatrics.	Testing and refinement of electronic health record based on staff feedback and identified challenges. Develop security protocols. Electronic health record in full production by April 2018 Initiate team meetings to discuss expectations, progress and utilization of the enhanced software.
BUDGET PERIOD 1			
June 2018 – June 2018	Convene 2-3 telephone &/or in-person conferences with other CSA to continue planning of library and discuss content for additioanl videos	Outreach Coordinator to schedule meetings and/or presentations.	Launch full utilization of both the Brockton CSA and the strength-based electronic record.
July 2018 – September 2018	CSA will utilize videos for staff training and test accompanying manual	Engage one other Pediatric practice. Facilitate meetings with the new practice and Village Pediatrics to determine strengths, challenges and any gaps. Review tracking systems.	Continue utilization of electronic record, updating as needed. Test interoperability with ACOs, MCOs and other providers. Begin tracking quality and accountability measures.
October 2018 – December 2018	Continue utilization and plan production of remaining videos	Facilitate meetings with the new practice and Village Pediatrics to determine strengths, challenges and any gaps. Review tracking systems. Host second	Reporting on quality and accountability measures.

		Pediatric Luncheon	
BUDGET PERIOD 2			
January 2019 – March 2019	Convene 2-3 telephone &/or in-person conferences with other CSA to continue planning of library and discuss content	. Facilitate meetings with the new practice and Village Pediatrics to determine strengths, challenges and any gaps. Review tracking systems.	Continue utilization of the electronic record. Consultation with eHana for maintenance, updates and enhancements as needed. Continued collaboration with the CSAs on best-practices. Track data and report on outcomes as required. Refinement and consultation.
April 2019 – June 2019	Begin production of remaining videos	Outreach to Pediatricians to schedule meetings and/or presentations. Facilitate meetings with the new practice and Village Pediatrics to determine strengths, challenges and any gaps. Review tracking outcomes. Expand Outreach Coordinator hours to 20/week	
July 2019 – September 2019	Finalize and post videos 9 and 10. Continue utilization for new staff as hired and refreshers, if needed.	Facilitate meetings with the new practice and Village Pediatrics to determine strengths, challenges and any gaps. Review tracking systems and outcomes.	
October 2019 – December 2019	Review all videos for edits as needed, assure staff access, utilization and refinement. CSA will complete a staff survey on videos and manuals.	Engage one other Pediatric practice. Facilitate meetings with the 3 practices to determine strengths, challenges and any gaps. Review tracking systems.	
BUDGET PERIOD 3			
January 2020 – March 2020	Editing and maintenance of 10 online videos and manuals.	Facilitate meetings with the 3 practices to determine strengths, challenges and any gaps. Review tracking outcomes.	Continue utilization of the electronic record. Consultation with eHana for maintenance, updates and enhancements as needed. Continued collaboration with the CSAs on best-practices. Track data and report on outcomes as required.
April 2020 – June 2020		Outreach to Pediatricians to schedule meetings and/or presentations. Review tracking systems.	
July 2020 – September 2020		Facilitate meetings with the practices to determine strengths, challenges and any gaps. Review tracking systems.	
October 2020– December 2020		Facilitate meetings with the new practice and Village Pediatrics to determine strengths, challenges and any gaps. Review tracking systems.	

BUDGET PERIOD 4			
January 2021 – March 2021	Editing and maintenance of 10 online videos and manuals.	Facilitate meetings with the new practice and Village Pediatrics to determine strengths, challenges and any gaps. Review tracking systems. Outreach to Pediatricians.	Continue utilization of the electronic record. Consultation with eHana for maintenance, updates and enhancements as needed. Continued collaboration with the CSAs on best-practices. Track data and report on outcomes as required.
April 2021– June 2021		Facilitate meetings with the 3 practices to determine strengths, challenges and any gaps. Review tracking systems.	
July 2021 – September 2021		Facilitate meetings with the practices to determine strengths, challenges and any gaps. Review tracking systems.	
October 2021– December 2021		Facilitate meetings with the 3 practices to determine strengths, challenges and any gaps. Review tracking systems. Engage one other Pediatric practice.	
BUDGET PERIOD 5			
January 2022 – March 2022	Editing and maintenance of 10 online videos and manuals.	Facilitate meetings with the 4 practices to determine strengths, challenges and any gaps. Review tracking systems. Outreach to Pediatricians	Continue utilization of the electronic record. Consultation with eHana for maintenance, updates and enhancements as needed. Continued collaboration with the CSAs on best-practices. Track data and report on outcomes as required.
April 2022 – June 2022		Facilitate meetings with the 4 practices to determine strengths, challenges and any gaps. Review tracking systems.	
July 2022 – September 2022		Facilitate meetings with the 4 practices to determine strengths, challenges and any gaps. Review tracking systems.	
October 2022 – December 2022		Facilitate meetings with the 4 practices to determine strengths, challenges and any gaps. Review tracking systems.	

D. Budget Report and Budget Narrative – (Attachments B & C Attached.)

F. SUSTAINABILITY PLAN

PROJECT 1 Online Video Library	**PROJECT 2** Village Pediatrics – Pediatric Outreach and Partnership	**PROJECT 3** Wraparound Strength-Based Electronic Record
The plan is to develop and maintain the online video library, assuring quality, content and relevance. Access additional resources through grant and CSA revenue as census increases.	Through efforts of the Outreach Coordinator, it is expected that CSA census will increase by 10% each year over the 5-year budget period, thus providing resources to off-set the cost of the Outreach Coordinator's salary, fringe and benefits, travel, materials and other related expenses in subsequent years.	At the end of the 5-year period, the enhanced electronic record will be fully implemented; license expense for Mass HIWay, eHana professional service fees for continued upgrade and improvement will be expensed to the CSA program as needed.

SECTION 6.5 COORDINATION TO IMPROVE INTEGRATION OF BEHAVIORAL AND PHYSICAL HEALTH CARE:

A. BIDIRECTIONAL COMMUNICATION BETWEEN THE BIDDER AND PEDIATRIC PRACTICES:

BAMSI Helpline Program currently has a relationship with Village Pediatrics in Brockton. A staff is on-site at Village Pediatrics 5 hours a week to meet face-to-face with physicians, nurses, social worker and contracted mental health counselors to share information and receive referrals. The staff is also available to meet with patients to provide information, referrals, and access to community resources/basic needs. BAMSI will seek to enhance and build upon this model to provide a dedicated person to be on site at multiple pediatric offices within the Brockton catchment area each week. This collaboration with pediatric practices is described in section 6.4 as a project to improve Operational Infrastructure. Developing a new role for "Outreach and Marketing" would allow continued communication and collaboration with Village Pediatrics and other pediatric/physician practices in the Brockton area.

Village Pediatrics is exploring ways in which to allow the BAMSI staff security access for use of their electronic system. As BAMSI links to other pediatric practices, this option will also be explored. BAMSI currently uses eHana as its electronic health record/vendor, which has Health Information Service Provider (HISP) capability. In addition, BAMSI utilizes the Mass HIway to provide secure email and referral/data exchange with local medical/healthcare providers, under a Connected Communities Grant funded by the Massachusetts eHealth Institute (MeHi). BAMSI will extend that capability to the CSA as part of its proposed DSRIP Technology project to create interoperability with EOHHS/ACOs/MCOs, primary care providers, and potentially youth/families. A portion of BAMSI's DSRIP funds will further support enrollment and integration of the CSA program with the Mass HIway. A plan has been formulated with eHana which will support this effort through its HISP and will also include technical onboarding, project management, and ongoing training to support sustainability. BAMSI also plans to purchase and supply ICC staff with encrypted devices to enhance their capacity to mobilize to community locations while ensuring the protection of health information. (See Section 6.4 for more detail about proposed project for Technology).

B. REFERRAL MANAGEMENT PROTOCOLS FOR FOLLOW-UP AND INFORMATIONAL SHARING:

Currently BAMSI receives referrals face-to-face, by phone, fax, and/or email. Referrals are received from families, providers, clinicians, schools, pediatricians, nurses, hospitals, CBATS, etc. The CSA protocol is to contact the family referred within 24 hours of the referral receipt. If unable to reach the family within a week, outreach occurs with the referral source for collaboration, assistance, and follow-up. Once a family enrolls with the CSA a release of information is obtained for the Primary Care Provider and other involved medical/healthcare providers. To enhance existing practice, BAMSI CSA will include the "Combined MCE Behavioral Health Provider/Primary Care Provider Communication Form" in all intake packets and send to the PCP on the first day of service. All CSA referrals are tracked and logged in our referral database.

C. TEAM-BASED TREATMENT PLANNING IN COLLABORATION WITH PEDIATRIC PRACTICES:

The CSA Care Coordinator(s) invites a representative from the Pediatrician's office to participate in the identified youth's care planning team, if the youth has a major medical diagnosis or is receiving psychotropic medications from their PCP. It has been a challenge for those

from pediatrician offices to participate in these meetings (face to face or by conference call) due to volume of their work. If unable to attend however, an "Absent Partner" form is sent for completion and returned with any updates/questions for the team. This allows pediatrician inclusion and connection with the team on an ongoing basis.

Skype and video conferencing technology is being explored as an additional tool for encouraging pediatricians/PCPs to join care plan meetings, which may be more convenient for them. We are invested in building a more integrated, collaborative, holistic approach and are thinking creatively of other ways to include every pediatrician's office in the care planning process. One idea is to identify a triage nurse or social worker within the practice to act as a liaison with the CSA. In the coming months, BAMSI will reach out to all local pediatrician offices with an invitation to attend a "Planning Breakfast". This approach has been effective in strengthening collaboration with local schools and community organizations. We plan to engage Dr. David Howell, our partner at Village Pediatrics, to provide a keynote address sharing his experience and success with the BAMSI/Village Pediatric partnership. This event will also include opportunities to dialogue with other health care professionals on ways to enhance communication on behalf of children/youth served, especially around team-based planning and care coordination. Included in our proposal is the addition of an Outreach/Marketing Coordinator to educate and link with pediatrician offices and other physical health care providers.

We will seek to improve our evidenced based practices such as Wraparound Certification for all staff, and Reflective Supervision for supervisors by collaborating with one other Southeast CSA to develop training videos for Tier 1 and Tier 2 and Coaching Certification (See Section 6.4, Workforce Development project description) and provide opportunity for leadership to attend Reflective Supervision training. We will use our "Planning Breakfast" to share this information and learn from pediatricians/PCPs about patient needs and treatments recommended to align our training strategy.

D. TIMELY ACCESS TO ICC SERVICES:

BAMSI CSA has an Intake Coordinator who contacts families within 24 hours of receiving a referral. Once the family has consented to the service, an intake is scheduled. The family is offered an appointment within 3 business days. Every effort is made to accommodate the family's time constraints and the family may choose to have the intake at the BAMSI office, their home, or another location of their choice. BAMSI intends to improve upon this by offering the Outreach Coordinator or Intake Team who can respond to the PCP's office to complete an intake during scheduled days/times. This will be discussed at the "Planning Breakfast" to determine the specific needs and preferences of the various health care providers.

As a result of the ACO/MCO and Community Partner collaboration, BAMSI expects that CSA enrollment will increase (See 6.4.E Sustainability). BAMSI will closely monitor the need to hire additional staff in order to continue timely access to services in compliance with State mandates and regulations.

E. CONNECTIONS TO SOCIAL SERVICES:

BAMSIs Helpline serves as an information, referral and advocacy program to the Greater Brockton community and beyond. Services include access to emergency assistance and basic needs, including rent, utility, and emergency resources as well as referrals and navigation support to other social services. BAMSI has longstanding relationships with local social service/community agencies, public sector Departments and has its own broad network of services that maximizes resources, and offers a full spectrum of services/supports to youth and families. BAMSIs Helpline is co-located with the CSA. Care Coordinators and Family Partners frequently connect families directly with this unique resource.

BAMSI will further enhance this resource by developing informational DVDs that can be used in physician waiting rooms and at pediatric offices so patients can learn about local social services. To quote Dr. Howell we need to move from "a healthcare model to a more human care model". This is one of the many ways we hope to achieve that sentiment.

In addition, the LTSS and BH Community Partner which BAMSI has partnered with has proposed PRAPARE as its Social Determinants of Health Screening Tool to better assess individual's needs and measure progress in meeting those needs. If approved, this tool will be embedded in the BAMSI eHR. Either this, or our current social needs assessment tool, will be used at CSA intake and by the Outreach/Marketing Coordinator at pediatric offices.

CSA Budget Report

Bay State Community Services

Investment Funding	Prep Budget Period	Budget Year 1	Budget Year 2	Budget Year 3	Budget Year 4	Budget Year 5	Total Revenues
Number of CSA sites	2	N/A	N/A	N/A	N/A	N/A

Training Expenses

Description of Expense	Cost
50% of Consultant cost to conduct Reflective Supervision training. The other 50% of the cost will be paid by BAMSI	$ 3,350.00
Total Training Expenses	**$ 3,350.00**

Provide a description of each training expense line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

This amount was calculated using 24 hours of training over a four day period plus 6 coaching hours subsequent to training at a rate of $223.33/hour (30 hours X 223.33=$6,700. 50% of total cost is $3,350.

Reflective Supervision is a relationship-based practice that expands the idea that supervision is a context for learning and professional development. In reflective supervision, the relationship between supervisor and supervisee models the relationships between a provider and client in a helping relationship. Through its model of collaboration with and support of clinicians and other providers, Reflective Supervision strengthens the practice of trauma-informed care. Training our CSA Program Managers and Supervisors in the Reflective Supervision model will help to improve staff job satisfaction, improve staff retention, and improve outcomes for families being served by the CSAs. This training will be attended by 1 Program Manager, 2 Program directors and 4 Supervisors.

CSA Milestones Report

CSA must have at least one implmentation goal with at least one milestone for each project number. An implmentation goal may have more than one milestone.

Project #1	EHR Enhancements	Enhance existing EHR to make documentation more reflective of hi-fidelity Wraparound	12/01/17	12/31/22	**Technology**	Development/adaptation of EHR and/or care management system	Working group will have met 3-5 times and a draft of a Wraparound assessment and Care Plan will be available.	Draft of Wraparound assessment and Care Plan will be presented to Network Managers for input.						
Project #2	Implementation of Office 365	Increase security and improve mobile access to information	12/01/17	03/31/18	**Technology**	Other Technology Expenses	Purchase by 1/1/18;Installation completed by 3/31/18	Staff fully utilizing new email system						
Project #3	Signature Pads and Lap Tops	Increase active participation in care planning process and signing of documents	01/01/18	03/31/18	**Technology**	Technology for Service Delivery	Purchase by 1/1/18; distribution to staff complete by 3/31/18	Staff fully utilizing signature pads and laptops.						
Project #4	Wraparound Credentialing	Ensure families receive hi-fidelity Wraparound Services	12/01/17	12/31/19	**Workforce Development**	Training Expenses	Purchase of training manuals. Contract signed with Silver Lake Productions. Certified Coach will be retained and credentialing activities will be in process.	Training Manuals will be available to staff. Signed contract will be available for review. Certified Coach will be working with staff.						
Project #5	Medical Behavioral Health Training	Provide staff with the skills to coordinate care with youth and medical providers	11/06/17	12/21/22	**Workforce Development**	Training Expenses	2 staff will be certificed and 8 staff will be in process of certification.	2 staff will be certified.						
Project #6	Reflective Supervision	Ensure effective supervision and maintain staff	01/01/18	05/31/18	**Workforce Development**	Training Expenses	7 staff will have participated in the Reflective Supervision Training.	2 Supervisors from each site and 3 program director level staff will have completed the training portion.						
Project #7	Recruitment and Retention Specialist	To increase staffing and ensure timely access to Wraparound	11/01/17	12/31/21	**Workforce Development**	Recruitment Expenses	Position posted 11/1/17. Interviews completed by 12/15/17. Position filled 1/1/18	The Recruitment Specialist has completed New Hire Orientation and has began to screen candidates for CSA positions.						
Project #8	Outreach to Primary Care and Community Providers	To increase referrals and educate community partners	11/01/17	12/31/19	**Operational Infrastructure**	Operation Staffing including Fringe	The CSA staff will schedule presentations at a mimumum of 8 Pediatric practices to offer on site CSA availablity.	Each site will have working agreeements with 2 Pediatric practices.						

6.2 EXECUTIVE SUMMARY

Bay State Community Services (BSCS) greatly appreciates the opportunity, through this RFR, to assess our CSAs, review the lessons we have learned and develop a 5 year plan that will ensure our CSAs are successful in fully meeting the needs of the youth, families and funders.

A. Current Performance – BSCS is proud to offer Intensive Care Coordination (ICC) services through our two CSA's. Although the details of the Developmental Plans differ for each site, the overarching theme that impacts the work we do is workforce development—specifically recruiting, hiring and maintaining quality staff who embrace the CSA High Fidelity Wraparound Model.

Historically, the Plymouth CSA has experienced positive reviews in Development Plans focused on specific and identifiable Wraparound skills, as well as documentation recommendations. In 2015 the program director, who was part of the writing, implementation and training process of the Plymouth CSA, left her position. Even with aggressive outreach, unfortunately it took us nine months to find a qualified candidate for this critical position. During this time, the staff did not have the level of support and guidance usually upheld by BSCS; we take responsibility for not maintaining this level of support. In order to ensure that this would not happen again, BSCS has restructured our leadership team in Plymouth by adding a site director, filled by Imani Seunarine. In addition, our Vice President of Children's Services, Theresa Burke, is now responsible for the oversight of the program. Both of these individuals are highly trained and qualified, having extensive experience with the Wraparound model. This restructuring immediately stabilized the program and has addressed the concerns on the Plymouth Development Plan.

The Coastal CSA has also been successful since the inception of the program. We are confident in our fidelity to the model and have been given positive feedback on our documentation. However, we have experienced significant challenges in recruiting, hiring and maintaining staff; therefore, the numbers of families that we serve is low. We have attempted numerous strategies to address this issue and currently have a stable and committed staff.

B. Strengths and Needs – The strengths of BSCS include: our commitment to our communities, deep desire to support our families and the dedication of our staff and leadership team to fulfilling the needs of those we serve. Such strengths were especially emphasized when the Plymouth CSA began to struggle. Our leadership team prioritized the Plymouth CSA and took action by restructuring positions in order to ensure that the CSA had the support and oversight needed to be successful. As in this situation, we do experience staff leaving; however, we have several core staff members who have been with the agency since the beginning of the program and are committed to staying in the program. These core staff members are fully invested in the Wraparound model and are champions in maintaining fidelity to the model.

The overwhelming need for the success of our CSAs is the recruitment and retainment of committed and qualified staff that have a passion for the Wraparound model. In writing this RFR, there were many discussions around the challenges we face and the strategies we need to implement in order to find staff that have the ability to effectively meet the needs of our youth, families and funders.

C. Timely Access – As previously highlighted, staffing is fundamental to improving access to ICC services. Having staff that are available and trained allows us to respond more quickly and efficiently to the needs of our youth and families. As part of our 5 year investment plan, we are proposing numerous ways to effectively address this issue. Some of these proposals include: hiring a specialized recruiter, offering training and certification to staff, enhancing our electronic health records system, conducting outreach. Please see Section 6.5 (D) for additional details.

D. Care Improvement Plans – Our first strategy for improving care coordination, care planning and management is to provide training to our staff that supports these key elements. This training will include supporting staff in becoming certified Wraparound facilitators.

The second strategy for improving care coordination, care planning and care management is to enhance our Electronic Health Record (EHR). Currently, staff members are trained on the best practices in Wraparound documentation. However, the EHR format is more in line with the medical model and not necessarily conducive to Wraparound practices. Therefore, by enhancing our EHR, the BSCS staff will be able to focus on the Wraparound model and services instead of on the difficulties faced in documenting services in the current system. Both of these initiatives will all address adherences to quality measures.

E. Performance Improvement Plans – The CSA teams appreciate the time and effort that goes into the compilation of the Mass Practice Review (MPR) and the Wraparound Provider Practice Analysis which includes findings from the Team Observation (TOM) and the Wraparound Fidelity Index (WFI). We have used this information to develop our Continuous Quality Improvement (CQI) goals for our CSAs.

The Coastal CSA received an average score of 3.9 on the MPR and the Plymouth CSA received an average score of 3.6, placing both programs in the upper portion of fair practice. It should be noted that the Plymouth CSA score was calculated based on one evaluation due to our inability to complete two individual case reviews. Our goal for both programs is to be in the high range of the good to exemplary practice score. A considerable strength of the Coastal CSA was team participation (5), Youth Engagement (4.5) and Care Coordination (4.5). Although still in the fair practice range, Assessment (3) is an area that we are addressing through the enhancement of our EHR. The Plymouth score identifies the same goals.

We are proud to announce that the Coastal CSA TOM score was 97%. However, we understand that we must improve our Natural and Community supports (73%) and plan to do so by having natural and community supports attend team meetings. In addition, we have identified Natural and Community Supports (63%) as an area to improve. The WFI-EZ score was 69%, as compared to the state average of 69.9%.

The Plymouth CSA TOM score was 91%. We have identified the Natural and Community Supports (39%) as an area that needs dramatic improvement. Again, the areas of Natural Supports (66%) are being addressed. The score on the MA WFI 4 was 82%, as compared to the state average of 81%.

In looking at this data BSCS plans to develop specific Continuous Quality Improvement (CQI) initiatives to improve on our scores by focusing on the following areas: training staff on motivational interviewing, pursuing certification in the Wraparound process and participating in the statewide training series that is being developed. Special attention will be given to the Natural and Community supports for innovative and best practices. An example of this would be additional training on the use of the Absent Partner Wraparound Participation Form and how to effectively use this form to improve outcomes.

F. Coordination Improvement Plans – After reviewing our Performance Based on Quality score, assessing our development plan, and speaking with the staff and leadership team, we determined it would be beneficial to have our staff participate in the U-Mass Medical Center for Integrated Primary Care (CIPC) training. This extensive on-line training with live coaching will provide our staff with the knowledge, resources and confidence to work directly with the pediatric practices, community health centers and hospital systems. The curriculum includes the following topic areas: Creating and Managing an Integrated Primary Care Practice, Bio-Psycho-Social Treatment, Dealing with Substances and Pain in Primary Care, Behavioral Health and Pediatrics, Serious Mental Illness, Population Health in Primary Care and Families, Community and Culture. In addition, U-Mass offers an abbreviated specialized course on Behavioral Health in Pediatrics. It includes the following additional topics: Behavioral Health in the Primary Care of Children, Practicing as a Behavioral Health Clinician in Pediatric Care and Challenging Populations. We will review these trainings based on the staff and community needs.

6.3 POPULATIONS SERVED AND COMMUNITY ENGAGEMENT

A. Member Populations – As part of our process in submitting this RFR, we wanted to fully understand the Members and the communities we are serving. We asked: Who are we serving in our CSA's? Are we providing service in all of our cities and towns? What is the age and gender of the youth? Are we meeting the needs of the diverse cultures and ethnicities in our communities? We believed that understanding this information would guide us in how best to use the funds that are being made available. We took the time to carefully analyze our service data for calendar year 2016 and have included a brief summary below.

The Plymouth CSA serves a large geography including 19 towns. They have served 322 families from 27 different communities in calendar year 2016. Of the youth served, we had 144 females and 178 males, ranging in age from 3-21. This data breaks down as follows: 89 youth between the ages of 7-10, 98 youth between the ages of 11-14, 99 youth between the ages of 15-18, and 7 young adults. The demographics for this area have been identified as primarily white and English speaking; however, some of our communities are welcoming more Brazilian, Portuguese and Cape Verdean families. Through this CSA we have provided services for 18 families identified as African American, 4 Native American, 13 Bi-Racial, 3 Cape Verdean, 19 Hispanic and 5 other families who chose not to identify their ethnicity.

The Coastal CSA serves an area encompassed by 10 cities and towns. The CSA staff served 161 families from 13 different communities. Of the youth served, we supported 67 females and 92 males, ranging in age from 3-20. This data breaks down as follows: 23 youth between the ages of 3-6, 42 youth between the ages of 7-10, 48 youth between the age of 11-14, 42 youth between the age of 15-18, and 6 young adults. The area is also primarily a white and English speaking demographic, with some of our communities having a large Asian population. Twelve families identified as African American, 1 Native American, 4 Asian, 3 Bi-Racial, 1 Cape Verdean, 1 Hawaiian and Pacific Islander, 8 Hispanic and 2 families who chose not to identify their ethnicity.

Clearly understanding and analyzing this information has guided our thought process in regards to the projects we are proposing. We hope these proposed projects will not only promote health and wellbeing, but will also initiate and maintain the engagement of our youth and families. Employing a CSA Recruitment and Retention Specialist will not only assist us in hiring qualified staff, but the Specialist will have a mandate to reach out and engage staff from the cultures we are committed to serving, thereby improving access to care in our catchment areas for families with cultural and linguistic needs.

Further, as part of our proposal, our staff will be trained in medical and behavioral health integration. This specialized skill set will allow our staff to fully understand how to engage with primary care physicians. This will better equip the staff in supporting our families, helping them to understand the importance of regular health and dental wellness visits for the overall well-being of their child.

In looking at our identified service area, we are proud to have provided services in each of the cities and towns in our catchment areas. As we analyze this data, we are able to identify some cities and towns that would benefit from additional education and outreach. As part of our SOC, we will reach out to community providers and PCPs in these areas to increase engagement.

B. Community Relationships – The success of our CSAs are intricately linked to the programs offerings and the agency's commitment to making authentic connections with our community partners. As the CSA, it is our responsibility to develop strong, supportive and trusting relationships with everyone throughout our communities.

As a large agency, BSCS has numerous formal, informal and collaborative agreements with the continuum of child caring services systems. We work closely with these partners to ensure that

our youth and families have access to the supports they identify in their care plans. The following are examples of our current and planned relationships, and how they will be leveraged to improve the quality of ICC services.

Family Organizations/Advocacy Groups – As the host of the Quincy Family Resource Center (QFRC), we work closely with family organizations such as PIN, PPAL and NAMI. This strong relationship enables us to reach out to families in need and provide ICC support. We will continue to nurture these strong relationships to be viewed as strength-based support for families.

Schools – As a large multi service center, BSCS provides numerous offerings in the schools. Most recently we have developed a curriculum for the Quincy Public Schools (QPS) to assess Substance Use Disorders (SUD), and supportive mental health services. This strong relationship has ensured that youth in the QPS who would benefit from ICC have immediate access. Developing personal and responsive relationships ensures that the school personnel will reach out when a family needs assistance. Our clinic services plan to increase this training to other school systems and will ensure coordination with the CSAs.

Child Care Providers – Although we work with numerous child care providers, we are currently working on increasing our collaboration with the STAR's child care provider. As one of the South Shore's largest providers for DCF, we want to offer resources and supports to these families. This enhanced collaboration is exploring placing CSA staff in the day care sites.

Community Based Organizations – Our strong SOC demonstrate our connection to our community partners. Our communication and collaboration ensures cross referral and an understanding of the CSA service. We will leverage our existing relationships with organizations such as Quincy Asian Resource Center to ensure that we reach everyone in our community.

Behavioral Health Service Providers – As a CBHI provider, we understand the continuum of care available to our youth and family. We work closely with behavioral health serving agencies to inform them of the ICC service and how it will support their clinical work.

Child Serving State Agencies – BSCS is the Lead Agency for both the Plymouth and Coastal DCF offices. Our Lead staff is well educated on the CSA services and work collaboratively with DCF to identify families who would benefit from ICC.

Courts – BSCS has numerous contracts with the Department of Corrections and the court/legal system. When a parent is involved in a legal matter, we are able to use the agency's resources to educate and inform the family on the corrections system and practices. Additionally, QFRC staff is in court each week to offer support and resources to youth and families involved with the CSA. QFRC staff regularly refers to CSA services, fully understanding and recognizing the needs of the youth and families and how CSA services can benefit them.

Housing/Shelter – BSCS longstanding collaborative relationship with Fr. Bill's/Mainspring enables us to effectively assist our families in navigating housing and shelter resources.

Primary Care Physician/Community Health Center – BSCS has a positive working relationship with Manet Community Health Center, Quincy Medical Center and South Shore Hospital, as we provide various supportive services to all of them. We are currently in discussions with Manet and South Shore Hospital to locate a Senior Care Coordinator onsite in their systems to support the behavioral health needs of their patients.

C. Alignment of Partnerships and Projects – BSCS is proposing the following projects to support the current and planned partnerships.

Medical and Behavioral Health Integration Training Project – CSA staff will participate in this intensive training which will improve collaboration with PCPs, Pediatricians, Community Health Centers and other integrated health services. This project will directly benefit our planned increase collaboration with Manet and with South Shore Hospital's pediatric group.

Training – We are proposing two initiatives to address the training needs including: Reflective Supervision Training , and Wraparound Certifications. .

Recruitment and Retention Specialist – Having a dedicated person will ensure that when our community partners are looking for services, we have staff who are readily available.

EHR Enhancements – Providing our partners with documentation that clearly reflects the Wraparound process and principles will ensure that they understand the service and are invested in the process.

Outreach to Primary Care and Community Partners – The CSA's
CSA staff will have dedicated time in Primary Care settings to educate medical staff on SED and CSA services and be available to accept referrals.

6.4 BIDDER'S PROPOSED PROJECT(S) AND INVESTMENT PLAN

A. Project #1 Description

1. **Project Title –** **Electronic Health Records (EHR) Enhancements**

2. **Goal -** Enhance existing EHR to 1) make documentation more reflective of best practices and fidelity to strengths-based model, 2) connect to the Mass HIway, 3) deploy interoperability of the CANS Assessment, and 4) support Quality Measure requirements.

3. **Scope -** BSCS has substantial demonstrated experience successfully managing implementation, deployment and support of EHR and other complex technology initiatives. We use eHana's Software-as-a-Service (SaaS) EHR, which is certified Meaningful Use Complete by Drummond Group (Certification Number 14.04.04.25 94.eHan.16.0.1.160728) and is deployed in community-based provider organizations throughout Massachusetts.

   The ONC-Certified version of the eHana EHR includes features and functionality intended to support integrated and collaborative models of care, including: Patient Portal functionality; Standardized data exchange formats (including Clinical Document Architecture (CDA) support); Transmission via DIRECT Health Information Service Provider (HISP) to the Mass HIway or other partners; Clinical Quality Measure and Automated Measure reporting; and Patient Educational Resource sharing and tracking.

   These features support EOHHS's goal of developing secure mechanisms to support data exchange not only with EOHHS and payers, but with the ICC-Engaged Members themselves. By way of example, Comprehensive Assessments, Individual Care Plans, and other information intended to support transitions of care could be shared via the Patient Portal or transmitted electronically via the Mass HIway.

   BSCS' vendor, eHana, also continues to make investments in the areas of interoperability and data exchange, including: a) working with new MassHealth ACOs to coordinate technology deployment; b) applying for and receiving the EOHHS grant-funded CANS interoperability project; and c) investing in new HISP technologies and connections to support emerging use-cases (such as the upcoming statewide Event Notification System).

   Wraparound/Strengths-Based Documentation - BSCS, its EHR vendor, and other stakeholders will collaborate on development of a best-practice Wraparound/Strengths-Based documentation module, which will supplement, or, in some cases, replace elements of its existing data-tracking system. Screenings, assessments, plans, and service documentation will be reviewed and potentially updated based on best practices and fidelity to a strengths-based model. This project is anticipated to include consulting/business analysis, project management, technical development, training, and support.

   Connectivity to the Mass HIway - A portion of BSCS' DSRIP funds will support enrollment and integration of the CSA program with the Mass HIway. Such a project will allow the CSA to interoperate with EOHHS, ACOs, primary care providers, and potentially clients and their families. This project is supported by BSCS' EHR vendor and its Health Information Service Provider (HISP), and will include technical onboarding, project management, and training.

   CANS Interoperability - BSCS' EHR vendor, eHana, is currently implementing interoperability of the CANS assessment, and BSCS anticipates utilizing functionality when it is deployed. This will enable more efficient data collection and reporting, with a small support overhead since the CANS will be completed within BSCS' EHR. This

project will include software licensing, project management, and training.

Quality/Accountability Measure Reporting - As part of the DSRIP application, BSCS will work closely with its EHR vendor, eHana, to implement data tracking, dashboarding, and reporting necessary to support Quality Measure capture, management, and submission in a manner consistent with EOHHS requirements. This work may include business process analysis, EHR modifications, reporting enhancements, and data export integrations (for reporting quality measures in a structure format). Quality/Accountability Measure technologies will support:

(a) **Claims/Encounter Only Measures.** BSCS will work with eHana to automate, where possible, the import/collection of quality data (including, for example, data supplied by EOHHS). Where possible, BSCS will work with EOHHS, ACOs, MCOs, other health care providers, and community stakeholders to build data interchanges to support real-time quality analytics.

(b) **Chart Review Measures.** BSCS will use existing tools and technologies, such as auditor logins, encrypted PDF exports, and data analytics to support submission of the Quality Measures Report to EOHHS and to provide access to additional data or information necessary to audit or validate submitted data.

(c) **Engaged Enrollee Experience Survey.** BSCS will support EOHHS in execution of the Engaged Enrollee Experience Survey.

4. **Deliverables -** A revised CSA module in eHana that offers the features described above.

5. **DSRIP Use -** Payment to eHana in the amount of $102,000 for a collaborative effort with other CSAs to enhance the CSA module as described under the Scope section above. The allocation of this amount between the above-named projects is outlined in the budget and the budget narrative.

6. **Resources -** BSCS will provide a Senior Program Manager to be part of a working group to design and implement the enhanced eHana module. Additionally, BSCS' VP of Children's Services, both CSA Program Directors, the EHR Coordinator and IT Consultant will be involved in the implementation.

7. **Funds Allocation -** The payment of $102,000 to eHana will be made using DSRIP funding and will be evenly distributed between the Plymouth and Coastal CSA programs.

8. **Measurement -**

Goal: Documentation will reflect best practice in Wraparound.

a) Specific Measures to Evaluate Impact

i) Staff Satisfaction Survey
ii) Family and Youth Satisfaction Survey
iii) MCO Record Review Results

b) Timeframe for evaluation and performance

i) Evaluation will begin 6 months after implementation of documentation and once yearly thereafter.

c) Proposed Goals for Measure

i) Staff Satisfaction Survey will be distributed 6 months after implementation of new documentation. Eighty percent of staff will report favorably on new documentation.
ii) Family and Youth Survey will be completed and 70% of families will report that they agree or highly agree that documentation is easy to understand and helpful to family.
iii) Mass Practice Review (MPR) findings will be used as a comparative analysis in subsequent MPR's with the expectations that the programs will attain Good to Exemplary Best Practices.

d) Data Collection

i) Human Resources will distribute surveys to CSA staff 6 months after implementation of new documentation.
ii) CSA Program Director's will distribute survey to CSA families with targeted questions related to satisfaction of documentation.

e) Staff Responsible for Evaluation

i) VP Human Resources - Julie Chirillo
ii) CSA Program Directors
iii) VP of Children's Services - Theresa Burke

.

B. Project #1 Team Description

1. **Organizational Chart –** See Attachment.

2. **Current Staff -** See Job Description Attachments - Marta Reese, CFO; Jerry Forde, IT Consultant; Theresa Burke, VP Children's Services; Imani Seunarine, Plymouth Site Director

3. **Staff to Be Hired –** None.

4. **Roles and Responsibilities -** Roles and responsibilities will be determined upon commencement of the eHana sponsored working group.

5. **Project Management -** This project will be managed primarily by eHana.

C. Project #1 Implementation Plan and Timeline

See Attachment 1- BSCS Project Implementation Timeline

E. Project #1 Sustainability - This project will be completed within the contract term and will be funded in total by DSRIP funding.

A. Project #2 Description

1. **Project Title – Implementation of Office 365**

2. **Goal -** Problem -BSCS' current email system is a hosted internet based POP (Post Office Protocol) system. A POP system is a limited protocol that lets your email program do nothing but download messages to each individuals computer or device. Because the emails are on each employee's hard drive, emails are not backed up. Additionally, with a POP email system, it is not possible to access the same email account from multiple computers or devices and have actions synchronize between them. Finally, security or encryption of email can only be accomplished by purchasing each email user a digital certificate, which is very cumbersome.

   Solution-The solution is to convert from a POP internet based email system to Microsoft Office 365, which is a cloud-based version of Microsoft's Office suite of enterprise-grade productivity applications (Word, Excel, PowerPoint, Outlook, etc.).

   By implementing Microsoft Office 365, the agency will be able to ensure a higher level of security with respect to transmission of information through email. This more secure communication system will be important in communicating with ACO's, Primary Care Providers, and ICC engaged members. Additionally, email will now be available on all types of devices providing employees with greater mobile access to critical information. Finally, all emails will be backed up by Microsoft.

3. **Scope -** This project would be completed during the Preparation Budget Period. Also, see timeline in Section C.

4. **Deliverables –** An upgraded email system to Office 365.

5. **DSRIP Use -** This agencywide project is estimated to cost $40,000. This amount includes 280 IT Consultant hours at a rate of $100 per hour ($28,000), and 800 hours of IT interns at $15 per hour ($12,000) for a total of $40,000. This estimated project cost is based on

converting 373 agencywide computers to Office 365. Plymouth CSA has 41 computers which represents 11% of the total. Coastal CSA has 24 computers, which represents 6% of the total. These percentages were applied to the total project costs of $40,000 to determine the pro-rated portion of the project to be funded by the CSA DSRIP funds. Plymouth CSA would be allocated $4,397 and Coastal CSA would be allocated $2,574.

6. **Resources -** This project would be overseen by the agency's IT Committee, which is comprised of the IT Consultant, Chief Financial Officer, VP of Prevention Services and the Facilities Manager.

7. **Funds Allocation –** See #5 above.

8. **Measurement**

Goal: To ensure security of electronic communication and increase mobile access.

a) Specific Measures to Evaluate Impact

   i) Staff Satisfaction

b) Timeframe for evaluation

   i) Completed 3/31/19

c) Proposed Goals for Measure

   i) Seventy five percent of staff will report satisfaction with synchronization between devices and improved communication via shared calendars.

d) Data Collection

   i) The CFO and IT Director will conduct a survey via survey monkey.

e) Staff Responsible for Evaluation

   i) CFO - Marta Reese
   ii) IT Director - Jerry Forde

B. Project #2 Project Team Description

1. **Organizational Chart –**See Attachment.

2. **Current Staff -** See Job Description Attachments - Marta Reese, CFO; Alejandro Rivera, VP of Prevention Services; Jerry Forde, IT Consultant; Diane MacIver, Facilities Manager

3. **Staff to Be Hired –**10 IT Interns

4. **Roles and Responsibilities –** This project will be overseen primarily by BSCS' IT Consultant, but supported by the IT Committee. The IT Consultant will directly supervise the interns.

5. **Project Management –** See Timeline below.

C. Project #2 Implementation Plan and Timeline

See Attachment 1- BSCS Project Implementation Timeline

E. Project #2 Sustainability - This project will be completed within the contract term and the portion of the conversion related to the 2 CSAs will be funded by DSRIP funding.

A. Project #3 Description

1. **Project Title –** **Purchase of Laptops and Signature Pads**

2. **Goal -** To provide greater mobile access for ICC staff as well as more active participation of families in completing required documentation.

3. **Scope**

   - Purchase of 50 laptops: 28 in Prep Period, 10 in Period 3, 5 in Period 4 and 7 in Period 5

   - Purchase of 20 Signature Pads in Prep Period

4. **Deliverables –** Efficiencies and improved timeliness of clinical and billing documentation.

5. **DSRIP Use -** DSRIP funds in the amount of $45,100 will be used to purchase these laptops and signature pads.

6. **Resources –** IT Consultant and Facilities Manager

7. **Funds Allocation**

   - 10 laptops will be allocated to the Coastal CSA program ($7,500) and 18 will be allocated to the Plymouth CSA program ($13,500). Additionally, $200 per computer for IT set up is included in the allocation. ($5,600)

- 10 signature pads will be allocated to the Coastal CSA program ($1,000) and 10 will be allocated to the Plymouth CSA program ($1,000).

- **Funds allocation described above represents only Preparation Budget Period.**

8. Measurement
Goal: To ensure staff has equipment to complete required documentation in the field.

a) Specific Measures to Evaluate Impact

i) Staff satisfaction
ii) Signed Care Plans that are completed within required guidelines
iii) Better utilization of the EHR

b) Timeframe for evaluating performance

i) End of Budget Period 1 - 12/31/18

c) Proposed Goals for Measure

i) 75% of staff will be utilizing laptops and signature pads.
ii) 60% of Care Plan will be signed electronically.

d) Data Collection

i) Staff Satisfaction Surveys
ii) Generate reports from EHR.

e) Staff Responsible for Evaluation

i) VP, Human Resources – Julie Chirillo
ii) CSA Program Directors

B. Project #3 Project Team Description

1. Organizational Chart –See Attachment.

2. Current Staff - See Job Description Attachments - Jerry Forde, IT Consultant; Diane MacIver, Facilities Manager.

3. Staff to Be Hired – None.

4. **Roles and Responsibilities -** IT Consultant will purchase laptops and signature pads. The IT Consultant and the Facilities Manager will oversee set up and deployment.

5. **Project Management –** See above.

C. Project #3 Implementation Plan and Timeline

See Attachment 1- BSCS Project Implementation Timeline

A. Project #4 Description

1. **Project Title – Wraparound Credentialing**

2. **Goal -** To develop a comprehensive and sustainable employee training program that strengthens fidelity to the Wraparound Process and improves family outcomes by building employee care planning, care management, and care coordination skills.

3. **Scope –** We have identified Workforce Development as a crucial area for enhancement and will create a comprehensive and sustainable employee training program. In an effort to strengthen fidelity to Wraparound processes, BSCS seeks to enhance training and certification of High Fidelity Wraparound for staff. BSCS will partner with BAMSI to create a Video Library that depicts examples of wraparound practice, done according the standards of High Fidelity Wraparound. The videos will demonstrate the wraparound experience of a fictional family with complex behavioral health needs as they navigate the core meetings of the wraparound process. Additionally, BSCS will purchase textbooks and videos from Vroon Vandenberg. The training textbooks include detailed descriptions of how to deliver a high fidelity wraparound process as defined by Vroon Vandenberg Action Steps and Theory of Change. Additionally, BSCS is hiring a consultant to train and certify 10 staff as Wraparound Facilitators and 2 staff as Certified Coaches during the Prep period. Over the course of the project, BSCS will send 3 additional staff to the Redrock training and will secure more hours of coaching consultation. Credentialing staff as coaches allows the CSAs to build a sustainable High Fidelity Wraparound program. These initiatives seek to improve workforce development specifically in training, professional development and staff retention, with an emphasis on best practices to meet ICC enrolled members needs.

4. **Deliverables –** Purchase of training materials including Wraparound Textbooks and Vroon's Training DVDs, production of a complete set of 12 Videos to be used for training and certification. Employees will complete credentialing in Wraparound Certification (minimally Tier One) within 3 months of employment; BSCS will have several Certified Wraparound Coaches on staff, so training and certification of facilitators continues. Ongoing Wraparound training will be integrated into all aspects of supervision to meet the ongoing requirements of the MCEs.

5. **DSRIP Use –**Payment to Silver Lake Productions for creating Videos; Payment to Wraparound Coach consultant to certify staff and Coaches; Purchase of Textbooks and Training DVDs; and the cost of sending staff to the Redrock Training.

6. **Resources –** BSCS will allocate existing staff to this project**.** Additionally, laptops, computers, cell phones and Internet to access any online/video modules will also be provided. Training opportunities can be set up across both CSAs to improve the delivery of services and continuity across the organization.

7. **Funds Allocation –** The total cost of $34,777 will be covered with DSRIP funds and will be evenly distributed between the Plymouth and Coastal CSA programs. .

8. **Measurement**
   Goal: Strengthen fidelity to wraparound process.

a) Specific Measures to Evaluate Impact

   i) WFI-EZ Score
   ii) TOMS Score

b) Timeframe

   i) End of Budget Period 2 - 12/31/19

c) Proposed Goals for Measure

   i) WFI-EZ i Score to be at least at national mean level.
   ii) TOMS Score to be at least at national mean level.

d) Data Collection

   i) **WFI-EZ** and TOMS scores will be made available to us through the Wraparound Provider Practice Analysis Report.

e) Staff Responsible for Evaluation

   i) VP Children's Services - Theresa Burke

B. Project #4 Project Team Description

1. **Organizational Chart –**See Attachment.

2. **Current Staff -** See Job Description Attachments – Theresa Burke, VP Children's Services; Imani Seunarine, Plymouth Site Director; 2 CSA Program Directors; 2 Senior Family Partners.

3. **Staff to Be Hired –** None.

4. **Roles and Responsibilities –** VP Children's Services will support oversight of the project. Plymouth Site Director will support the implementation of the project. CSA Program Directors will support staff across sites signing up and completing required training. Program Supervisors will become Certified Wraparound Coaches.

5. **Project Management –** Weekly conference calls to discuss oversight and progress of project components until fully operationalized. Monthly meetings to discuss implementation, and quarterly meetings to ensure that measures are being met and goals are achieved.

C. Project #4 Implementation Plan and Timeline

.
See Attachment 1- BSCS Project Implementation Timeline

E. Project #4 Sustainability – Program Supervisors who are Coach Certified will work with the CSA Program Directors to ensure that all staff is Tier 1 certified. BSCS has the goal of having at least 3 Certified Wraparound Coaches across the sites. This will allow for more staff to be certified across sites.

A. Project #5 Description

1. **Project Title – Medical and Behavioral Health Integration Training**

2. **Goal -** Improve medical understanding for staff working with children who are experiencing SED and have complex medical issues, thus, improving the collaboration with pediatric practices, increasing referral streams, and ultimately improving outcomes for families.

3. **Scope –** BSCS proposes partnering with UMASS Center for Integrated Primary Care to train staff across a number of modules to strengthen practice specifically in the areas listed below:

   - Behavioral Health in Primary Care of Children
   - Practicing as Behavioral Health Clinician in Pediatric Care and Challenging Populations
   - Creating and Managing an Integrated Primary Care Practice
   - Bio-Psycho-Social Treatment
   - Dealing with Substances and Pain in Primary Care
   - Behavioral Health and Pediatrics
   - Serious Mental Illness
   - Population Health in Primary Care

- Families, Community, Culture

4. **Deliverables –** Training in these areas culminates in a Certificate in Primary Care Behavioral Health for participants. Improved workforce development and improved timely access to services. http://www.umassmed.edu/cipc/pcbh/overview/

5. **DSRIP Use –** DSRIP funds in the amount of $14,400 will be used in the Prep Period and Budget Periods 1,3,4 and-5 to support Workforce Development in the area of Medical and Behavioral Health Integration. See Budget Narrative for detail.

6. **Resources –** Computers and telephones to allow for staff participation; relationships with pediatric practices/hospitals that can be leveraged to increase referral streams to help offset total costs. Supervisors will participate in training modules to support the development of further training for sustainability for all staff.

7. **Funds Allocation –** During the Prep Period the training costs for 10 participants ($800 per person) will be allocated as follows: Coastal CSA - 5 participants, Plymouth CSA - 5 participants.. See Budget Narrative for calculation. During Budget Periods1,3,4, and 5, an additional $1,600 per Budget Period will cover training for 8 additional participants . This amount will be evenly distributed between the Plymouth and Coastal CSA programs.

8. **Measurement**
   Goal: Increase staff's understanding of complex medical issues for enrolled youth.

a) Specific Measures to Evaluate Impact

   i) Number of staff that obtain Training and Primary Care Behavioral Health Certificate from U-Mass Program.

b) Timeframe

   i) End of Preparation Budget Period - 5/31/18
   ii) End of Budget Periods 1, 3, 4, and 5

c) Proposed Goals for Measure

   i) 80% of training attendees obtains certification.

d) Data Collection

   i) Upon completion of coursework, staff will submit verification of passing score.

e) Staff Responsible for Evaluation

   i) CSA Program Directors

B. Project #5 Project Team Description

1. **Organizational Chart –** See Attachment.

2. **Current Staff -** See Job Description Attachments – Theresa Burke, VP Children's Services; Imani Seunarine, Plymouth Site Director; CSA Program Directors

3. **Staff to Be Hired –** None.

4. **Roles and Responsibilities –** VP Children's Services will support oversight of the project. Plymouth Site Director will support the implementation of the project. CSA Program Directors will support staff across sites signing up and completing required training. Adapt curriculum so that best practices are shared among all staff regardless of certification. Staff who are participating will complete the modules during the prescribed timeframe and receive certificate.

5. **Project Management –** Weekly conference calls to discuss oversight and progress until fully operationalized. Monthly meetings to discuss implementation, and quarterly meetings to ensure that measures are being met effectively and goals are achieved.

C. Project #5 Implementation Plan and Timeline

.
See Attachment 1- BSCS Project Implementation Timeline

E. Project #5 Sustainability - Information gained from the certification shared with all staff to ensure best practices.

A. Project #6 Description

1. **Project Title – Reflective Supervision Training**

2. **Goal –** Improve the quality of supervision provided to CSA staff resulting in increased staff retention, improved fidelity to the Wraparound model, and better outcomes for families.

3. **Scope –** BSCS and BAMSI will hire a consultant to train program managers and supervisors in Reflective Supervision. Reflective Supervision is a relationship-based practice that expands the idea that supervision is a context for learning and professional development. Through its model of collaboration with and support of clinicians and other providers, Reflective Supervision strengthens the practice of trauma-informed care. Training our CSA Program Managers and Supervisors in the Reflective Supervision model will help to improve staff job satisfaction, improve staff retention, and improve outcomes for families being served by the CSAs.

4. **Deliverables –** One program manager, 2 Program Directors, and 4 program supervisors will be trained in Reflective Supervision during the Prep Period. BSCS staff will report increased job satisfaction and staff turnover rates will improve.

5. **DSRIP Use –** DSRIP funds in the amount of $3,350 will be used during the Prep Period to pay for ½ of the training costs. See Budget Narrative for detail.

6. **Resources –** BSCS will provide existing CSA staff to project team

7. **Funds Allocation –** During the Prep Period, BSCS' program manager, 2 Program Directors, and 4 program supervisors will be trained in Reflective Supervision. The cost will be split between the Coastal and Plymouth CSAs.

8. **Measurement**

Goal: To improve quality of supervision.

a) Specific Measures to Evaluate Impact

   i) Satisfaction of supervisors and supervisees with respect to supervision.
   ii) Staff retention.

b) Timeframe

   i) End of Budget Period 1 - 12/31/18

c) Proposed Goals for Measure

   i) Increase satisfaction with respect to supervision.
   ii) Fifty percent of staff who participate in reflective supervision will be employed for 1 year post.

d) Data Collection

   i) Survey of supervisors and supervisees.
   ii) Staff retention rates.

e) Staff Responsible for Evaluation

   i) VP, Human Resources – Julie Chirillo

B. Project #6 Project Team Description

1. **Organizational Chart –**See Attachment.

2. **Current Staff -** See Job Description Attachments – Theresa Burke, VP Children's Services; Imani Seunarine, Plymouth Site Director; CSA Program Directors

3. **Staff to Be Hired –** None.

4. **Roles and Responsibilities –** VP Children's Services will support oversight of the project. Plymouth Site Director will support the implementation of the project and participate in the training. CSA Program Directors and supervisors will participate in the training and implement the Reflective Supervision Model in the CSA Programs.

5. **Project Management –** Weekly conference calls to discuss oversight and progress until fully operationalized. Monthly meetings to discuss implementation, and quarterly meetings to ensure that measures are being met effectively and goals are achieved.

C. Project #6 Implementation Plan and Timeline

.
See Attachment 1- BSCS Project Implementation Timeline

E. Project #6 Sustainability - Information gained from the training will be shared and incorporated into training new supervisors and shared with all staff to ensure best practices.

A. Project #7 Description

1. **Project Title – Recruitment and Retention Specialist**

2. **Goal –** The goal of this project is to ensure that the BSCS' CSA's employ well trained, diverse and committed staff who have the support and guidance to realize longevity and success in their positions. This project includes funding a Recruitment and Retention Specialist and expenses related to the specialized recruitment needs of the CSA's.

3. **Scope –** BSCS will allocate key staff to coordinate with and support the CSA Recruitment and Retention Specialist in order to create and implement a comprehensive recruitment and staffing plan. This plan will reach out to qualified candidates who reflect the cultures and diversity of the communities that we serve, thus allowing BSCS to increase the number of staff available and thereby increase timely access to CSA services for families. The position will be responsible for posting positions, screening candidates, assisting in orientation and providing ongoing support to CSA staff. This individual will be tasked with increasing the number of staff employed at the CSAs, decreasing the staff turnover rate resulting in timely access to CSA services for families. In addition, the Specialist will be charged with developing and implementing a retention strategic plan in collaboration with the CSA program management and senior level staff.

4. **Deliverables –** Increased number of CSA staff, resulting in a greater number of families served and timely access to care.

5. **DSRIP Use –** Payment of a Recruitment Specialist as follows:

Budget Period	**FTE**	**Amount**
Prep BP	.75 (30 hours)	$16,275
BP 1	.75 (30 hours)	$20,212
BP 2	.75 (30 hours)	$34,650
BP 3	.5 (20 hours)	$23,100
BP 4	.5 (20 hours)	$23,100
	Total	**$117,337**

Additionally, $2,285 will be used for recruiting expenses comprised of $800 for brochures , $1,200 for Linked In Job Posting and $285 for 1 month of job posting on Monster.com.

6. **Resources –** BSCS will commit support to this position from the Human Resources Department specifically the Vice President of Human Resources as well as the CSA and Human Resources teams.

7. **Funds Allocation –** The cost of the Recruitment Specialist will be covered by DSRIP funding through Budget Period 4 and will be evenly distributed between the Plymouth and Coastal CSA programs. See Budget Narrative for detailed information.

8. **Measurement**
Goal: To obtain full staffing levels and reduce staff turnover.

a) Specific Measures to Evaluate Impact

i) Compare actual FTE's to budgeted FTE's.
ii) Staff turnover rates.

b) Timeframe

i) End of Budget Period 2 - 12/31/19
ii) End of Budget Period 4 - 12/31/21

c) Proposed Goals for Measure

i) 90% of budgeted FTE's achieved.
ii) CSA turnover will be less than 25%.

d) Data Collection

i) Staff Vacancy Reports
ii) Staff Turnover Reports

e) Staff Responsible for Evaluation

i) CFO - Marta Reese
ii) VP Human Resources - Julie Chirillo
iii) VP Children's Services – Theresa Burke

B. Project #7 Project Team Description

1. **Organizational Chart –** See Attachment.

2. **Current Staff -** See Job Description Attachments – Julie Chirillo, VP Human Resources; Imani Seunarine, Plymouth Site Director; Janet Daly and Joseph Weeks, CSA Program Directors

3. **Staff to Be Hired –** CSA Recruitment and Retention Specialist

4. **Roles and Responsibilities –** VP Human Resources: Recruit and hire candidate for proposed new position. Provide oversight and job related support to the CSA Recruitment and Retention Specialist throughout the duration of the project. Plymouth Site Director: Coordinate internal resources to effectively implement the project. Facilitate project team meetings and provide monthly written status report to the Senior Management. CSA Program Directors: Participate in project team meetings. Implement recruiting, hiring, and retention plan as outlined in the project plan. CSA Recruitment and Retention Specialist: Coordinate all aspects of the CSAs' Recruiting and Retention activities. Work closely with project team to implement and assess progress.

5. **Project Management –** During Preparation and Budget Period 1, the project team will hold weekly meetings to discuss the project plan and provide updates and report progress toward goals. During Budget Periods 2-3, the project team will meet monthly to discuss progress, track goals, and troubleshoot any barriers to project implementation. During Preparation and Budget Periods 1-3, the project team will generate written reports outlining progress toward goals that will be shared with BSCS' Senior Management.

C. Project #7 Implementation Plan and Timeline

See Attachment 1- BSCS Project Implementation Timeline

E. Project #7 Sustainability - In Budget Period 3 and 4, the Human Resources Department will absorb 10 hours of the CSA Recruitment and Retention Specialist's cost. In Budget Period 5

and forward, the position will be fully integrated into the Human Resources Department ensuring that the recruitment and retention strategies developed and implemented for this project will continue to be a focus of our Human Resources Department.

A. Project #8 Description

1. Project Title – Outreach to Primary Care and Community Providers

2. **Goal -** Increase access to hi-fidelity Wraparound services across catchment areas and increase understanding and education of the benefits of Community Service Agency services to primary care and community providers.

3. **Scope –** In an effort to increase access to Wraparound services, BSCS seeks to use DSRIP funding to enhance understanding, education, and referrals from Primary Care Practices and other Community providers. BSCS will leverage existing relationships with pediatric practices and hospitals across its catchment areas and provide education and marketing to Primary Care Practices and other community providers. As relationships are established, the CSAs will use the Senior Care Coordinators and an identified tenured staff will serve as weekly points of contact for Primary Care Practices to support ease of access for referrals, will share in education/marketing with the Program Director and deploy staff Certified Primary Care Behavioral Health to support families identified. Additionally, BSCS will use an E-referral system (as proposed in Section 6.5) to allow for referrals to be sent over securely and in a timely fashion.

4. **Deliverables –** CSA Program Directors will map out primary care practices in their catchment areas and begin marketing/education campaign about available services to foster strong integration with ACOs and Primary Care Providers. Sr. Care Coordinators and identified tenured staff will provide weekly on-site, telephonic, and electronic consultation and outreach to Community Providers and Primary Care Providers totaling 15 hours per site during the prep budget period and then 8 hours weekly during year 1. Additionally, increased enrollment, and improved and timely access to ICC services will occur.

5. **DSRIP Use –** Salaries for two Senior Care Coordinators and two ICC staff in the amount of $41,152 who will outreach to PCPs and other community providers in an effort to increase access and enrollment, provide education and communication and capture quality measurements from the prep budget period through Year 2.

6. **Resources –** Laptops, computers, cell phones and Internet to access any online/video modules. Use non-producing supervisors for training and curriculum development. Training opportunities can be set up across both CSAs to improve the delivery of services and continuity across the organization.

7. **Funds Allocation –** DSRIP funds in the amount of $41,152 will be used to cover the

salaries during the Prep Period and Years 1and 2 as the Senior Care Coordinators and Staff in each CSA outreach weekly to PCPs and other community providers. Each site will dedicate a total of 15 hours during the prep period and 13 hours in Year 1. Ten hours in total have been allocated in Year 2 for 2 ICC staff to maintain relationships. For detailed calculation see Budget Narrative.

8. Measurement
Goal: To increase referrals from PCP's and other Community Providers.

a) Specific Measures to Evaluate Impact

i) Number of enrolled families.

b) Timeframe

i) End of Budget Period 2 - 12/31/19

c) Proposed Goals for Measure

i) To achieve and/or surpass minimum expectation of 75 enrolled families.

d) Data Collection

i) Claims data showing average number of families served from 1/1/19 to 12/31/19.

e) Staff Responsible for Evaluation

i) CFO - Marta Reese
ii) Third Party Billing Manager – Jennifer Hoffman
iii) CSA Program Directors
iv) VP Children's Services – Theresa Burke

B. Project #8 Project Team Description

1. Organizational Chart –See Attachment.

2. Current Staff - See Job Description Attachments – Theresa Burke, VP Children's Services; Imani Seunarine, Plymouth Site Director; Janet Daly and Joseph Weeks, CSA Program Directors; Deanna McCaffery and Joy Lochelt, Senior Care Coordinators, 2 tenured staff (one from each site respectively)

3. Staff to Be Hired – None.

4. Roles and Responsibilities – VP Children's Services & Plymouth Site Director will provide project oversight. CSA Program Directors will complete a community needs

assessment and liaison for the entire catchment area. Senior Care Coordinators will liaison with pediatric practices and community providers and assign staff to referrals. Staff will support weekly consultation and outreach efforts with Senior Care Coordinators, and begin process of enrollment with families.

5. **Project Management –** Weekly conference calls to discuss oversight and progress until fully operationalized. Monthly meetings to discuss implementation, and quarterly meetings to ensure that measures are being met effectively and goals are achieved.

C. Project #8 Implementation Plan and Timeline

See Attachment 1- BSCS Project Implementation Timeline

E. Project #8 Sustainability - BSCS will lower productivity requirements for supervisors and staff who dedicate time to cultivating relationships that support this initiative. CSA Program Directors will meet with ongoing community members and PCPs to ensure that relationships are strengthened.

6.5 COORDINATION WITH ACOs, MCOs AND PRIMARY CARE PROVIDERS

A. Bidirectional Communication between Bidder and Pediatric Practice – Timely, efficient and authorized communication is critical to achieve best practices in care coordination with ACOs, MCOs and PCPs. Our goal is to develop a bidirectional communication process with all of our referral sources to ensure real time communication. This will be accomplished through the implementation of an email feature that will allow acceptance of E-referrals, enhancement of our EHR and providing on site Care Coordinators.

Our first initiative will be to convert to Microsoft Office 365, which will enable us to send more secure emails and will allow recipients the ability to send documents through a secure upload feature. This secure platform will reduce the back and forth communications and allow for a safe and secure way to send and receive E-referrals for the youth and families.

The second manner in which we will improve bidirectional communication is through our EHR enhancement project. BSCS has been working with eHana in relation to the Behavioral Health-Community Partners (BH-CP) initiative to address the needs of care coordination. The EHR plan for this project will be enhancements of the current documentation to Wraparound-friendly documentation that can be readily shared with all authorized members of the team, as designated by the family. Sharing this information in strength based Wraparound language will support and enhance fidelity to the model.

The final strategy to improve bidirectional communication is to place Senior Care Coordinators in Pediatric Practices. Having a Senior Care Coordinator available to consult with the practice, family, MCOs and ACOs will allow for timely and responsive communication as well as any needed follow up. Being on site will afford the Senior Care Coordinator the visibility and immediate access, once authorized, to critical information needed to support the youth and family. We believe that this "warm hand-off" will increase the PCP understanding and confidence in the ICC service. In addition, the Senior Care Coordinator, as part of the PCP team will be available to respond to potential changes in the youth and family that may be presented to the PCP.

B. Referral Management Protocol for Follow Up and Information Sharing – The implementation of the Office 365 secure E-referral platform described above, will provide the ability to securely communicate and will directly address and improve the security and timeliness of referrals and information sharing with the ACOs, MCOs and PCPs. Once the referral has been received by BSCS, the referral source will receive information on who will be meeting with the family and the contact information for the family's team. During the intake meeting, the CSA staff will obtain a release of information from the family. Based on who the family would like to have access to their care plan, the Care Coordinator will develop a team list consistent with the family's request to ensure follow up and information sharing. The secure email platform will have the capacity to inform the referral source of the family's identified needs and will communicate follow up and plans for developing a care plan.

C. Team Based Treatment Planning – We greatly appreciate the many tasks that the Pediatric Practices accomplish every day to support the well being of their patients. In order to improve

treatment planning collaboration, a Senior Care Coordinator who has been trained in the U-Mass Behavioral Health Integration Training, will be placed on site at the larger Pediatric Practices. Once a Senior Care Coordinator has completed the training, they will be assigned as the liaison to an identified Pediatric Practice. The Senior Care Coordinator will be available to assist the practitioners with behavioral health assessments, consult with practitioners and meet with the family if requested. In placing Senior Care Coordinators in Pediatric Practices, we are confident that we will experience a significant improvement in treatment planning and collaboration with the youth's pediatrician. In speaking to Pediatric Practices, they are very invested in having the Senior Care Coordinator be part of their team so that we are all working together to address the youth's and family's needs.

For those practices that are not able to support a Senior Care Coordinator at their site, the implementation of the email platform that can accept E-referrals will allow for the practitioners to have easy access to the care planning process and will allow for input and recommendations. With the addition of secure email, our CSA staff will be able to send information such as care plans electronically to the PCP in order to elicit meaningful participation from the PCP.

D. Timely Access – We firmly believe that the ability to accept E-referrals will greatly enhance our ability to provide ICC services on a more timely basis. For Program Directors or his or her designee to have referrals electronically, this allows for immediate review and assignment through our e-Hana EHR. As part of this funding we have requested additional laptops and signature pads. Both of these resources will support our ability to respond to and schedule appointments from out of the office.

As previously highlighted, hiring and maintaining our workforce has been our biggest challenge in ensuring timely access to services. As part of this RFR process, we used the SAMSHA workforce development website to identify best practices and innovative strategies. SAMSHA identifies several factors as key components to recruiting and retaining staff including: positive work environments, job satisfaction, professional development, decision making process, manageable workloads and reasonable expectations.

Based on this information, we plan to hire a dedicated Recruiting and Retention Specialist who will refine the agency's Human Resources recruitment and retention strategy. We believe this will enable us to not only recruit, but to maintain quality staff. Professional development and growth is imperative to job satisfaction. Experience and research has clearly demonstrated that when staff has training and certification opportunities, they are more committed and less inclined to leave for other opportunities.

We will offer current staff the opportunity to become certified in Behavioral Health Integration. This will not only increase staff credentials, but will also afford them the ability to increase their responsibility including becoming team members and liaisons to Primary Care Practices. The next step for staff will be certification in Wraparound. For staff who have made a commitment to the service and agency, we will support them in completing this certification. These strategies are designed to maintain and support quality and committed staff.

E. Connections – The BSCS CSAs are fully committed to understanding and responding to the youth and families' experiences related to social determinants of health, including but not limited to: affordable housing, access to education, public safety, and fulfillment of basic needs, as well as availability to emergency services. We recognize that we must have a strong connection to our community to ensure that we have the most up to date information and resources available to our youth and families.

A core component of the CSA staff is to identify natural and community resources that best fit the needs of their family. The CSA team will work with the family to identify supports that have previously been successful and discuss with the family their desire to return or to find new supports. An important lesson that we have learned is that too many resources/referrals can be overwhelming and counterproductive. Careful selection of resources with the youth, family and team will improve connections to social services. In addition, as part of the CSA team we will identify team members that can assist in a warm hand-off.

Our training projects including, Behavioral Health Integration, Certification in Wraparound, Collaborative Training Project and the training resources to be used with our System of Care (SOC), all support increasing the fund of knowledge regarding social services and available resources throughout our communities. We believe by inviting experts to present at the SOC in the topic areas identified by our members, there will be increased participation and commitment to the SOC. Having multiple providers, social services and concerned community members attending the SOC will increase our ability to access and make connections to an array of social services.

In addition, the resources that we will be using to purchase additional laptops will enable us to immediately respond to a family's request for information related to resources. The signature pads will allow us to have a family sign a release which can be electronically submitted to a resource and a discussion can take place immediately.

CSA Budget Report

Behavioral Health Network, Inc. (BHN)

Investment Funding	Prep Budget Period	Budget Year 1	Budget Year 2	Budget Year 3	Budget Year 4	Budget Year 5	Total Revenues
Number of CSA sites	3	N/A	N/A	N/A	N/A	N/A

Project 3 Name: Care Management Software and

DSRIP Project Goal(s):
1 *Strengthening fidelity to Wraparound Processes*
2 *Fostering Strong Integration with ACOs and primary Care Provicers*
3 *Optional*

IT Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Implementation Manager	$ 85,000.00	1	5	$ 35,417
				$ -
				$ -
				$ -
				$ -
				$ -
	Total Salary	1		$ 35,417
	Fringe rate	22.0%	Total Fringe	$ 7,792
			Total IT Staffing including Fringe	$ 43,208

For each position listed above, provide a brief statement of the position's responsibilities, and how each will assist in executing activities related to the project.

The implementation manager will oversee the initial implementation and interface of the care management software with current EMR software. The Implementation Manager will enhance current EHR functionality to prepare for data conversion. The Implementation Manager will train CSA staff in the functionalities of the care management software and create a training guide for both CSA staff and CSA supervisory staff. The care management software will allow CSA staff to be more efficient with tracking tasks for care planning and care coordination activities and track healthcare providers serving ICC-Engaged members. Reports generated by care management software will increase quality of service delivery.

Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
Total Development and Adaptation of EHR and Care Management System	$ -

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Technology for Service Delivery

Description of Expense	Cost
Care Management Software	$32,000.00
Total Technology for Service Delivery	$ 32,000.00

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Purchase of care management software to interface with current EMR software. Care Management software will provide the ability to run reports on utilization of services, monitor tasks and task completion, and track communication with ACOs and primary care providers. As a result of the software implementation, staff will spend less time on organizing tasks, managing workflows, and documenting cases in order to focus on quality, fidelity, direct care and relationship building with families. Funds from the prep budget period will be used to support the purchase and upkeep of the software during the implementation period through the duration of the project. Funds will also be used through the duration of the project for user licensing fees based on the numbers of end users.
BHN's EHR team and Care Management software team will develop a set of requirements for CSA use of the Care Management software by June 2018. Care Management Software will be installed on each laptop for CSA staff by the end of Budget year 1 and CSA staff will be trained on the use of the software by an IT representative after the software is installed on the laptops. CSA staff and show that they are able to complete the basic tasks with a live demonstration of the skills to their trainer. The system will provide task management functionality, referral management, ability to send information from other sources, and integrate ICC care plan with other care plans. Supervisors will be able to offer clinical support to identify recommendations for care. A care management system will be sought that has client engagement options such a client portal to look up their notes and needs and reminders for upcoming appointments. The software will have reporting functionality and will be evaluated for the ability to gather more comprehensive data on youth goals by having a way to input data from the scaling measures used on the pilot ICP. It will record and remind Care Coordinators of upcoming appointments and be able to run reports on youth/caregiver utilization of ICC services. A decrease in the average length of stay in ICC services is expected if task management and coordination efforts are tracked by the software since CCs will see the intensity of the care coordination efforts they are delivering. This decrease will be evidenced in the CSA state workbooks. Staff will also report increased ease in tracking the collateral contacts required.
Just under 2/3 of the project cost will be supported by BHN BH CP DSRIP funds, just under 1/3 by CCA One Care, and a small amount as noted above in the preparation budget period by CSA DSRIP infrastructure funding.

Other Technology Expenses

Total Development and Adaptation of EHR and Care Management System	$ -

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Technology for Service Delivery

Description of Expense	Cost
Web-based computer/screen setup	$ 2,510.00
Labor to mount tv's to wall	$ 570.00
Total Technology for Service Delivery	$ 3,080.00

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Television, computer and web-cam will be purchased for $2,510 in the Prep Budget Period to provide Ware and Westfield CSA sites with technology needed to do training series as a group. Quote provided by vendor that has equipped other BHN sites with this technology.

Two (2) 50" smart TV's with mounting brackets, two (2) Logitech HD Brio webcams with HD extender, two (2) OptiPlex 3050 mini computers with wireless keyboard and mouse, (2)HD cables = $2510

Labor = $285 x 2 sites = $570.00

For each position listed above, provide a brief statement of the position's responsibilities, how each will assist in accomplishing the goals of the project:

The Systems Analyst will assess the current referral system starting at Central Intake point of entry to determine gaps and needs for youth referred for behavioral health care. The Systems Analyst will look at level of triage for the youth referred (e.g., behavioral health needs, ACOs, primary care providers and other behavioral health services being requested) and make recommendations for a streamlined referral system to improve access to care.

The Program Director of Intensive Care Coordination will oversee CSA implementation activities and guide the efforts of the Systems Analyst and Training Consultant.

Section 6.2 Executive Summary

Sub-Section 6.2 A

Behavioral Health Network offers CSA services in the Springfield, Robert Van Wart, and Holyoke Service Areas. Our response includes five projects. Each will be implemented in and support all three BHN CSA programs equally. These projects include: 1. Web-based on-boarding and training development 2. Referral and triage workflow consultation and improvement 3. Care management software purchase and implementation
4. Purchase and deployment of laptops for staff.

BHN's Holyoke CSA Development Plan has four goals:

Goal 1. *Training curriculum will be informed by the Wraparound Provider Practice Analysis (WPPA) and seek to continue to build natural supports, community based supports and outcomes based skills:* BHN's 2016 WPPA report showed improvement in 2015 target indicators relevant to decision making and natural supports. During supervision, managers assess fidelity and make recommendations for improvement. They also review Individual Care Plans (ICPs) to measure and evaluate supports and services provided, assess for regularity, and monitor for improvement as needed. Live observations and live coaching of care plan team meetings are completed by supervisors to assess fidelity. Family partners and care coordinators are trained in the use of eco mapping, and social network mapping to help identify clients' natural and community supports.

Goal 2. *Decrease wait time to access ICC services:* BHN is addressing this goal by working to increase the number of qualified staff serving families. Recruiting efforts include job fairs and updated job postings reflective of input from industry experts on best practices in hiring. These efforts have resulted in more qualified applicants. Comprehensive waitlist management efforts include program director reviewing all referrals that come in to the program, follow up calls to the referral sources and/or parent when medical necessity seems unlikely to discuss alternate service options. Supervisors review team progress, medical necessity criteria to monitor the level of care needed, and assessment of transition indicators.

Goal 3. *Enrollment greater than 75:* This goal has been completed through successful hiring of trained staff to serve more families. It took the program greater than one year to hire a qualified supervisor. Inadequate supervisory capacity limits capacity to increase direct care coordinator staffing. We have an ongoing need for better trained staff and greater efficiency serving families. If efficiency can be increased further, greater numbers of youth can be served by the same number staff.

Goal 4. *Increase Child Adolescent Needs and Strengths (CANS) compliance above 80% for initial CANS completed:* This goal will be removed from the plan as it has been met via thorough review of all CANS assessments that were completed but not recorded. Staff received additional reviews and trainings in documentation procedures and completion rates increased to 100%.

BHN's Springfield and Robert Van Wart CSAs share two common goals:

Goal 1. *There will be no youth waiting over the target number of days for ICC and families will be offered an appointment within 3 calendar days of stating interest in ICC.* Current wait time has increased due to an increase in referrals from primary care practices and outpatient therapy. Hiring qualified staff, including bilingual staff, is an ongoing agency effort. Supervisors work with a specific administrative triage staff to determine level of need, call referral sources and/or caregiver to suggest alternative service options if indicated. Training and ongoing communications with BHN Medical Integration Clinicians and Outpatient Therapists about ICC level of care has shown improvements in appropriate referrals.

Goal 2. *A consulting psychiatrist will be determined for the CSA and able to consult as needed.* Goal is completed. BHN Medical Director is the consulting psychiatrist for ICC. The Medical Director in conjunction with other BHN child psychiatry team offer training on clinical presentations and psychotropic medications.

Sub-Section 6.2 B

Strengths: Our CSA programs maintain a strong network of referral sources, community linkages, and collaborations to help enrolled youth receive an array of specific services and supports to meet their care plans goals. Internally BHN is strong in internal collaboration. Youth medical needs are met via integrated primary care behavioral health (PCBH) programs managed by BHN at 11 primary care practices. BHN nurse care managers participate in Care Planning Team (CPT) meetings through BHN Connects! care management service. Our program also has direct access to the BHN One Care nurse, a valuable resource for families utilizing One Care care management services. Our CSA staff attend monthly Department of Public Health (Essential School Health Services) System of Care meetings in Holyoke, as do nurse care managers from Pediatric Associates of Hampden County, one of our PCBH sites. The Springfield CSA System of Care Meeting has representation of the Director of Nursing for the Springfield Public School Department.

Program strengths include two certified Vroon VanDenBerg (VVDB) ICC coaches and one certified VVDB family partner coach, who certify staff in the VVDB Tier One Manual. Long-tenured staff offer a wealth of skill, experience, and organizational memory related to our CSA program. BHN ICC and FS&T program directors have been working in the CSA since ICC services went statewide and have long experience implementing trainings for a large volume of staff with varying learning styles.

Needs: Our needs include expanding our training capacity for all staff; upgrading technology to track the frequency of contact with ICC team members and families, progress towards goals, and ongoing tasks and alerts to upcoming events for enrolled youth; gaining capacity to run reports on enrolled youth and all known providers treating the youth; upgrading to computers customized for running CM software; learning from pediatric medical expertise to support staff with increasing competencies around medical terminology and skill sets; improving our referral management processes and development of work flows for triaging referrals.

Sub-Section 6.2 C

Improving timely access to ICC Services: Over the next 5 years, our DSRIP supported programs will improve timely access to ICC Services. Our innovative ideas for meeting this need include:

1. Enhancing recruitment and retention efforts by offering a wide array of trainings, supervision, technology and supports to new hires and stable employees. Better recruitment and longer retention results in high levels and quality of service provision, and in better access to services. The proposed projects will enable BHN to be the employer of choice in the Western MA CSA world. We will attract and retain the best qualified candidates who will make their work home at BHN, fully equipped and supported to provide the best quality CSA services in the area.
2. Enhancing program efficiencies by making referral and triage workflow improvements. We will develop a uniform process for managing referrals across all three CSAs with scripts for administrative staff triaging calls and flow charts for different levels of service offerings. Scripts will clearly outline medical necessity criteria for ICC services from enrollment to transition as well as clearly define care coordination service components for families.
3. Program directors and supervisors reviewing all referrals on a weekly basis and as requested by administrative staff. A care management system and efficient intake and triage systems will

aid in workflows and task management across the board. A consultant will be hired to assess current flow of referrals from point of entry to assignment and make recommendations for improvement.

Sub-Section 6.2 D

Improving care coordination, care planning, and care management: Care management software will be utilized for functionality related to task management and progress towards goals. Coordination with medical teams will improve with training in common medical conditions and terminology, and PCP consultation on best practices for working with medical providers. During clinical assessment, care coordinators will ask ICC team members scripted questions to control quality of information requests. Questions will support the collection of comprehensive information about enrolled youth to determine how to best address their needs and gaps in service delivery. Supervisors will use scoring tools to measure quality of Comprehensive Assessments and ICPs for consistency across CSAs and for measuring learning/reinforcement needs of the care coordinators.

Sub-Section 6.2 E

Improve performance on quality scores and Development Plan goals: BHN CSAs have piloted a Likert measurement scale of the ICP to better assess progress towards vision, goals and use of natural supports in the care planning process. We anticipate embedding this measurement tool into the care management software, enabling us to ensure consistent utilization of the tool for each ICP developed across all programs. This measurement work will continue to improve fidelity to the wraparound model, help staff review use of natural and community supports at every Care Planning Team meeting, and concretely measure progress of enrolled youth. Web-based training will improve on-boarding and ongoing learning of staff across sites and accommodate their time and pace of learning. Supervisors will have more time to supervise the fidelity to Wraparound through documentation review and live coaching. BHN will evaluate care management software functionality for capacity to populate ongoing tasks, send reminders, and monitor the intensity and duration of service delivery. A consultant will assess our current referral management system to help us clarify areas of need and create protocols and scripts to improve the process of getting youth referred to the appropriate level of care.

Sub-Section 6.2 F

Improving coordination: BHN has longstanding relationships with the majority of pediatric practices in the area. Nurse care managers are integral parts of youth team meetings and partner with BHN staff and families to help address needs and brainstorm service options. This similarity of notions, concepts, and definitions will improve the delineation of unified goals for youth. We intend to partner directly with an increasing number of area providers and assign ICC teams of staff to the youth seen in pediatric primary care practices. This will increase integration and collaboration and result in better outcomes for behavioral and physical health of youth.

Section 6.3 Populations Served and Community Engagement

Sub-Section 6.3 A

Describe member populations and communities

BHN holds three CSA contracts for Springfield, Robert VanWart and Holyoke/Westfield. We serve Agawam, Belchertown, Blandford, Chester, Chicopee, East Longmeadow, Feeding Hills, Granby, Granville, Hampden, Holyoke, Huntington, Ludlow, Longmeadow, Monson, Montgomery, Palmer, Russell, Southampton, South Hadley, Southwick, Springfield, Tolland, Ware, Westfield, and West Springfield. We have offices in Springfield, Westfield, and Ware to enable staff to remain close to the community in which they are assigned. The towns BHN serves are demographically and geographically diverse, and many families experience health inequities. Springfield is the largest CSA BHN serves. Of the 153,060 people living in Springfield, 52% are white, 22 % Black, Latinos of any race make up 39% of the population and 30% live below the FPL. Thirty-nine percent of residents speak a language other than English at home, primarily Spanish. Springfield is a designated health professional shortage area in Mental Health or Primary Care. Asthma rates in Springfield Public Schools are 20% (or 5754), and 41% of students are overweight or obese. BHN enrolled youth and families disproportionately experience health inequities. ICC staff work with area social service providers, state agencies, and medical providers to address unmet family needs.

Ware is part of the VanWart CSA. Of the 9,844 people living in Ware, 51% are female and 49% male. Ware is largely white (96.49%) with .55% Black or African American and 2.08% identified as Latino or Hispanic and 54% of the population is under 45. The median household income $36,870 with 11% living below FPL. Childhood obesity is a significant health challenge in Ware as well, given that 41% of students are overweight or obese. Public transportation is not available in rural Ware. Downtown Ware is designated “slum and blight”, a “food desert” and had the highest rate of death by opiate overdose per capita in 2015 in MA.

Holyoke CSA covers a diverse region of urban (Holyoke), suburban (Westfield) and rural (Huntington, Chester, Granville, Worthington, and Blandford) areas. CSA services are vital to Holyoke residents, a designated health professional shortage area in Mental Health and Primary Care. Lack of healthcare access negatively impacts children’s quality of life. Student asthma rates in Holyoke Public Schools are 23% (or 1,272). Of the 40,124 people living in Holyoke, 48% are White, 48% Hispanic, 3% Black and 1 % Asian. The median income is $36,608, 41% of residents live below the FPL, and 46.9 % of people speak a language other than English at home, primarily Spanish. In the Holyoke CSA, 40% of youth caregivers need services in Spanish, resulting in longer wait times for services resulting in extended length of service time. All enrolled youth need intensive community supports. They generally experience food insecurity, instable housing, inadequate education, poor community connections, English language limitations, or have witnessed/experienced violence. Many need afterschool programming to thrive. Thirty-seven percent of Holyoke students are overweight or obese. The majority of enrolled Holyoke families struggle to meet basic needs and often must decide between purchasing healthful food and paying the rent or utility bill.

Of the people 41,209 living in Westfield, 85% are White, 8% Hispanic, 2% Asian and 2% Black. Sixteen percent speak a language other than English. The refugee population is growing, bringing with it various languages and cultures. The median age is 38, median household income is $45,240, and 11% of the population live below FPL. The majority of enrolled families live at

or below FPL and struggle to meet basic needs. Twenty-four percent of youth are overweight or obese.

BHN will increase training around physical health care needs and engage a medical consultant to support better integration with pediatric practices in order to better promote health and wellbeing of enrolled youth. Partnerships with area pediatric practices and integration into the care planning process will result in better addressing youth medical needs in the ICP. Additionally, a consultant will assess the current flow of referrals from point of entry to assignment and make recommendations for improvement across all three CSAs. Care management software will improve task management and progress towards goals. This should enable youth to move through the wraparound process more effectively. Through these interventions, youth will spend less time waiting. They will begin receiving services that closely meet the intensity of their need, as reflected in the referral, resulting in timely intervention and relief.

Sub-Section 6.3 B

BHN CSAs have spent the last eight years building Systems of Care (SOC) Committees in each respective region to learn about system mandates or changes and to dismantle barriers to accessing resources and services. Through the SOC membership, relationships have been closely formed with the Department of Mental Health (DMH) and Department of Children and Families (DCF). Protocols and point persons are in place with both agencies for service referrals and resolutions to barriers. Both state agencies train ICC staff in their systems and ICC has trained DCF staff on CBHI levels of care. When care planning is not able to move along due to communication or access barriers, we reach out to higher level managers for support. BHN Springfield has close partnerships with the Springfield Public Schools with a special SOC meeting every other month, and with Gandara Center's specialty CSA in Springfield, wherein we discuss the educational and behavioral health needs of youth. BHN ICC has provided training on CBHI level of care to the school nurses in the Springfield Public School District and collaborates with the Director of School Nursing and the Director of Special Education. Holyoke CSA has a long standing relationship with the Westfield schools and has done trainings on CBHI services for the school adjustment counselors and SPED Team Leaders. Holyoke CSA works with Holyoke Public Schools on school driven initiatives to help integrate supports for students with behavioral health needs. The CSA is helping to bridge the gap between school and community for students. Additionally, Holyoke CSA participates on a task force driven by the Hilltown Community Health Center to integrate with other community providers in the rural locations of our service area. Holyoke Health Center is a PCBH site, providing continuity and integration for CSA youth who receive medical services there.

BHN has several large outpatient clinics in the CSA catchment areas as well as the CBHI services of In Home Therapy (IHT), In-Home Behavioral Services (IHBS), Therapeutic Mentoring (TM) and Mobile Crisis Intervention (MCI). All services utilize the same Electronic Health Record, so it is easy to identify which services youth receive throughout the agency. We communicate regularly and supervisors will pull together providers of the various services to resolve conflicts or barriers to team-based planning. Through SOC membership, relationships with external CBHI and outpatient services providers have helped us navigate barriers to serving the youth's care plan needs like referral processes, communication with staff, transitioning to IHT and outpatient levels of care coordination. For youth substance use, the Institute of Health and Recovery trains and consults with our staff on a regular basis.

BHN partners with parent advocacy leagues to offer a monthly support groups to caregivers in Ware, Belchertown, Palmer, Monson and Westfield. Caregivers use the group while receiving

ICC services and after transitioning from the program. They offer valuable feedback on the program. This peer support is vital to youth and family stability.

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Sub-Section 6.3 C

Through the use of web-based trainings and laptops we will increase access to educational materials and resources. The creation of a web-based training database will allow staff to access the material as needed. Through internal resource sharing, CBHI staff will have access to these trainings as well, resulting in higher quality child and youth services. Increased medical competencies from the training program will help clinicians better understand and address needs identified by school nurses and area pediatric practices. We will build on our partnerships with caregiver agencies, and through our caregiver support groups, we will provide health and wellbeing training topics addressing common need areas identified by the community. With timely completion of care management tasks and timely follow up with CBHI partners, we will be better able to respond to the changing needs of enrolled youth.

Monthly meetings with our CSA and PCBH practices will continue to improve referrals, triage, and access to ICC services. A consulting pediatric nurse from one of these practices will provide staff trainings related to developmental milestones and delays, juvenile diabetes, asthma, nutrition, obesity, and hygiene related issues. The nurse will develop protocols for the care coordinators on how to work effectively with pediatric offices and school nurses. Our partnership with the Department of Public Health, Essential School Health Services, supports consistent collaboration with school nurses.

Section 6.4 Proposed Projects and Investment Plan

BHN has 4projects that will target the goals of

Goal 1: Strong **integration** with ACO and Primary care providers for ICC engaged members
Goal 2: Strengthening **fidelity** to the Wraparound process
Goal 3: Improving timely **access** to ICC services for eligible youth and their families
Goal 4: **Quality** improvement

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Sub-Section 6.4 A Project 1

1. Name: ***WEB-BASED ON-BOARDING AND TRAINING DEVELOPMENT***
2. Goal 2: fidelity-Easy access web-based onboard and on-going professional development training includes trainings and refreshers in the Wraparound Model
   Goal 4: quality-High model fidelity creates greater quality program
   Goal 4: quality-Uniformity in service delivery

2. and 3. Activities and plans to meet goals: Currently, BHN on-board staff through two days of organizational orientation, overseen by our Professional Development and Human Resources Departments. New CSA staff are then provided with a battery of programmatic orientation by ICC management. High turn-over rates combine with a large amount of training materials to create near continuous on-boarding, consuming an unacceptably large amount of supervisor time. Supervisors spend inadequate time on job functions needed to make our program perform at the highest rates of quality and efficiency, such as attending to the processes for maintaining fidelity to Wraparound.

BHN will strengthen our workforce through improved on-boarding and on-going professional development trainings to staff. This will be achieved through the creation of a web-based training system. Specific training topics may include but are not limited to: systems of care principals and philosophy, The four phases of Wraparound and ten principals of Wraparound, family systems, peer support, partnering with parents/caregivers/guardians, psychotropic medications and their side effects, child and adolescent development, clinical and psychosocial needs, community resources, introduction to child-serving systems and processes, ICPs, safety plans, family driven crisis planning and management, ethnic, cultural and linguistic considerations of the community, mandated reporting, social skills training, basic IEP and special education information, family centered practice, person centered documentation and standards of documentation, and cultural competencies.

Web-based training modules will have competency quizzes at the end of each module that employees must satisfactorily pass. Employees must complete trainings within 12 weeks of employment start date. During the Preparation Budget Period a team will be identified and convened to prioritize topics and develop training modules. BHN will hire a consultant to assist with implementation, and program staff will manage its use in the program over the 5-year DSRIP implementation period. Supervisors will monitor staff completion of the training modules and will also assign staff to review specific trainings during the supervision process when staff would benefit from refresher trainings to help improve performance. Refresher trainings may also be mandated yearly for all staff.

Fidelity to the model will be increased via web-based trainings because all staff will have been trained and quizzed on the topics and supervisors will be allotted more time to work individually with supervisees, either coaching in the field or reviewing documentation and processes, as delineated in the IAP and executed in service delivery. Increased fidelity to Wraparound principals and practices improves client outcomes and a more uniform service delivery across the program. Staff and supervisors who are better and more efficiently trained to perform their duties will be satisfied in their work resulting in long-term retention. This will result in access improvements for youth.

Funds will be used during the preparation period through quarter 4 of FY 18. This new system will be in place and in use through the entirety of the project.

4. Proposed Deliverables
    - Orientation training modules with proficiency measurement tools for new hires
    - Improved use of supervisor time and effort
    - Training compliance tracking package
    - Flexible scheduling to meet staff needs
    - Uniformity in on-boarding communications
    - Meet development plan goals

5. In the Preparation Budget Period, BHN will engage a consultant to create web-based trainings. We estimate 20 hours per week for this consultant. During the Year 1 period we have allocated 2 hours per week for the web-based on-boarding consultant for revisions and modifications to the trainings created.

The preparation period of the project will focus heavily on getting the foundation of the web-based training system implemented. A consultant will begin immediately on evaluating the system for current capacity and will subsequently work with the program directors on prioritizing and scheduling trainings to be put into the system. Year 1 of the project will focus heavily on implementing the new training system, with consultation from the project manager. Years 2-5 will consist of maintenance of the system. Program management will continue to place trainings onto the system for staff use through the duration of the project.

6. Internal Resources: BHN contains a comprehensive network of experts that will be accessed to implement the project including Department of Professional Development staff supplying a Project Manager/Consultant.
    1. Consultant on project and DPD support staff
    2. Go-Sign-Me-Up training platform
    3. Video equipment
    4. Existing curriculum
    5. Supervisory staff to conduct trainings
    6. Subject matter experts
    7. Administrative supports

7. BHN will allocate the funds equally across all CSA site locations for all five projects.

~~8. The training software has capacity to monitor employee compliance, completion of each module and post-training assessment of all assigned trainings. Go-Sign-Me-Up is directly linked to email to facilitate sign-ups, reminders, quiz results and oversight. As training directly related to fidelity, Senior Care Coordinators and Program Directors will use the ICP Review and Comprehensive Assessment Review tools to monitor adherence to Wraparound fidelity measures on these two documents. We know that a well informed Comprehensive Assessment creates better care plans and well written ICPs result in better tracking of outcomes. The results of the~~

~~CA and ICP Review tools will be maintained in a Fidelity Binder to determine and track areas of need for the Care Coordinator's skill development. With an increase in efficiency in training and on-boarding, supervisors will have more time to conduct live coaching of staff. They will use the TOM 2.0 when observing CPT meetings once a quarter and target coaching toward improving scores identified in the observation. We will observe an increase in measurement tool (TOM 2.0) scores; fidelity tools will be seen in live meeting observation of meetings. Especially in areas of natural and community supports and outcomes based Improved scores on ICP and CA reviews will also be evident.~~

~~Through consultation-informed changes in our training process, we will, when entering into the new training protocol, conduct pre- and post- tests on staff for each training series to assess if the trainings are targeting the fidelity indicators as desired. BHN Sr. Care Coordinators and Sr. Family Partners will collect and track the completion of quizzes at the end of web-based training series and review the concepts in supervision. If it appears the concepts are not fully understood, an individualized plan will be created for learning the material. The quizzes will be collected by the Program Directors and tracked in an excel database.~~

~~GoSignMeUp: a web-based application to document attendance, participation and completion of quizzes, will track appropriate renewals for specific trainings. This program will track staff sign up, participation, show acquired competency, completion of training, and audits available. An evaluation will be used to measure satisfaction with the training and meeting goals and objectives of the training. We will modify trainings as needed.~~

8. Web-based training will be accessible to CSA staff to meet the annual mandated training requirements and will improve the wraparound skill sets and increase knowledge in clinical and psychosocial factors impacting youth and families served in ICC. By the end of Prep Budget Period a TV, web cam and processor will be purchased and a consultant will be hired to design and support creation of the web-based training.**Each CC will show an improvement in at least one area of the ICP and CA documentation process and TOM 2.0 scores by the end of Budget Period year 2.**

Training software has capacity to monitor employee compliance, completion of each module and post-training assessment of all assigned trainings. Go-Sign-Me-Up is directly linked to email to facilitate sign-ups, reminders, quiz results and oversight. As training directly related to fidelity, Senior Care Coordinators and Program Directors will use the ICP Review and Comprehensive Assessment Review scoring tools to monitor adherence to Wraparound fidelity measures on these two documents. We know that a well informed Comprehensive Assessment creates better care plans and well written ICPs result in better tracking of outcomes. The results of the CA and ICP Review tools will be maintained in a Fidelity Binder to determine and track areas of need for the Care Coordinator's skill development. With an increase in efficiency in training and on-boarding, supervisors will have more time to conduct live coaching of staff. They will use the TOM 2.0 when observing CPT meetings once every 6 months and target coaching toward improving scores identified in the observation. We will observe an increase in measurement tool (TOM 2.0) scores in at least one need area of each staff previously observed. Especially in areas of natural and community supports and outcomes based measurements. This will be tracked by Senior CCs and CSA PD by comparing previous TOM 2.0 scores. Improved scores on ICP and CA reviews will also be evident from previously scored ICPs and CAs. By the end of Prep Budget period baseline scores on ICPs and CAs within the past 6 months will be

collected by Sr. Care Coordinators and the CSA Program Director. Every 6 months, like the TOM 2.0 observations, CAs and ICPs will be scored with the review tools to show an improvement in previous scores. This will be ongoing as part of the CSA quality assurance process.

Through consultation-informed changes in our training process, we will, when entering into the new training protocol, conduct pre- and post- tests on staff for each training series to assess if the trainings are targeting the fidelity indicators as desired. BHN Sr. Care Coordinators and Sr. Family Partners will collect and track the completion of quizzes at the end of web based training series and review the concepts in supervision. If it appears the concepts are not fully understood, an individualized plan will be created for learning the material. The quizzes will be collected by the Program Directors and tracked in an excel database on an annual basis.

GoSignMeUp: a web-based application to document attendance, participation and completion of quizzes, will track appropriate renewals for specific trainings. This program will track staff sign up, participation, show acquired competency, completion of training, and audits available. An evaluation will be used to measure satisfaction with the training and meeting goals and objectives of the training. We will modify trainings as needed and by end of Budget Period year 2 we will show 100% attendance of all trainings.

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

~~**Sub-Section 6.4 A Project 2 -**~~ **GOAL ELIMINATED DUE TO EOHHS PROVIDING BASIC TRAININGS**

~~1. Name: ***BASIC PEDIATRIC MEDICAL TRAINING***~~

~~2. Goal 1: integration-Increased facility with common pediatric medical conditions and Primary Care/Behavioral Health integration topics~~

~~Goal 1: integration-Improved collaboration with ACOs and PCPs due to staff skill building in community stakeholder collaboration~~

~~Goal 1: integration-Increased understanding of culture of medical practices, language, expectation, structures, work flows~~

~~Goal 4: quality-Best practices in PCP coordination. Physical and BH wellbeing needs are integrated~~

~~2. and 3. Activities and plans to meet goals: Funds will be used during the preparation period to support the pediatric RN. Videos of the trainings will be placed in the training system for use through the duration of the project. A registered nurse with pediatric expertise will provide initial trainings in engagement with PCPs and medical terminology and considerations. The RN will conduct initial trainings for staff on common medical conditions and diagnoses including, but not limited to; asthma, diabetes, epilepsy and obesity, engagement of primary care practices, medical language, psychotropic medication indications and side effects and engagement with primary care providers. The RN will provide consultation and assessment of the training needs of staff and will then create and implement relevant trainings. These trainings will then become part of the web-based training system which will be accessed at any time.~~

~~4. Proposed Deliverables~~

- ~~Protocols in place for integration and coordination~~
- ~~Improved medical culture competence~~
- ~~Training modules with competency measurement tools in place~~
- ~~Improved collaboration with medical system~~

~~5. BHN will hire or assign a pediatric RN (.6 FTE) to work with staff on improving their knowledge of common pediatric issues and terminology. This RN will also work with the web-based training consultant to develop many of the medical trainings on-line. In years 1 and 2, the RN will continue in the program but at a reduced allocation of .3 FTE, and then .15 FTE in year 3. During year 3, the nurse will provide less training and will focus on consultation to program staff regarding engagement with PCPs and medical concerns that require further training and education for staff. At this point, we expect that between web-based medical training and knowledge attained by supervisory and management staff, we will no longer need an RN to maintain this project.~~

~~6. BHN contains a comprehensive network of experts that will be accessed to implement the project.~~

1. ~~DPD support staff~~
2. ~~Nursing staff~~
3. ~~Go-Sign-Me-Up training platform~~
4. ~~Video equipment~~
5. ~~Existing curriculum~~
6. ~~Supervisory staff to conduct trainings~~
7. ~~Subject matter experts~~
8. ~~Administrative supports~~
9. ~~BHN collaborative culture and existing Primary Care Behavioral Health collaborative infrastructure~~
10. ~~Collaboration with BHN Medical Integration Team~~

~~7. BHN will allocate the funds equally across all CSA site locations for all five projects.~~

~~8. GoSignMeUp is a web-based application to document attendance, participation and completion of quizzes. It will track appropriate renewals for specific trainings. This program will track staff sign up, participation, show acquired competency, completion of training, and audits available. An evaluation will be used to measure satisfaction with the training and if training objectives were met. Progress note reviews will show what information is being exchanged with the ACOs including ICPs, discussion of medical concerns and competencies of understanding discussion points. We will communicate with ACO partners using health information exchanges for information sharing We can track communications about client care, behavioral health diagnosis and treatment to the youth's medical providers and managed care organization. Consultations with the nurse care manager will be documented in the youth's record.~~

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Sub-Section 6.4 A Project ~~3~~ 2

1. Name: ***REFERRAL AND TRIAGE WORKFLOW CONSULTATION AND IMPROVEMENT***

2. Goal 1: integration-PCP or ACO referrals improve; warm handoffs increase appropriateness, timeliness and information sharing
   Goal 3: access-Inappropriate referrals avoided to increase slots for eligible youth enrollees and their families.
   Goal 3: access-Reduce wait times to less than 2 weeks.

2. and 3. Activities and plans to meet goals: BHN will conduct a review of the intake and referral workflow for inefficiencies that lead to repetitive processes and inappropriate referrals, which increase wait times for families to receive services. We will reduce treatment delays caused by incomplete, inaccurate, or missing referral and triage information. Care coordinators will spend less time opening and assessing cases that are then closed due to ineligibility, wasting valuable care coordinator time and program resources. Reducing such churn will provide relief for families who are waiting and appropriate for the service. A Systems Analyst from BHN's Clinical Quality Department will be assigned to design and then evaluate results of this assessment process, as well as to assist in the execution of recommendations that come from the review.

The consultation will identify areas where work is repeated and determine how and why referrals are made that do not meet this level of care. Recommendations will focus on increase the efficiency of the workflow and reduce churn. The project manager will assist in executing recommendations and develop a work plan outlining action steps and timelines.

BHN will reduce treatment delays caused by incomplete, inaccurate or missing referral and triage information. Access to care will increase when recommended improvements are implemented. Additionally, we will increase the intensity of supervision, in-field coaching, and documentation review. We will gain time to use the measurement tools to review documents and increase fidelity to the wraparound model. Staff will have more resources and education to accomplish this goal.

Funds will be used during the preparation period through quarter 4 of FY 18 to support the project manager

4. Proposed Deliverables
   - Scripts for intake and triage staff
   - Efficient workflows
   - Report generated to help assess and manage the wait list
   - Uniform protocols for intake and triage
   - New enrollees and families
   - Effective and accurate communication with families and providers
   - Meet development plan goals

5. During the Preparation Budget period, BHN will allocate a Systems Analyst from our Clinical Quality Department (.6 FTE) to assess the current problematic referral system (e.g., inappropriate referrals, referrals to multiple services, etc.). In Year 1, referral and triage workflow consultation will have resulted in improvement. During this period we will reduce the allocation to .25 FTE as the project should be nearing completion.

6. A comprehensive network of highly skilled BHN employees will implement the project. The Quality Department will provide consultation for fidelity measurement tools.
   1. Department of Professional Development staff-Project Manager/Consultant and DPD support staff
   1. Department of Quality, Quality Analyst position
   2. Administrative supports

3. Subject matter experts
4. Existing workflows to build improvements on
5. Integrated Health Records
6. Connectivity to Interoperable Health Records system via PVIX and MassHiWay
7. Connected Communities Grant holder with 8 community partners
8. Collaboration with BHN Medical Integration Team

7. BHN will allocate the funds equally across all CSA site locations for all five projects.
8. This comprehensive review of referral and triage processes will result in a drop in referrals that do not meet medical necessity at assessment, resulting in less time spent waiting for services to start. A consultant will evaluate the current process and report findings back to the program.

ICC Program Directors will re-write and standardize work flows for managing different level of triage needs across CSAs. We will measure for a decrease in youth waiting for ICC services in the State Workbooks (waitlists). Notes will be logged clearly in the BHN Referral form to record the conversations with the referral source and the caregiver/youth by the administrative staff and the supervisory team so any internal team member can determine the exact status of the referral. With consultation from the Systems Analyst on the Referral and Workflow process, we will see an improvement in the appropriateness of internal referrals as demonstrated and tracked by the number of referrals that meet medical necessity criteria for ICC and the number of referrals made to outside resources if the youth's needs are appropriate for another level of care.

Through a comprehensive referral and triage process review, we will see a shortened wait list. We will measure how long the youth and caregiver stay engaged in services once referred with a minimum of one visit per week over a 6 week period of time.

Administrative staff will track connect-to-care results from point of entry to start of ICC services using state data workbooks.

We will measure a decrease in wait time based on consumer satisfaction, satisfaction with access, and inclusion in the treatment process. The number of people who remain engaged in services after enrollment will increase over time. A Systems Analyst will be hired and an evaluation and analysis of the current referral and triage system completed by the end of the Prep Budget Period. By the end of Budget Period year 2, a triage and referral process will be implemented that ensures youth will triaged for correct level of care and be enrolled within 2 weeks of consent for ICC services.

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Sub-Section 6.4 A Project ~~4~~ 3

1. Name: ***CARE MANAGEMENT SOFTWARE – PURCHASE AND IMPLEMENTATION***
2. Goal 1: integration and Goal 3: access-Increase referral making efficiency, improve communication and tracking with ACOs and Pediatrics
   Goal 2:fidelity, Goal 3:access, and Goal 4: quality-Care Coordinators increase efficiency and efficacy via electronic task management and alerts to increase numbers served
   Goal 2: fidelity-Increase fidelity via easy access to current and accurate data. Services are delivered as designed across staff, providers, and over time.
   Goal 4: quality-Accurate and efficient reports generated to ensure quality.

2. and 3. Activities and plans to meet goals: BHN is in the process of evaluating care management software that will create more efficient workflows for staff. Project staff will be directly involved in the evaluation, selection and implementation of the software platform in order to choose software that will meet the needs of the program such as: the capacity to populate ongoing tasks, send reminders for upcoming events and monitor the intensity of service delivery. A project manager will be assigned to assist with software evaluation, implementation, staff training, provide on-going support in the early stages of implementation. Staff will spend less time on organizing tasks, managing workflows, and documenting cases in order to focus on quality, fidelity, direct care and relationship building with families.
Funds will be used to support the purchase and upkeep of the software during the implementation period through the duration of the project. Funds will also be used through the duration of the project for user licensing fees based on the numbers of end users.

4. Proposed Deliverables
   - Software in CSA
   - Staff trained in software
   - Effective and accurate communication with families and providers
   - Tracking of collateral contacts, date of service, including ACOs
   - Tracking youth and family contact
   - Task management tools implemented
   - Meet development plan goals

5. Care Management Software – Purchase and Implementation will begin in the Preparation Budget Period. BHN is currently in the process of screening CM software and interviewing potential vendors. We had written 70% of the cost of purchasing this software into our BH CP application, but did not include CSA use in that budget. Based on numbers of clients and the need to customize the product for ICC/FS&T use, we estimate $30,000 for this expense, as well as .4 FTE of an Implementation Manager will be needed. Once the software is in place and we begin to use it in Year 1, there will be PMPM licensing fees based upon the number of clients (not staff) enrolled. Based on our census of 209 individuals served we include $18,810 for this period. We also continue to fund the Implementation Manager at a reduced .15 FTE. The amounts allocated in years 2-5 represent the estimated costs of PMPM user fees for the 209 clients allowed.

6. Department of Professional Development staff-Project Manager/Consultant and DPD support staff
   1. Department of Quality, Quality Analyst position
   2. EHR
   3. IT/IS Department infrastructure and supports
   4. CM Software team researching and implementing project
   5. Submitted BHCP DSRIP grant for software funding
   6. Existing extensive Case Management programming, including ICC, with case management and care coordination expertise and experience
   7. Training protocols and experience to train large numbers of employees on any given topic
   8. Experience implementing new organization-wide software products

7. Allocation of Funds: BHN will allocate the funds equally across all CSA site locations for all five projects.

~~8. Care Management Software will be installed on each laptop (See below). ICC staff will be trained on the use of the software and show that they are able to complete the basic tasks with a live demonstration of the skills to their trainer. The system will provide task management functionality, referral management, ability to send information from other sources, and integrate~~

~~ICC care plan with other care plans. Supervisors will be able to offer clinical support to identify recommendations for care. A care management system will be sought that has client engagement options such a client portal to look up their notes and needs and reminders for upcoming appointments. The software will have reporting functionality and will be evaluated for the ability to gather more comprehensive data on youth goals by having a way to input data from the scaling measures used on the pilot ICP. It will record and remind Care Coordinators of upcoming appointments and be able to run reports on youth/caregiver utilization of ICC services. A decrease in length of stay in ICC services is expected if task management and coordination efforts are tracked by the software. Staff will also report increased ease in tracking the collateral contacts required. ICC Program Directors will run reports on ACOs and PCPs of the youth and track last date of contact the Care Coordinator had with the ACO representative. The software will support with the tracking of the dates of last contact with youth and caregivers as well as team members. Care Coordinators will have access to the reports to track this to determine need for follow up and supervisors will review in supervision.~~

~~A Likert scale on ICPs will be implemented to measure the progress towards ICP vision and goals. The Care Coordinators will be responsible for tracking the changes in scoring from each CPT meeting in the Care Management Software. Supervisors will run reports on client progress and plans in supervision. Higher scores may indicate readiness for transition from ICC services and lower scores or stagnant scores indicate a need for renewed intervention and reworking of the plan.~~

8. Care Management software will be procured by the end of January 2018 using a portion of DSRIP funding. BHN's EHR team and Care Management software team will develop a set of requirements for CSA use of the Care Management software by the end of the prep budget period, June 2018. Care Management Software will be installed on each laptop for CSA staff by the end of Budget year 1 and CSA staff will be trained on the use of the software by an IT representative after the software is installed on the laptops. CSA staff and show that they are able to complete the basic tasks with a live demonstration of the skills to their trainer. The system will provide task management functionality, referral management, ability to send information from other sources, and integrate ICC care plan with other care plans. Supervisors will be able to offer clinical support to identify recommendations for care. A care management system will be sought that has client engagement options such a client portal to look up their notes and needs and reminders for upcoming appointments. The software will have reporting functionality and will be evaluated for the ability to gather more comprehensive data on youth goals by having a way to input data from the scaling measures used on the pilot ICP. It will record and remind Care Coordinators of upcoming appointments and be able to run reports on youth/caregiver utilization of ICC services. A decrease in the average length of stay in ICC services is expected if task management and coordination efforts are tracked by the software since CCs will see the intensity of the care coordination efforts they are delivering. This decrease will be evidenced in the CSA state workbooks. Staff will also report increased ease in tracking the collateral contacts required.

By the end of Budget Period Year 2, ICC Program Directors will run reports on ACOs and PCPs of the youth and track last date of contact the Care Coordinator had with the ACO representative. The data collected will reflect at least once contact by the CC and the PCP/ACO for every youth enrolled in ICC for a minimum of 3 months. The software will

support with the tracking of the dates of last contact with youth and caregivers as well as team members. Care Coordinators will have access to the reports to track this to determine need for follow up and supervisors will review in supervision.
A Likert scale on ICPs will be implemented to measure the progress towards ICP vision and goals. The Care Coordinators will be responsible for tracking the changes in scoring from each CPT meeting in the Care Management Software. Supervisors will run reports on client progress and plans in supervision every 3 months. Higher scores may indicate readiness for transition from ICC services and lower scores or stagnant scores indicate a need for renewed intervention and reworking of the plan.

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Sub-Section 6.4 A Project 5 ~~4~~

1. Name: ***LAPTOPS***
2. Goal 1: integration-coordinate appointments
   Goal 1: integration and Goal 3: access-respond to email and texts
   Goal 2: fidelity-Staff access care plans and other documents when working in the community and in families' homes
   Goal 1: integration and Goal 3: access-Go-to-meeting access for meetings and collaboration
   Goal 3: access and Goal 4: quality-Staff access resource information in the moment and at the point of care to address presenting needs of clients
   Goal 4: quality-take more accurate case notes soon after intervention while information is fresh

2. and 3. Activities and plans to meet goals: Laptop computers (with air cards (in-kind) for access to internet in community locations) will be purchased and given to staff. These laptops will allow staff to access email, the electronic medical records, care management software, work calendars and the agency intranet containing the web-based training modules. New laptops for all ICC staff will create means for staff to better communicate and utilize needed technology at the point of service in community locations. BHN's IT department will research and purchase the laptops, distribute them to staff members and train on their usage. This will incur a one-time expenditure during the preparation period.

4. Proposed Deliverables
   - Laptop for each staff
   - Technology access in homes and community based locations during interventions
   - Technology access during non-productivity time
   - Increased case loads
   - Timely responses to youth and family needs
   - Timely connections with providers
   - Scheduling efficiencies
   - Meet development plan goals

5. Funds will be allocated in the preparation period for the purchase of 64 laptops for staff. No DSRIP funds will be used after this period on this project. While some staff currently have laptops or notebooks, these are old and inefficient.

6. Internal Resources:
   - IT/IS Department supports and expertise
   - Air Cards for internet connectivity during outreach

7. Allocation of Funds: BHN will allocate the funds equally across all CSA site locations for all five projects.

~~8. Laptops will be purchased, set up and distributed to staff to use in the field. Evidenced by an invoice and an inventory control of which laptops have been assigned to each staff member.~~

8. 64 Laptops will be purchased, set up and distributed to staff to use in the field by BHN IT department by the end of Prep Budget Period. Evidenced by an invoice and an inventory control by IT staff of which laptops have been assigned to each staff member. CSA staff will sign a document that they have received their new laptop as part of the current IT process.

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Sub-Section 6.4 B

Project Team Description

Sub-Section 6.4 B 2

Current Staff

Michelle Michaelian, Senior Program Manager, Child and Family community based services

- Expertise in management of systems
- Expertise in content area to provide consultation and direction on; training topics, training implementation, coordination of program processes, workflows and triage, outreach to current and potential partners

Alaina Lyon, Program Director Springfield and Van Wart CSA

- Expertise in content area to provide consultation and direction on; Care management software needs, training topics, training implementation, coordination of program processes, workflows and triage, outreach to current and potential partners
- ICC state coach and coaching to senior family partners and staff

Linda Roy, Program Director, Family Support & Training, Springfield, Van Wart and Holyoke/Westfield CSAs

- Expertise in content area to provide consultation and direction on; training topics, training implementation, coordination of program processes, workflows and triage, outreach to current and potential partners
- Coaching to senior family partners and staff
- Family Partner state coach

Ellen Cropanese, Program Director, Holyoke/Westfield CSAs

- Holds expertise in content area to provide consultation on training topics, training implementation, coordination of program processes, workflows and triage, outreach to current and potential partners
- Holds expertise in content area to provide consultation and direction on; Care management software needs, training topics, training implementation, coordination of program processes, workflows and triage, outreach to current and potential partners
- Training and coaching to senior family partners and staff

Anne Beauregard, Systems Analyst, Clinical Quality Department

- Provides consultation on workflows for intake and triage

Sub-Section 6.4 B 3

Staff to engage or hire

A pediatric registered nurse will provide consultation and training to the ICC programs. They will have expertise on collaboration with medical practice and will provide training on medical language and diagnoses (asthma, diabetes, epilepsy etc.), psychotropic medication-indications and side effects.

Web-based training consultant will provide the skills and competencies to work with senior managers to develop a web-based training series that will enhance on-boarding of new staff, as well as annual training to continuing/current staff.

Sub-Section 6.4 B 4

Roles and responsibilities

ICC program directors will collaborate to ensure needs are uniformly met for all staff serving the community. However, each brings expertise regarding the specific needs of their particular communities. As an ICC state coach, Alaina Lyon will provide more direct consultation on fidelity to the wraparound model and person and family-centered documentation. She will be responsible for oversight of the evaluation of the referral and triage processes and will work with the BHN IT and information systems department in the evaluation, selection and implementation of care management software. She also will work in collaboration with Ellen Cropanese to create and implement the web based training system. Ellen Cropanese has focused in recent months on collaborating and coordinating services in local medical practices with our Medical Integration teams, and offers much needed expertise in enhancing communication and collaboration with pediatric care practices. A family partner coach, Linda Roy will provide important perspective on family voice and choice as BHN seeks relevant trainings in the wraparound model.

Our project manager , Anne Beauregard, offers a high-level of proficiency in planning, evaluating and implementing projects related to human service systems. She will provide direction and consultation in choosing and implementing care management software, planning and applying a web-based training system and evaluating current referral and triage practices.

Sub-Section 6.4 B 5

Project management

Project 1.Web-based on-boarding and training development

Ellen Cropanese will be responsible for the oversight of this project. She will serve on the BHN committee to evaluate and select the software and will be the primary manager working on this project. Alaina Lyon will consult and collaborate on this project to ensure the needs of all staff and training requirements are met. Michelle Michaelian will serve as consultant to each manager and as liaison to the executive leadership team and the fiscal department in coordinating the needs of programs for this project.

Project 2. Basic Pediatric Medical Training

Linda Roy will be the manager primarily responsible for this project. She will be the primary contact to all parties and will head the selection committee for the RN to be hired. Linda will coordinate and plan trainings to be held with staff and will facilitate the recording of these trainings to be placed on the web-based system. Linda will collaborate with and receive consultation from Ellen Cropanese and Alaina Lyon in this process. Michelle Michaelian will serve as consultant to each manager and as liaison to the executive leadership team and the fiscal department in coordinating the needs of programs for this project.

Project 3. Referral and triage workflow consultation and improvement
Alaina Lyon will be primarily responsible for the coordination of this project. She will plan and schedule task meetings with the systems analyst to review and evaluate the current workflow, and will then facilitate changes based on the recommendations resulting from the evaluation. Alaina will collaborate and coordinate with Ellen Cropanese and Linda Roy to ensure the new workflow is consistent among all three CSA sites. Michelle Michaelian will serve as consultant to each manager and as liaison to the executive leadership team and the fiscal department in coordinating the needs of programs for this project.
Projects 4. Care Management Software – Purchase and Implementation
Alaina Lyon will be the primary contact for BHN for this project. She will join the internal BHN team that is responsible for the evaluation and selection of the software, and will coordinate the implementation process with Ellen Cropanese and Linda Roy. Michelle Michaelian will serve as liaison to the executive leadership team and the fiscal department in coordinating the needs of programs for this project.
Project 5. Laptops
Each Program Director will be responsible for coordinating with IT and requesting the adequate number of laptops for their respective CSAs.

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Care Management software implementation manager	$ 20,333	$ 13,725	$ -	$ -	$ -	$ -	$ 13,725
Laptops for all CSA staff	$ 56,576	$ -	$ -	$ -	$ -	$ -	$ -
TOTAL INVESTMENTS							$ 212,022
						Surplus/Loss	$ (8,247)

Attachment C: CSA Budget Narrative

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Budget Expenses:
Workforce Development **Total:** $145,630

Prep Budget Workforce Development Investments:
Project 1.Web-based On-Boarding and Training Development: BHN will use $50,400 in the Prep Budget Period to engage a consultant to create web-based trainings so that new staff can be more efficiently trained, and continuing staff can receive needed annual trainings. We estimate 20 hours per week for this consultant. This approach will increase ACCESS by training staff in a more efficient way. It will improve QUALITY and FIDELITY by delivering a standardized, uniform, wraparound-informed training to all staff.
Project 2. Basic Pediatric Medical Training. BHN will hire or assign a pediatric RN (.6 FTE) to work with staff on improving their knowledge of common pediatric issues and terminology. This RN will also work with the web-based training consultant to develop many of these trainings on-line. This project will target INTERGRATION by improving staff ability to work collaboratively with health care providers on families' teams, and will improve the overall QUALITY of service provided by staff.

Year 1 Budget Workforce Development Investments:
Project 1. During the Year 1 period we have allocated 2 hours per week for the web-based on-boarding consultant for revisions and modifications to the trainings created.
Project 2. The RN will continue in the program but at a reduced allocation of .3 FTE during this period. Goals as above.

Years 2-5 Budget Workforce Development Investments:
Project 1. Completed.
Project 2. The RN will continue in the program but at a reduced allocation of .3 FTE during year 2 and .15 FTE during year 3. At this point we expect that between web-based medical training and knowledge attained by supervisory and management staff, we will no longer need an RN to maintain this project. Goals as above.

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Operational Infrastructure **Total:** $34,567

Prep Budget-Operational Infrastructure Investments:
Project 3. Referral and triage workflow consultation and improvement. BHN will allocate systems analyst from our Quality Department (.6 FTE, $24,400) during this periods to assess the current problematic referral system (e.g., inappropriate referrals, referrals to multiple services, etc.). It is believed that by improving our partners' knowledge of how and when to make appropriate referrals and by designing a more streamlined system, we will improve ACCESS to care, and will enhance our INTEGRATION with our medical and other community partners.

Year 1 Budget-Operational Infrastructure Investments:
Project 3. Referral and triage workflow consultation and improvement. During this period we will reduce the allocation to .25 FTE as the project should be nearing completion.

Years 2-5 Budget-Operational Infrastructure Investments:
NA

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Technology **Total:** $239,764

Prep Budget-Technology Investments:

Project 4. Care Management Software – Purchase and Implementation. BHN is currently in the process of screening CM software and interviewing potential vendors. We had written 70% of the cost of purchasing this software into our BH CP application, but did not include CSA use in that budget. Based on numbers of clients and the need to customize the product for ICC/FS&T use, we estimate $30,000 for this expense, as well as .4 FTE of an Implementation Manager will be needed. Purchasing this software will target all goals: A more efficient workforce will allow for more families to be served, improving ACCESS and INTEGRATION; the software will ensure that agreed upon tasks are tracked, improving QUALITY and FIDELITY; and communication functionality will enhance INTEGRATION with our healthcare and other community partners. Accurate reports generated o increase QUALITY

Project 5. Laptops. BHN will purchase 64 laptops at $884 each for use by CSA staff. While some staff currently have laptops or notebooks, these are old and inefficient. By enabling our staff to access care plans and other documents when working in the community and in families' homes, FIDELITY will increase, QUALITY of care will improve, a more efficient staff should allow for more families to be served and thus increase ACCESS, and electronic in-the-moment communication with healthcare and other community partners will improve INTEGRATION.

Year 1 Budget-Technology Investments:

Project 4 Care Management Software – continued implementation and beginning of user fees. Once the software is in place and we begin to use it, there are PMPM licensing fees based upon the number of clients (not staff) enrolled. Based on our census of 209 individuals served we include $18,810 for this period. We also continue to fund the Implementation Manager at a reduced .15 FTE. Goals as above.

Project 5. Completed.

Years 2-5 Budget-Technology Investments:

Project 4. Care Management Software – license fees. The amounts allocated in years 2-5 represent the estimated costs of PMPM user fees for the 209 clients allowed. Implementation should be complete. Goals as above.

Project 5. Completed.

This section has been modified from the original submission. Updated PBP Budget Narrative reflects changes.

Sub-Section 6.4 E

Project 1. Web-based on-boarding and training. The infrastructure funds will be used to create a series of on-line trainings for new and continuing staff. Because the development of these training videos will occur mostly during the Prep Budget period, with some revisions and additions during the first year budget period, there will not be any sustainability issues on this project.

Project 2. Basic Pediatric Medical Training. The design of this project is such that the pediatric RN that is hired or allocated will work early in the project with the web-based training consultant to create on-line trainings, and then will be available for live family-specific consultation with staff for 2 years. Our hope is that between the on-line videos, and the knowledge gained by supervisory and management level staff, we will then have the internal capacity to continue this training for any new staff, and sustainability will not be an issue on this project.

Project 3. Referral and Triage Workflow. Funds will be used during the Prep Budget Period and Budget Year 1 to conduct this assessment and the redesign of the referral and triage workflow. We expect this project to be completed by the end of this period, and thus sustainability will not be an issue.

Project 4. Care Management Software Purchase and Implementation. Because the purchase and the majority of implementation expenses are one-time costs, sustainability should not be an issue for these expenses. The one cost that will continue is the PMPM fees that the software vendors charge based upon the number of clients enrolled and being care managed with the software. As the infrastructure funding winds down and ends these costs will need to be absorbed by the CSA programs' operating budgets. Although all calculations in this proposal are based upon our historical census of 209 individuals, our hope is that many of the projects detailed here will result in greater efficiencies within the program that allow us to increase our census and serve more families. This growth should lead to an economy of scale that allows for us to fund the CM software PMPM fees after infrastructure support ends.
Project 5. Laptops. This is a one-time expense and should not present any sustainability issues. To the extent that at the end of a 5-year period newer laptops are again needed, they would be supported by the CSA programs' operational budgets, or BHN's annual capital budget.

Section 6.5 Coordination with ACOs, MCOs, and Primary Care Providers

Sub-Section 6.5 A

Bi-directional Communication For over two decades, BHN has been doing business through contracts, joint initiatives, grants and integrated care with the healthcare systems that cover the Springfield, Holyoke and Westfield Service Areas. BHN has applied to become a Behavioral Health Care Partner for the newly established ACOs in Western MA. All of our historical medical partners have been chosen to be an ACO or part of an ACO in our region. BHN partner hospitals are Baystate Health, Sisters of Providence Health Systems, and Holyoke Medical Center.
We also partner with many MCOs: Health New England, BMC Healthnet, MBHP/Beacon, and Commonwealth Care Alliance. For over three years, we have been managing care and fulfilling the CP role in service to 2,000 covered lives for CCA and MBHP. Relationships with healthcare partners have enabled us to be successful in planning, implementing, and problem-solving for a variety of regional integrated and coordinated services. We have a firmly established foundation in collaborating with these entities and will continue to do so within our CSAs in order to maximize care for the youth and families we serve.
We also have built significant collaboration internally with our Integrated Care program. CSA staff meet with key integration staff who are responsible for youth interventions in the integrated pediatric practices. Improvements to this new model include weekly or monthly meetings, depending on the need. They provide low-level problem solving in real time, negating the need for a higher level of problem solving and conflict resolution. Our collaborative service delivery model will build in processes for good dialogue and team approaches to delivery so that our program staff may successfully manage many issues before they become problems. We will use these internal relationships to leverage greater access and collaboration with pediatric practice medical staff.
Current community health center and Federally Qualified Health Center pediatric partners include High Street Health Center-pediatrics, Holyoke Health Center and Caring Health Center. We have been integrating clinicians, CSP workers and care managers into these setting for many years. Group and primary care practice integration includes Holyoke Pediatric Associates, Pediatric Care Associates, Mercy Medical Practices, Pediatric Associates of Hampden County, Family Medicine Associates, and Valley Medical Associates. Our embedded staff includes

master's level clinicians, community support workers, care managers (for One Care and MBHP Provider-based CM), peers, family partners, and recovery coaches.
A care coordinator will be joining the two family partners who are already established at the Holyoke Health Center to team with BHN's medical integration team and the PCPs to support further integration of behavioral health and physical care. Holyoke teams with nurse care managers out of Pediatric Associates of Hampden County, coming to CPT meetings representing the complex physical needs of youth and integrating the behavioral needs back into the pediatricians practice.

Sub-Section 6.5 B

Referral management protocols

Currently, when a youth is referred by an integrated medical practice, an ACO or pediatric office, the referral is currently tracked via a BHN referral form. BHN Central Intake personnel enters the referral into the system and then CSA administrative staff typically spend a significant amount of follow up time gathering information missing from the intake process. Staff then contact the caregiver/youth to describe ICC services in detail. We frequently have problems contacting the caregiver/youth, and our staff must inform the referring organization of barriers met in engaging the client family, another significant time consuming process. After the initial contact is made, we inform the referral source of the caregiver/youth treatment status, either if the client refuses services or the enrollment date. At enrollment, we obtain signed consent for authorization to release information to the ACO or pediatric office. Once these administrative steps have been taken, the care coordinator then calls the ACO/pediatric office to explain the ICC process and then sends a letter and authorization to the ACO or pediatric office for ongoing communications.
When the youth does not meet Medical Necessity Criteria, the care coordinator sends the referring agency a copy of the Comprehensive Assessment, CANS and as well as an ongoing support plan outlining the recommendations for more appropriate services with contact information for any referrals made for the youth and family. Even when a youth is not appropriate for ICC services, we will still make referrals to other types of services.
Much work is ahead of BHN to improve our referral management protocols to reduce the time spent on and number of inappropriate referrals as well as to increase the number of referrals from practices which currently underutilize CSA services. We intend to review our process with a professional systems analyst, which will enable us to better understand the weaknesses of our current system and make systematic improvements to it.

Sub-Section 6.5 C

Treatment Planning BHN has integrated with Holyoke Health Center, assigning specific ICC staff to HHC staff for continuity and integration between the two programs. CPT meetings are held at HHC and representatives from Medical Integration will meet with the family and team to participate in the planning process. When pediatric staff cannot participate, we reach out to the medical provider to explain the importance of the pediatrician's role in the youth's overall wellbeing and to share mutual expectations for coordination. The care coordinator asks for the physician's perspective on the youth's needs and how physical health may impact mental health and then share our assessment of behavioral health needs. The care coordinator includes physical needs into the care planning process and follows up with the PCP/ACO on progress towards goals, options chosen and tasks assigned. Manually tracking calls, activities, and needed follow up is a very labor intensive process. Implementing better technology and relationship building

across silos will improve collaboration and timely PCP/ACO access to records, while increasing ICC staff efficiency.

Sub-Section 6.5 D

Access A consultant will evaluate the current intake and triage processes to find inefficiencies in our model and make recommendations for improving work flow. ACOs and PCPs will be identified at intake so we can track referrals accordingly. The consultant will help to create scripts and review trends in referrals. We will continue to reach out to ACOs and pediatric offices about appropriate kinds of referrals and provide educational materials. Family partners and care coordinators will be stationed at pediatric offices to assist with recommending appropriate levels of care.

Sub-Section 6.5 E

Connection to Social Services Care coordinators and family partners keep each other well informed of resources in our communities. They are able to quickly assess needs and make recommendations for community based services and suggest ways the caregiver/youth may engage the service. We will continue to use our connections with the Family Resource Centers in Springfield and Amherst. We will develop a connection with the newly forming Family Resource Center in Holyoke to bridge families to the free resources like ESL classes, budgeting, job search, school advocacy, Child Requiring Assistance applications, food pantry, parent groups and health awareness topics. Springfield, Robert Van Wart and Holyoke will continue to bring new representatives to our SOC meetings to share opportunities for caregivers. Many referrals are made to ICC due the caregiver requiring help with housing, transportation, and their own mental health needs so the youth can access behavioral health care. When youth do not meet the ICC level of care, Family Resource Centers may also offer a caseworker to get families connected with appropriate services.

In the rural Hilltowns covered by the Holyoke CSA, families are isolated from many services and supports offered in the larger cities. As a result, we have formed partnerships with the Hilltown Health Center to access child care, food banks, and domestic violence supports and services. We have also partnered with various parent advocacy programs like PPAL and Family Support Network to bring parent support groups and trainings to our Westfield and Ware regions. We have experience collaborating with community partners like Jewish Family Services and Ascentria Care Alliance, organizations that work specifically with refugee and immigrant populations to address cultural barriers to engaging and accessing services. We bring in rotating presenters on different social topics that impact our communities served so care coordinators and family partners are up to date on resources in their communities. Web-based training modules related to community resources and the introduction to child-serving systems will enable our staff to gain and maintain a thorough understanding of the community resources available to the youth and families BHN CSA serves. When our staff know who is working on the important needs of the community, we are well equipped to effectively to join in building larger community and systems collaborations, as demonstrated in our CSA program to date.

CSA Budget Report

The Brien Center

Investment Funding		Prep Budget Period	Budget Year 1	Budget Year 2	Budget Year 3	Budget Year 4	Budget Year 5	Total Revenues

Development/Adaptation of EHR and/or Care Management System

Description of Expense	Cost
Acquisition and implementation of etrana CSA electronic health record module	$ 51,000.00
Total Development and Adaptation of EHR and Care Management System	$ 51,000.00

acquisition and etrana implementation of CSA EHR module, licenses for MassHiway integration, CANS interoperability , integration with AR+ billing system

CSA module project implementation $28,000
etrana EHR -upfront costs inclusive of billing integration $11,000
etrana EHR licensing $2,000 / months 4 months $8,000

The etrana CSA module is completely separately separate from the etrana care management platform being use by the BH-CP

Technology for Service Delivery

Description of Expense	Cost
Laptops	$ 8,330.00
Smartphones	$ 2,700.00
Data service for phones	$ 3,600.00
Data air cards	$ 3,600.00
Total Technology for Service Delivery	$ 18,000.00

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Laptops 18@$450
Smart phones 18 @$150
Data service for smart phone s 18 @ $40/ month x 5 months
Air cards for remote Wi-Fi access 18 @ $40/ y r. 5 months

18 FTE represents the number of ICC clinical and supervisory staff

These will enable ICC workers to effectively work in the community, have remote access to email and messaging as well as access electronic health record and ACO resources.

Other Technology Expenses

Description of Expense	Cost
Networks interface/ systems issues	$ 6,000.00
Total Other Technology Expenses	$ 6,000.00

Provide a description of each IT line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Estimate of costs associated with data integration and transition from current I-Centrix server based MSOP EHR to etrana web based CSA EHR module including interface with existing EHR and billing system, EHR provider set ups: 24 hours @$250/ hour. Transition will accommodate the CSA data, billing and messaging requirements)

Project 2 Name: Increase ICC workforce ca.

DSRIP Project Goal(s): 1 *(2) Strengthening fidelity to Wraparound processes, including the core planning,* 2 *(3) Improving timely access to ICC services for children eligible to receive ICC an* 3 *Optional*

CSA Budget Report - Operational Infrastructure - Prep Budget Period

Project 1 Name:

Operational Staffing including Fringe

Position	Annual Salary	FTEs	# Months	Total
Program Manager	$ 48,300.00	0.125	6	$ 3,019
Program Supervisor	$ 36,250.00	0.125	6	$ 2,266
Support staff	$ 28,500.00	0.125	6	$ 1,781
				$ -
				$ -
Total Salary		0.375		$ 7,066
Fringe rate		19.17%	Total Fringe	$ 1,111
			Total Program Staffing including Fringe	$ 8,176

For each position listed above, provide a brief statement of the position's responsibilities, how each will assist in accomplishing the goals of the project:

Program Director oversees the ICC program and this project. During prep period, will be planning out the implementation of the proposal, coordinating training programs, enhancing relationships with primary care and the ACO.

Program supervisor supports and coordinates ICC staff and family partners . During prep period this position will be involved in planning support and family focus groups, improving communications with primary care and assisting staff through program transition

Support staff will assist with planning, material preparation and coordinating communication .

These positions are specifically for CSA and not BH-CP and are currently funded by revenue from CSA billing. The portion being allocated to this project will not be available for generating third party income.

Other Operational Expenses

Description of Expense	Cost
Development of client and primary care education material	$ 1,250.00
Total Other Operational Expenses	$ 1,250.00

Provide a description of each operational expense line item included in the table above, how each will assist in accomplishing the goals of the project and how the costs were determined:

Development of information flyers in English and Spanish including translation, $500. Printing of 2,000 color flyers at .35= $750. = $1250

In future periods it is planned to have mini provider lunch conferences on relevant topics and consumer/community focus groups.

Section 6.2 Executive Summary

Historically, managed care has not evolved significantly in this region, many partnerships have formed over multiple decades, in large part due to geographic isolation in the Berkshires. The Brien Center knows that collaboration is essential to survival in this area, and improved integration between pediatric offices and the Brien Center is vital.

The Brien Center has very strong, collaborative relationships with the recently selected Medicaid ACO Partner, the Health Collaborative of the Berkshires, LLC (HCB). HCB consists of Berkshire Health System and Community Health Partners (CHP), the two largest primary care organizations in the area. HCB is currently negotiating an ACO Contract with EOHHS. HCB and CHP work very closely with the Brien Center, and the strength of our relationships guarantee successful outcomes from the proposed CSA infrastructure projects.

A. Current Performance on Development Plan

The Brien Center, Berkshire County's largest community Behavioral Health agency, has a long history of providing high quality, comprehensive community-based services to youth under the age of 21 with Serious Emotional Disturbance. The Brien Center has demonstrated strong performance to date on the Development Plan. In the last several months, The Brien Center reported multiple successes to the Executive Office of Health and Human Services (EOHHS) that include, but are not limited to:

- Continuing to eliminate waitlist with eight waitlist free months and faster access to care
- Ongoing ability to maintain timely referral assignments to Intensive Care Coordinators (ICCs)
- Hiring and retaining new ICC staff

Of the seven individual initiatives included in the current Development Plan, The Brien Center completed six of the Development Plan's specific tasks, which are as follows:

- Include monitoring/tracking of diagnoses and medications in regular internal audits.
- Utilize regular psychiatric training/consultations to offer psychoeducation on the best ways to locate current, accurate information in electronic medical systems.
- Enhance technical training curricula to focus on family voice, rehearsal, rituals, and celebration of small successes throughout the course of ICC services. Explore and discuss creative options for discharge celebrations/ceremonies with families and youth.
- Introduce and incorporate evidence-based tools for ICCs into Care Planning protocols.
- Continue providing technical assistance to new office manager regarding the various data collection and reporting processes required by the CSA.
- Regularly review communication processes among team members and data manager, with emphasis on ensuring timely communication from ICCs and Family Partners; consistency among data recorded in various tracking systems; and, elimination of confusing steps in the process.

EOHHS received progress reports in March 2017. Brief, current progress reports on these projects since March 2017 follow:

Project	Progress Update
More training regarding "golden thread" and accurate reporting of current medication.	Since April 2017, all group staff meetings have included training on conducting quality-driven assessments, including efforts to gather more comprehensive information. Our work has led to better identification of consumer needs and goals. We have also trained staff to incorporate the youth's diagnosis and current treatments into the Discovery Process.
Ensure that documented efforts of transition planning are evident during chart audits.	We have seen improvements in this area when completing monthly chart audits. We also have provided refreshers about utilization of our Transition Readiness Scale, and key components of purposeful transition.
Develop and implement the practice of training and assisting families in their progressive development of team meeting leadership skills. When appropriate, incorporate family-led team meetings as a measure of transition-readiness.	We have achieved more frequent conversations with families about purposeful transition processes. We are also creating a mechanism for tracking the frequency of family-led meetings.

B. Examples of Strengths and Needs

Strengths

The Brien Center's CSA program meets and exceeds most of the State's CSA program standards. Examples of The Brien Center's CSA program strengths include:

- Strong collaboration with existing community programs, services, and providers throughout Berkshire County.
- Positive scores on quality measures that illustrate fidelity to the Wraparound Model. For example, our CSA scored above both the State and national average on overall Team Observation Measures, and above State and national averages on five of six Key Elements based on the Wraparound Fidelity Index (WFI). We have scored higher than the State average for Overall Fidelity since 2012, and on the WFI since 2014.
- Positive outcomes for youth/families served. Since January 2016, 61% of enrolled youth met their goals and graduated from Wraparound services. Also in 2016, 97.3% of families reported that they felt better able to respond to their child's needs and that they gained knowledge about their child's needs.
- The ability to engage families and "meet them where they are." The Brien Center brings youth and families' voices to the forefront in our Discovery and Individual Action Plan development processes. The most recent Massachusetts Practice Review, conducted in 2016, showed that The Brien Center's average score for the "Family Driven & Youth Guided" element was above the State's average.

Needs/Opportunities for Improvement

The Brien Center sees each identified need as an opportunity to improve the services we deliver to youth and their families. Key needs or opportunities for improvement include, but are not limited to:

- Recruitment and retention of ICC and other staff. Recruitment and retention in the State is difficult, but even more challenging in the Berkshires, given our service area's rural nature. The Brien Center plans to apply for Delivery System Reform Incentive Payment (DSRIP) investment funds to strengthen our ability to both recruit and retain staff.
- The ability to ensure fidelity to the Wraparound model. The Brien Center request infrastructure funds to increase fidelity to the Wraparound model by training senior staff who will then train additional ICC staff in-house.
- Enhancing our connections with Community-Based Organizations (CBOs) and, of creatively identifying additional resources to meet needs.

C. Plans for Improving Timely Access to ICC Services

Today, the Brien Center is fully staffed and offer access to ICC Services within 10 business days. If necessary, we will improve access to ICC services by recruiting and retaining staff as needed. The Brien Center will also apply for DSRIP funds to enhance staff recruitment and retention.

D. Plans for Improving Care Coordination, Care Planning, and Care Management for ICC-Engaged Members

The Brien Center's two requests for Infrastructure and Capacity Building Funding both seek to enhance care coordination, care planning, and care management for ICC-Engaged Members.

First, we plan to conduct ICC Team meetings, when appropriate, in pediatrician's offices, with greater engagement of, and support for, youth, families, and providers. Second, our request for funding to procure expert training in the Wraparound Model and Systems of Care philosophy will further enhance fidelity to the model and will increase coordination, planning, and care management for ICC-Engaged Members.

E. Plans to Improve Performance on Quality Scores and Development Plan Goals

The Brien Center measures structures, processes, and outcomes of care on an ongoing basis. For the CSA, our plan is to develop specific metrics to evaluate: fidelity to the Wraparound Model; improvements in ICC-Engaged Member satisfaction; and, to create other Population Health measures that allow The Brien Center staff to assess and improve performance. In addition, we will continue to meet Development Plan Goals and hope to align our goals with efforts described under this RFR submission.

F. Plans for Improving Coordination with Providers Across the Care Continuum for Youth

The Brien Center's proposed practice-based ICC model maximizes coordination with pediatricians (and other providers) through on-site Care Management meetings in the pediatrician's office. Such meetings may also include other providers, State agencies, family, and CBOs. Through this project, we will improve coordination with providers, as well as CBOs, State agencies, and other stakeholders across the full care continuum.

Section 6.3 Populations Served and Community Engagement

A. Experience with Populations and Community Engagement Strategy

Member Populations and Communities Served

The Brien Center, Berkshire County's largest community Behavioral Health (BH) agency, has a long history of providing high-quality, comprehensive community-based services to youth under the age of 21 with Serious Emotional Disturbance (SED) whose impairments substantially interfere with the youth's ability to function within their family, school, and/or community activities. The Brien Center serves youth who experience trauma, often severe; anxiety disorders; significant learning issues; severe disturbances in interpersonal relationships with peers and teachers; inappropriate behavior, often dangerous or extreme; and oppositional and attention deficit disorders. The Brien Center is highly familiar with each of these issues and treats youths with such symptoms as a CSA in Berkshire County through our Intensive Care Coordination (ICC) program. The Brien Center also serves transitional age youth and adults with Serious Mental Illness and Substance Use Disorders.

Experience and Community Engagement

Our mission is to promote the greatest degree of recovery, independence and quality of life for the youth and families we serve by delivering integrated BH and community-based services with a significant emphasis on integration of primary care. We provide access and supports to meet the BH needs of youth and adults of all ages, race and cultures, and intellects, enabling them to live healthy lives in our community. As part of our approach, we collaborate with State agencies, individuals, families, and other providers to promote a holistic, person-centered approach.

The Brien Center's host of programs—which include the Children's Behavioral Health Initiative, Outpatient Programs, Community-Based Acute Treatment, Therapeutic Day Services, The Continuum, STAY Program, and the Community-Based Flexible Supports Program as well as our CSA designation—offer EOHHS solid credentials to support The Brien Center's participation as a Delivery System Reform Incentive Payment-funded CSA. Our current and active participation in the CSA programs illustrates our ability to care for youth and families with SED. As a CSA, we successfully engage youth and families under the Youth's Behavioral Health Initiative.

At The Brien Center, one of our key objectives is to facilitate the health and well-being of the families we serve. For example, some of our strategies to engage families and youth include actively involving families and youth in the treatment process; delivering culturally and linguistically competent care; employing trained staff who value recovery and wellness as guiding principles of care delivery; and, whenever possible, using evidence-based practices to support care delivery methods and practices.

The Brien Center recognizes the importance of Community-Based Organizations (CBOs) as an integral component of our treatment approach. The Brien Center works closely with Berkshire

Children and Families (BCF) to provide intensive services to youth with serious emotional disorders, including a subcontract with BCF to provide Family Partners for our CSA. BCF subcontractors provide a full-time clinician for their Family Resource Center. In addition, The Brien Center provides group home services for our Continuum under contract with the Key Program. We provide substance prevention programs, among other services to youth, in collaboration with Northern Berkshire Community Coalition; gang prevention services in collaboration with the Pittsfield Community Connection; and substance abuse prevention and outreach through the Berkshire County school system.

The Brien Center has built trusting, collaborative relationships with the youth and families we serve over the past 40 years. Our staff connects with hard-to-reach individuals including those who are homeless, sheltered, and others whose families struggle with alcohol and/or opiate addiction and/or misuse. We help youth and families achieve recovery and wellness goals through our outreach and engagement expertise, helping youth remain in the communities in which they live and work.

Regions or Service Areas Covered: The Brien Center serves consumers in the Pittsfield and Adams service areas, which encompasses all of Berkshire County.

Plans to Promote the Health and Wellbeing of Individuals Served

The Brien Center subscribes to a Systems of Care philosophy to locate, outreach, and engage ICC-Eligible youths and their families, partnering with families, caregivers, and youths in service planning and delivery. We begin with a holistic, culturally and linguistically appropriate Discovery Process that fully engages the family and/or caregivers. By first building rapport and trust, we increase our ability to connect youth and their families in a manner that communicates a sense of safety and acceptance.

The Brien Center meets potential Enrollees at locations in the community where the youth and families are comfortable, which may include but not be limited to their home, school, or their Primary Care Provider's office. We seek to genuinely connect and build trust with the youth and family, regardless of where we physically meet. The Brien Center meets with youth and families without delay, offering easy and immediate access to care. Today, our waiting list extends no more than 10 days. The recent hiring of additional staff and our sensitivity to staff retention also extend our ability to offer accessible care and services.

Engagement Process

The Brien Center's intake system allows any youth or family member to make a referral, which eases entry into services. The Brien Center Intake Coordinator then makes a follow-up phone call to the family to discover and learn the youth and/or family's desires for treatment. Simultaneously, the Intake Coordinator explores referrals and provides the family with an initial appointment time before ending the initial contact. Other efforts to engage or follow-up with families who underutilize or prematurely drop out of services include:

- Ongoing efforts to identify and eliminate barriers that may cause premature termination or sub-optimal treatment outcomes from ICC services

- Place reminder phone calls to youth or families to promote attendance at appointments before the scheduled appointment time
- Train staff in engagement strategies
- Accommodate, to the extent possible, the family's requests for service delivery from The Brien Center clinicians and community support workers
- Collaborate with key stakeholders in the youth's care including State agencies, primary care providers, and other workers from relevant CBOs and/or providers

B. Relationships Within the Community

The Brien Center employs a youth-centered approach to developing and sustaining relationships with CBOs. These relationships promote the health and well-being of the youth we serve, based on holistic needs.

The Brien Center refers youth and families to community-based services and coordinates with social service agencies. We leverage our existing CBO relationships to ensure we meet that the needs of youth and families, as well as to further facilitate ongoing communication and information-sharing regarding the needs of youth and families. The Brien Center ensures that youth and families have timely access to needed community supports.

Our current and planned approaches include developing comprehensive referral and community resource guides for Engaged Enrollees and ACO staff; appointing liaisons to foster relationships and communication with community agencies; executing memoranda of understanding with providers and community organizations regarding the delivery and coordination of services; and, appointing dedicated points of contact for ACOs and MCOs as described in this RFR submission.

Section 6.4 Proposed Project(s) and Investment Plan

A. Project Description

Project 1

1. Name of Proposed Project

Enhanced Intensive Care Coordination and Pediatric Integration

2. Goal and Objectives

Goal: To improve care coordination, care planning, and care management for ICC-Engaged Members.

Objectives:

- Improve continuity and coordination of care
- Improve outcomes of care
- Enhance family-centeredness

3. Project Scope

For this project, The Brien Center will enter a collaborative arrangement with at least three pediatrician's offices in Berkshire County. The Brien Center's Intensive Care Coordinators (ICCs), in collaboration with the selected pediatric offices, will provide coordinated, on-site, interdisciplinary ICC meetings with pediatric representation to youth and families who are enrolled in MassHealth and qualify for ICC services. When possible, Wraparound meetings will include youth and families, State agencies, natural supports, and other key stakeholders to enhance coordination of care for these consumers significantly.

If awarded funding from this Request for Response, The Brien Center will acquire and implement the eHana electronic health record CSA module . This module will enable tracking of clinician and client information and activity as required for the CSA / ICC program, provide secure messaging to primary care providers and ACO partners, capture client signature authorizations and will link to our existing billing system, AR plus. In addition we will purchase communication devices to support facilitation of care coordination including, but not limited to: the purchase of laptops, tablets, smart phones, data service and wi-fi data card services for CSA staff to be able to access the eHana electronic Health Record (EHR) CSA module and the organization's I-Centrix EHR software remotely. Funds will also be expended for technical assistance in transitioning to the eHana software and integrating with the billing software. Using these devices, the ICC will be able to record the Discovery Process, Individual Action Plans, needs, progress and follow-up with ICC Enrollees and share such information with families, their Pediatrician, State agencies, Community-Based Organizations (CBOs) and other key stakeholders.

The Brien Center seeks to significantly enhance coordination of services across the full continuum of care through a combination of integrated care planning meetings and electronic sharing of Discovery Process and Individual Care Plan information. The opportunity to obtain

infrastructure funding to develop a better integrated approach with our local ACO will increase the level of integration and use of best practices for some of the highest-risk individuals among the ACO population.

In 2017, the EOHHS offered Fallon the opportunity to negotiate an ACO contract. The secure messaging component of the eHana software will be used to enhance communication and integration with primary care and other ACO providers. Pending support and confirmation from Fallon, CBOs and other providers who are seeking integrated care for youth and their families will be able to access consumer assessments, care plans, and ongoing needs information.

As part of workforce development, DISRIP funds will be used for three managers to take part in the University of Massachusetts primary care integration certificate program. This knowledge and material will be shared with ICC staff as ongoing staff training and development.

The Brien Center submitted a proposal to EOHHS to become the Behavioral Health Community Partner (BH-CP) for the Pittsfield and Adams service areas. If awarded the contract, The Brien Center will also work with families served by the ACO and contracted BH-CP. As a result, The Brien Center would be able to provide care to entire families, rather than splitting families between different ACOs or MCOs. Our ability to offer care to entire families will add another level of integration to care delivery.

If awarded Delivery System Reform Incentive Payment (DSRIP) funds, The Brien Center has identified the following pediatric practices to participate in this DSRIP initiative: MACONY Pediatrics, Northern Berkshire Pediatrics, Berkshire Pediatric Associates, and Berkshire Pediatrics of Community Health Programs (CHP).

In collaboration with these pediatric practices, The Brien Center will:

- Create a learning collaborative including pediatricians selected for participation, The Brien Center leadership and ICC staff and, a quality expert to oversee development and improvement activities.
- Bring together pediatricians, key office staff, ICC staff, State agencies, and other key stakeholders for a working meeting to discuss project development, challenges in managing youth with Serious Emotional Disturbance, successes that might be replicated, and opportunities to improve care delivery. We will hold collaborative meetings at least twice annually, in addition to ongoing contact with the ICC at the pediatrician's office.
- Invite Wraparound experts to discuss best practices with our Learning Collaborative members and to react to progress to date on our initiative.
- Support pediatric practices in integrated care delivery by providing services that include, but are not limited to:
  - Training pediatric practices on how to maximize fidelity to the Wraparound Model.
  - Increasing connectivity with, and referrals to, CBOs. The Brien Center ICCs will follow-up on referrals and ensure that youth and family needs are met, thereby easing the pediatrician's required level of effort.
  - Optimizing workflows and re-designing processes to maximize care integration.
  - Bringing key stakeholders to the pediatricians' office in a coordinated manner.

- Periodic, regularly scheduled meetings to participate in Berkshire Health System Pediatric Section meetings, where Brien Center management staff can update pediatricians across our service area on our Enhanced ICC and Pediatric Integration to seek further participation. Our goal will be to replicate our best practice approach in additional practices over time.
- Facilitate community-wide collaboration by inviting staff from pediatric practices to attend our Systems of Care Committee meetings.
- Identify and quantify metrics based on State requirements and quality improvement needs.

4. Proposed Deliverables

For this project, The Brien Center will provide EOHHS with the following deliverables:

- Joint ICC service delivery option at pediatricians' offices
- Sharing of Discovery documentation and Individual Action Plans among families, the youth's pediatrician and the ICC, State agency staff, and other key stakeholders as appropriate
- Improved outcomes, based on metrics that illustrate enhanced coordination and integration of care

5. Specific Use of DSRIP Funds and Support of Project Goals

If awarded Infrastructure and Capacity Building Funding, The Brien Center will use the award for:

Category	Detail
Prep Budget Workforce Development Investments	Training fees for three managers to take part in the University of Massachuetts primary care integration certificate program
Year 3 & 5 Workforce Development	Refresher training for University of Massachusetts primary care integration certificate program for 2 staff.
Prep period operational infrastructure investments	Allocated time of program managers, program supervisor and support staff. (see budget narrative) During prep period these positions will be involved in planning provider and family focus groups, improving communications with primary care and assisting staff through program transition. Development and printing of educational and promotional material for clients and primary care offices, planning of mini provider conferences, focus groups and incentives.
Year 1 Budget-Operational Infrastructure Investments	Allocated time of program managers, program supervisor and support staff. During budget period 1 these positions will be involved in implementation of ACO integration, provider and family focus groups, facilitating communications with primary care and assisting staff through program transition. Expenses related to mini provider education conferences on relevant subject matters. Three planned in Period 1, and four planned per subsequent budget period. Expenses related to client focus groups including incentives. Three planned in period 1 & 2, and two in periods 3–5.
Years 2-5 Budget-Operational Infrastructure	Expenses related to mini provider education conferences on relevant subject matters. Three planned in Period 1, and four planned per subsequent budget period. Expenses related to client focus groups including incentives for attendance.

Category	Detail
Investments	· Community education on CSA/ACO options and services.
Prep Budget-Technology Investments	· Acquisition and ehana implementation of CSA EHR module, licenses for MassHiway integration, CANS interoperability , integration with AR+ billing system; technical assistance related to data integration and transition with existing EHR and billing system; Purchase of laptops, smart phones, data service and Wi-Fi data card service for CSA staff to be able to access EHR and assessment material remotely. ·
Year 1 Budget-Technology Investments	· Ongoing cost of data service and Wi-Fi data card service for CSA staff to be able to access EHR and assessment material remotely. · · Ongoing ehana licensing fees and technical assistance on data analysis an integration of systems
Years 2-5 Budget-Technology Investments	· Replacement of laptops, smart phones; ongoing data service and Wi-Fi data card service for CSA staff to be able to access EHR and assessment material remotely. · •Ongoing ehana licensing fees and technical assistance on data analysis an integration of systems · . ·

NOTE: Laptops, smart phones, data services, and Wi-Fi data cards will be used for all MassHealth patients, not only those who are served by an integrated pediatric/ICC practice; the equipment will be assigned to the CSA /ICC program for use with all clients seen in the program. Software and tablets would be used to document the CANS, Discovery, and Care Planning processes, and to obtain provider and patient signatures

6. Internal Resources

The Brien Center will use a variety of internal resources to support the Enhanced ICC Pediatric Integration Initiative, leveraging The Brien Center's physical business location, and Information Technology (IT) systems and hardware.

Staff resources—which The Brien Center plans to use to develop, implement, and run this project—include the following:

- The Brien Center's Senior Management Team will participate on an in-kind basis. Specifically, the following individuals will serve as key internal resources on the project. A small portion of the direct program management will be allocated as a project cost in the prep period and period 1 (see budget and narrative) for planning and implementation :
  - James Mucia, LICSW, Division Director, Child and Adolescent Services (.05 % of total FTE)
  - Morgan Langlois, MA, Program Director, Community Service Agency (15% of total FTE)
  - Meg Ryan, M. ED., Program Supervisor/Senior ICC (15% of total FTE)
  - Carrie Crews, Program Coordinator/Senior Family Partner (15% of total FTE)

Resumes and job descriptions for individual staff members are included as **Attachment 6.4.A.1** and **Attachment 6.4.A.2** of this RFR submission.

7. Funds Allocations

Not applicable. See section 5 and budget narrative

8. Internal Evaluation, Measurement and Performance Management Strategy

The Brien Center will employ its existing Quality Management/Quality Improvement (QM/QI) process to evaluate, measure, and improve performance under the Enhanced ICC Pediatric Integration Initiative. In addition to The Brien Center's standard QM/QI process, we will employ specific metrics and strategies to identify opportunities to improve performance under this initiative.

The Brien Center will develop and implement a specific QM/QI and performance management strategy based on the types of data and domains EOHHS provided in the RFR and Model Contract as described above. We currently maintain a robust QM/QI department, which we will leverage for the CSA Infrastructure and Capacity Building Initiative. We will integrate care by establishing data-driven goals and processes within our organization and will share data with the Learning Collaborative, described in this RFR submission.

QM/QI staff who will be responsible for this initiative will report data findings, progress, and opportunities to improve to the Brien Center QM/QI Committee, which will suggest improvement opportunities to the Brien Center Board of Directors. Staff will further design interventions and track their effectiveness. The QM/QI Committee will report directly to the Board, which oversees improvement efforts for the overall organization.

For the CSA Infrastructure and Capacity Building Initiative, The Brien Center will outline specific program goals and an approach to achieve each. Our goals will be incorporated into The Brien Center's Development Plan and will serve as the basis for QM/QI efforts, which will also be embedded in the CSA's Quality Management Plan. Based on data findings, The Brien Center will outline specific QI initiatives, processes for performance monitoring, and our approach to continuously improve CSA Infrastructure and Capacity Building projects.

The Brien Center further understands that EOHHS will calculate the Contractor's Quality Score and DSRIP Accountability Score as described in Section 4.2 of Appendix A–CSA Quality and Accountability to the Model A Contract including claims-based measures, chart review measures, and member care experience surveys across the following seven domains:

- Prevention and Wellness
- Chronic Disease Management
- Behavioral Health/Substance Use Disorder
- Member Experience
- Integration
- Preventable Utilization
- Youth and Family Engagement

The Brien Center will employ data required by the State to drive all QM/QI efforts and plans to monitor and improve results required by the State continuously.

Specifically, we will monitor and measure data outcomes below. The data collected will directly measure Pediatric medical involvement in Care Planning and improved outcomes for youth and families.

Project 1: Enhanced ICC & Pediatric Integration

- Specific measures to evaluate impact:
  - We will internally track the percentage of youth transitioning from services with a successful "graduation" (i.e. a Wraparound term which refers to discharging of a youth and family after success achieving goals in their Care Plan).
  - We will internally track PCP involvement in the care planning process as reported on the care plan document
- Goals for the measure:
  - Improve percentage of youth graduating with goals met from 63% (current) to 75% by the end of Budget Period 3 (2020), increase by 4% each year and will evaluate quarterly.
  - Improve percentage of PCP involvement in care planning process from 18% (current/baseline) to 50% by the end of Budget Period 4 (2021), increase by 8% each year and will evaluate quarterly
- Evaluate quarterly for progress outlined above
- Internal data collection utilizing existing data tracking spreadsheets and care plan documentation and internal audits. Internal data is collected in a shared drive excel spread sheet with all ICCs reporting on each case.
- Jim Mucia, LICSW Division Director and Morgan Langlois, MA Program Director will track performance

Project 2

1. Name of Proposed Project

Increase ICC Workforce Capacity

2. Goal and Objectives

Goal: To improve the quality of care provided to ICC-Engaged youth and families through best practice training and development efforts.

Objectives:

- To enhance technical and clinical capacity within The Brien Center
- To maximize workforce development efforts by training senior ICC staff in best practices in Wraparound and leveraging their skills to train additional Brien Center staff
- To ultimately develop the capacity to conduct ICC training for staff and pediatricians using internal staff, trained in best practices in the Wraparound Model and System of Care Philosophy

3. Project Scope

For this project, The Brien Center will build capacity to train between three and five senior Brien Center staff in best practice approaches to Wraparound service delivery and Systems of Care Philosophy. These staff would be responsible for educating additional ICC staff. Ultimately, such training efforts will allow The Brien Center ICC Management Team and staff to make significant strides in maintaining and enhancing fidelity to the Wraparound Model and Systems of Care philosophy.

The Brien Center will identify and purchase intensive training services from the National Wraparound Implementation Academy or other appropriate organizations. In addition, The Brien Center will use services provided by the State's Wraparound Coaches to complement the intensive training services. Over time, our goal is to train a select group of The Brien Center staff in best practice approaches in Wraparound services, who can then train other The Brien Center staff.

Using this approach, The Brien Center will create an internal credentialing and re-credentialing process for ICC staff. In addition to the "train the trainer" model that will result from this initiative, we will utilize workbooks and curriculum previously developed by the State of Massachusetts as part of our certification and re-certification program. Bringing the training function into The Brien Center will allow our management team to stay current on best practices in ICC service delivery while providing the opportunity to train our own staff and increase fidelity to the Wraparound Model. This strategy, which enhances our ability to promote sustainability of training efforts, will be incorporated into The Brien Center's ongoing ICC training. The Brien Center believes that this approach will be replicable and can serve as a best practice model nationally.

Participation in developing training capabilities through external training for three to five staff will also allow The Brien Center to network with other CSA programs, creating the ability to share information on best practices and strategies to serve clients on an ongoing basis.

4. Proposed Deliverables

The Brien Center will provide EOHHS with the following deliverables because of this funding opportunity:

- Training curriculum for The Brien Center ICC Staff
- Training evaluations by staff to assess the staff's fidelity to the Wraparound Model
- A replicable model for other ICCs in Massachusetts where The Brien Center may serve as a best practice model nationally
- Certification and re-certification standards and requirements
- 100% of CSA staff trained in best practices related to the Wraparound Model and Systems of Care Philosophy

Planned Methods and Activities:

For this project, The Brien Center will:

- Review available holistic training programs regarding the Wraparound Model and a System of Care Philosophy including, but not limited to, training available from the National Wraparound Academy and the State of Massachusetts
- Develop criteria for selecting a training program
- Procure training services from the State and national resources to enhance The Brien Center staff expertise in treating ICC-Engaged Members in a manner that maximizes the opportunity to create a sustainable in-house training program
- Develop a training curriculum
- Develop standards and requirements for ICC certification and re-certification in Wraparound service delivery and System of Care Philosophy
- Implement training services for ICC staff
- Implement training for pediatricians and other clinicians who participate in the Integrated Care project
- Establish a sustainable approach to train additional The Brien Center Staff
- Evaluate value of training services based on The Brien Center staff feedback and improvements in EOHHS metrics associated with processes and outcomes of care
- Develop plans to replicate the curriculum and training model for other ICC programs
- Develop and execute additional training based on Workforce development needs and requirements

5. Specific Use of DSRIP Funds and Support of Project Goals

If awarded DSRIP funds, The Brien Center will use the award for the following uses:

Category	Detail
Prep Budget-Operational Infrastructure Investments	· Technical consulting on replacing current billable hour based productivity incentive to a new method that is relevant to the change in ICC payment structure
Prep period Budget Workforce Development Investments	Recruitment of difficult to fill ICC positions
Year 1 Budget Workforce Development Investments	· Attendance and related expenses to attend a national conference on Wrap around service delivery models for three supervisors. The intent is to bring this expertise in house utilizing train the trainer model. · · Recruitment of difficult to fill ICC positions
Years 3 and 5 Budget Workforce Development Investments	· Attendance and related expenses to attend a national conference on Wrap around service delivery models for two supervisors. The intent is to bring this expertise in house utilizing train the trainer model and provide refresher training. · · Recruitment of difficult to fill ICC positions

6. Internal Resources

The Brien Center will use a variety of internal resources to support the proposed initiative to Increase ICC Workforce Capacity, leveraging The Brien Center's physical business location, IT systems, and hardware.

Staff resources—which The Brien Center plans to use to develop, implement, and run this project—include the following:

- The Brien Center's Senior Management Team will participate on an in-kind basis. Specifically, the following individuals will serve as key internal resources on the project:
  - James Mucia, LICSW, Division Director, Child and Adolescent Services (.05 % of total FTE)
  - Morgan Langlois, MA, Program Director, Community Services Agency (15% of total FTE)
  - Meg Ryan, M. ED., Program Supervisor/Senior ICC (15% of total FTE)
  - Carrie Crews, Program Coordinator/Senior Family Partner (15% of total FTE)

Resumes and job descriptions are included as Attachment 6.4.A.1 and Attachment 6.4.A.2 of this RFR submission.

7. Funds Allocations

Not applicable.

8. Internal Evaluation, Measurement and Performance Management Strategy

For the CSA Infrastructure and Capacity Building Initiative, The Brien Center will outline specific program goals and an approach to achieve each. Our goals will be incorporated into The Brien Center's Development Plan and will serve as the basis for QM/QI efforts, which will also be embedded in the CSA's Quality Management Plan. Based on data findings, The Brien Center will outline specific QI initiatives, processes for performance monitoring, and our approach to continuously improve CSA Infrastructure and Capacity Building projects.

The Brien Center will employ its existing QM/QI process to evaluate, measure, and improve performance under the Enhanced ICC Pediatric Integration Initiative. In addition to The Brien Center's standard QM/QI process, we will employ specific metrics and strategies to identify opportunities to improve performance under this initiative.

We will integrate care by establishing data-driven goals and processes within our organization and will share data with the Learning Collaborative, as described in this RFR submission. The Brien Center currently maintains a robust QM/QI department, which we will leverage for the CSA Infrastructure and Capacity Building Initiative. We will develop and implement a QI/QM and performance management strategy based on the types of data and domains required by EOHHS in the RFR and Model Contract within our existing QM/QI structure.

The Quality Committee will report directly to the Brien Center Board of Directors, which oversees improvement efforts for the overall organization. ICC QM/QI staff will report data findings, progress, and opportunities to improve to The Brien Center's QM/QI Committee, which will suggest improvement opportunities to the Board. Staff will further design interventions and track their effectiveness with ongoing reporting to the Board as needed.

The Brien Center further understands that, if The Brien Center is selected as a CSA Contractor that receives Infrastructure dollars, EOHHS will calculate a Contractor's Quality Score and DSRIP Accountability Score as described in Section 4.2. of Appendix A–CSA Quality and Accountability

to the Model A Contract. This score will include claims-based measures, chart review measures, and member care experience surveys across the following seven domains:

- Prevention and Wellness
- Chronic Disease Management
- Behavioral Health/Substance Use Disorder
- Member Experience
- Integration
- Preventable Utilization
- Youth and Family Engagement

The Brien Center will employ data required by the State to drive all QM/QI efforts and plans to continuously monitor and improve results required by the State as described above.

Specific Measures for Increase ICC workforce capacity include:

- Specific Measures:
    - TOM scores measuring fidelity to wraparound. Results are reported to the CSA annually. Staff are observed two times between annually between July 1 and June 30.
    - Percentage of staff trained/completed internal credentialing process.
- Goals for the measure:
    - Maintain and/or improve overall TOM score. Current Key Element Score is 82%. The goal is to maintain or improve this relatively high score
    - 100% of ICC staff will complete internal credentialing process by the end of BP2 (2019), increase by 50% each year
- Evaluate quarterly for progress—assess above by measuring staff completing full enhanced Wraparound internal training.
- Data regarding TOM will come from MBHP. Training data will be tracked internally using excel spreadsheets
- Jim Mucia, LICSW Division Director and Morgan Langlois, MA Program Director will track performance

B. Project Team Description

1. Organizational Chart

The Brien Center's Senior Management Team and Child and Adolescent Team's organizational charts are included as **Attachment 6.4.B.1** and **Attachment 6.4.B.2.**

2. List of Current Staff Proposed for the Projects

A list of staff proposed for the projects appears below.

3. Proposed Staff to Be Hired

The Brien Center does not plan to hire new staff for the proposed projects.

4. Roles and Responsibilities of Team Members

The roles and responsibilities of all The Brien Center team members are described below in Table 6.4.1. of this RFR section.

The Brien Center proposes the following staff to participate in Project 1 and Project 2, which are described above. In addition, resumes and job descriptions are included as **Attachment 6.4.A.1** and **Attachment 6.4.A.2** of this RFR submission.

Table 6.4-1. Internal The Brien Center Staff

Name/Credential	Position	Project Role and Responsibilities	% FTE
Christine Macbeth, LICSW, ACSW	President and Chief Executive Officer	Accountable for contract and funding requirements	2%
Paul Hickling, MS	Vice President of Service Operations	Oversight of BH-CP contract if awarded	2%
Jeff Pringle, MBA	Vice President of Administration and Finance	Financial oversight of all budget and funding matters	2%
James Mucia, LICSW	Division Director Child and Adolescent Services	**Projects 1 and 2**: Provider Project Leadership for Project 1 and 2. Programmatic project oversight of ICC staff; project strategy and implementation oversight; quality oversight; and liaison to Senior Management on both initiatives	5%
Morgan Langlois, MA	Program Director, Community Service Agency	**Project 1:** Provide Day-to-Day Project oversight and ICC staff supervision Deliver ICC services in pediatrician's offices Develop and foster relationships with pediatric offices to integrate care **Project 2:** Participate in leadership training and develop core curriculum and certification program	15%
