New Jersey Comprehensive Waiver Demonstration Section 1115 Quarterly Report Demonstration Year: 6 (7/1/17-6/30/18) Federal Fiscal Quarter: 2 (1/1/18-3/31/18)

I. Introduction

The New Jersey Comprehensive Waiver Demonstration (NJCW) was approved by the Centers for Medicare and Medicaid Services (CMS) on August 1, 2017, and is effective August 1, 2017 through June 30, 2022.

This five year demonstration will:

- Maintain Medicaid and CHIP State Plan benefits without change;
- Streamline benefits and eligibility for four existing 1915(c) home and community-based services (HCBS) waivers under one Managed Long Term Services and Supports Program;
- Continue the service delivery system under two previous 1915(b) managed care waiver programs;
- Eliminate the five year look back at time of application for applicants or beneficiaries seeking long term services and supports who have income at or below 100 percent of the Federal Poverty Level (FPL);
- Cover additional home and community-based services to Medicaid and CHIP beneficiaries with serious emotional disturbance, autism spectrum disorder, and intellectual disabilities/developmental disabilities;
- Transform the State's behavioral health system for adults by delivering behavioral health through behavioral health administrative service organizations; and
- Furnish premium assistance options to individuals with access to employer-based coverage.

In this demonstration the State seeks to achieve the following goals:

- Create "no wrong door" access and less complexity in accessing services for integrated health and Long-Term Care (LTC) care services;
- Provide community supports for LTC and mental health and addiction services;
- Provide in-home community supports for an expanded population of individuals with intellectual and developmental disabilities;
- Provide needed services and HCBS supports for an expanded population of youth with severe emotional disabilities; and
- Provide need services and HCBS supports for an expanded population of individuals with cooccurring developmental/mental health disabilities.
- Encourage structural improvements in the health care delivery system through DSRIP funding.

This quarterly report is submitted pursuant to Special Term and Condition (STC) 101 in the New Jersey Comprehensive Waiver; and in the format outlined in Attachment A of the STCs.

II. Enrollment and Benefit Information

Summary of current trends and issues related to eligibility, enrollment, disenrollment, access, and delivery network.

There have been no changes in trends or issues related to eligibility, enrollment, disenrollment, access, and delivery network in the current quarter.

Summary of any changes or anticipated changes in populations served and benefits. Progress on implementing any demonstration amendments related to eligibility or benefits.

There are no anticipated changes in populations served or benefits.

IV. Outreach/Innovative Activities to Assure Access

MLTSS

The State has continued to maintain its efforts to ensure that consumers, stakeholders, MCOs, providers and other community-based organizations are knowledgeable about MLTSS. The State has depended on its relationships with stakeholder groups to inform consumers about the changes to managed care.

During this quarter, DHS gave MLTSS updates to the following long term care industry providers:

On January 24, 2018, the New Jersey Medical Assistance Advisory Council, a group comprised of medical care and health services professionals who advise the State's Medicaid Director.

On February 22, 2018, the MLTSS Steering Committee its representation from stakeholders, consumers, providers, MCOs and state staff members.

On March 6, 2018, the annual NJ Hospital Association MLTSS/Managed Medicaid Update Seminar. The DHS and the MCOs are participants in this annual seminar which offers providers the opportunity to learn about specific topics as well as network and meet with State and MCO representatives.

The meeting topics included the NJ FamilyCare Data Dashboard Portal, Substance Use Disorder Waiver, Any Willing Qualified Provider (AWQP), the Division of Developmental Disabilities Supports Program, and Medicaid updates including a summary of January 2018 contract changes, NJ FamilyCare enrollment overview, Medicaid-Medicare Alignment, and the Diabetes State Plan Amendment.

The NJ FamilyCare Data Dashboard is a public-facing portal is a result of a 12-month technical assistance grant through CMS Innovative Accelerator Program. Phase 1 of this multi-phase project will launch in the Summer 2018 and will provide public access to CAHPS (Consumer Assessment of Healthcare Providers and Systems), HEDIS and Clinical Measures, Eligibility, and Long Term Care data. The portal will be accessible through a mobile friendly and browser independent platform.

The Medicaid Substance Use Disorder Waiver within the 1115 waiver authority expands Medicaid coverage to provide a full continuum of SUD services that includes case management and peer recovery support services.

The DDD Supports Program funds services and supports for NJ adults with intellectual and developmental disabilities who live in a non-licensed setting. These supports and services include employment/day services, individual/family supports, and supported employment.

The AWQP program is a foundational step in the State's evolving value based purchasing (VBP) strategy. Webinars have been held for the stakeholder community and a webpage has been established to share

data and materials for this initiative. The AWQP initiative launch in January 2018 when the second release of Minimum Data Set (MDS) quality performance data was sent to the Nursing Facilities. (NFs) The multi-year rollout of AWQP is under the purview of DHS in collaboration with a NF Quality Workgroup, which is comprised of long term care industry and consumer stakeholders.

The Office of Managed Health Care (OMHC) has remained committed to its communications efforts to ensure access through its provider networks. Its provider-relations unit has continued to respond to inquiries through its email account on these issues among others: MCO contracting, credentialing, reimbursement, authorizations, appeals and complaint resolution. A comprehensive overview of contract changes effective with the January 2018 contract were provided at all three stakeholder meetings referenced.

Additionally, strategy sessions were presented as a new option for MLTSS Steering Committee members to explore ad-hoc topics that require additional discussion and analysis. Identified committee chairs will plan and lead specific topic areas and report back to the steering committee. These reports will include an analysis of the issue and recommendations.

SED/I-DD/ASD:

The Department of Children and Families (DCF), Children's System of Care (CSOC) promotes their program at their many meetings throughout the state and plans to continue to do so at community meetings.

Supports

The Division of Developmental Disabilities (DDD) is responsible for the daily operations of both the Supports Program (SP) and the Community Care Program (CCP). DDD addresses outreach and activities to address access to both their programs concurrently as both programs have very similar providers, advocacy organizations, and supports and services. The primary difference between the two programs is the required level of care. It is intentional that information about both programs is shared at the same time and to the same audiences. This enables clear and consistent communication to individuals, families, providers, advocacy organizations and State staff.

During this quarter, the Division of Developmental Disabilities (DDD) continues enrollment of individuals into the Supports Program. As of the end of the reporting quarter, DDD enrolled 1,137 individuals in the Supports Program.

DDD began reviewing results of National Core Indicators family surveys in order to begin identifying areas in need of improvement and developing plans to address these areas. DDD is awaiting results from the individual surveys before initiating stakeholder involvement in this process. DDD continued revisions to the Supports Program Policies & Procedures Manual based on input from stakeholders, changes made to improve services, etc.

DDD is continuing enrollment of individuals into Supports Program + Private Duty Nursing (PDN) and provides options counseling to individuals identified as needing PDN.

DDD continues to meet with the trade organizations and individual providers to assist in preparation for the Medicaid-based, Fee-for-Service system. DDD continues to answer provider questions and provide guidance on the application process for provider enrollment. In addition, DDD continues to assist individuals with Medicaid eligibility including assisting individuals in accessing Supports Program only Medicaid.

NJ CAT assessments, supplemental assessments, reassessments as needed and DDD continues to work through the process of Day Habilitation.

The Division of Developmental Disabilities (DDD) is responsible for the daily operations of both the SP and the CCP. DDD addresses outreach and activities to address access to both their programs concurrently as both programs have very similar providers, advocacy organizations, and supports and services. The primary difference between the two programs is the required level of care. It is intentional that information about both programs is shared at the same time and to the same audiences. This enables clear and consistent communication to individuals, families, providers, advocacy organizations and State staff.

On January 1, 2018, there were 11,114 individuals enrolled on the CCP and on March 31, 2018, there were 11,159 individuals enrolled on the CCP. There were 360 individuals that were enrolled onto the CCP during this quarter despite the growth showing a minimal increase. The reason for the limited increase is that an average of 101 individuals were terminated from the CCP each month, 120 individuals were enrolled on the CCP each month, and 30 applications were pending processing at Medicaid each month. The primary reasons for terminations were due to SSI terminating and the need to apply for Medicaid as a result of the SSI Medicaid terming and death.

In December 2017, DDD began a Council on Quality and Leadership initiative to build quality outcomes into services

1,740 individuals in the CCP were transitioned into FFS/Rate Structure model from the existing costreimbursement model and have approved service plans.

Routine meetings with providers and individuals/families regarding the system reform (including both the Supports and CCP Programs). These calls provide the opportunity for stakeholders to share issues/concerns as they come up, receive updates, and suggest ideas/feedback.

DDD provided ongoing guidance to providers on the application process for provider enrollment. In addition, DDD provided guidance to providers and families regarding obtaining and maintaining Medicaid and to providers regarding claiming questions.

DDD continues to meet with the trade organizations and individual providers to assist in preparation for the Medicaid-based, Fee-for-Service/Rate structure system.

NJ CAT assessments, supplemental assessments, reassessments as needed and DDD continues to work through the process for Day Habilitation.

IME

CCP

During Demonstration Year 6, Federal Fiscal Quarter 2 (1/1/18-3/31/18) the 24 hour call center at the IME received and responded to 14,055 calls. 2,667 of those calls were referred to treatment and 1,509 were provided Care Coordination services to facilitate treatment. The IME Utilization Management issued 5,766 treatment authorizations for Medicaid recipients and 5,374 clinical extensions of treatment for Medicaid recipients.

The IME maintains a Statewide Capacity Management System (SCMS) and has been working in cooperation with Medicaid, Molina and DOH to upkeep that system with current and newly enrolling providers. They have assisted Medicaid to identify Medicaid providers at each level of care for all the

Residential treatment services and Medicaid will work with the IME to establish a process to keep this system up to date. The DOH Office of Licensing has been working with Medicaid to determine bed availability for each Medicaid provider and the comprehensive list of residential providers is near complete. Currently, Medicaid is verifying the data collected and will begin the same process to establish a comprehensive list of Outpatient providers by level of care and region.

The IME in partnership with the NJ, DOH, DMHAS are planning a statewide provider ASAM training by the Change Companies and the projected dates are to be in September of 2018. This training was originally projected for May but due to budget approval processes and the availability of the trainers the tentative dates have been pushed back.

SUD/OUD

New Jersey submitted the Implementation Plan to CMS on February 9, 2018 and has been working with CMS to edit and finalize the Plan and it is pending approval.

New Jersey submitted the Monitoring Protocol to CMS March 29, 2018 and it is pending approval.

NJ Medicaid has established a multi-agency workgroup to improve access to Medication Assisted Treatment (MAT). A provider survey has been developed and is in process to determine barriers to providing this care, particularly at the residential level. The survey results will allow the State to address the barriers identified and improve access.

NJ Medicaid is preparing provider trainings for Residential treatment services, ASAM placement requirements, coverage, authorization and billing. Training is scheduled for May 25, 2018 and is pending CMS approval of New Jersey's implementation plan.

Surveys were sent to all providers, prevention agencies, and grass roots organizations who peer support services for SUD treatment. The survey period has ended and survey results are currently being compiled by DMHAS.

NJ FamilyCare is working with MCOs to manage Behavioral Health services, including SUD treatment for MLTSS, FIDE-SNP and DDD Medicaid plans. All the SUD services will utilize ASAM placement criteria and this has been included in the MCO contracts under Article 9.9.4.C.

V. Collection and Verification of Encounter Data and Enrollment Data

Summary of Issues, Activities or Findings

No issues or findings.

VI. Operational/Policy/Systems/Fiscal Developments/Issues

MLTSS

DMAHS convenes a bi-weekly meeting with state staff from the various Divisions involved in MLTSS to discuss any issues to ensure that they are resolved timely and in accordance with the rules and laws that govern the Medicaid program. The state also continues to have monthly conference calls with the MCOs

to review statistics and discuss and create an action plan for any issues that either the State or the MCOs are encountering.

SED/I-DD/ASD:

DCF, CSOC continues ongoing enrollment of youth in the Children's Support Service Program (CSSP), Intellectual/ Development Disabilities (CSSP I/DD) and the Autism Spectrum Disorder (ASD) Pilot. As of March 31, 2018, there were 154 youth identified for the ASD Pilot program and 987 youth identified for the CSSP I/DD Program. As of March 31, 2018, 304 CSSP SED Plan A youth have been enrolled through the Children's Support Services Serious Emotional Disturbance program.

CSOC's Contracted Systems Administrator (CSA), and DMAHS's fiscal agent, Molina, continue to hold implementation meetings as needed.

CSOC continues to build ASD, I/DD-MI and SED provider networks.

Technical assistance continues to be ongoing to assist and provide new ASD, I/DD providers related procedures and expectations. CSOC also provided technical assistance to providers regarding the Medicaid enrollment process; to ensure that providers receive Medicaid ID for billing; and to receive requisite provider enrollment training.

Supports

As previously indicated most operational, policy, systems and fiscal developments/issues for both the SP and CCP are concurrently shared/discussed at meetings and through communications.

During this quarter, the Division of Developmental Disabilities (DDD) attended the Medical Assistance Advisory Council (MAAC) Meeting on January 24, 2018 and provided an update on the Supports Program and answered questions.

DDD attended the quarterly Transition Coordinators Network meeting and provided information about Supports Program eligibility and services available through the Supports Program as well as information regarding becoming DDD eligible prior to exiting the school system.

DDD also attended an event spearheaded by a Support Coordination Supervisor in order to identify areas in need of further training for Support Coordination Agencies. This meeting led to bringing together a workgroup of DDD, Support Coordination, and training entities to develop a curriculum to provide further training to Support Coordinators. In addition, DDD attended the New Jersey Council on Special Transportation (NJ COST) meeting to provide information about transportation options for people enrolled in the Supports Program and give transportation providers information about how they can receive funding for providing transportation to individuals enrolled in the Supports Program.

DDD Held a Q&A session with Support Coordination Agencies connected to the Alliance for the Betterment of Citizens with Disabilities. (one of the trade organizations in NJ) DDD met with representatives from the trade organizations.

DDD met with Support Coordination Leadership – a group of Support Coordination representatives from the 3 trade organizations – to discuss issues, brainstorm solutions, etc. DDD also met with interested potential providers that currently provide services out-of-state or for individuals under 21 to explain the process for becoming a Medicaid/DDD approved provider, identify services available through the Supports Program, answer questions, and provide information/materials.

DDD held the family Advisory Council meeting and Provider Leadership meeting. DDD conducted site visits, meetings, and phone calls with providers in need of technical assistance as they shift to Fee-For-Service (FFS) and begin to serve individuals enrolled in the Supports Program.

ССР

As previously indicated most operational, policy, systems and fiscal developments/issues for both the SP and CCP are concurrently shared/discussed at meetings and through communications.

During this quarter, the Division of Developmental Disabilities (DDD) held the Support Coordination Supervisors meeting. In addition, the Quarterly Provider Leadership meeting was held on April 24, 2018. The March quarterly meeting was moved to April due to NJ State offices being closed for snow. The Quarterly Family meeting was held on April 24, 2018. The March quarterly meeting was moved to April 24, 2018. The March quarterly meeting was moved to April 24, 2018.

DDD represented at the Medical Assistance Advisory Committee meeting on January 24, 2018

DDD attended the quarterly Transition Coordinators Network meeting and provided information about Waiver program eligibility and services as well as information regarding becoming DDD eligible prior to exiting the school system.

The Waiver Unit became responsible for responding to questions submitted to a "DDD Medicaid Eligibility Helpdesk" to assist families, providers, advocates, etc. During this quarter there were 385 questions submitted and 385 questions answered. The majority of questions, 45% were regarding the loss of Medicaid and what are the next steps to regain Medicaid, 14% of the questions addressed IT issues such as questions related to Medicaid prior-authorizations, 12% of the questions were related to individuals whose income exceeded 100% of the FPL, and the remainder of questions focused on ABLE account information, Qualified Income Trust information, DDD Intake questions, and generic questions that may not have been Medicaid related.

DDD Conducted site visits, meetings, and phone calls with providers in need of technical assistance as they shift to FFS and begin to serve individuals enrolled in the Supports Program. In addition, Q&A webinars were held on the Waiver Programs and Fee-for-Service. DDD also provided presentations at the Regional Family Support Councils throughout the state.

DSRIP

Quarterly Payment Reports – No payments have been made yet to hospitals for DY6. Semi-Annual 1 Stages 1 and 2 Progress Report payments are being considered for April.

Progress in meeting DSRIP goals – CMS is reviewing Semi-Annual 1 Progress Reports. DY6 Attribution Rosters were provided to hospitals on March 16, 2018. Standard Reporting Workbooks are due from the hospitals on April 30, 2018. Databook 4.0 (first of two updates) released to industry on February 19, 2018.

Performance – 3 hospitals (Hackensack/Mountainside, Cape Regional, and St Luke's Hospital) withdrew the DSRIP program, effective with DY6. New Jersey Department of Health (NJDOH) is received formal letters of withdrawal from these hospitals. Excessive administrative burden of the program was cited as a reason to withdraw. There is no need to recoup funds since no DSRIP funds had yet been distributed. Hospitals will be liable (and have agreed in writing) to accept payment liability for prior year appeals and

audit adjustments. DY5 performance measure results were published on January 9, 2018 and posted to DSRIP website.

Challenges – CMS and NJDOH continue discussions on the design of DY7 and DY8. CMS and NJ agreed that, for DY6 and forward, the state will utilize the national benchmark when possible, followed by the NJ statewide benchmark. CMS is reviewing DY6-8 Planning Protocol submitted by NJDOH on March 29, 2018.

Mid-course corrections – None.

Successes and evaluation – CMS approved the DY6-8 Funding and Mechanics Protocol (FMP) on February 14, 2018. With the approval, NJ is authorized to claim federal financial participation for DY6 payments made to providers, once approved by CMS. CMS and NJ will continue discussing measure specifications, benchmarks, baseline performance thresholds and improvement target goals for DY 7 & 8. The FMP was posted on the NJ DSRIP website.

Other

Managed Care Contracting:

There are no updates for this quarter.

Self-attestations:

There were a total of 150 self-attestations for the time period of January 1, 2018 to March 31, 2018.

MCO Choice and Auto-assignment:

The number of individuals who changes their MCO after auto-assignment is 7,357.

MLR:

MCO Medical Loss Ratios for the 12 month Period July 1, 2016 to June 30, 2017:

	Acute	2	MLTSS		
	Non Expansion	Expansion	HCBS	NF	
Horizon	92.0%	98.8%	85.5%	99.9%	
UHC	88.4%	88.3%	92.3%	95.8%	
Amerigroup	92.1%	90.4%	94.5%	98.5%	
Aetna	74.6%	64.4%	91.1%	94.5%	
Wellcare	92.6%	88.0%	97.2%	108.5%	
		88.0%	97.2%		

Starting with SFY 2017, New Jersey will begin to report the MLRs required by contract. For SFY 2017 the four MLRs are Acute Non Expansion, Acute Expansion, MLTSS Home and Community Based Services (HCBS) and MLTSS Nursing Facilities (NF).

SED/IDD/ASD:

CSOC has a workgroup that continues to work on streamlining critical incident reporting. CSOC also continues to expand the network of providers to assure timely access to services.

CSOC continues ongoing collaboration with the DMAHS Quality Monitoring team that is providing oversight on quality assurance. Please refer to Attachment C.

Supports:

Similar quality reviews, audits, and monitoring are conducted for both the SP and the CCP. Data is provided for each Program and then reviewed to determine if there are systemic issues occurring in either or both programs. Systemic and individual remediation occurs as required.

The Department of Human Services Quality Management Unit (QMU) conducts an annual audit of the Supports Program. The unit completed their annual audit in December and a draft report of their findings was provided for review.

The Provider Performance & Monitoring Unit is in the process of revising monitoring tools and gathering stakeholder input. These tools will be utilized to monitor Medicaid/DDD approved providers and provide further guidance and technical assistance based on the results/findings.

DDD requires reporting on 86 distinct Unusual Incident Codes. At the end of this quarter there were 6,537 individuals on the Supports Program. From this group, there were 233 unusual incidents reported for 194 individuals (some individuals had more than 1 unusual incident report). Therefore, approximately 97% of individuals on the Supports Program during this quarter did not require an UIR. Some UIR codes, such as abuse, neglect, or exploitation require an investigation. If there were minor or no injuries then the provider agency is responsible to conduct an investigation and submit their findings/action plan for review by the Department of Human Services Critical Incident Management Unit. If there were moderate to major injuries then the Department of Human Services Special Response Unit will conduct an investigation.

Issues regarding implementation of the Fiscal Intermediary – Public Partnerships, LLC continue to come up. Department and Division staff continues to hold regular calls with PPL to resolve ongoing issues regarding payment in particular. In addition, point persons have been identified within the Division and PPL to address specific issues as they occur and an escalation process has been put in place and communicated to stakeholders to address issues that have not been resolved.

CCP:

Similar quality reviews, audits, and monitoring are conducted for both the SP and the CCP. Data is provided for each Program and then reviewed to determine if there are systemic issues occurring in either or both programs. Systemic and individual remediation occurs as required.

The Department of Human Services Quality Management Unit (QMU) completed its annual audit of the CCP. Audit findings demonstrated substantial compliance (86% or greater) in all sub-assurance so no corrective action plan was required. Despite not requiring a corrective action plan, DDD Wavier Unit staff is ensuring that there are follow-up actions related to each of the individual findings. Any findings that required a return of FMAP are being resolved and a monthly update is forwarded to QMU by the Waiver Unit staff.

Waiver Unit staff have met with the Provider Performance & Monitoring Unit and are taking the lead on developing additional monitoring tools that will generate data related to Waiver and State compliance.

These tools will be utilized to monitor Medicaid/DDD approved providers and provide further guidance and technical assistance based on the results/findings. Tools related to Support Coordination and Day Habilitation are nearly complete.

DDD requires reporting on 86 distinct Unusual Incident Codes. At the end of this guarter there were 11,159 individuals on the Community Care Program. From this group, there were 4,529 unusual incidents reported for 2,160 individuals (some individuals had more than 1 unusual incident report). Therefore, approximately 81% of individuals on the CCP during this guarter did not require an UIR. Some UIR codes, such as abuse, neglect, or exploitation require an investigation by the Office of Investigations. Approximately 1% of the Unusual Incident Reports filed required an investigation by the Office of Investigations. If there were minor or no injuries then the provider agency is responsible to conduct an investigation and submit their findings/action plan for review by the Department of Human Services Critical Incident Management Unit. If there were moderate to major injuries then the Department of Human Services Special Response Unit will conduct an investigation. Danielle's Law is practiced in NJ. This law requires that 911 be called in a potential life-threatening emergency (e.g.: seizures, pain breathing). Approximately 35% of the reported UIRs had a primary code of Danielle's Law. Often Danielle's Law incidents are determined to not be life-threatening; Direct Support Professionals are held to the prudent person standard and failure to report a perceived emergency may result in a \$5,000 fine. DDD's Risk Management Unit conducts analysis if someone has more than 2 incidents in a single month summaries are created and sent to Support Coordination/Case Management staff as well as DDD's Provider Performance Monitoring Unit.

As discussed in the previous Quarterly report the Division, along with its partners, is working to develop additional training materials to provide the Support Coordination Agencies additional training in order to understand "how to be a Support Coordinator." Initial meeting were held in the last quarter and additional meetings were held in this quarter. Training topics are being actively discussed.

Issues regarding implementation of the Fiscal Intermediary – Public Partnerships, LLC continue to come up. Department and Division staff continues to hold regular calls with PPL to resolve ongoing issues regarding payment in particular. In addition, point persons have been identified within the Division and PPL to address specific issues as they occur and an escalation process has been put in place and communicated to stakeholders to address issues that have not been resolved.

Other Quality/Monitoring Issues:

EQR PIP

In December 2013, the MCOs, with the guidance of the EQRO, initiated a collaborative PIP with a focus on Identification and Management of Obesity in the Adolescent Population. Since inception, the EQRO had held regularly scheduled meetings with the MCOs to ensure a solid and consistent PIP foundation across all MCOs. Starting August 2015, the MCOs met monthly, independent of the EQRO, for continued collaborative activities. The MCOs are expected to show improvement and sustainability of this collaborative PIP. A routine PIP cycle consists of baseline data followed by two remeasurement years and then a sustainability year. Four MCOs were involved in the collaborative. For three of the MCOs, 2013 was their baseline data year for the project; results of calendar year 2014 reflect remeasurement year 1 and results of calendar year 2015 reflect remeasurement year 2. January 2016 started the sustainability year for these MCOs. The fourth MCO entered into the NJ market in December 2013, making their baseline year 2014, with results of calendar year 2015 as their first remeasurement year. January 2016 was the start of remeasurement year 2 for this MCO. All MCOs submitted a progress report in June 2016 which included remeasurement year 2 data for three MCOs and remeasurement year 1 data for the fourth MCO and were reviewed by the EQRO. All MCOs submitted a progress report

update in September 2016 and were reviewed by the EQRO. January 2017 started the sustainability year for the fourth MCO. In June 2017, three of the MCOs submitted their final report for this PIP as the final sustainability data collection was completed in May 2017, and were reviewed by the EQRO. Three MCOs have now completed their collaborative PIP cycle with a focus on Identification and Management of Obesity in the Adolescent Population. Two of the MCOs showed improvement in their baseline rates to the sustainability rates on the three sub-metrics; BMI percentile, BMI risk categorization, and evaluation of family history. One of the MCOs showed improvement in their baseline rate to the sustainability rate on the sub-metric, BMI risk categorization. The fourth MCO is currently in their sustainability year and submitted a progress report in June 2017 which included the results of remeasurement year 2 data and was reviewed by the EQRO. The fourth MCO submitted a progress report update in September 2017 and was reviewed by the EQRO.

The MCOs are also involved in a non-collaborative Prenatal PIP with the focus on Reduction of Preterm Births. The initial proposals were submitted by the MCOs in October 2014 for review by the EQRO. The individual proposals were approved and project activities were initiated by the plans in early 2015. The June interim reports included the 2014 baseline data. The September 2015 reports included an analysis of plan specific activities and any revisions for the upcoming year. Results of calendar year 2015 measures represented remeasurement year 1. January 2016 was the start of remeasurement year 2 for this PIP. All MCOs submitted a progress report in June 2016 which included remeasurement year 1 data, and were reviewed by the EQRO. All MCOs submitted a progress report update in September 2016 and were reviewed by the EQRO. January 2017 was the start of the sustainability year for the MCOs. In June 2017, all MCOs submitted a progress report which included the results of the remeasurement year 2 data and were reviewed by the EQRO. In the June 2017 report, one of the MCOs revised their Prenatal PIP aim statement and performance indicators, resulting in a new PIP cycle. For this MCO, 2016 is now the baseline data year for the project; results of calendar year 2017 will reflect remeasurement year 1 and results of calendar year 2018 will reflect remeasurement year 2. January 2019 will be the start of the sustainability year for this MCO. All MCOs submitted a progress report update in September 2017 and were reviewed by the EQRO.

Additionally, the MCOs submitted individual PIP proposals with the focus on Developmental Screening and Early Intervention. The initial proposals were submitted by the MCOs in September 2017 and were reviewed by the EQRO. The individual proposals were approved, and the plans have initiated project activities in early 2018.

Lastly, all MCOs submitted individual PIP proposals in September 2015 on Falls Prevention specific to members receiving managed long term services and supports. The individual proposals were approved and project activities were initiated by the MCOs in early 2016. The MCOs submitted a progress report in June 2016 which included the 2015 baseline data. The MCOs submitted a progress report update in September 2016 and were reviewed by the EQRO. January 2017 was the start of remeasurement year 2 for this PIP. The MCOs submitted a progress report in June 2017 which included the results of the remeasurement year 1 data and were reviewed by the EQRO. The MCOs submitted a progress report update in September 2017 and were reviewed by the EQRO. January 2018 was the start of the sustainability year for the MCOs.

State Sanctions against MCO, ASO, SNP or PACE Organization:

NJ provided a Notice of Deficiency to Horizon NJ TotalCare (FIDE SNP) related to a Corrective Action Plan (CAP) needed for denial and appeal notification letters. After reviewing the CAP we found that Horizon took the appropriate action after being notified of the issue by reprocessing the affected denials and appeals, and reissued the corrected corresponding notification letters. We still have concerns related to a corresponding policy of their internal audit process of these notification letters for their "Delegate & Vendor Oversight – Government Programs".

XII. Demonstration Evaluation

The State is testing the following hypotheses in its evaluation of the demonstration:

А.	Expanding Medicaid managed care to include long-term care services and supports will result in
	improved access to care and quality of care and reduced costs, and allow more individuals to live
	in their communities instead of institutions.
	The Center for State Health Policy (CSHP) draft final evaluation report covering all findings
	related to this hypothesis was submitted to the State in June 2017. CSHP attended the
	MAAC Meeting on January 24 th and the MLTSS Steering Committee Meeting on February
	22 nd as part of our general monitoring of ongoing activities related to MLTSS.
В.	Providing home and community-based services to Medicaid and CHIP beneficiaries and others
	with serious emotional disturbance, opioid addiction, pervasive developmental disabilities, or
	intellectual disabilities/developmental disabilities will lead to better care outcomes.
	The draft final evaluation report covering all findings related to this hypothesis was submitted to
	the State in June 2017. CSHP attended the MAAC Meeting on January 24 [,] 2018, where updates
	were provided on the Supports Program. No other activities related to this hypothesis were
	undertaken this quarter.
С.	Utilizing a projected spend-down provision and eliminating the look back period at time of
	application for transfer of assets for applicants or beneficiaries seeking long term services and
	supports whose income is at or below 100% of the FPL will simplify Medicaid eligibility and
	enrollment processes without compromising program integrity.
	Since the draft final evaluation report covering all findings related to this hypothesis was submitted
	to the State in June 2017, no further activities related to this hypothesis were undertaken this quarter.
	qualter:
D.	The Delivery System Reform Incentive Payment (DSRIP) Program will result in better care for
	individuals (including access to care, quality of care, health outcomes), better health for the
	population, and lower cost through improvement.
	This quarter CSHP completed several major components of the DSRIP summative evaluation.
	The final version of the hospital web survey was programmed into Survey Monkey and pretested in
	early January 2018. Several minor programming revisions were performed following pretesting.
	All survey materials, including the survey questionnaire and emails/letters described below, were
	approved by the Rutgers Institutional Review Board.
	A list of DSRIP contact persons at all 49 DSRIP-participating hospitals in New Jersey was provided to
	us by the New Jersey Department of Health. On January 23, 2018, an advance endorsement letter
	from the New Jersey Department of Health was emailed to the DSRIP contact persons at the
	hospitals. This advance letter described the survey and its purpose, encouraged the hospitals to

provide feedback on the program via the survey, and indicated that Rutgers Center for State Health Policy researchers would again be conducting the survey. The email accompanying the advance letter requested that the hospitals contact CSHP staff if the survey should be sent to a different hospital representative, and CSHP followed up on these contact person changes. On January 24, 2018, another email was sent containing informed consent information and a link to the web survey. On January 30 and February 6, 2018, reminder emails with the consent information and survey link were sent. The survey field period was closed on February 20, 2018.

The survey data was prepared for analysis, low and high Medicaid hospital groups were created, and the data was then analyzed using IBM SPSS Statistics (SPSS). Frequencies or means of all measures were conducted, and then cross-tabulations or ANOVAs of all measures by the Medicaid hospital groups were conducted. Changes over time were noted for those items that were also on the first 2015 survey. A chapter in the report containing a description of these results was prepared, along with charts and a table displaying the findings.

Also during this quarter, analysis of the DY2, DY3, and newly-received DY4 and DY5 performance results on selected DSRIP Stage 4 quality metrics was completed. In this analysis, within-subjects' analyses of variance (ANOVAs) were conducted to assess change over time from 2013 to 2016 for each of the metrics across all 50 New Jersey hospitals participating in the DSRIP program (one of these dropped out of the program after 2014). Time trends in the average value of metrics over 2013-2016 were also calculated and plots of the mean values over four years were prepared. Finally, we determined what percentage of hospitals improved for each metric based on performance in the first and last years. A chapter in the report containing a description of these results was prepared, along with charts and a table displaying the findings.

The chapter relating to findings from the second round of key informant interviews was also completed this quarter and sent to the State for review. The interviews were completed last quarter. Analysis was completed on the interview data (10 interviews with 29 informants, including participating hospitals, associations, outpatient partners, and state staff.

Finally, CSHP made significant progress on the quantitative analyses for the DSRIP summative evaluation this quarter. Analytic datasets for all outcome metrics were finalized, and CSHP conducted the majority of the descriptive analyses and difference-in difference regression modeling. Charts and tables of results were prepared, and CSHP completed significant portions of the chapter containing a description of our methods and results for inclusion in the summative evaluation report.

XV. Date Submitted to CMS May 30, 2018

The Division of Medical Assistance and Health Services' (DMAHS) Office of Managed Long-Term Services and Supports Quality Monitoring (MLTSS/QM) receives and analyzes the Performance Measure data submitted by the respective data source. The MLTSS-MCO Quality Workgroup continues to meet on a monthly basis to discuss any issues raised by the MCOs, review data submitted, and facilitate resolution. To assist in the refining of the existing data submitted in the MLTSS Performance Measure Reports by the Managed Care Organizations, the State's External Ouality Review Organization, IPRO, has developed more refined specifications for the MLTSS PMs effective July 1, 2016. The development of the refined specifications is an ongoing agenda item with the IPRO taking the lead on the discussions during the monthly MLTSS MCO Quality Workgroup meetings. IPRO continues to work with the MCOs to validate their system's coding for each Performance Measure using the refined specifications. The MLTSS Program Year is July 1st of a given year through June 30th of the following year and the MLTSS Performance Measures specifications are for those measurements periods that occur within a particular program year. Prior to the start of a new MLTSS program year, the MLTSS PM specifications are reviewed; revised, suspended, or new ones are added for upcoming Program Year. In addition to the PM Deliverables, this workgroup discusses other MCO contract required MLTSS reporting requirements. Any areas of concern are discussed at a following meeting along with recommendations and resolution.

This quarterly report reflects the performance measures (PM) that were reported by the MCOs and the Division of Aging Services (DoAS) to the Office of MLTSS/QM during the second quarter of MLTSS (1/1/18 - 3/31/18). Each performance measure identifies its measurement period; however, depending on the source for the numerator/denominator the due date for reporting on a particular measure may have a lag time to allow for collection of the information. Several measures rely on claims data; therefore, a lag of 180 days must be built into the due date to allow for the MCO to receive the claims and process the data. This report reflects the performance measures data the Office of MLTSS/QM should have received during the fourth year, second quarter (1/1/18 - 3/31/18) of MLTSS program.

The data for the PMs that DoAS is responsible for reporting is obtained from within their TeleSys database, SAMS database, and/or the Shared Data Warehouse. The PM # 02 was eliminated effective with the July 2017 contract. As previously reported, the State discontinued reporting on PM #02 and PM #06 beginning July 1, 2017. Revisions were made to how the denominator for PM #04a is defined. The OCCO is responsible for conducting the nursing facility level of care determinations for individuals seeking admission to nursing facilities regardless of funding source. The change to the denominator will assist in better focusing the data on the MLTSS population. Unless otherwise noted, Performance Measure(s) data reports that are not included in this

document may be a result of measures involved in review from New Jersey's EQRO or lag time allowing for receipt of claims related data..

MLTSS Performance Measure Report

PM # 03	Nursing facility level of care assessments conducted by the MCO determined to be "Not Authorized"
Numerator:	Total number of "Not Authorized" reassessments conducted by OCCO with a determination of "Approved"
Denominator:	Total number of MLTSS level of care assessments that were conducted by MCO with a determination of "Authorized" and "Not Authorized" by OCCO during the measurement month
Data Source:	DoAS
Measurement Period:	Monthly – Due the 15 th of the following month

Measurement period	09/2017	10/2017	11/2017
Numerator	1092	995	877
Denominator	1120	1013	898
%	97.5	98.2	97.7

Beginning 7/1/2017, PM #03 was revised and a lag time of three months added to allow for reassessment by OCCO. After review of a level of care assessment conducted by an MCO, OCCO determines an outcome of "Authorized" or "Not Authorized." For those assessments determined to be "Not Authorized," OCCO conducts a reassessment of the member. For these measurement months, DoAS reported that the rate of reassessments by OCCO with a final outcome of "Approved" was consistently high.

PM # 04	Timeliness of nursing facility level of care assessment by MCO
Numerator:	The number of assessments in the denominator where the MCO assessment/ determination date is less than 30 days from the referral date to MLTSS
Denominator:	Number of level of care assessments conducted by MCO in the measurement month
Data Source:	МСО
Measurement Period:	Monthly – Due 15 th of the 2 nd month (lag report) following reporting period

%	95.4	93.2	94.0	79.0	54.4	82.3

The MCOs are monitoring the timeliness of level of care (LOC) assessments and have identified that some of the delays include: Care Manager not scheduling the appointment within 30 days, member requested a later appointment or rescheduled the original appointment, member was unable to contact to schedule the appointment, member hospitalization, and members dis-enrolled. MCO E reported for November 2017 there was a slight decrease in the compliance rate in comparison to October 2017. They reported 2 long term custodial care members had inpatient admissions during the referral period and therefore the assessors had to reschedule the assessment and were completed on day 32 and 35 from the original date of referral. The 3rd member that was out of the 30-day compliance timeframe was due to an issue with timely submission of the assessment. MCO A reported for December 2017 that 7 of the valid referrals were for members living in the community (HCBS), and the remaining 13 were members living in the Nursing Facility (NF) setting. There were 13 additional referrals that did not require NJ Choice assessment due to transferring to another MCO, relocation out of the country and 1 member expired. MCO C reported there were 41 untimely assessments, 3 of which are MLTSS FIDE/SNP members. Of the untimely assessments, 30 were late due to the Care Manager not scheduling the appointment within 30 days, 8 at the members request or rescheduled the original appointment, and 3 were unable to contact for initial appointment. Care Managers that were untimely in the completion of the assessment were reeducated on the contractual requirement for timely assessment and Supervisors have been notified to begin remediation. Additionally, MCO C reported ongoing tracking and trending of this measure, has identified decreased results, and has increased oversight on the timeliness of assessments. The MCOs continue improvement procedures such as monitoring the referral and submission process for all completed assessments, ensuring NF residents have custodial authorizations in place, evaluating the performance of the Rapid Assessment model and ongoing monitoring of the plan's referral queues with increased oversight of the referral and assessment process.

PM # 04a	Timeliness of nursing facility level of care assessment
Numerator:	The number of assessments in the denominator where the OCCO/ADRC assessment/determination date is less than 30 days from the referral date
Denominator :	Number of new MLTSS enrollees within the reporting month with an assessment completed by OCCO/ADRC
Data Source:	DoAS
Measurement Period:	Monthly – Due 15 th of the 2 nd month (lag report) following reporting period

Measurement Period	11/2017	12/2017	01/2018	
Numerator	691	697	713	
Denominator	1083	1116	1203	
%	63.8	62.5	59.3

 A = Aetna
 B = Amerigroup
 C = Horizon NJ Health
 D = United HealthCare
 E =

O/D = Over due E = WellCare

Though the denominator for this measure was revised beginning 7/1/2017 to include only new MLTSS enrollees, OCCO staff continues to assess members referred to them, including those whose outcome is not MLTSS enrollment. DoAS reported that the compliance rate over the last six months ranged from 59 % to 67%.

PM # 05	Timeliness of nursing facility level of care re-determinations
Numerator:	Total number of MLTSS members in the denominator who are confirmed as appropriate for continued MLTSS enrollment who have not had a level of care assessment by report close out.
Denominator:	Total number of MLTSS members with no level of care assessment conducted in the last 16 months
Data Source:	DoAS
Measurement Period:	Beginning 7/1/2017, this is a quarterly report – due 3 months after the 16-month report is run

November 2017	Α	В	С	D	Е	TOTAL
Numerator	1	6	0	14	4	25
Denominator	45	64	116	94	59	378
%	2.2	9.4	0	14.9	6.8	6.6

In March 2017, DoAS finalized a quarterly schedule for the 16 month report, requiring close out by the MCOs within 8 weeks. DoAS provided training for the MCOs regarding streamlined assessment review; disenrollment; 16 month report process and timelines; and requirement for a Corrective Action Plan if all cases are not closed out or an extension requested within 30 days of receipt of report.

As of 7/1/2017, the revised definition for PM #05 is: Timeliness of nursing facility level of care redeterminations. This is the second report using the new guidelines.

The resolution for cases reported include-

Resolutions	Α	В	С	D	Е	TOTAL
Clinical Assessments Completed	35	37	102	58	42	274
Terminations Completed	7	17	12	14	13	56
Terminations pending denial/fair hearings	0	3	2	8	0	13

The trend continues to be a decrease in the number of outstanding overdue assessments. The number of individuals without a level of care reassessment since MLTSS started on July 1, 2014 has been reduced from 2.5% to 0%. Overall final compliance rate for this reporting month is at 93.4% for follow up on outstanding assessments.

DoAS continues to educate MCO's through MCO Care Manager Meetings in regard to the contractual agreement of annual assessments. MCO compliance for resolving outstanding cases continues to be less than 100%. As a result, DoAS has issued a request for Corrective Action Plans to 4 of the 5 MCO's. The MCO's have until April 1, 2018 to submit their plan to DoAS. DoAS will continue to work

with the MCO's to ensure a 100% compliance rate for the completion of outstanding clinical assessments.

PM # 07	Members offered a choice between institutional and HCBS settings
Numerator:	Number of assessments in the denominator with an indicator showing choice of setting within the IPOC
Denominator:	Number of level of care assessments with a completed Interim Plan of Care (IPOC)
Data Source:	DoAS
Measurement Period:	Monthly – Due the 15 th of the following month

Measurement Period	12/2017	01/2018	02/2018
Numerator	849	884	850
Denominator	1045	1054	1037
%	81.2	83.9	82.0

DoAS reported an increase in compliance overall during this reporting period. MCOs are sent individual compliance reports each month and are reminded to continually update assessors on coding requirements as they relate to choice of settings. DoAS reported that they noted an increase in compliance of 4.3 points in December; a 2.6 point increase in October; and although expected to see increased compliance rates, a 1.9 point decrease was noted for February.

PM # 17	Timeliness of Critical Incident (CI) reported to DoAS for measurement month
Numerator:	#CI reported in writing to DoAS within 2 business days
Denominator:	Total # of CI reported to DoAS for measurement month
Data Source:	DoAS
Measurement Period:	Monthly – Due 15 th of the following month

Measurement Period	12/2017	01/2018	02/2018
Numerator	316	400	321
Denominator	317	420	336
%	99.7	95.2	95.5

DoAS reports that a high percentage of Critical Incident reports were filed on a timely basis during this reporting period. Four MCOs fell below the 100% threshold during this reporting period. All four MCOs provided Corrective Action Plans to DoAS to address their delays.

PM # 17a	Timeliness of Critical Incident(CI) reporting (verbally within 1 business day) for media and unexpected death incidents
Numerator:	# CI reported to DoAS verbally reported within 1 business day for media and unexpected death incidents
Denominator:	Total # of CI reported verbally to DoAS for measurement month
Data Source:	DoAS
Measurement Period:	Monthly – Due 15 th of the following month

Measurement Period	12/2017 01/2018		02/2018
Numerator	6	2	6
Denominator	6	2	6
%	100	100	100

DoAS reported that all Critical Incidents for Media Involvement and Unexpected Death were reported on time for this reporting period.

PM # 19	Timelines for investigation of complaints, appeals, grievances (complete within 30 days)
Numerator:	# of complaints, appeals and grievances investigated within 30 days (unless findings cannot be obtained in that timeframe which must be documented)
Denominator:	Total # of complaints, appeals, and grievances received for measurement period
Data Source:	MCO Table 3A and 3B Reports; DMAHS
Measurement Period:	Quarterly Due: 45 days after reporting period.

Table 3B - Grievances

MCO B had two cases in Table 3B that took more than 30 days to resolve. As per the MCO B, one delay was 31 days until resolution of MCO payment for services rendered due to timing for provider claims reprocessing and MCO payment. Additionally, MCO B reported 34 days for the resolution of family member dissatisfaction with facility was due to the facility and family members no response/delay to multiple voice messages and email communications from the MCO. MCO C had five cases in Table 3B that took more than 30 days to resolve. MCO C reported three cases involved member dissatisfaction with PCA services. The MCO reported that the delay in one case was due to the late responsiveness by the investigating department while the other two were due to grievance staff error. Additionally, MCO C reported two cases regarding billing issues/unpaid claims. In one case, the provider was reeducated in reference to not billing members and in the other; the member was educated regarding covered benefits and services.

PM # 20	Total # of MLTSS members receiving MLTSS services.
Numerator:	Unique count of members with at least one claim for MLTSS services during the measurement period. (Excluding: CM, PCA, Medical Day, and Behavioral Health services).
Denominator:	Unique count of members meeting eligibility criteria at any time during the measurement period. (Quarter or Annual).
Data Source:	MCO paid claims data, adjusted claims (excluding denied claims); according to the list of MLTSS/HCBS service procedure codes and the logic for the MCO Encounter Categories of Service (copy of list provided). Based on the premise: member must use services monthly *Total may include duplication if member switches MCO during the reporting period.
Measurement Period:	Quarterly/Annually – Due: 180 day lag for claims + 30 days after quarter and year

1/1/17 - 3/31/17	Α	В	С	D	Е	TOTAL

%	80.3	81.6	81.0	89.6	65.6	80.6

The MCOs continue to claim under reporting for this measure. MCOs report that there are members receiving services but the MCO had not yet received a claim as some providers are not submitting, and or delaying the submission of claims for services. MCO A did not have reportable data for this measure during the first quarter of MLTSS (10/1/17 - 12/31/17) report and is included in this quarterly report which reflects the data reported by MCO A during the measurement period of 1/1/2017 - 3/31/2017. MCO A requested extensions for this deliverable until the claims were successfully resubmitted and claims based data was re-run for the reporting period. MCO A reported that of the 1301 members, 794 were receiving custodial services in a Nursing Facility, and another 59 were residing in Assisted Living facilities. Indication of those identified not receiving MLTSS services were noted for PERS or HDM before or after the measurement period. MCO A determined that coding errors were the source of denied PERS claims and began collaborating with their PERS vendors to rectify the coding issue. PERS vendors were required to resubmit claims from the previous measurement period reflected in this report. MCO A reported they will closely monitor PERS claims in order to ensure ongoing accuracy. Additionally, MCO A reported that MLTSS Care Managers undergo quarterly refresher training on options counseling and the importance of increasing use of MLTSS-specific services in the HCBS membership. MCO B reported that 828 of the members that were reported during the quarterly period as not utilizing an MLTSS service are receiving PCA/PPP or Medical Day. Reasons for the 497 without services account for members no longer eligible, inpatient/rehab and enrollment during last month of measurement quarter and the member requested a visit after 30 days of enrollment. Additionally, MCO B reported that they developed a member activity report to review monthly claim data to identify high/low utilization for care management intervention including invoice confirmation from the new PPP fiscal intermediary. MCO B reports that effective February 2018, they are conducting monthly HCBS phone calls to improve member experience, capture potential gaps in care, and include review of authorized services with the member

PM # 21	MLTSS members transitioned from NF to Community.
Numerator:	Cases in the denominator who transitioned to HCBS during the measurement period. (Cases should be counted only once).
Denominator:	Unique count of members continuously enrolled with the MCO in MLTSS for the measurement period. (Quarter or Annual).
Data Source:	MCO – living arrangement file and client tracking system
Measurement Period:	Quarterly/Annually – Due: 30 days after the quarter and year

10/1/17-12/31/17	Α	В	С	D	Е	TOTAL
Numerator	N/A	19	87	28	4	N/A
Denominator	N/A	2657	5805	6641	1368	N/A
%	N/A	0.7	1.5	0.4	0.3	N/A

The MCOs continue to report that as they continue to work with approved programs such as Money Follows the Person to identify appropriate NF transitions to the community, there have been increases in the number of MLTSS members transitioning from the NF to the community. MCO E reported there were a total of 1368 continuously enrolled nursing facility members in the plan, 4 members transitioned to the community and there were no MLTSS FIDE/SNP members among those transitioning during this quarter. Additionally, MCO E reported that all members who transitioned are still currently active in the plan and remain in an HCBS setting. One transition was identified as member transferring from NF to ALF setting and the other 3 have transitioned to their private residence. MCO C reported 74 transitioned to a private residence and 13 transitioned into an ALR/ALP/CPCH. The age range was from 24 to 95 with the average age at 65 and there were 2 MLTSS FIDE/SNP members who transitioned to the community during this measurement period. Additionally, MCO C reported they will continue to track and trend members that are transitioned to the community to ensure they are safely transitioned and adapt well to their new environment. MCO A is still working with the State's EORO on their coding for this performance measure and has an extension to submit this report next quarter. This data will be included in the third quarter report.

PM # 23	MLTSS NF to HCBS transitions who returned to NF within 90 days.
Numerator:	Cases in the denominator with an NF living arrangement status within 90 days of initial HCBS transition date.
Denominator:	Unique count of members in NF MLTSS that are continuously enrolled with the MCO from beginning of Measurement period (Quarter or Annual) or from date of initial enrollment in NF MLTSS, whichever is later, through 90 days post HCBS transition date.
Data Source:	MCO – Living arrangement file, CM tracking, and prior auth. System (r/o respite/rehab). MCO to identify how the dates were calculated.
Measurement Period:	Quarterly/ Annually Lag Report Due: 120 days after reporting quarter or year.

7/1/17-9/30/17	Α	В	С	D	Е	TOTAL
Numerator	N/A	1	5	3	0	N/A
Denominator	N/A	20	63	47	7	N/A
%	N/A	5.0	7.9	6.4	0.0	N/A

The MCO's are continuing to track and trend members returning to the NF within 90 days. MCO E reported that 5 of the 7 NF to HCBS transitions were 65 years of age or older, there were no MLTSS FIDE/SNP members and all members remained in a community setting after their initial transition for 90 days or greater. Additionally, MCO E reported that 6 were facilitated through MFP and they ensure all the transitions occurring from an NF to HCBS setting have adequate supports in place prior to discharge as well as providing immediate follow up with the member post discharge. MCO B reported that 1 member remained in the HCBS setting for 76 days prior to returning to the NF and during the CM follow-up visit, it was identified that the member's preferred setting was the NF as he did not feel he had adequate care in the community setting. Additionally, MCO B reviews reasons for return to NF and has identified that the top reasons include hospitalizations and increased ADL deficits. MCO D reported they identified 3 members who transitioned back to the NF and none were enrolled in the MLTSS FIDE/SNP. MCO D also reported that this report criterion delinks the results PM 21 and the new ability to make retroactive living arrangement file adjustments also impacts this report. Additionally, MCO D reported the results this quarter are in line with previous data submissions and while the change to the code was one component, reeducation is being conducted to ensure proper use of the Placement value for each care manager. MCO A is working with the State's EQRO on their coding for this performance measure and has an extension to submit this report next quarter. This data will be included in the third quarter report.

PM # 24	MLTSS HCBS members transitioned from the community to NF for more than 180 days.
Numerator:	Cases in the denominator with NF living arrangement status for 181 days or more after the date of transition to NF.
Denominator:	Unique count of members in HCBS MLTSS that are continuously enrolled with the MCO from the beginning of measurement period (Quarter or Annual) or from date of initial enrollment in HCBS MLTSS, whichever is later, through 181 days post NF transition date.
Data Source:	MCO -Living arrangement file, CM tracking, and prior authorization system (r/o respite/rehab). MCO to identify how the dates were calculated
Measurement Period:	Quarterly/Annually Lag Report Due: 210 day lag after quarter and year

%	93.3	94.6	92.2	91.4	89.7	92.1

The MCO's are continuing to track and trend members returning to the NF for greater than 180 days. MCO A reported during the quarter of the 13 members placed into long term care, 3 were men and 10 were women. It was reported that the 2 members who did not remain for 6 months or more were both women at a skilled nursing facility for rehabilitation following inpatient hospital stays. They did not wish to remain for the long term but were not prepared to discharge home at the end of their skilled nursing facility stay. Additionally, MCO A reports the 11 members who remained for long term care were from a home setting with maximized services prior to placement and each of them agreed with NF placement. MCO E reported during the quarter of the 14 members identified with HCBS to NF transitions, 11 members remained in the NF for more than 180 days of which 10 remain actively enrolled in the plan. Additionally, MCO E reported that the implementation of a NF team and on-going monitoring identifies members for potential transition during the initial period 180 day period. MCOs will continue to monitor.

PM # 25	MLTSS HCBS members transitioned from the community to NF for 180 days or less.
Numerator:	Cases in the denominator with NF living arrangement status for 180 days or less after the date of transition to NF.
Denominator:	Unique count of members in HCBS MLTSS that are continuously enrolled with the MCO from the beginning of measurement period (Quarter or Annual) or from date of initial enrollment in HCBS MLTSS, whichever is later, through 180 days post NF transition date.
Data Source:	MCO - Living arrangement file, CM tracking, and prior authorization system (r/o respite/rehab). MCO to identify how the dates were calculated.

MCOs report they are continuing to monitor and work with community and family supports to prevent hospitalizations and institutionalization. MCO E reported during the annual measure there were 68 members identified in the denominator as having had a transition event from an HCBS setting into a NF setting and of those 7 members experienced a short NF stay of less than 180 days. MCO E reported during the annual measure that 5 out of 7 members were age 65 or older, there were no members identified as MLTSS FIDE/SNP, and the average number of days for the short stays is sixty two. Additionally, MCO E reported that one of their NF team focus is coordinating services for members with an initial NF transition to increase the number of short stays and decreasing long term institutionalization where avoidable. In addition, as a Plan, there has been a greater focus in decreasing the number of members admitted to a NF setting by adding services for community members where needed and addressing issues that may influence these transitions such as caregiver support.

PM # 26	Acute inpatient utilization by MLTSS HCBS members.
Numerator:	The sum of visits to an acute inpatient facility, regardless of the intensity or duration of the visit, using identified value sets and exclusions during measurement period. Count IP visits based on member's enrollment in HCBS on date of discharge. (Report monthly values in data analysis).
Denominator:	Sum of member months (# of members enrolled in HCBS per month) for measurement period. (Report monthly values in data analysis).
Data Source:	MCO paid and denied (excluding duplicate claims) claims according to logic for the MCO encounter Categories of Services (separate file)
Measurement	Monthly data reported Quarterly/Annually (180 day lag for claims + 30 days after quarter and
Period:	year)

Data for this measure is captured on a monthly basis and the numerators are added together and the denominators are added together to report quarterly data reflecting the number of hospitalizations that occurred per member month. It is based on hospital events and not unduplicated members. The top diagnosis for hospital admission include: Sepsis, unspecified organism, urinary tract infection, chronic obstructive pulmonary disease, type 2 diabetes with hypoglycemia, anemia, schizophrenia, GI bleed, C. difficile, atrial fibrillation, non ST- Segment

MLTSS Performance Measure Report

Deliverables due during MLTSS 2nd quarter (1/1/2018 - 3/31/2018)

elevated myocardial infarction, pneumonia unspecified organism, acute kidney enterocolitis due to clostridia, gastritis, CHF, CKD, pneumonitis, and genitourinary tract disease. MCO B reported trends in top diagnoses with sepsis, unspecified organism (49 instances) and urinary tract infection (24 instances) and population trends with 175 instances amongst the MLTSS FIDE/SNP population and 486 amongst the MLTSS Medicaid population. Additionally, MCO B reported amongst the MLTSS FIDE/SNP population, the top diagnosis was chronic obstructive pulmonary disease with acute exacerbation. MCO C reported that the top three diagnoses for acute inpatient utilization for HCBS members remained sepsis, urinary tract infection, and chronic obstructive pulmonary disease. Additionally, MCO C reported that conference calls are conducted weekly to review actions that can be taken to prevent readmissions. MCO E reported 487 unique members were identified as having events in the numerator. Review of admissions by member showed a total of 91 members having more than 1 admission during the measurement period as there were 2 members with 5 admissions related to CHF and sepsis in one case and the other member had admissions related to CHF and diabetes. There were 6 members with 4 admissions, 11 members with 3 admissions and 72 members had 2 admissions. Additionally, MCO E reported review of diagnoses showed the majority of multiple admissions were related to chronic conditions such as CHF, renal failure, hepatic failure, and complications including sepsis and pneumonia. The top diagnoses categories reported during this quarter continue to be circulatory disease with 130 events, of which 48 correspond to CHF, followed by respiratory tract diseases with 76 events (36 of those events related to COPD), and infectious disease were reported in 72 events (with 62 related to Sepsis). GI tract disorders were reported with a total of 53 events (6 events of non-infective gastroenteritis and no other trends identified). Finally, genitourinary tract disease was reported in 47 events, with 20 of those events reported as being renal failure and 17 events with UTI reported. To identify trends and target an inpatient admission reduction plan, MCO E reportedly conduct an in-depth review on all members with multiple admissions and continue using their newly developed discharge planning report to improve timely outreach, appropriate discharge planning including follow up appointments and medication reconciliation.

PM # 27	Acute inpatient utilization by MLTSS NF members.
Numerator:	The sum of visits to an acute inpatient facility, regardless of the intensity or duration of the visit, using identified value sets and exclusions. Count IP visits based on member's enrollment in NF on date of discharge. (Report monthly values in data analysis).
Denominator:	Sum of member months (# of members enrolled in NF per month) for measurement period. (Report monthly values in data analysis).
Data Source:	MCO paid claims and denied claims (excluding duplicate claims) according to logic for the MCO encounter Categories of Services (separate file)

%	4.5	5.6	4.1	1.2	5.3	3.8

Data for this measure is captured on a monthly basis and the numerators are added together and the denominators are added together to report quarterly data reflecting the number of hospitalizations that occurred per member month. It is based on hospital events and not unduplicated members. MCO E reported during the measurement year there were 12878 member months identified with 688 acute inpatient events reported. There were a total of 423 unique members accounting for 688 events and 344 out of 423 unique members were age 65 or older. Review of admissions by member showed a total of 146 members having more than 1 admission during the measurement period with 1 member accounting for 9 events. Additionally, MCO E reported as they continue to implement a nursing facility care management team, the utilization rates overall have continued to decline for this population. MCO D reported during the measurement year the most common hospitalization primary diagnosis was essential primary hypertension followed by sepsis unspecified organism and muscle weakness, generalized. 52 percent of members hospitalized were 65 years of age or older. Additionally, MCO D reported of the 388 unique inpatient hospitalizations, 44 unique members had multiple admissions with the top 3 diagnoses identified as dementia unspecified, followed by cerebral palsy unspecified and pneumonia unspecified organism. MCO C reported during the measurement year that of the 2518 inpatient hospitalizations, there were 5 MLTSS FIDE/SNP NF members that had a hospital admission during the measurement period and the top 3 diagnoses remained consistent throughout the fiscal year, as sepsis 14.61%, urinary tract infection (UTI) 3.61% and acute kidney failure 3.53%.

PM # 28	Readmissions of MLTSS HCBS members to the hospital within 30 days.
Numerator:	Sum of all HCBS members acute readmission for any diagnosis within 30 days of an index discharge date during the first and last date of the measurement period (Quarter or Annual). Using the administrative specification, assign each acute inpatient stay to a reporting month based on index discharge date. (Report monthly value in data analysis).
Denominator:	Sum of all acute inpatient discharges on or between the first and last day of the measurement period (Quarter or Annual) using the administrative specification to identify acute inpatient discharges and HCBS members. (Report monthly values in data analysis).
Data Source:	MCO paid and denied claims (exclude denials for duplicate submissions) for numerator and 834 file for denominator.
Measurement Period:	Monthly data reported Quarterly/Annually Lag Report Due: 240 days after quarter and year.

%	25.6	21.2	12.5	9.	0	22.	4	15.6

Data for this measure is captured on a monthly basis and the numerators are added together and the denominators are added together to report quarterly data reflecting the number of hospitalizations that occurred per member month. It is based on hospital events and not unduplicated members. Some of the reported diagnoses include ; paranoid schizophrenia, type 2 diabetes, hereditary hemorrhagic telangiectasia, COPD, osteomyelitis, sepsis-unspecified, urinary tract infection, epilepsy, ESRD, CHF, acute & chronic respiratory failure, cellulitis, pneumonia. MCO C reported that of the 158 readmissions a total of 34 MLTSS FIDE/SNP HCBS members had an acute-inpatient readmission and the top 3 diagnoses were sepsis-unspecified organism, urinary tract infection, and chronic obstructive pulmonary disease with acute exacerbation. Additionally, MCO C reported that as readmissions are tracked and monitored, weekly inpatient conference calls are conducted to review reasons for readmissions and discuss implementations to prevent or reduce readmissions. MCO E reported in the annual measure there are 419 readmissions that identified a total of 235 unique members, of which 182 were age 65 or older. There were 78 MLTSS FIDE/SNP members identified and 16 of those presented with an acute readmission for any diagnosis within 30 days of an index discharge date. MCO E reported the top 5 disease categories were: diseases of the circulatory system at 113 events, with CHF accounting for 44 events, followed by infectious and parasitic diseases at 59 events with 48 events related to sepsis. Diseases of the respiratory system were reported in 45 events where 19 corresponded to COPD and 13 to pneumonia. Endocrine, nutritional, and metabolic diseases reported 35 events for which 28 were related to diabetes. Diseases of the digestive system was reported with 35 events without significant trends identified and disorders of the genitourinary system was reported in 32 events, 19 of the events were related to renal failure and 9 were related to UTI and cystitis. MCO E reports 83 of the 235 members were identified as having more than one readmission event with the highest utilization reported as 1 member with 24 readmission events due to multiple co-morbidities, including congestive heart failure and diabetes. Another high utilization member was identified with 14 readmission events related to COPD, system lupus erythematosus and pulmonary embolism. Additionally, MCO E reported interventions for high utilization members include changing assigned PCP, in order to address preventative services, referrals to providers specializing with the disease process specific to the member, referrals to support groups in the community, and on-going follow up by the care manager to track utilization after care management intervention. MCOs will continue to monitor.

Data for this measure is captured on a monthly basis and the numerators are added together and the denominators are added together to report quarterly data reflecting the number of hospitalizations that occurred per member month. It is based on hospital events and not unduplicated members. MCO A reported during the quarter they had 12 unique members that accounted for the 16 readmissions and one member had 3 readmissions during the reporting period. Additionally, MCO A reported that they utilize a NF Contact Sheet on the custodial members' charts and has educated the NF to notify the CM directly with any admission, critical incident or change in condition to improve care manager awareness of inpatient stays and needs upon discharge. MCO B reported that the 37 readmissions consisted of 37 unique members and the average days between discharge and readmission was 10.9 days. Additionally, MCO B reported refinement of current reports with adding additional data elements to trend reasons for readmissions and discharging facilities to develop interventions targeting specific populations or providers and identify trends in primary setting. MCO D reported 44 readmissions for the annual measurement period and 1 readmission was identified as MLTSS FIDE/SNP. The three leading primary diagnosis for the overall readmission were Unspecified Dementia, Alcohol induced acute pancreatitis, and Cerebral palsy unspecified. The 44 readmissions consisted of 26 unique members, of which 5 had more than 2 readmissions with 1 member having 6 readmissions for the diagnoses of Unspecified Dementia.

Deliverables due during MLTSS 2nd quarter (1/1/2018 - 3/31/2	018)
--	------

PM # 30	ER utilization by MLTSS HCBS members.
Numerator:	Sum of ER visits of HCBS members that did not result in an inpatient encounter, regardless of intensity or duration of visit, using identified value sets and exclusions during the measurement period. (Report monthly values in data analysis).
Denominator:	Sum of member months (Number of members enrolled in HCBS on last day of month) for measurement period. (Report monthly values in data analysis).
Data Source:	MCO paid claims and denied claims (exclude denials for duplicate submissions) for numerator and 834 file for denominator.

Data for this measure is captured on a monthly basis and the numerators are added together and the denominators are added together to report quarterly data reflecting the number of ER utilizations that occurred per member month. It is based on ER utilization events and not unduplicated members. MCO A reported during the annual measure there were 560 episodes of ER utilization and the three most frequent reasons for visits to the ER were Urinary Tract Infection, Chest Pain, and Head Injury. Furthermore, 207 members accounted for the 560 ER visits and 104 members had 2 or more ER visits during this time frame. One member was reported with 31 ER visits related to COPD. Additionally, MCO A reported that as they continue to track ER utilization for identified patterns the Care Managers work with members to resolve any barriers to care to avoid multiple trips to the ER. MCO C reported during the annual measure the top three diagnoses identified for ER utilization was Other Chest Pain, Unspecified, Urinary Tract Infection, and Chest Pain Unspecified. Additionally, MCO C reported they continue to track and trend the ER Utilization for MLTSS members, and are in the process of identifying diagnostic groupings.

MLTSS Performance Measure Report

PM # 31	ER utilization by MLTSS NF members.
Numerator:	Sum of ER visits of NF members that did not result in an inpatient encounter, regardless of intensity or duration of visit, using identified value sets and exclusions during the measurement period. (Report monthly values in data analysis).
Denominator:	Sum of member months (Number of members enrolled in NF on last day of month) for measurement period. (Report monthly values in data analysis).

MCOs are monitoring their respective data to identify patterns, trends, and frequency. MCO B reported for the quarterly measure that the top diagnosis identified is Sepsis, unspecified organism and the 77 visits consisted of 35 unique members with 1 member experiencing 8 ER visits during the quarter. Additionally, MCO B reported modifying performance measures for ER utilization to include facility/provider names, admitting and discharge diagnosis and CPT codes. MCO D reported during the quarterly measure the top 4 diagnoses identified were UTI, Injury, Cardiac and Gastrostomy related. Additionally, MCO D reported one member was identified having 12 visits related to Opioids and altered mental status and one member had 10 visits with multiple diagnosis related to Schizophrenia, depression and Diabetes. Furthermore, MCO D reported that there were 199 members that were over the age of 65 and five members under the age of 18 that utilized the Emergency Room. MCO E reported during the annual measurement period there were a total of 331 unique members accounting for the 549 ER utilization events and 269 of the 331 unique members were age 65 or older. MCO E reported analysis of the top three identified diagnoses showed the highest number of events as Injuries/poisoning due to external causes most of which were contusions, sprains, and lacerations. This was followed by General Signs and Symptoms with the majority attributed to chest pain, altered mental status, syncope, and collapse. The third most common category identified was Mental, Behavioral, and Neurodevelopmental disorders, where alcohol dependence/abuse had the highest number of events. Additionally MCO E reported other identified diagnosis related to CHF, cardiac arrest, UTI, GI bleeding, Endocrine, Nutritional, and Metabolic disorders. Furthermore, MCO E reported reviews will be conducted on all members with multiple ER visits help further develop a targeted ER utilization reduction plan.

PM # 33	MLTSS services used by HCBS members: PCA services only.
Numerator:	Unique count of members with at least one claim for PCA services during the measurement period. Exclude members with a claim for any other MLTSS service or for claims for Medical Day services during the measurement period.
Denominator:	Unique count of members enrolled in MLTSS HCBS at any time during the measurement period.
Data Source:	MCO – claims data
Measurement Period:	Quarterly (Lag Report Due: 210 day lag after quarter)

Deliverables due during MLTSS 2nd quarter (1/1/2018 - 3/31/2018)

4/1/17 - 6/30/17	А	В	С	D	Е	TOTAL
Numerator	78	488	2044	813	518	3941

MCOs are reporting some challenges in obtaining this data due to dual eligible members and limited access to Medicare claims. MCO A reports that for the quarterly measure, of the two acute inpatient discharges, none had a 7 day face to face follow up with mental health professional. Additionally, MCO A reported that they provided reeducation to their Care Management team in that any inpatient psychiatric care must be followed up within timeframe for outpatient visit to Behavioral Health provider and have educated their providers to submit claims for BH services regardless of payer source. MCO B reports that for the quarterly measure, of the 3 members with a mental health hospitalization, 1 was identified as having a 7-day face to face follow up visit with a mental health professional. Additionally, MCO B reported barriers identified with follow up included provider availability affecting timeliness of follow up appointments. Furthermore, MCO B reported they expect improved compliance while continuing to integrate BH interventions into Care Management. MCO C reported for the annual measurement period there were a total of 89 acute inpatient discharges for mental health hospitalization and of the 89 hospitalizations, 20 members received a face-to-face follow up within seven days that included 1 identified HCBS MLTSS FIDE/SNP member. Additionally, it was reported that 51 of the 69 members that did not have a follow up visit within seven days, did receive follow up within thirty days. MCO C reported one member received a follow up within thirty days according to documentation however the plan does not have a claim as the member was Medicare Prime. Additionally, MCO C reported the top three diagnoses for acute inpatient utilization for MLTSS HBSC members to be Schizoaffective Disorder, Bipolar Type, Major Depressive Disorder, Recurrent Severe without Psychotic Features and Paranoid Schizophrenia.

MCO C reported they have developed a workgroup to manage follow up visits for Behavioral health admissions and created tracking reports that will be monitored daily. MCOs report they are continuing to monitor.

PM # 36	Follow-up after mental health hospitalization for HCBS MLTSS members: 30 day follow-up.
Numerator:	Per Administrative Specifications, the unique count of visits (Not unique members) who received face-to-face follow up with a mental health professional within thirty days of hospitalization following an acute inpatient discharge with a principal diagnosis of mental illness.
Denominator:	Using administrative specifications, the unique count of acute inpatient discharges (Not unique members) of eligible MLTSS HCBS members with a principal diagnosis of mental illness during measurement year. The denominator for this measure is based on discharges, not on members. If members have more than one discharge, include all discharges.

%	60.0	55.6	79.8	16.7	40.7	64.2

MCOs are reporting some challenges in obtaining this data due to dual eligible members and limited access to Medicare claims. MCO E reported for the annual measurement period there were a total of 27 acute inpatient discharges for mental health hospitalization and of the 27 hospitalizations, 11 received a face-to-face follow up visit within 30 days. MCO E identified 23 unique members where 11 were 65 years of age or older and included 1 identified HCBS MLTSS FIDE/SNP member. Additionally, MCO E identified follow up events diagnosis as Major Depressive Order (6) Schizophrenia (4), and Bipolar Disorder (1). MCO E also reported the BH administrator will continue to collaborate with the network team to educate providers on the authorization process for MLTSS members so that the plan is aware of the admission in real time to help facilitate timely follow up. MCO D reported for the annual measurement period there were a total of 12 acute inpatient discharges for mental health hospitalization and of the 12 hospitalizations, 2 members received a face-to-face follow up within 30 days. Additionally, MCO D reported 6 of the 10 discharges that did not have follow up their BHA was not notified of the members' inpatient admissions to ensure after care planning and follow appointments are scheduled. Furthermore,

MCO D reported that reasons for no follow up for members who did have scheduled appointments included nonappearance with or without cancelation due to disinterest in the behavioral health program or transportation issues. MCO C reports for the quarterly measure, of the 31 acute inpatient discharges for mental health hospitalization there were 23 follow up visits with a mental health professional within thirty days. MCO C identified members with scheduled appointments but no evidence of follow up and readmission to acute inpatient stay within 4 days post-acute discharge within those that did not receive a face-to-face follow up visit within 30 days. MCOs report they are continuing to monitor and some are working with their behavior health administrator and staff to track hospital admissions and to ensure follow-up care.

PM # 37	Follow-up after mental health hospitalization for NF MLTSS members: 7 day follow up.
Numerator:	Per Administrative Specifications, the unique count of visits (Not unique members) who received face-to-face follow up with a mental health professional within seven days of hospitalization following an acute inpatient discharge with a principal diagnosis of mental illness.
Denominator:	Using administrative specifications, the unique count of acute inpatient discharges (Not unique members) of eligible MLTSS NF members with a principal diagnosis of mental illness during measurement year. The denominator for this measure is based on discharges, not on members. If members have more than one discharge, include all discharges.

MCOs are reporting some challenges in obtaining this data are due to dual eligible members and limited access to Medicare claims. MCO A reported for the annual measurement period there were a total of 2 acute inpatient discharges for mental health hospitalization and of the 2 hospitalizations, 1 received a face-to-face follow up visit within 7 days. Additionally MCO A reported that they provided reeducation to their Care Management team in that any inpatient psychiatric care must be followed up within timeframe for outpatient visit to Behavioral Health provider and have educated their providers to submit claims for BH services regardless of payer source. MCO C reports for the quarterly measure there was a total of 1 acute inpatient psychiatric

discharge for mental health hospitalization and the 1 hospitalization did not result in a face-to-face follow up visit within 7 days. Additionally, MCO C reported the diagnoses for this member was identified as Schizoaffective Disorder, Depressive Type. MCO E reported for the annual measurement period there were a total of 4 acute inpatient discharges for mental health hospitalization and of the 4 hospitalizations, none received a face-to-face follow up visit within 7 days. Of the 4 events MCO E reported that there were 3 unique members identified, 2 of the 3 were 65 years old or older, and none were identified as MLTSS FIDE/SNP members. Additionally, MCO E reported they added a Behavioral Health Care Manager with a substance abuse specialty to provide additional professional support to address the needs of this population and will continue to add staffing as needed to assist with the management of members who are identified to have higher behavioral health concerns.

PM # 38	Follow-up after mental health hospitalization for NF MLTSS members: 30 day follow up.
Numerator:	Per Administrative Specifications, the unique count of visits (Not unique members) who received face-to-face follow up with a mental health professional within thirty days of hospitalization following an acute inpatient discharge with a principal diagnosis of mental illness.
Denominator:	Using administrative specifications, the unique count of acute inpatient discharges (Not unique members) of eligible MLTSS NF members with a principal diagnosis of mental illness during measurement year. The denominator for this measure is based on discharges, not on members. If members have more than one discharge, include all discharges.

MCOs report they used claims payment systems based on the claims submitted/received by the MCO. MCO B reports for the annual measure there were a total of 1652 members with at least one claim with a select BH diagnosis. Additionally, MCO B reported that the top diagnosis identified for this population is major depressive disorder and this diagnosis has consistently been the top diagnosis in this performance measure over the year. MCO E reported for the annual measure there were a total of 4965 unique count of MLTSS HCBS members meeting eligibility criteria and 397 were identified as MLTSS FIDE/SNP members. Additionally, MCO E reported of the 956 members in the numerator 596 members were 65 years of age or older, 802 were identified with mental illness (16.15%), 86 were identified with substance abuse and mental illness (1.73%) and those with substance abuse only were 68 (1.37%). Furthermore, MCO E reported that the top 4 diagnosis

identified were Major depressive disorder, adjustment disorder with anxiety, dysthymic disorder, and bipolar disorder. The MCOs will continue to monitor the data for trends.

PM # 39a	Total MLTSS HCBS members with Substance Abuse Only (SA).
Numerator:	Members in the denominator of the Substance Abuse Only (SA) population, with at least one claim during the measurement period with a primary or secondary diagnosis of substance abuse only (HEDIS 2016 AOD Dependence Value Set).
Denominator:	Unique count of MLTSS HCBS members meeting eligibility criteria that is assigned to HCBS based on the last date of enrollment in MLTSS with the MCO during the measurement period.

MCOs report they used claims payment system based on the claims submitted/received by the MCO. MCO C reported during the annual measure they identified 3,296 of the MLTSS members residing in a Nursing Facility have a primary or secondary diagnosis of behavioral health (HEDIS 2016 Mental Illness Value Set and HEDIS 2016 AOD Dependence Value Set). Additionally MCO C reported of the 3,296 members, there were 2,839 identified with a Mental Illness diagnosis, 124 had a Substance Abuse diagnosis and 333 had both Mental Illness and Substance Abuse diagnoses. Also 8 MLTSS FIDE/SNP members were identified with a Mental Illness diagnosis. MCO D reported during the quarterly measure there were 3,330 MLTSS NF members who were continuously enrolled and 1,256 of those had at least one claim for a select behavioral diagnosis. MCO D reported that the top three behavioral health disorders during the measurement period were Major depressive disorder, single episode, and Bipolar disorder, unspecified and major depressive disorder, recurrent, unspecified. Additionally MCO D reported their Behavioral Health Administrator works collaboratively with an interdisciplinary team to ensure that MLTSS NF members diagnosed with a select behavioral health diagnosis are connected to appropriate behavioral health services. MCOs will continue to monitor.

Deliverables due during MLTSS 2nd quarter (1/1/2018 - 3/31/2018)

PM # 40a	Total MLTSS NF members with Substance Abuse Only (SA).

Deliverables due during MLTSS 2nd quarter (1/1/2018 - 3/31/2018)

PM # 41	MLTSS services used by HCBS members: PCA services and Medical Day services only.
Numerator:	Unique count of members with at least one claim for Medical Day services AND at least one claim for PCA services during the measurement period. Exclude members with a claim for any other MLTSS service during the measurement period.
Denominator:	Unique count of members enrolled in MLTSS HCBS at any time during the measurement period.
Data Source:	MCO claims data
Measurement Period:	Quarterly (Lag Report Due: 210 day lag after quarter)

4/1/17 - 6/30/17	А	В	С	D	Е	TOTAL
Numerator	23	248	465	124	616	1476
%	3.1	6.1	4.3	3.0	14.0	6.1

MCO A reported there were 23 members who were receiving only PCA and MDC services during the measurement period. MCO A reports random case file sampling identified several members began MLTSS-specific services following the measurement period, such as PERS and HDM and have also identified nine members who enrolled with MLTSS during the measurement period. Additionally, MCO A reported they conduct monthly reeducation with Care Management regarding the importance of options counseling, providing MLTSS-specific services, and evaluation if appropriate for discharge assessment. MCO E reported there were 616 members who were receiving only PCA and MDC services during the measurement period. MCO E reported they identified 412 unique MLTSS FIDE/SNP members enrolled in MLTSS HCBS at any time during the measurement period but none of those members were found to be utilizing PCA services and Medical Day services only. Additionally, MCO E reported their Care Management team continues to provide options counseling on MLTSS-specific services but have found cultural values can affect the services members are comfortable accepting and may be a factor for this measure. All MCOs report they will continue to monitor these members to verify that their needs are being met and continue to monitor this data for trends, etc.

Deliverables due during MLTSS 2nd quarter (1/1/2018 - 3/31/2018)

There were a total of 994 Critical Incidents reported by the five MCOs during the October 1st, 2017 to December 31st 2017 measurement period. These are reported events not unduplicated members. The top two categories account for 68.6% of the overall CIs. The five most common CIs were:

- 1. Fall resulting in the need for medical treatment at (355 reported CIs 35.7% overall)
- 2. Medical emergency resulting in the need for medical treatment (327 reported CIs 32.9% overall)
- 3. Operational Breakdown (43 reported CIs 4.3% overall)
- 4. Unable to Contact (41 reported CIs 4.1% overall)
- 5. Inaccessible for initial/on-site meeting (36 reported CIs 3.6% overall)

MCO A discussed the ongoing education given to providers on the process and form to be used for critical incident reporting. Starting October 2017, this MCO is providing refrigerator magnets to HCBS members so that they can easily locate their CM's contact information for CI reporting or for any other needs.

MCO B reported 42 critical incidents in the category of Operational Breakdown due to a facility closing to admissions by the Board of Health. The MCO stated that their affected members reported quality of care concerns. They worked closely with the members to offer options counseling to transfer members to a new setting/facility and they provided their findings and updates on their members to the State.

MCO C identified in their report the data regarding age groups for members who experienced a critical incident along with where the CI took place. They report that they are consistently finding the majority of falls occur for members in their own home. This MCO reported that these members have been re-assessed for fall risk and that some environmental risks have been addressed through appropriate furniture placement, installing grab bars, etc.

As part of their Discovery, MCO D noted trends in CIs from three different facilities/providers. The MCO reached out to those providers and they shared the response from one provider detailing the interventions used to reduce the risk for falls, including utilizing PT to address unsteady gait, assessing apartment for lighting, and review for appropriate footwear.

In cooperation with the EQRO and the MCOs, the Office of MLTSS Quality Monitoring and DoAS have revised PM #18. Effective 1/1/2018, the MCOs will be reporting not only the number of CIs per category, but how many CIs have a known date of occurrence, and the average time it takes for the MCO to be notified of a CI. The MCOs have been given a 30-day extension for the revised PM #18, measurement period 1/1/18 - 3/31/18, to allow the EQRO time to review and validate the data from the MCOs. The first revised report is due to DMAHS on 5/30/18.

Budgent Neutrality Monitoring Sheet Notes

Enrollment Trends

No Waiver Spending

DY6-10 Total Computable = MM's multiplied by DY5 PMPM caps per STCs #128 and #129 (increased annually by CMS approved growth factors in current STC #128). **DY6-10** Federal Share = Total Computable multiplied by composite federal share ratio in accordance with current Demo's STC #130

With Waiver Spending

DY6-10 = projected MM's multiplied by PMPMs. PMPM calculated by using the DY5 PMPMs from the QE Dec 15 Report and increasing them annually by CMS approved growth factors in current STC #128 and #129

DY6-10 Federal Share = Total Computable multiplied by composite federal share ratio in accordance with STC #130

1115 Comprehensive Waiver Quarterly Report Demonstration Year: 6 Federal Fiscal Quarter: 2 (1/1/18-03/31/18) Department of Children and Families (DCF), Children's System of Care (CSOC)

Quality Assurance Activities:

STC 103(d)(x) A summary of the outcomes of the State's Quality Strategy for HCBS as outlined above • I/DD and ASD Pilot

#1 Administrative	The New Jersey State Medicaid Agency (DMAHS) retains the ultimate
Authority Sub	administrative authority and responsibility for the operation of the waiver
Assurance	program by exercising oversight of the performance of the waiver functions
	by other state and contracted agencies.
Data Source	Record Review and or CSA data
	Random sample of case files representing a 95% confidence level
Sampling Methodology	
Numerator: Number of	In Development
sub assurances that are	
substantially compliant	
(86 % or greater)	
Denominator: Total	In Development
number of sub	
assurances audited	
Percentage	In Development

The reporting of this quality strategy is in development and will be addressed later.

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#2 Quality of Life Sub Assurance Data Source	All youth that meet the clinical criteria of Children and Families(DCF), Division will be assessed utilizing the comprehe Strengths (CANS) assessment tool. Review of Child and Adolescent Needs Contracted System Administrator (CSA) Data report: CSA NJ1225 Strengths & N	of Children' s System of Care (CSOC) nsive Child and Adolescent Needs and and Strengths scores) Data.
Sampling Methodology	100% New youth enrolled in the waive	r
Waiver	I/DD	ASD
Numerator:	179	34
Number of youth		
receiving Child and		
Adolescent Needs and		

Strengths (CANS)		
assessment		
Denominator:	180	34
Total number of new		
enrollees		
Percentage	99%	100%

One youth was admitted to the waiver on 3/27/18 at the end of the reporting period. The assessment was not due and therefore should not have been captured during this reporting period.

STC 103(d)(x) A summary of the outcomes of the State's Quality Strategy for HCBS as outlined above

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#3 Quality of Life Sub	Jality of Life Sub80% of youth should show improvement in Child and Adolescent Needs and								
Assurance	Strengths composite rating within a yea	ar							
Data Source	CSA Data on CANS Initial and Subsequent Assessments.								
	Data report: CSA NJ2021CANS Waiver (Dutcome							
Sampling Methodology	Number of youth enrolled in the waive	r for at least 1 year.							
Waiver	I/DD	ASD							
Numerator:	898	197							
Number of youth who									
improved within one									
year of admission									
Denominator:	985	205							
Number of youth with									
Child and Adolescent									
Needs and Strengths									
assessments conducted									
1 year from admission									
or last CANS conducted									
Percentage	91%	96%							

CSOC conducted a review of the Care and Associated Needs Assessment (CANS) for all youth during the reporting period served under the ID/DD – MI and ASD waivers. Both waiver programs achieved greater outcomes than the 80% threshold of improvement for the youth. CSOC will continue to monitor this area to make sure that we maintain an 80% or higher outcome for this indicator.

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#4 Level of Care Sub	CSOC's Contracted System's Administrator (CSA), conducts an initial Level of
Assurance	Care assessment (aka Intensity of Services (IOS) prior to enrollment for all
	youth.
Data Source	CSA Data.
	Data report: CSA NJ1218 New Enrollees, Quarterly Count and IOS Completed

Sampling Methodology	100% new youth enrolled in the waiver	
Waiver	I/DD	ASD
Numerator: Number of youth receiving initial level of care determination prior to enrollment	180	34
Denominator: Number	180	34
of new enrollees	100%	4000/
Percentage	100%	100%

CSOC reviewed all new enrollees for the ID/DD and ASD waivers. All youth meet the criteria during the reporting period.

STC 103(d)(x) A summary of the outcomes of the State's Quality Strategy for HCBS as outlined above

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#5 Plan of Care Sub	The Plan of Care (aka Indiv	idual Service Plan (ISP)) is developed based on the
Assurance	needs identified in the Child and Adolescent Needs and Strengths assessment	
	tool and according to CSOC policies	
Data Source	CSA Data on Plans of Care completions, Record Review.	
	Data report: CSA NJ1219 Follow – Up Treatment Plan and Associated SNA	
Sampling Methodology	100% of youth enrolled during the measurement period.	
Waiver	I/DD ASD	
Numerator: Number of Plans of Care that address youth's assessed needs	179	34
Denominator: Number of Plans of Care reviewed	180	34
Percentage	99%	100%

One youth was admitted to the waiver on 3/27/18 at the end of the reporting period. The assessment was not due and therefore should not have been captured during this reporting period. CSCO will continue to monitor this item.

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#6 Plan of Care Sub Assurance	Plan of Care (ISP) is updated at least annually or as the needs of the youth changes	
Data Source	CSA Data Report: CSA NJ1289 Waiver ISP Aggregate Report All Youth	
Sampling Methodology	100% of youth enrolled during the measurement period.	
Waiver	I/DD ASD	
Numerator: Number of current Plans of Care updated at least annually	359	55
Denominator: Number of Plans of Care reviewed	359	55
Percentage	100%	100%

All waivered youth enrolled during the reporting period had a documented annual review.

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#7 Plan of Care Sub Assurance	Services are authorized in accordance with the approved plan of care (ISP).	
Assurance	Data Report: CSA NJ1220 Waiver Services Provided	
Data Source	CSA Data Report of Authorizations	
	Record Review	
Sampling Methodology	100% of youth enrolled during the measurement period.	
Waiver	I/DD	ASD
Numerator: Number of	178	34
plans of care that had		
services authorized		
based on the plan of		
care		
Denominator: Number	180	34
of plans of care		

reviewed		
Percentage	99%	100%

These two youths should not have been counted as part of the report as they did not receive a waiver service.

STC 102(d)(x) A summary of the outcomes of the State's Quality Strategy for HCBS as outlined above

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#8 Plan of Care Sub Assurance	Services are delivered in accordance with the approved plan of care (ISP).		
Data Source	CSA Data Report of Authorizations	CSA Data Report of Authorizations	
	Claims paid on authorized services through MMIS		
	Record Review		
Sampling Methodology	Random sample representing a 95% confidence level		
Waiver	I/DD	ASD	
Numerator: Number of Services that were delivered	In Development	In Development	
Denominator: Number of services that were authorized	In Development	In Development	
Percentage	In Development	In Development	

The reporting of this quality strategy is in development and will be addressed at a later date.

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#9 Plan of Care Sub	Youth/Families are provided a choice of providers, based on the available	
Assurance	qualified provider network.	
Data Source	Record review Statewide	
	Provider List -CSA Data Report	
Compline Mothedology		effeteres level
Sampling Methodology	Random sample representing a 95% confidence level	
Waiver	I/DD	ASD

Numerator: Number of youth/families given a choice of providers as indicated in progress notes	N/A*	N/A*
Denominator: Number		
of records reviewed	N/A*	N/A*
Percentage	N/A*	N/A*

*CSOC does not have data available for this, our Electronic Health Record recently incorporated a way to document family choice and CSOC is working on a method on how to report this data.

STC 103(d)(x) A summary of the outcomes of the State's Quality Strategy for HCBS as outlined above

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

#10 Qualified Providers Sub Assurance	Children's System of Care verifies that providers of waiver services initially meet required qualified status, including any applicable licensure and/or certification standards prior to their furnishing waiver services.	
Data Source	Record review	
Sampling Methodology	100% Agency	
Waiver	I/DD	ASD
Numerator: Number of new providers that met the qualifying standards prior to furnishing waiver services	3	
Denominator: Total number of new providers	3	
Percentage	100%	

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

# 11 Qualified Providers Sub Assurance	Children's System of Care verifies that providers of waiver services continually meet required qualified status, including any applicable licensure and/or certification standards.
Data Source	Provider HR Record Review
Sampling Methodology	100% Agency

Waiver	I/DD	ASD
Numerator: Number of providers that meet the qualifying standards – applicable Licensures/certification	In Development	In Development
Denominator: Total number of providers that initially met the qualified status	In Development	In Development
Percentage	In Development	In Development

All providers are qualified at the RFQ stage, so any certifications/qualifications of providers added during the reporting period were confirmed. The reporting of this for established providers is in development.

STC 103(d)(x) A summary of the outcomes of the State's Quality Strategy for HCBS as outlined above

- I/DD and ASD Pilot
- Measurement period 1/1/2018 3/31/2018

# 12 Qualified Providers Sub Assurance	CSOC implements its policies and procedures for verifying that applicable certifications/checklists and training are provided in accordance with qualification requirements as listed in the waiver.	
Data Source	Record Review	
Sampling Methodology	100% Community Provider Agencies	
Waiver	I/DD	ASD
Numerator: Number of providers that have been trained and are qualified to provide waiver services	3	
Denominator: Total number of providers that provide waiver services	3	
Percentage	100%	

All providers are qualified at the RFQ stage, so any certifications and trainings of providers added during the reporting period were verified.

# 13 Health and Welfare Sub	The State, demonstrates on an on-going basis, that it identifies, addresses and seeks to prevent instances of abuse, neglect and exploitation.	
Assurance		
Data Source	Review of UIRMS database and Administrative policies & procedures	
Sampling Methodology	100% of youth enrolled for the reporting period	
Waiver	I/DD	ASD
Numerator: Total number of UIRs submitted timely according to State policies	1	0
Denominator: Number of UIRs submitted involving enrolled youth	11	0
Percentage	9%	n/a

The majority of incidents were reported late, a few days after the incident, and not within the timeframes as required by the procedure. CSOC will send a memo to providers reiterating the need to report UIRs as required by the procedure (next business day or immediately) into our incident database system.

# 14 Health and Welfare Sub Assurance	The State incorporates an unusual incident management reporting system (UIRMS), as articulated in administrative order 205, which reviews incidents and develops policies to prevent further similar incidents (i.e., abuse, neglect and runaways).	
Data Source	Review of UIRMS database and Administrative policies & procedures	
Sampling Methodology	100% of youth enrolled for the reporting period	
Waiver	I/DD	ASD
Numerator: The	8	0
number of incidents		
that were reported		
through UIRMS and		
had required follow up		
Denominator: Total	11	0
number of incidents		
reported that required		
follow up		
Percentage	73%	n/a

There are two incidents (one event – two individuals) that were reported to the Department of Human Services (DHS) and one incident to the Division of Permanency and Protection (DCPP) and not into the

incident database maintained by CSOC. Those three unusual incident reports to be completed are awaiting follow-up. As stated above a memo will be sent to providers about the process and CSOC will reach out to the other State entities to gather their findings when follow-up is completed.

# 15 Health and	The State policies and procedures for the use or prohibition of restrictive	
Welfare Sub	interventions (including restraints and seclusion) are followed.	
Assurance		
Data Source	Review of UIRMS	
Sampling Methodology	100% of all allegations of restrictive interventions reported
