FRAMEWORK FOR THE ANNUAL REPORT OF THE CHILDREN'S HEALTH INSURANCE PLANS UNDER TITLE XXI OF THE SOCIAL SECURITY ACT

Preamble

Section 2108(a) and Section 2108(e) of the Social Security Act (the Act) provide that each state and territory* must assess the operation of its state child health plan in each federal fiscal year and report to the Secretary, by January 1 following the end of the federal fiscal year, on the results of the assessment. In addition, this section of the Act provides that the state must assess the progress made in reducing the number of uncovered, low-income children. The state is out of compliance with CHIP statute and regulations if the report is not submitted by January 1. The state is also out of compliance if any section of this report relevant to the state's program is incomplete.

The framework is designed to:

- Recognize the diversity of state approaches to CHIP and allow states flexibility to highlight key accomplishments and progress of their CHIP programs, AND
- Provide consistency across states in the structure, content, and format of the report, AND
- Build on data already collected by CMS quarterly enrollment and expenditure reports, AND
- Enhance **accessibility** of information to stakeholders on the achievements under Title XXI

The CHIP Annual Report Template System (CARTS) is organized as follows:

- Section I: Snapshot of CHIP Programs and Changes
- Section II: Program's Performance Measurement and Progress
- Section III: Assessment of State Plan and Program Operation
- Section IV: Program Financing for State Plan
- Section V: Program Challenges and Accomplishments
 - * When "state" is referenced throughout this template it is defined as either a state or a territory.

*<u>Disclosure</u>. According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1148. The time required to complete this information collection is estimated to average 40 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, write to: CMS, 7500 Security Blvd., Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.

DO NOT CERTIFY YOUR REPORT UNTIL ALL SECTIONS ARE COMPLETE.

State/Territory: HI
Name of State/Territory
The following Annual Report is submitted in compliance with Title XXI of the Social Security Act (Section 2108(a) and Section 2108(e)).
Signature: Judy Mohr Peterson
CHIP Program Name(s): All, Hawaii
CHIP Program Type:
 ☐ CHIP Medicaid Expansion Only ☐ Separate Child Health Program Only ☐ Combination of the above
Reporting Period: 2017 (Note: Federal Fiscal Year 2017 starts 10/1/2016 and ends 9/30/2017)
Contact Person/Title: Edie Mayeshiro/Medical Assistance Program Officer
Address: 601 Kamokila Blvd.
City: Kapolei State: HI Zip: 96707
Phone: 808-692-8134 Fax: 808-692-8173
Email: emayeshiro@dhs.hawaii.gov
Submission Date: 4/23/2018

(Due to your CMS Regional Contact and Central Office Project Officer by January 1st of each year)

Section I. Snapshot of CHIP Program and Changes

1)	To provide a summary at-a-glance of your CHIP program, please provide the following information. If you would like to make any comments on your responses, please explain in narrative below this table.								
	☑ Provide an assurance that your state's CHIP program eligibility criteria as set forth in the CHIP state plan in section 4, inclusive of PDF pages related to Modified Adjusted Gross Income eligibility, is accurate as of the date of this report.								
	Please note that the numbers in brackets, e.g., [500] are character limits in the Children's Health Insurance Program (CHIP) Annual Report Template System (CARTS). You will not be able to enter responses with characters greater than the limit indicated in the brackets.

Section II Program's Performance Measurement and Progress

This section consists of two subsections that gather information about the CHIP and/or Medicaid program. Section IIA captures your enrollment progress as well as changes in the number and/or rate of uninsured children in your state. Section IIB captures progress towards meeting your state's general strategic objectives and performance goals.

Section IIA: Enrollment And Uninsured Data

1. The information in the table below is the Unduplicated Number of Children Ever Enrolled in CHIP in your state for the two most recent reporting periods. The enrollment numbers reported below should correspond to line 7 (Unduplicated # Ever Enrolled Year) in your state's 4th quarter data report (submitted in October) in the CHIP Statistical Enrollment Data System (SEDS). The percent change column reflects the percent change in enrollment over the two-year period. If the percent change exceeds 10 percent (increase or decrease), please explain in letter A below any factors that may account for these changes (such as decreases due to elimination of outreach or increases due to program expansions). This information will be filled in automatically by CARTS through a link to SEDS. Please wait until you have an enrollment number from SEDS before you complete this response. If the information displayed in the table below is inaccurate, please make any needed updates to the data in SEDS and then refresh this page in CARTS to reflect the updated data.

Program	FFY 2016	FFY 2017	Percent change FFY 2016-2017
CHIP Medicaid	25780	27589	7.02
Expansion Program			
Separate Child Health	0	0	
Program			

A. Please explain any factors that may account for enrollment increases or decreases exceeding 10 percent. **[7500]**

N/A

2. The tables below show trends in the number and rate of uninsured children in your state. Three year averages in Table 1 are based on the Current Population Survey. The single year estimates in Table 2 are based on the American Community Survey (ACS). CARTS will fill in the single year estimates automatically, and significant changes are denoted with an asterisk (*). If your state uses an alternate data source and/or methodology for measuring change in the number and/or rate of uninsured children, please explain in Question #3.

Table 1: Number and percent of uninsured children under age 19 below 200 percent of poverty, Current Population Survey

			Uninsured Ch	ildren Under Age 19
	Uninsured Childr	en Under Age 19	Below 200 Pe	rcent of Poverty as a
Period	Below 200 Pero	cent of Poverty	Percent of Total	Children Under Age 19

2016	3	2.0	1.1	.5	
Percent change	50.0%	N/A	100.0%	N/A	
2015 vs. 2016					

- A. Please explain any activities or factors that may account for increases or decreases in your number and/or rate of uninsured children. [7500]
- B. Please note any comments here concerning ACS data limitations that may affect the reliability or precision of these estimates. [7500]

3.	Please indicate by checking the box below whether your state has an alternate data source as	ınd/or
	methodology for measuring the change in the number and/or rate of uninsured children.	

Yes (please report your data in the table below	W)
CHIP Annual Report Template – FFY 2017	

No No	(skip to	Question	#4)
	(SKIP to	Question	,

Please report your alternate data in the table below. Data are required for two or more points in time to demonstrate change (or lack of change). Please be as specific and detailed as possible about the method used to measure progress toward covering the uninsured.

Topic	Description
Data source(s)	
Reporting period (2 or more	
points in time)	
Methodology	
Population (Please include ages	
and income levels)	
Sample sizes	
Number and/or rate for two or	
more points in time	
Statistical significance of results	

- A. Please explain why your state chose to adopt a different methodology to measure changes in the number and/or rate of uninsured children.
 [7500]
- B. What is your state's assessment of the reliability of the estimate? Please provide standard errors, confidence intervals, and/or p-values if available.
 [7500]
- C. What are the limitations of the data or estimation methodology? [7500]
- D. How does your state use this alternate data source in CHIP program planning? [7500]

Enter any Narrative text related to Section IIA below. [7500]

Section IIB: State Strategic Objectives And Performance Goals

This subsection gathers information on your state's general strategic objectives, performance goals, performance measures and progress towards meeting goals, as specified in your CHIP state plan. (If your goals reported in the annual report now differ from Section 9 of your CHIP state plan, please indicate how they differ in "Other Comments on Measure." Also, the state plan should be amended to reconcile these differences). The format of this section provides your state with an opportunity to track progress over time. This section contains templates for reporting performance measurement data for each of five categories of strategic objectives, related to:

- Reducing the number of uninsured children
- CHIP enrollment
- Medicaid enrollment
- · Increasing access to care
- Use of preventative care (immunizations, well child care)

Please report performance measurement data for the three most recent years for which data are available (to the extent that data are available). In the first two columns, data from the previous two years' annual reports (FFY 2015 and FFY 2016) will be populated with data from previously reported data in CARTS. If you reported data in the two previous years' reports and you want to update/change the data, please enter that data. If you reported no data for either of those two years, but you now have data available for them, please enter the data. In the third column, please report the most recent data available at the time you are submitting the current annual report (FFY 2017).

In this section, the term performance measure is used to refer to any data your state provides as evidence towards a particular goal within a strategic objective. For the purpose of this section, "objectives" refer to the five broad categories listed above, while "goals" are state-specific, and should be listed in the appropriate subsections within the space provided for each objective.

NOTES: Please do not reference attachments in this section. If details about a particular measure are located in an attachment, please summarize the relevant information from the attachment in the space provided for each measure.

In addition, please do not report the same data that were reported for Child Core Set reporting. The intent of this section is to capture goals and measures that your state did not report elsewhere. As a reminder, Child Core Set reporting migrated to MACPRO in December 2015. Historical data are still available for viewing in CARTS.

Additional instructions for completing each row of the table are provided below.

A. Goal:

For each objective, space has been provided to report up to three goals. Use this section to provide a brief description of each goal you are reporting within a given strategic objective. **All new goals should include a direction and a target. For clarification only, an <u>example goal would be:</u> "Increase (direction) by 5 percent (target) the number of CHIP beneficiaries who turned 13 years old during the measurement year who had a second dose of MMR, three hepatitis B vaccinations and one varicella vaccination by their 13th birthday."**

B. Type of Goal:

For each goal you are reporting within a given strategic objective, please indicate the type of goal, as follows:

- <u>New/revised</u>: Check this box if you have revised or added a goal. Please explain how and why the goal was revised.
- <u>Continuing:</u> Check this box if the goal you are reporting is the same one you have reported in previous annual reports.
- <u>Discontinued:</u> Check this box if you have met your goal and/or are discontinuing a goal. Please explain why the goal was discontinued. GAL

Please indicate the status of the data you are reporting for each goal, as follows:

<u>Provisional:</u> Check this box if you are reporting performance measure data for a goal, but the
data are currently being modified, verified, or may change in any other way before you
finalize them for FFY 2017.

<u>Explanation of Provisional Data</u> – When the value of the Status of Data Reported field is selected as "Provisional", the state must specify why the data are provisional and when the state expects the data will be final.

- Final: Check this box if the data you are reporting are considered final for FFY 2017.
- Same data as reported in a previous year's annual report: Check this box if the data you are reporting are the same data that your state reported for the goal in another annual report. Indicate in which year's annual report you previously reported the data.

C. Measurement Specification:

This section is included for only two of the objectives— objectives related to increasing access to care, and objectives related to use of preventative care—because these are the two objectives for which states may report using the HEDIS® measurement specification. In this section, for each goal, please indicate the measurement specification used to calculate your performance measure data (i.e., were the measures calculated using the HEDIS® specifications or some other method unrelated to HEDIS®).

Please indicate whether the measure is based on HEDIS® technical specifications or another source. If HEDIS® is selected, the HEDIS® Version field must be completed. If "Other" measurement specification is selected, the explanation field must be completed.

D. HEDIS® Version:

Please specify HEDIS® Version (example 2016). This field must be be completed only when a user select the HEDIS® measurement specification.

"Other" measurement specification explanation:

If "Other", measurement specification is selected, please complete the explanation of the "Other" measurement specification. The explanation field must be completed when "Other" measurement specification has been selected.

E. Data Source:

For each performance measure, please indicate the source of data. The categories provided in this section vary by objective. For the objectives related to reducing the number of uninsured children and CHIP or Medicaid enrollment, please indicate whether you have used eligibility/enrollment data, survey data (specify the survey used), or other source (specify the other source). For the objectives related to access to care and use of preventative care, please indicate whether you used administrative data (claims) (specify the kind of administrative data used), hybrid data (claims and medical records) (specify how the two were used to create the data source), survey data (specify the survey used), or other source (specify the other source). In all cases, if another data source was used, please explain the source.

F. Definition of Population Included in Measure:

Numerator: Please indicate the definition of the population included in the numerator for each measure (such as the number of visits required for inclusion, e.g., one or more visits in the past year).

Denominator: Please indicate the definition of the population included in the denominator for each measure.

For measures related to increasing access to care and use of preventative care, please

- Check one box to indicate whether the data are for the CHIP population only, or include both CHIP and Medicaid (Title XIX) children combined.
- If the denominator reported is not fully representative of the population defined above (the CHIP population only, or the CHIP and Medicaid (Title XIX) populations combined), please further define the denominator. For example, denominator includes only children enrolled in managed care in certain counties, technological limitations preventing reporting on the full population defined, etc.). Please report information on exclusions in the definition of the denominator (including the proportion of children excluded), The provision of this information is important and will provide CMS with a context so that comparability of denominators across the states and over time can occur.

G. Deviations from Measure Specification

For the measures related to increasing access to care and use of preventative care.

If the data provided for a measure deviates from the measure specification, please select the type(s) of measure specification deviation. The types of deviation parallel the measure specification categories for each measure. Each type of deviation is accompanied by a comment field that states must use to explain in greater detail or further specify the deviation when a deviation(s) from a measure is selected.

The five types (and examples) of deviations are:

- Year of Data (e.g., partial year),
- Data Source (e.g., use of different data sources among health plans or delivery systems),
- Numerator (e.g., coding issues),
- Denominator (e.g., exclusion of MCOs, different age groups, definition of continuous enrollment),
- Other.

When one or more of the types are selected, states are required to provide an explanation.

Please report the year of data for each performance measure. The year (or months) should correspond to the period in which enrollment or utilization took place. Do not report the year in which data were collected for the measure, or the version of HEDIS® used to calculate the measure, both of which may be different from the period corresponding to enrollment or utilization of services.

Date Range: available for 2017 CARTS reporting period.

Please define the date range for the reporting period based on the "From" time period as the month and year which corresponds to the beginning period in which utilization took place and please report the "To" time period as the month and year which corresponds to the end period in which utilization took place. Do not report the year in which data were collected for the measure, or the version of HEDIS® used to calculate the measure, both of which may be different from the period corresponding to utilization of services.

H. Performance Measurement Data (HEDIS® or Other):

In this section, please report the numerators and denominators, rates for each measure (or component). The template provides two sections for entering the performance measurement data, depending on

whether you are reporting using HEDIS® or other methodologies. The form fields have been set up to facilitate entering numerators and denominators for each measure. If the form fields do not give you enough space to fully report on the measure, please use the "additional notes" section.

The preferred method is to calculate a "weighted rate" by summing the numerators and denominators across plans, and then deriving a single state-level rate based on the ratio of the numerator to the denominator). The reporting unit for each measure is the state as a whole. If states calculate rates for multiple reporting units (e.g., individual health plans, different health care delivery systems), states must aggregate data from all these sources into one state rate before reporting the data to CMS. In the situation where a state combines data across multiple reporting units, all or some of which use the hybrid method to calculate the rates, the state should enter zeroes in the "Numerator" and "Denominator" fields. In these cases, it should report the state-level rate in the "Rate" field and, when possible, include individual reporting unit numerators, denominators, and rates in the field labeled "Additional Notes on Measure," along with a description of the method used to derive the state-level rate.

I. Explanation of Progress:

The intent of this section is to allow your state to highlight progress and describe any quality-improvement activities that may have contributed to your progress. Any quality-improvement activity described should involve the CHIP program, benefit CHIP enrollees, and relate to the performance measure and your progress. An example of a quality-improvement activity is a state-wide initiative to inform individual families directly of their children's immunization status with the goal of increasing immunization rates. CHIP would either be the primary lead or substantially involved in the project. If improvement has not occurred over time, this section can be used to discuss potential reasons for why progress was not seen and to describe future quality-improvement plans. In this section, your state is also asked to set annual performance objectives for FFY 2018, 2019 and 2020. Based on your recent performance on the measure (from FFY 2015 through 2017), use a combination of expert opinion and "best guesses" to set objectives for the next three years. Please explain your rationale for setting these objectives. For example, if your rate has been increasing by 3 or 4 percentage points per year, you might project future increases at a similar rate. On the other hand, if your rate has been stable over time, you might set a target that projects a small increase over time. If the rate has been fluctuating over time, you might look more closely at the data to ensure that the fluctuations are not an artifact of the data or the methods used to construct a rate. You might set an initial target that is an average of the recent rates, with slight increases in subsequent years. In future annual reports, you will be asked to comment on how your actual performance compares to the objective your state set for the year, as well as any quality-improvement activities that have helped or could help your state meet future objectives.

J. Other Comments on Measure:

Please use this section to provide any other comments on the measure, such as data limitations, plans to report on a measure in the future, or differences between performance measures reported here and those discussed in Section 9 of the CHIP state plan.

Explanation of Progress:	Explanation of Progress:	Explanation of Progress:
How did your performance in 2015 compare with the Annual Performance Objective documented in your 2014 Annual Report? For FFY'17, Medicaid enrollment of children under age 19 years increased by 1.28%, however our goal to increase enrollment of that population by 3% was not met. What quality improvement activities that involve the CHIP program and benefit CHIP enrollees help enhance your ability to report on this measure, improve your results for this measure, or make progress toward your goal? The Health Care Outreach Branch assists persons who need assistance with completing their applications. These applicants may have been admitted to, or released from, a facility, as well as those living in the community. This process has a residual effect as applicants with children and other family members are encouraged to apply for their entire family. We have also hired additional staff to assist with application intake via telephone and have encouraged the use of our online portal to the public. Rapid responses for displaced workers and community fairs have also had a residual effect in reaching potential Medicaid eligibles. Please indicate how CMS might be of assistance in	How did your performance in 2016 compare with the Annual Performance Objective documented in your 2015 Annual Report? Note that Hawaii's fiscal situation has improved, thus, one would expect enrollment to decrease slightly. Although for FFY'16, Medicaid enrollment of children under age 19 years decreased by 3.46%, overall, Hawaii's uninsured rate for children is near functional zero. What quality improvement activities that involve the CHIP program and benefit CHIP enrollees help enhance your ability to report on this measure, improve your results for this measure, or make progress toward your goal? The Health Care Outreach Branch was established in our Division to help persons who need assistance with completing their applications. These applicants may have been admitted to, or released from, a facility, as well as those living in the community. This process has a residual effect as applicants with children and other family members are encouraged to also apply for their entire family. Rapid responses for displaced workers and community fairs have also had a residual effect in reaching potential Medicaid eligibles.	How did your performance in 2017 compare with th Annual Performance Objective documented in you 2016 Annual Report? Note that Hawaii's fiscal situation has improved, thus, one would expect enrollment to decrease slightly. Although for FFY'17, Medicaisenrollment of children under age 19 years increased by 1%, overall, Hawaii's uninsured rate for children is neafunctional zero. What quality improvement activities that involve the CHIP program and benefit CHIP enrollees helpenhance your ability to report on this measure improve your results for this measure, or mak progress toward your goal? Continue informational amoutreach activities about Medicaid programs, including Title XXI Medicaid expansion, and to maintain total Medicaid enrollment of children under age 19, educated and encourage use of on-line portal for applications. Annual Performance Objective for FFY 2016: For total Medicaid enrollees under age 19, our projection for 2016 remains the same. Annual Performance Objective for FFY 2017: For total Medicaid enrollees under age 19, our projection for 2017 remains the same.	Annual Performance Objective for FFY 2017: Relying on previous years' reports, we expect Hawaii's uninsured rate for children to continue to be near functional zero; therefore, our objective is to maintain overall insured enrollment. Annual Performance Objective for FFY 2018: For total Medicaid enrollees under age 19, our projection for 2018 is to maintain overall insured enrollment.	Annual Performance Objective for FFY 2018: Relying on previous years' reports, we expect Hawaii's uninsured rate for children to continue to be near functional zero; therefore, our objective is to maintain overall insured enrollment. Annual Performance Objective for FFY 2019: For total Medicaid enrollees under age 19, our projection for 2019 is to maintain overall insured enrollment.

FFY 2015	FFY 2016	FFY 2017
Annual Performance Objective for FFY 2018: For total Medicaid enrollees under age 19, our projection for 2018 is an increase of 1%. Explain how these objectives were set: According to the U.S. Census Bureau Current Population Survey (CPS) Table Creator for 2016, Hawaii uninsured children rate remained stable at 1.2%, still, one of the lowest in the nation. Locating these children remains a challenge; once located, convincing their parent(s)/guardian(s) to enroll them is another challenge. We will continue to work on both. That said, for FFY'18, we anticipate our Medicaid population to increase by 1%.	Annual Performance Objective for FFY 2019: For total Medicaid enrollees under age 19, our projection for 2019 is to maintain overall insured enrollment. Explain how these objectives were set: Per the U.S. Census Bureau Current Population Survey (CPS) Table Creator for 2016, Hawaii uninsured children rate is approximately 1.2%. However, the age group is limited to children up to 17 years old. As a result, United Health Foundation's 2016 America's Health Rankings, Health of Women and Children Report is also sourced. As per the report, 98.8% of Hawaii's children under age 17 have health insurance coverage of any type.	Annual Performance Objective for FFY 2020: For total Medicaid enrollees under age 19, our projection for 2020 is to maintain overall insured enrollment. Explain how these objectives were set: Per the U.S. Census Bureau Current Population Survey (CPS) Table Creator for 2016, Hawaii uninsured children rate is approximately 1.2%. However, the age group is limited to children up to 17 years old. As a result, United Health Foundation's 2016 America's Health Rankings, Health of Women and Children Report is also sourced. As per the report, 98.8% of Hawaii's children under age 17 have health insurance coverage of any type.
Other Comments on Measure:	Other Comments on Measure: As the above space is limited, continued here: Locating these children remains a challenge; once located, convincing their parent(s)/guardian(s) to enroll them is another challenge. We will continue to work on both. That said, for FFY'17, we anticipate our Medicaid population to remain unchanged.	Other Comments on Measure: As the above space is limited, continued here: Locating these children remains a challenge; once located, convincing their parent(s)/guardian(s) to enroll them is another challenge. We will continue to work on both. That said, for FFY'18, we anticipate our Medicaid population to remain unchanged.

Explanation of Progress:	Explanation of Progress:	Explanation of Progress:
How did your performance in 2015 compare with the Annual Performance Objective documented in your 2014 Annual Report? Our goal to increase CHIP enrollment by 3% was not met.	How did your performance in 2016 compare with the Annual Performance Objective documented in your 2015 Annual Report? For FFY'16, CHIP enrollment of children under age 19 years decreased by approximately .73%. A variance of less than 1%, therefore, we believe that our goal to maintain insured enrollment of that population was met.	How did your performance in 2017 compare with the Annual Performance Objective documented in your 2016 Annual Report? For FFY'17, CHIP enrollment of children under age 19 years increased by approximately 7%. Our goal to maintain insured enrollment of the CHIP population was met.
What quality improvement activities that involve the CHIP program and benefit CHIP enrollees help enhance your ability to report on this measure, improve your results for this measure, or make progress toward your goal? Outreach efforts, conducted by the Hawaii Health Connector (Hawaii's Health Exchange), such as radio ads, television ads, posters, informational sessions, had a residual effect as those who were Medicaid eligible were enrolled in Medicaid. Rapid responses for displaced workers and community fairs have also had a residual effect in reaching potential Medicaid eligibles.	What quality improvement activities that involve the CHIP program and benefit CHIP enrollees help enhance your ability to report on this measure, improve your results for this measure, or make progress toward your goal? The Health Care Outreach Branch was established in our Division to help persons who need assistance with completing their applications. These applicants may have been admitted to, or released from, a facility, as well as those living in the community. This process has a residual effect as applicants with children and other family members are encouraged to also apply for their entire family. Rapid responses for displaced workers and community fairs have also had a residual effect in reaching potential Medicaid eligibles.	What quality improvement activities that involve the CHIP program and benefit CHIP enrollees help enhance your ability to report on this measure, improve your results for this measure, or make progress toward your goal? We continue the following quality improvement activities that involve the SCHIP and Medicaid (XIX) populations: 1) Continue & expand outreach activities for dental services, and other preventative services. 2) Pursuing value based payment structures to increase quality of services.

Annual Performance Objective for FFY 2016: For total CHIPenrollees under age 19, our projection for 2016 remains the same. Annual Performance Objective for FFY 2017: For total CHIP enrollees under age 19, our projection for 2017 remains the same.	Annual Performance Objective for FFY 2017: Relying on previous years' reports, we expect Hawaii's uninsured rate for children to continue to be near functional zero; therefore, our objective is to maintain overall insured enrollment. Annual Performance Objective for FFY 2018: For total CHIP enrollees under age 19, our projection for 2018 is to maintain overall insured enrollment.	Annual Performance Objective for FFY 2018: Relying on previous years' reports, we expect Hawaii's uninsured rate for children to continue to be near functional zero; therefore, our objective is to maintain overall insured enrollment. Annual Performance Objective for FFY 2019: For total CHIP enrollees under age 19, our projection for 2019 is to maintain overall insured enrollment.

FFY 2015	FFY 2016	FFY 2017
Annual Performance Objective for FFY 2018: 1For total CHIP enrollees under age 19, our projection for 2018 is an increase of 1%. Explain how these objectives were set: According to the U.S. Census Bureau Current Population Survey (CPS) Table Creator for 2014, Hawaii uninsured children rate remained stable at 3.1%, still, one of the lowest in the nation. Locating these children remains a challenge; once located, convincing their parent(s)/guardian(s) to enroll them is another challenge. We will continue to work on both. That said, for FFY'16, we anticipate our CHIP population to remain about the same until 2018 when we project that it may grow by 1%.	Annual Performance Objective for FFY 2019: For total CHIP enrollees under age 19, our projection for 2019 is to maintain overall insured enrollment. Explain how these objectives were set: Per the U.S. Census Bureau Current Population Survey (CPS) Table Creator for 2016, Hawaii uninsured children rate is approximately 1.2%. However, the age group is limited to children up to 17 years old. As a result, United Health Foundation's 2016 America's Health Rankings, Health of Women and Children Report is also sourced. As per the report, 98.8% of Hawaii's children under age 17 have health insurance coverage of any type.	Annual Performance Objective for FFY 2020: For total CHIP enrollees under age 19, our projection for 2020 is to maintain overall insured enrollment. Explain how these objectives were set: Per the U.S. Census Bureau Current Population Survey (CPS) Table Creator for 2016, Hawaii uninsured children rate is approximately 1.2%. However, the age group is limited to children up to 17 years old. As a result, United Health Foundation's 2016 America's Health Rankings, Health of Women and Children Report is also sourced. As per the report, 98.8% of Hawaii's children under age 17 have health insurance coverage of any type.

FFY 2015	FFY 2016	FFY 2017
Explanation of Progress:	Explanation of Progress:	Explanation of Progress:
How did your performance in 2015 compare with the Annual Performance Objective documented in your 2014 Annual Report? Our Medicaid enrollment increased by approximately 4.3% in 2015; slightly below our goal of 5%.	How did your performance in 2016 compare with the Annual Performance Objective documented in your 2015 Annual Report? Hawaii's fiscal situation has and continues to improve, thus, one would expect enrollment to decrease slightly. Although for FFY'16, Medicaid enrollment of children under age 19 years decreased by 3.21%, overall, Hawaii's uninsured rate for children is near functional zero.	How did your performance in 2017 compare with the Annual Performance Objective documented in your 2016 Annual Report? Hawaii's fiscal situation has and continues to improve, thus, one would expect enrollment to decrease slightly. Although for FFY'17, Medicaid enrollment of children under age 19 years increased by <1% Hawaii's uninsured rate for children is near functional zero.
What quality improvement activities that involve the CHIP program and benefit CHIP enrollees help enhance your ability to report on this measure, improve your results for this measure, or make progress toward your goal? Outreach efforts, conducted by the Hawaii Health Connector (Hawaii's Health Exchange), such as radio ads, television ads, posters, informational sessions, had a residual effect as those who were Medicaid eligible were enrolled in Medicaid. Rapid responses for displaced workers and community fairs have also had a residual effect in reaching potential Medicaid eligibles.	What quality improvement activities that involve the CHIP program and benefit CHIP enrollees help enhance your ability to report on this measure, improve your results for this measure, or make progress toward your goal? The Health Care Outreach Branch was established in our Division to help persons who need assistance with completing their applications. These applicants may have been admitted to, or released from, a facility, as well as those living in the community. This process has a residual effect as applicants with children and other family members are encouraged to also apply for their entire family.	What quality improvement activities that involve the CHIP program and benefit CHIP enrollees help enhance your ability to report on this measure, improve your results for this measure, or make progress toward your goal? The Health Care Outreach Branch assistspersons who need assistance with completing their applications. These applicants may have been admitted to, or released from, a facility, as well as those living in the community. This process has a residual effect as applicants with children and other family members are encouraged to also apply for their entire family.
	Rapid responses for displaced workers and community fairs have also had a residual effect in reaching potential Medicaid eligibles.	Rapid responses for displaced workers and community fairs have also had a residual effect in reaching potential Medicaid eligibles.

- 1. What other strategies does your state use to measure and report on access to, quality, or outcomes of care received by your CHIP population? What have you found? [7500]
- 2. What strategies does your CHIP program have for future measurement and reporting on access to, quality, or outcomes of care received by your CHIP population? When will data be available? [7500]
- 3. Have you conducted any focused quality studies on your CHIP population, e.g., adolescents, attention deficit disorder, substance abuse, special heath care needs or other emerging health care needs? What have you found? [7500]
- 4. Please attach any additional studies, analyses or other documents addressing outreach, enrollment, access, quality, utilization, costs, satisfaction, or other aspects of your CHIP program's performance. Please include any analyses or descriptions of any efforts designed to reduce the number of uncovered children in the state through a state health insurance connector program or support for innovative private health coverage initiatives. [7500]

Enter any Narrative text related to Section IIB below. [7500]

Section III: Assessment of State Plan and Program Operation

Please reference and summarize attachments that are relevant to specific questions

Please note that the numbers in brackets, e.g., [7500] are character limits in the State Annual Report Template System (CARTS). You will not be able to enter responses with characters greater than the limit indicated in the brackets.

Se

ect	ion IIIA: Outreach
1.	How have you redirected/changed your outreach strategies during the reporting period? [7500]
	No change.
2.	What methods have you found most effective in reaching low-income, uninsured children (e.g., T.V., school outreach, word-of-mouth)? How have you measured effectiveness? [7500]
	Data not available.
3.	Which of the methods described in Question 2 would you consider a best practice(s)? [7500]
	Data not available.
4.	Is your state targeting outreach to specific populations (e.g., minorities, immigrants, and children living in rural areas)?
	☐ Yes ⊠ No
	Have these efforts been successful, and how have you measured effectiveness? [7500]
5.	What percentage of children below 200 percent of the federal poverty level (FPL) who are eligible for Medicaid or CHIP have been enrolled in those programs? [5]
	(Identify the data source used). [7500]
	Data not available.

Enter any Narrative text related to Section IIIA below. [7500]

Section IIIB: Substitution of Coverage (Crowd-out)

All states should answer the following questions. Please include percent calculations in your responses

en applicable and requested.	
1. Does your program require a child to be uninsured for a minimum amount of time prior to enrollment (waiting period)?	
⊠ No □ Yes □ N/A	

If no, skip to question 5. If yes, answer questions 2-4:

	2. How many months does your program require a child to be uninsured prior to enrollment?
	3. To which groups (including FPL levels) does the period of uninsurance apply? [1000]
	4. List all exemptions to imposing the period of uninsurance [1000]
	5. Does your program match prospective enrollees to a database that details private insurance status? □ No □ Yes □ N/A
	6. If answered yes to question 5, what database? [1000]
	7. At the time of application, what percent of CHIP applicants are found to have Medicaid [(# applicants found to have Medicaid/total # applicants) * 100] [5] and what percent of applicants are found to have other group health insurance [(# applicants found to have other insurance/total # applicants) * 100] [5]? .05 Provide a combined percent if you cannot calculate separate percentages. [5]
	8. What percent of CHIP applicants cannot be enrolled because they have group health plan coverage? [5]
	a. Of those found to have had other, private insurance and have been uninsured for only a portion of the state's waiting period, what percent meet your state's exemptions to the waiting period (if your state has a waiting period and exemptions) [(# applicants who are exempt/total # or new applicants who were enrolled)*100]? [5]
	9. Do you track the number of individuals who have access to private insurance?
	☐ Yes ⊠ No
	10. If yes to question 9, what percent of individuals that enrolled in CHIP had access to private health insurance at the time of application during the last federal fiscal year [(# of individuals that had access to private health insurance/total # of individuals enrolled in CHIP)*100]? [5]
2. tim	ter any Narrative text related to Section IIIB below. [7500] Unable to provide a response at this time due to data limitations; Unable to provide a response at this lee to the percent of CHIP applicants found to have Medicaid due to data limitations. a. Not applicable.
Se	ection IIIC: Eligibility
	is subsection should be completed by all states. Medicaid Expansion states should complete applicable sponses and indicate those questions that are non-applicable with N/A.
	Section IIIC: Subpart A: Eligibility Renewal and Retention
	 Do you have authority in your CHIP state plan to provide for presumptive eligibility, and have you implemented this? ☐ Yes ☒ No If yes,
	 a. What percent of children are presumptively enrolled in CHIP pending a full eligibility determination? [5]

2. Select the measures from those below that your state employs to simplify an eligibility renewal and retain eligible children in CHIP.
Conducts follow-up with clients through caseworkers/outreach workers
Sends renewal reminder notices to all families
How many notices are sent to the family prior to disenrolling the child from the program? [500]
At what intervals are reminder notices sent to families (e.g., how many weeks before the end of the current eligibility period is a follow-up letter sent if the renewal has not been received by the state?) [500]
Other, please explain: [500]

b. Of those children who are presumptively enrolled, what percent of those children are determined eligible and enrolled upon completion of the full eligibility determination? [5]

Section IIIC: Subpart B: Eligibility Data

methodology. [7500]

Table 1. Data on Denials of Title XXI Coverage in FFY 2017

3. Which of the above strategies appear to be the most effective? Have you evaluated the

effectiveness of any strategies? If so, please describe the evaluation, including data sources and

States are required to report on all questions (1, 1.a., 1.b., and 1.c) in FFY 2017. Please enter the data requested in the table below and the template will tabulate the requested percentages.

Measure	Number	Percent
Total number of denials of title XXI coverage	234	100
a. Total number of procedural denials	217	92.7
b. Total number of eligibility denials	11	4.7
i. Total number of applicants denied for title		
XXI and enrolled in title XIX		
☐ (Check here if there are no additional categories)	6	2.6
c. Total number of applicants denied for other		
reasons Please indicate:		

2. Please describe any limitations or restrictions on the data used in this table:

Definitions:

- The "the total number of denials of title XXI coverage" is defined as the total number of applicants that have had an eligibility decision made for title XXI and denied enrollment for title XXI in FFY 2017. This definition only includes denials for title XXI at the time of initial application (not redetermination).
 - The "total number of procedural denials" is defined as the total number of applicants denied for title XXI procedural reasons in FFY 2017 (i.e., incomplete application, missing documentation, missing enrollment fee, etc.).
 - b. The "total number of eligibility denials" is defined as the total number of applicants denied for title XXI eligibility reasons in FFY 2017 (i.e., income too high, income too low for title XXI /referred for Medicaid eligibility determination/determined Medicaid eligible, obtained private coverage or if applicable, had access to private coverage during your state's specified waiting period, etc.)
 - i. The total number of applicants that are denied eligibility for title XXI and determined eligible for title XIX.
 - c. The "total number of applicants denied for other reasons" is defined as any other type of denial that does not fall into 2a or 2b. Please check the box provided if there are no additional categories.

Table 2. Redetermination Status of Children

For tables 2a and 2b, reporting is required for FFY 2017.

Table 2a. Redetermination Status of Children Enrolled in Title XXI.

Please enter the data requested in the table below in the "Number" column, and the template will automatically tabulate the percentages.

Description	Number		Per	rcent	
Total number of children who are enrolled in title XXI and eligible to be redetermined	26727	100%			
Total number of children screened for redetermination for title XXI	26727	100	100%		
Total number of children retained in title XXI after the redetermination process	21950	82.13	82.13		
4. Total number of children disenrolled from title XXI after the redetermination process	4777	17.87	17.87	100%	
 Total number of children disenrolled from title XXI for failure to comply with procedures 	1724			36.09	
 Total number of children disenrolled from title XXI for failure to meet eligibility criteria 	1886			39.48	100%
 i. Disenrolled from title XXI because income too high for title XXI (If unable to provide the data, check here □) 	999				52.97
 ii. Disenrolled from title XXI because income too low for title XXI (If unable to provide the data, check here □) 					
 iii. Disenrolled from title XXI because application indicated access to private coverage or obtained private coverage (If unable to provide the data or if you have a title XXI Medicaid Expansion and this data is not relevant check here □) 	668				35.42
iv. Disenrolled from title XXI for other eligibility reason(s) Please indicate: (If unable to provide the data check here □)	219				11.61
 c. Total number of children disenrolled from title XXI for other reason(s) Please indicate: (Check here if there are no additional categories □) 	1167			24.43	

5.	If relevant, please describe any limitations or restrictions on the data entered into this table.	Please describe any state policies or procedures that
	may have impacted the redetermination outcomes data [7500].	

Definitions:

1. The "total number of children who are eligible to be redetermined" is defined as the total number of children due to renew their eligibility in federal fiscal year (FFY) 2017, and did not age out (did not exceed the program's maximum age requirement) of the program by or before redetermination. This total number may include those children who are eligible to renew prior to their 12 month eligibility redetermination anniversary date. This total must include ex parte redeterminations, the process when a state uses information available to it through other databases, such as wage and labor records, to verify ongoing eligibility. This total number must also include children whose

- eligibility can be renewed through administrative redeterminations, whereby the state sends the family a renewal form that is pre-populated with eligibility information already available through program records and requires the family to report any changes.
- 2. The "total number of children screened for redetermination" is defined as the total number of children that were screened by the state for redetermination in FFY 2017 (i.e., ex parte redeterminations and administrative redeterminations, as well as those children whose families have returned redetermination forms to the state).
- 3. The "total number of children retained after the redetermination process" is defined as the total number of children who were found eligible and remained in the program after the redetermination process in FFY 2017.
- 4. The "total number of children disenrolled from title XXI after the redetermination process" is defined as the total number of children who are disenrolled from title XXI following the redetermination process in FFY 2017. This includes those children that states may define as "transferred" to Medicaid for title XIX eligibility screening.
 - a. The "total number of children disenrolled for failure to comply with procedures" is defined as the total number of children disenrolled from title XXI for failure to successfully complete the redetermination process in FFY 2017 (i.e., families that failed to submit a complete application, failed to provide complete documentation, failed to pay premium or enrollment fee, etc.).
 - b. The "total number of children disenrolled for failure to meet eligibility criteria" is defined as the total number of children disenrolled from title XXI for no longer meeting one or more of their state's CHIP eligibility criteria (i.e., income too low, income too high, obtained private coverage or if applicable, had access to private coverage during your state's specified waiting period, etc.). If possible, please break out the reasons for failure to meet eligibility criteria in i.-iv.
 - c. The "total number of children disenrolled for other reason(s)" is defined as the total number of children disenrolled from title XXI for a reason other than failure to comply with procedures or failure to meet eligibility criteria, and are not already captured in 4.a. or 4.b.

 The data entered in 4.a., 4.b., and 4.c. should sum to the total number of children disenrolled from title XXI (line 4).

Table 2b. Redetermination Status of Children Enrolled in Title XIX.

Please enter the data requested in the table below in the "Number" column, and the template will automatically tabulate the percentages.

De	scription	Number]	Percent	
1.	Total number of children who are enrolled in title XIX and eligible to be redetermined	111449	100%			
2.	Total number of children screened for redetermination for title XIX	111449	100	100%		
3.	Total number of children retained in title XIX after the redetermination process	97549	87.53	87.53		
4.	Total number of children disenrolled from title XIX after the redetermination process	13900	12.47	12.47	100%	
	 Total number of children disenrolled from title XIX for failure to comply with procedures 	10524			75.71	
	 Total number of children disenrolled from title XIX for failure to meet eligibility criteria 	1056			7.6	100%
	v. Disenrolled from title XIX because income too high for title XIX (If unable to provide the data, check here □)	272				25.76
	vi. Disenrolled from title XIX for other eligibility reason(s) Please indicate: (If unable to provide the data check here □)	784				74.24
	 Total number of children disenrolled from title XIX for other reason(s) Please indicate: (Check here if there are no additional categories □) 	2320			16.69	

5. If relevant, please describe any limitations or restrictions on the data entered into this table. Please describe any state policies or procedures that may have impacted the redetermination outcomes data [7500].

Definitions:

- 1. The "total number of children who are eligible to be redetermined" is defined as the total number of children due to renew their eligibility in federal fiscal year (FFY) 2017, and did not age out (did not exceed the program's maximum age requirement) of the program by or before redetermination. This total number may include those children who are eligible to renew prior to their 12 month eligibility redetermination anniversary date. This total must include ex parte redeterminations, the process when a state uses information available to it through other databases, such as wage and labor records, to verify ongoing eligibility. This total number must also include children whose eligibility can be renewed through administrative redeterminations, whereby the state sends the family a renewal form that is pre-populated with eligibility information already available through program records and requires the family to report any changes.
- 2. The "total number of children screened for redetermination" is defined as the total number of children that were screened by the state for redetermination in FFY 2017 (i.e., ex parte redeterminations and administrative redeterminations, as well as those children whose families have returned redetermination forms to the state).
- 3. The "total number of children retained after the redetermination process" is defined as the total number of children who were found eligible and remained in the program after the redetermination process in FFY 2017.
- 4. The "total number of children disenrolled from title XIX after the redetermination process" is defined as the total number of children who are disenrolled from <u>title XIX</u> following the redetermination process in FFY 2017. This includes those children that states may define as "transferred" to CHIP for title XXI eligibility screening.
 - a. The "total number of children disenrolled for failure to comply with procedures" is defined as the total number of children disenrolled from title XIX for failure to successfully complete the redetermination process in FFY 2017 (i.e., families that failed to submit a complete application, failed to provide complete documentation, failed to pay premium or enrollment fee, etc.).
 - b. The "total number of children disenrolled for failure to meet eligibility criteria" is defined as the total number of children disenrolled from title XIX for no longer meeting one or more of their state's Medicaid eligibility criteria (i.e., income too high, etc.).
 - c. The "total number of children disenrolled for other reason(s)" is defined as the total number of children disenrolled from title XIX for a reason other than failure to comply with procedures or failure to meet eligibility criteria, and are not already captured in 4.a. or 4.b.
 - The data entered in 4.a., 4.b., and 4.c. should sum to the total number of children disenrolled from title XIX (line 4).

Table 3. Duration Measure of Selected Children, Ages 0-16, Enrolled in Title XIX and Title XXI, Second Quarter FFY 2017

The purpose of tables 3a and 3b is to measure the duration, or continuity, of Medicaid and CHIP enrollees' coverage. This information is required by Section 402(a) of CHIPRA. **Reporting on this table is required.**

Because the measure is designed to capture continuity of coverage in title XIX and title XXI beyond one year of enrollment, the measure collects data for 18 months of enrollment. This means that reporting spans two CARTS reports over two years. The duration measure uses a cohort of children and follows the enrollment of the same cohort of children for 18 months to measure continuity of coverage. States identify a new cohort of children every two years. States identified newly enrolled children in the second quarter of FFY 2016 (January, February, and March of 2016) for the FFY 2016 CARTS report. This same cohort of children will be reported on in the FFY 2017 CARTS report. If your eligibility system already has the capability to track a cohort of enrollees over time, an additional "flag" or unique identifier may not be necessary.

The FFY 2017 CARTS report is the second year of reporting in the cycle of two CARTS reports on the cohort of children identified in the second quarter of FFY 2016. The next cohort of children will be identified in the second quarter of the FFY 2018 (January, February and March of 2018).

Instructions: For this measure, please identify <u>newly enrolled</u> children in both title XIX and title XXI in the second quarter of FFY 2016, ages 0 months to 16 years at time of enrollment. Children enrolled in January 2016 must have birthdates after July 1999 (e.g., children must be younger than 16 years and 5 months) to ensure that they will not age out of the program at the 18th month of coverage. Similarly, children enrolled in February 2016 must have birthdates after August 1999, and children enrolled in March 2016 must have birthdates after September 1999. Each child newly enrolled during this time frame needs a unique identifier or "flag" so that the cohort can be tracked over time. If your eligibility system already has the capability to track a cohort of enrollees over time, an additional "flag" or unique identifier may not be necessary. Please follow the child based on the child's age category at the time of enrollment (e.g., the child's age at enrollment creates an age cohort that does not change over the 18 month time span).

Please enter the data requested in the tables below, and the template will tabulate the percentages. The tables are pre-populated with the 6-month data you reported last year; in this report you will only enter data on the 12- and 18-month enrollment status. Only enter a "0" (zero) if the data are known to be zero. If data are unknown or unavailable, leave the field blank.

Note that all data must sum correctly in order to save and move to the next page. The data in each individual row must add across to sum to the total in the "All Children Ages 0-16" column for that row. And in each column, the data within each time period (6, 12 and 18 months) must each sum up to the data in row 1, which is the number of children in the cohort. This means that in each column, rows 2, 3 and 4 must sum to the total in row 1; rows 5, 6 and 7 must sum to the row 1; and rows 8, 9 and 10 must sum to row 1. Rows numbered with an "a" (e.g., rows 3a and 4a) are excluded from the total because they are subsets of their respective rows.

Table 3a. Duration Measure of Children Enrolled in Title XIX

□ Not Previously Enrolled in CHIP or Medicaid—"Newly enrolled" is defined as not enrolled in either title XXI or title XIX in the month before enrollmen (i.e., for a child enrolled in January 2016, he/she would not be enrolled in either title XXI or title XIX in December 2015, etc.)
Not Previously Enrolled in Medicaid—"Newly enrolled" is defined as not enrolled in title XIX in the month before enrollment (i.e., for a child enrolled in January 2016, he/she would not be enrolled in title XIX in December 2015, etc.)

Definitions:

- 1. The "total number of children newly enrolled in title XIX in the second quarter of FFY 2016" is defined as those children either new to public coverage or new to title XIX, in the month before enrollment. Please define your population of "newly enrolled" in the Instructions section.
- 2. The total number of children that were continuously enrolled in title XIX for 6 months is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and who were continuously enrolled through the end of June 2016
 - + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and who were continuously enrolled through the end of July 2016
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and who were continuously enrolled through the end of August 2016
- 3. The total number who had a break in title XIX coverage during <u>6 months</u> of enrollment (regardless of the number of breaks in coverage) but were re-enrolled in title XIX by the end of the 6 months, is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and who disenrolled and re-enrolled in title XIX by the end of June 2016
 - + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and who disenrolled and re-enrolled in title XIX by the end of July 2016
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and who disenrolled and re-enrolled in title XIX by the end of August 2016
 - 3.a. From the population in #3, provide the total number of children who were enrolled in title XXI during their break in coverage
- 4. The total number who disenrolled from title XIX, 6 months after their enrollment month is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and were disenrolled by the end of June 2016
 - + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and were disenrolled by the end of July 2016
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and were disenrolled by the end of August 2016
 - 4.a. From the population in #4, provide the total number of children who were enrolled in title XXI in the month after their disenrollment from title XIX.
- 5. The total number of children who were continuously enrolled in title XIX for 12 months is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and were continuously enrolled through the end of December 2016
 - + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and were continuously enrolled through the end of January 2017
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and were continuously enrolled through the end of February 2017
- 6. The total number of children who had a break in title XIX coverage during 12 months of enrollment (regardless of the number of breaks in coverage), but were reenrolled in title XIX by the end of the 12 months, is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and who disenrolled and then re-enrolled in title XIX by the end of December 2016

- + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and who disenrolled and then re-enrolled in title XIX by the end of January 2017
- + the number of children with birthdates after September 1999 who were newly enrolled in March 2016 and who disenrolled and then re-enrolled in title XIX by the end of February 2017
- 6.a. From the population in #6, provide the total number of children who were enrolled in title XXI during their break in coverage.
- 7. The total number of children who disenrolled from title XIX 12 months after their enrollment month is defined as the sum of:
 - the number of children with birthdates after July 1999, who were enrolled in January 2016 and were disenrolled by the end of December 2016
 - + the number of children with birthdates after August 1999, who were enrolled in February 2016 and were disenrolled by the end of January 2017
 - + the number of children with birthdates after September 1999, who were enrolled in March 2016 and were disenrolled by the end of February 2017
 - 7.a. From the population in #7, provide the total number of children, who were enrolled in title XXI in the month after their disenrollment from title XIX.
- 8. The total number of children who were continuously enrolled in title XIX for 18 months is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and were continuously enrolled through the end of June 2017 + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and were continuously enrolled through the end of July 2017
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and were continuously enrolled through the end of August 2017
- 9. The total number of children who had a break in title XIX coverage during 18 months of enrollment (regardless of the number of breaks in coverage), but were reenrolled in title XIX by the end of the 18 months, is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and who disenrolled and re-enrolled in title XIX by the end of June 2017
 - + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and who disenrolled and re-enrolled in title XIX by the end of July 2017
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and who disenrolled and re-enrolled in title XIX by the end of August 2017
 - 9.a. From the population in #9, provide the total number of children who were enrolled in title XXI during their break in coverage.
- 10. The total number of children who were disenrolled from title XIX 18 months after their enrollment month is defined as the sum of:

the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and disenrolled by the end of June 2017

- + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and disenrolled by the end of July 2017
- + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and disenrolled by the end of August 2017
- 10.a. From the population in #10, provide the total number of children who were enrolled in title XXI (CHIP) in the month after their disenrollment from XIX.

Table 3b. Duration Measure of Children Enrolled in Title XXI

Specify how your "newly enrolled" population is defined:

□ Not Previously Enrolled in CHIP or Medicaid—"Newly enrolled" is defined as not enrolled in either title XXI or title XIX in the mor	nth before enrollment
(i.e., for a child enrolled in January 2016, he/she would not be enrolled in either title XXI or title XIX in December 2015, etc.)	

Not Previously Enrolled in CHIP—"Newly enrolled" is defined as not enrolled in title XXI in the month before enrollment (i.e., for a child enrolled in January 2016, he/she would not be enrolled in title XXI in December 2015, etc.)

Definitions:

- 1. The "total number of children newly enrolled in title XXI in the second quarter of FFY 2016" is defined as those children either new to public coverage or new to title XXI, in the month before enrollment. Please define your population of "newly enrolled" in the Instructions section.
- 2. The total number of children that were continuously enrolled in title XXI for 6 months is defined as the sum of:

the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and who were continuously enrolled through the end of June 2016

- + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and who were continuously enrolled through the end of July 2016
- + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and who were continuously enrolled through the end of August 2016
- 3. The total number who had a break in title XXI coverage during <u>6 months</u> of enrollment (regardless of the number of breaks in coverage) but were re-enrolled in title XXI by the end of the 6 months, is defined as the sum of:

the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and who disenrolled and re-enrolled in title XXI by the end of June 2016

- + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and who disenrolled and re-enrolled in title XXI by the end of July 2016
- + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and who disenrolled and re-enrolled in title XXI by the end of August 2016
- 3.a. From the population in #3, provide the total number of children who were enrolled in title XIX during their break in coverage.
- 4. The total number who disenrolled from title XXI, 6 months after their enrollment month is defined as the sum of:

the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and were disenrolled by the end of June 2016

- + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and were disenrolled by the end of July 2016
- + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and were disenrolled by the end of August 2016
- 4.a. From the population in #4, provide the total number of children who were enrolled in title XIX in the month after their disenrollment from title XXI.
- 5. The total number of children who were continuously enrolled in title XXI for 12 months is defined as the sum of:

the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and were continuously enrolled through the end of December 2016

- + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and were continuously enrolled through the end of January 2017
- + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and were continuously enrolled through the end of February 2017
- 6. The total number of children who had a break in title XXI coverage during 12 months of enrollment (regardless of the number of breaks in coverage), but were reenrolled in title XXI by the end of the 12 months, is defined as the sum of:

the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and who disenrolled and then re-enrolled in title XXI by the end of December 2016

- + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and who disenrolled and then re-enrolled in title XXI by the end of January 2017
- + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and who disenrolled and then re-enrolled in title XXI by the end of February 2017
- 6.a. From the population in #6, provide the total number of children who were enrolled in title XIX during their break in coverage.
- 7. The total number of children who disenrolled from title XXI 12 months after their enrollment month is defined as the sum of:

the number of children with birthdates after July 1999, who were enrolled in January 2016 and were disenrolled by the end of December 2016

- + the number of children with birthdates after August 1999, who were enrolled in February 2016 and were disenrolled by the end of January 2017
- + the number of children with birthdates after September 1999, who were enrolled in March 2016 and were disenrolled by the end of February 2017
- 7.a. From the population in #7, provide the total number of children, who were enrolled in title XIX in the month after their disenrollment from title XXI.
- 8. The total number of children who were continuously enrolled in title XXI for 18 months is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and were continuously enrolled through the end of June 2017
 - + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and were continuously enrolled through the end of July 2017
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and were continuously enrolled through the end of August 2017
- 9. The total number of children who had a break in title XXI coverage during 18 months of enrollment (regardless of the number of breaks in coverage), but were reenrolled in title XXI by the end of the 18 months, is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and who disenrolled and re-enrolled in title XXI by the end of June 2017
 - + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and who disenrolled and re-enrolled in title XXI by the end of July 2017
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and who disenrolled and re-enrolled in title XXI by the end of August 2017
 - 9.a. From the population in #9, provide the total number of children who were enrolled in title XIX during their break in coverage.
- 10. The total number of children who were disenrolled from title XXI 18 months after their enrollment month is defined as the sum of:
 - the number of children with birthdates after July 1999, who were newly enrolled in January 2016 and disenrolled by the end of June 2017
 - + the number of children with birthdates after August 1999, who were newly enrolled in February 2016 and disenrolled by the end of July 2017
 - + the number of children with birthdates after September 1999, who were newly enrolled in March 2016 and disenrolled by the end of August 2017
 - 10.a. From the population in #10, provide the total number of children who were enrolled in title XIX (Medicaid) in the month after their disenrollment from XXI.

Enter any Narrative text related to Section IIIF below. [7500]

Section IIIG: Dental Benefits:

Please ONLY report data in this section for children in Separate CHIP programs and the Separate CHIP part of Combination programs. Reporting is required for all states with Separate CHIP programs and Combination programs. If your state has a Combination program or a Separate CHIP program but you are not reporting data in this section on children in the Separate CHIP part of your program, please explain why. Explain: [7500]

1. Information on Dental Care for Children in Separate CHIP Programs (including children in the Separate CHIP part of Combination programs). Include all delivery system types, e.g. MCO, PCCM, FFS.

Data for this table are based on the definitions provided on the Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) Report (Form CMS-416)

a. Annual Dental Participation Table for Children Enrolled in Separate CHIP programs and the Separate CHIP part of Combination programs (for Separate CHIP programs, please include ONLY children receiving full CHIP benefits and supplemental benefits).

FFY 2017	Total (All age groups)	<1 year	1 – 2 years	3 – 5 years	6 – 9 years	10–14 years	15–18 years
Total Individuals Enrolled for at Least 90 Continuous Days ¹	0						
Total Enrollees Receiving Any Dental Services ² [7]	0						
Total Enrollees Receiving Preventive Dental Services ³ [7]	0						
Total Enrollees Receiving Dental Treatment Services ⁴ [7]	0						

¹ Total Individuals Enrolled for at Least 90 Continuous Days – Enter the total unduplicated number of children who have been continuously enrolled in a separate CHIP program or the separate CHIP part of a combination program for at least 90 continuous days in the federal fiscal year, distributed by age. For example, if a child was enrolled January 1st to March 31st, this child is considered continuously enrolled for at least 90 continuous days in the federal fiscal year. If a child was enrolled from August 1st to September 30th and from October 1st to November 30th, the child would not be considered to have been enrolled for 90 continuous days in the federal fiscal

year. Children should be counted in age groupings based on their age at the end of the fiscal year. For example, if a child turned 3 on September 15th, the child should be counted in the 3-6 age grouping.

²Total Enrollees Receiving Any Dental Services - Enter the unduplicated number of children enrolled in a separate CHIP program or the separate CHIP part of a combination program for at least 90 continuous days who received at least one dental service by or under the supervision of a dentist as defined by HCPCS codes D0100 - D9999 (or equivalent CDT codes D0100 - D9999 or equivalent CPT codes) based on an unduplicated paid, unpaid, or denied claim.

³Total Enrollees Receiving Preventive Dental Services - Enter the unduplicated number of children enrolled in a separate CHIP program or the separate CHIP part of a combination program for at least 90 continuous days who received at least one preventive dental service by or under the supervision of a dentist as defined by HCPCS codes D1000 - D1999 (or equivalent CDT codes D1000 - D1999 or equivalent CPT codes, that is, only those CPT codes that are for preventive dental services and only if provided by or under the supervision of a dentist), based on an unduplicated paid, unpaid, or denied claim.

⁴Total Enrolllees Receiving Dental Treatment Services - Enter the unduplicated number of children enrolled in a separate CHIP program or the separate CHIP part of a combination program for at least 90 continuous days who received at least one treatment service by or under the supervision of a dentist, as defined by HCPCS codes D2000 - D9999 (or equivalent CDT codes D2000 - D9999 or equivalent CPT codes, that is, only those CPT codes that involve periodontics, maxillofacial prosthetics, implants, oral and maxillofacial surgery, orthodontics, adjunctive general services, and only if provided by or under the supervision of a dentist), based on an unduplicated paid, unpaid, or denied claim.

Report all dental services data in the age category reflecting the child's age at the end of the federal fiscal year even if the child received services while in two age categories. For example, if a child turned 10 on September 1st, but had a cleaning in April and a cavity filled in September, both the cleaning and the filling would be counted in the 10-14 age category.

b. For the age grouping that includes children 8 years of age, what is the number of such children who have received a sealant on at least one permanent molar tooth⁵? [7]

⁵Receiving a Sealant on a Permanent Molar Tooth -- Enter the unduplicated number of children enrolled in a separate CHIP program or the separate CHIP part of a combination program for 90 continuous days and in the age category of 6-9 who received a sealant on a permanent molar tooth, as defined by HCPCS code D1351 (or equivalent CDT code D1351), based on an unduplicated paid, unpaid, or denied claim. For this line, include sealants placed by any dental professional for whom placing a sealant is within his or her scope of practice. Permanent molars are teeth numbered 2, 3, 14, 15, 18, 19, 30, 31, and additionally, for those states that cover sealants on third molars, also known as wisdom teeth, the teeth numbered 1, 16, 17, 32.

Report all sealant data in the age category reflecting the child's age at the end of the federal fiscal year even if the child was factually a different age on the date of service. For example, if a child turned 6 on September 1st, but had a sealant applied in July, the sealant would be counted in the age 6-9 category.

2.	Does the state provide supplemental dental coverage?	□ No
	If yes, how many children are enrolled? [7]	
	What percent of the total number of enrolled children have suppler	nental dental coverage?

Section IIIH: CHIPRA CAHPS Requirement:

CHIPRA section 402(a)(2), which amends reporting requirements in section 2108 of the Social Security Act, requires Title XXI Programs (i.e., CHIP Medicaid Expansion programs, Separate Child Health Programs, or a combination of the two) to report CAHPS results to CMS starting December 2013. While Title XXI Programs may select any CAHPS survey to fulfill this requirement, CMS encourages these programs to align with the CAHPS measure in the Children's Core Set of Health Care Quality Measures for Medicaid and CHIP (Child Core Set). Starting in 2013, Title XXI Programs should submit summary level information from the CAHPS survey to CMS via the CARTS attachment facility. We also encourage states to submit raw data to the Agency for Healthcare Research and Quality's CAHPS Database. More information is available in the Technical Assistance fact sheet, Collecting and Reporting the CAHPS Survey as Required Under the CHIPRA: https://www.medicaid.gov/medicaid/quality-of-care/downloads/cahpsfactsheet.pdf

If a state would like to provide CAHPS data on both Medicaid and CHIP enrollees, the agency must sample Title XIX (Medicaid) and Title XXI (CHIP) programs separately and submit separate results to CMS to fulfill the CHIPRA Requirement.

Did you Collect this Survey in Order to Meet the CHIPRA CAHPS Requirement? ⊠ Yes ☐ No
If Yes, How Did you Report this Survey (select all that apply): Submitted raw data to AHRQ (CAHPS Database) Submitted a summary report to CMS using the CARTS attachment facility (NOTE: do not submit raw CAHPS data to CMS) Other. Explain:
If No, Explain Why: Select all that apply (Must select at least one):
□ Service not covered □ Population not covered □ Entire population not covered □ Explain the partial population not covered: □ Data not available Explain why data not available □ Budget constraints □ Data inconsistencies/accuracy Please explain: □ Data source not easily accessible Select all that apply: □ Requires medical record review □ Requires data linkage which does not currently exist □ Other: □ Information not collected. Select all that apply: □ Not collected by provider (hospital/health plan) □ Other:
Small sample size (less than 30)

Enter specific sample size: Other. Explain: Definition of Population Included in the Survey Sample:								
refinition of population included in the survey sample: ☐ Denominator includes CHIP (Title XXI) population only. ☐ Survey sample includes CHIP Medicaid Expansion population. ☐ Survey sample includes Separate CHIP population. ☐ Survey sample includes Combination CHIP population.

In the third column, provide estimates of the number of children served by each HSI program. In the fourth column, provide the percentage of the population served by the HSI who are children below your state's CHIP FPL eligibility threshold.								
HSI Program Population Served by Number of Children Percent of Low HSI Program Served by HSI income Childre								

	Program	Served by HSI Program ¹

3) Please define a metric for each of your state's HSI programs that is used to measure the program's impact on improving the health of low-income children. In the table below, please list the HSI program title in the first column, and include a metric used to measure that program's impact in the second column. In the third column, please provide the outcomes for metrics reported in the second column. Reporting on outcomes will be optional for the FFY 2017 report as states work to develop metrics and collect outcome data. States that are already reporting to CMS on such measures related to their HSI program(s) do not need to replicate that reporting here and may skip to Section IV.

HSI Program	Metric	Outcome

Enter any Narrative	text related to Section	III I below.	[7500]
---------------------	-------------------------	--------------	--------

¹ The percent of children served by the HSI program who are below the CHIP FPL threshold in your state should be reported in this column.

Section IV. Program financing for State Plan

1. Please complete the following table to provide budget information. Describe in narrative any details of your planned use of funds below, including the assumptions on which this budget was based (per member/per month rate, estimated enrollment and source of non-federal funds). (Note: This reporting period equals federal fiscal year 2017. If you have a combination program you need only submit one budget; programs do not need to be reported separately.)

COST OF APPROVED CHIP PLAN

Benefit Costs	2017	2018	2019
Insurance payments			
Managed Care	59424296	62000000	63860000
Fee for Service	7433730	7500000	7500000
Total Benefit Costs	66858026	69500000	71360000
(Offsetting beneficiary cost sharing payments)	-2176633	-2200000	-2200000
Net Benefit Costs	\$ 64681393	\$ 67300000	\$ 69160000

Administration Costs	2017	2018	2019
Personnel	1355733	1400000	1400000
General Administration	1175524	1200000	1200000
Contractors/Brokers (e.g., enrollment contractors)			
Claims Processing			
Outreach/Marketing costs			
Other (e.g., indirect costs)			
Health Services Initiatives			
Total Administration Costs	2531257	2600000	2600000
10% Administrative Cap (net benefit costs ÷ 9)	7186821	7477778	7684444

	2017	2018	2019
Federal Title XXI Share	61465968	63853650	65552760
State Share	5746682	6046350	6207240
TOTAL COSTS OF APPROVED CHIP PLAN	67212650	69900000	71760000

2. What were the sources of non-federal funding used for state match during the reporting per		
		

Employer contributions
 Foundation grants
 Private donations
 Tobacco settlement
 Other (specify) [500]

- 3. Did you experience a short fall in CHIP funds this year? If so, what is your analysis for why there were not enough federal CHIP funds for your program? [1500]
- 4. In the tables below, enter 1) number of eligibles used to determine per member per month costs for the current year and estimates for the next two years; and, 2) per member per month (PMPM) cost rounded to a whole number. If you have CHIP enrollees in a fee for service program, per member per month cost will be the average cost per month to provide services to these enrollees.

A. Managed Care

Year	Number of Eligibles	PMPM (\$)
2017	330047	\$180
2018	330000	\$189
2019	330000	\$194

A. Fee For Service

Year	Number of Eligibles	PMPM (\$)
2017		\$87
2018		\$88
2019		\$88

Enter any Narrative text related to Section IV below. [7500]

- Cost sharing payment shown above are drug rebates received for CHIP
- #4 # of Eligibles MC reflect total annual member months
- #4 # of Eligibles FFS reflect total expenditures/recipients served/12

Section V: Program Challenges and Accomplishments

1. For the reporting period, please provide an overview of your state's political and fiscal environment as it relates to health care for low income, uninsured children and families, and how this environment impacted CHIP. [7500]

The State of Hawaii's political and fiscal environment continues to strengthen and continues to gain economic momentum. The Hawaii Department of Labor & Industrial Relations announced that the seasonally adjusted unemployment rate for September 2017 was 2.5%.

Nationally, the seasonally adjusted unemployment rate was 4.2% in September 2017, as compared to 5% in September 2016.

Still, as Hawaii's cost-of-living is the highest in the nation,* many are compelled to work multiple jobs to meet their monthly financial obligations, including their health care costs.

*(Per various sources, such as: 1) CNBC news, Hawaii again won the dubious honor of ranking #1 as "America's 10 most expensive states to live in 2017" (https://www.cnbc.com/2017/07/11/americas-10-most-expensive-states-to-live-in-2017.html); 2) MoneyRates.com, "Best Places to Make a Living: MoneyRates.com Ranks the Top States" (https://www.money-rates.com/research-center/best-states-to-make-a-living/); and 3) Forbes magazine, "The Best And Worst States To Make A Living In 2017" (https://www.forbes.com/sites/jeffkauflin/2017/06/23/the-best-and-worst-states-for-making-a-living-in-2017/#23125501a492), to name a few.)

In spite of living in the highest-cost-of-living-state,

Hawaii residents are fortunate as Hawaii is the only state in the nation that has a waiver from the Federal Employee Retirement Income Security Act of 1974 (ERISA). The Hawaii Prepaid Health Care Act (HPHCA) requires Hawaii employers to provide health care coverage for eligible employees who work at least 20 hours per week after four consecutive weeks of employment. These provisions have not changed for over 30 years.

Hawaii continues to remain committed and strives to provide residents access to health insurance coverage and quality healthcare, especially for Hawaii's keiki (children), as well other eligible residents. The following reports supports our claim that we are committed.

• Per the U.S. Census Bureau Current Population Survey (CPS) Table Creator for 2017, Hawaii's uninsured children rate is approximately 2.43% (https://www.census.gov/cps/data/cpstablecreator.html). Criteria requested: CPS Data Collected in Year (2017); Persons (all); Data are for the Subset – State (Hawaii); Age (0 to19); and health insurance (insured/uninsured).

Per Governing Magazine of September 13, 2017, "States With the Highest and Lowest Uninsured Rates," data released in September 2017 from the U.S. Census Bureau for 2016, Hawaii has the third-lowest uninsured rate for the second year in a row (http://www.governing.com/topics/health-human-services/gov-uninsured-rate-census-2016-states.html). Hawaii's rate of uninsured is estimated at 3.5%.

(The Department of Business, Economic Development & Tourism's, Latest Population Estimate Data for 2016 is 1,428,557; 1,428,557 (Total Resident Population) less 1,120,541 (Resident

Population Age 18 Years and Older) = 308,016 (children under age 18. Thus, 2.43% from above applied, there were approximately 7485 uninsured children.)

During the reporting period, what has been the greatest challenge your program has experienced?[7500]

The greatest challenge within this reporting period was, and continues to be, the State's competing priorities (such as education, rail, addressing homelessnees), while continuing to maintain affordable high quality healthcare services to our Medicaid beneficiaries. The Medical Assistance program will stay focus and continue our efforts to seek-out and enroll eligible residents.

Challenges:

- . Locating these individuals remains a challenge; once located, convincing them to accept government help is another challenge as a few continue to resist government intervention. We will continue to work on both.
- . As this report is being drafted, September 30, 2017 has passed and yet, CHIP has not been reauthorized. We are patiently and anxiously waiting for the reauthorization of CHIP.
- During the reporting period, what accomplishments have been achieved in your program? [7500]
 Maintaining enrollment of Medicaid and CHIP eligible children.
- 4. What changes have you made or are planning to make in your CHIP program during the next fiscal year? Please comment on why the changes are planned. **[7500]**

Currently, no changes are planned for; Hawaii will continue to provide seamless high quality healthcare services at no cost for eligible children under age nineteen years with income not exceeding 308% of the FPL.
