- (4) The following components of Medicaid eligibility are determined under the Express Lane option. Also, specify any differences in budget unit, deeming, income exclusions, income disregards, or other methodology between Medicaid eligibility determinations for such children and the determination under the Express Lane option.

The Department will use the following findings under the express lane option: income, identity, age and residency.

WIC is limited to children under age 5 with a nutritional need. The Department will only receive information on those children. The Department will follow up with the family to find additional children that may be in the household and use the WIC income information to determine eligibility for all children in the household. Citizenship information for all children will be obtained from the family. Identity information for non WIC children will be obtained from the family. The department will not use additional budgeting deductions and will rely solely on the WIC income finding.

The Department will use WIC income findings and apply this income to children who are applying for Medicaid. WIC income is defined as gross cash income before deductions. WIC allows an exclusion from gross family income for military housing. Gross family income must be equal to or less than 185% of the Federal Poverty Level.

The Department allows a child support income disregard of \$50 for the budget group. The Department allows the following deductions from earned income for medical eligibility determinations:

- \$90 standard work expense for each employed individual
- \$30 earned income deduction and one-third of the remaining earned income for each employed individual
- dependent care expenses for each child or incapacitated individual

These disregards do not apply to WIC and do not apply to family income for ELE.
