23. REMARKS:

13d. Rehabilitative Services.

**Definition of Services**

Rehabilitative Services are designed to provide a group of needed mental health and substance abuse services to certain Medicaid recipients in order to restore these individuals to their highest possible functioning level. They are limited to individuals who are at risk of entering or reentering a mental health or hospital facility, those services of Human Service Centers provided by staff in settings outside the facility and to services provided to individuals who have transitioned from the State Hospital.

Services provided include behavioral intervention services that consist of developing and implementing a regimen that will reduce, modify or eliminate undesirable behaviors and/or introducing new methods to induce alternative positive behaviors and management including improving life skills. Other services include individual therapy, family therapy in which the Medicaid recipient takes part, group therapy, medication management, and mental health and substance abuse assessments.

All children are eligible for these rehabilitative services under EPSDT and are eligible to receive these and all other medically necessary services.

These services must be provided to, or directed exclusively toward, the treatment of the Medicaid eligible individual.

There are no duplication of billed services provided to clients at the same time.

Rehabilitative Services do not include the following:

- a. Room and board services;
- b. Services provided to residents of institutions for mental diseases;
- c. Services that are covered elsewhere in the State Medicaid plan;
- d. Educational, vocational and job training services;
- e. Recreational and social activities;
- f. Habilitation Services; and
- g. Services provided to inmates of public institutions.

Name of Service	Definition of Services	Who Provides
<p>Screening, Triage, and Referral leading to assessment</p>	<p>This service includes the brief assessment of an individual's need for services to determine whether there are sufficient indications of a behavioral health issues to warrant further evaluation. This service also includes the initial gathering of information to identify the urgency of need. This information is collected through a brief face-to-face or telephonic interview with the consumer or family/guardian as necessary. This service includes the process of obtaining cursory historical, social, functional, psychiatric, developmental, or other information from the individual and/or family seeking services in order to determine whether or not a behavioral health issue is likely to exist and the urgency of the need. Services are available 24 hours per day, seven (7) days per week. This service also includes the provision of appropriate triage and referrals to needed services based on the individual's presentation and preferences as identified in the screening process.</p> <p>The service reduces disability and restores individuals to previous functional levels by identifying functional problems in order to prevent regression and increasing disability. Prompt referral and intervention assists in reducing the loss of functional abilities.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Licensed Occupational Therapist (OTRL)*, Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Certified Occupational Therapy Assistant (COTA)*</p>
<p>Diagnostic Assessment</p>	<p>The Diagnostic Assessment and Individualized Recovery/Resiliency Planning process consists of a face-to-face comprehensive clinical assessment with the individual, which must include the individual's perspective, and may also include family and/or significant others, as well as collateral agencies/treatment providers/relevant individuals. The purpose of the process is to perform a formalized assessment in order to determine the individual's problems, strengths, needs, abilities and preferences, to develop a social history (extent of natural supports and community integration) and medical history, to determine functional level and degree of ability versus disability, and to develop or review collateral assessment information. The information gathered should support the determination of a differential</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed</p>

	<p>diagnosis and assist in screening for/ruling out- potential co-occurring disorders.</p> <p>The entire process involves the individual as a full partner and should focus on service and recovery/resiliency goals/outcomes as identified by the individual.</p> <p>The service reduces disability and restores individuals to previous functional levels by determining priority goals. This sets the foundation for treatment, and for the provision of appropriate services at the right time.</p>	<p>Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS)/ Nurse Practitioner (NP), Licensed Occupational Therapist (OTRL)*, Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Certified Occupational Therapy Assistant (COTA)*</p>
<p>Nursing Assessment and Health Services</p>	<p>This rehabilitative service requires face-to-face contact with the individual to monitor, evaluate, assess, and/or carry out a physician's orders regarding the physical and/or psychological problems of the individual. It includes:</p> <ol style="list-style-type: none"> <li>1) Providing nursing assessments to observe, monitor, and care for the physical, nutritional and psychological issues, problems or crises manifested in the course of an individual's treatment;</li> <li>2) Assessing and monitoring individual's response to medication(s) to determine the need to continue medication and/or to determine the need to refer the individual to a physician for a medication review (ie. Medication Management);</li> <li>3) Assessing and monitoring an individual's medical and other health issues that are either directly related to the mental health or substance related disorder, or to the treatment of the disorder (e.g. diabetes, cardiac and/or blood pressure issues, substance withdrawal symptoms, weight gain and fluid retention, seizures, etc.);</li> <li>4) Consulting with the individual's family and significant other(s) about medical, nutritional and other health issues related to the individual's mental health or substance related issues;</li> <li>5) Educating the individual and family/responsible caregiver(s) on medications and potential medication side effects (especially those which may adversely affect health such as weight gain or loss, blood pressure changes, cardiac abnormalities, development of diabetes or seizures, etc.); and</li> </ol>	<p>Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS)/ Nurse Practitioner (NP)</p>

	<p>6) Training for self-administration of medication.</p> <p>The service reduces disability and restores individuals to previous functional levels by improving understanding of medical and medication issues, which facilitates compliance with recommended treatment and the ability to self-monitor progress or problems. In addition, worsening of medical issues is avoided by prompt identification and intervention.</p>	
<p>Individual Therapy</p>	<p>Individual Therapy is the use of one-to-one therapeutic intervention for a specified period of time in which the problem or issue impeding full functioning is defined. The individual and the therapist establish the overall objective (or outcome sought) and develop specific goals and tasks for the individual. The therapist may choose many different treatment methods to approach those issues. The service reduces disability and restores individuals to previous functional levels by facilitating the development of skills needed for functioning in normal life roles in the community. The ability to acquire and apply these skills helps to prevent relapse and strengthen goal attainment.</p> <p>** Mental health professionals treat mental disorders differently using one or a combination of psychotherapy, psychiatric medication, or other practices. Psychotherapy may include cognitive behavioral therapy, psychodynamic approaches, and systemic/psychosocial interventions. Lifestyle adjustments and supportive measures may also be used.</p> <p>Occupational Therapy services and providers meet the Federal requirements in 42 CFR 440.110.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>

<p>Group Therapy</p>	<p>Group Therapy is much the same in terms of developing goals, objectives and specific tasks but utilizes a format in which a group of people selected by the therapist are provided treatment in an open or closed group, which may or may not have single therapeutic interests but is designed to treat the functioning areas of individuals by utilizing the group process and input of others in the group. Group Therapy for Rehabilitation clients who are mentally ill involves direct/indirect teaching by the therapist and the guided or facilitated group interaction with one another to bring about changes in functioning of all the members. Group therapy is especially effective when focusing on the development of goals which can be reinforced by other group members and when social skills and social connections will assist the individual in reaching their therapeutic goals. The service reduces disability and restores individuals to previous functional levels by facilitating the development of skills needed for functioning in normal life roles in the community. The ability to acquire and apply these skills helps to prevent relapse and strengthen goal attainment.</p> <p>** Mental health professionals treat mental disorders differently using one or a combination of psychotherapy, psychiatric medication, or other practices. Psychotherapy may include cognitive behavioral therapy, psychodynamic approaches, and systemic/psychosocial interventions. Lifestyle adjustments and supportive measures may also be used.</p> <p>Occupational Therapy services and providers meet the Federal requirements in 42 CFR 440.110.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>
----------------------	--	---

<p>Family Therapy</p>	<p>Family Therapy is a service that utilizes the same strategy of developing goals, but instead of the service being provided on a one-to-one basis, it includes family members and other significant others to address the identified issue. The service reduces disability and restores individuals to previous functional levels by facilitating the development of skills needed for functioning in normal life roles in the community. The ability to acquire and apply these skills helps to prevent relapse and strengthen goal attainment.</p> <p>** Mental health professionals treat mental disorders differently using one or a combination of psychotherapy, psychiatric medication, or other practices. Psychotherapy may include cognitive behavioral therapy, psychodynamic approaches, and systemic/psychosocial interventions. Lifestyle adjustments and supportive measures may also be used.</p> <p>Occupational Therapy services and providers meet the Federal requirements in 42 CFR 440.110.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Human Relations Counselor, Licensed Certified Social Worker (LCSW), Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>
-----------------------	---	---

\* Occupational Therapists and Certified OT Assistants have training in human functioning and disability. Within rehab services, they do not provide overall diagnostic assessment, but evaluate the individual's abilities and limitations in overall functioning. The result of this assessment may be triage and referral to other professionals for other specialized evaluations. They are providing rehabilitative screening and triage.

<p>Behavioral Intervention</p>	<p>A service to identify responsive actions by an individual to stimuli and to develop and facilitate the implementation of an intervention regimen that will reduce, modify, or eliminate undesirable responses. This intervention is a comprehensive rehabilitative service that braids developing daily living skills, interpersonal skills, and behavior management skills into a defined individualized strategy to enable clients to manage symptoms and regain lost functioning due to mental illness, substance abuse, and/or co-occurring disorders.</p> <p>The service reduces disability and restores individuals to previous functional levels by helping the individual to learn and apply appropriate skills in various living settings/situations. These skills, as noted above, enable individuals to successfully live in less restrictive environments and maintain normalized roles.</p> <p>The practitioners who deliver the service assess the client and develop a Behavioral Intervention Plan. The plan is reviewed and modified as needed to ensure clients receive appropriate interventions.</p>	<p>Licensed Clinical Psychologist, Licensed Exempt Clinical Psychologist, and Behavior Modification Specialist</p>
<p>Crisis Stabilization</p>	<p>This is a residential alternative of not more than 16 beds, to or diversion from inpatient hospitalization, offering psychiatric stabilization and detoxification services. The program provides medically monitored residential services for the purpose of providing psychiatric stabilization and substance detoxification services on a short-term basis. Specific services include:</p> <ol style="list-style-type: none"> <li>1) Psychiatric medical assessment;</li> <li>2) Crisis assessment, support and intervention;</li> <li>3) Social Detox residential Substance Detoxification (at ASAM Level III.2-D); Offers 24-hour structure, care and support to recover from the withdrawal signs and symptoms of chemical intoxication. Hospital affiliation provides 24-hour medical backup. Includes services for clients presenting in an emergency or crisis and in need of chemical detoxification service.</li> <li>4) Medication administration, management, and monitoring;</li> <li>5) Brief individual, group and/or family counseling; and</li> <li>6) Linkage to other rehabilitative services as needed.</li> </ol> <p>The service reduces disability and restores individuals to previous functional levels by promptly intervening and stabilizing when crisis situations occur. By doing so, the individual is assisted in again focusing on goals for recovery, avoiding continued exacerbation of symptoms, and decreasing risk of need for hospitalization or other higher level care.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LISCW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Mental Health Technician, Nurse Practitioner (NP), Registered Nurse (RN), Psychologist, or Clinical Nurse Specialist, Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC).</p>

<p>Medication Management</p>	<p>A service designed to prescribe or administer medication with the highest efficacy and lowest toxicity in treating the primary symptoms of an individual's psychiatric condition. This service is intended to include medication trials which are adequate in dose and duration, as well as assessments of the appropriateness of the individual's existing medication regimen through record review, ongoing monitoring, and consultation with the client and/or collateral contact. The purpose of such consultation is to determine personal preferences, as well as past and present experiences with medication, include ingrelated efficacy, side effects and compliance. Medication management may include providing individuals with information concerning the effects, benefits, risks and possible side effects of a proposed course of medication.</p> <p>The service reduces disability and restores individuals to previous functional levels by insuring adequate client teaching regarding the illness, medication needs, and potential risks of treatment. This provides for more complete involvement of the client in determining the treatment plan, and helps to improve compliance with recommended treatment.</p>	<p>Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP)</p>
<p>Skills Integration</p>	<p>A service designed to support individuals in the community in their efforts to apply and integrate those life skills that have been learned in their therapy programs. These clients typically require support for cueing/modeling of appropriate behavioral and life skills in order to maximize their skills and prevent need for higher levels of care.</p> <p>For example, behavior management assistance helps individuals to stabilize, reduce, or eliminate undesirable behaviors which put them at risk of being served in restrictive setting such as residential treatment centers or psychiatric hospitals. Role modeling helps individuals learn and observe appropriate behavioral and emotional responses to various situations which can trigger their medical symptoms.</p> <p>The service reduces disability and restores individuals to previous functional levels by assisting individuals in ongoing utilization and application of learned skills in normalized living situations. This strengthens the skill development that has occurred, and promotes skill integration in various life roles.</p>	<p>Mental Health Technician</p>

<p>Transitional Living</p>	<p>Transitional Living is defined as services designed to assist individuals in improving the self-help, socialization and adaptive skills necessary to reside successfully in home and community based settings. This service includes assistance with acquisition of skills related to activities of daily living and the social and adaptive skills necessary to enable the individuals to reside in a non-institutional setting.</p> <p>Transitional Living includes:</p> <ul style="list-style-type: none"> <li>• Individual and Family Therapy</li> <li>• Skills Integration</li> <li>• Behavior Intervention</li> <li>• Nursing Assessment and Health Services</li> <li>• Medication Management</li> </ul>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*; Licensed Occupational Therapist (OTRL)*, Mental Health Technician</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>
----------------------------	---	---

\* Occupational Therapists and Certified OT Assistants have training in human functioning and disability. Within rehab services, they do not provide overall diagnostic assessment, but evaluate the individual's abilities and limitations in overall functioning. The result of this assessment may be triage and referral to other professionals for other specialized evaluations. They are providing rehabilitative screening and triage.

<p>Day Treatment</p>	<p>Day Treatment is defined as a non-residential, time-limited, ambulatory, active treatment program pursuing the goal of stabilization with the intention of averting inpatient hospitalization or reducing the length of a hospital stay. Day Treatment services are designed to serve individuals with significant impairment resulting from an addictive disorder. Day Treatment services assist individuals in improving skills related to exhibiting appropriate behavior, living with greater independence and personal choice. Treatment programs employ an integrated, comprehensive and complimentary schedule of recognized treatment approaches and embraces day, evening, night and weekend treatment programs. Services are aimed at supporting individuals with maximizing the skills needed to live independently. The services help recipients reside in the most normative and least restrictive, family centered environment, and integrated setting appropriate to their medical needs. Support and supervision must be sufficient to maintain the person's safety outside the hospital. The care delivered must be ordered and supervised by a physician or psychiatrist. Treatment is proactive, intensive, and provided in a supervised environment by a multi-disciplinary team of qualified professionals. The Day Treatment program must be licensed by the Department of Human Services, Mental Health and Substance Abuse Division.</p> <p>Day Treatment Services include:</p> <ul style="list-style-type: none"> <li>• Medication Management</li> <li>• Crisis Stabilization</li> <li>• Screening and Diagnostic Assessments</li> <li>• Nursing Assessment and Health Services</li> <li>• Family, Group, and Individual Therapy</li> <li>• Skills Integration</li> </ul>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Human Relations Counselor, Licensed Certified Social Worker (LCSW), Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*, Licensed Occupational Therapist (OTRL)*, Mental health Technician</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>
----------------------	---	---

Licensed Clinical Psychologist	North Dakota Century Code. Requires licensure or eligibility for licensure as a Psychologist by the ND Board of Psychologist Examiners	Doctorate degree in Psychology	NO	Licensed Exempt Clinical Psychologist, Behavior Modification Specialist or Human Relations Counselor.

The Department of Human Services, through the provider agreement, contracts with entities to provide rehabilitative services. The entities are to be established for the purpose of providing rehabilitative services and must demonstrate to the Department that they understand the rehabilitative needs of the Medicaid clients by:

- Documenting an understanding of the transportation challenges of some Medicaid clients and assisting clients with those challenges.
- Documenting an understanding of the unique needs of the Medicaid population and showing experience with coordination of services for similar client needs;
- Maintaining case files for each Medicaid beneficiary and evidence of compliance with the practitioner qualifications;
- Documenting how the entity will notify recipients of any limitations on amount, duration or scope of the beneficiary's services are about to be reached or have been exceeded.

The Entities must also have procedures in place to assure that rehabilitative services are: (a) provided according to a plan of care, (b) are delivered within a quality framework, and (c) are measured for outcomes. A written summary of how an entity will ensure this is required upon initial Medicaid enrollment. Individual practitioners must meet the qualifications detailed in the Provider Qualifications table and must be employed by an entity that has a provider agreement with the Department. The practitioner is responsible for maintaining the individual qualifications outlined in the Provider Qualifications table.

### **Eligibility for Services**

The following requirements must be met before rehabilitative services can be provided through the North Dakota Medicaid Program.

- 1) The recipient must be eligible for the Medicaid Program.
- 2) The service must have been recommended by a practitioner of the healing arts within the scope of their practice under state law by providers affiliated with the North Dakota Department of Human Services.
- 3) The recipient must have a mental health or substance abuse disorder, and must have one of the following circumstances.

- a) An individual must be at risk of entering or reentering a mental health facility or hospital. Eligibility is determined by the Department of Human Services.
  - b) An individual who requires medication management and consultation to ensure the maintenance of his/her best functioning level. Eligibility is determined by the Department of Human Services, and
- 4) The recipient must be from a family that is in crisis and at risk of major dysfunction that could lead to disruption of the current family makeup or in a family that has experienced a disruption that has resulted in disruption of the family or
  - 5) The recipient is in need of mental health, substance abuse or behavioral intervention and management services that are provided by qualified entities.
  - 6) The recipient has recently been released from the State Mental Facility into a transitional residential setting of not more than 16 beds.

### **Limitations**

Services to families in crisis and at risk of disruption are limited to no more than six months of services unless prior approval is received from the Department of Human Services.

13d. Rehabilitative Services.

**Definition of Services**

Rehabilitative Services are designed to provide a group of needed mental health and substance abuse services to certain Medicaid recipients in order to restore these individuals to their highest possible functioning level. They are limited to individuals who are at risk of entering or reentering a mental health or hospital facility, those services of Human Service Centers provided by staff in settings outside the facility and to services provided to individuals who have transitioned from the State Hospital.

Services provided include behavioral intervention services that consist of developing and implementing a regimen that will reduce, modify or eliminate undesirable behaviors and/or introducing new methods to induce alternative positive behaviors and management including improving life skills. Other services include individual therapy, family therapy in which the Medicaid recipient takes part, group therapy, medication management, and mental health and substance abuse assessments.

All children are eligible for these rehabilitative services under EPSDT and are eligible to receive these and all other medically necessary services.

These services must be provided to, or directed exclusively toward, the treatment of the Medicaid eligible individual.

There are no duplication of billed services provided to clients at the same time.

Rehabilitative Services do not include the following:

- a. Room and board services;
- b. Services provided to residents of institutions for mental diseases;
- c. Services that are covered elsewhere in the State Medicaid plan;
- d. Educational, vocational and job training services;
- e. Recreational and social activities;
- f. Habilitation Services; and
- g. Services provided to inmates of public institutions.

Name of Service	Definition of Services	Who Provides
<p>Screening, Triage, and Referral leading to assessment</p>	<p>This service includes the brief assessment of an individual's need for services to determine whether there are sufficient indications of a behavioral health issues to warrant further evaluation. This service also includes the initial gathering of information to identify the urgency of need. This information is collected through a brief face-to-face or telephonic interview with the consumer or family/guardian as necessary. This service includes the process of obtaining cursory historical, social, functional, psychiatric, developmental, or other information from the individual and/or family seeking services in order to determine whether or not a behavioral health issue is likely to exist and the urgency of the need. Services are available 24 hours per day, seven (7) days per week. This service also includes the provision of appropriate triage and referrals to needed services based on the individual's presentation and preferences as identified in the screening process.</p> <p>The service reduces disability and restores individuals to previous functional levels by identifying functional problems in order to prevent regression and increasing disability. Prompt referral and intervention assists in reducing the loss of functional abilities.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Licensed Occupational Therapist (OTRL)*, Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Certified Occupational Therapy Assistant (COTA)*</p>
<p>Diagnostic Assessment</p>	<p>The Diagnostic Assessment and Individualized Recovery/Resiliency Planning process consists of a face-to-face comprehensive clinical assessment with the individual, which must include the individual's perspective, and may also include family and/or significant others, as well as collateral agencies/treatment providers/relevant individuals. The purpose of the process is to perform a formalized assessment in order to determine the individual's problems, strengths, needs, abilities and preferences, to develop a social history (extent of natural supports and community integration) and medical history, to determine functional level and degree of ability versus disability, and to develop or review collateral assessment information. The information gathered should support the determination of a differential</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed</p>

	<p>diagnosis and assist in screening for/ruling out- potential co-occurring disorders.</p> <p>The entire process involves the individual as a full partner and should focus on service and recovery/resiliency goals/outcomes as identified by the individual.</p> <p>The service reduces disability and restores individuals to previous functional levels by determining priority goals. This sets the foundation for treatment, and for the provision of appropriate services at the right time.</p>	<p>Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Licensed Occupational Therapist (OTRL)*, Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Certified Occupational Therapy Assistant (COTA)*</p>
<p>Nursing Assessment and Health Services</p>	<p>This rehabilitative service requires face-to-face contact with the individual to monitor, evaluate, assess, and/or carry out a physician's orders regarding the physical and/or psychological problems of the individual. It includes:</p> <ol style="list-style-type: none"> <li>1) Providing nursing assessments to observe, monitor, and care for the physical, nutritional and psychological issues, problems or crises manifested in the course of an individual's treatment;</li> <li>2) Assessing and monitoring individual's response to medication(s) to determine the need to continue medication and/or to determine the need to refer the individual to a physician for a medication review (ie. Medication Management);</li> <li>3) Assessing and monitoring an individual's medical and other health issues that are either directly related to the mental health or substance related disorder, or to the treatment of the disorder (e.g. diabetes, cardiac and/or blood pressure issues, substance withdrawal symptoms, weight gain and fluid retention, seizures, etc.);</li> <li>4) Consulting with the individual's family and significant other(s) about medical, nutritional and other health issues related to the individual's mental health or substance related issues;</li> <li>5) Educating the individual and family/responsible caregiver(s) on medications and potential medication side effects (especially those which may adversely affect health such as weight gain or loss, blood pressure changes, cardiac abnormalities, development of diabetes or seizures, etc.); and</li> </ol>	<p>Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP)</p>

	<p>6) Training for self-administration of medication.</p> <p>The service reduces disability and restores individuals to previous functional levels by improving understanding of medical and medication issues, which facilitates compliance with recommended treatment and the ability to self-monitor progress or problems. In addition, worsening of medical issues is avoided by prompt identification and intervention.</p>	
<p>Individual Therapy</p>	<p>Individual Therapy is the use of one-to-one therapeutic intervention for a specified period of time in which the problem or issue impeding full functioning is defined. The individual and the therapist establish the overall objective (or outcome sought) and develop specific goals and tasks for the individual. The therapist may choose many different treatment methods to approach those issues. The service reduces disability and restores individuals to previous functional levels by facilitating the development of skills needed for functioning in normal life roles in the community. The ability to acquire and apply these skills helps to prevent relapse and strengthen goal attainment.</p> <p>** Mental health professionals treat mental disorders differently using one or a combination of psychotherapy, psychiatric medication, or other practices. Psychotherapy may include cognitive behavioral therapy, psychodynamic approaches, and systemic/psychosocial interventions. Lifestyle adjustments and supportive measures may also be used.</p> <p>Occupational Therapy services and providers meet the Federal requirements in 42 CFR 440.110.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>

<p>Group Therapy</p>	<p>Group Therapy is much the same in terms of developing goals, objectives and specific tasks but utilizes a format in which a group of people selected by the therapist are provided treatment in an open or closed group, which may or may not have single therapeutic interests but is designed to treat the functioning areas of individuals by utilizing the group process and input of others in the group. Group Therapy for Rehabilitation clients who are mentally ill involves direct/indirect teaching by the therapist and the guided or facilitated group interaction with one another to bring about changes in functioning of all the members. Group therapy is especially effective when focusing on the development of goals which can be reinforced by other group members and when social skills and social connections will assist the individual in reaching their therapeutic goals. The service reduces disability and restores individuals to previous functional levels by facilitating the development of skills needed for functioning in normal life roles in the community. The ability to acquire and apply these skills helps to prevent relapse and strengthen goal attainment.</p> <p>** Mental health professionals treat mental disorders differently using one or a combination of psychotherapy, psychiatric medication, or other practices. Psychotherapy may include cognitive behavioral therapy, psychodynamic approaches, and systemic/psychosocial interventions. Lifestyle adjustments and supportive measures may also be used.</p> <p>Occupational Therapy services and providers meet the Federal requirements in 42 CFR 440.110.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>
----------------------	--	---

<p>Family Therapy</p>	<p>Family Therapy is a service that utilizes the same strategy of developing goals, but instead of the service being provided on a one-to-one basis, it includes family members and other significant others to address the identified issue. The service reduces disability and restores individuals to previous functional levels by facilitating the development of skills needed for functioning in normal life roles in the community. The ability to acquire and apply these skills helps to prevent relapse and strengthen goal attainment.</p> <p>** Mental health professionals treat mental disorders differently using one or a combination of psychotherapy, psychiatric medication, or other practices. Psychotherapy may include cognitive behavioral therapy, psychodynamic approaches, and systemic/psychosocial interventions. Lifestyle adjustments and supportive measures may also be used.</p> <p>Occupational Therapy services and providers meet the Federal requirements in 42 CFR 440.110.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Human Relations Counselor, Licensed Certified Social Worker (LCSW), Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>
-----------------------	---	---

\* Occupational Therapists and Certified OT Assistants have training in human functioning and disability. Within rehab services, they do not provide overall diagnostic assessment, but evaluate the individual's abilities and limitations in overall functioning. The result of this assessment may be triage and referral to other professionals for other specialized evaluations. They are providing rehabilitative screening and triage.

<p>Behavioral Intervention</p>	<p>A service to identify responsive actions by an individual to stimuli and to develop and facilitate the implementation of an intervention regimen that will reduce, modify, or eliminate undesirable responses. This intervention is a comprehensive rehabilitative service that braids developing daily living skills, interpersonal skills, and behavior management skills into a defined individualized strategy to enable clients to manage symptoms and regain lost functioning due to mental illness, substance abuse, and/or co-occurring disorders.</p> <p>The service reduces disability and restores individuals to previous functional levels by helping the individual to learn and apply appropriate skills in various living settings/situations. These skills, as noted above, enable individuals to successfully live in less restrictive environments and maintain normalized roles.</p> <p>The practitioners who deliver the service assess the client and develop a Behavioral Intervention Plan. The plan is reviewed and modified as needed to ensure clients receive appropriate interventions.</p>	<p>Licensed Clinical Psychologist, Licensed Exempt Clinical Psychologist, and Behavior Modification Specialist</p>
<p>Crisis Stabilization</p>	<p>This is a residential alternative of not more than 16 beds, to or diversion from inpatient hospitalization, offering psychiatric stabilization and detoxification services. The program provides medically monitored residential services for the purpose of providing psychiatric stabilization and substance detoxification services on a short-term basis. Specific services include:</p> <ol style="list-style-type: none"> <li>1) Psychiatric medical assessment;</li> <li>2) Crisis assessment, support and intervention;</li> <li>3) Social Detox residential Substance Detoxification (at ASAM Level III.2-D); Offers 24-hour structure, care and support to recover from the withdrawal signs and symptoms of chemical intoxication. Hospital affiliation provides 24-hour medical backup. Includes services for clients presenting in an emergency or crisis and in need of chemical detoxification service.</li> <li>4) Medication administration, management, and monitoring;</li> <li>5) Brief individual, group and/or family counseling; and</li> <li>6) Linkage to other rehabilitative services as needed.</li> </ol> <p>The service reduces disability and restores individuals to previous functional levels by promptly intervening and stabilizing when crisis situations occur. By doing so, the individual is assisted in again focusing on goals for recovery, avoiding continued exacerbation of symptoms, and decreasing risk of need for hospitalization or other higher level care.</p>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LISCW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Human Relations Counselor, Mental Health Technician, Nurse Practitioner (NP), Registered Nurse (RN), Psychologist, or Clinical Nurse Specialist, Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC),</p>

<p>Medication Management</p>	<p>A service designed to prescribe or administer medication with the highest efficacy and lowest toxicity in treating the primary symptoms of an individual's psychiatric condition. This service is intended to include medication trials which are adequate in dose and duration, as well as assessments of the appropriateness of the individual's existing medication regimen through record review, ongoing monitoring, and consultation with the client and/or collateral contact. The purpose of such consultation is to determine personal preferences, as well as past and present experiences with medication, include ingrelated efficacy, side effects and compliance. Medication management may include providing individuals with information concerning the effects, benefits, risks and possible side effects of a proposed course of medication.</p> <p>The service reduces disability and restores individuals to previous functional levels by insuring adequate client teaching regarding the illness, medication needs, and potential risks of treatment. This provides for more complete involvement of the client in determining the treatment plan, and helps to improve compliance with recommended treatment.</p>	<p>Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP)</p>
<p>Skills Integration</p>	<p>A service designed to support individuals in the community in their efforts to apply and integrate those life skills that have been learned in their therapy programs. These clients typically require support for cueing/modeling of appropriate behavioral and life skills in order to maximize their skills and prevent need for higher levels of care.</p> <p>For example, behavior management assistance helps individuals to stabilize, reduce, or eliminate undesirable behaviors which put them at risk of being served in restrictive setting such as residential treatment centers or psychiatric hospitals. Role modeling helps individuals learn and observe appropriate behavioral and emotional responses to various situations which can trigger their medical symptoms.</p> <p>The service reduces disability and restores individuals to previous functional levels by assisting individuals in ongoing utilization and application of learned skills in normalized living situations. This strengthens the skill development that has occurred, and promotes skill integration in various life roles.</p>	<p>Mental Health Technician</p>

<p>Transitional Living</p>	<p>Transitional Living is defined as services designed to assist individuals in improving the self-help, socialization and adaptive skills necessary to reside successfully in home and community based settings. This service includes assistance with acquisition of skills related to activities of daily living and the social and adaptive skills necessary to enable the individuals to reside in a non-institutional setting.</p> <p>Transitional Living includes:</p> <ul style="list-style-type: none"> <li>• Individual and Family Therapy</li> <li>• Skills Integration</li> <li>• Behavior Intervention</li> <li>• Nursing Assessment and Health Services</li> <li>• Medication Management</li> </ul>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Licensed Certified Social Worker (LCSW), Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Exempt Clinical Psychologist, Behavior Modification Specialist, Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*; Licensed Occupational Therapist (OTRL)*, Mental Health Technician</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>
----------------------------	---	---

\* Occupational Therapists and Certified OT Assistants have training in human functioning and disability. Within rehab services, they do not provide overall diagnostic assessment, but evaluate the individual's abilities and limitations in overall functioning. The result of this assessment may be triage and referral to other professionals for other specialized evaluations. They are providing rehabilitative screening and triage.

<p>Day Treatment</p>	<p>Day Treatment is defined as a non-residential, time-limited, ambulatory, active treatment program pursuing the goal of stabilization with the intention of averting inpatient hospitalization or reducing the length of a hospital stay. Day Treatment services are designed to serve individuals with significant impairment resulting from an addictive disorder. Day Treatment services assist individuals in improving skills related to exhibiting appropriate behavior, living with greater independence and personal choice. Treatment programs employ an integrated, comprehensive and complimentary schedule of recognized treatment approaches and embraces day, evening, night and weekend treatment programs. Services are aimed at supporting individuals with maximizing the skills needed to live independently. The services help recipients reside in the most normative and least restrictive, family centered environment, and integrated setting appropriate to their medical needs. Support and supervision must be sufficient to maintain the person's safety outside the hospital. The care delivered must be ordered and supervised by a physician or psychiatrist. Treatment is proactive, intensive, and provided in a supervised environment by a multi-disciplinary team of qualified professionals. The Day Treatment program must be licensed by the Department of Human Services, Mental Health and Substance Abuse Division.</p> <p>Day Treatment Services include:</p> <ul style="list-style-type: none"> <li>• Medication Management</li> <li>• Crisis Stabilization</li> <li>• Screening and Diagnostic Assessments</li> <li>• Nursing Assessment and Health Services</li> <li>• Family, Group, and Individual Therapy</li> <li>• Skills Integration</li> </ul>	<p>Licensed Addiction Counselor (LAC), Licensed Independent Clinical Social Worker (LICSW), Licensed Social Worker (LSW), Human Relations Counselor, Licensed Certified Social Worker (LCSW), Licensed Associate Professional Counselor (LAPC), Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Clinical Psychologist, Registered Nurse (RN), Licensed Practical Nurse (LPN), Clinical Nurse Specialist (CNS) / Nurse Practitioner (NP), Psychiatrist, Certified Occupational Therapist Assistant (COTA)*, Licensed Occupational Therapist (OTRL)*, Mental health Technician</p> <p>Therapy Services are provided within each practitioner's scope of practice in accordance with licensure and certification.</p>

The Department of Human Services, through the provider agreement, contracts with entities to provide rehabilitative services. The entities are to be established for the purpose of providing rehabilitative services and must demonstrate to the Department that they understand the rehabilitative needs of the Medicaid clients by:

- Documenting an understanding of the transportation challenges of some Medicaid clients and assisting clients with those challenges.
- Documenting an understanding of the unique needs of the Medicaid population and showing experience with coordination of services for similar client needs;
- Maintaining case files for each Medicaid beneficiary and evidence of compliance with the practitioner qualifications;
- Documenting how the entity will notify recipients of any limitations on amount, duration or scope of the beneficiary's services are about to be reached or have been exceeded.

The Entities must also have procedures in place to assure that rehabilitative services are: (a) provided according to a plan of care, (b) are delivered within a quality framework, and (c) are measured for outcomes. A written summary of how an entity will ensure this is required upon initial Medicaid enrollment. Individual practitioners must meet the qualifications detailed in the Provider Qualifications table and must be employed by an entity that has a provider agreement with the Department. The practitioner is responsible for maintaining the individual qualifications outlined in the Provider Qualifications table.

### **Eligibility for Services**

The following requirements must be met before rehabilitative services can be provided through the North Dakota Medicaid Program.

- 1) The recipient must be eligible for the Medicaid Program.
- 2) The service must have been recommended by a practitioner of the healing arts within the scope of their practice under state law by providers affiliated with the North Dakota Department of Human Services.
- 3) The recipient must have a mental health or substance abuse disorder, and must have one of the following circumstances.

- a) An individual must be at risk of entering or reentering a mental health facility or hospital. Eligibility is determined by the Department of Human Services.
  - b) An individual who requires medication management and consultation to ensure the maintenance of his/her best functioning level. Eligibility is determined by the Department of Human Services, and
- 4) The recipient must be from a family that is in crisis and at risk of major dysfunction that could lead to disruption of the current family makeup or in a family that has experienced a disruption that has resulted in disruption of the family or
  - 5) The recipient is in need of mental health, substance abuse or behavioral intervention and management services that are provided by qualified entities.
  - 6) The recipient has recently been released from the State Mental Facility into a transitional residential setting of not more than 16 beds.

### **Limitations**

Services to families in crisis and at risk of disruption are limited to no more than six months of services unless prior approval is received from the Department of Human Services.
