Supplement 2 to ATTACHMENTS 3.1-A and 3.1-B Page 5g

CARDIAC REHABILITATION: Cardiac Rehabilitation is a supervising physician recommended individually tailored multidisciplinary approach to the rehabilitation of beneficiaries, based on an assessment and plan of care, designed to promote reduction of physical disability and restore beneficiaries to the best possible functional level and active, productive lives. Cardiac rehabilitation services are supervised by the supervising physician and other physicians. The service is distinct rehabilitative service provided pursuant to 42 C.F.R. §440.130(d).

Services Description

- A team assessment and plan of care, which is primarily prepared and supplemented by the supervising physician, other physicians, physician assistants, nurse practitioners and/or nurses, and also includes input from a combination of licensed dieticians, exercise, physiologists, and/or mental health professionals. The plan of care includes identifying what services are needed, which professionals should provide the services, how often the beneficiary will need the services, and the results expected from the treatment. The plan of care is updated by the every 6 weeks. The supervising physician and physician assistants, nurse practitioners and/or nurses working under the supervising physician have the primary responsibility of updating the plan of care.
- •Exercise physiology services: 36 sessions (e.g., 3x/week for 12 weeks) of supervised exercise by an exercise physiologist which can be exceeded based on medical necessity. Also, includes individual exercise services that can be self-monitored and maintained.
- Beneficiary training and education, performed by nurses, nurse practitioners and/or physician assistants, which consists of disease specific education to the beneficiary based on their medical conditions.
- Nutrition counseling, performed by a licensed dietician, which is a therapeutic approach to treating medical conditions and their associated symptoms with the use of a specifically tailored diet. This would involve specific counseling on dieting to address issues such as cholesterol levels, dietary sodium levels, weight control and reduction and diabetes control.
- Mental health counseling, involving counseling to beneficiaries to address depression or other mental health conditions associated with cardiac disease. These services are provided by mental health professionals.

Provider Qualifications

- •Providers of cardiac rehabilitation services must have the following licensure, training, certification, education and experience, as applicable. It is the responsibility of the provider to meet qualifications for the functions they provide.
- •Physicians:
 - •Supervising physician: State licensed Medical Doctor (MD) or State Licensed Doctor of Osteopathy (DO) who is nationally board certified in cardiovascular disease through the American Board of Internal Medicine
 - •Other physicians: State licensed Medical Doctor (MD) or State Licensed Doctor of Osteopathy (DO)
 - •State licensed Physician's Assistant (PA) working under supervision of a supervising physician or other physicians as defined above.
