

# September 2022 Medicaid and CHIP Enrollment Trends Snapshot

*Center for Medicaid  
and CHIP Services*

# Enrollment Snapshot

- To be responsive to questions on Medicaid and CHIP enrollment, particularly given the impact of the COVID-19 public health emergency (PHE), this Enrollment Snapshot captures high level information on the most recently submitted month of Performance Indicator Enrollment Data<sup>1</sup> within the context of trends since February 2020<sup>2</sup>, focusing on:
  - Total Medicaid and CHIP enrollment;
  - Medicaid enrollment;
  - CHIP enrollment;
  - Adult enrollment; and
  - Child enrollment.
- This analysis also captures high level information on the trend in the number of Medicaid and CHIP applications received by states.

<sup>1</sup> Performance Indicator Enrollment Data counts individuals receiving full-scope and comprehensive Medicaid and CHIP benefits.

<sup>2</sup> February 2020 serves as a baseline prior to the impacts of the COVID-19 pandemic and the enactment of the Families First Coronavirus Response Act (FFCRA) in March 2020. Section 6008 of FFCRA includes a continuous enrollment condition, which makes available a temporary 6.2 percentage point increase to each state or territory's federal medical assistance percentage (FMAP). As a condition of receiving the FMAP increase, states must meet several requirements pertaining to eligibility and maintenance of enrollment.

# Key Findings

- In September 2022, 90,933,769 individuals were enrolled in Medicaid and CHIP.<sup>1</sup>
  - 83,901,601 individuals were enrolled in Medicaid in September 2022, an increase of 390,277 individuals from August 2022.
  - 7,032,168 individuals were enrolled in CHIP in September 2022, a decrease of 24,225 individuals from August 2022.<sup>2</sup>
- Since February 2020, enrollment in Medicaid and CHIP has increased by 20,241,934 individuals (28.6%).
  - Medicaid enrollment has increased by 19,947,948 individuals (31.2%).
  - CHIP enrollment has increased by 293,986 individuals (4.4%).
- The Medicaid enrollment increases are likely driven by COVID-19 and the continuous enrollment condition in the Families First Coronavirus Response Act (FFCRA).<sup>3</sup>

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

<sup>1</sup> Performance Indicator Enrollment Data counts individuals receiving full-scope and comprehensive Medicaid and CHIP benefits.

<sup>2</sup> The decrease in CHIP enrollment is primarily driven by an update in reporting methodology by the state of Texas. In Texas, CHIP enrollment decreased by 10.8 percent (56,306 individuals) while child Medicaid enrollment increased by 3.9 percent (142,723 individuals) in September 2022.

<sup>3</sup> Families First Coronavirus Response Act, Pub. L. No. 116-127, Sec 6008, Temporary Increase of Medicaid FMAP. <https://www.congress.gov/116/plaws/publ127/PLAW-116publ127.pdf>

# Key Findings (continued)

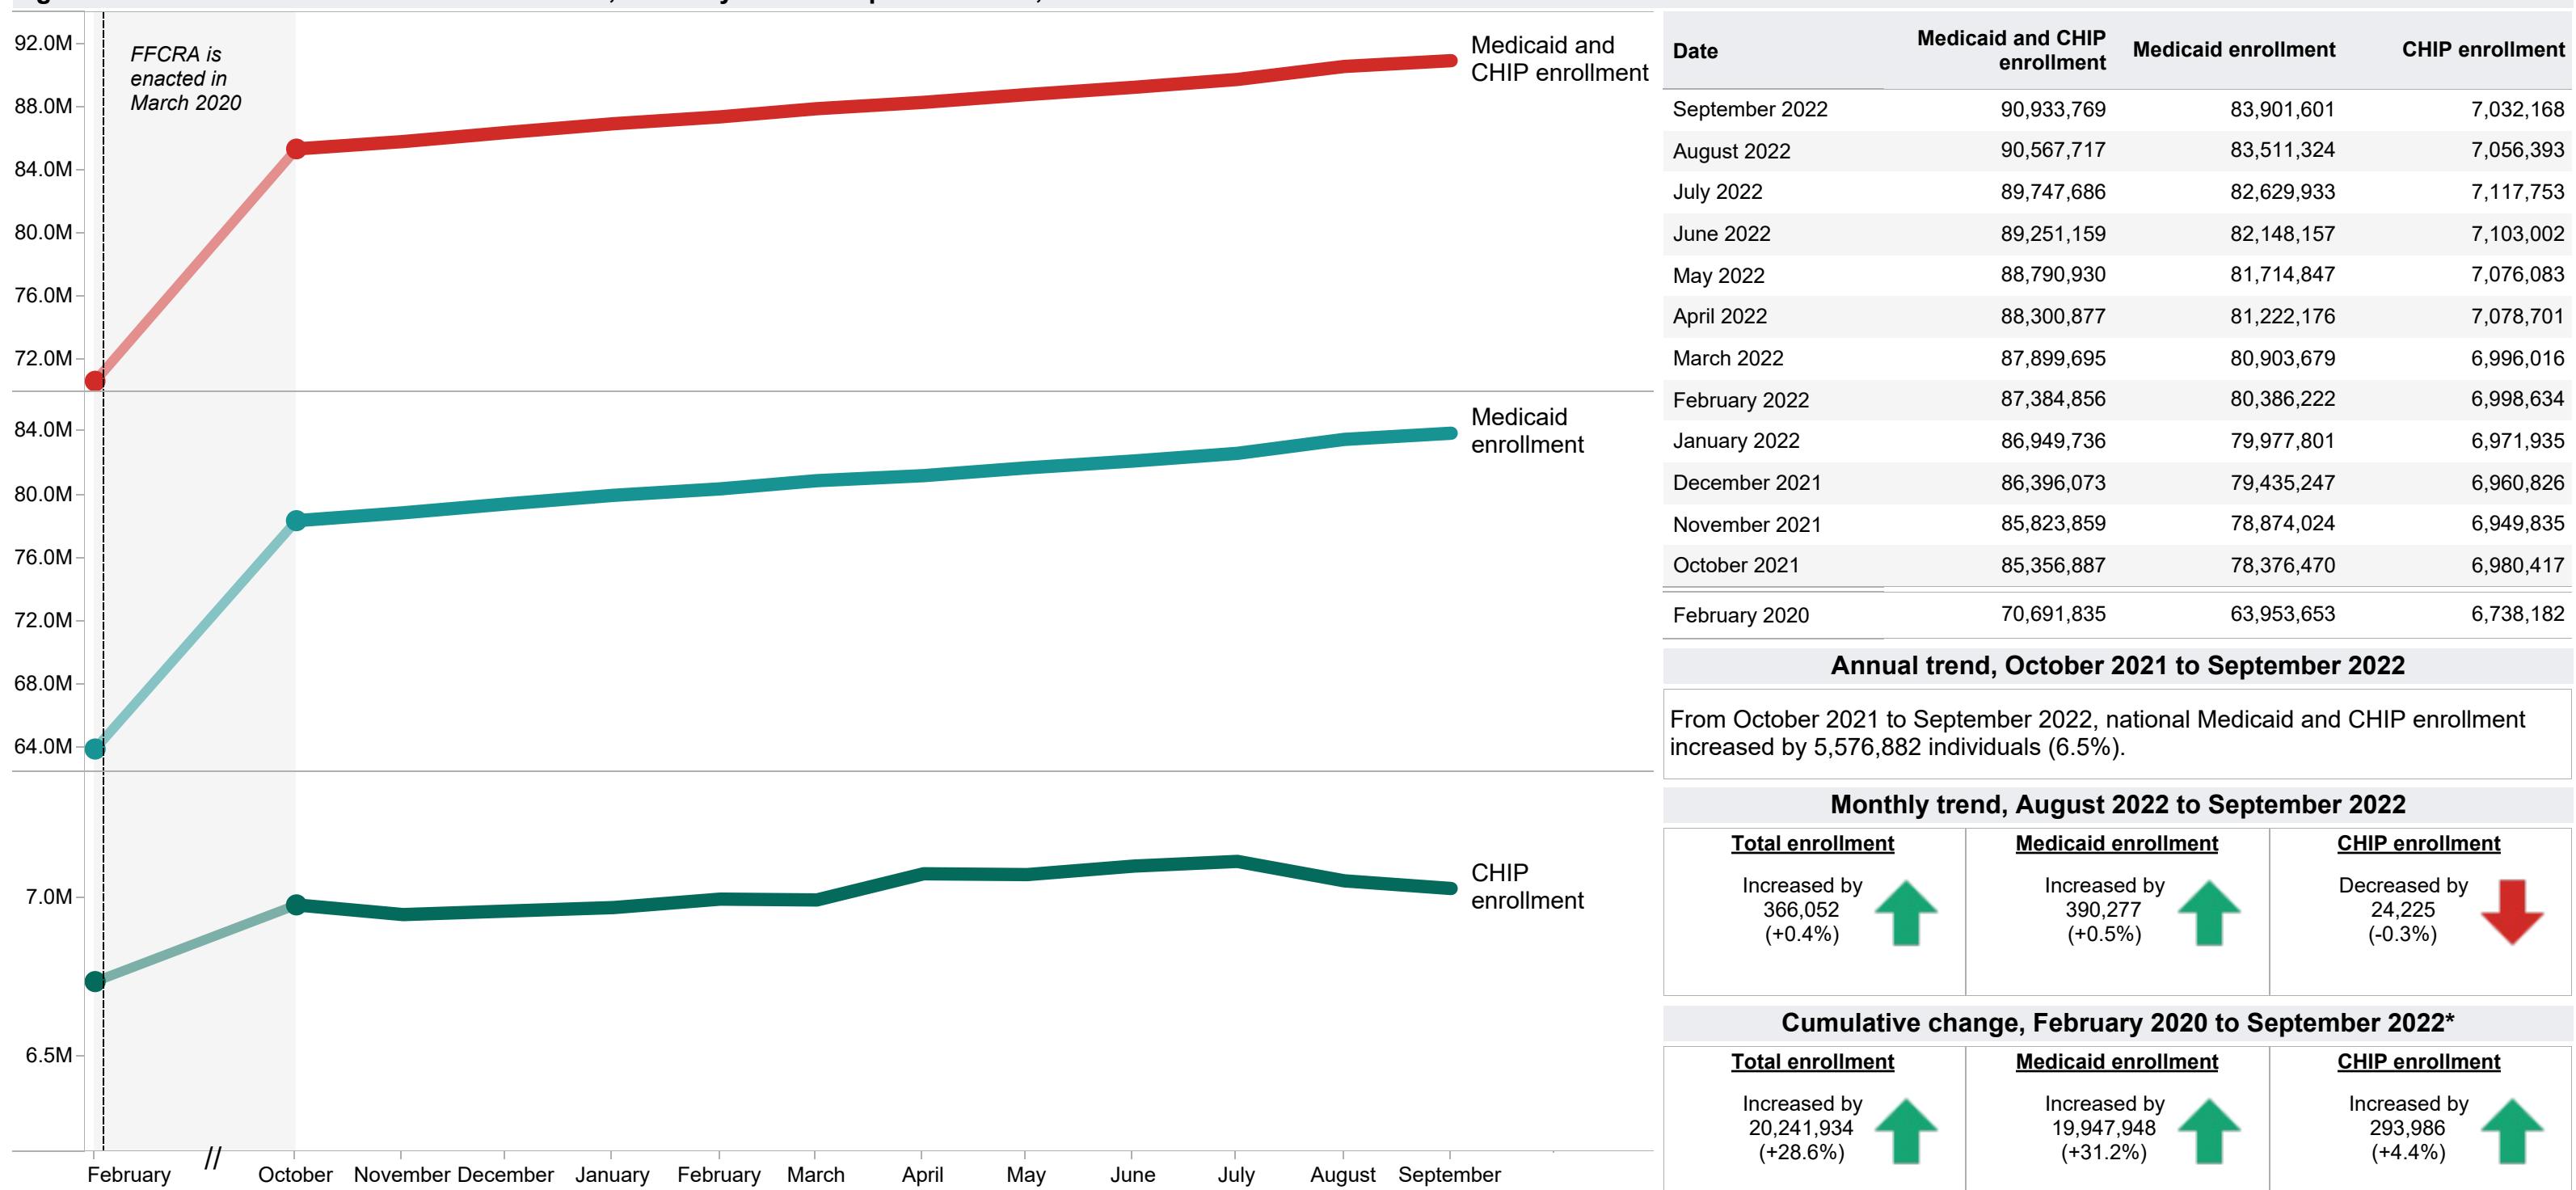

- In September 2022, 2,494,878 applications for Medicaid and CHIP were submitted directly to states.<sup>1</sup>
  - The number of applications submitted directly to states was 2 percent higher in September 2022 compared to August 2022.
- In September 2022, 119,919 applications were transferred from the Federally Facilitated Marketplace (FFM) to states.<sup>2</sup>
  - The number of transferred applications was 10 percent lower in September 2022 compared to August 2022.

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

<sup>1</sup> These counts include applications received by 49 states and the District of Columbia. Kansas is excluded because the state did not report applications data for July 2022 and August 2022. For additional information, please see Figure 6.

<sup>2</sup> These counts include applications received by 48 states and the District of Columbia. Kansas and Maine are excluded because these states did not have complete data on the number of applications submitted directly to the states between February 2020 and September 2022. For additional information, please see Figure 5.

**Figure 1. National Medicaid and CHIP enrollment, February 2020 to September 2022, CMS Performance Indicator Data**

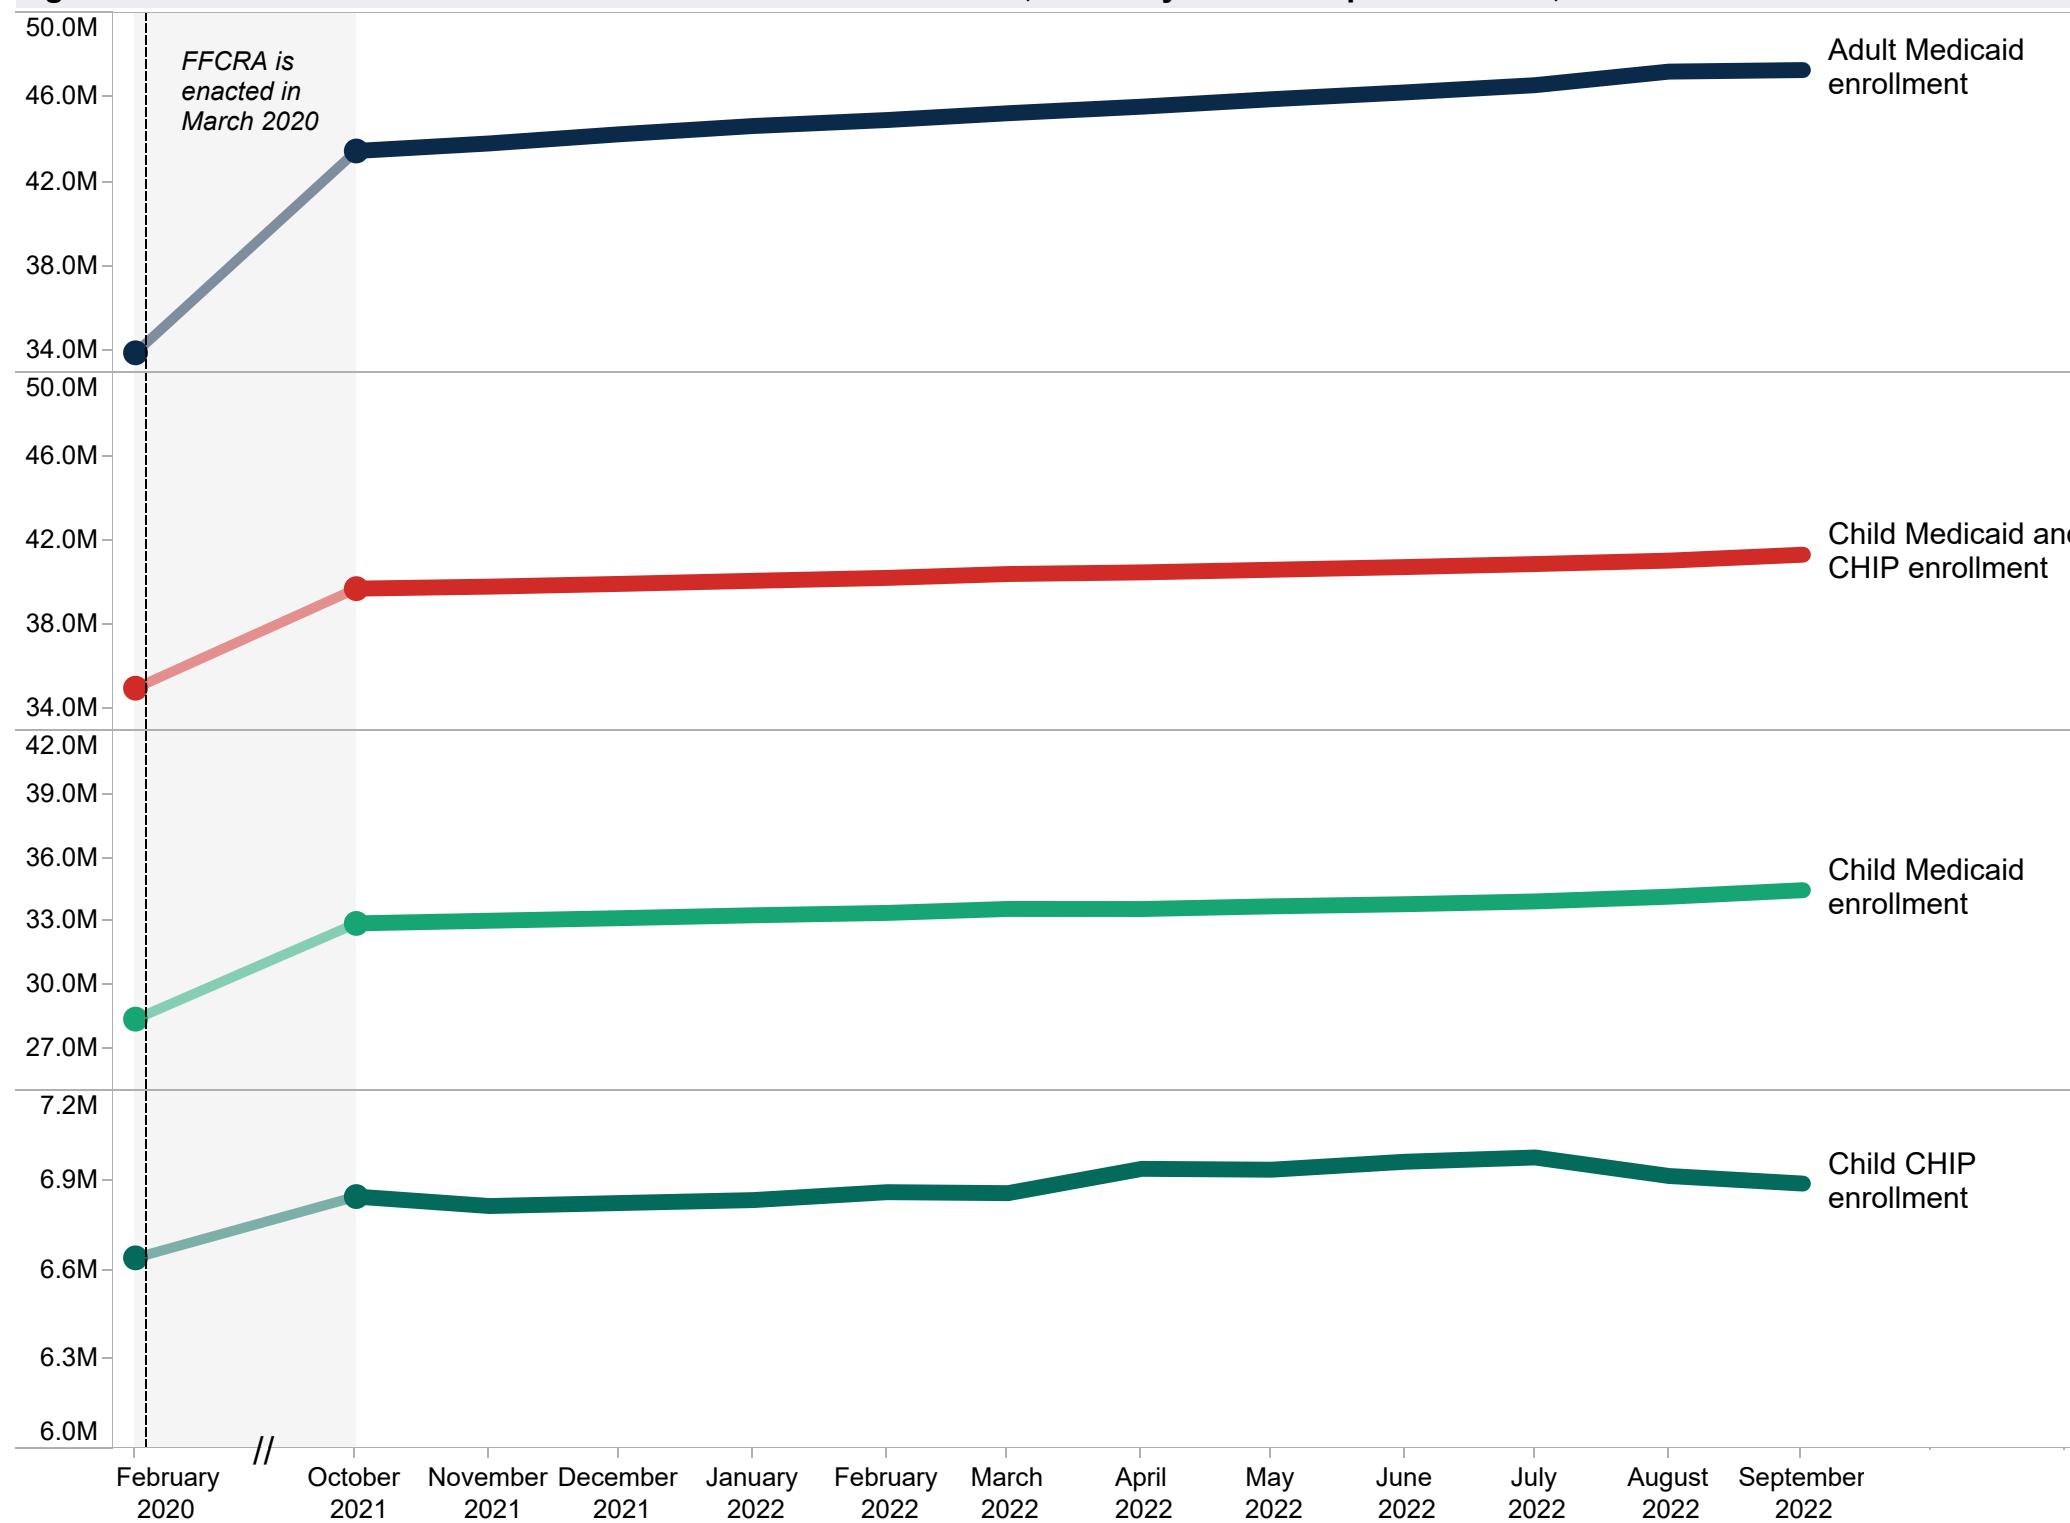

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

**Note:** This analysis includes preliminary enrollment data from 50 states and the District of Columbia. "FFCRA" refers to the Families First Coronavirus Response Act. Section 6008 of FFCRA includes a continuous enrollment condition, which makes available a temporary 6.2 percentage point increase to each state or territory's federal medical assistance percentage (FMAP) during the national public health emergency. As a condition of receiving the FMAP increase, states must meet several requirements pertaining to eligibility and maintenance of enrollment.

**Data Context:** The decrease in CHIP enrollment is primarily driven by an update in reporting methodology by the state of Texas. In Texas, CHIP enrollment decreased by 10.8 percent (56,306 individuals) while child Medicaid enrollment increased by 3.9 percent (142,723 individuals) in September 2022.

\*The cumulative change compares the most recent enrollment data to February 2020, which serves as a baseline of enrollment prior to the impacts of the COVID-19 pandemic and FFCRA's continuous enrollment condition. For additional information on Medicaid and CHIP enrollment from December 2019 to September 2022, please see Appendix A.

**Figure 2. National adult and child enrollment in Medicaid and CHIP, February 2020 to September 2022, CMS Performance Indicator Data**

Date	Adult Medicaid enrollment	Child Medicaid and CHIP enrollment	Child Medicaid enrollment	Child CHIP enrollment
September 2022	47,304,709	41,371,252	34,481,623	6,889,629
August 2022	47,232,183	41,090,427	34,175,344	6,915,083
July 2022	46,591,349	40,928,366	33,951,218	6,977,148
June 2022	46,250,651	40,784,137	33,821,236	6,962,901
May 2022	45,928,077	40,656,061	33,719,906	6,936,155
April 2022	45,576,516	40,531,705	33,592,613	6,939,092
March 2022	45,266,362	40,454,352	33,596,800	6,857,552
February 2022	44,945,784	40,269,844	33,408,975	6,860,869
January 2022	44,662,473	40,131,531	33,297,229	6,834,302
December 2021	44,272,039	39,984,352	33,159,990	6,824,362
November 2021	43,840,975	39,854,697	33,040,318	6,814,379
October 2021	43,483,394	39,759,922	32,913,782	6,846,140
February 2020	33,952,691	35,033,355	28,392,690	6,640,665

#### Annual trend, October 2021 to September 2022

From October 2021 to September 2022, national adult and child enrollment increased by 5,432,645 individuals (6.5%).

#### Monthly trend, August 2022 to September 2022

Adult Medicaid enrollment	Child Medicaid and CHIP enrollment
Increased by 72,526 (+0.2%)	Increased by 280,825 (+0.7%)

#### Cumulative change, February 2020 to September 2022\*

Adult Medicaid enrollment	Child Medicaid and CHIP enrollment
Increased by 13,352,018 (+39.3%)	Increased by 6,337,897 (+18.1%)

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

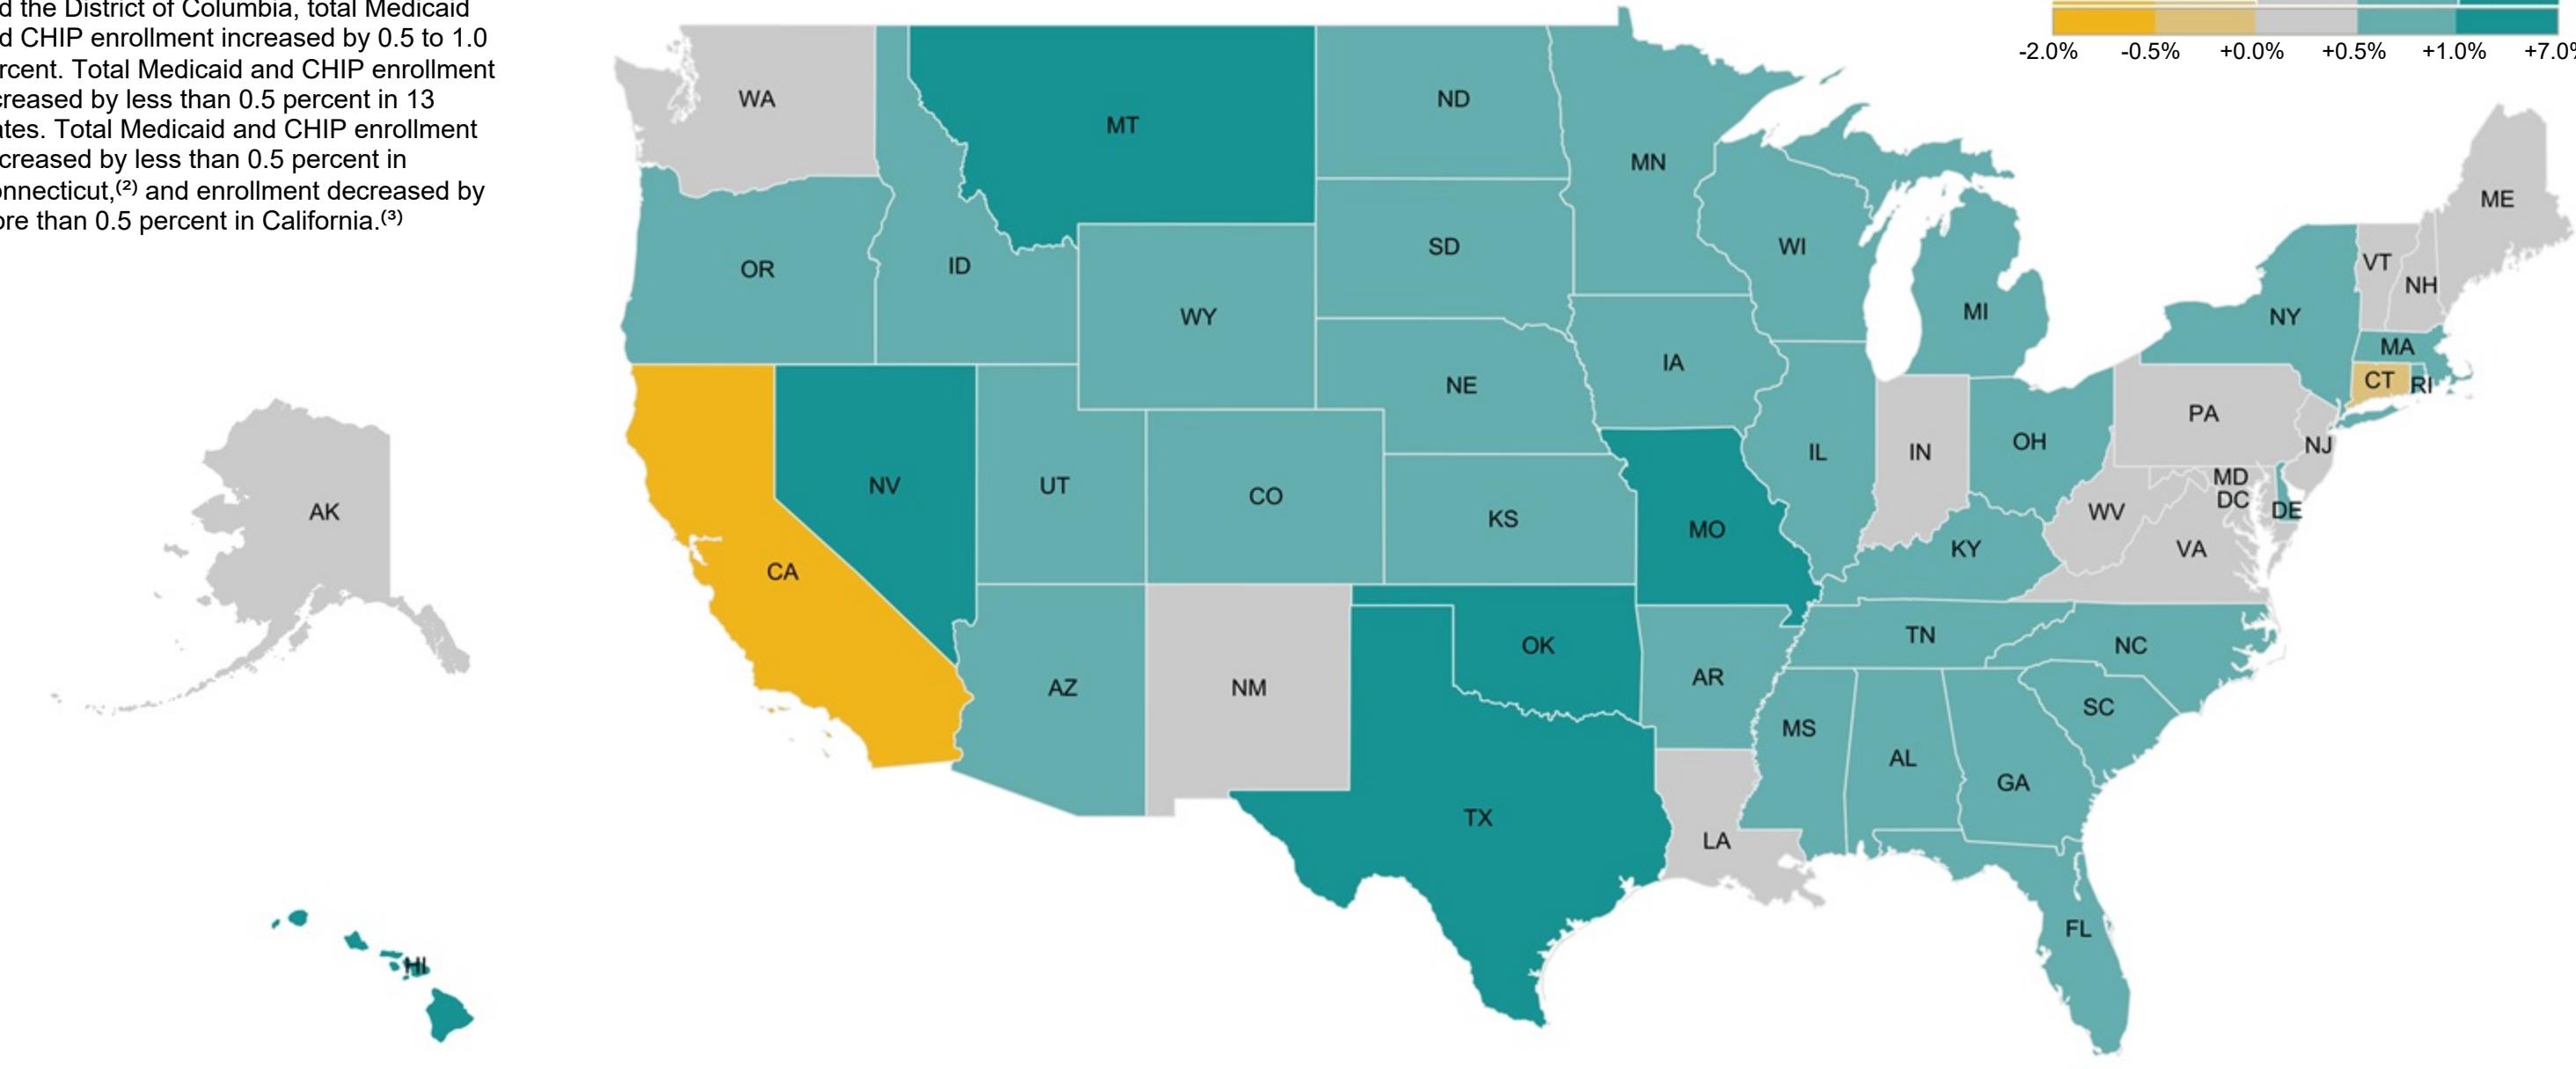

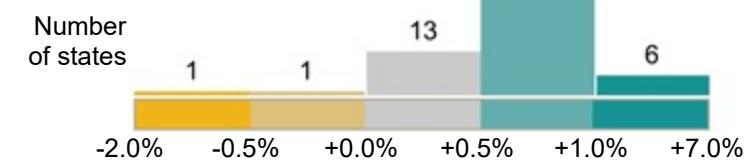

**Note:** This analysis includes preliminary enrollment data from 49 states and the District of Columbia. Arizona is excluded because the state did not report the breakouts for adult and child enrollment between February 2020 and September 2022. "FFCRA" refers to the Families First Coronavirus Response Act. Section 6008 of FFCRA includes a continuous enrollment condition, which makes available a temporary 6.2 percentage point increase to each state or territory's federal medical assistance percentage (FMAP) during the national public health emergency. As a condition of receiving the FMAP increase, states must meet several requirements pertaining to eligibility and maintenance of enrollment.

\*The cumulative change compares the most recent enrollment data to February 2020, which serves as a baseline of enrollment prior to the impacts of the COVID-19 pandemic and FFCRA's continuous enrollment condition. For additional information on adult and child enrollment in Medicaid and CHIP from December 2019 to September 2022, please see Appendix B.

**Figure 3. Change in total Medicaid and CHIP enrollment, August 2022 to September 2022, CMS Performance Indicator Data**

**Nationally, total Medicaid and CHIP enrollment increased by 0.4 percent from August 2022 to September 2022.** In 6 states, total Medicaid and CHIP enrollment increased by 1.0 to 3.0 percent.<sup>(1)</sup> In 29 states and the District of Columbia, total Medicaid and CHIP enrollment increased by 0.5 to 1.0 percent. Total Medicaid and CHIP enrollment increased by less than 0.5 percent in 13 states. Total Medicaid and CHIP enrollment decreased by less than 0.5 percent in Connecticut,<sup>(2)</sup> and enrollment decreased by more than 0.5 percent in California.<sup>(3)</sup>

### Percentage change in Medicaid and CHIP enrollment

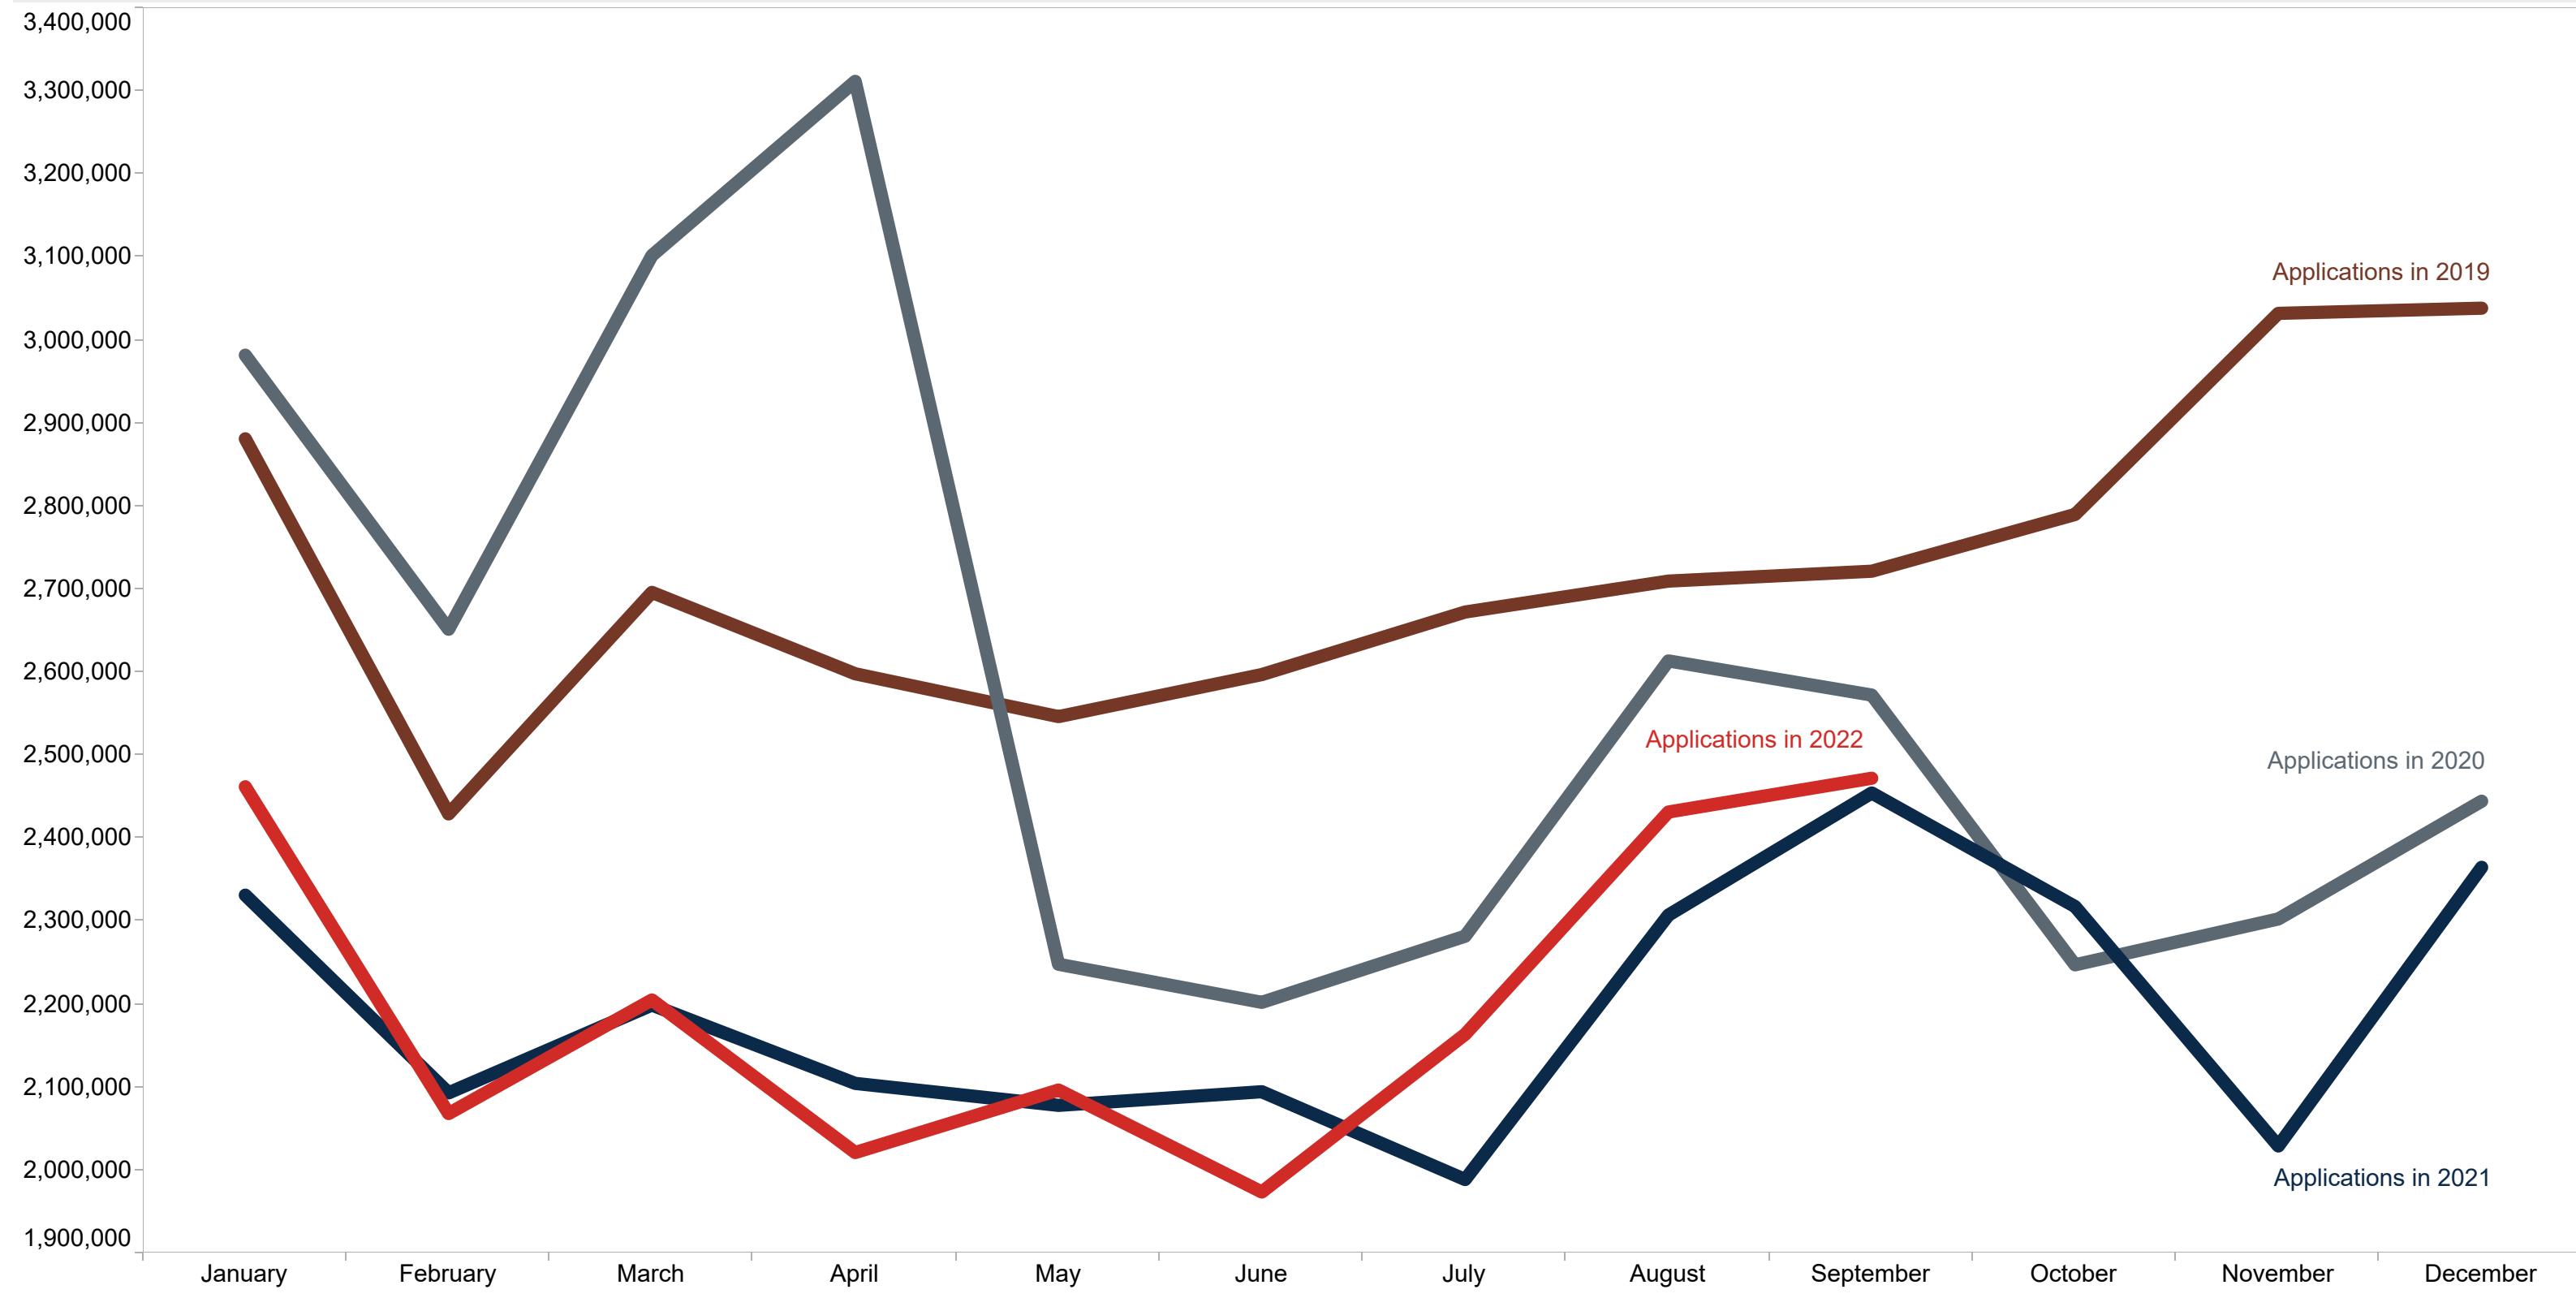

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

**Note:** This analysis includes preliminary enrollment data from 50 states and the District of Columbia.

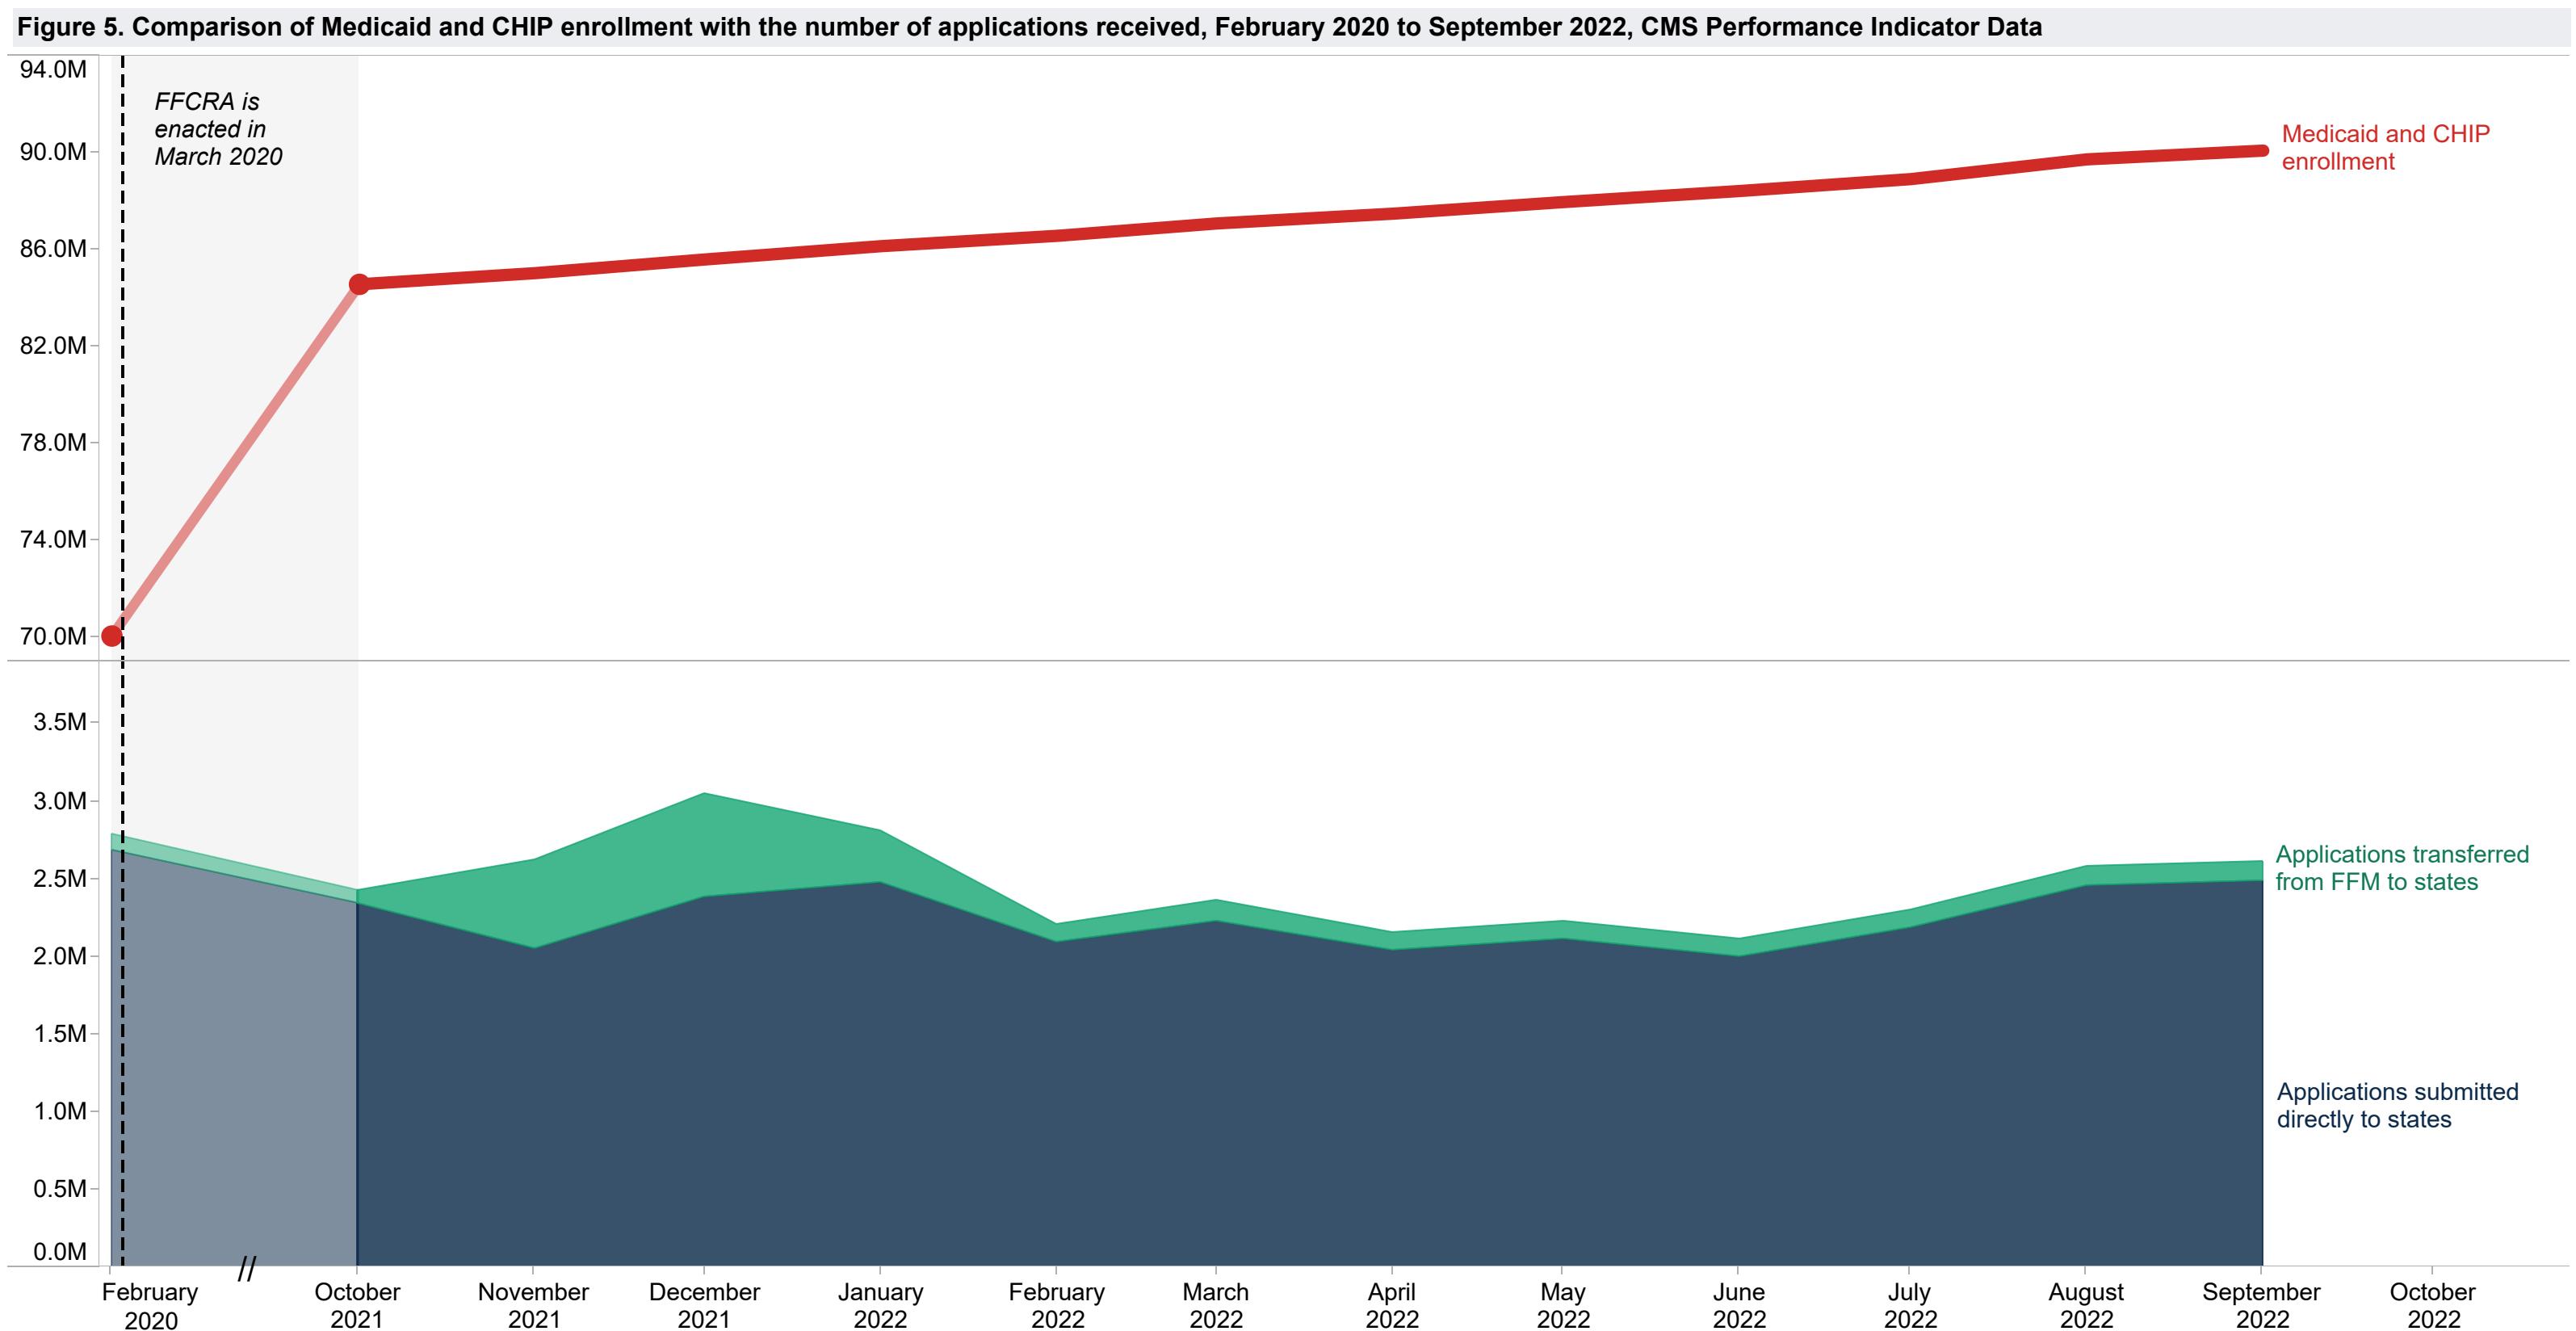

**Data Context:** (1) In September 2022, total Medicaid and CHIP enrollment increased by more than 1.0 percent in 6 states. In Oklahoma, Missouri, and Montana, increases in total Medicaid and CHIP enrollment were primarily driven by adult Medicaid enrollment. In Hawaii, total Medicaid and CHIP enrollment increased by 3.9 percent (16,882 individuals). The state reconciled its enrollment and eligibility systems and determined that prior to September 2022, the state was under-reporting total Medicaid and CHIP enrollment. In Nevada, total Medicaid and CHIP enrollment increased by 6.8 percent (59,722 individuals); the state attributes this increase to a data reporting error and has corrected the issue. In Texas, CHIP enrollment decreased by 10.8 percent (56,306 individuals) while child Medicaid enrollment increased by 3.9 percent (142,723 individuals); the state attributes these fluctuations to an update in its reporting methodology. (2) In Connecticut, total Medicaid and CHIP enrollment decreased by 0.3 percent (3,385 individuals); the state attributes this decrease to a data reporting error and is correcting the issue. (3) In California, total Medicaid and CHIP enrollment decreased by 1.4 percent (194,037 individuals); the state attributes this decrease to correcting a data reporting error.

**Figure 4. National Medicaid and CHIP applications submitted directly to states from 2019 to 2022, CMS Performance Indicator Data**

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

**Note:** Applications submitted directly to states include applications received by any state agency with the authority to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM are not included. This analysis includes preliminary applications data from 47 states and the District of Columbia. Kansas, Maine, and Tennessee are excluded because these states did not report applications data for one or more months between January 2019 and September 2022.

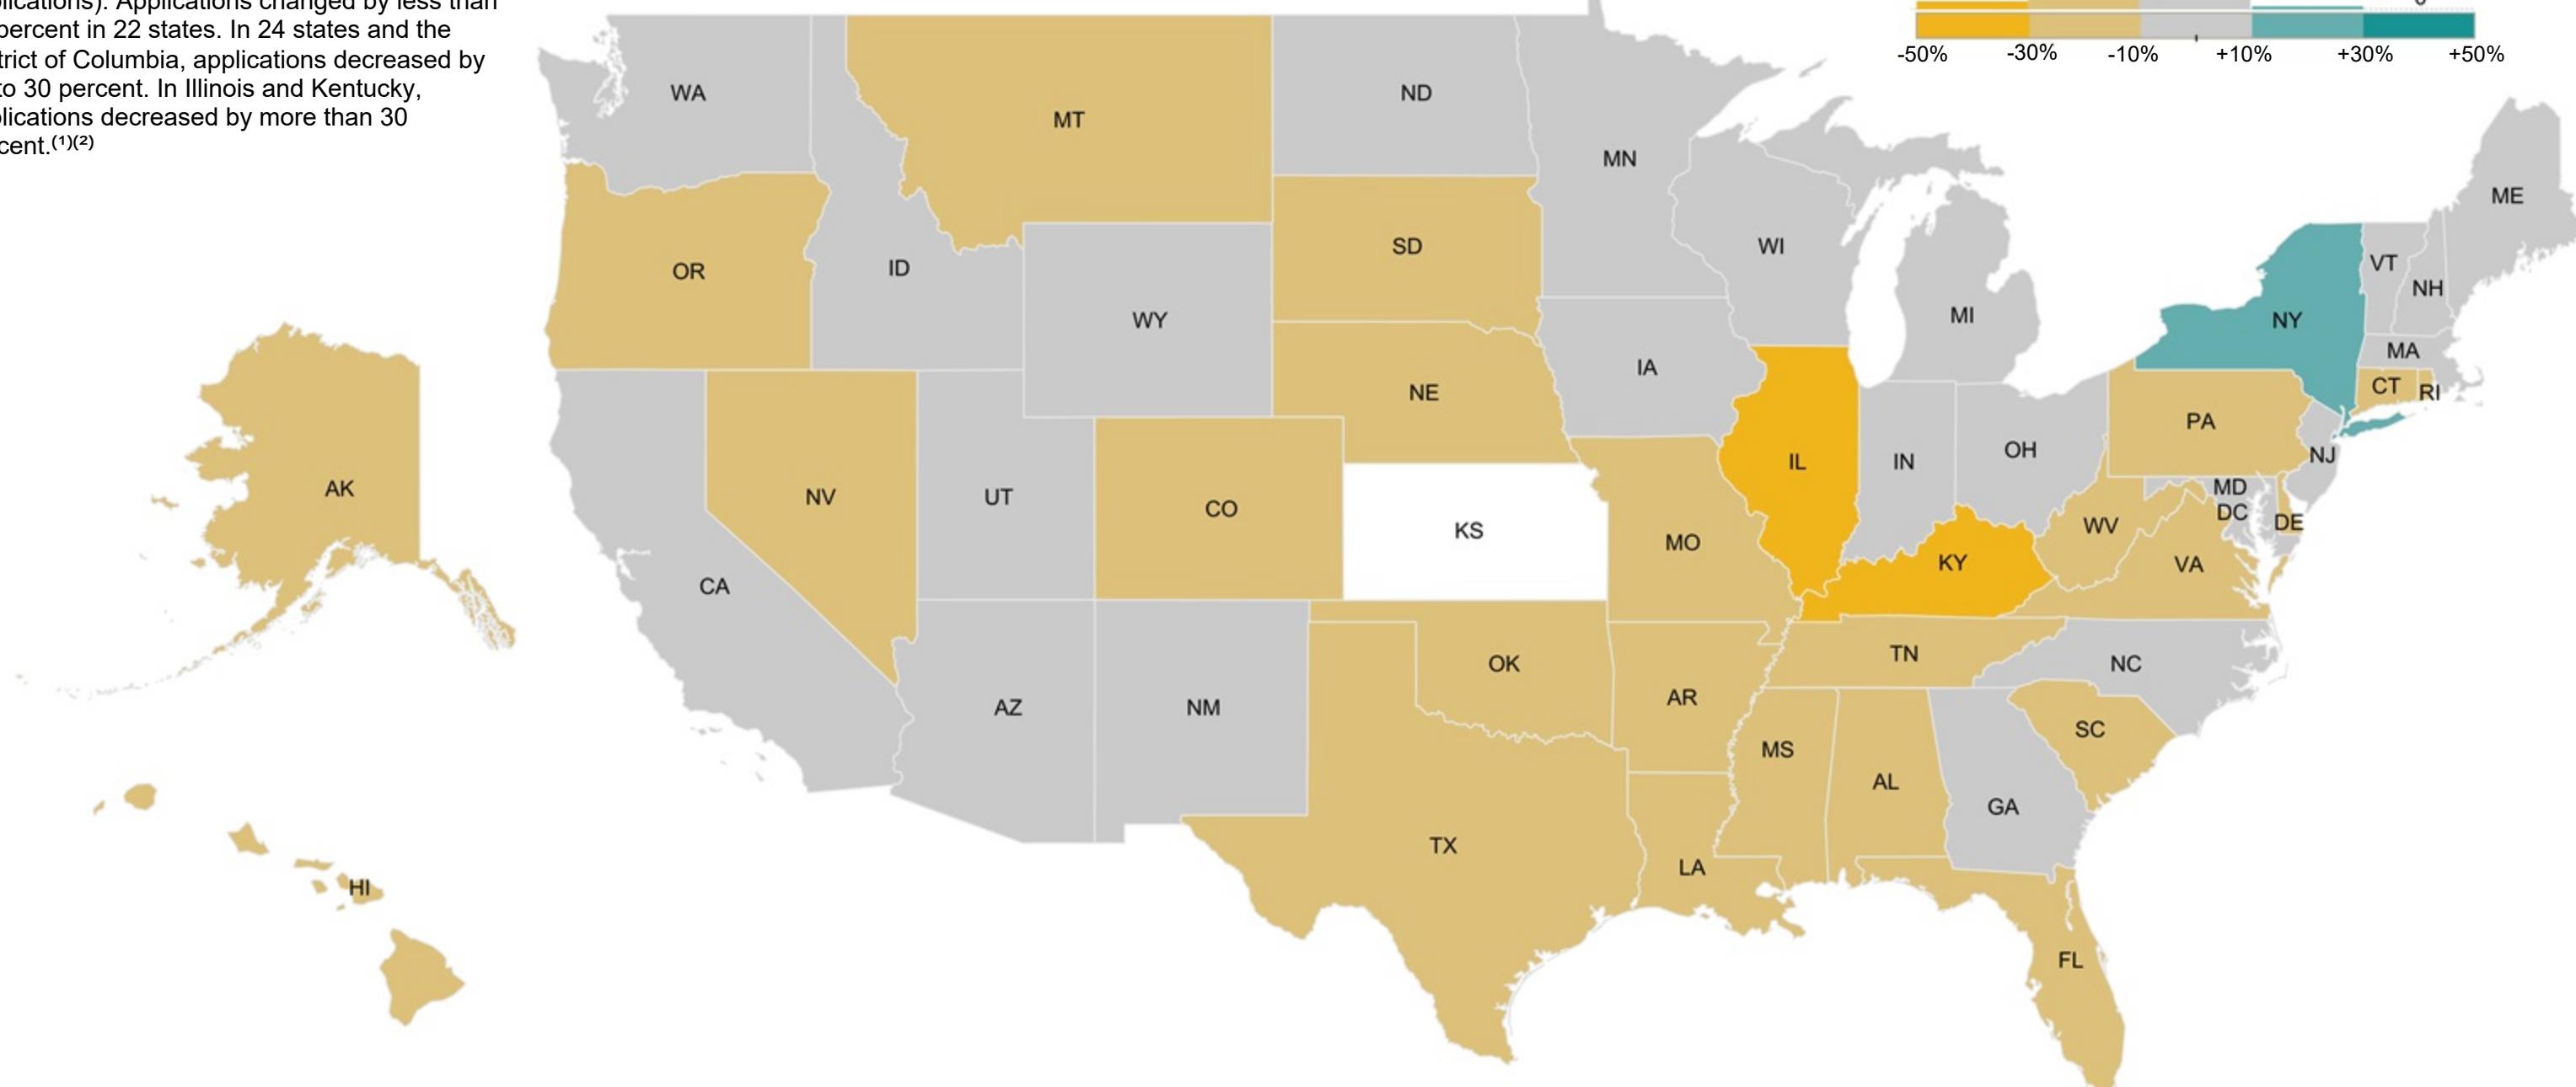

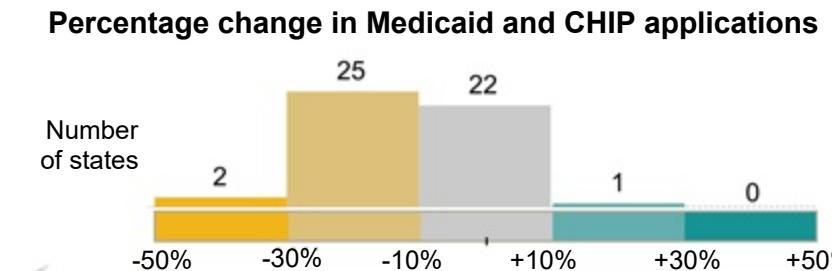

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

**Note:** Applications submitted directly to states include applications received by any state agency with the authority to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM to states include the total number of accounts electronically transferred from the FFM to states for Medicaid or CHIP. This analysis includes preliminary enrollment, applications, and account transfer data from 48 states and the District of Columbia. Kansas and Maine did not report data on applications submitted directly to the state for one or more months between February 2020 and September 2022, and so are excluded from this analysis.

**Figure 6. Change in Medicaid and CHIP applications submitted directly to states, August 2022 to September 2022, CMS Performance Indicator Data**

Nationally, the number of Medicaid and CHIP applications submitted directly to states was about 2 percent higher in September 2022 compared to August 2022. In New York, applications increased by 22.5 percent (201,170 applications). Applications changed by less than 10 percent in 22 states. In 24 states and the District of Columbia, applications decreased by 10 to 30 percent. In Illinois and Kentucky, applications decreased by more than 30 percent.<sup>(1)(2)</sup>

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

**Note:** Applications submitted directly to states include applications received by any state agency with the authority to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM are not included. This analysis includes preliminary applications data from 49 states and the District of Columbia. Kansas is excluded because the state did not report applications data for August 2022 and September 2022.

**Data Context:** (1) In Kentucky, applications decreased by 34.4 percent (5,808 applications). This decrease is due to a large increase in applications in August 2022 related to disaster flooding. In September 2022, the number of applications received returned to more typical levels. (2) In Illinois, applications decreased by 36.2 percent (26,784 applications).

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

**Note:** This table summarizes Medicaid and CHIP enrollment since December 2019. This table is provided as a supplement to Figure 1, and includes preliminary enrollment data from 50 states and the District of Columbia.

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of November 21, 2022. Due to delayed state reporting, New Mexico's August 2022 data are substituted for the state's September 2022 data.

**Note:** This table summarizes adult and child enrollment in Medicaid and CHIP since December 2019. This table is provided as a supplement to Figure 2, and includes preliminary enrollment data from 49 states and the District of Columbia. Arizona is excluded from both Figure 2 and Appendix B because the state did not report the breakouts for adult and child enrollment between February 2020 and September 2022.

# Background

- This is a Center for Medicaid & CHIP Services (CMCS) Medicaid and CHIP Coverage Learning Collaborative (MAC LC) project that monitors Medicaid and Children’s Health Insurance Program (CHIP) enrollment trends, primarily using the Centers for Medicare and Medicaid Services (CMS) Performance Indicator Data.
- The MAC LC is a CMCS project that provides a forum for facilitated discussion and learning across CMS and states, with the goal of implementing and improving the programs, tools, and systems needed to ensure high-performing state health insurance programs. The MAC LC has enabled CMS to more effectively identify issues and also monitor and improve program performance.
- This snapshot is a companion to the September 2022 Medicaid & CHIP Application, Eligibility, and Enrollment Data posted on [Medicaid.gov](#).
- The Enrollment Trends project primarily relies on Performance Indicator Data. All states—including the District of Columbia—provide data each month about their Medicaid and CHIP eligibility and enrollment activity. These data reflect a range of indicators related to key application, eligibility, and enrollment processes within the state Medicaid and CHIP agency. The complete data set is available on [Data.Medicaid.gov](#).
