CMIT #*	Measure Steward	Measure Name	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023/2024	2025
1612	CMS	Nursing Facility Utilization (NFU-HH)[h]	X	X	X	X	X	X	--	--	--	--	--	--

X = Included in 1945 Health Home Core Set; -- = Not Included in 1945 Health Home Core Set.

AHRQ = Agency for Healthcare Research & Quality; AMA = American Medical Association; CMIT = CMS Measures Inventory Tool; CMS = Centers for Medicare & Medicaid Services; NA = Measure is retired from the Core Set and not in CMIT; NCQA = National Committee for Quality Assurance; PCPI = Physician Consortium for Performance Improvement; SUD=Substance Use Disorders.

More information on 2025 Updates to the Health Home Core Sets is available at https://www.medicaid.gov/resources-for-states/medicaid-state-technical-assistance/health-home-information-resource-center/health-home-quality-reporting/index.html.

* The CMS Measures Inventory Tool (CMIT) is the repository of record for information about the measures that CMS uses to promote healthcare quality and quality improvement. More information is available at https://cmit.cms.gov/cmit/. A public access quick start guide for CMIT is available at https://cmit.cms.gov/cmit/assets/CMIT-QuickStartPublicAccess.pdf.

[a] The Colorectal Cancer Screening (COL-HH) measure was added to the 2022 Health Home Core Set to address gaps in care and health disparities and to align with the Adult Core Set.

[b] The Use of Pharmacotherapy for Opioid Use Disorder (OUD-HH) measure was added to the 2020 Health Home Core Set to help states meet the new reporting requirements for states with an approved SUD-focused health home under Section 1945(c)(4)(B) of the SUPPORT Act and to align with the Adult Core Set.

[c] The Follow-Up After Emergency Department Visit for Substance Use (FUA-HH) measure was added to the 2020 Health Home Core Set to promote alignment across the Adult and Health Home Core Sets as well as to broaden the scope of SUD measures in the Health Home Core Set.

[d] The Follow-Up After Emergency Department Visit for Mental Illness (FUM-HH) measure was added to the 2022 Health Home Core Set because it addresses priority areas of access and follow-up care for adults with mental health or substance use disorders.

[e] The Adult Body Mass Index Assessment (ABA-HH) measure was retired from the 2021 Health Home Core Set because it was retired by the measure steward.

[f] The Prevention Quality Indicator (PQI) 92: Chronic Conditions Composite (PQI92-HH) measure was retired from the 2025 Health Home Core Set because states reported the results were not actionable and were difficult to trended with reliability.

[g] The Timely Transmission of Transition Record (CTR-HH) measure was retired from the 2018 Health Home Core Set due to the low number of states reporting this measure over time and the challenges states faced in reporting the measure.

[h] The Admission to an Institution from the Community (AIF-HH) measure changed for FFY 2019 from a measure of Nursing Facility Utilization (NFU-HH) to a measure that includes multiple rates and is based on a broader definition of institutional admissions.

[i] The Ambulatory Care: Emergency Department (ED) Visits (AMB-HH) measure was retired from the 2025 Health Home Core Set because it was retired by the measure steward.
