1115 Waiver (SUD) Evaluation Quarterly Report (DY3, Q2)

Project Activities

During the period defined in this report, Tulane continued regular monthly meetings with its research team and quarterly meetings with LDH to ensure consistent project coordination. Tulane continued to work with LDH to finalize the multi-year evaluation contract, which was completed during this period.

April

The April Tulane internal meeting was held on April 13th. Each lead researcher shared what information or elements were still needed to complete the analyses. The following preliminary list was compiled:

- Format or guidelines for the Analysis Results Reports

The following additional topics were discussed:

- Status of Baseline and Year 1 data analysis results
 - o All baseline results and partially year 1 results will be available
- STC 23 Mid-point Assessment
- IRB application submission status
- Status of SUD contract execution

The third quarterly meeting with LDH and Tulane was held on April 13th, following the Tulane internal meeting. The needs and goals defined in the internal meeting were discussed with the LDH team and the following outcomes were documented:

- LDH has requested guidelines from CMS for the analysis results reports, but does not have any information to share at this meeting
- STC 23 Mid-point assessment
 - o Tulane's internal subgroup will set up a meeting with key LDH team members after their meeting with CMS on April 22nd

During the meeting, the following updates were provided by LDH:

- MCO Improvement Projects have been suspended by CMS until further notice

- This was a project in place for about a year and was having good results but was suspended a month ago due to Covid-19 response.
- Candace can provide additional information as needed
- CMS returned the monitoring protocol with revisions and LDH is working on implementing those revisions before returning to CMS. They will keep us updated on this process.
 - One of the major revisions requested by LDH was to shift the reporting timeline to calendar year quarters rather than demonstration year quarters.

- Status of Baseline and Year 1 data analysis results
 - Baseline analysis completed on 4/30
